Peter Burroughs joins in with what Gleadow says above. In *"The Mauritius Rebellion of 1832 and the Abolition of British Colonial Slavery"*, which was published in the *"Journal of Imperial and Commonwealth History, May 1976, Volume IV Number 3"* Burroughs made reference to an exchange of letter "Buchanan to Lefevre, dated 7th June 1833"<sup>2</sup> underlining: *"Shrewd scheming advocates with the eye to augmenting fees and influence found unlimited scope to ensnare opponents in the meshes of law, prolong cases brought before trial, and emasculate unpopular legislation. The local bar buttressed its enviable position by restricting the number of "Avoués" who could practice and making this privilege a monopoly of foremost French families. Because of its intimate association with planters and merchants through intermarriage, investment, and a common concern to defend the status quo, as well as its mastery of the obscurities of French commercial and land law, the legal fraternity dominated to an extraordinary degree the life of the whole community and exploited that predominance for selfish ends. Whenever the British Government devised incongenial policies or threatened to undermine the oligarchy's ascendancy, judges and lawyers could and did unashamedly empty the Courts to protect their sectoral interests. British merchants and creditors, for example, who, by 1832, apparently held mortgages on all but one of the island's sugar plantations, protested regularly about being defrauded by Mauritian debtors because of partisan "Avoués" and antiquated French laws so 'remarkably convenient for cheating the British out of their money'. They persistently urged the Colonial Office to introduce English laws and English Judges"* .

The 1920s witnessed the collapse of the sugar industry, the decline of cultivation of sugar as well as the reduction of sugar produced by small planters, followed by the emigration of others to South Africa. At the same time occurred the policy of centralization and concentration up to this day.

At the closing date of 30<sup>th</sup> June 2010, the Truth and Justice Commission received some 230 files from claimants in Mauritius and 30 others from Rodrigues, to be analysed and assessed in order to find out how dispossession occurred. The background highlighted above gives an idea of how things happened at different periods of our history.

The views of the Commission are expressed in each case submitted, with recommendations and advice to the claimants and deponents, who called at the Office of the Truth and Justice Commission during these last few months, are also included.

Some 80 other files could not be attended to due to lateness of submission of claims and the time constraint. The categorisation and number of cases set before the Commission between July 2009 and June 2010 are established as follows.

**CASE NAME: LA FLECHE**

TJC/L/0002/ANTOINE MARIE NOELLE AND OTHERS

The applicant, Marie Noëlle Antoine *born* Rome, heiress of Auguste La Flèche, together with other members of her family, state that Auguste La Flèche bought on 11<sup>th</sup> February 1845 a plot of land from one Jean Baptiste Permout and his wife Honorine Yandel. The plot of land of approximately 118 *Arpents* formed part of “*une habitation plus grande contenance*” situated at ‘*Quartier de la Rivière Noire*’, *lieu dit “Les Plaines Saint Pierre.”* It has been said that due to the inability of La Flèche to pay for the purchase of the land, it has been seized. But, the family avers that the official record underlines that “*le dit jugement n’a pas été transcrit car dans la Case hypothécaire de Auguste La Flèche, dit Siccard, la mention de saisie ne figure pas*”. In the «*Case hypothécaire*» of J. Baptiste Permout, there has been ‘*deux ventes du même terrain de 118 A 00 p à deux personnes différentes: l’un à M. Auguste La Flèche le 11.02.1845 et l’autre au prétendu Mon. et Madame Joseph Gélin le 30.11.1846. Mais étant donné que Monsieur Auguste La Flèche a eu main levée de Mon et Madame J.S Permout en date du 27 Février 1847 et qu’aucun jugement de saisie n’a été transcrit, j’en conclu alors que les droits de Auguste La Flèche, dit Siccard n’est pas éteint...*’ (p. 323 from *Rapport de Constat* of Jean Chaton Land surveyor on 21<sup>st</sup> August 2003).

The 118 *Arpents* belonging to Auguste La Flèche, states the applicant, was illegally sold being included in the sale of 312 *Arpents* to Brousse de la Borde and Marguerite Lucia Camoin.

The plot of 312 *Arpents* was sold several times.

In 1946, the land was sold to one Abdoolatif Hosseman.

On 5<sup>th</sup> February 2002, by order of Supreme Court, Raffic Osman and Karim Osman who were occupying the land illegally after formal claims, were summoned to quit and leave and vacate completely the said portion of land of 118 *Arpents* on request of the heirs of Auguste La Flèche (Summons from Supreme Court *refers*).

On 6<sup>th</sup> August 2002, there was a writ from the Supreme Court regarding withdrawal of the application.

The applicant declares that her uncle, Jules Edouard Rome (now deceased), represented the family in Court. The family ignores what has happened really on that day. Jules Edouard Rome was possibly forced into a decision due to the fact that there was no Land surveyor report to support the ownership of the La Flèche family.

The family restarted procedures to get back the land as the land is still there. She often goes there. There is still a chapel in ruins and tombs, which the elders say, are La Flèche family tombs.

In a second claim, the La Flèche family avers that Dame Babet, Widow La Flèche, mother of Auguste La Flèche obtained a “*Titre de concession*” at the Emplacement Ilôt (section 86 No 3) on 17<sup>th</sup> October 1836. The extents of the 2 portions of land are of 18 toises and 6 ft and 7 toises 2 ft. respectively. The land is found at Royal Road, Port-Louis.

She says that, at present, the land is a car parking owned by four persons. She says that the bakery owned by Auguste La Flèche was situated there.

In a third case laid before the Commission, Marie Noëlle Antoine says that Aristide La Flèche owned several plots of land in Rose Hill.

Concerning claims 1 & 2, the applicant submitted several documents to support their claims, but no document was submitted for Case 3.

The family requests the Commission to undertake searches and to assist them in getting their land back.

After having lengthily perused the file, the Commission has come to the following conclusion:-

In virtue of title deed transcribed in Volume 44 No. 380, Jean-Baptiste Permont sold to Auguste La Flèche a plot of land of an extent of 118 *Arpents* situated at Black-River on the 28<sup>th</sup> January 1845.

In virtue of title deed transcribed in Volume 46 No. 233, Jean-Baptiste Permont exchanged the same plot of land of 118 *Arpents* situated at Black River against a plot of land of 220 toises situated at Mahébourg, belonging to Joseph Gelin and his wife on 30<sup>th</sup> November 1846.

On page 2 of the above-mentioned title deed (TV 46 No. 233) it is specified that due to the non-payment of the sale price of the land the '*resolution*' thereof has been pronounced by the consent of the said La Flèche '*par sentence du tribunal de première instances de cette île en date du six avril dernier (1846) dument enregistré le 27 du même mois RC 69 No. 3047 en droit de vingt livres sterling et signifie par exploit de Panguy, huissier en date du 25 novembre courant (1846). L'original duquel exploit, enregistré le dit jour vingt cinq novembre courant (1846) est demeuré annexé, après avoir été de lui certifié véritable et signé en présence des notaires soussigné - la dite résolution de vente a été prononcé par le tribunal pour les dits Sieur et Dame Permont être et redevenir propriétaires du dit bien franc et quitte de toutes charges et hypothèques du fait du dit Sieur La Flèche dit Sicard, et ce aux termes de la dite sentence sus-relatée.*'

It is to be noted that the above-mentioned fact has not been taken in consideration by late Jean Chaton in his report dated 21<sup>st</sup> August 2003.

Furthermore, as matters stand as at today, it is worth noting that the claim made by the heirs of La Flèche is not without any difficulty particularly on a legal standpoint, the occupation by the Document lacks all the requisites of occupation as it has not been continuous, peaceful, public, non-equivocal, uninterrupted, *animo domini*, '*à titre de propriétaire*' and apparent.

It is also the claim of the applicant that the land has been illegally sold in a sale of 312 *Arpents*, and same was sold several times and lately in 1946 to A. Hosseman. The fact remains a case before the Supreme Court was entered by the heirs claimant ordering Osman and parties to quit, leave and vacate but same was withdrawn by the claimant's Attorney on the 6<sup>th</sup> August 2002, "*with costs*".

This withdrawal before the Court speaks volume in terms of the ownership of the claimant, with regard to the veracity and their interest in vindicating their rights over the property.

On the other hand, it is the contention of the Land Surveyor T. Chaton, to the effect that the "*rights of the claimant*" is still a live issue.

Based on his reports, Chaton, henceforth, acknowledged that the company, '*The New Belle Isle Estate Ltd*' is the owners of a land situate at Plaines Saint Pierre of 118 *Arpents* and same has been duly transcribed (TV No. 504 and 506).

There is also undisputed issue that by virtue of the title deed Volume 46 No. 233 that J.B Permont exchanged the plot of 118 *Arpents* against a plot of 225 toises situated at Mahébourg belonging to Joseph Gelin and his wife on 30<sup>th</sup> November 1846. This explains why the issue of transcription has not been effected since the land "*in lite*" was exchanged (TV 31 No. 20).

It is also of interest to note that upon the findings of Chaton, he concluded as follows: «*La compagnie New Belle Isle Estate Ltd est propriétaire d'un terrain de 118 A et ce terrain y trouve l'ancienne Usine et l'Etablissement principal d'une contenance de 118 A*» and Chaton went on '*le terrain des héritiers La Flèche est doté de seulement d'une mine et quelques tombes anciennes mais pas de bâtiments administratifs...*'

Even though the Auguste La Flèche has been initially the owner of the land in title as per the title deed Volume 44 No. 380 on the 28<sup>th</sup> January 1845, the said Auguste La Flèche has relinquished such right as per the title deed TV 46 No. 233 due to the non-payment of the sale price of the land.

Due to the fact that the tribunal had resolved (annulled) the first title deed drawn up in the name of Auguste La Flèche, the heirs of late Auguste La Flèche do not have any right on the relevant plot of land.

\*\*\*\*\*

**CASE NAME: TANCREL**

TJC/L/0003/TANCREL DANIELLE &amp; OTHERS

The deponents (Joan Pierre Tancrel and Mrs Marie Danielle Fitzgerald, born Tancrel) claimed to be the direct and legitimate heirs of late Antoine Tancrel, who was among the first French *colons* settling in Mauritius and who had acquired several plots of land in the District of Flacq situated at Rivière Coignard, Camp de Masque.

In support of their claim, they have submitted some documents before the Commission, namely for a plot of land of the extent of 86 *Arpents* at Rivière Coignard and for another plot of land of the extent of 452A15 perches at Camp de Masque.

Most of the descendants of the Tancrel family now live abroad - South Africa, England, America, and France. The deponents find it hard to gather information on their family and on the land their ancestors possessed. They have, nevertheless, done quite a bit of research to that effect.

The deponents aver that, initially, the Tancrels had about 1,000 *Arpents* in the East of Mauritius, most of them occupied now by FUEL Sugar Estate.

It appears also that in the nineteenth century (around 1850), one Tancrel having had children with slaves would be classified as *Gens de couleur*. This state of affairs seems to be the root of the problems with regard to land dispossession.

Some 30 years ago, some relatives living in UK and France visited Mauritius and went to discuss with some Lawyers/Attorneys who, in turn are the descendants of Gujadhur family. They had a rough time and could not come up with any clarifications. It is noted that the Gujadhurs possessed the sugar estates L'Unité and L'Union which, after merging with other sugar estates, became FUEL. The Tancrels had land which formed part of L'Unité.

The Commission made several suggestions to the deponents to assist them in their research: Consulting the Registry of Cemeteries, les Registres Paroissiaux, *Government Gazette* and *Mauritius Almanac*, the Report on Sugar Unrest in 1937 in Flacq.

This is a complex case with many loose ends, but, nevertheless, it seems to be a typical case of dispossession by Sugar Estates, of land belonging to a French *colon*, who had children with a woman slave.

The family was advised to contact a Land Surveyor to make a "*Constat Report*" to enable them to pursue further their claim. They retain the services of Ravindrananth Bhurtun, Land Surveyor, for a "*Constat Report*".

In a Report drawn up on 19<sup>th</sup> July 2011 Registered in Reg A 770 No. 4957, Land surveyor R. Bhurtun after having made searches about the location and ownership of the 86 *Arpents* located the land at Gibraltar, Camp de Masque, sandwiched between concessions Buttié, Routier and Marcotte as morefully indicated on his plan.

It is found in the middle and is mingled with the sugarcane plantations of Flacq United Estates Limited. R. Bhurtun confirms in his Report that the land of 86 *Arpents* is neither found in the "*Casier Hypothécaire*" of FUEL, nor in their title deeds. Moreover, that portion of land did not undergo any "*mutation de propriété*" todate.

The Surveyor Bhurtun concludes that the plan of concession Tancrel does fit on the now latest Map of LAVIMS from the Ministry of Housing and Lands.

The Chief Executive of FUEL, M.B.A. Joseph Vaudin was summoned before the Commission on 16<sup>th</sup> September 2011 to give evidence and produce documents relating to the occupation of the 86

*Arpents* which is being claimed by heirs of late Antoine Tancred on the basis of a deed dated 19<sup>th</sup> July 1783.

The Commission is not satisfied with the explanation given by the Chief Executive of FUEL as regards their ownership over that plot of land as no mention is made in their *Domaine Book* for *Domaine Camp de Masque* save "*that the land in question has been in continuous and uninterrupted occupation by FUEL since 1938 and before by Constance Maness*". In other words, FUEL has integrated the portion of 86 *Arpents* without any supporting title.

One good note is that the land of the Tancred family appears on their plan submitted to the Commission and is astride on *Domaine Camp de Masque* and *Domaine Gibraltar*.

The documents submitted by ENL have been remitted to the Tancred family for further action at their end with a view to recover their land. It is up to them now to look for the old family cemetery, which they aver has been fenced by FUEL.

\*\*\*\*\*

#### **CASE NAME: MAYEUR/ CAZALENS/KISNORBO**

TJC/L/0004/ KISNORBO LOUIS.E.DIDIER & others

The applicant, Louis Eric Didier Kisnorbo, avers he is one of the heirs of Nicholas Mayeur on son's and daughter's side. The applicant's grandmother, late Anne Kisnorbo, born Cazalens, was the direct and legitimate heir of Nicholas Mayeur. Nicholas Mayeur acquired a property of 264 *Arpents* 90 of which 200 *Arpents* are left. Nicholas Mayeur died on March 1809 on his property at *Trois Ilots Olivia, Flacq*. In his will he gave his property of 210 *Arpents* to (1) Joseph Mayeur his son, "*noir libre*", (2) Marie Michèle Mayeur, his daughter "*Femme de Couleur*". He appointed as executor of his will, his neighbour, Pierre Marquet also called Cottry who was, at that time, the greatest land owner of *Trois Ilots*. Cottry withdrew as executor of his will and occupied the property (Document 2) as Joseph and Michèle Mayeur could not inherit from their father as le *Code Decaen* interdicted them as offspring of slaves, to inherit from their father who was a white man.

Pierre Marquet, also called Cottry, died on the 25<sup>th</sup> March 1825 and on the 1<sup>st</sup> February 1826, his widow, Hortense Marquet, also called Cottry, declared that the 200 *Arpents* belonged to Cottry and she bought back the shares of her children. This fraudulent acquisition is transcribed in the "*Bureau des Hypothèques*" twenty-six years after as evidenced by N53/193, allowing enough time to plead prescription. Widow Marquet, also called Cottry, has not been able to produce the title deed during this sale/acquisition by auction in one lot of the property from 1<sup>st</sup> February 1826 until today. It is written in Document 4: "*Les titres de propriété de l'immeuble formant le second lot se trouvant perdu ou à dire, l'adjudicataire du dit lot ne pourra exiger d'autre titres que le procès verbal d'adjudication...*"

From this day up to now, the title deed of the property of Nicolas Mayeur has never been produced during the successive changes of proprietors, neither by the vendors nor by the buyers not even by the different notaries.

According to Octave Béchet, in his book entitled *Les anciennes Sucrieries de l'île Maurice* (1960), the old property *L'Etoile* belonging to Dalais family, is delimited by the property belonging to Mayeur. According to Béchet, the Mayeur or heirs are still the owners.

In their request before the Commission, the heirs want:

- Restitution of the land to the heirs; and
- Compensation for illegal occupation of land and loss of use by legal heirs.

Even if the applicant has submitted his family tree, the Commission is still awaiting the "*Affidavit de Succession*" for ease of reference of "*Succession Mayeur*".

The Commission not only analysed the nature of the claim which is that of '*Dispossession of 200 Acres at Trois Ilots by W Marguet dit Cothrey, now land occupied by Deep River Beau Champ Sugar Estates to the detriment of Nicolas Mayeur*', but the case was first heard on 28<sup>th</sup> October 2009, when Louis Eric Didier Kisorbo deposed as one of the heirs and succession of Nicolas Mayeur who died in 1809 but who purchased during his lifetime a property admeasuring 264 *Arpents* 90 perches situated at the left bank of '*La Grande Rivière du Canton des Trois Ilots*', in terms of a deed drawn up on 28<sup>th</sup> September 1797 by Notary Jean-François Arnaud and preserved at the National Archives ("*Répertoire*" NA538/7 No. 472).

According to the hearing summary, his request was as follows:

- That the Commission helps him to repossess a plot of land of 200 Acres, being what remains of the 264 *Arpents* 90 mentioned above and which is presently occupied by Deep River Beau Champ and to obtain as well reparation or damages.
- Invites the Commission to consider the whole issue of the law dealing with prescription as it prevents the descendants of slaves from being able to recuperate land lost as a result of the slave status of the ancestors.

Another hearing session was held on 13<sup>th</sup> May 2011.

At that hearing, Didier Kisorbo was assisted by Land Surveyor, R. Bhurtun. The latter filed a '*Rapport de constat*' in which he holds the view that Deep River Beau Champ not only has no title to the 200 *Arpents* being occupied but that the land is being occupied illegally and unlawfully by false title deed links, description, limit and extent, and has usurped the properties and rights of heirs.

In support of his views mentioned above R. Bhurtun avers the following:-

- Nicolas Mayeur died in 1809 and left as heirs Joseph Mayeur and Marie Michelle Mayeur. The extent of the land at his death was 200 *Arpents* 90, following the excision and sale of three portions of land (30 *Arpents*, 20 *Arpents* and 14 *Arpents*) from the original extent of 264 *Arpents* 90.
- There is no record that the land has ever been sold or ceded.
- The land is located near Kewal Nagar Village and adjoins concession Abraham.
- There is no connection between the 264 *Arpents* 90 and the 200 *Arpents* purchased by Deep River Beauchamp.
- Mr. Nicolas Mayeur bequeathed the property to the two heirs above-named.
- The majority of the land is now occupied by Deep River Beauchamp Company Ltd for cane plantation and partly by the Sir Seewoosagur Ramgoolam Memorial Garden and Monument.
- The land owned by Deep River Beauchamp, 200 *Arpents* in terms of the deed transcribed in Volume 523 No. 163 is triangular in shape and its description does not tally with the four sided land which Mr. S. Kisorbo claims to belong to the heirs Mayeur.

The representative of Deep River Beau Champ Sugar Estate attended the hearing session on the same day, 13<sup>th</sup> May 2011, and submitted on that day a copy of its title deed together with a brief prepared by the Company's Notary in relation to the 200 *Arpents*.

The Company claims that its ownership of the 200 *Arpents* stems from the acquisition made from MAICO in September 1948 and that its origin goes up to 26<sup>th</sup> September 1882 when Société Beauchamp Sugar Estates Company Limited acquired the said portion of land from Alcide Sornay, Thomy Mamet and Evénor Dubois and his wife in terms of TV 150/228.

In addition, it is worthy to note that at the hearing session the CEO stated that in the past the Company had solved existing land issues by asking the two Land surveyors to study the case and come in with a full history of the land.

Subsequent to the hearing session, an official letter was sent to the Company on the 21<sup>st</sup> July 2011 with a formal request to let the Commission to know whether the land claimed by Louis Didier Kisorbo within the limits shown on an enclosed plan was owned by the Company. The reply of the 21<sup>st</sup> July 2011 confirmed that the land is comprised in the Company's estate land and the same brief handed over on the day of hearing was enclosed.

The Commission observes that there is evidence that Nicolas Mayeur did purchase a portion of land at Trois Ilots and that at his death, he owned an area of 200 *Arpents* 90.

On the other hand, it is not clear what happened at his death to the land and what is the link, if any, between that plot of land and the 200 *Arpents* purchased by Beau Champ in terms of a notarial deed.

The Commission is faced with a claim whereby a party claims to have ownership rights over a portion of land of an extent of 200 *Arpents* 10 on the strength of the deed preserved at the National Archives as mentioned above; whereas the other interested party claims to have ownership rights in respect of a portion of land of an extent of 200 *Arpents* on the strength of the deed transcribed in Volume 523/163.

In view of the issue raised regarding the location of both portions of land which, for all the Commission knows, may also be one and the same land, it would be in the interests of Louis Didier Kisorbo to request his surveyor to liaise with the Company's surveyor and sort out the location issue in the first instance.

The other alternative is to seek redress in a Court of Law if he feels he has a strong case but at this stage, it will be difficult for him to support his claim without a proper plan which can only be produced if he has access to the land.

\*\*\*\*\*

**CASE NAME: FRICHOT**

*TJC/L/0005/FRICHOT SERGE CLAUDE A. & OTHERS  
Cross Reference: GENEVIEVE Paul Jose TJC/L/0128*

Serge Claude Frichot, the applicant, and other members of the family, claim that they are the heirs of Jean Martin Frichot who married Marguerite Frichot *born* Panon. In a letter addressed to the Commission, the applicants affirm that the family hired the services of several Notaries, Attorney-at-law and Land surveyors. According to the applicants, these people have gone through long lasting procedures which have produced none of the awaiting results.

**Case 1**

The applicants claim that they are the rightful heirs of a plot of land of 25 *Acre*s at Black River. They denounce that they have been victims of some ill-intentioned persons who have been illegally occupying their land. They also relate that the adverse party actually occupying the land (illegally) has erected a Real Estate project on 24 *Acre*s of land out of the 25 available. The applicants deplore the fact that no sanctions have been taken against this project even if several instructions have been received on their behalf at the Bar at law.

**Case 2**

The applicants affirm that they also own a portion of land at Bambous. The land has been and is still illegally occupied by a company named Belle Isle. The said company belonged to Victoire Ducasse who donated the property to her children including Laurestin Frichot, their forefather. The applicants relate that they were able to obtain an authorization from the Supreme Court of Mauritius in 2003 in order to survey the land. But according to them, the adverse party successfully intimidated the Land surveyors. They say that their forefathers' heritage has been standing for

years on the land namely a chapel, some tombstones and the ruins of an ancient factory. All of these have been destroyed by means of bulldozers by the adverse party.

**Case 3**

A plot of land, of 156 Acres at Albion, inherited by the heirs Frichot has been identified and surveyed. But the applicants affirm that they have met strong resistance from the adverse party: Médine Sugar Estate. This latter has even lodged an injunction before the Court of law. The case is actually before the Supreme Court; the Médine Sugar Estate has failed to appear and has deliberately postponed the case several times. Since then, Médine Sugar Estate, with the help of bulldozers, has been damaging all the boundary stones and landmarks despite the Court's order preventing both parties to have access to the said land.

**Case 4**

The Domaine Les Pailles, also known as "*Concession Mon Boudoir*" in the past, belonged to Marguerite Panon who is the ancestor of applicants. The land is of an extent of 308 acres. The applicants deplore the fact that they have not been able to survey the land till now.

The applicants submitted several documents to the Commission to support their claims and aver that they remain available to produce more relevant documents before the Commission as when required.

Furthermore, the applicants declare that their modest background has made that they have been vulnerable to ill - intentioned persons having easy access to finance and political backing. They claim that they cannot afford to lose the plots of land purchased by their forefathers without putting out the least fight. They request the necessary assistance of the Commission to carry out land surveying, claim or reclaim of their land.

The Commission analysed all the documents submitted, namely a summary of the request made by Serge Claude A. Frichot, following his letter dated 1<sup>st</sup> June 2009 to the Commission for remedial action in regard to four portions of land.

- A letter signed by Attorney-at-law Indu M. Padya was sent to the then Minister of Housing & Lands, Honourable Asraf Dullul, dated 21<sup>st</sup> July 2006 listing several portions of land in which the heirs of Frichot claim they have rights. It is not known what action, if any, has been taken by the Ministry.
- Reference is also made in the letter to two Court cases (SCR1/57B/04 S SCR No 5A/104/1) which had been brought before the Supreme Court some time back and which were even fixed for merits on 21<sup>st</sup> October 2004 and 18<sup>th</sup> February 2005.

No decision can be taken by the Commission at this stage as the cases mentioned above are still pending before the Court.

The Commission was informed that the three Land Surveyors Ng Tong Ng Wah, Dwarka and D.D. Spéville would report back to the Supreme Court before Judge Devat after 17<sup>th</sup> June 2010.

When called at the Commission, Serge Frichot met Commissioner Jacques David on Friday 12<sup>th</sup> August 2011. The Court cases are now scheduled to be heard in March 2012.

\*\*\*\*\*

**CASE NAME: FRANÇOIS**

*TJC/ L/006/François Jacques Herold & Others*

Two plots of private land (130 - 134 toises) belong to Emile François and 46 toises to Auberge François respectively. The land is situated at La Gaulette approximately opposite to the

Débarcadère near the Community centre on which heirs of both Emile François and Auberger François are living.

In front of this plot of land, is found a plot of State land which Jean Emile François has been cultivating with mango trees, vegetables on which is found the septic tank and a right of way leading to the main road. The family has made several requests to the Ministry of Housing and Lands for the lease of this plot of land. Requests have been acknowledged by Ministry of Housing and Lands to Joseph Lindsay François on the 23<sup>rd</sup> September 2005. Affidavits have been sworn in respectively by Joseph Lindsay François, son of Emile François on the 25<sup>th</sup> January 2005, regarding a cafeteria to be built on the land instead of an orchard. At the same date, Marc Lindley Dario François (grandson of Auberger François) declares that he is still occupying the land and cultivating it. No reply has been received from the Ministry of Housing and Lands.

On the 8<sup>th</sup> June 2009, Government Land surveyors, in the company of one B. Chunwan, admeasured the land with red paint. The Ministry of Housing and Lands has, apparently allocated the land to someone else as a CWA "*compteur*" has already been installed there.

The François family, who has been looking after this plot of land over years, considers that the lease should be given to them instead.

The Commission is of the opinion that the complaint concerns State land at La Gulette and a right of way, a direct access claimed by Jacques Herold François over an uncommitted State land. Being given that the lessor (Government) has now disposed the land in favour of another person for the construction of a building for commercial purposes, the applicant, as such, has no interest on that committed State land.

In view of the fact that the land which they are claiming is State land, the Commission cannot consider the application and has advised the François family to address their complaint to the Ombudsperson if they still feel aggrieved.

\*\*\*\*\*

#### **CASE NAME: PAULIN**

*TJC/ L/0007/PAULIN JEAN JOSÉ AND OTHERS*

Jean José Paulin, the applicant, laid two cases before the Commission to investigate.

#### **Case 1**

Dorval Mauvais Oeil and his wife Estelle Le Filou purchased a plot of land from Ernest Leclézio of 1 Acre (TV 47/229). The plot of land was divided in two parts whereby Dorval Mauvais Oeil and his wife Estelle Le Filou occupied the South Eastern part and Célestine Julie, the concubine of Dorval Mauvais Oeil occupied the North Western part.

Marie Gisèle Paulin, applicant's mother and Louis Raphaël Bisséral, applicant's uncle sold, on 23<sup>rd</sup> August 1996 to applicant a plot of land admeasuring 207.66m<sup>2</sup> found at Ste. Croix, Port Louis, according to PV of surveyor Dumazel (LS 33/116 MF 68/19-20G). The aforesaid plot of 207.66m<sup>2</sup> formed part of a plot admeasuring 607.66 m<sup>2</sup>; this latter plot itself being the remaining part of a plot of land of 50 perches after the sales of two plots of 6 and 25 perches respectively by Louis Raphael Paulin (TV 679/95).

Gisèle Paulin and Raphael Bisséral, on the other hand, sold a plot of land of extent 173.40 m<sup>2</sup> to one Jose Aza, of Cité La Cure Port Louis, as evidenced by LS 34/2102.

Applicant's uncle told him that the plot of land of extent of 50 perches has never been sold by Célestine Julie. When she died, the Mauvais Oeil family stayed on the land. The heirs, Raphael Bisséral & Gisèle Paulin stayed there too. The land is still bare. The applicant still considers that the family is the heirs of this plot of land.

The request to the Commission was to investigate whether the plot of the land of 50 perches is still the family property.

## Case 2

Applicant's uncle Raphael was owner of a plot of land at Grand Gaube, which, avers the applicant, inherited from his father. He does not know the exact location of the land. Six years back, applicant says that he found Document in Registrar General's Office related to this land. He adds that he often travels abroad. So, when he came back in 2007 to obtain the Document, he found that the page was torn from the Register.

The Commission analysed the case after having undertaken searches in the present case.

Dorval Mauvais Oeil and Estelle Le Filou died respectively on the 13<sup>th</sup> March 1858 and 23<sup>rd</sup> June 1860. Jean Joselin Mauvais Oeil, who indeed, inherited a plot of land, died on the 11<sup>th</sup> April 1877 leaving behind his heirs Marie Fichiana, Idea and Noël Mauvais Oeil, born from his union with Cécile L'Étendu.

Idéa Mauvais Oeil passed away on the 22<sup>nd</sup> September 1937 left as heir Raphaël Bisséral, still alive and unmarried.

Noël Mauvais Oeil passed away on 5<sup>th</sup> May 1964 leaving as heir her sister Fichiana.

Marie Fichiana Mauvais Oeil, who passed away on the 13<sup>th</sup> June 1995, had married one Louis Raphaël Paulin - the latter passed away on the 18<sup>th</sup> September 1957 - and left behind as heir a daughter, Marie Gisèle Paulin.

- Applicants believed that they are the heirs of late Célestine Julie who owned the plot of land of extent of 50 perches at Champville, Vallée-des-Prêtres, in virtue of title deed TV 47 No. 229 dated 2<sup>nd</sup> November 1847.
- As per TV 478 No. 229, Alexis Ernest Leclézio sold to Dorval Mauvais Oeil, Estelle Le Filou and Célestine Julie a plot of land of the extent of 1 *Arpent* at Vallée-des-Prêtres.
- According to Notarial Deed drawn up Freddy Audibert, as transcribed in Volume 769 No. 123, dated 10<sup>th</sup> December 1958, the heirs of Célestine Julie namely:
  - Noël Evariste Dorval,
  - Noëlie Evariste Dorval (wife of Bertin Quirin), and
  - Ida Vigoureux (widow of late Ange Evariste Dorval)

sold the 50 perches (being the share of late Célestine Julie in the above property) to Seewoocomar Indur.

In the light of the above, the applicants have no right on the property of 50 perches, nor do they own other plots of land apart from the remainder of the plot at Vallée-des-Prêtres.

\*\*\*\*\*

## CASE NAME: LEMIÈRE

*TJC /L/0008/ LEMIÈRE PAUL AND OTHERS*

Paul Lemière, in the name of his family, submitted several cases before the Commission, all related to land claims at Petite Rivière Noire, as well as a welter of Documents to sustain these claims.

**Case 1**

The applicant avers that In 1856, Joseph Hippolyte Lemière owned a '*titre de propriété*' as evidenced by TV 65/23, ¼ '*indivise*' of a plot of land of 1400 *Arpents*, that is, 350 *Arpents* situated at Bois Puant, Petite Rivière Noire, in front of Ilot Fortier. In the plan of "*Pas Géométriques*" given to Société Koenig, that "*concession*" does not form part of the property of Salines Koenig. On this plan are also indicated "*concession*" Genève, "*concession*" Messein & "*concession*" Duclos. Following research, the applicant says that he has found in the "*Précis Terrier de l'Île Maurice*" that "*concessions*" Duclos is said to be of an extent of 1400 *Arpents* and in Code Decaen.

In his Master plan, the *Société Koenig Frères* has cancelled the road which comes from the Mountain, along Bois Puant, the water reservoir towards the "*Barachois*" and has included it illegally in his portion of land. The applicant avers that the evidence of this road in the plan of the CWA, still exists both on Google Earth and in the plan of the "*Département des Bois et Forêts*". The portion of land of 1400 *Arpents* has been reduced to 1210 *Arpents* through irregular recuperation, avers the applicant, basing himself on the "*Rapport Langlois*", submitted to the Commission. In the report of surveyor Chaton, it is mentioned that "*Société Koenig Frères*" has included the land of the heirs Lemière in their portion by cancelling the landmark.

According to research in the Government Domain Book, says Paul Lemière, the "*Barachois*" does not form part of the State's property made up of 23 *Arpents*, 50 *Arpents* and 5 *Arpents* respectively. The applicant sustains that the "*Barachois*" should have belonged to the heirs Lemière as well as the '*Pas Géométriques*' which are found opposite the triangular lower part of "*concession*" Duclos.

The "*Société Koenig Frères*" is the owner of 686 *Arpents* at La Grande Rivière Noire, where the limits of their land end at Petite Rivière Noire, with the "*concession*" Duclos being the bordering line between the two "*concessions*". According to this deed, they have never been the owner of "*concession*" Duclos, avers the applicant. However at present, "*the Master plan of Société Koenig indicates that all the lower part is theirs*", says the applicant.

Paul Lemière contests the Master plan done by Surveyor J.C D'Hotman de Villiers. According to the lease, the "*concession*" Duclos has never been the property of "*Société Koenig Frères*".

**Case 2**

The lease of '*Pas Géométriques*' as a whole (113 *Arpents*) has been taken back by the Government on the 31<sup>st</sup> August 1999.

The applicant has sent letters to the Ministry of Housing and Lands as well as to "*Société Koenig Frères*", asking them to leave the land. They have never done so. On the contrary they have "*regularize*" their case on the 1<sup>st</sup> July 2005; thus, bringing the extension of the land leased to 162 *Arpents* (Articles in *Le Cernéen* of 13<sup>th</sup> November 2007). The "*Société Koenig Frères*", at present known and registered as the "*Société Contour Bornes*", occupies a lease of 10.5 *Arpents* of '*Pas Géométriques*'. The public roads have been diverted. The applicant contests also the closing down of the public road between "*concession*" Duclos and "*concession*" Messein.

Furthermore, the applicant contests the Government action concerning the "*Barachois*", saying that this is contrary to the Ramsar International Convention as per the "*Rapport d'Arpentage de Delcourt 1912*". He also contests the "*Société Contour Bornes*" who has closed the road leading to the "*Batterie de l'Harmonie*".

**Case 3**

Eugène de Ravel and Maroussem own a plot of land of 1210 *Arpents*. They have sold the said plot of land to "*Société Palmyre*" owned by the Hardy family. The land surveyed originated from a plot of land of 1400 *Arpents* reduced to 1210 *Arpents* irregularly. The applicant contests the survey because he said that as a landowner, he was not convened when the survey was made.

He has entered a case in Court against:

1. Société de Ravel
2. Société Palmyre
3. New Mauritius Hotels
4. CWA regarding the occupation of this land.
5. Ministry of Housing and Lands

The case was heard for the first time on the 1<sup>st</sup> October, 2009 and was postponed to 19<sup>th</sup> November, 2009.

The applicant requests the Commission to make an enquiry so that the heirs Lemière could get back their land which still exists in the "*Casier hypothécaire*" of the family.

The Commission analysed and discussed lengthily on the claims.

Paul Lemière stated that his ancestor, the late Hippolyte Lemière, was the owner of one quarter (¼) undivided rights in an original portion of land of an extent of 1400 *Arpents* (590.90 Hectares) situated at Petite Rivière Noire (Ex-*concession* Duclos) for having purchased same from the late Gaston Martin Moncamp on the 13<sup>th</sup> September 1858, as transcribed in TV 65 No. 23 which authentic deed of sale was drawn up by Me. Jean Baptiste Guimbeau, Notary Public.

The description of the boundaries of the land "*in lite*" is found in the above-mentioned authentic deed which reads as follows:

- a. *"D'un côté par la propriété de Monsieur Genève;*
- b. *Vers le Nord par la Route publique conduisant au bord de la mer;*
- c. *Vers le Nord Ouest par la baie de la Petite Rivière Noire;*
- d. *Vers le Sud Ouest par la propriété Vergoz; et*
- e. *Du dernier côté vers la montagne par la propriété Belle vue".*

The late Hippolyte Lemière, in virtue of the authentic deed mentioned in paragraph 1, was therefore entitled to an extent of 350 *Arpents* (147.74 Hectares) taken from the original portion of land mentioned of 1400 *Arpents* (590.90 Hectares), this being the afore-mentioned one quarter (¼) undivided rights in the land "*in lite*". The plaintiff avers that the afore-mentioned one quarter (¼) undivided rights in the land "*in lite*" have never been subject to any sale, transfer, conveyance, nor by any of his heirs or successors, as evidenced by *Repertory 38 No. 102* which has remained unchanged to date with no marginal entries of any further sales or transactions whatsoever. He further avers that he and the other heirs of the said Late Hippolyte Lemière are, in truth and in fact, the co-owners of a portion of land of an extent of 350 *Arpents* (147.74 Hectares) contained within the original portion of land mentioned of 1400 *Arpents* (590.90 Hectares) this being the afore-mentioned one quarter (¼) undivided rights in that portion of which has devolved to them in their capacities as legal heirs and successors of the Late Hippolyte Lemière.

Searches have revealed the following:

- According to the title deed TV 65 No. 23 transcribed on 13<sup>th</sup> September 1858, Late Hippolyte Lemière purchased from Late Philippe Gaston Martin Moncamp ¼ undivided rights in the property of 1400 *Arpents* at Les Salines, Black River, in consideration of a sum of "*6500 piastres*". The last paragraph of the said deed TV 65/23 reads:- "*A la sûreté et garantie dudit prix de vente en capital et intérêts le quarts «indivis» dudit bien demeure par privilège spécial affecté et hypothéqué conformément à la loi*";
- As per records in the Repertory book at the Registrar-General's Office, the sale of the ¼ undivided rights to Hippolyte Lemière had remained affected and burdened by the mortgage which had never been erased;
- Initially, the said property of 1400 *Arpents* was adjudged on 21<sup>st</sup> October 1857 to the above-mentioned late Philippe Gaston Martin Moncamp at a sale by licitation before the Master and Registrar of the Supreme Court as evidenced by title-deed TV 64 No. 81 in consideration of a sale of \$25,000;
- From a deed transcribed on 11<sup>th</sup> June 1866 in TV 90 No. 65, a sale by auction by "*Folle Enchère*" was prosecuted against both the above-named Philippe Gaston Martin Moncamp

and Hippolyte Lemière. They had not justified, having fulfilled the conditions under which Philippe Gaston Martin Moncamp became purchaser of the property of 1400 *Arpents*. The property was thus adjudged as evidenced by the said deed TV 90/65 to one Valey Dabbadie before the Master and Registrar of the Supreme Court. Since then, the said property had changed ownership several times until it was finally acquired by "*La Société Palmyre*" by virtue of the title-deed transcribed on 19<sup>th</sup> March 1953 in TV 589 No. 97; and

- In 1882, when the subject site of 1400 *Arpents* had been in the name of Widow Pierre Dioré & Ors as per deed TV 147 No. 45, it was even surveyed at the request of the co-owners in the presence of a Government Surveyor and other parties. A memorandum of survey of the site was found to be of an extent of 1210 *Arpents*, was also drawn up on 21<sup>st</sup> September 1882 by the late Sworn Land surveyor, Arthur Langlois, signed by all the parties (late Hippolyte Lemière was not a party as he was not the owner of any rights in the property) and registered in Register LS 19 No.1898.

On the basis of the above, the claim of heirs Lemière of any rights in the property at Les Salines, as per title deed TV 65 No. 23, and the allegation of encroachment on the property have no foundation.

\*\*\*\*\*

**CASE NAME: MARTIAL/RATENA (RATNA)**

*TJC/L/0010 MARTIAL LOUIS BERTY*

This case was among the first cases to be deposited at the Commission. In working out the dossier it was found that there was no means to contact Louis Berty Martial in order to work out a case summary, the address and phone number being unavailable. Hence, the dossier is constituted only of documents submitted without any request or survey.

Most unfortunately, as the title deed dates back to 1810, being a sale for Joseph Jean Lejuge to M. H. Ratena of 2 plots of lands of an aggregate extent of 25 *Arpents* 82, it would have been an interesting case to study. No search can be carried out in the absence of precise data.

\*\*\*\*\*

**CASE NAME: DIMBA/JEANNOT**

*TJC/L/0011 JEANNOT*

According to the deponent (Mr Chellumbrun) Matthieu Jeannot owned a plot of land of an extent of 156 *Arpents* at La Cantine, Albion. He avers that Matthieu Jeannot was married and had a son. The son had three children: Aurélie, Guillaume and Alcide. He is a descendant of Aurélie, who married Louis Dimba. The Jeannot are also heirs.

The deponent avers that Medine Sugar Estate is occupying the land and that legal actions were initiated against the Estate on four occasions. Deponent says that former Chief Justice Victor Glover gave a judgment in favour of the family but the heirs have never obtained a copy of same.

In support of his claim, he submitted 13 documents including, an affidavit drawn up by Attorney-at-Law, H. Lam Shang Leen, giving the family tree of Matthieu Jeannot, who was born in 1770 in Louvres, France, and died in the District of Black River on 29 July 1819.

The Commission has held several sessions in respect of the case. Medine Sugar Estate was called to give evidence in respect of its occupation.

The Commission has been apprised of the following facts:

- Matthieu Jeannot purchased jointly with Joseph Favre 156¼ *Arpents* of land known as La Cantine in terms of a deed transcribed in TV 7 No. 94 bis.
- Matthieu Jeannot or Janno died on 29<sup>th</sup> July 1819 and in virtue of his last Will and Testament, he appointed Mr. Bretonache as “Légataire Universel” and Joseph Favre as his “Exécuteur Testamentaire”.
- Me Jeffroy then, a Notary, was appointed judicially “par sentence du tribunal de première instance” on 03 December 1847 to carry out the division in kind of the property held in joint ownership.
- the exercise was carried out on 26 January 1848 in presence of the interested parties and after drawing of lots: Lot 1 was attributed to one volamaire and Lot 2 to the “Légataire Bretonache”. Each lot admeasured 80 *Arpents*.

From the above, it follows that the will of Mathurin Jeannot in favour of Bretonache was given effect. A reading of the inventory which was carried out after the death of J. François Bretonache confirms that he was living on the land and occupied same for his business.

In the circumstances, the claim of the Jeannot/Dimba rests on the affidavit which states that Matthieu Jeannot had a natural son born in Mozambique and also on the fact that the “*Répertoire*”, kept at the Conservator of Mortgages, does not contain any entry in respect of the transfer of the rights held by Matthieu Jeannot to Bretonache or any other person.

The question of the property rights of the Médine Sugar Estate was raised again. On the 3<sup>rd</sup> November 2008, Médine Sugar Estate lodged a plaint in court against P. Moogon and Boudeuse for illegal removal of stones from their premises. During the proceedings, sworn Land surveyor Koyratee declared that following searches made it appears that the 80 arpents of land on the original plot of 156 ½ arpents still belong to the heirs of Mathurin Jeannot. This statement was again made by Land surveyor Koyratee before a hearing session of the Commission on the 14<sup>th</sup> September 2011.

Land surveyor Koyratee avers that in Court, Bernard Desvaux de Marigny, sworn Land surveyor of the Medine Limited stated that the heirs of Mathurin Jeannot cannot pretend to have any claim on their ‘ancestral’ lands, because before the latter passed away he had bestowed all his lands to one Bretonache in a testament dated 21 June 1860.

On the other hand, Land surveyor Koyratee still avers that when crossed examined by Counsel in Court, “*sworn Land surveyor Desvaux admitted that the testament cannot be believed simply because documents during that period remained with the custody of the Court and was not even transcribed.*”

During the Court proceedings, avers Land surveyor Koyratee, “*Médine sugar estate was unable to produce any reliable evidence (“titre de propriété”) of their property rights on the land of 156 ½ arpents or 80 arpents originally held by Mathurin Jeannot*”.

The Commission is unable to submit any advice or recommendation on the claim as the assessment of the documents produced is a matter to be referred to an appropriate authority/Court.

\*\*\*\*\*

**CASE NAME: RAMSAMY**

TJC/ L/0012/AMOINDA MICHEL AND OTHERS

Michel Amoinda, the applicant says that his mother, Amaye Ramsamy, owns a plot of land of 100 toises at Sainte-Croix. The family has lived on this plot of land for more than 50 years. The family believes that this land has been prescribed by their neighbour and that the latter has sold the land to someone else. The new proprietor is now suing the applicant for illegal occupation of land. The applicant went to Court. On the second hearing before the Court, the case was dismissed. The new proprietor again brought the case to Court for the second time. It was scheduled to be heard in January 2010.

Searches have been initiated by the Commission to find out the truth. However, there is no land registered in the name of Amaye Ramsamy at the Registrar General's Office. The only document available is a '*Brevet*' that has not been transcribed.

The only copy of a deed made under private signature entitled "*Brevet de Vente*" purports to witness the sale of "*une maison de quatre pièces qui se trouve sur un terrain de 100 toises*" for a price of Rs. 300. The transaction was made on 26<sup>th</sup> December 1968.

It is to be noted that a sale is generally witnessed by an "*acte authentique*" - a Notarial Deed - and becomes effective only if registered and transcribed according to the provision of the law. In the present case, there is no legal document which the claimant may produce in support of his claim.

Moreover, since there is a Court action on the issue of ownership, it is difficult to entertain the request to "*assist her in getting back the land*" at this stage.

\*\*\*\*\*

**CASE NAME: GOODSIR**

TJC/ L/0013/ GOODSIR JAMES

The applicant, James Goodsir, through his proxy, Gerard Bernard, put two claims before the Commission: one related to a plot of land of 172 *Arpents* which constituted the "*concession*" of one Fouquet, obtained in 1757; and another claim on two plots of land of 12 and 30 *Arpents* respectively, pertaining to the 490 *Arpents* which formerly belonged to Pierre Spéville at Coteau Raffin, Black River.

**Case 1**

According to a "*concession*" deed dated 16<sup>th</sup> January 1757, one Fouquet received a plot of land of 172 *Arpents* at Plaines Wilhems, more precisely at Henrietta, Vacoas. Fouquet married Perrine Gauthier on 6<sup>th</sup> August 1753. The estate is sold "*à la barre*" (by levy) in 1900. In the "*acte de vente*" (deed of sale), it is said that Fouquet or assigned is one of the neighbours.

At present, Médine Sugar Estate has been occupying the land for quite a long time. Gérard Bernard, the applicant's proxy, has been negotiating several times with Médine Sugar Estate for the restitution of the land. But Médine says that they are the owner.

The applicant wants the Commission to request Médine Sugar Estate produce the title deed to prove that they are the official owners of the land. The applicant wishes to get back the land.

**Case 2**

Pierre Spéville, father of Amanda Spéville, owned two plots of land of 12 *Arpents* and 30 *Arpents* respectively at La Gaulette & Coteau Raffin. Some Mauritian families say that they are the legal owners of the land and they have constructed houses thereon. Applicant's proxy visited the land in 1966 and was shown the land marks. Since then, part of the land has been prescribed. The land was

then covered with forests and at present, several houses have been built on this land. Applicant's proxy wants to know how those who built the houses have obtained the required permits (building, water, electricity). The applicant wants the Commission to assist in the research about the real owners and about the title deeds.

The Commission made searches and analysed both requests. Gérard Bernard holds a power of attorney conferred upon him by Perrine James Goodsir and, on behalf of the latter, he is claiming the ownership of an extent of 172 *Arpents* situated at Henrietta which was once conceded to François Fouquet. According to him the rights of ownership over the land are now held by Pierre James Goodsir as descendant of François Fouquet.

In support of his claim he has tendered the following documents:

- A description of a plot of land of 500 "*Pas Géométriques*";
- An extract of a memorandum of survey of Land surveyor Merle dated 19<sup>th</sup> August 1763 (without any plan attached).
- A copy of TJ/98/2 relating to the judicial sale concerning Sugar Estates Reunion, Henrietta and Tamarind Falls.

The documents produced do not constitute sufficient proof of ownership in favour of Fouquet or his heirs. The fact that a description of a plot of land in a judicial sale paper mentions the name of Fouquet or Pauquet or assigns may be relevant for the location of a site but is immaterial as regards to the actual ownership rights of the portion of land.

It is observed that the land is said to be occupied by Médine Sugar Estates and that negotiations to recover the land - presumably "*à l'amiable*" - has failed as the Estate claims to be owner of the same.

The request of Bernard is to ask Médine Sugar Estate to give proofs that they are the real owners and to produce their relevant title deed. In other words, Bernard is asking to the other party to give particulars relating to a portion of land occupied by the estate peacefully "*à titre de propriétaires*" in order to build his own case.

The onus of providing the ownership rights rests entirely on him and in that respect, he has failed.

## Case 2

According to the applicant, Pierre Spéville was the owner of two plots of land of the respective extents of 12 *Arpents* and 30 *Arpents* at La Gaulette and Coteau Raffin which are presently occupied by persons unknown to him.

According to a plan of the plot of land of 12 *Arpents* submitted by the applicant, relevant site may be easily identified on site. The document which the applicant submitted is a "*sous seing privé*" in which one D'Emmerez acknowledges the sale of 12 *Arpents* to be excised from the Estate Coteau Raffin to Pierre Spéville.

However, searches at the Mortgages Office have revealed that Pierre Spéville was the owner of a plot of land of 490 *Arpents* at Black River and this plot of land has been sold in virtue of title deed transcribed in Volume 1353 No.11. No record of the transaction mentioned in the "*sous seing privé*", related to the present claim, has been found.

The Spéville case is lengthily discussed at Chapter 5 under the heading - "Dispossession".

\*\*\*\*\*

**CASE NAME: MARION**

TJC/ L/0014/ MARION LOUIS BENOIT &amp; others

René Marion, great-great grandfather of applicant Louis Benoit Marion, owned a plot of land of 64 *Arpents* at Grand Bois. The land is still there but applicant ignores the exact location. He wanted to get the land back as he claims to be a descendant of René Marion, a landowner during his life time.

The applicant further adds that Médine Sugar Estate has only 623 *Arpents* of land in Beau Songes and the Marion family owns 2 portions of land of extent 32 *Arpents* 38 perches and 130 *Arpents* respectively at the same location of Beau Songes. Concerning the 130 *Arpents*, he says, Médine Sugar Estate is at present selling part of that land. As for the 32 *Arpents* 38 perches, at present, United Basalt is proceeding in derocking the land.

The applicant avers that his family has always occupied both plots of land as pasture land, for charcoal making and for cultivation. In 1982, they built a small house on the 32 *Arpents* 38 perches and a store-house on the 130 *Arpents*. Médine Sugar Estate threatened him with weapons and accused him of illegal occupation of land. The Médine Sugar Estate even had recourse to the Special Mobile Force to force the Marion family to vacate the premises.

Finally, the whole issue was brought before the Court where the applicant lost the case. Médine Sugar Estate destroyed the house, bulldozed the land as well as the irrigational canal which provided water to the applicant and his family. He feels that he has been dispossessed by Médine Sugar Estate.

Furthermore, the applicant says that he has inherited another plot of land in Les Salines. But he has no information on this land. In support of his claim, he has produced two deeds in respect of a portion of land of an extent of 64 *Arpents* 75 at Beau Bois and another of 24 *Arpents* approximately at Beau Songes, other documents submitted relate to family tree and also one *proeipce*.

A perusal of the contents on file by the Commission and further searches show that the documents produced (*excerpt*) for the affidavit are not sufficient to enable a proper examination. A request was made to the Conservator of Mortgages for a proper copy of TV 144 No. 275 which relates to the land at Beau Songes.

The document obtained reveals that the 24 *Arpents* plot of land were surveyed in April 1916 by one Emile Belcourt and found to admeasure 32 *Arpents* 38 perches. This property has been the subject-matter to a *proeipce* in the District Court (cause No. 87/82). In the same paper, reference is made to an extent of 600 *Arpents*. "*Bien Beau Songes surveyed by Laurent on 1<sup>st</sup> December 1918*" in respect of which no information has been given by Louis Benoit Marion.

Further searches undertaken by the Commission revealed René Marion acquired a portion of land of 24 *Arpents* at Beau Songe in the District of Black River.

René Marion (son), together with his lawful wife, Orzelie Louis, sold the said portion of land to one Goody Ramdoss, as evidenced by TV 170 No. 54.

The said Goody Ramdoss then sold the plot of land of 24 *Arpents* to one K. Varathajaloo as evidenced by TV 216 No. 135. The said Varathajaloo resold the land to Goody Ramdoss by virtue of a transcription dated 2<sup>nd</sup> July 1896 as per TV 221 No. 240.

Furthermore, it has also been found that, through an outbidding made before the Master and Registrar at that time of the Supreme Court made by one Sudar Saib, who acquired the land on 18<sup>th</sup> January 1901. Prior to that, a sale by licitation was entered before the Supreme Court against the Widow of Goody Ramdoss, one Lutchmee David at the request of the Curator of Vacant Estates as evidenced by TJ 194 No. 40.

Later, the said Sudar Saib sold the land in two portions each of ½ undivided rights to one Frederic Langlois and A de Senneville.

Searches also revealed that the said portion of land of 24 *Arpents* actually belongs to one Leon Mamet who acquired the land on 26<sup>th</sup> May 1904 from Langlois and on 27<sup>th</sup> March 1903 from de Senneville as evidenced by TV 256 No. 69 and TV 250 No. 498.

As regards the case at the District Court against Médine Sugar Estate, the applicant apparently lost the case and the estate pulled down the house and appropriated the land. There is not enough data in file to apprise the issue in Court was and what the judgement was. A full copy of the *proecipe* and the record of the judgement could have been helpful but no copy of the judgement was available at the Bambous District Court.

The Commission has been made aware that the applicant and other heirs have entered another case before the Supreme Court against Médine Sugar Estate.

\*\*\*\*\*

**CASE NAME: BONNEFIN**

*TJC/L/0015/Clency Harmon & others*

Clency Harmon has submitted three land cases to the Commission. The Commission devoted the entire session of the 20<sup>th</sup> November 2009 to case No. 2, concerning land of Frederic Bonnefin at Cancaval, a region of Curepipe.

**NATURE OF CLAIM:**

- Misappropriation of a plot of land of 156 *Arpents*, according to title deeds (but of 277 *Arpents* according to deponent) belonging to the heirs and succession of Frederic Bonnefin, by Médine Sugar Estate, following acquisition of Réunion Sugar Estate by Médine Sugar Estate.
- Depletion of the Bonnefin heritage by the sale of part of their land, by Medine Sugar Estate, to the 'Compagnie River-Land', for the development of a morcellement

**SUBMISSION OF DOCUMENTS:**

During the Hearing session, Clency Harmon submitted 50 sets of supporting documents pertaining to the case.

**CONTENTION OF CLAIMANTS**

C. Harmon, assisted by Stéphane Gurbhoo, deponed as one of the heirs and succession of Frederic Bonnefin who died intestate on 23<sup>rd</sup> April 1881. During his lifetime, the said Frederic Bonnefin acquired the undivided rights of various co-owners in a plot of land of 156 *Arpents* at Cancaval Curepipe, as per sales documents:

- Title deed dated 23<sup>rd</sup> July 1872 and bearing Registration TV 108/82.
- Title deed dated 8<sup>th</sup> November 1872 bearing registration TV 108/345.

C. Harmon averred that after tedious and elaborated search, it has been proved that the land is of acreage of 277 *Arpents*.

The heirs of late Frederic Bonnefin became aware of the heritage when they learnt one day that one heir, namely Pierre Claude Bonnefin, intended to dispose of the land after having an affidavit sworn, declaring him as sole heir of Frederic Bonnefin. From then on, all the heirs have initiated legal actions against him and have succeeded to recover the land.

Unfortunately, they learnt that years ago, the Reunion Sugar Estate had annexed their land to its domain land and had afterwards sold the property to Médine Sugar Estate.

Around year 1996, all heirs joined forces and started legal action to recover their property. They compiled a list of all the heirs, swore an affidavit and drew a family tree. They could not go further as they were denied access to their land by Médine Sugar Estate

They also learned that Médine had excised a plot of land and was planning to sell part of their land to the Company River-Land for a *morcellement*. Despite their protest to the Morcellement Board, there had been no investigation or initiative to stop the Land developers from going ahead with their project. In 2007 the 'Compagnie River-Land' had already proceeded with the sales of many lots of land.

Harmon has submitted various documents and particularly plans to prove that the land at Cancaval belong to the Bonnefin. At the hearing, the Chairperson proposed that the Commission examined the case more in-depth and came with a synthesis and the way forward.

The Commission had carried in-depth investigation and research before convening the Chief Executive Officer of Médine for a Hearing on the 15<sup>th</sup> of July and 17<sup>th</sup> August 2011.

At the hearing of 17<sup>th</sup> August 2011, Dany Giraud the CEO, maintained that the land the Médine Sugar Estate had purchased belonged to the former Reunion Sugar Estate and was a regular acquisition. He was requested by the Commission to submit the title deeds and survey plans that could help to identify and locate the land disputed by the Bonnefin. Though hesitant at first, Mr. Giraud agreed to submit the relevant title deeds and survey plan drawn by Land Surveyor Raffray.

The Commission has examined and perused the various documents, particularly the survey plans drawn by Raffray and Florent for Médine Sugar Estate. The Commission is of opinion that the plot of land of 167 *Arpents* transcribed in Volume TV 1258 No. 12 that Médine identified as being their land and that of 156 *Arpents*, claimed by the Bonnefin are two different entities. There are clear indications in the documents submitted by Médine Sugar Estate, that the land of 167 *Arpents* is situated on the Western side of River Tatamaka and is not bounded by the Chemin Berthaud. On the other hand, the land identified by the Bonnefin is the only plot located on the Eastern side of River Tatamaka and is bounded by the Chemin Berthaud. Furthermore the two other sides are bounded by Tolbig on the North and M. Burguez on the South as described in their title deeds.

The Commission is in presence of two distinct portions of lands of different acreage, the first one belonging to Médine Sugar Estate and the second one to the heirs of Frederic Bonnefin:

- The Land of Médine is of 167 *Arpents* and is registered in TV 1258 No.12 as mentioned in an affidavit sworn by Land surveyor, K. Dwarka, before the Master of the Supreme Court.
- The land of heirs Bonnefin is of 156 *Arpents* and registered in TV 108/82 dated 23<sup>rd</sup> July 1872 and TV 106/45 dated 08<sup>th</sup> October 1872.
- The land of Médine, according to description from title deed, is located on the western part of River Tatamaka.
- Land belonging to Médine Sugar Estate has no frontage on the Chemin Berthaud.
- The land of the Bonnefin has the main frontage on the Chemin Berthaud

The Commission, after having examined in-depth the claim of the heirs of Frederic Bonnefin, is of the opinion that the heirs Bonnefin may have a case in their favour and, should they feel dispossessed, they should seek redress in a Court of law.

\*\*\*\*\*

**CASE NAME: CELINE**

*TJC/L/0016/ CELINE STEVE*

The applicant, Steve Celine claims that his grandfather, late Jean Marie Martin, was the owner of:

1. 5 *Arpents* 25 of land at Grand Gaube

2. About 3 *Arpents* at Allée Brillant and
3. 15 *Arpents* 57 at Moka.

The applicant says that his father has always talked about a plot of land of approximately 5 *Arpents* 25P, owned by his grandmother in Grand Gaube. Grandmother passed away when the father was 5 years old. The family ignored then where the land was exactly located.

Steve Celine did some searches and through documents he could locate the land at Grand Gaube. At present, the land is occupied by squatters and about 30 houses have been constructed without any contract. The applicant ignores whether land has been prescribed by occupiers. There are 2 plots of land which are still bare. The family would like to get back the land.

He furthermore adds that the family also owned a plot of land of 15 *Arpents* at Allée Brillant, Vacoas. Part of the land has been sold by Daniel Martin, the son of Jean Marie Martin. The applicant thinks that only 12 *Arpents* have been sold. Another plot of land of an extent of 15 *Arpents* 57 at Moka constituted the heritage left by Jean Marie Martin.

Searches at the Registrar General's office have revealed that the name Jean Marie Martin does not exist in the index book kept by the Conservator of Mortgages. The plots of land claimed by the applicant are untraceable.

\*\*\*\*\*

**CASE NAME: MARISON**

*TJC/L/0017/HOSENY BERNARD & others*  
*Cross reference with TJC/L/VF 85 MARISON Anne Marie Louise*

The applicants, Bernard and Richard Hoseny, aver that they are heirs of Désiré Marison who married a Malagasy Princess. Désiré Marison and who they aver, purchased a plot of land of 151 *Arpents* in 1839 in Henrietta, Vacoas. He sold several plots of land during period 27<sup>th</sup> September 1847 to 1<sup>st</sup> October 1854. Following research, it appears that Widow Désiré Marison made a "*testament olographe*" (NA 87/10 No. 1243) whereby she gave all her property (land & chattel) situated in Vacoas to one Robert de Chazal. She gave to Magère Marison, brother of her late husband, a plot of land of extent of 4 *Arpents* extracted from the land which has been given to Robert de Chazal. As the Marison at that time were illiterate, the heirs thought that there might have been another will made by Robert de Chazal in favour of the heirs Marison being given that, at the death of Robert de Chazal, there has been a deposit of sale of land under private signature by one of the owners before actual owner, Médine Sugar Estate.

They request the Commission to investigate for a possible will by late Robert de Chazal to the heirs Marison; to investigate the authenticity of the sale by Robert de Chazal prior to the sale to Médine Sugar Estate.

The Commission started its investigation in this case after submission of the dossier on 9<sup>th</sup> August 2009.

The Attorney-at-Law of the Marison family made a request to the Commission on 29<sup>th</sup> December 2010 to stop all searches and to close the case.

\*\*\*\*\*

**CASE NAME: JOLICOEUR**

TJC/L/0018/VF/JOLICOEUR PIERRE EDOUARD &amp; others

The applicant, Pierre Edouard Jolicoeur put two claims before the Commission.

**Case 1**

The applicant writes that he is the heir of one Delphine Jolicoeur, owner of two neighboring portions of land of respectively 5 and 4 *Arpents* in Piton and Rivière-du-Rempart. The two portions have been prescribed by Marie Jeanne Victoire and Sylvie Victoire. They are together of an extent of 1 *Arpent*. The 8 remaining *Arpents* have been occupied by the Government who has built a Citizens' Advice Bureau, a "*Maison des Jeunes*", a Swimming Pool, and a Dispensary.

**Case 2**

The applicant adds that the Jolicoeur family owns a plot of land of 2 *Arpents* at Terre Rouge, Pamplemousses.

On 7<sup>th</sup> October 2009, Pierre Jolicoeur left at the Truth and Justice Commission, a letter he received from Attorney Hardy requesting him, following a judgement in "*Case Low Kom Marie Marceline V/S Jolicoeur Pierre Edouard*" in the Intermediate court of Mauritius delivered by Magistrate District Court of Mapou on the 27<sup>th</sup> August 2009, to pay a sum of Rs. 5,000 to Marie Jeanne Victoire as damages and to "*quit, leave and vacate premises by the 31<sup>st</sup> December 2009*".

The Court file CN 1524/2007 reveals that Marie Marcelin Low Kom obtained judgement against Pierre Edouard Jolicoeur on a plot of land of extent of 631.65m<sup>2</sup> at Royal Road, Rivière-du-Rempart. The Magistrate observed that the "*plaintiff has a clear and unchallenged title to her property and is accordingly entitled to the enjoyment of some without Defendant's interference*" (Pierre Edouard Jolicoeur).

There is another case in file CN 1151/08 whereby Marie Jeanne Victoire obtained judgement against Pierre Edouard Jolicoeur on a plot of an extent of 759 m<sup>2</sup> at Royal Road, Rivière-du-Rempart.

In both cases, Pierre Edouard Jolicoeur did appeal against the two judgements which debarred him from the said property. Therefore, as the matter stands, the applicant cannot have any claim to the said portion of land.

Further searches, undertaken by the Commission on the "*Case Hypothécaire*" of Jean Louis Jolicoeur and Jean Louis Casimir, reveal that plots of land belonging to the Jolicoeur have all been sold out during the period 1850-1889.

There is also a claim from Pierre Edouard Jolicoeur to the effect that his ancestor has 2 portions of land respectively 5 and 4 *Arpents* in Piton and Rivière-du-Rempart and that these plots of land are now occupied by Rivière-du-Rempart Citizen Advice Bureau, Maison des Jeunes, Swimming Pool, and Dispensary.

Searches have revealed that according to "*Répertoire*" 91 No. 367, Delphine Jolicoeur was the owner of a plot of land of the extent of 9 *Arpents* at Piton as evidenced by Title deed 21 No. 102, dated 29<sup>th</sup> September 1924. The plot of land is not found in Rivière-du-Rempart as the applicant claimed but in Pamplemousses. As to this property belonging to the said Delphine Jolicoeur, the applicant does have a claim as per the affidavit of succession.

\*\*\*\*\*

**CASE NAME: ROOPSING***TJC/L/0019/ROOPSING SARDANAND and others*

Sardanand Roopsing, the applicant, avers that his father, Mohun Roopsing, has inherited from his father, Nepaul Roopsing, 2 plots of land of 69 ½ perches and 1 *Arpent* 42 perches respectively at Roches Noires, Rivière-du-Rempart. When the property of his father was shared among the heirs, both he and his brother, sole heirs of applicant's grandfather, forgot to include this plot of land in their will. At Registrar General's Office, the land is still in grandfather's name.

The Roopsing family asks the Commission to locate and get their land back.

Searches carried out at the Registrar General's office revealed that the relevant plots of land have already been sold by the applicant's father, the late Mohun Roopsing, to Minors Ayoob Khedarun and Moosah Khedarun in virtue of Title deed transcribed in Volume 397 No. 283.

\*\*\*\*\*

**CASE NAME: DUMAZEL***TJC/L/0020/ DUMAZEL MIRELLA AND OTHERS*

Mirella Dumazel and other members of the family, having requested the help of the Commission to retrieve important documents from a "*Récupérateur des Terres*" (commonly known as agent) were called at the Commission on 13<sup>th</sup> October 2010. Other representatives of the family were also heard by the Commission. The applicant avers that Jean François Dumazel, married to a slave, received a portion of land as "*concession*" of an extent of 27 *Arpents* situated at Balaclava, Pointe-aux-Piments. The plot of land is still there planted with trees. The family hired the services of a "*Récupérateur des Terres*" who has been keeping all Documents with him in spite of numerous requests to return back the Documents. The family was desperately looking for assistance to inquire into the land

They request that the Commission should undertake searches to get back this plot of land which they believe still belongs to them.

The family had difficulties in obtaining (i) the Birth Certificate of Jean Mélidor Dumazel, born on 3<sup>rd</sup> September 1847 from the Central Statistics Office of Pamplemousses; and (ii) the Birth Certificate of Jean Marie Dumazel, which might be around the years 1820-1826 in order to establish link with Jean François Dumazel.

The Commission officially asked CSO to produce both birth certificates, indicating the date for ease of reference. But, the CSO of Port Louis has not been able to produce the required documents, neither even for Jean Marie Dumazel, if approximate possible years were given.

There are two problems regarding this application. Firstly, there is no birth certificate for Jean Mélidor Dumazel nor is there a birth certificate for Jean Francois Dumazel. Secondly, the family hired the services of a so-called "*land-searcher*", one Alfred Sing Fat, of 65 Vacoas Road, Vacoas and they claim that Sing Fat has many of their documents, and despite numerous requests they have not been able to get these documents back. The family signed an official agreement to pay Sing Fat 40% of the value of the land. No money changed hands.

The Commission called Sing Fat to depone. He appeared before the Commission on the 18<sup>th</sup> August 2010. He flatly denied the allegations made by the Dumazel family, but acknowledged that he would be paid 40% of the value of the land after retrieval and stated that he was conducting the search entirely from his own resources.

He agreed to return all documents to the family and agreed to meet with them at the Commission headquarters, with a Commissioner acting as facilitator.

The following week, Sing Fat and the Dumazel family met at the Commission in presence of Commissioner Jacques David. All documents in possession of Sing Fat were officially returned.

As for the claim of the Dumazel family over the land at Pointe-aux-Piments, the representative of Harel Frères, who might have taken possession of the plot of land was called before the Commission on Wednesday 17<sup>th</sup> August 2011.

The Commission has also found out that late Jean François Dumazel was indeed the owner of a plot of land at Pointe-aux-Piments, Balaclava, of an extent of 27 *Arpents* 25 perches as evidenced by the "Concession Book" LC/18/50 and LC/20/8 registered at the Mauritius Archives.

However, the "*Case hypothécaire*" 71 No. 153 reveals that Jean Mélidor Dumazel sold (a) undivided rights in 14 *Arpents* 50 perches at Pamplémousses and (b) 3 *Arpents* to Northern Sugar Estates and (c) another portion of land at Rivière Citron.

The plot of land of an extent of 27 *Arpents* 25 perches belongs to the "*Société Arjoon Sewraz*" in virtue of title deed TV 1196 No. 186 dated 1<sup>st</sup> December 1972.

Following searches and the hearing of Land surveyor Bernard Desvaux de Marigny, "*Terrain Dumazel*" and "*Terrain Cauvin*" as indicated on a Survey plan drawn up by André Aliphon on 28<sup>th</sup> September 1973, which is of an extent of 14 *Arpents* 50 and 11 *Arpents* 89 respectively, were parcelled out in 1976 by "*Noel Real Estate Company Limited*" in several lots as "*Morcellement Baie -Aux-Tortues*"

Adjacent to "*Terrain Dumazel*" and "*Terrain Cauvin*" is "*Terrain Rioux*" which is of an extent of 26 *Arpents* 50, which plot of land has been parceled out into 26 lots by Arjoon Sewraz.

Another plot, "*Terrain Rioux*", of an original extent of 35 *Arpents* 67 11/12 has been parceled out into 78 lots.

These 3 "*Terrains*" were found by Land surveyor M.B.Dwarka to be of an extent of 89 *Arpents* 43 in his Survey report dated 10<sup>th</sup> September 1969 and belong jointly to Arjoon and Dhaneswock Sewraz as per TV 1110 No. 21 (DK 48 No. 68)

"*Terrain Dumazel*" and "*Terrain Cauvin*" do not form part of the surplus of land of extent of 1052 *Arpents* belonging to Harel Frères Limited.

\*\*\*\*\*

**CASE NAME: JOB/DACRUZ**

*TJC/L/0021/NANETTE MARIE THERESE GISELE & others*

Marie Thérèse Gisèle Nanette avers that Pierre Job, her great grandfather, purchased a plot of land of 4 *Arpents* at Plaine Saint Pierre, Bambous. His sons Ernest & Charles Job, inherited from their father, the remaining plot of land, that is, 2¾ *Arpents*; (1 *Arpent* & ¼*Arpent* having been sold in 1859). After their death, Jacques Simon Dacruz, the applicant's brother, and grandson of Ernest Job, occupied the land and cultivated it.

The applicant declares that their uncle gave to Henri Cornelius Topize part of the land for cultivation. According to affidavit sworn in by Jacques Simon Dacruz on 25<sup>th</sup> April 1991, Henri Cornelius Topize is not an heir of the Job family. Marie Bernadette Aimée, the concubine of Henri Cornelius Topize, made an affidavit and prescribed the land on her name. The heirs became aware of the prescription much later. Jacques Simon Dacruz, brother of the applicant, in the name of the heirs, entered a case in Court to cancel the prescription. On the death of Jacques Simon Dacruz, the Court case was struck off.

The applicant requests the help of the Commission to cancel the prescription and get back the land of their grandfather.

Thérèse Gisèle Nanette, *born* Dacruz was requested on the 17<sup>th</sup> May 2011 to call at the Commission to give more details of the case. She failed to turn up.

According to the documents and information analysed by the Commission, it appears that:

- On 26<sup>th</sup> April 1991, Jacques Marie Simon Dacruz and 7 others, as heirs of the late Pierre Job, applied for and obtained an Interim Order in the nature of an Injunction restraining and prohibiting Marie Bernadette Aimée from charging, mortgaging or selling the portion of land of 9860 square metres situated at Plaine Saint Pierre, Bambous, which she had prescribed.
- Marie Bernadette Aimée and her paramour, Henri Cornelius Topize, resisted the application.
- After an exchange of Affidavits, the case was in shape and had been fixed for hearing before the Honorable judge in chambers to the 11<sup>th</sup> February 1992.
- There is no indication what happened on 11<sup>th</sup> February 1992.
- According to applicant, the case was struck out as Jacques Simon Dacruz had passed away.

The Commission fails to understand why the case was struck out as there were seven applicants.

In the affidavit in support of their application for Writ, the applicant stated that they will enter a main case before the Supreme Court praying for a judgement, declaring that the prescription made by Marie Bernadette Aimée of the portion of land of 2 *Arpents* 33 perches or 9860 square metres be declared null and void.

In spite of attempts made to contact the applicant to understand where matters stand, there is no answer.

\*\*\*\*\*

**CASE NAME: MOHUN**

*TJC/L/0022/MOHUN MARINA FLORISE & MILENA*

Jean Ricardo Power, the applicant, claims that his family has been living on a plot of land of 50 toises at Cremation Road, Tranquebar since 1930, that is, for 5 generations and that the family has been asked by Arya Sabha to leave the place. He states that the land does not belong to the family but to Arya Sabha. The family has been paying a rental fee to occupy the land. At present the family is quite at a loss.

They request the Commission to assist the family in obtaining 'reparation' from 'Arya Sabha'.

This case was heard before the Commission on 11<sup>th</sup> November 2009. The transcript is on file.

The Power family has the impression that the land belongs to the Government and the Arya Sabha is a lessee of the Government and Gawtam, the owner of the mechanical workshop is a sub-lessee.

Following the hearing session, a letter was sent on 27<sup>th</sup> November 2009 to the Ministry of Housing and Lands to enquire about the lease held by Arya Sabha from the Government and to know whether the Arya Sabha has the right to sublet part of the land to one Gawtam for the operation of a garage. A '*reminder*' was even sent to the Ministry on 14<sup>th</sup> July 2011.

Furthermore, searches undertaken by the Commission revealed that the land mentioned is of an extent of 11 hectares belong to Arya Sabha (Mauritius) formerly known as Arya Pratinidhi as

evidenced by TV 446 No. 359 ("*Premier titre*") and part of it has been leased to Garage Gawtam. Gawtam, as tenant, is operating a mechanical workshop on part of the land.

There is no legal document concerning their occupation.

In view of the fact that the applicant and his ancestors have continuously occupied the land over a period of 80 years, the applicant has been advised to contact Arya Sabha Mauritius to see the possibility of getting a lease of the land on certain agreed terms and conditions.

\*\*\*\*\*

**CASE NAME: ISABELLE**

*TJC/ L/0023/ISABELLE MICHEL ROGER*

The mother of Michel Roger Isabelle has been looking for Documents regarding the plots of land belonging to his family (Isabelle & Labonté) in Vieux Grand Port, Flacq, Le Morne and Curepipe. He finds it difficult to obtain those documents as he is at loss where to go. Applicant says that it is easier to obtain birth, marriage, death certificates.

After searches carried out by the Commission through the "*Répertoire des formalités hypothécaires*", it has been found that Isabelle Fanchin ("*Répertoire*" 91 No. 412) had a plot of land of an extent of ¼ *Arpent* at Eau Coulée. The land has been sold to N. Chinathon for the price of Rs. 300 on 27<sup>th</sup> September 1904 as per TV 257 No. 318. The *Répertoire* 134 No. 44 of Elysée Labonté reveals that the plot of land of extent of 177p, 4p, and the 8p at Vallée-des-Prêtres have been sold to Assop Ahin for the price of Rs. 600 as per TV 174 No. 441.

The Commission concludes that after the sale of the abovementioned land, Isabelle Fanchin or Elysée Labonté has no land in their name.

\*\*\*\*\*

**CASE NAME: LABONTE**

*TJC/ L/0024/LAVIOLETTE Olga, Clency & others  
Cross reference with TJC/L 0160/LAVIOLETTE Batour Marie Renée*

Clency Laviolette and others claim ownership of 160 *Arpents* of land at Le Morne Brabant which they should have inherited from Joseph David Laviolette, their ancestor, but dispossessed through what the Laviolette family considers to have been illegally registered sale transactions as from 1899. He claims that his ancestor, Jean Baptiste Labonté, was the first owner of a plot of 210 *Arpents* in Le Morne Brabant. At his ancestor's death, his son David Labonté bought the land from all the heirs. The land has never been sold to either Joseph Keisler or Le Morne Brabant. The official Documents of sale of 210 *Arpents* refer to le Morne and not to Rivière Noire. All sale transactions right as from 1899 regarding this plot are illegal. This plot (160 *Arpents*) was surveyed by Land surveyor, Ramiah on behalf Le Morne Brabant Co Ltd recently is declared to be a surplus described in the title deed of David Labonté as per Volume 577 No. 48.

The Laviolette requests the Commission to help in restoring occupational rights of the 160 *Arpents* to the family.

Searches made by the Commission reveal that the official records confirm the sale of the 210 *Arpents* by Antony and Arthur Labonté for the sum of Rs. 4676 to Joseph Keisler on 26<sup>th</sup> December 1899. In the contract, it is mentioned “*au quartier de la Rivière Noire, lieu dit Le Morne*” which defines Le Morne as a locality in Rivière Noire. The contract also mentions a lease of “*Pas Géométriques*” in front of the plot of land but does not mention its area.

All official legal documents confirm sale of the 210 *Arpents* to Joseph Keisler on 26<sup>th</sup> December 1899. The contract was duly registered on 27<sup>th</sup> December 1899 in Volume 2203 No. 141 and relevant duty paid.

Further searches reveal also that this case is related to all the land claims in the region comprising of Le Morne, Coteau Raffin, pertaining to the Spéville/Choolun, Louis Chérubin (Karl) Lamarque and Labonté cases involving the Société Morne Brabant, Société Le Petit Morne and West Horizons Ltd, formerly Tatorio (Holdings) Mauritius Limited.

The Labonté, is a Malagasy free family that came to Mauritius and was established in Le Morne as fishermen. Their history is documented in works of missionaries. The current descendants are Laviolette family. The family lost their land, then David Labonté died leaving only minors as heirs and under a tutor who proceeded to sell most of the land.

Part of the land was sold to Keisler (ancestor of the Cambier family) who sold the said land to his heirs (Société Le Morne Brabant) who, in turn, sold it to Le Petit Morne - all members of the same family Keisler, Cambier, Desveaux de Marigny and Giraud.

However, there is still an unexplained 20 *arpents* of land or so which was left and somehow ended as part of Keisler/Société Le Morne Brabant/Petit Morne) and now being sold to Corniche Bay and now to West Horizons Limited. Part of the same land was sold to Government for the current public road.

This case needs to be taken up and further researched by the Land Research and Monitoring Unit, when set up. Presently, the Labonté/La violette family cannot afford a full independent survey nor pay legal and research fees.

The Commission is of opinion that it is possibly another case of dispossession.

\*\*\*\*\*

### **CASE NAME: MIGUEL**

*TJC/ L/0025/ MALGACHE MYLENE born MIGUEL*

Mylène Malgache, the applicant, says that she has been made aware of land belonging to the Miguel family through a list of registered number of documents. She does not have the Documents; she wants the assistance of the Commission in the search of the official documents in order to get hold of the land.

Though no documents or title deeds have been submitted except a few Civil Status Acts, the Commission went into files and documents at the Archives and at the Conservator of Mortgages to retrieve whatever available piece of information to prove the claim.

In fact, “*Répertoires*” 136 No. 435 and 261 No. 579 revealed that Lucia Miguel did exist and had several plots of land and properties which were sold namely:

- 1 ¼ *Arpents* at Flacq to WW Hardy as evidenced by TV 177 No. 104 dated 4<sup>th</sup> July 1887 and
- Two plots of land at Poudre d’Or on the same day:

- 25 perches at Poudre D’Or to R. Ramlagun as evidenced by TV 364 No. 181 dated 29<sup>th</sup> November 1923
- 25 perches at Poudre D’Or to H. Sohun as per TV 364 No. 187 dated the same 29<sup>th</sup> November 1923

There is no land in the name of late Lucia Miguel.

\*\*\*\*\*

**CASE NAME: MALGACHE**

*TJC/ L/0026/VF/ MALGACHE IVANHOË*

According to the documents submitted by applicant, the Malgache family possessed or leased out several plots of land at Le Morne Brabant. These plots of land are now in the possession of other people.

Moreover, the applicant who also claims to be one of the heirs declares that he has been made aware that other plots of land belong to his family in Port Louis, Chamarel and Rodrigues. He wants the Commission to assist in retracing these lands, the documents, the services of a Surveyor, as well as that of a Notary. Some documents have been submitted in support of the above claim, but only one copy of a title deed dated 1885 submitted has been valuable.

Searches carried out at the Registrar General revealed that the names of Gustave Malgache, Louis Malgache and Jean Malgache do not appear in the Name Index.

From an examination of cases submitted and after indepth searches, the following observation is made:

- The name of Gustave Malgache, Louis Malgache and Jean Malgache do not appear in the Index Register.
- Folio 1, dated 2<sup>nd</sup> November 1877 and transcribed in TV 178 No. 354, is an “*écrit privé... déposé pour minute à Mons. Frédéric Langlois, notaire*”. It appears that Thomy Langlois sold to Bienvenu Malgach, also called Bienvenu Malcontent and to Marie Fanny Cateau, each for half undivided rights in a plot of land, the extent of which is not given, locality unknown, linear dimensions unknown.
- Folio 2, 3 and 5 refer to lease agreements made at Le Morne Brabant in respect of Lots 29, 39, 40 and 41 of Crown Lands granted to Jean, Joseph and Gustave Malgache for the period 1877 to 1887. The members of the family were lessees of the Government.
- Folio 4 is a Survey report drawn up by Sworn Land surveyor Joseph Pastourel de Pastouret indicating that Louis Malgache has acquired in 1863 from the wife of Jean Pierre Godin a plot of land at Rose Belle of an extent of 37 ½ perches. No survey plan of the site is annexed.
- Folio 6 is a survey Report drawn up by Sworn Land surveyor Edgar Merle dated 23<sup>rd</sup> July 1918 for a plot of land referred to as third portion situated at La Louise, Quatre-Bornes of an extent of 74 ¾ perches which Joseph René intends to acquire from heirs Victoire Malgache. No title deed is given.

In the absence of more precise information and land data, the case of the Malgache family is very doubtful.

In so far as the Crown land lease at Le Morne is concerned it was for a period of 10 years which expired on 3<sup>rd</sup> July 1887.

\*\*\*\*\*

**CASE NAME: NAURIS**

TJC/L/0027/ RAM NAURIS OOMESH SURAJ

Ram Nauris arrived in Mauritius from India as passenger no 349/08 on 17<sup>th</sup> July 1908. When he died on 06<sup>th</sup> November 1968, he left to his heirs (wife of his son deceased and grandsons) a plot of land of 12 ½ perches. Following the death of Ram Nauris and after the affidavit has been sworn in, an enquiry was made into the plot of land left by Ram Nauris. The heirs found that a plot of land of 50 *Arpents* situated at Belle Rive, Kawal Nagar belonged to their grandfather. They started procedures to obtain documents: Land Contract, Title Deed, and "*Papier de Vente*". The land was bought from Jean Elysée Laverdure who obtained the land from legal prescription. They hired the services of a Land Surveyor to have a site plan. The Land Surveyor requested police assistance to enable him to carry on the survey. The exercise failed as there was '*intimidation*' from the present occupiers (Press Notice 28/10/1988). In fact, the family had obtained unofficial information that Deep River Beau Champ is now occupying the land illegally and it is being leased to small planters (*système métayage*).

At a meeting at the Commission on 13<sup>th</sup> October 2009, O. Suraj Ram Nauris, the applicant, confirmed that there is no Court action on this land.

An analysis of the issue undertaken by the Commission put forward that according to a copy of a deed deposited at the National Archives, Document NA 154/117, being TV 356 No. 326 drawn up by Notary Gaston Sarre, Jean Elysée Laverdure residing at Grand Port, Mare D'Albert sold to l' "*Indien*" Ram Nauris "*une portion de terrain située au Grand port de la contenance d'environ 50 Arpents, borné d'après un procès verbal d'Arpentage dressé par Jean Louis Merle, Arpenteur juré le 18 avril 1772*", in consideration of a price of Rs. 2,000. At the time of signature of the deed, only a sum of Rs. 200 was paid. The remainder (*la solde*) was to be paid by the end of 1923; unfortunately the "*solde*" of Rs. 1,800 was never paid as evidenced by inscription 538/38 dated 21<sup>st</sup> September 1922 and inscription 557/67 dated 16<sup>th</sup> September 1932, and as recorded at "*Répertoire*" 227/392.

In the light of the above non-payment, the land is still mortgaged in favour of Jean Elysée Laverdure. The claim of the heirs of Ram Nauris having a plot land at Belle Rive, Kewal Nagar still belongs to them as the land has been left waste, as confirmed by the applicant himself.

At a meeting at the Commission on the 10<sup>th</sup> March 2011, the applicant has been informed that the land is at present waste; Deep River Beau Camp Sugar Estate who had sugar cane plantation thereon has not been up keeping the cane. The applicant has been advised to call at the SIFB office and to retain the services of a Land surveyor to identify the land and to start occupying the land if possible.

\*\*\*\*\*

**CASE NAME: BERTHELOT**

TJC/L/0030/PATIENT FRANÇOIS

The applicants, François Patient and José d'Albert (the latter being the legal representative ("*mandataire legal*") of George Berthelot (the latter being in France), aver that Jean Charles Berthelot and Eugène Berthelot sold a plot of land of 13 *Arpents* at Hermitage, Rivière-du-Rempart to "*2 Indiens*": Sujee No. 10759 and Awotarsing No. 4881 on 9<sup>th</sup> March 1875, as evidenced by a document submitted to the Commission. In 1876, there was a '*rétrocession*' of the land by the "*2 Indiens*" to Jean Charles Berthelot, Eugène Berthelot, Ernest Berthelot and Elysée Berthelot. On the site plan of 1823, the land is under the name of Azor Coacaud, "*homme de couleur*", the former owner.

As far as the applicants know from the elder members of the family, the Berthelot family lived on that land in 1876 but when they got married, they left. Some planters have been occupying the land, cultivating vegetables, sugarcane and tobacco. At present, 3 different families are occupying the land. Since 1961, the heirs have been trying to get back the land. In 2001, they paid for the services of an estate agency (Ariel Ltd.) but with no positive result. In 2005, they asked for the assistance of one Eric Pitchen and, again, there was no positive result. They asked a Land surveyor to survey the land but he refused.

The Patient family requests the Commission to assist the heirs to get back the land of 13 *Arpents*.

The Legal Adviser of the Commission had several meetings with the Patient family and they gave sufficient information concerning the successions of

1. Late Jean Charles Berthelot;
2. Eugene Louis Berthelot;
3. Ernest Berthelot;
4. Pierre Elysée Berthelot.

There was no affidavit except that of Elsie Daisy Legrand who was married to François Patient. In order to help the Land Fraud Squad to carry out an inquiry, it was urgent that Francois Xavier Patient submit an affidavit establishing the heirs and parties entitled to a share in the land of 13 *Arpents* situated at Rivière du Rempart.

F. Xavier Patient was married to late Elsie Daisy Legrand, who was herself the daughter of Angeline Berthelot, daughter of Ange Michel Berthelot, who was himself the son of the late Jean Charles Berthelot. Jean Charles Berthelot purchased the land together with his brothers:

- Louis Eugene Berthelot ;
- Ernest Berthelot ;
- Pierre Elysée Berthelot.

After submission of the affidavit drawn with the help of the Legal Adviser of the Commission, same was submitted by both François Patient and José d'Albert to the Land Fraud Squad and made a statement as to the nature of their claim.

Letters were addressed to the Land Fraud Squad on 8<sup>th</sup> and 29<sup>th</sup> March, on 2<sup>nd</sup> June 2011 to understand where matters stood in the present case.

Attention Inspector Nauthoo

*Officer in Charge  
Land Fraud Squad  
Line Barracks  
Port-Louis*

08/03/2011

*Dear Sir,*

*We refer to the letter dated 2nd June 2010 requesting you to enquire into the case reported by Mr. François Xavier Patient concerning a portion of land of 13 Arpents situated at Hermitage, Rivière du Rempart belonging to Jean Charles Berthelot as per deed transcribed in Vol 121 No 67.*

*The affidavit required to start the investigation has already been drawn up and submitted to you. We shall be grateful if you could kindly inform the Commission where matters stand.*

Thanking you,

Yours Faithfully

B.Moutou  
Commissioner  
The Truth and Justice Commission

On 19<sup>th</sup> May 2011, the Central CID answered to the query of the Commission.  
*Letter from the Mauritius Police Force*  
Central Criminal Investigation Department  
Line Barracks  
Port-Louis  
Mauritius

Date: 19th May 2011

Addressed to Mr. Jacques David  
Commissioner  
Truth and Justice Commission  
Belmont House, 1st Floor  
Intendance Street, Port-Louis

Subject: Case OB 315/ 10 CCID - Pre Measure

Your letter dated 29.03.2011 refers.  
I wish to inform you that the enquiry into the case reported by Mr. Francois Xavier Patient is in progress.  
Any new development will be communicated to your office.

f/ ACP (C)

So the case is still being looked into by the Land Fraud Squad.

\*\*\*\*\*

**CASE NAME: CAPIRON**

TJC/ L/0031/CAPIRON JEAN ELOI HERVEY

Jean Eloi Hervey Capiron submitted several claims before the Commission. He lengthily explained the cases supported by documents which he left for analysis.

**Case 1**

Ange Eloi Capiron has bought

- from Shell Eastern and South African Telegraph and Co a plot of land of 16 *Arpents* 5 perches at Roche Bois;
- from *mandataire* d'Abbadie de Barreau a plot of land of 7A 53 perches

In 1995, the claimant, Jean Eloi Capiron, found in the Registrar General Register a transcription without a legal deed dated 1943 concerning the 7 *Arpents* 53 perches. The legal deed was made by a Notary who was not registered as such on that date that is in 1943. In fact, he was Notary as from 1945. Letters were received on the 25<sup>th</sup> November 2006, 10<sup>th</sup> July 2007 and 30<sup>th</sup> August 2007 to the effect that there was no record of Henry Latham Koenig being a Notary in 1943. Henry Latham Koenig was sworn in as a Notary Public at the end of 1950.

A deed of sale with United Basalt was made wherein is inscribed these notes: "*risques et périls sans garantie*". About 2 ½ years ago, Capiron sued United Basalt who accepted that the land was not

*“en règle”*. Capiron’s Attorney informed him that United Basalt is asking for a negotiation. Since 27<sup>th</sup> February 2009, no answer has been received from them.

On the 1<sup>st</sup> July 2003, Capiron reported the case to ICAC. After one year, ICAC answered back that the complaint is *“beyond their purview”*. A case was referred to the Land Fraud Squad in 2004. No answer has been received from them yet.

Ange Eloi Capiron requests the Commission to look into the case so that the family may get back the land which they consider to be their property.

#### **Case 2**

Widow Clément Julie sold a plot of land of 400 toises to Emile Capiron at Royal Road, Beau-Bassin. One Marie Capiron, in turn, sold the land to one Hurhangee. According to affidavit established on 19<sup>th</sup> January 2005, Marie Capiron is not considered as an heiress. However, a will was made *“à domicile”* by Widow Eloi Capiron (wife of Ange Capiron, nephew of Emile Capiron) on the eve of her death in favour of her niece Marie Capiron.

Jean Eloi Capiron is contesting this sale of land.

Marie Capiron has sold another plot of land to her cousin Fernand Capiron.  
Jean Eloi Capiron is contesting this sale.

#### **Case 3**

Another case has been entered in Court by Jean Eloi Capiron against the wife of one Antoine Capiron for illegal possession of land at Beau Bassin.

#### **Case 4**

Henri Vignes sold to Léonel Capiron and his wife two plots of land situated at Mozambique Street and Entre-casteaux Street Port Louis. Léonel in his will left all his assets to his wife Anna Beatrice Rebecca Vignes. Anna Rebecca Vignes made a will in favour of the wife of Ange Eloi Capiron (born Vignes). She made a will in September 1953 in favour of Louise Vignes. Louise Vignes sold the land in 1929 according to deed of sale dated 22<sup>nd</sup> March 1929. The applicant is questioning the date of sale of the land (1929), which according to the date of the will made in favour of Louise Vignes, that is 1953, should normally be her property in 1953.

The applicant requests the Commission to contest the date of the sale signed on 22<sup>nd</sup> March 1929.

The whole technical land team and, in the presence of a Commissioner Jacques David, had a working session with the applicant in the presence of his son-in-law, Stephan Clain on 23<sup>rd</sup> December 2010.

From further information from applicant it appears that:

- The land of 400 Toises situated at Beau-Bassin belonged to the late Anna Rebecca Vignes and bequeathed to Marie Lucie Lise Vignes, the wife of Ange Eloi Capiron.
- The land of 94 Toises situated at Beau-Bassin belonged to the late Marie Lucie Lise Vignes, the widow of Ange Eloi Capiron.
- Marie Lucie Lise Vignes had no children. She died on 23<sup>rd</sup> October 1969.
- According to her last Will and Testament made before Notary public Roger Hermene Louis on 20<sup>th</sup> October 1969, in the presence of four witnesses, she bequeathed all her properties to Marie Capiron.
- The will was registered on 29<sup>th</sup> October 1969.
- Consequently, Marie Lucie Lise became the owner of the two plots of land of 400 toises and 94 Toises.
- One Marie Thérèse Isabelle Capiron claimed that she is the very Marie Capiron who received the property.

- One Marie Joséphine Capiron also claimed to be the very Marie Capiron who received the will drawn up by Notary Roger Hermane Louis on 20<sup>th</sup> October 1969.

The question remains a real mystery: Who is the real Marie Capiron? Marie Thérèse Isabelle or Marie Joséphine? There is no clear answer to this very important question.

The Commission verified the files which reveal that indeed:

- Marie Joséphine Capiron sold the land of 400 toises to one Dr. Hurhangee and Lajputh Beeharry, as evidenced by TV 180/4188. Marie Joséphine Capiron passed away in 2000.
- The land of 94 toises has also been sold by the heirs.
- Marie Thérèse Isabelle Capiron also passed away in 1995.
- There are two groups of persons who claim to be the heirs and successors of late Marie Capiron.

The Commission is of opinion that it is for the Supreme Court to decide and adjudicate as to who are the heirs and successors of Marie Capiron.

The applicant had been requested to bring details of the three cases entered before the Supreme Court and a precise and concise report of his complaints.

### Case 1

The applicant has retained the services of Attorney A.K. Jugnauth and Counsel Balluck to enter three cases before the Supreme Court concerning the plot of land of 16 *Arpents* and 5perches situated at Roche Bois.

On the 29<sup>th</sup> July 2010, the Commission was informed by Attorney A.K. Jugnauth that two cases were withdrawn as the applicant could not give him the required precise information. As regards the case against United Basalt Limited, the case is in shape and is scheduled to be heard by the Court.

In view of the fact that the case is pending before the Supreme Court, the Truth and Justice Commission cannot entertain this particular claim.

### Case 2

According to a deed drawn up by and before the J.M Joson, Notary public dated 8<sup>th</sup> April 1988 and 24<sup>th</sup> June 1988 and transcribed in TV 1804/88 Joséphine Marie Capiron sold the plot of land of 400 toises situated at Royal Road Beau Bassin to J.Hurangee and Lajputh Beeharry. In the "*titre de propriété*", it is stated that the land was bequeathed to her by Marie Lucie Lise Vignes, the wife of Ange Eloi Capiron in virtue of a "Last Will" and testament dated 7<sup>th</sup> September 1964 registered in Register B113 No 745 and transcribed in Volume 960/13.

The land is actually occupied by Hurrangee and Samlo Industry.

Jean Eloi Hervey Capiron is of the view that the vendor had no right to sell the property. The late Marie Lucie Lise Vignes bequeathed the property to Marie Therese Isabelle in virtue of her last will and testaments dated 20<sup>th</sup> October 1969.

The said Marie Thérèse Isabelle Capiron passed away on 20<sup>th</sup> March 2000, leaving as sole heirs and parties her nephew and nieces:-

- Anne Florise Susie Capiron ;
- Marie Hilda Paulette Capiron ;
- Jean Eloi Henry Capiron ; and,
- Marie Thérèse Yolande Capiron.

### Case 3

The land of 94 toises at No 4 Gustave Bestel Street, Beau - Bassin belonged to Marie Lucie Lise Vignes, wife of Ange Eloi Capiron as per deed transcribed in TV 362 No. 95. As per deed transcribed in TV 1198 No. 25, Marie Capiron bestowed the land to her cousin, François Fernand Capiron

following a will and testament dated 29<sup>th</sup> October 1769 and transcribed in Registered B115 No. 1926. Following the contention of the applicant, the said François Fernand Capiron pulled down the building. The land is waste and unoccupied.

The applicant has been advised to start occupying the land as he is one of the heirs of Marie Lucie Lise Vignes.

#### **Case 4**

According to applicant, the land situated at Mozambique and D'Entrecasteaux Streets, Port Louis has been sold by Ange Eloi Capiron and his wife and Louis Léonel Capiron and his wife to one Hossen on 2<sup>nd</sup> March 1929 by a deed drawn up by Gaston Jarré, Notary public.

The applicant avers that this could not be so because between 1927 and 1931 Gaston Jarré was not registered as Notary public.

#### **Case 5**

Ange Eloi Capiron purchased several portions of land of an extent of approximately 74 *Arpents* 53 P from the Agent and Proxy of Gaston d'Abbadie de Barrau as evidenced by a deed drawn up by Henry Elysée Doger de Spéville, Notary public and transcribed in Register C151 No. 1961.

It appears that according to a deed drawn up by and before Henri Latham Koenig, Notary public dated 23<sup>rd</sup> November 1943 and transcribed in TV 480 No. 79, Ange Eloi Capiron sold the several portions of land to one Chan Pong and one Wing Fo Chan Kum.

According to the applicant, there was no Notary public by the name of Henri Latham Koenig practising in 1943.

Indeed, there are letters from the Supreme Court confirming that Henri Latham Koenig was not a Notary public practising on 23<sup>rd</sup> November 1943.

\*\*\*\*\*

### **CASE NAME: ROMEO**

*TJC/ L/0032/ROMEO MARIE LOURDES*

The applicant, Marie Lourdes Roméo, great-granddaughter of Augustin Gateau has made 3 requests to the Commission:

#### **Case 1**

- To seek assistance to know why she does not have the right to a family land of an extent of 12perches at Mapou (TV 1206 No. 180 dated 13<sup>th</sup> March 1973).

#### **Case 2**

- To assist her to get back a plot of land of an extent of 2 *Acres* (being a prescription) situate at Point- aux- Piments (TV 322 No. 238 dated 3<sup>rd</sup> September 1917), and

#### **Case 3**

- To assist her to get back a plot of land of an extent of 3 *Acres* at Pamplémousses (TV 46 No.183) 22<sup>nd</sup> October 1846.

#### **Case 1**

"*Compagnie du Mapou Ltd*" sold in 1920 a plot of land of 12 perches in "*lieu dit 'Mapou'*" Rivière du Rempart to Augustin Gâteau.

Marie Lourdes Roméo, having undertaken some searches, has found that this plot of land has not been transcribed nor sold. She has seen the land which is at present bare. She has contacted a legal person to sell the land and she has been told that she does not have the right to sell it but only to

occupy it. She wants the assistance of the Commission to better understand why she does not have the right on the land which she considers is for the family. She wants to get back the land.

**Case 2**

A plot of land of 2 acres situated at Pointe- aux- Piments, Pamplemousses has been given to Polidor Roméo, Jean Baptiste Roméo, Nemours Roméo, and Louis William Ayen. She is looking for the title deed of the land. Her family tree shows that she is linked to Nemours Romeo. She does not have any assistance to pursue research. She wants to get back the land.

**Case 3**

A plot of land of 3 A at Pamplemousses has been sold to Augustin Gâteau. No plan site is deposited. She is requesting the Commission to assist her to get back the land.

In support of her claim, Marie Lourdes Roméo produced copies of the 3 above mentioned deeds and various Documents pertaining to birth, marriage and death entries. The Commission has gone through the welter of Documents submitted and have observed gross inconsistencies.

Augustin Gateau, as referred to in Case 1 and in Case 3 is two distinct persons. The one referred to in the deed drawn up on 13<sup>th</sup> March 1973 referred to Augustin Gateau as "*labourer*" residing at Réservoir Road, Goodlands; whereas the Augustin Gateau referred to in the deed on 22<sup>nd</sup> October 1846 is a "*cultivateur*" residing at Pamplemousses.

At marriage entry at Document 14B, dated 16<sup>th</sup> July 1842, Augustin Gateau, a Roman Catholic, "*location manager*" got married to Marie Brunette, a protestant. The profession of Augustin Gateau at document related to the death entry is given as "*Carpenter*". At another death entry, the name and surnames of father and mother of Augustin Gateau are not given.

No survey plans of the 3 above named cases are given and no "*Constat*" Report has ever been made by a Land surveyor. The sketch plan submitted has no bearing to the present case.

As regards **Case 2**, (being an affidavit of prescription dated 3<sup>rd</sup> April 1917), registered as TV 322 No. 238, the following persons have prescribed the land namely Polidor Roméo, Jean Baptiste Roméo, Nemours Roméo, Nelzire Roméo (wife: Alice Lebon) and Marie Léa Romeo (wife of Epidariste Balthazar). As such these people have undivided rights in that property. At no place is the name of Augustin Gateau mentioned.

In the light of the above observations, it appears that applicant Marie Lourdes Roméo has still a long way to go to undertake to convince the Commission of the genuineness of her case.

In view of the discrepancies and inconsistencies in the documents produced, it will be very difficult for the applicant to support what she is claiming. In the absence of any affidavit to prove the identity of the several persons having the same name (Augustin Gateau) with different profession, the applicant cannot proceed with her claim.

As regards claim no 2, her ancestors have no right whatsoever on the land of 2 Acres at Pointe-aux-Piments. The land had been devolved to the heirs of these 5 persons.

\*\*\*\*\*

**CASE NAME: MOSAUFEE**

TJC/L/0033/ MOSAUFEE ABDOOL KAYBAD

Abdool Kaybad Mosafee, the applicant, submitted two cases before the Commission. In the first case, he says that his grandfather Soleyman Mosafee, owned a plot of land at Pont Blanc, Flacq. The land belongs now to 4 heirs. The daughter of one heir is occupying the whole plot of land and

forbids the other heirs to occupy the land. Applicant does not know if the land has been prescribed. He wants the land back to the respective heirs. In the second case, he avers that his father Abbass Mosafee purchased "*les droits succesifs mobiliers et immobiliers*" in the succession of Jussodeea Bedasseah and he cannot obtain his share as there are too many heirs.

The Commission analysed the request made by of Abdool Kaybad Mosafee. It is very vague. The claimant has not submitted documents such as title deed, survey report, site location plan family tree to enable the Commission to undertake proper research and investigation.

He has been called by the Commission. He has been advised to contact an Attorney so as to enter a case of division in kind against the other heirs if the averment in the first case is correct,

In the second case, there is no substance to investigate in the matter.

\*\*\*\*\*

**CASE NAME: SOBRATEE**

*TJC/L/0034/ SOBRATEE ABDOOL FAROUK*

The applicant, Abdool Farouk Sobratee, explains that Jameerun Nunhuck married and died in 1956 without children. She had a plot of land of 1 *Arpent* 25 at the Vale, Rivière-du-Rempart. At her death, she gave 73 ½ perches to Ayoob Soobratee, father of applicant. The land is registered under the name of Ayoob Sobratee at the Sugar Insurance Board. At present, planters are illegally occupying the land. Research done has shown that there is no prescription, no acquisition of the land. '*Jouissance*' of the land has been given to one Jumrathan Choonka until her death. The planters occupying the land at present have forbidden members of the Sobratee family to get on their land for surveying purposes. They have consulted a lawyer and the planters have been summoned to release the land. There is no reaction on the part of the planters up to now. The family wants to get the land back.

Searches carried out by the Commission at the office of the Conservator of Mortgages reveals that as per "*Répertoire*" 371 No. 470, Ayoob Sobrattee is the owner of a plot of land of 11 perches. Searches have also revealed that there is no record of a plot of land of the extent of 1 *Arpent* 25 in the Vale region in the name of Ayoob Sobrattee or in that of Jameerun Nunhuck.

\*\*\*\*\*

**CASE NAME: DUSAUTY**

*TJC/ L/0036/ BERNARD GILBERTE*

Justine was an Indian slave. She was the slave of one Dusauty. She was "*affranchie*" by Dusauty and was given the surname Dusauty (with two 'ss' Dusauty in certain documents). Justine had a natural daughter named Lolotte to whom her mother gave the surname of Dusauty.

Lolotte Dusauty bought a plot of land of 343 sq yards bordered by Mountain Street & Field Street, Western Suburb, Port Louis, from the British Government in 1863 for the sum of £ 34.6 shilling. She had a natural son, Edward Albert, declared by his father Eugène Coquet.

Heiress Gilberte Bernard, *born* Coquet is asking the assistance of the Commission to get back the land that she considers belongs to her. It is difficult for her to define the land as the names of the roads have changed. She fears that the land may have been prescribed.

The applicant is looking for the "*Certificat d'affranchissement*" of Justine;

- Claiming a plot of land at Port-Louis field and Mountain streets; and also
- Claiming ¼ undivided rights in a portion of land at Moka, Rivière Saint Martin.

According to TV 90 No. 123, Victorien Justine Dusauty who, the applicant thinks, is the brother or nephew of Lolotte Dusauty, daughter of Justine Dusauty – the age of Victorien Justine Dusauty not being indicated-; yet, after searches undertaken by the Commission, they still own ¼ of 6 *Arpent* in Moka on Rivière Saint-Martin which at present is still in his "*Case hypothécaire*". A plan of the land is also available.

After searches undertaken, the applicant, nevertheless, on the 23<sup>rd</sup> July 2010 requested the Commission not to proceed with her application.

\*\*\*\*\*

**CASE NAME: BARRY**

*TJC/ L/0037/ BARRY JACQUES*

Jacques Barry, the applicant, submitted 16 documents for plots of land having belonged to his ancestors islandwide and requests the Commission to help the heirs to get back the land which they consider to be theirs as these plots of lands are not sold according to him.

The Commission analyses all his documents and made searches at the Conservator of Mortgages Office to retrieve necessary documents in order to better understand the claims.

Louis Marcellin Etienne Barry and his brother Joseph Barry bought on 27<sup>th</sup> May 1815 a plot of land of 500 *Arpents* at Baie du Cap and other plots of land at Flacq. Since 1958, the family made procedures to try to get these lands back but it is quite impossible. In the "*Case hypothécaire*", the land belonging to Marcellin and Joseph Barry have not been sold. Before 1939, Joseph Caboche was the owner of the Beaubois estate under sugarcane cultivation, neighbouring the land of Marcellin and Joseph Barry also under sugarcane cultivation. As from 1939, plots of the land '*numérotés*' (identified by numbers) are being sold. Since then, the neighbouring lands cannot be identified. At present, Constance and Fuel estates are the owners of Beaubois and others.

Analysis of the copy of two title deeds, being copy of a title deed transcribed in Volume 9 No. 51 dated 27<sup>th</sup> May 1815 gives evidence of an acquisition of 500 *Arpents* in the district of Black-River at "*Rivière du Cap*" by Etienne Barry and Edouard Barry in half undivided rights each.

For History, it can be recalled that, according to title deed dated 13<sup>th</sup> July 1815 and transcribed in Volume 9 No. 51, Etienne Barry and Edouard Barry acquired a plot of land of 500 *Arpents* at "*Rivière du Cap*" in the District of Black River from Françoise Louise Frichot in consideration of the price of "6 000 *piastres*" - "3 000 *piastres*" to be paid by 1<sup>st</sup> August 1816 and the remainder - one year later - by 1<sup>st</sup> August 1817.

Searches have also revealed that, according to title deed TV 18 No. 124 dated 20<sup>th</sup> June 1822, Etienne Barry and Jean August Lemaire together with his wife Magdeleine Adelaide Perille Dusanzois sold 156 ½ *Arpents* to one Linormand, de Colomb D'Ecolay and Joséphine Antoinette Linormand. In the same deed, it is mentioned that Edouard Barry and his wife Adelaide Carosin sold their half undivided in that plot of land to Jean August Lemaire and his wife by a deed under private signatures.

Document 16, also being copy of a title deed transcribed in Volume 13 No. 159 dated 3<sup>rd</sup> September 1818, gives the evidence that Louis Auguste Marcellin Barry and his wife Cécile Aline Focard sold to Hyacinthe Béguinot half undivided rights in Domaine Grand Retraite of a total extent of 756 *Arpents* 58 ½ perches.

According to documents submitted and searches carried out at the Registrar General's Office, it is observed that the land at Grande Retraite of an aggregate extent of about 756 *Arpents* 58 ½ have all been sold, although no proper entry has been made in the "*Répertoire*".

Other plots of land have been bought '*à la barre*' by Joseph Barry at Brisée Verdrière, as evidenced by Documents 3-8:

- 12 *Arpents* 75 perches, on 13<sup>th</sup> September 1826;
- 100 *Arpents*-at La Retraite on 26<sup>th</sup> February 1816;
- 80 *Arpents* 34 perches at Grand Bois/ Flacq on 31<sup>st</sup> August 1828;
- 103 *Arpents* at Grand Bois on 30<sup>th</sup> October 1828;
- 120 *Arpents* 78 perches at Flacq on 2<sup>nd</sup> August 1826; and
- 193 *Arpents* at Grand Bois/ Flacq on 11<sup>th</sup> August 1826.

It has been impossible for the heirs to get access to the plots of land, to the administrators of Constance-Fuel. The employees are unaware of the history of the lands and it is impossible to survey the plots of land.

In conclusion, as per the advice of the Commission's Attorney, the remainder of the plot of 500 *Arpents* cannot be traced out at the Registrar General's Office, since most of the transaction at that time was carried out by deeds under private signatures and the records thereof being not registered are not available for public inspection. It is further observed that in view of the 70 inscriptions and charges burdening the land of the Barry family and in the absence of any survey/ constat/ investigation Report made by a Land surveyor, it may be assumed that the ancestors of Jacques Barry have no land still in their names.

However, according to searches, it appears that the land of 756 *Arpents* 58 ½ perches situated at Grand Retraite has already been sold although proper entry concerning the sale has not been made in "*Répertoire*". The absence of entry of the above sales in the "*Répertoire*" of Etienne Barry and Edouard Barry, gives the impression that they are still owners of the land at Grand Retraite.

Moreover, it is to be noted that there are about 70 charges and inscriptions burdening the properties of heirs. The number of the inscriptions is the same as the purchase price of the properties.

\*\*\*\*\*

### **CASE NAME: BERNARD**

*TJC/L/0038/BERNARD Michel Gérard*

The applicant, Michel Gérard Bernard, submitted five claims, with some documents, to the Commission to investigate.

#### **Case 1**

The applicant states that Jean Marie Chenel bought several plots of land at Rivière Française, Flacq (Document 1). In his will, he gave ½ of his assets to his sister, his nephews and niece Jean Pierre and Jeanne Française Diolle, children of Jeanne Villard married to one Diolle. Searches have been made to retrace assets of Jean Marie Chenel.

Jean Marie Chenel has given 78 *Arpents* to his sister Jeanne as "*dot de mariage*" to Villard. The land is shared among the 2 children Diolle. It is the neighboring land to Beaubois estate. According to the deed, Jean Pierre Diolle, owner of the land, died in 1915 leaving a daughter as heiress who married her cousin Jean Pierre d'Avrincourt. In the '*acte de vente*' of the plot of land belonging to d'Avrincourt, it is said that the neighbour is Jean Pierre Diolle. Beaubois sold his estate in 1900. In this title deed, it is said that one of his neighbours is an '*héritier d'Avrincourt*'.

Michel Gérard Bernard requests the Commission to assist him in getting back his land.

**Case 2**

The applicant avers that there exists another plot of land of an extent of  $\frac{1}{2}$  *Arpent* situated at Rivière Française which belonged to Pierre Aristide d'Avrincourt.

The Bernard family would like assistance from the Commission to get back the Beaubois estate as well as the land at Rivière Française, if there is no heir left.

**Case 3**

The applicant says that he was informed by an old lady of 109 years named Jean Louise that Notary Jeffroy gave to the grandfather, Louis Elisé Bernard, a plot of land near la Tour Koenig. On this plot of land there was a little tower which has been destroyed. He went to visit this plot of land when he was 19 years old and he was threatened by those who occupied the land. He adds that no Document is available in the family as his aunt threw away all the papers, thinking that the land had been sold. He wants the assistance of the Commission to find the Notary's deeds.

**Case 4**

Furthermore, Michel Gérard Bernard states that Marie Louise Bernard owned a plot of land of 350 *Arpents* at Flacq. He obtained that information while he was doing family research at the Registrar General's Office in 1959. He reported now that the "*Case hypothécaire*", that is, the "*Répertoire*" 22/88 of Marie Louise Bernard, has been destroyed since then.

The applicant has been informed that that the land is now occupied by a one Bhookun. He would like to identify this land so as to trace the first owner.

**Case 5**

Lastly, the applicant wants the Commission to investigate and research on what happened to a plot of land of 10 *Arpents* that Françoise Elizabeth, *born* Diolle, owned at Rivière Martin, Quartier Militaire. As per the "*Case hypothécaire*" he has seen that the land is not sold. He wishes, if there are no direct heirs and, if he has any right on it, to get back the land.

After analysis, the Commission has reached the following conclusion:

**Case 1**

In spite of some documents submitted, there is no indication to the relationship of the applicant with Jean Marie Chenel, the alleged owner of several plots of land. Neither can the applicant establish the relationship to Jean Pierre Diolle and Jean Pierre d'Avrincourt. There is no family tree and no affidavit of notoriety. The applicant has not indicated what portion of land, if any, has been left. He does not know who is occupying the land which he is claiming.

**Case 2**

The applicant says he wants to get back the land of  $\frac{1}{2}$  *Arpent* situated at Rivière Française, if there is no heir. The Commission cannot establish if the applicant normally is an heir and if there are no other existing heirs as no Documents, affidavit, site plan or deeds have been produced.

**Case 3**

The Commission cannot establish a case on hearsay evidence made by a lady of 109 years.

**Case 4**

There are no official records at the Registrar General's Office concerning the land of 350 *Arpents* at Flacq. According to searches carried out by the Commission, the page is missing. It is very difficult for the Commission to identify or trace out the land.

**Case 5**

The applicant wishes to get the 10 *Arpents* of Françoise Elizabeth if there are no direct heirs. He has not been able to establish his relationship with Françoise Elizabeth, *born* Diolle, the alleged owner of 10 *Arpents* of land at St-Martin, Quartier-Militaire. There is no family tree, no affidavit.

The site plan produced is a very old one; it is difficult to locate the land at present. Furthermore, the “*Case hypothécaire*” mentioned by the applicant has not been produced.

It is for applicant to prove and give evidence, documentary or otherwise to show that he is entitled to the land or has a share and/or interest in the land.

\*\*\*\*\*

**CASE NAME: RAMNAUTH**

*TJC/ L/0039/ RAMNAUTH MYPUTH*

S. Ramnauth has shared portions of land acquired by him at Rose-Belle between his heirs. His son Ramhurrack Ramnauth has received 2 portions of respectively 37 ½ perches and 50 perches at Rose-Belle. At the death of R. Ramnauth in 1939, his wife looked after the land for some time. She then “gave” the land to one Narain Booputh to look after. The latter occupied the land as from 1946. Myputh Ramnauth, the applicant, through an affidavit, contested this fact. On 13<sup>th</sup> November 1992, Narain Booputh was told, through a “*mise en demeure*” to vacate the land within one month or to give an indemnity in case of use and occupation. There was no response from Booputh. In 1993, he prescribed the land in his favour.

Myputh Ramnauth went to Court in order to contest the prescription.

The brother of Narain Booputh, in the meantime, shared the land among his heirs before the judgement has been pronounced.

The applicant entered a case before the Supreme Court praying *inter alia* for a judgement declaring null and void the prescription of the two portions of land. (*SCR 53222 refers*). Copy of the judgement as well as part of Court proceedings are also in file. The case was dismissed on 25<sup>th</sup> November 1999.

Myputh Ramnauth did not appeal against this decision.

\*\*\*\*\*

**CASE NAME: CORETTE/ SOBHA**

*TJC/L/0040/VF/ CORETTE/SOBHA*

The applicant, Roland Sobha, says that he is the son of Micheline Corette, and he has been made aware that his ancestors owned several plots of land across the island.

The applicant, who left two birth and one marriage certificates, has neither a title deed, nor a survey plan nor any official document. The name of his ancestors is unknown. He wants the Commission to undertake searches and to get back the plots of land.

A letter was sent to the applicant on 12<sup>th</sup> August 2010, inviting him to meet members of the Commission in order to obtain more information about his request. He failed to do so.

He was again called on 7<sup>th</sup> September 2010, but there was no answer at the other end of the phone.

Roland Sobha called at the Office of the Commission on 24<sup>th</sup> August and he promised that he will revert back as he needs time to get hold of some documents. He was called again on 7<sup>th</sup> December 2010. He promised to revert back to the Commission on the following week with Documents that might help him and the Commission to undertake searches.

More efforts were undertaken by the Commission to reach Roland Sobha.

Unfortunately, phone calls made on 21<sup>st</sup> December 2010, remained unanswered.

\*\*\*\*\*

**CASE NAME: CORNET**

*TJC/L/0042/ CORNET NOEL SYLVIO*

The applicant, Noël Sylvio Cornet, relates that he has always heard his grand aunt say that the family owned a plot of land at Flacq, near Fuel. He has no document and has done no research as he does not know where to begin his search.

In fact, he does not know the name of the ancestor. He has neither a survey plan, nor a title deed

He wants the Commission to assist him in finding documents as he does not know how to proceed and has no financial support.

In the absence of documents, no search can be carried out.

The applicant was called at the Commission to find out what he possesses in terms of further information, but he never took the trouble to respond to the invitation.

It seems that the applicant is not interested with the case.

\*\*\*\*\*

**CASE NAME: PRAYAG**

*TJC/L/0043/PRAYAG ADEN KUMAR*

The applicant, Aden Kumar Prayag, put four claims before the Commission about a plot of land his great grandfather possessed throughout the island.

**Case 1**

- Aden K. Prayag’s grandfather called Seegobur Prayag possessed plots of land of 102 A at L’Ile d’Ambre. The land has been divided among the heirs, including Seetulpersad, son of Seegobur Prayag. No document has been obtained regarding this possession.

**Case 2**

- Seetulparsad Prayag was leasing out a plot of land of approximately 10 perches at L’Amitié, Mon Loisir for a period of 9 years as from 1<sup>st</sup> August 1951 to Adorisah Busriah. The family wants the land back.

**Case 3**

- Seewoonarain Prayag (brother of Seetulparsad Prayag) has been leasing out a plot of land of 1 *Arpent* 25 perches at Le Ravin, Morcellement Tayack, Rivière-du-Rempart to Sookaram Dookaram for a period of seven years until 1958. The family wants the land back.

**Case 4**

- Seetulparsad Prayag possessed:
  - A plot of land of 5 *Arpents* at Hauterive, Rivière-du-Rempart

- A plot of land of ½ *Arpent* at Royal Road, Le Ravin, Rivière-du-Rempart (behind Kalimaye)

The applicant avers that documents exist in the Registrar General's Office registers and he wants to have these Documents He personally did not hand over any document to support all his requests.

The Commission investigated at length to discover that the applicant's father, named Seetulparsadsow Prayag, passed away on the 15<sup>th</sup> April 1967. A copy of the "*Case hypothécaire*" 293/617, 342/937 and 349/872 indicate that between the years 1945 to 1952, Seetulparsadsow Prayag disposed of all his properties. The applicant was only a 5 years minor then.

So, the properties which are being claimed have already been disposed of by applicant's grandfather, and nothing has been left to the applicant and his family, as he claims.

\*\*\*\*\*

**CASE NAME: GRENADE**

*TJC/L/0044/GRENADE CHRISTIAN*

Perrine La Grenade, also called Perrina Grenade, was owner of a portion of land of the extent of 15 *Arpents* situated at Le Bouchon, for having bought it from Gervais St Mart by virtue of a deed drawn up by Mr. Marie Rosemond Giblot Ducray, Notary Public of Grand Port and La Savanne on 31 July 1839 under reference NA/75/10 (B) No. 1375. He passed away on 04 September 1862 at 80 years old.

The Heirs aver that Gervais St Mart who got married to Perrine Grenade was the owner of a plot of land of the extent of 25 *Arpents* at Le Bouchon, by virtue of a deed drawn up by the above-named Notary on 08 December 1833, under reference NA75/4 No. 232 for having bought it from Marie Joseph Nanette and heirs Quantin Gébert.

According to "*Partage Testamentaire par Perrine La Grenade*" deed of Notary Adolphe Noël Macquet, ref. NA83/10 No. 477, dated 4<sup>th</sup> November 1852, she left 15 *Arpents* to her thirteen (13) natural children.

The remaining 10 *Arpents* was attributed to heirs Gervais St Mart according to a deed drawn up by Notary Adolphe Noël Macquet on 7<sup>th</sup> October 1862 - Ref NA 83/21 No. 3807.

The ownership of this plot devolved to the heirs, that is, his two brothers (i) Louis Charles St Mart (ii) Alexis Theodore St Mart (iii) his sister Françoise Emilie St Mart, widow of Hippolyte Baptiste. In October 1863, they proceeded with a division in kind of the property and agreed to a partition made "*à l'amiable*" whereby each party was attributed an extent of 3 1/3 *Arpents* each.

However, from a report of Surveyor Jean Chaton dated November 2007, it would appear that the major part of the 25 *Arpents* have been prescribed and that only "*une petite partie est restée sans occupation mais pas prescrit*". The Chaton Report gives a list of 63 occupiers/owners at Le Bouchon having obtained land through acquisitive prescription.

Considering Le Bouchon as being an Eldorado, people have squatted upon the land of the Grenades, resorted to acquisitive prescription, sold the land and, over the years, established a sort of militia to look after their property. There had been prescription over prescription, overlapping of prescription causing "*overlapping of title deeds*".

In his quest for identifying the land of his ancestors, the Police Officer Louis Edlé Grenade confided to three of his colleagues at the Police Division of his inability to retrieve the land and entrusted them in his absence with that work. While he went to establish in Australia, then Police Officers got the land prescribed by someone residing in the region and ultimately grabbed part of the land so prescribed.

In the light of documents provided, it is observed that the claimant's ascendant Achille Grenade owned one *Arpent* out of the whole 25 *Arpents*.

No documentary evidence has been submitted about the ownership of the land after the period 1862, that is whether it was still owned by the Grenade, save a copy of a lease agreement registered on 23<sup>rd</sup> May 1949 in T.B No. 52, wherein it is noted that a plot of land to the extent of one *Arpent* out of 25 *Arpents* was given on lease for a five-year period to expire on 31<sup>st</sup> January 1954, by Olezia Grenade to Dayanand Seewoosunkur.

To succeed in his claim, Edlé Grenade has to show that he has a genuine title ("*juste titre*") that is "*un titre exempté de vices*".

In any case, the Commission has, at Le Bouchon, an example of dispossession of land through the procedure of acquisitive prescription by individuals.

\*\*\*\*\*

**CASE NAME: BUSAWON**

TJC/ L/0045/ BUSAWON AMARNATH

Busawon came to Mauritius as an Indian Immigrant in 1860. He was employed as a cook by the Dalais family. In gratitude, he says, the Dalais family gave him in a will, 15 *Arpents* of land in Vacoas in 1910. At his death, there was a "*capitation d'héritage*" by the daughter of Dalais to whom Busawon "*handed the will which was never returned to him*".

The applicant, Amarnath Busawon, is requesting the Commission to investigate into the official records to find out about the land and wants reparation.

Searches undertaken by the Commission revealed the following:

- Busawon, married to Pynee Kadun, the Indian immigrant from Calcutta, bears the number 209881.
- They bought a plot of land at Highlands of the extent of 45 perches from Widow Louis Olivier Maingard and Ors.
- That plot of land was subsequently subdivided among his heirs into 4 lots and given to namely: Seelugun Busawon obtaining 10 ½ perches, Seeruttun Busawon obtaining 16 ½ p; succession Ramkissoon Busawon getting 9 perches and Ramlochun Busawon the remaining 9 perches;
- Ramlochun Busawon (being of the first generation) sold the plot of land of extent 9p to R. Busawon on 21<sup>st</sup> April 1965 according to TV 479 No. 137.

There is no record at the Registrar General's office of any "*will*" having been made by the Dalais family in favour of Busawon, the Indian immigrant bearing No. 209881 regarding a portion of land of 15 *Arpents* at Phoenix.

\*\*\*\*\*

**CASE NAME: PATRICK WEBB/CHANG KYE**

TJC/L/0046/PATRICK WEBB/CHANG KYE

Patrick Webb, the applicant avers that his ancestors, François Dioré and Auguste Dioré, were owners of several plots of land in the region of Flacq, Quartier Militaire, Pointe aux Piments. For the Médine Camp de Masque Pavé region, the applicant has submitted 4 documents in support of his claim.

The family requests the Commission to intervene so that they may know where the land of Mon Désert Alma ends as they aver that the Sugar Company is occupying their land illegally and wish to get their land back.

Their claim mainly concerns their ancestral and hereditary rights over a portion of land of an extent of 100 *Arpents* belonging to late Auguste Dioré and located at Quartier Militaire in the District of Moka.

In virtue of a Notarial Deed drawn up by late Notary Vigoureux de Kermorvat dated 16<sup>th</sup> January 1860, registered in Reg C93 No. 1196R and transcribed in TV 68 No. 352, Mr. Auguste Dioré acquired from Mr. Jules Gauthier in consideration of the price of 3,000 *piastres*:-

- a portion of land (*portion de terrain habitation*) of the extent of 58 *Arpents* situated at Moka and bounded as follows:  
*Par la propriété acquise de Rivière, la propriété Desfontaines et la Rivière Française.*
- une autre portion de terrain habitation of the extent of 100 *Arpents*, acquise de Bassaignet; and
- une troisième portion de terrain habitation of the extent of 58 *Arpents* acquise de Fanon et borné d'un côté par la propriété de Messieurs Rousselin d'un autre par celle de Jean Piston et du troisième côté par la Rivière Française et par la propriété de Quesnay.

There has been a correspondence between Webb/Chang Kye and Mon Désert Alma regarding the above land.

The Commission requested Webb/Chang Kye to submit a Survey Report drawn by a Land Surveyor in justification of their claims of hereditary rights.

Land surveyor, A. Kauppaymuthoo, submitted a Report dated 23<sup>rd</sup> March 2011 wherein he came to the conclusion that:

- James Patrick Webb is in fact one of the heirs of Auguste Dioré after taking cognizance of the family tree provided to him by his client; and
- the portion of land of an extent of 100 *Arpents* belonged originally to Auguste Dioré and is the one indicated on plans attached to his Report.

In the course of a hearing before the Commission on 7<sup>th</sup> September 2011, the Chief Executive Officer of Espitalier Noël Limited, Gilbert Espitalier Noël, promised to help the Commission and the Webb family in supplying their plans and their title deeds.

A site meeting was arranged by the Commission on 28<sup>th</sup> September 2011 at 1400 hours between ENL represented that day by Jean Marc Oudian, Officer-in-Charge of Espral Limited and Patrick Webb. Only four portions of land of an aggregate extent of 15 *Arpents* 00 belonged to ENL and the surplus is occupied by the heirs of Doorganah Tatayah.

Patrick Webb is satisfied with the stand taken by the Commission to help him to recover part of his land, and it is up to him now to continue his fight with ENL and heirs Doorganah Tatayah.

**CASE NAME: RAMPHUL**

TJC/L/0047/RAMPHUL DEODOTH

Sookbasso Sukurdeep (new deceased) was owner of several plots of land respectively of

- 7 ½ *Arpents* and 6 perches in Montagne Blanche, Flacq
- 6 *Arpents* and 2 perches at Bell Ville Pizan, Montagne Blanche
- 12 *Arpents* and 55 perches at Montagne Blanche
- 1 *Arpent* and 19 perches at Montagne Blanche
- 5 *Arpents* 17 perches at Montagne Blanche from which portion a part has been prescribed at Montagne Blanche.

Sukurdeep sold all these plots to one Retnon Velvindron (now deceased). Retnon Velvindron, in turn, sold the land to one Deoduth Ramphul. When Velvindron was the owner, the land was used as pasture land. After having bought the land from Velvindron, the new owner, Ramphul, wanted to 'bulldoze' it. FUEL Sugar Estate objected, saying that the land is theirs by occupation. Thus, as 'propriétaire par occupation', FUEL Sugar Estate leased the land as 'métayage' to several small planters. D. Ramphul, the applicant, finds himself is helpless as he cannot take possession of his land.

The applicant requests the Commission for assistance to get back all the plots of land belonging to him.

On 30<sup>th</sup> September 2009 Déoduth Ramphul informed that he would like to depone before the Commission on a case of "land dispossession by Flacq Union Estates Limited" (FUEL). This case was heard on 20<sup>th</sup> November 2009 in presence of all Commissioners.

Deoduth Ramphul a well-known entrepreneur residing in Montagne Blanche in the Moka district made acquisition of 6 plots of land from one Retnon Velvindron on the 21<sup>st</sup> April 1977. The deed of sale was made before a Notary public Joseph Marcel Joson. The sale refers to 6 plots of land totalling 33 *Arpents* as under -

- Plot 1 7.50 *Arpents*
- Plot 2 6 - *Arpents*
- Plot 3 12.55 *Arpents*
- Plot 4 1.19 *Arpents*
- Plot 5 5.17 *Arpents* &
- Plot 6 1.25 *Arpents*

According to the deed drawn by Notary Joson, the land was a free hold and not burdened by any charge or mortgage. However, a survey carried by Robert Foiret, Sworn Land Surveyor, revealed that while plots Nos. 1 and 2 were unoccupied, plot No. 3 was occupied by the FUEL Sugar Estates. As for plots Nos. 4, 5 and 6, Foiret admitted that further searches were made to identify their exact location.

The Commission puts the question: "Should the deed of sale be drawn in such circumstances?" Whether D. Ramphul was able to identify any of the plots of land before agreeing to sign the deed of sale appears dubious. In any case, he has never, he says, been able to take possession of any of plot of land he purchased as all were occupied by the FUEL.

Following representations made, the FUEL has always affirmed that the land was the property of the “*company by occupation*”. D. Ramphul reports that the FUEL Sugar Estate has let the land to a number of planters under the “*métayer system*”.

The Commission is well aware that this kind of arrangement is very common in Mauritius in that landless farmers are allowed to cultivate land belonging to sugar estates companies and on harvest part of the proceeds are retained by the sugar estate.

The Commission cannot give any conclusion into this case, as D. Ramphul has referred the case to the Supreme Court for redress.

\*\*\*\*\*

**CASE NAME: LAMARQUE**

*TJC/L/0048/ LAMARQUE LOUIS CHERUBIN*

Louis Cherubin Lamarque has addressed the Commission on the subject of “Land ownership and right of access” in regard to a portion of land of an extent of 16.88 hectares or 40 *Arpents* situated at Coteau Raffin, La Gaulette, Case Noyale in the District of Black River which, he claims, belongs to the descendants of Lauricourt La Poule.

Louis Cherubin Lamarque claims to be a heir to Lauricourt Lapoule and the descendant of a slave family. He claims that his ancestors resided on the land and cultivated it. The heirs have been living peacefully on the land until 2004, when their neighbour (Le Petit Morne Ltd.) started to interfere with their rights. He is requesting the Commission to look into the matter and reinstate access to the site from Black River Road.

**The Ownership of the Land by Lamarque**

According to a deed transcribed in Vol. 169/171, Lauricourt Lapoule acquired the rights of Jean Charles Lamoureux, Joseph Lamoureux and Dick Lamoureux in the succession of their grandfather in a portion of land in an extent of 40 *Arpents* situated at Coteau Raffin in the District of Black River. In fact, the vendors were heirs to their father Eugene Lelong who acquired same in September 1844 from Marguerite Fayot.

The land has not been sold according to the claimant, and its ownership still rests with the heirs. However, it is not clear from the contents of the deed referred to above whether the heirs are entitled to the whole of the 40 *Arpents* or only to undivided rights within the area.

Louis Cherubin Lamarque, who has as Consultant, A. Kauppymoothoo, has submitted six plans. These plans have been certified as correct by A. Kauppymoothoo, Land Surveyor, and show the limit of concession de Lamarque and the various changes which occurred subsequently as a result of the establishment of the *Pas Géométriques*, Mountain reserve and other sale transactions.

In fact, the plans tend to prove that the 40 *Arpents* of land are located within a larger portion of land which has been the subject of land transaction on several occasions without any mention in any of the deeds of the rights of the heirs Lapoule.

**The contention of the Lamarque family**

It is the contention of the heirs that the development originally proposed by “*Le Petit Morne Ltd.*” and later on by Tatorio Holdings (Mtius) Ltd. in connection with the Corniche Bay Golf Resort at La Gaulette has been planned on an area of 101.2755 hectares purchased by the latter company and which deed does not take into account the location of the 40 *Arpents* or any part thereof within that area. Furthermore, there have been incidents when access to the land by *Chemin Dansac* has been denied or obstructed by the Company.

### The ownership of the land by Tatorio Holdings (Mtius) Ltd

Tatorio Holdings (Mtius) Ltd. purchased the property from "*Le Petit Morne Ltd.*" in terms of a Notarial Deed transcribed in Vol. 6924 No. 2. In the deed, the description of the land is said to be according to a report drawn up by Jean Claude D'Hotman, Land surveyor on 28 January 2008 and which bears reference L.S63 No. 24/33. The same deed refers to a previous survey effected by Jean Jacques Desmarais, Land Surveyor on 1<sup>st</sup> June 2006 and bears reference L.S57 No. 50/37.

The Commission has come across another report drawn up by the same J.C. D'Hotman in respect of the same property, but drawn up in English ref. L.S54 No. 24/50 which indicates the same boundaries as defined in the deed mentioned above and, likewise, does not mention the presence of any settlement within the area nor of the access called *Chemin Dansac*.

Tatorio Holdings (Mtius) Ltd. purchased the property for the price of eighteen million one hundred and fifty six thousand eight hundred and thirty six Euros, i.e., 18,156,835 euros for the specific purpose of using the land for the development of a project under the Integrated Resort Scheme (IRS) as per the certificate issued by the Board of Investment on 4<sup>th</sup> December 2007.

In the report submitted by L. C. Lamarque, may be seen a chronology of the events in connection with the proposed development, including a meeting held in December 2007 between the promoters of the IRS project and the heirs. It is mentioned therein that:

- (i) heirs Dansac refused money compensation;
- (ii) heirs Dansac just wanted free access through the existing slave route;
- (iii) there was no more dispute between the parties.

The IRS project has never been implemented up to now and the assets of the company are in the hands of a Receiver and Manager, pursuant to a floating and fixed charge. In his capacity as Receiver and Manager of the Company, Louis Clensy Appavou has invited tenders for the purchase of the assets of the Company comprising the threshold bare land of an extent of 101 ha. 2755 m<sup>2</sup> earmarked for the IRS. The closing date was Wednesday, 16<sup>th</sup> July 2009.

In consequence to the above, Louis Cherubin Lamarque addressed him a letter dated 10<sup>th</sup> July 2009 in which he drew attention to the appeal lodged before the Environment Appeal Tribunal and requested him to amend the invitation to tender published in July 2009 in order to reflect the true picture.

It should be observed that at some point in time there seems to have been recognition by the Company "*Le Petit Morne Ltd.*" of the rights of the heirs Lapoule is as much as an offer of Rs. 3 Million was made. But this offer was rejected.

Nowhere in the elements submitted by the Lamarque family on behalf of those in the rights of Lapoule is there any reply from the promoter company or a firm commitment to amend the project in order to take into account the rights of the heirs. And yet, on 12<sup>th</sup> June 2009, that is, well before the closing date for the tenders launched, the assets of Tatorio Holdings (Mtius) Ltd have been sold for the sum of 9, 750, 000 Euros, to West Horizon Limited, a company incorporated on 12<sup>th</sup> June 2009 as a Domestic Company bearing No. CO 88750 by Louis Clensy Appavou of Appavou Corporate Services Limited, setting himself as Director, with one shareholder, Tatorio Holdings (Mauritius) Limited (in Receivership) having one ordinary share of One Rupee. When Louis Clensy Appavou deposed before the Commission, he avers that he was not aware of any claim of the Lamarque family, nor was he aware of the letter dated 10<sup>th</sup> July 2009.

In the circumstances, the Commission feels that at this stage, the stand of the Receiver and Manager of the Company, now Director of West Horizon Limited, on the important issue of the ownership rights of Lapoule should be known. In the event of these rights being recognised, it would be important to know as well as how the former Receiver and Manager, now Director of West Horizon Limited, proposes to cure the defect in the title deed of Tatorio Holdings (Mtius) Ltd.

\*\*\*\*\*

**CASE NAME: MALOUE***TJC/L/0049/ HUET SYBILLE daughter of MRS. MALOUE*

Sybille Huët, the applicant, presented two cases before the Commission. In the first case, she wants the assistance of the Commission to find a conclusion so that they may obtain the necessary documents in order to retrieve their property and in the second case, she wants to get back a plot of land, she believes is hers.

**Case 1**

In 1947, the Magon family sold a plot of land of 25 perches at Vieux Grand Port to Xavier Maloupe, the Tonta family and the Bhugawon family. Each family bought respectively one part of the land, which was not divided legally. The contract of the three is "*indivisé*". The Tonta and Bhugawon family have respectively constructed on the plot of land. The Court appointed an Appraiser for the sharing in the person of Kadhati Khoyratty. However, no fees were paid by either the Tonta or the Bhugawon to obtain the contract. So, none of the three parties has been able to obtain a contract.

Another surveyor was then appointed by the Court in the person of B. Dumazel to survey the land. This time, the Bhugawon family contested the contract through an Attorney.

**Case 2**

The Maloupe family bought a plot of land in 1987 at Petit Bel Air. The son, Xavier Maloupe, was granted a loan and he put the said plot of land as guarantee. After having paid the loan, he sold the land to someone else. The family wants to get land back.

The Commission looked into both cases.

The case of Maloupe is being resolved in Court by way of a "*division in kind*". Harold Lam Shang Leen, Attorney for the Maloupe, informed the Commission that B. Dumazel, Sworn Land surveyor, appraiser, has filed his survey / valuation report on 21<sup>st</sup> October 2010. However, there has been a counter report made by Tonta family and the case was scheduled to be heard on 18<sup>th</sup> March 2011.

As for the second case, it is revealed that, according to deed transcribed in TV 1629 No. 174, Benjamin Cyril Maloupe purchased the "*solde*" of 25 perches from the Ganoo family on 29<sup>th</sup> May 1984.

According to deed TV 1758 No. 107 dated 16<sup>th</sup> March 1987, Benjamin Cyril Maloupe sold the land to his mother Marie Paulin Nadal, widow of Xavier Maloupe.

According to deed TV 2019 No. 10 dated 29<sup>th</sup> June 1990, Widow Xavier Maloupe sold the land to her son Louis Kingsley Maloupe.

According to deed TV 4693 No. 29, Louis Kingsley Maloupe sold the land to Sooraj Koomar Ramdhayan.

It is clear from the above deeds and land transaction that it was Benjamin Cyril Maloupe who was the original owner of the land of "*solde*" of 25 perches which he purchased from the Ganoo family.

Therefore, Sybille Huet, daughter of Marie Paulin Nadal, spouse of Xavier Maloupe cannot claim any right over the land which her mother sold on the 29<sup>th</sup> June 1990 to Louis Kingsley Maloupe.

\*\*\*\*\*

**CASE NAME: FORTUNO/PETIT**

TJC/L/0051/ FORTUNO EDWIN GABRIEL

Edwin Gabriel Fortuno, the applicant's grandfather, Santalawa Bheekarry son of an Indian immigrant named Bheekarry No. 20999, owned a plot of land at Quatre-Cocos, Flacq. His grandfather was baptized and named Jean Baptiste Petit. He had two sons, Anatole, the applicant's father, and Jean Baptiste Gaston. Jean Baptiste's son has taken over all the land. The applicant wishes to get back his share of the land; he also wishes to claim that he was the descendant of an Indian immigrant.

Furthermore, the daughter of Louis Philippe Fortuno also claims a portion of land of an extent of 4 ½ perches situated in the District of Flacq, Centre de Flacq, more precisely at Sainte Ursule Street belonged to Louis Philippe Renaud Fortuno, her father.

The Commission heard the story of both applicants who had a sad telling. They, in fact, owned a land in Centre de Flacq, as evidenced by TV 1405/14.

In virtue of a deed drawn up by and before Notary public Joseph Henri Paul Leblanc, dated 19<sup>th</sup> April 1978, and transcribed in TV 1405 No. 14, Mustapha Ally Nanthoo sold to Marie Eveline Russie widow of Joseph Anatole Petit (Fortune). She died in 1995 and left the bare ownership to Pierre Roger Fortuno, Marie Solange Fortuno, Marie Edna Fortuno and to the wife of Philippe Lamarque as well as to Louis Philippe Renaud Fortuno of a portion of 4 ½ perches in the District of Flacq, place called Centre de Flacq, Sainte Ursule Street.

The family of Louis Philippe Fortuno constructed a one-storey building on that land. Whilst the family was occupying the first floor, they rented the ground floor to one Khadaroo who was operating a hardware shop.

Marie Solange Fortuno and Pierre Roger Fortuno appointed Philippe Fortuno as their agent and proxy. Marie Edna Fortuno never gained any power of attorney.

On 8<sup>th</sup> November 1979, the family borrowed the sum of Rs. 11,000 from one Seewoo, a money lender, and the Notary G.E. Sinatambou took charge of that land and inserted it in the TV 1360 No. 31 and indicated that the reimbursement was scheduled for the 8<sup>th</sup> November 1980.

The property was seized on 9<sup>th</sup> December 1983 following a seizure as service of a "*Notice Commandant*" was personally served on 9<sup>th</sup> November 1983 on Louis Philippe Renaud Fortuno.

Nobody was aware of the "*Sale by levy*" except Philippe Fortuno. The wife of the latter was present in Court on the 19<sup>th</sup> April 1984, she asked for a three months' delay for the repayment of the Rs. 11,000 and was refused.

The property was sold before the Master Bar on the very day, on 19<sup>th</sup> April 1984, and adjudicated to Mohamed Feisal Peeroo represented by his agent and Proxy Mamode Aniff Peeroo for the sum of Rs. 181,000.

In July 1984, Pierre Roger, his mother and Philippe were in the house when the purchaser and the police officers removed the personal effects of the Fortuno family. Peeroo took possession of the property.

Nobody was aware of the seizure and sale. It was only the police officers acted on that very moment their removable effects were thrown on the street that the family realized what was happening to their property.

Pierre Roger, his mother were later informed by the wife of Philippe Fortuno about the whole tragedy. They were not aware that Philippe Fortuno was a registered patient of Brown Sequad Hospital.

Even if Philippe Fortuno was not a certified mental patient who could not exercise his civil rights, yet, a letter from Brown Sequad Hospital, dated 28<sup>th</sup> December 1977, does prove that he was a registered patient there.

The Commission is left with some disturbing questions:

Were Marie Solange Fortuno and Pierre Roger Fortuno aware of the state of health of their brother?

How is it possible for a mental patient to exercise his civil rights to borrow money in the name of the others?

Can a mental patient act as agent and proxy of his brother and sister? This answer can only be obtained from the Brown Sequard Hospital or the treating doctor.

Why have Marie Edna Fortuno and Widow of Joseph Anatole Fortuno never been served with a "*Notice Commandant*," notice of seizure and sale, although they had a right and share in the property.

The sale dates back to 19<sup>th</sup> April 1984 before the Supreme Court at the Master's Bar.

It appears that, out of ignorance, the co-heirs/co-owners never took any legal steps to ask for the cancellation of the said sale, as they were never advised that they could do so.

\*\*\*\*\*

**CASE NAME: FRIQUIN**

*TJC/ L/0052/ VF/ FRIQUIN ANDRE  
Reference to Case Cornet (wife of A. Friquin) re file TJC/L/0163*

André Friquin writes that he has learnt that his father, Julius Emmanuel Friquin, married to Marie Ida White, has inherited from his grandfather, Emmanuel Friquin Cooper, a plot of land at Rivière Noire. This piece of information was given to him by one Rigobert who works at the Nelson Mandela Centre for African Culture. The applicant submitted documents in his possession: his birth certificate, marriage certificate, birth certificate of his father, his identity card and those of his wife and father without any title deed or survey plan, André Friquin apparently left some documents with Rigobert, but could not retrieve them.

After searches undertaken by the Commission, it has been found that his father's name, Julius Emmanuel Friquin, is indeed in the *Case Hypothécaire*, but the name of Emmanuel Friquin Cooper does not appear in the Name Index Register at the Mortgage office,

In fact, Julius Emmanuel Friquin owns a plot of land of the extent of 153 *toises* at Ste. Croix as per TV 1428 No. 45 dated 13/12/1978. There is nothing apparent at Rivière Noire.

\*\*\*\*\*

**CASE NAME: RIACCA**

*TJC/ L/0053/ VF/ RIACCA FLORENCE*

The applicant, Florence Riacca, writes that she owns a CHA house at Cité La Cure. It was bought when she was married to André Rubain Riacca, now deceased. The couple have been living separately for some thirty year but they never divorced. After the death of her husband, she wanted to take possession of her house but the concubine of her husband did not want to leave the house. She has gone to Court and is waiting for the judgment.

The Commission analysed the case and it is revealed that, in fact, the CHA house was purchased during the legal community of goods and property which existed between her and her husband, André Rubain Riacca, at the time when they were married. According to title deed transcribed in TV 4759 No. 43, the Central Housing Authority did sell the house to the late André Rubain Riacca.

As per notarial deed transcribed in TV 4759 No. 43, dated 12<sup>th</sup> November 1984, the CHA sold to André Rubain Riacca a concrete house under C.I.S. cover standing on a plot of land of the extent of above 2 ½ perches at 29, Sir Hilary Blood Avenue at Vallée-des-Prêtres (Cité La Cure).

In the same deed, it is observed that André Rubain Riacca is married under the system of legal community to Marie Rose Katiah which marriage was celebrated on 1<sup>st</sup> July 1963.

With the death of André Rubain Riacca, his estate and succession have devolved in his heirs. The case is before the Court awaiting Judgement.

\*\*\*\*\*

### **CASE NAME: ARISTIDE**

*TJC/ L/0054/VF/ARISTIDE DÉSIÉ*

The applicant Désiré Aristide writes that his father is dead and that his family is at present living at Grand Sable, Grand Port and Mahébourg. He would like to enquire whether the Aristide family is the owner of a plot of land, though the location is unknown to him.

From searches carried out by the Commission at the Registrar General's Office, it appears that Louis Roland Aristide, the father Louis Désiré Jean Francois Aristide, owned a plot of land at Sainte Croix of the extent of 258 m<sup>2</sup> as per TV 3355 No. 48 dated 23<sup>rd</sup> April 1996. He sold an extent of 75m<sup>2</sup> along 52, New Sainte Marie, as evidenced by TV 3827 No. 72 dated 13<sup>th</sup> March 1998.

However, the "solde" of the 258m<sup>2</sup> is burdened with an inscription (fixed charge) to the tune of Rs. 75,000 in favour of MCB Limited. Following the death of Louis Roland Aristide his succession has devolved to his heirs who are responsible for the above loan. The family does not own other plot of lands.

The Commission has called the applicant to advise him to pay back the Rs. 75,000 to MCB in order to recover the land after necessary arrangement.

\*\*\*\*\*

### **CASE NAME: NADAL**

*TJC/ L/VF/0055/COURONNE MARTHESIE*

#### **Case 1**

The applicant Marthésie Couronne writes that her family owned a plot of land of one acre at Trou d'Eau Douce. The land belonged to Charlotte Marianne who sold it to Zélie Eulalie Marianne, Célestin Quirin, and Alexis Quirin. According to "l'acte" of Attorney C.J Montocchio dated 19<sup>th</sup> April 1853 as per TV 54/203, the land was "distrain" (extract) from [the land] of Pierre Akyer. One Bissoondoyal prescribed the land in 1990, the family went to Court and the judgement was in their favor. However, Bissoondoyal refused to leave the land.

She requests the legal assistance of the Commission to get back the land.

**Case 2**

According to applicant, Marthésie Couronne, her family owned a plot of land at Cap Malheureux obtained through a “*concession Le Moël*” of an extent of 312 ½ *Arpents*. “*Concessions*” were granted to Pierre Le Moël Monséjour, Louise Nadal, his wife and their children. She requests the Commission to assist in research and in getting back the land.

**Case 3**

The applicant writes further that after the sharing of the land of extent of 27 perches at Royal Road Trou d’Eau Douce, executed by the heirs of Mr. Louis Elisy Nadal in 4 portions:

- 243.23 sq m to Franck Nadal
- 243.23 sq m to Andrine Nadal
- 243.23 sq m to Helena Nadal
- 297.16 sq m to Juliette Nadal,

her cousin Louis Augustin Roy, heir of Andrine Nadal voluntarily exchanged his land, of the same extent as those of the heirs Franck Nadal, leaving the land that he inherited to the heirs of Franck Nadal. Before applicant father’s death, he built a four-room-house on the land, which has been renovated. He lived in the house. In 1975, Louis Augustin Roy made a false “*acte de vente*” stipulating that the father has sold the land and the house.

The applicant, Marthésie Couronne, confirms and certifies that he has falsified the document by imitating applicant’s father signature. On the 9<sup>th</sup> July 2009, Marie Josée Achille (born Nadal) made a written statement confirming that she has never signed any document as stipulation by Louis Augustin Roy because she was in the UK at the period. She requests the Commission to investigate and to intervene legally in order to get back the land.

**Case 4**

Marthésie Couronne adds that family owned a plot of land of 21 *Arpents* at Camp de Masque Pavé. She ignores the exact location and whether it is occupied or not. She asks the Commission to assist in research.

**Case 5**

The applicant says that her grandmother was Marie Angèle Ang-Saye, she married Chin Paw in 1883. This latter bought a plot of land at Camp de Masque Pavé as evidenced by TV 214 No. 76. According to her, this latter was a real Estate broker. Chin Paw died, living Marie - Angele as his sole heir, as they had no child together. Marie-Angèle then remarried Kho-Sin, who died. No child was born either from this marriage. After his death, Marie-Angèle lived in cohabitation with Polixène Riche, they were not civilly married. From this relationship, five children were born:

- Arnold Riche, born on 31<sup>st</sup> August 1896;
- Angelders Riche. born on 11<sup>th</sup> October 1901;
- Louis Raymond Riche, born on 21<sup>st</sup> June 1904;
- Marie Simone Riche, born on 16<sup>th</sup> December 1906; and
- Marie Léa Riche, born on 9<sup>th</sup> December 1910.

According to the affidavit of affiliation, Marie Marthésie Nadal is the daughter of Marie Léa Riche. Marthésie Couronne, born Nadal, affirms that she had recourse to a Land surveyor, Ravindranath Bhurtun in order to know the exact extent of the land bequeathed to the heirs. With the agreement of the other heirs, they have decided to sell the land. Marthésie Couronne and her sisters report that a few days after having placed a sign to advertise the sale of the land, one Proag (*Applicant is not very sure of her name*) called her and said that she was the owner of that plot of land.

The applicant’s cousin, who lives not very far from the land, reported to them that the said Proag bulldozed the land and even destroyed an old shop found there. The applicants say that in the past the shop was hired by one Tion who went to Canada and finally died there.

Marthésie Couronne affirms that her cousin, Jacques Brunel Riche, recently died leaving six children who are his legal heirs. One of the heirs is a minor and they are waiting for an authorization from the Supreme Court of Mauritius in order to sell the land. Marthésie Couronne and her family even had recourse to the services of Solicitor Doorgacharun Luchmun to have the permission for "*Sale of Minor Rights*".

The applicant is one of the heirs of Félix Eulalie Marianne and Celestin Quirin who owned a portion of land of extent of 1 *Arpent* situate at Trou d'Eau Douce as per TV 54 No. 203 drawn in 1853.

The searches undertaken by the Commission in **Case 1** reveal that by affidavit of prescription dated the 19<sup>th</sup> April 1990, Jean Vivian Beau-Bois prescribed a portion of land of an extent of 770 m<sup>2</sup>.

It is the contention of the applicant that the land prescribed was owned by the succession of the afore-mentioned Félix Eulalie Marianne and Célestin Quirin and that the said Beau-Bois did not have all the requisites of prescription. On 3<sup>rd</sup> May 1991, the said Beau-Bois sold the land prescribed to his daughter and his son-in-law as evidenced by Volume 2158 No. 58.

On 31<sup>st</sup> March 2004, the applicant, with other heirs, caused an action to be entered before the Supreme Court praying the Court to declare the prescription and the subsequent sale to be null and void.

The applicant came to the Commission for a meeting on 11<sup>th</sup> April 2011 to state that the case before the Supreme Court had been withdrawn by plaintiffs while redeeming their rights to start new proceedings. The Commission advised the parties concerned to contact their legal advisers in order to proceed with the new case. The affidavit should be drawn up anew, if needs be.

\*\*\*\*\*

#### **CASE NAME: LASERINGUE**

*TJC/ L/0056/VF/LASERINGUE MICHELE*

Michèle Laseringue, the applicant, states that she is the wife of Harris Laseringue. After 10 years of married life, she left her husband and her home situated at Avenue Laseringue Palma, Quatre Bornes to live with her mother. She never divorced. At her husband's death, the house was sold to the son of her husband's concubine, Rolande, who said that the house was hers. The applicant does not have the deed of sale. She is married in community of goods. She wants assistance to know how to recover her rights on the property and house.

In a second case, she adds that her husband had 2 sons from her concubine. Steve Laseringue (deceased) had 2 daughters and Marvin Laseringue, unmarried.

Harris Laseringue owned a plot of land of 27.50 perches in Bambous, Black River transcribed in Volume TV 1569 No. 149, dated 3<sup>rd</sup> June 2004 and registered under TV 53 No. 1654, signed by Surveyor Ng Tong Ng Wah. This plot of land is leased out at present to several families from Rodrigues who have built a house. The applicant ignores to whom the rent is paid and wants the Commission to investigate.

From what the Commission has gathered, it has established that Harris Laseringue (born 20<sup>th</sup> October 1939) is married, "*sous le régime de la communauté légale des biens, to Jean Michèle Lalande on 21<sup>st</sup> April 1966*". Ten years later, in 1976, she left her husband and her house to live with her mother at Bambous near the District Court.

On the 15<sup>th</sup> April 1982, Harris Laseringue prescribed a plot of land of extent of 27 ½ perches at Bambous as per TV 1569 No. 149. In terms of a Judgement delivered by the Master and Registrar of the Supreme court dated 31<sup>st</sup> March 1997, transcribed in TV 3598 No. 54, Harris Laseringue and ors became the "*sole and lawful*" owners of extent of 20 ¼ perches at Palma and in terms of a Division in kind, H. Laseringue was allocated 2 plots of land of 148.31m<sup>2</sup> and 55.73 m<sup>2</sup> respectively.

As per TV 7347 No. 51 dated 6<sup>th</sup> May 2009, Harris Laseringue sold to Louis Marvyne Laseringue (son of H. Laseringue and his concubine Marie Rolande Louise) the two above mentioned plots of land “ensemble une maison en blocs de ciment sous dalles y existant, ainsi que les installations pour une prise d’eau et de la lumière” for the sum of Rs. 400,000. “Que Monsieur H. Laseringue reconnaît avoir reçu et touché de l’acquéreur, dès avant ces présentes et hors de la vue du notaire ».

H. Laseringue passed away on 12<sup>th</sup> May 2009.

Michele Laseringue has been advised to enter a Court case to contest the sale.

\*\*\*\*\*

### **CASE NAME: SALOMON**

#### **TJC/L0057/VF/ MUNOGEE MARIE-LINE ROSEMARY born LEGRAND**

This file deals with the properties of the heirs of late Bergicourt Salomon at Quatre-Cocos, wherein the applicant avers that she is co-owner and /or co-heirs of undivided rights in apportion of land of 2 *Arpents* situated in the District of Flacq, more precisely at a place called Quatre-Cocos. The land originally belonged to Bergicourt Salomon.

Marie-Line Rosemary Munogee, *born* Legrand, relates that his family possessed a plot of land of about 4/7 of 2 *Arpents*, that is, approximately 1 *Arpent* 15 perches situated at Quatre-Cocos, Flacq belonging to the heirs of late Bergicourt Salomon (husband of late Marie Juliana Catherine). During her life-time, Juliana Catherine has always said to her grandchildren that her late husband Bergicourt Salomon had left a property in Quatre-Cocos. Nobody trusted her as she was old. One of her grandchildren did some research at the Registrar General’s Office. She discovered that, indeed, her grandfather, Bergicourt Salomon had a property but that one Joseph Wilfrid Salomon and Eda Lionnet (wife of Robert Marie) had drawn a false affidavit of succession relating that they are the only heirs to apprehend the estate and succession of late Bergicourt Salomon.

All documents and evidences have been extracted during the years 1999 to 2000 to swear a counter-affidavit against the “*supercherie*”. Both “*usurpateurs*’ in their affidavit have left many contradictions such as the age of Bergicourt Salomon when he got married to one Lucie Goder. These events are contradictory when calculated with the date & birth certificate of Bergicourt Salomon.

The Commission has analysed the documents submitted.

As per an affidavit drawn after the death of Marie Juliana Catherine, it is said that she was married to Louis Bergicourt Salomon, also called Joseph Sergicourt Salomon. From that marriage, one child was born, namely Marie Micheline Pomponia Salomon on 2<sup>nd</sup> November 1930.

However, after analysis of other documents, it appears that one Joseph Wilfrid Salomon and one Eda Lionnet (wife of Robert Marie), pretending to be the only heirs to apprehend the estate and succession of late Bergicourt Salomon, have sworn in a false affidavit in order to grab the properties of late Bergicourt Salomon. For instance, Bergicourt Salomon is supposed to have married Lucie Goder. They had 2 children namely Joseph Salomon and Marie Luciana Salomon (mother of Eda Lionnet, wife of Robert Marie.)

According to a deed drawn up by Notary public E. Chaillet, dated 12<sup>th</sup> November 1952, and transcribed in Volume 579 No. 168, one Eda Lionnet, wife of Robert Marie, sold to Joseph Salomon all her rights in the portion of land of ½ *Arpent*.

Yet, in the title of ownership, it is stated that Bergicourt Salomon died on 7<sup>th</sup> May 1932 leaving as sole heirs and parties

- His son Joseph Salomon born from his marriage with Lucie Goder and
- His grandchild Eda Lionnet, wife of Robert Marie, coming by representation of her mother Marie Luciana Salomon.

According to an affidavit of succession submitted by applicant and sworn by two witnesses before the Supreme Court on 25<sup>th</sup> September 2000 - affidavit drawn up by Attorney at Law, Me T. Ponambalum - it appears that Louis Bergicourt Salomon died on 6<sup>th</sup> May 1928, leaving Marie Micheline Pomponia Salomon, wife of Louis Bertiusse Legrand.

- Louis Bergicourt Salomon was married to Marie Juliana Catherine;
- Louis Bertiusse Legrand & Marie Micheline Pomponia Salomon had eight children (one of whom is the applicant).

There are two affidavits of Bergicourt Salomon, also called Louis Bergicourt Salomon, which are very different, firstly because of the date of death 6<sup>th</sup> May 1932 and 7<sup>th</sup> May 1928; secondly, concerning the heirs and parties entitled to the succession as per the affidavits mentioned in deeds of sale.

The case of Marie Line Munogee is one of the typical cases of usurpation which the Commission has come across.

\*\*\*\*\*

**CASE NAME: ZEPHIR**

*TJC/ L/0058/VF/DUPRE GERARD*

Gérard Dupré, the applicant, avers that a plot of land has been given to Zéphir Olivier, his ancestor, at St. Hubert. The land belonged to Zéphir Olivier, the great grandfather of Gérard Dupré, then to his son, who, in turn left it to the grandson. The land is situated near the Cemetery of Grand Port.

He further avers that the family had another plot of land at St. Hubert. The Ramphul family is now occupying the land illegally (without permission). The family does not possess any contract. The applicant thinks that all documents are found at the Archives.

Gérard Dupré wants the assistance of the Commission in finding documents and situating the land; and finally, in getting the land back.

Unfortunately, in spite of a letter sent to applicant on 18<sup>th</sup> September 2010, he has failed to submit the required documents. As a result, the Truth and Justice Commission could not proceed further as no one could get, despite several attempts, to contact the said Gérard Dupré.

It appears that applicant is not interested with the case. The file is kept in abeyance.

\*\*\*\*\*

**CASE NAME: RENEL**

TJC/L/0059/VF/ RENEL LEONCE SERGE

The applicant, Serge Léonce Renel, writes that following the "*testament olographe*" made by his father, he has inherited a plot of land at Petit Bel Air. The plot of land is known as "*Terrain Elizabeth Rambuche*", which was the name of his grandmother. According to a survey made by Land surveyor Dumazel in 1986, the latter found out that the plot of land is situated at the corner of Chemin Ruisseaux-des-Délices. He has asked for a building permit for the construction of a building on his property. The Grand Port/Savanne District Council refused the permit because the property was outside permitted developed area. Grand Port/Savanne District Council advised him to appeal to the Secretary of the Town and Country Planning Board against the decision of the Council. He requested Land surveyor Dumazel to survey the land and insert the landmarks. He made a request to CWA, CEB for permits and made a plan of the house. A Solicitor advised him to make an "*affidavit de prescription*" to enforce his occupation of land. His cousin, Pierre Renel, objected to this prescription. The case was referred to the Supreme Court and judgement was in favour of applicant. Even then he cannot build or share the land between his children.

On 17<sup>th</sup> October 2008, a letter was sent to the Minister of Housing and Lands to plead his case. The Town and Country Planning Board maintained the decision of the Grand Port/Savanne District Council. Land surveyor, M. Beegun, also made a survey of his property to extract the portion belonging to his cousin.

He requests the assistance of the Commission to get a portion of land from the Government.

The Commission studied his case. There is a report by Land Surveyor Maurice Dumazel appointed by the parties in the case which was pending before Supreme Court. The parties have reached an agreement. The land of the extent of 1982.88 sq metres has been divided in two lots. The agreement which has been made by judgement of the Court has been transcribed in Volume 4204 No. 1. Since the site settlement is outside residential zones, it is understood that the Grand Port/Savanne District Council, the CEB and the CWA refused to grant the necessary permits to construct a house and supply water and electricity. The land is found to be outside the settlement boundary of the residential zone amidst sugar-cane plantations. This area cannot be developed for residential purposes.

As for the request to assist applicant to get another portion of land from the Government, this is outside the mandate of the Commission.

\*\*\*\*\*

**CASE NAME: CLEMENTINE**

TJC/L/ VF/0060/ CLEMENTINE MYRIAM

The applicant Myriam and her sister, Thérèse Clémentine, aver that their ancestors were the owners of several plots of land as follows:

1. 1 *Arpent* 50 perches opposite to the sugar factory of Réunion Sugar Estate at Vacoas;
2. 33 perches in the vicinity of Trou-aux-Cerfs;
3. 24 perches at Rivière-du-Rempart ;
4. Pamplemousses (applicants have no additional details); and
5. Glen Park (No additional detail is available).

No documentary evidence was submitted in support of these averments.

The plot of land opposite Réunion Sugar Estate at Vacoas is being used for the cultivation of sugar cane. Myriam Clémentine has paid one Rigobert of the Nelson Mandela Centre to do searches on

these lands, but, up to now he has not given any information back. The plots of land are under the name of Léontine Clémentine and they want to have their land back.

In spite of searches done by the Commission, there is no record of Léontine Clémentine in any "*Case hypothécaire*".

Further searches, made in the name of Jean Marcel Clémentine and his wife Marie Jeanne Appasamy revealed that they occupied a plot of land of extent of 31 perches at Vacoas on 28<sup>th</sup> April 1920 and another plot in Port-Louis on 19<sup>th</sup> September 1916 and sold them as per TV 1222 No. 233 and TV 435 No.127 respectively.

Therefore, the Commission is of the opinion that the land, as averred, has already been sold.

\*\*\*\*\*

**CASE NAME: LARHUBARBE**

*TJC/L/0061/VF/LAVICTOIRE SOLANGE*

The Lavictoire family avers that one Aristhène Larhubarbe owned a plot of land at Rivière-du-Rempart. The land is situated opposite Rivière-du-Rempart School and dispensary.

Furthermore, one Miss Larhubarbe who married one Lavictoire owned a plot of land at Tamarin. She has visited the land which was bare. After her marriage in 1971, people occupied illegally the land of an extent of 1 *Arpent* 5 perches.

The requests of the family are:

- The title deed;
- The site plan.

The report of Surveyor Buguth of the land under the name of Aristhène Larhubarbe. After review of the file and a perusal of the Report of Land Surveyor Buguth as recorded in MA 225, page 2, it has been observed that the file deals with only one case namely 1 *Arpent* 05 plot at Rivière-du-Rempart.

Following searches made at the Conservator of Mortgages Office, no "*Case hypothécaire*" in the name of Aristhène Larhubarbe was found.

As for the second request, there is no case in file for the Tamarin plot. The word "*terrain*" has been wrongly interpreted as being a plot of land at "*Tamarin*".

In the light of the above, there is no plot of land registered in the name of Aristhène Larhubarbe.

Solange Lavictoire has been informed accordingly.

\*\*\*\*\*

**CASE NAME: LAROSE**

TJC/ L/0062/VF/ LAROSE HYACINTHE

Hyacinthe Larose avers in a first claim that he is heir of Alfred Larose who owned a plot of land of Brigot Estate, Montagne des Trois Mamelles. The extent of the property is about 1 acre. The land is bare. Applicant would like to obtain a copy of the deed and other related documents.

In a second claim, the applicant says that the family owned a portion of land at La Louise, Quatre-Bornes from which 47 perches has been sold to one Ulysée Israel Rabot, husband of Augusta Larose, grandmother of applicant. The deed of the land has been drawn up by Raoul de Robillard on 16<sup>th</sup> October 1928, TV 392 No. 474. He wants to know if the land is still there.

In fact, the Commission obtained 3 copies of "*Case hypothécaire*" from the Conservator of Mortgages in the name of

- Raphael Larose (succession);
- Ulysée Israel Rabot (Augusta Larose);
- Rabot Ulysée ou Illis Rabaut.

The content was examined. The Commission sent a letter to Hyacinthe Larose at the given address, inviting him to come to the Commission; but the letter was unfortunately returned by the Post Office with the mention "*unknown*".

\*\*\*\*\*

**CASE NAME: SOOPAU**

TJC/ L/0063/VF/ SOOPAU MARIE ELISE

Marie Elise Soopaul, the applicant, lives on a plot of land of 29 ½ perches since 1963. In 1995, her neighbor, Louis Joseph Pyndiah, constructed a cattle-pen on her land. She contacted the Ministry of Environment but the officer threatened by Louis Pyndiah was forced to quit when he came for a "*constat*" of the situation'. She went to Court and following the judgement Louis Pyndiah had to destroy the shed. Afterwards he erected a fencing to replace the shed. The applicant contacted Magistrate Lalloo in Chambers'. The magistrate advised her to go to Court. She obtained legal aid, the services of Lawyer, Nazir Beekun and Attorney-at-Law, D. Ramgopalsing, were offered. This happened in 1996 and it was a civil case.

Judgement was proclaimed in 1998 by Magistrate of Bambous. The applicant won the case whereby she could occupy 25 perches. She had the land surveyed by Nazir Ahmed Khuram Beegun who advised her to ignore the 4 ½p which was closed by fencing.

The applicant came to the Commission after Christmas. She declared that on 24<sup>th</sup> December 2009, her neighbor, Louis Joseph Pyndiah, came in a lorry full of corrugated iron sheets and unloaded these on her plot of land. That same day Pyndiah started the construction of a house by erecting poles. On Christmas Day, the applicant's son removed all the poles. Joseph Pyndiah and his family were vexed and a quarrel broke out. The police had to intervene. On Saturday 26<sup>th</sup> and Sunday 27<sup>th</sup>

December, Pyndiah put up the construction poles once again and assembled the iron sheets of 6 and 11 feet approximately. Marie Elise Soopaul accuses Pyndiahs of having “vandalized” her property: they have broken their window panes and kitchen utensils; removed all their taps and have stolen a gas bottle and a wooden plank.

She made a request to the Commission to apply the judgement that has been ignored by the nephew of applicant.

The applicant came to the Commission again on Wednesday 3<sup>rd</sup> February 2010 to inform it that she has been summoned to Court on the next day, on 4<sup>th</sup> February.

The Commission has been made aware that the matter has already been dealt with by the Supreme Court.

\*\*\*\*\*

**CASE NAME: TUYAU**

*TJC/L/0064/VF/TUYAU FRANCIS*

Francis Tuyau, the applicant, writes that his grandfather and father had told him that the family owned several plots of land in Flacq and elsewhere, at Camp de Masque. He has no relevant document or title deeds. He wants to get the land back.

The Commission phoned the house of Francis Tuyau. A lady replied to say that she would come with the necessary document; but she never turned up.

The letter sent by the Commission has been returned by the Post Office.

In the absence of these papers, nothing could be done for the Tuyau family.

\*\*\*\*\*

**CASE NAME: MAISON ROUGE**

*TJC/ L/0065/VF/MAISON ROUGE RENEA*

Renéa Maison Rouge writes that, before dying, her husband told her that his father Léon Angilbert Maison Rouge owned a plot of land next to Ruisseau Créole in front of the Cemetery of La Preneuse, Black River. His mother, named Thérèse Edouard, being now deceased, cannot sustain any of the fact.

Renéa Maison Rouge relates that during a site visit on the said plot of land, she found a coconut plantation. She does not know who owns this plantation. She remembers one day that she accompanied her husband to Port-Louis where someone verified at the Registrar General’s Office and told them that the land was still registered in her husband’s family name. She has no documents with her. An “agent” has already proposed to her husband that, if he succeeded in the procedures to get back the family land, to promise, on paper, to give him a quarter of the portion,

According to searches undertaken by the Commission, the name of Leon Angilbert Maison Rouge does appear neither in the “Case Hypothécaire”, nor in the Registers of the Conservator of Mortgages.

\*\*\*\*\*

**CASE NAME: TYPHIS***TJC/L/OO66/VF/ TYPHIS GEORGIA & TYPHIS ELIAS*

Georgia and Elias Typhis put two claims before the Commission. In the first case, the applicants write that their great-grandfather, Ferdinand Antoine, was owner of a plot of land at Camp de Masque Pave. They have never visited the land and do not know where it is found. They want to get back the land.

In the second claim, they relate that their great-great-grandfather Jean Charles Typhis, owned a plot of land at Clarence, Black River. Jean Charles Typhis got married and had an only son named Avy Typhis. The latter died unmarried. The applicants' father, Louis René Typhis, inherited the share of Jean Charles Typhis. The family lived on the plot of land until the death of the father. They then moved to Bambous. The uncle of applicants' father, Charles Typhis, is still living at Clarence. The plot of land, which the Typhis are claiming, was adjoined that of Clarence Sugar Estate. According to applicants' mother, one Mac Grégor, Administrator of Clarence Sugar Estate, sent his messenger, Pan, to meet Charles Typhis in order to obtain Documents so as to verify if the Typhis were the real owners of the land. The documents were given to Pan, who disappeared with them.

Charles Typhis went to Court after the loss of the documents and was present each time the case was called. One day, on his way back from Court, Charles Typhis was hurt by a lorry of Clarence Sugar Estate. He died. After the death of Charles Typhis, Clarence Sugar Estate occupied the land. No access was given to applicants' mother and brother and himself to the land; the watchman of Clarence Sugar Estate threatened them.

At present, Médine Sugar Estate occupies the land, as this Company has bought all the land belonging to Clarence.

Even if no document was submitted by the applicants, the Commission undertook searches to reach a conclusion.

It appears that Jean Charles Typhis prescribed a plot of land of 3 *Arpents* 38 in terms of TV 476 No. 191 and on the same day disposed of 2 *Arpents* in two lots of 1 *Arpent* each to one Beesah, as per "*Répertoire*" 331 no 568. A perusal of the TV indicates that the said deed has been cancelled following a judgement of the District Court. The Commission has called at the District Council of Bambous to obtain a copy of the judgement. It has not been possible to get a copy of the said judgement even from the District Court of Black River. It appears that the prescription and the two sales have been declared null and void by the Court.

As regard to the claim of a plot of land at Camp de Masque, searches have revealed that Ferdinand Antoine had no plot of land at Camp de Masque but at La Louise in the District of Plaines-Wilhelm's, as evidenced by "*Répertoire*" 396/583.

The applicants have been made aware of this discovery.

\*\*\*\*\*

**CASE NAME: MADHOO**

*TJC/ L/0067/VF/ MADHOO MARIE THERESE*

Marie Thérèse Madhoo, the applicant writes that she lived at Cossigny Road, Quatre-Bornes. When her house was destroyed during a cyclone, she left the place and lived in a “*dépendance*” on the premises of one Gilbert Mazéry for whom she worked as maid. As Mazéry was the Chairman of the Municipal Council of Quatre-Bornes, the applicant’s mother made a request to obtain a Municipal house. The application was rejected.

Gilbert Mazéry acquired a house at 27, avenue Concorde, Cité Kennedy, on land leased out from Central Housing Authority. He allowed the Madhoo family to stay there and they did so for more than 32 years. When Mazery died, he gave in his will this house to the Madhoo family. A document “*A 465 No. 639, Year 1968*” was submitted in support of this claim. Several attempts were made to regularize the situation of the Madhoo family at CHA. But the officer of CHA, one Cassam stated that the Madhoo is not the owner of the house, in spite of the deed.

The Madhoo has been summoned to leave the said property following a letter sent to her by one Antoine Duquesne.

However, the situation changed completely when on 13<sup>th</sup> September 2010, Marie Thérèse Madhoo informed the Commission that her problem has been settled in Court and that now she is occupying the CHA house at 27, Avenue Concorde, Residence Kennedy, Quatre-Bornes.

The case has been settled between the parties.

\*\*\*\*\*

**CASE NAME: REYNOLD**

*TJC/ L/0068/VF/VICTOR MARIETTE JOY born REYNOLD*

Mariette Joy Victor, the applicant, writes that her grandfather was the owner of a plot of ground at Chamarel, Black River. She does not have any document of the property. Her mother has always said that her grandfather, Jean Thomy Reynolds, possessed a plot of land at Chamarel. The applicant has sold the land without the consent of her mother.

The applicant does not have any title deed nor any other document of land which belonged to the ancestors.

Searches undertaken by the Commission revealed that neither Jean Thomy Reynolds nor Jean Thomy Reynolds’s name appeared in the Register/ “*Répertoire*” at the Registrar General’s Office or at the Office of the Conservator of Mortgages.

\*\*\*\*\*

**CASE NAME: L’INTRÉPIDE**

*TJC/ L/0069/ VF/ L’INTREPIDE PATRICK (Mr. & Mrs.)*

Both applicants Patrick L’Intrépide and his wife declare that the grandfather, Rasidore L’Intrépide was born on 25<sup>th</sup> January 1871 at Bel Air. According to applicant’s mother, Ernestine L’Intrépide, the grandfather Rasidore always spoke about a plot of land which he possessed at Mahébourg, next

to the Church. Rasidore L’Intrépide left Mauritius to settle in Madagascar. This was before the applicant’s mother’s marriage. No one took care of the land as applicant’s mother was illiterate. Applicant has no document concerning the land but wants to recover the land back.

The applicants have neither a title deed nor any other document concerning the land.

In any case, they would have been blocked by prescription. It would have been interesting to know the circumstances from oral history why no one can take care of the land. Illiteracy as such is not a reason.

The Commission undertook searches on the claim, but unfortunately, the name of Rasidore L’Intrépide does not appear in the Register of the Conservator of Mortgages.

\*\*\*\*\*

**CASE NAME: JEROME**

*TJC/ L/0070/ JEROME JEAN ALBERT*

The applicant, Jean Albert Jérôme, writes that he has a plot of land lying at Camp Roches, Henrietta - between the curves of Rivière Papayes and Rivière-du-Rempart of an extent of 325 *Arpents*. This land constitutes the concession of André Marie, which has passed on to Denis Levasseur who is his great grandfather. The applicant’s great grandmother was named Clivia Perrine, also called Cécile.

He requests the Commission to assist him in his searches and to get back the land of his ancestors.

He submitted copy of an “*Affidavit de Succession*” dated 24<sup>th</sup> August 2007 as well as copy of an “*Injunction*” for a Court case. Jean Albert Jérôme also writes that he has paid to one Rigobert of the Nelson Mandela Centre, the sum of Rs. 40, 000 and has received from him neither document nor additional information.

In his application, Jean Albert Jérôme speaks of 325 *Arpents* at Camp Roches. Yet, in another document dated 7<sup>th</sup> September 2010, left at the Commission, his claim refers to 112 *Arpents*. With reference to a Court case and addressed to the Supreme Court Judge the claim has come down to 40 *Arpents* at Camp Roches, Henrietta. This application, drawn up by the M. Conhyedoss, but signed by the S. Ramano, Attorney-at-Law, was solemnly affirmed before Supreme Court on 24<sup>th</sup> July 2007.

It is not clear what the extent of the land the applicant is claiming. In the application, 325 *Arpents* are mentioned. Mention of 112 *Arpents* is also made in a certificate and in the Court case the applicant is claiming 40 *Arpents* only.

The Supreme Court has not yet given any judgement in this case.

Furthermore, searches undertaken by the Commission also reveal that there is no land registered in the “*Case hypothécaire*” of Marie Jérôme.

\*\*\*\*\*

**CASE NAME: CHIFFONE**

*L/0071/VF/ POTIE MARIE HELDA (born Chiffonne)  
Case Potié husband of Mrs. Chiffone Marie Helda  
transferred to TJC/L/O165/VF.*

Marie Helda Potié, the applicant writes that she has a plot of land at Chemin Grenier, more precisely, on the left side of the Government school. It belongs to her father, Pierre Edouard Chiffone, who, in turn, inherited it from his father Pierre Dorsil Chiffone. The plot of land is now occupied by someone else (she does not know his name) but he seems arrogant. The case was referred to the Court and the Judge - from what the applicant says -inferred that her father could take possession of his land after his recovery when the judgement will be pronounced. Her father was not able to be in Court, being very ill.

The Commission carried out searches at the Mortgage Office, but, unfortunately, the names mentioned by the applicant do not appear in the records at the Registrar of Mortgages.

\*\*\*\*\*

**CASE NAME: POTIE**

*TJC/ L/0072/VF/LABONTE MARIE CATHERINE  
CROSS REFERENCE (case 1): POTIE JOSEPH OSCAR TJC/L/VF 165*

Marie Catherine Labonté, the applicant, writes that she has information about a plot of land belonging to her grandfather at Flic-en-Flac, but she does not know the location of the land.

She also adds that her family has another plot of land at Chamarel. She does neither know either the location of the land, or any document to support her claim.

In spite of searches at the Conservator of Mortgages, the names of applicant’s grandparents or ancestors do not appear in any official register.

\*\*\*\*\*

**CASE NAME: ANSELINE**

*TJC/ L/0074/VF/ANSELINE MARIE GRETA*

Marie Greta Anseline, the applicant, states that her grandmother Marie Makie Millien, who married Léonce D’Argenteuil Guimbeau had a plot of land of 9 *Arpents* 45 at Union Vale and wished to know what became of that plot of land, more so as the land is occupied by Mon Desert-Mon Trésor Ltd.

She further states that Léonce D’Argenteuil Guimbeau was also the owner of a plot of land at Rivière-des-Anguilles of an extent of 16 *Arpents* and 12 perches as per TV 318 No. 95, (“*Acte de Me Durand Deslongrais*”, dated 5<sup>th</sup> May 1899) & TV 86 No. 185 and that Joséphine Guimbeau was the owner of 3 plots of land of an extent of 1061 toises (1/4 *Arpent*) at Roche-Bois from whom the Anseline family has inherited.

Searches have shown that the plot of land of initially 9 *Arpents* 45 perches at Union Vale belonged to the applicant’s grandmother Marie Makie Millien - who married Léonce d’Argenteuil Guimbeau - as evidenced by TV 199 No. 446.

Marie Makie Millien passed away on 27<sup>th</sup> June 1878, leaving as sole heirs to inherit her estate and succession her 3 children namely: Marie Joséphine Lucienne, Marie Marthe Gabrielle, Charles Auguste and her husband Léonce D’Argenteuil Guimbeau.

In virtue of a deed transcribed in Volume 351 No. 358, dated 3<sup>rd</sup> November 1921, the heirs of Marie Makie Millien sold the plot of land of extent of 2 *Arpents* 47 to Anicet Ythier. This is confirmed by the report of Land surveyors Maurice Dumazel and Jean Jacques Desmarais.

According to “*Répertoire*” 215 No. 109 Marie Joséphine Lucienne Guimbeau, following a division in kind effected by late S.W.G.Gebert on 14<sup>th</sup> November 1898, transcribed in Volume 9199 No. 446, Marie Makie Millien was attributed a plot of land of extent of 2 *Arpents* 47 at Union Vale in the district of Grand Port.

As regards to the plot of land at Rivière-des-Anguilles and Roche Bois, these have been sold out.

In the light of the above, there is no case for the heirs of Marie Makie Millien.

\*\*\*\*\*

**CASE NAME: FANTAISIE**

*TJC/ L/0075/VF/FANTAISIE BRUNO*

The applicant, Bruno Fantaisie, says that his family had a plot of land at Camp Créole Albion which they lost. The land belonged to his grandfather Fantaisie. No other name was given as the applicant does not know his surname. Yet, he knows that His father, Noël Joseph Fantaisie has “*demi-frères*” (step brothers) and “*demi-soeurs*” (step sisters) named Siméon, are scattered all over the island. He recalls that when his father was young, he used to pick mangoes on his land.

Bruno Fantaisie requested the assistance of the Commission to undergo searches regarding the land and to get back the land.

Even if the claim is very vague - as he has produced no document, no survey plan, and no title deed to enable the Commission to make searches - we did find that the claimant grandfather’s name was Jean Eugène Fantaisie. Unfortunately, his grandfather’s name does not appear in the “*Répertoire*” or “*Case Hypothécaire*”; nor does the name exist at the Registrar General or on the Name Index.

\*\*\*\*\*

**CASE NAME: MATOMBÉ**

*TJC/ L/0076/VF/ MATOMBÉ JEAN RICHNEY*

Jean Richney Matombé writes that he very often accompanied his grandmother, Clarisse Matombé, his grandfather, Elvis Matombé, and his father, Louis Guy Matombé, to a plot of land belonging to them at Bois des Amourettes, mostly known as Montagne Lion to cut “*vacoas*” leaves. His aunt, Rose Matombé, daughter of the brother of his grandfather, Eloi Matombé, owned a part “*indivisé*” of this land. Without the family knowing it, Marie Rose Matombé leased out the land to her cousin, one Henri Bourbon, for the sum of Rs 10,000 per year; he is cultivating sugarcane. The family of applicant was not aware of this transaction because after her father’s death, they were not on speaking terms with the lady.

Philogène Matombé was the first owner was the land estimated to cover an extent of some 30-35 *Arpents*.

Neither title deed nor survey plan has been submitted.

The applicant wants the Commission to assist the family to retrace documents which could allow the heirs to sell land to Ferney Estate. Furthermore, the family asks for restitution and reparation.

Preliminary searches, carried out at the Registrar General's Office revealed that the names of Elie Matombé, Clarisse Matombé, Louis Guy Matombé, Gustave Bourbon and Henri Bourbon do not appear in the Name Index.

But further analysis of the "*Case Hypothécaire*" of Philogène Matombé and Jean Elie Matombé reveals that Jean Philogène Matombé is the owner of a plot of land of extent 1 *Arpent* 25 at Grand Port for having acquired it from R. Runjeet on 25<sup>th</sup> September 1900 in TV 240 No. 164 (*vide Répertoire 181 No. 816*) and Jean Elie Matombé sold his undivided rights in the succession of Pierre Paul Matombé on 29<sup>th</sup> June 1925 and undivided rights 1 *Arpent* at Grand Port, Saint Aubin (Bel Air) to the Beau Vallon Company on 1<sup>st</sup> April 1941.

\*\*\*\*\*

**CASE NAME: RIMA**

*TJC/ L/0077/VF/ RIMA JULIETTE*

The applicant, Juliette Rima, writes that her mother has always told her that her grandfather owned a plot of land at Mont Blanc, Chamouny. She has no additional information regarding the exact location and the extent of the land. She does not even know the name and surname of her grandfather nor that of her grandmother. She is not sure if it is Anseline or Louise. She wants to find the portion of land.

A most difficult case: No searches could be carried out as applicant does not know, and has not given then names of her grandfather and grandmother.

No land data is given to enable the Commission to do searches and put up a property report. What is given is only hearsay information.

\*\*\*\*\*

**CASE NAME: GUKHOOL**

*TJC/ L/0079/VF/GUKHOOL JACQUELINE*

The applicant, Jacqueline Gukhool, writes that her father Raghobeer Gukhool was the owner of property situated at Duo Cité Kennedy, Quatre-Bornes. It appears that he sold the land to his son and applicant's brother, Benjamin Gukhool. The latter is no more. She has been told that she has neither shared right nor any pretension to the said property. The sale had been done in favour of her brother at date 22<sup>nd</sup> June 1984, as evidenced by TV 1322 No. 110. As heir of her father, she says that she has not been aware of the sale.

With reference to Marc Benjamin and Raghobeer Gukhool in "*Répertoire*" 550/1 and "*Répertoire*" 578/693, respectively, Raghobeer Gukhool was the tenant of a CHA house at D40, avenue La Confiance, Cité Kennedy. He passed away on the 19<sup>th</sup> February 1991 at the age of 84 years. Years earlier, on 4<sup>th</sup> February 1974, he sold the house standing on the plot of land of extent of about 5P to his eldest son Benjamin Gukhool. Benjamin Gukhool has passed away.

Her sister, Jacqueline Gukhool, wants to contest the above sale, although she is presently residing at the same address.

The land in question is State land under the control of CHA.

For the Commission, it appears that it is difficult for Jacqueline Gukhool- who is now 71 years old- to ask for cancellation of the sale as Benjamin Gukhool has passed away, and as she is residing there.

The "*Répertoire*" makes it clear that Benjamin Gukhool purchased a house on a portion of land of 5 perches at Candos as per TV 1242 No. 214 dated 04<sup>th</sup> February 1974.

If ever Jacqueline Gukhool still wants to contest the sale, she has to enter a case before the competent Court, although it seems, as stated above, that it will be difficult to ask for cancellation of the sale which dates back to 1974.

\*\*\*\*\*

**CASE NAME: DEFOIX**

*TJC/ L/0081/VF/DEFOIX SIMON CLAUDE*  
*Cross Reference: DEFOIX PATRICK RICHARD TJC/L/0167*

The applicant, Simon Claude Defoix, declares he recalls that in the 1940s, when he was still young, his cousin, Mark Defoix, told him that there was a land for sale. The latter applied to Notary Dassyne to do the necessary for him to get the land. The applicant says that he has no document, except the extract of a birth certificate in the name of Simon Claude Defoix, son of Joseph Defoix, concerning the said property. He wants the Commission to investigate the land.

Searches carried out by the Commission at the Mortgage office revealed that the name of Mark Defoix or Mark Defoie, Mark Defoi or Simon Defoix, does not appear in the Name Index Book.

\*\*\*\*\*

**CASE NAME: CAETAN**

*TJC/ L/VF/0093/ CAETAN MARIE MADELEINE*

No case and no request were submitted.

Marie Madeleine Caëtan is a tenant of a NHDC house at Village Anouska, 16<sup>ème</sup> Mille. As she owed a big sum of money (Rs. 31,250) as at 31<sup>st</sup> August 2008, she received a letter as a last reminder to settle the arrears.

The Commission redirected her to a specific person at the NHDC responsible for hardship cases to try to help Madeleine Caëtan.

\*\*\*\*\*

**CASE NAME: MARGUERITE**

*TJC/L/VF/0082 MARGUERITE OLYMPE*

The applicant, Olympe Marguerite, writes that she has an access problem with her neighbours, Jean Claude Luchoomanen and Cyril A. Marianne, who have encroached on a road of 3.05m being used as

access for the back portion where she is one of the owners. The said road now cannot be used by vehicles. The applicant wants the authorities to reopen the road as appropriate.

Furthermore, she adds that according to her information, she has a right or a share in a portion of land of about 788 *Arpents* in the District of Savanne, more precisely at Ligne Bassin, Ruisseau Citron. However, there has been an exchange of land between the Colonial Government and one Adolphe Gébert, which brings the family inheritance to Mahébourg instead of Savanne. The minors Gébert and Masson Abraham were the heirs of that plot at Mahébourg. The deed witnessing the transaction was transcribed in Volume TV 55 No. 34 on 3<sup>rd</sup> September 1853. The applicant's father, Jules Marguerite, has been raised by Jules Masson who had two sisters. Before his death, Jules Masson made a will (*testament olographe*) for his two sisters, thus leaving the "*jouissance*" and the "*nue propriété*" or "*usufruit*" for Jules Marguerite.

The history of the Masson family is as follows: Abraham Masson or Masson Abraham is one of the owners of the land of 788 *Arpents*. His son, Jules Masson, and his two daughters are the heirs entitled to apprehend the estate and succession of their father, Abraham Masson. Jules Masson was married but 35 years later, his wife died. No child was born from the said marriage.

One of the two sisters got married and had one daughter.

The married sister of Jules Masson was known under the name of "*Mazelle Fillette*". She was married to one Oscar L'Oiseau. The said marriage was done under the system of separation of goods and property.

Before her death, in 1941 at six o'clock in the afternoon, she wrote her will ("*succession*") before two witnesses. The said "*testament olographe*" was made in favour of applicant's father, Jules Marguerite.

The family requests the Commission to investigate in this case.

As for *Case 1*, the Commission cannot entertain this case as it concerns encroachment on a right of way by neighbours. She has to contact her Land surveyor in order to ascertain her right to use the right of access to her land. After that, she may take any appropriate action.

In *Case 2*, the applicant was requested to call at the Commission for a working session. She has not turned up. There are a lot of Court Status Acts and other documents incomplete formerly there and title deeds. Most of them relate to the Division in kind of a portion of land of 600 toises. This plot of land had been subject to a division in kind before the Master's Court, Supreme Court.

In so far as the land of 788 *Arpents* is concerned, it appears that it belonged to

- Adolphe Gébert;
- Minors Gébert; and
- Masson Abraham.

The proportion of the share is not known. The land is described as "*Crown forest*".

According to a will and testament, Jules Masson, son of Abraham Masson bequeathed the "*usufruit*" to Jules Marguerite. The "*usufruit*" became extinct following his death. His heirs cannot have any claim to the properties of Jules Masson or Abraham Masson.

According to her authentic will and testament dated 26<sup>th</sup> April 1941, Marie Eudoxie Masson, widow of Oscar L'Oiseau and daughter of Abraham Masson, bequeathed all her properties to Jules Marguerite. According to Notary Louis Marguerite Lazare, the share of Widow Oscar L'Oiseau in the property amounts to 1/9. The question remains obscure as to the share of Abraham Masson in the land of 788 acres.

There is no indication as to what has happened to the land of 788 acres. Whether it has been divided and who is occupying the land today.

After scrutinizing the deed of exchange dated 3<sup>rd</sup> September 1853, Mr. Adolphe Gébert and Abraham Masson have, in their own names, and on behalf of minors Gébert, exchanged a plot of land of about 16 perches at De Créoles Street, Mahébourg, for 788 acres of “*Crown forest*”.

The portion of land of 788 *Arpents* described as “*Crown forest*” could very well be State land on lease. The lease, having expired, the Government must have taken back the land. The applicant cannot have any claim on the “*Crown forest*” which is State Land.

\*\*\*\*\*

**CASE NAME: NETA**

*TJC/ L/0083/VF/ HEERAH YVONETTE (born NETA)*

Yvonne Heerah, the applicant writes that her father, Joseph Antoine Neta, bought a plot of land at Saint Louis Avenue, Plaisance in front of Rose- Hill garage for the sum of Rs. 300 per toise. The applicant was 14/15 years old at that time. At his father's death she was 23 years old. On her grandmother's advice, her mother took “*une hypothèque*” (mortgage) of Rs. 1,200 on the land and the small corrugated-iron house which her father had built on the land and in which the whole family was living. After some time, her mother managed to improve the little abode, turning it into a little concrete house. Meanwhile, applicant got married (16<sup>th</sup> September 1959) and was staying at Beau- Bassin. Unfortunately, Yvonne Heerah's mother was unable to pay back the sum borrowed. The concrete house and the land were sold by levy. The applicant's husband and sister tried to stop the “*Sale by levy*” but the property had already been bought by the Narain family.

Yvonne Heerah requests the Commission to verify if this sale has been done according to rules and regulations.

Searches undertaken by the Commission revealed that, according to the “*Case Hypothécaire*” 441 no 257, and transcribed into a notarial deed dated 13<sup>th</sup> January 1960, as per TV 804 No. 14, Joseph Antoine Neta did buy a plot of land at Plaisance, Rose-Hill, of the extent of 89 toises from R. De Chazal for the price of Rs. 267 at Rs. 3 per toise. Unfortunately, the land was burdened with many charges in favour of E. Audibert and Franchette.

As per Volume 5102 No. 78, the property was seized on 27<sup>th</sup> April 1970 and adjudged to E. Audibert.

Three months later, the house was sold to N. Seebaluck for the price of Rs. 5,000 as evidenced by TV 1136 No. 13 dated 29<sup>th</sup> August 1970.

The applicant has not stated who are the heirs and successors of the late Joseph Antoine Neta. She has not stated whether her father or mother or the heirs had taken the loan which was guaranteed by the mortgage.

It appears that applicant, her husband as well as her sister were fully aware of the seizure and the “*Sale by levy*” as they tried to stop the sale. As the amount due has not been paid, the property was sold before the Master's Bar of Supreme Court.

The applicant has been informed that the sale has been done according to regulations.

\*\*\*\*\*

**CASE NAME: MARISSON**

*TJC/ L/0085/VF/MARISSON ANNE MARIE LOUISE  
Cross reference with TJC/L/0017 HOSENY BERNARD & ORS.*

No summary. No application.

A few documents only have been submitted but no title deed or site and location plan.

There is however a request in the file from her Barrister-at-Law not to go ahead with this case.

\*\*\*\*\*

**CASE NAME: COLFIR**

*TJC/ L/0086/VF/PIERRE CLAUDIO*

Claudio Pierre submitted two cases to the Commission. In the first case, he writes that his grandfather on his mother's side is Léonce Colfir, the owner of a plot of land at Rivière Noire ex. Camp La Colle. After queries; he has noticed that Government has erected an NHDC housing estate over this plot of land. The company has acquired the said land from Didier Maingard de la Ville-ès-Offrans since three years.

One of his neighbours has told him that the NHDC Company wanted to give ½ of the land as negotiation. Unfortunately nothing has been done [as such]. NHDC have now been erected. Applicant has no deed nor any other Document concerning the said property.

As for the second claim, Claudio Pierre writes that his father, Louis Pierre, residing on, and proprietor of, the said premise at B5 Cité CHA, Tamarin is suffering from the encroachment of his neighbours namely one André Henry. The claim by applicant's father is situated at the rear of his residence at Pêcheur Avenue, Cité CHA Tamarin, No. B5. He writes that about ½ of their property has been encroached with the land of André Henry or others.

In both cases, the applicant requests the Commission to assist him: (i) in getting back a portion of land of an extent of 3 Arpents situate at Camp La Colle, Rivière Noire which he claims is occupied by NHDC and, (ii) he wants to know from Ministry of Housing and Lands who is the real owner; to stop the construction of André Henry.

From searches carried out by the Commission, it can confirm that:

- In virtue of a Notarial deed dated 2<sup>nd</sup> August 2004 transcribed in Volume 5586 No. 16, the Government of Mauritius acquired from Amédée René Philips Didier Maingard de la Ville-ès-offrans a plot of land of the extent of 8860.34m<sup>2</sup> (2A09.92p) excised from an original extent of 588A36.

The vendor is the owner of the 588A36 plot for having obtained it through a Division in kind depending on the succession of his father, Amédée Maingard de la Ville-es-offrans, as evidenced by title deed 1712 No. 138.

The NHDC Housing Estate has been constructed over the 8860.34 m<sup>2</sup> plot of land.

- The memorandum of survey drawn up by Land surveyor, M. F. Ricardo Ramiah, dated 18<sup>th</sup> February 2003 registered in L.S 47 No. 3025 in relation to the above mentioned plot of land gives the names of all adjoining owners together with their respective title deeds.
- The name of Léonce Colfir does not appear in the Répertoire or "*Case Hypothécaire*" at the Registrar General's Office nor does it appear as an adjoining owner in the memorandum of survey of surveyor Ricardo Ramiah.

In the light of the above, the claim of Claudio Pierre could not be entertained by the Commission.

**CASE NAME: TOUSSAINT***TJC/ L/0087/VF/ HIPOLITE TOUSSAINT*

Hippolite Toussaint writes that he lives at Case Noyale, Cité CHA. Since 1919, his father Gabriel Hippolite has been employed by one Eugène De Ravel in Rivière Noire. He lived in a “*dépendance*” (annexed house). De Ravel transferred the family to another house near Les Salines. He promised to give them a housing contract (*kontralacaze*) but he has never done so. His three sons are aware of this promise. The applicant’s father is now deceased and he was living with him. He would like to have this housing contract

Moreover, applicant writes that he owned a plot of land in Médine Brigo, Beau Songes which belongs to his great grandmother Claudine Sirope, under whose name the contract has been made. Médine S.E. has asked him to survey the land of an extent of more than one acre. The applicant has no money to do the surveying. He would like to transfer the contract on his name.

After analysis of the whole case, the Commission noted that the only document submitted is the copy of a title deed TV 45 No. 406 dated 5<sup>th</sup> May 1846 drawn up by Notary J.M.R. Giblot Ducray witnessing the sale of a plot of land of 1 *Arpent* in Plaines Wilhems, in the region of *Réserves* Trois Mamelles, from one Autard de Bragard to Ambroisie Rustica and Louis Sirope. That plot of land is excised from “*propriété Bourgaudet*”, Riche-en-Roches. The original extent of 42 *Arpents* formerly belonged to L. M. Benoni Labutte.

According to deed transcribed in TV 45 No. 406, Louis Sirope was co-owner along with Ambroisie Rustica of a portion of land of 1 *Arpent*. It appears that Médine Ltd. has no objection to the survey be carried out by a Land surveyor.

Hippolite Toussaint has to establish that he is an heir of Louis Sirope and proceed with the survey of the land.

\*\*\*\*\*

**CASE NAME: LAMARQUE***TJC/ L/VF / 0088/ VELIN MARIE STELLA SABRINA  
CROSS REFERENCE: LAMARQUE Louis Cherubin TJC/L/0048*

The applicant, Marie Stella Sabrina, writes that she was born Lamarque and is married to Jean Yves Désiré Velin. They have a three year-old son. She lives on a sugar estate (“*camp sucrier*”) and she is not the owner of the house she is living in. She knows that the Lamarque family, her ancestors lived in Coteau Raffin; her grandparents, Rose and Luc, lived at La Gaulette. Her uncle Karl Lamarque is her father’s brother. She is aware that he had started procedures to get back the family land. The applicant would like to know if she will obtain a plot of land in order to build a house for her.

She has no document, title deed or plan to submit.

In view of the fact that Marie Stella Sabrina Velin’s uncle, Karl Lamarque has entered a case against the “*Société du Morne Brabant*” and Tatorio for the same reason, this file has been linked to **TJC/L/0048**.

\*\*\*\*\*

**CASE NAME: SYLVIE/OLIVE**

TJC/ L/0089/VF/ EDOUARD ROSELINE

Roseline Edouard, the applicant, writes that her parents, Louis Antoine (father) and H  l  ne Sylvie (mother) Jance, had a plot of land of 40 *Arpents* on Mon D  sert-Mon Tr  sor Sugar Estate "*dans les ann  es 1600.*" Her mother had told her that this land belonged to the family for quite a long time and that she had tried to get it back since 1970/1980. They paid the service of a Barrister Me Guy Ollivry to find out how they could retrieve their inheritance. The Barrister even accompanied the family once to visit the land but the access was forbidden by a chain and a plate marked "*Acc  s Interdit*". All those who have started the procedures and searches, her parents and the heirs to Olive and Sylvie families are now dead. Her Barrister did not go any further in her case.

The applicant has not produced any document, title deed, plea, affidavit in relation to the claim of 40 *Arpents* of land.

Searches carried out at the Conservator of Mortgages Office have revealed that the names Louis Antoine Jance and Marie H  l  ne Sylvie Jance do not appear in the Name Index Register at the Registrar General's office

Furthermore, the "*Case hypoth  caire*" of one Antoine Jance reveals that the said Antoine Jance, who was the son of Gilbert Jance and Georgina Labtuna had a plot of land at Belv  d  re, Beau-Bassin of the extent of 25 perches as per TV 622 No. 45 and who sold it to P. Ramen on 4<sup>th</sup> November 1985 as evidenced by TV 671 No. 25.

**CASE NAME: RIOUX**

TJC/L/0090/VF/ABRUE VIVIANNE

Viviane Abrue writes that the family owned a plot of land belonging to her grandfather Nicolas Rioux at John Kennedy Street Grand Gaube, mostly known as Camp La Serpe (B  ti). The applicant lived there when she was a child. The family then moved to live on sugar estates in the period 1949/1950. According to information obtained, the land has been sold by the nephew without the other heirs' consent. The nephew's family name is Louise.

Searches carried out by the Commission at the Conservator of Mortgages Office reveal that Nicolas Rioux has sold the land.

Nicolas Rioux (married to Olive Pierre) sold along with 12 other members of the family, a plot of land of the extent of 3 *Arpents* at Grand-Gaube on 25<sup>th</sup> November 1953 as transcribed in TV 610 No. 192 to Widow L  ovince Louison, Dame Jos  phine Brune in consideration of a price of Rs. 1,000.

Furthermore, a copy of the "*Case hypoth  caire*" "*R  pertoire*" 397 No. 638 indicates that Nicolas Rioux sold undivided rights in that property to Jos  phine Brune.

It is further noted that the said plot of land formed part of succession Jos  phine Brune and Ad  laide Brune "*qui   taient ells- m  mes propri  taires pour l'avoir acquis de Monsieur Nicolas Rioux*" as evidenced by TV 36 No. 195 transcribed on 22<sup>nd</sup> May 1837.

A hand- written copy of the deed of sale is now in file.

The applicant has been informed accordingly.

\*\*\*\*\*

**CASE NAME: ELIZABETH**

TJC/L/0092/VF/ ELIZABETH LUC MARC

Luc Marc Elizabeth, the applicant, writes that he is one of the heirs of Elisa Elizabeth who owned a plot of land of an extent of 2 *Arpents* 84 perches at La Caverne, Vacoas. After several attempts to occupy the land they were forbidden to do so by neighbouring families. This happened in 2000. In August 2007, through a press notice in *Le Mauricien* newspaper, the family was informed that one, Seewoonarain Santchurn, and one, Arjoon Santchurn, had started procedures to prescribe the land. On the day when the surveying was scheduled the whole family went on the plot of land to prevent the surveying to be done by Land surveyor Ravin Tupsy, on behalf of the Santchurn family. The family Elizabeth waited until noon but the surveyor did not turn in. The family contacted two Land surveyors to do the surveying but they were forbidden to do so by the neighbours.

They request the help of the Commission in getting back the land.

The Commission undertook searches on the case. In fact, Elizabeth Elisa owned a plot of land of an extent of 2 *Arpents* 85 perches at La Caverne, Vacoas. According to "*Répertoire*" 22/351 T.V 41 No. 99 dated 28<sup>th</sup> May 1841, one Louis Martin sold to Elizabeth Elisa also called "*Governant*" a plot of land of 2 *Arpents* 85 at Plaines Wilhems for the price of \$ 47 as described in a Survey report drawn up by E. Ribet on 20<sup>th</sup> June 1840 in terms of a notarial deed transcribed in Volume 41 No. 99.

Luc Marie Elizabeth is one of the heirs of Elisa Elizabeth as revealed by the affidavit sworn in at the Supreme Court on 6<sup>th</sup> December 2005 and duly registered in Register A 685 No. 4165.

An analysis of "*Répertoire*" 22/351 in the name of Elizabeth Elisa reveals that the land purchased has not been disposed of, as well as another property of an extent of 7 *Arpents*.

On the basis of the document produced, the Commission advised that the heirs and succession of the late Elisa Elizabeth have a sustainable claim.

\*\*\*\*\*

**CASE NAME: PERTICOT**

*Cross References:* TJC/L/0084/ VF/ MARTIN Jean Claude  
TJC/L/VF/0141 PERTICOT Marie Florida;  
TJC/L/VF/0107PERTICOT Stella Lydie;  
TJC/L/VF/0080 LEONIDAS Désiré Jean Pierre;  
TJC/L/VF/ 0073 MERVILLE Marie Maïta Pamela

**Case 1**

Jean Claude Martin, the applicant, writes that his great-grandmother was Denise Perticot; his grandfather Louis Athalise Martin; his grandmother was Clémence Perticot.

Louis Théodore de Peticoz, born on 28<sup>th</sup> March 1748, owned a plot of land of extent of 78 *Arpents*, situated at Baie-aux-Tortues, Balaclava, which he acquired from one Gerrest in 1779.

Louis. Théodore de Peticoz died on 13<sup>th</sup> April 1807 without any child, according to information which applicant obtained in France. Marie Denise Perticot died on 23<sup>rd</sup> November 1878 at Pointe-aux-Piments.

Father of Denise Perticot was Louis Perticot, her mother Marie Virginie known as Françoise Virginie, born on 3<sup>rd</sup> June 1843 in Pamplemousses, according to Folio No. 122.

As Louis Théodore Perticot died without any child, his property goes to his brother, Louis de Perticot, father of Denise Perticot.

At present, the land is planted with sugarcane by Solitude Sugar Estate, belonging to Harel family.

#### **Case 2**

Désiré Jean Pierre Kervin Léonidas, the applicant, writes that he has a right on a portion of land at Royal Road, Pointe-aux-Piments. He has no deed in his possession. His mother, Miss Chavry (married to L. Médard) was born on the said property. He knew where the land was situated. The heirs are not willing to share the land legally and to give applicant his share. The applicant writes that he does not know the exact extent of the land. He received information from his cousin, Luc Chavry that he has found a plot of land under the name of his grandmother in Pointe-aux-Piments "*in the corner coming from Triolet*" getting into Pointe-aux-Piments. On the land he found a land mark bearing the initial of the Chavry family. The applicant writes that he has no family tree

#### **Case 3**

Marie Maïta Pamela Merville, the applicant, writes that her mother, Marie Marlène Clovis (born Antoinette), is the owner of a plot of land situated at Route Royale Pointe-aux-Piments.

The applicant's father, Louis Noë Clovis, is dead.

While surveying the land on 25<sup>th</sup> April 2005, the family's surveyor, Hasan Miyan was prevented from doing so on account of a dispute between the Martin family and the applicant's mother.

The land, of an extent of 22 *Arpents* has been subdivided among the heirs of Denise Perticot, widow (1<sup>st</sup> marriage) of Mr. Louis Perticot; she married a second time with Mr. Castor,

The case has been submitted to Supreme Court since 1999.

According to applicant, Judge Matadeen refuses to give a judgement.

#### **Case 4**

The applicant, Gladwyn Dany Laventure, says that his aunt, Marie Florida Perticot told her grandmother (Bérengine Pitchen) to come and live on her plot of land of 22 *Arpents*. The land belongs to Denise Perticot who had only one child, François Nélzir Perticot, who is an ancestor of Florida Perticot (Document 1). On a part of that portion of land, a Chinese built a shop and settled there. Without anyone knowing, one Hew Khee, made a prescription on part of the land.

Hew Khee and Ors. are now suing the two applicants together with Virgil Perticot (deceased). As Bérengine Pitchen only made a verbal agreement with the Perticot family, the Laventure family (descendant of Bérengine Pitchen) has no document relative to this agreement.

The applicant says that he has invested much of himself in this case, as his father is also among those being sued. They have spent more than Rs. 160,000 with surveyors, Lawyers and Attorneys and put a lot of time to build up a strong dossier which has been submitted and brought to Court.

Gladwyn Dany Laventure underlines that there have been many fraudulent issues on the land surveying and between the Lawyers of both parties so that the case is not brought to Court. However, the applicant persevered.

The case went to Court in November 2008 but no judgment has been pronounced up to now.

#### **Case 5**

The applicant, Stella Lydie Perticot, who says that she is the heiress of Virginie Perticot, writes that her family owned a portion of land of approximately 23 *Arpents* at Petite Pointe-aux-Piments which has been subdivided among the heirs of Marie Virginie Perticot or Perticoz or Virginie Perticault, wife of late Louis Perticot and wife in second marriage of Louis Castor. The land has been shared into eleven portions among the heirs of late Louis Perticot and minors of Louis Castor.

In 1973, when the applicant was still a child, she remembered that her parents were doing searches to retrace all documents and title deeds of the land of 22 *Arpents* on which the Perticot family was living.

Seven years back, people coming from elsewhere and unknown to the family started to construct on the land and squatted the land, thus causing prejudice to the Peticot family.

Another problem came when one Beedassy prescribed several portions of land neighbouring the portion of 2 *Arpents* which he has purchased from Françoise Peticot. The applicant declares that Beedassy has never occupied these plots of land.

The applicant considers that she is the sole owner and one of the heirs of the portion of 22 *Arpents*.

The Commission had several meetings and information sessions with members of the Peticot family and was able to put up three official hearings, either from Jean Claude Martin, their Land surveyor, A.S. Calloo and or Land surveyor, Bertrand Desvaux de Marigny of Harel Frères Limited to obtain more information on the matter.

Heirs Peticot claimed to be owners of a plot of land of approximate extent of 78 *Arpents* at Baie-Aux-Tortues, Balaclava, in the District of Pamplemousses, in virtue of title deeds volume 11 No. 177 and 16 No. 72.

Two attempts to survey the above mentioned plot of land were made by heirs Peticot, namely by Land surveyor Ng Tong Ng Wah on 11<sup>th</sup> March 2010 and Surveyor M.A.S Calloo on 20<sup>th</sup> August 2010. Following objection lodged by Me André Robert, Attorney for Harel Frères Limited, the two surveyors did not pursue further the survey operations.

In a letter addressed to Harel Frères Limited on 18<sup>th</sup> October 2010, the Registrar General confirmed that TV 11 No 177, purporting to be one of the title deeds of the Peticot did not exist as Volume No. 11 stops at page 167.

As regards the other title bearing TV 16 No. 72 drawn up by the then Notary, Me Guerin, on 26<sup>th</sup> September 1820 being a sale by Hyacinthe Jean Delourne to Arthur Comte de St Belin, there is no mention of heirs of Peticot in that title deed.

Moreover, Arthur Comte de St Belin sold the property of 78 *Arpents* to one Prospère Caiez D'Épinay as evidenced by Notarial deed drawn up by Me Yves Isidore Jollivet on 22<sup>nd</sup> December 1823 transcribed in Volume TV 20 No. 97.

Furthermore, in virtue of title deed drawn up by Notary Me Marie Joseph Bernard D'Hotman de Villiers and following a division in kind dated 28<sup>th</sup> March 1991 transcribed in Volume 2142 No. 69 Harel Frères was attributed the surplus of "*Domaine Solitude*" of an extent of 1052 *Arpents*.

From plan submitted by heirs Peticot, it appears that the location plan is part of portion No. 241 of extent of 61 *Arpents* 25 P, commonly known as "*Filaos*".

- In virtue of TV 1746 No. 124 dated 27<sup>th</sup> June 1986, Harel Frères Limited had made "*apport*" of the portion of 1052 *Arpents* in "*Société Agricole de Solitude*" being the fusion of Harel Frères Limited and Beau Plateau Limited;
- Following title deed in TV 826 No. 47 dated 14<sup>th</sup> September 1960, Harel Frères Limited acquired the surplus of the 1052 *Arpents* known under the name of "*Solitude*";
- Following deed in Volume 374 No. 252 (TJ 131 No. 52) Harel Frères acquired the Solitude Factory Co Ltd.;
- Following deed TV 337 No. 540 dated 19<sup>th</sup> November 1919 Solitude Factory Co Ltd acquired from Société "*Le Court Desvaux & Cie*" a portion of 1052 *Arpents* excised from a portion of 2389 *Arpents* 0.9p;
- Following a notarial deed drawn up by Me Paul Baissac in TV 306 No. 31 "*Société Le Court de Billot Frères*" was renewed in the name of "*Le Court & Cie*";
- Finally by another Notarial deed drawn up by Me Joseph Ariste Piat dated 30<sup>th</sup> March 1899 transcribed in Volume 233 No. 49, "*Le Court de Billot Frères*" acquired from "*The Crédit Foncier of Martin Limited*" a portion of 2389 *Arpents* 0.9p known under the name of "*Solitude*";

- It is to be noted that Government also acquired 3 plots of land on 15<sup>th</sup> September 1988 under TV 1874 No. 54 from “Société Agricole de Solitude” (now Harel Frères Limited) for the construction of the access road to Balaclava.

\*\*\*\*\*

**CASE NAME: AZIE**

*TJC/ L/0094/VF/AZIE OLIVA*

No case and no request submitted.

The fact is that Olivia Azie came to the Commission, a file was opened with a list of names submitted, which, it was believed, could constitute part of a dossier. In fact, she wanted only to state that the family lives at Anouska Village, XVI Mile, Forest-Side since 1999. The family is awaiting compensation as they claim to descendant of slaves.

\*\*\*\*\*

**CASE NAME: SANSPEUR**

*TJC/ L/0097/VF/SANSPEUR ÉLISÉ*

Elisé Sanspeur submitted several documents which are not related to any land reclamation. There is no request, no application.

She wanted only to be placed on the list in case of any compensation be paid to descendants of slaves.

\*\*\*\*\*

**CASE NAME: THERESE**

*TJC/ L/L/0102/ VF/THERESE SERGE*

The applicant, Serge Thérèse, writes that his family owned a plot of land at Route Nicolay, Balisage, Rivière Latanier. The land, as he underlines, has been prescribed by one Lam Po Tang. He requests the Commission to investigate and assist in the research to get back the deed of one Lavaud, presumed to be the first proprietor and retrieve the land.

The full name of applicant’s ancestor Lavaud has not been given. No title deed submitted. The alleged prescription has not been produced. There is no proper affidavit in support of the claim.

Searches carried out by the Commission at the Registrar General revealed that the name of Lavaud (Jean Baptiste) does not appear in the Name Index at the Registrar General’s Office.

\*\*\*\*\*

**CASE NAME: BRASSE**

TJC/L/0099/VF/BRASSE JEAN CLENCY

The applicant, Jean Clency Brasse, writes that he is one of the heirs of Jacques Brasse who owned a plot of land at Rivière-du-Rempart. According to the contract, Jacques was “*un homme de couleur libre*” and the land he owned is well-known as Roc en Roc.

Jean Clency Brasse writes that before his father’s death he has often been on the land with his father. They found several houses built illegally without any permit. On the plot of land, they found tombs of their great-grandparents on which were inscribed the names of the Brasse family.

Sylvio Michel and P. Gurbhoo, Secretary of the “*Association Justice, Restitution et Réparation*” gave a brief of the case as such: Jean Clency Brasse is one of the heirs of late Jacques Brasse, owner of a plot of land of about 4 *Arpents* 35 perches at Grand Gaube, Roc en Roc, Rivière-du-Rempart.

According to research, Louis Couacaud has prescribed a plot of land at Grand-Gaube, Roc en Roc, Rivière-du-Rempart around the years 1938. The land had no fixed plan drawn up before the prescription. The only document is an affidavit of prescription giving a summary of the supposed boundaries of the land, saying that it is bounded by 4 common roads and a fictive Hindu name as occupier on one side.

Around 1942, Land surveyor Aliphon tried to fit the land prescribed - of an extent of 3 *Arpents* 00 perches according to the deed- on a plot of land of 4 *Arpents* 33 perches belonging to the heirs of late Jacques Brasse. The land of late Jacques Brasses family has only 5 sides. In any way, there are too many contradictions in this case. After searches made, it appears that the land prescribed by Couacaud has been subsequently sold to several persons who are now victimizing the heirs of late Jacques Brasse although they are occupying the land subjected to the present dispute.

Late Jacques Brasse has a title deed being a “*concession*”. After research, it appears that some other plots of land prescribed or belonging to André Couacaud have a status of State Land as per annexed plan submitted. In other words, the “*concession*” has not been granted by the government for non-fulfillments of the requirements or conditions. Due to the lack of control of the British Government at those times many frauds have taken place to arrive to the deed of André Couacaud or Société Melville.

The “*Association Justice, Restitution et Réparation*” and Jean Clency Brasse request the Commission to investigate and to take into account information regarding the land.

The case was heard by the Commission on 5<sup>th</sup> September 2010.

At page 6 lines 184 of the transcript of the Hearing, it has been suggested that the Commission will summon Couacaud of Merville Ltd to give documents concerning the prescription of 3 *Arpents* of land. After admeasurements, the land has been found to be 4 *Arpents* 35. Out of the 4 *Arpents* 35, two plots have been sold and the remaining 2 *Arpents* 11 perches have been sold to Sew Subrun.

After searches and analysis of the matter referred, it is revealed that the land of 4 *Arpents* 35 perches is presently occupied by the three purchasers as per deeds drawn up by Notary Public namely:

- Chastry Chkogolall (2 *Arpents* 00);
- Jean Delastelle Brasse (0 *Arpent* 18); and
- Sew Subrun (2 *Arpents* 16)

No reference of any plot of land prescribed by Melville Ltée and Louis Couacaud in 1938 is made in the various “*Case hypothécaire*”. As per notarial deed TV 2538 No. 17 dated 29<sup>th</sup> April 1993 witnessing the sale by Melville Limited to Sew Subrun, reference is made therein of a sale by

Melville to Jean Delastelle Brasse of a plot of land of an extent of 0 A18 perches as per TV 459 No. 145.

It is not known under what circumstances Jean Delastelle Brasse, presumably an heir to Jacques Brasse, acquired the plot of land of an extent of 0 *Arpent* 18 perches from Melville Ltd.

In the event that Louis Couacaud prescribed 3 *Arpents* out of the 4 *Arpents* 45 perches, it is up to the heirs of Jacques Brasse to come up with a Survey Report with a view to recuperate the 0A45.

The heirs of Jacques Brasse have been advised to retain the services of a Land surveyor with a view to making an investigation Report and to going for the restitution of the land.

\*\*\*\*\*

**CASE NAME: LAURENT**

*TJC/L/0100/VF/LAURENT JEAN ROGER MORRIS*

The applicant, Jean Roger Morris, submitted that his great-grandparents had told his parents that they owned plots of land at Mahébourg and Grand Port. They did some searches at the National Archives and found that one Jean Suffren Laurent possessed two plots of land in Mahébourg and Rivière des Galets. The Truth and Justice Commission has been asked to undertake searches and to assist in view of retrieving the plots of land.

In support of his claim, Jean Roger Morris Laurent has produced 3 documents:

- Copy of a transcription of a grant of land dated 13th Mars 1760 to Jean- Laurent, *tailleur de pierres au service de la Compagnie demeurant à Port-Louis à l'enforcement de pierres de la Montagne No. 212 of extent of "15 Toises sur 30 Toises"* (LC5 folio 17).
- Copy of testament dated 28<sup>th</sup> March 1856 whereby Jean Suffren Laurent (widow of Jean Marie Bocus and remarried to Marie Argentine Bourquin) left to the latter a plot of land of the extent of ½ *Arpent* at Rivière-des-Créoles. In the testament, Jean Suffren Laurent is given as a "*propriétaire pêcheur domicilié à Mahebourg, Ville Noire.* »
- Copy of a transcription of a grant of land dated 6<sup>th</sup> September 1755 (LC 3 page 102) of extent of 312 *Arpents* at Flacq granted to Jean Laurent, "*tailleur de pierres, demeurant à Port-Louis*".

After searches undertaken by the Commission, it is observed that Jean Laurent and Jean Suffren Laurent are not one and same person.

A century separates the two Laurents.

\*\*\*\*\*

**CASE NAME: LISETTE**

*TJC/L/0101/VF/ LLOYD MARIE GISELE (born) LISETTE*

The applicant, Gisèle Marie Lloyd, *born* Lisette writes that according to a list of registered slaves named Lisette, one Julie Mercier was owner of several slaves named Lisette:

- Louis Lisette, 24 years, Malgache (16<sup>th</sup> October 1826)
- Hughes Lisette, 4 ¼ years, Créole de Maurice, (16<sup>th</sup> October 1826)
- Esther Lisette, 1 ½ years, Créole de Maurice, (16<sup>th</sup> October 1826)
- Jeanne Lisette, born 5<sup>th</sup> September 1822, Créole de Maurice, (16<sup>th</sup> October 1826)

- Firmin Lisette, 12<sup>th</sup> August 1821, (16<sup>th</sup> October 1826)  
The census was done in Flacq.

She further adds that the maiden name of her mother was Agathe Eulalie, while her father was called Edmé Lisette. She knows that her grandfather was Alfred Lisette and her grandmother's maiden name was Félicia Milazar.

She did not know if the Lisette family owned a plot of land until one Rigobert of the Nelson Mandela Centre for African Culture informed her that the Lisette family owned plots of land in Flacq, Pamplemousses, and Plaines Wilhems. She has given a sum of Rs.1,500 to the said Rigobert to undertake searches for her, but she never received any Document.

Marie Gisele Lloyd wants to recover any land belonging to the family.

Searches undertaken by the Commission revealed in the "*Case Hypothécaire*" of Alfred Lisette, there existed a plot of land of extent 95 perches which has been sold to Beau Séjour Sugar Estate at Pamplemousses on 19<sup>th</sup> February 1894 as evidenced by TV 209 No. 87.

There is no plot of land in the name of the other Lisette.

\*\*\*\*\*

**CASE NAME: LABONTE**

*TJC/ L/0103/VF/ LABONTÉ ANTOINETTE*

The applicant, Antoinette Labonté, writes that her mother, Emma Albertine Labonté, who passed away some 10 years ago, bought, since she got married, a plot of land at Eau Coulée, formerly known as Quatre Caros at present called Route Duquel. Her parents built a wooden house there, which, unfortunately, was destroyed by cyclone "*Carol*". Her mother contacted CHA for the construction of a concrete house. She has been paying a sum of Rs. 17.50 per month and the remaining sum was Rs. 400.

On the death of her mother, the land and the house were sold by to one Georges Couronet of Laperousse Road, Eau Coulée. The latter has urged applicant and his family to leave the place. Antoinette Labonté maintains that she does not understand how her family has lost both their land and their house. The applicant submits both her father's name as Auguste Arnold Labonté, born in St. Pierre, and her mother, Emma Albertine, born in St. Hubert, Mahébourg. She requests to carry out searches for her.

Searches undertaken by the Commission have revealed the following:

Arnold Labonté acquired in 1942 a plot of land of the extent of 0A50p at Eau Coulée from one Mallet.

Subsequently, he sold:

- 24 p to H.Halooman on 29<sup>th</sup> November 1950 (TV 833 No. 118)
- 10 p to Abdoolah on 17<sup>th</sup> November 1962 (TV 866 No. 88); and
- the "*solde*" of the land (about 16p) was seized by the CHA on 9<sup>th</sup> August 1993

The plot of land was purchased by G.Beauharrais on the same day, the 10<sup>th</sup> December 1993 as evidenced by TV 1240 No. 30.

\*\*\*\*\*

**CASE NAME: ADELE**

*TJC/ L/VF/0105/ ANODIN MARIE NOELLE (born ADELE)  
& ADELE JEAN BAPTISTE*

The applicants, in the name of the Anodin and Adele family, put two claims before the Commission to have ownership rights over 2 portion of land: 68 *Arpents* (Bigara Cemetery) and 9 *Arpents* (Allée Brillant).

**Case 1**

According to applicants, Marie Noëlle Anodin and Jean Baptiste Adèle, their family owns a plot of land of 68 *Arpents* at Bigara Cemetery. The proprietor of this land was Adèle Delmazie. There were tombs of Adèle's family on the land. Now planters are cultivating onions on the land.

**Case 2**

The applicants further aver that their family owns a plot of land of 9 *Arpents* at Allée Brillant which formerly belonged to one Amédée Baudau.

They want to get back the above plots of land.

In support of the claims, the applicants produced a deed under private signature (*sous seing privé*) dated 11<sup>th</sup> September 1880, wherein Pierre Françoise, "*fils naturel de Marie Françoise*" recognizes to have sold to Amedée Baudoo and Jean Baptiste Adèle, half undivided for each for the price of Rs. 160, a portion of land of extent of 9 *Arpents* to be excised from an extent of 27 *Arpents* "*que j'ai succédé de ma mère Françoise, qui avait fait l'acquisition de Mademoiselle Geneviève Chenier*" as per TV 138 No. 89.

No survey plan has been produced nor is there an indication how the 9 *Arpents* have been excised.

There is no other document produced to indicate how these rights have passed on to Noëlle Anodin.

However, at TV 142 No. 80, there is a sale from Amédée Baudoo to one Poynan Annapa half undivided in 9 *Arpents* and TV 215 No. 214 reveal that Noël Adèle having sold 2 *Arpents* undivided rights to one Jourmondif on 26<sup>th</sup> April 1895.

Furthermore, the title deed in respect of the 68 *Arpents* (*Cimetière Bigara*) has not been produced.

On two occasions the applicants came to the Commission to inquire about their file. They promised to hand over whatever document they have to assist in proving their case. They never made it.

In the absence of the title deed or any other relevant document concerning the land of 68 *Arpents*, the case cannot be considered. The applicants rely on a deed under private signatures concerning the claim of the land of 9 *Arpents* in which his ancestor had left undivided rights. No other documents have been submitted and the plan of distraction.

There is, however, an entry in the "*Case hypothécaire*" of Jean Baptiste Adèle concerning the land of 9 *Arpents*, no affidavit has been produce to establish that the applicants are entitled to a share in the land, nor does the Commission made aware about the actual occupier of the land.

\*\*\*\*\*

**CASE NAME: THELVA**

TJC/ L/0106/VF/ THELVA JUDEX SYLVIO

The applicant, Judex Sylvio Thelva, writes that his grandfather was the sole owner of a portion of land on an extent of approximately 112 toises at Rue Villeneuve, now Rue Maurice, and Mahébourg. In 1991, he came to be informed that one Idriss Aumerally has prescribed the said property. At this stage, I. Aumerally and his children are all deceased. The said prescription has not been done in conformity with the law. Applicant has access easily to the premises. Nobody is occupying the land on the side of I. Goomany.

Patricia Thelva, for her part, writes that her great-grandfather François Dauphine and wife owned a plot of land situated in Grand Port. No document has been submitted nor is there any indication of the location of the land.

Right on the outset, searches carried out at the Registrar General's revealed that the name of François Dauphine does not appear in the "*Répertoire*" index at the Registrar General's Office.

As for the first case, the only document submitted relates to a sale of 100 toises at Mahébourg, undivided rights, from Marie Yvette Courteau to Désiré Laval Thelva, on 11<sup>th</sup> June 1968, transcribed in TV 1074 No. 221.

From searches made by the Commission in "*Répertoire*" 504 case 203 reveals that Désiré Laval Thelva sold the undivided rights in the plot of land of extent 100 toises in portion of above to J.S. Thelva on 15<sup>th</sup> November 1978 as per TV 1426 No. 122.

However, there is no indication that the above plot of land having been prescribed by Idriss Aumerally. "*Répertoire*" 385 No. 501 does not reveal that information.

The Commission has been made aware by Judex Sylvio Thelva that he has retained the services of legal advisers to enter a case concerning the alleged prescription. The case, actually before the Supreme Court - a copy of which is in file - is scheduled to be heard in 2011.

The applicant has moreover been informed by the Commission that there is no document in support of the alleged prescription by Idriss Aumerally.

\*\*\*\*\*

**CASE NAME: CARVER**

TJC/ L//0108/CARVER RHODES

Rhodes Carver says that his grandfather, Elias Carver, owned a plot of land of 6 *Arpents* 50 perches at Roche Bois. The land has been sold by the same Elias Carver to Nichabay Ramchodji Nayak in 1939. But, the elder members of the family are also aware that Nayak has not honored the conditions of the sale. At present, the land is bare. A report of Land surveyor Dumazel states that this land consists of six portions belonging to various persons. These portions are related to the Carver land. Rhodes Carver adds that the family has been informed that now somebody wants to sell the land.

A site visit was arranged with Rhodes Carver on 11<sup>th</sup> March 2010 and he was informed that Elias Carver has already sold the plot of land of extent of ½ *Arpent* on 17<sup>th</sup> April 1932 as evidenced by TV 446 No. 62.

Searches undertaken by the Commission reveal that, in fact, Elias Carver was the owner of a plot of land an extent of about 6 ½ *Arpent* in virtue of title deed transcribed in Volume 416 No. 482, which he sold on 17<sup>th</sup> April 1932 in virtue of titled deed transcribed in Volume 446 No. 62.

During the site visit carried out on 11<sup>th</sup> March 2010, in the company of Rhodes Carver, the relevant site was identified and after consultation of the title deed and the plan of the subject property, the Commission reached the conclusion that the site previously belonging to Elias Carver was sold out and is presently built up. Therefore, the plot indicated by Rhodes Carver does not belong to heirs of the late Elias Carver.

\*\*\*\*\*

**CASE NAME: ALIPHON**

*TJC/L/L/0109/ MEDAN MARIE JOSEPHE, born ALIPHON*

Marie Josèphe Médan avers that her ancestors, the Aliphon family, purchased a plot of land in 1859 at Poste de Flacq. According to the contract, the land consisted of 3 portions. The Aliphon family occupied 2 portions belonging to Pierre Léoville Aliphon and Marie Adrienne Aliphon respectively. Marie Josèphe Médan and her husband have discovered that part of their heritage has been prescribed in 1997. The family wants to get back the prescribed part.

Searches undertaken by the Commission reveal that following TV 67 No. 275 dated 12<sup>th</sup> August 1859, Dogerville Aliphon acquired a plot of land of the extent of 1 *Arpent* (4220.87 m<sup>2</sup>) at “*Le Poste*” in the District of Flacq from Ernest Reynold. Part of that plot of land of the extent of 1603.93m<sup>2</sup> has been prescribed by one Cassam Ramjan as per survey report of Land surveyor L. Y. Sakir registered in L.S 28 No. 14466 and transcribed in TV 3104 No. 67 on the 23<sup>rd</sup> February 1993. (*Register 511 No. 5052 refers*).

Subsequently Ramjan sold the above plot of land of the extent of 1603.93 m<sup>2</sup> to the following:

- His son Feroze Ramjan - a portion of land of the extent of 593.13m<sup>2</sup> as per TV 3435 No. 12;
- Premnath Goojah - a portion of land of extent 295.46m<sup>2</sup> as per TV 4573 No. 42;
- Another son, Naushadally Ramjan - the remainder of the plot of land found to be of extent 533.89 m<sup>2</sup> as per TV 4573 No. 43.

From the above, an extent of about 2616.93 sq metres, are still owned by the heirs of Pierre Dogerville Aliphon and should be divided amongst the heirs in the appropriate portion; and as regards to the 1603.93 m<sup>2</sup> prescribed, the applicant and the other heirs have been advised by the Commission to consult an Attorney or Notary so as to have a duly valid affidavit which would clearly establish the lineage and to initiate appropriate legal actions before the Supreme Court to pray that the affidavit of prescription be declared null and void and that the new owners be asked to quit, leave and vacate.

\*\*\*\*\*

**CASE NAME: SEETUL**

*TJC/ L/0110/ SEETUL ARAVINDRANATH*

Aravindranath Seetul, the applicant, writes in a letter that his grandfather Adjoodah Seetul married Phooljareeah Deewoo. He was born after the death of his father. His mother bought more than an acre of land. It was only when his mother died that he was informed that he was the owner of that plot of land found at Mon Désir, Paillote. He discovered then that the land was occupied by

two persons; one of them had prescribed the land. He requests the Commission to allow him to get back the land.

Searches carried out by the Commission at the Conservator of Mortgages' Office have revealed that the names given by Aravindranath Seetul Adjoodah or Ajoodah or Ajodah Seetul and Phooljaneeah Dewoo do not appear in the Name Index Register.

As regards Horil Gunness and Shan Yan Tow Cheong Wong who have allegedly prescribed their land, there is a Court case in file bearing case No. 164/90 wherein there is a judgment following a settlement of parties to the effect that a portion of OA 13 perches is to be allocated to Horil Gunness and a portion of OA 10 perches to Shan Yan Tow Cheong Wong.

On 10<sup>th</sup> May 2011, the applicant's daughter, Darshinee, informed the Commission that the applicant passed away. There is no document in her possession. She was invited to contact her uncle and see if any document concerning the land could be traced out.

On 31<sup>st</sup> May 2011, the applicant's brother Doomun Seetul called at the Commission to say that he could not produce any document, or any title deed concerning the land of 1 *Arpent* at Paillote. He confirms that there was a Chinese shop on the land -and several houses are occupied by several persons.

He further states that his grandmother had purchased the land from Trianon Estate, together with the shop. His grandparents lived on the land.

One Ahmed Sayed Hossen had prescribed the land of extent of 35 p and sold part of it to Tow Chong Wong as per TV 529/106; and Boodeea Beeharry has prescribed 57 ½ p as evidenced by TV 1349 No.135.

In view of the fact that the plot of land claimed is more than 1 *Acre*, Aravindranath Seetul has been advised to initiate action to have the surplus of land prescribed.

\*\*\*\*\*

**CASE NAME: RAMSAMY**

*TJC/ L/0111/ RAMSAMY IRÈNE*

The great grandmother of applicant, Irène Ramsamy, owned a plot of land of approximately 500 toises at Mangue Vert, Doux, at Bambous since 1850. In 1965, permission was granted by applicant to one Frank Marion to cultivate the land. In about 1992, the family received a letter to the effect that one Emile Autard has prescribed the land and sold it. The family and Frank Marion went to Court and the judgment was in favour of the new owner. They want to get back the land.

Even if this were a Court case, the Commission wanted to understand what has happened. Irène Ramsamy was called upon to submit some documents. According to notes dated 29<sup>th</sup> July 2009, the applicant had agreed to supply to the Commission copies of proceedings of Court case and judgment. She has not done so up to now. From information gathered, it appears that applicant has been ordered by the Court to quit, leave and vacate the property.

\*\*\*\*\*

**CASE NAME: ANTHONIMOOTOO**

*TJC/ L/0112/VF/ANTHONIMOOTOO GEORGES CHRISTIAN*

The applicant, George Christian Anthonimootoo, writes that one Ramparsad, a CHA tenant, has erected a wall, blocking the entrance to all inhabitants of C.H.A Housing estate, Hibiscus Road in Grand Bay on a State land. The inhabitants can no longer use this plot of land for their cars. They are aware that the plot of land belonging to Government cannot be prescribed nor occupied illegally.

The Truth and Justice Commission has sent a letter to the Ministry of Housing and Lands on 19<sup>th</sup> July 2010 to raise the issue.

As it is a problem which concerns a CHA Estate, Mr. George Christian Anthonimootoo has advised to contact the above Ministry.

\*\*\*\*\*

**CASE NAME: FIGARO & PERNE**

*TJC/ L/0113/VF/ ALLET JOSIANE CLOEE*

Josiane Chloé Allet *born* Figaro filed two cases at the Truth and Justice Commission. In the first case, she avers that her mother, Luciany, Perne, has always talked about land owned by her grandmother at Riambel and Chamarel. She would like to know if the land still exists. In the second case, Josiane Allet avers that her father Louis Marcel Figaro also possessed land at Mahébourg. In both cases, the applicant requested the Commission to retrieve the land at Riambel, Chamarel and Mahébourg, if ever they were available.

There is nothing in file which would enable the Commission to carry out searches to sustain her request concerning the land.

The only name given is that of Louis Marcel Figaro and whose name does not appear in *Case Hypothécaire*. The applicant is very vague in her claim.

In spite of letters sent to applicant she has failed to come at the Commission to give more precise details.

\*\*\*\*\*

**CASE NAME: LABAVARDE**

*TJC/L/0114/RIOUX MIREILLE (born LABAVARDE),  
LABAVARDE JEAN CLAUDE & others*

Mireille Rioux, Jean Claude Labavarde & Others write that their family owned a plot of land in Le Tombeau, Arsenal. The family said that they have been deprived of this land. They want to know what has happened and to get back the land.

The Commission inquired into the whole issue and it appears that the Supreme Court has given judgement in the case entered by M. R. Labavarde & Ors against A.D.D Nam Cam on 18<sup>th</sup> May 2009. The plaintiffs have appealed against the said judgement to the Court of Civil Appeal.

The Commission cannot entertain the application as there is an appeal before the Court of Civil Appeal.

**CASE NAME: LECERF**

*TJC/L/L/0117/ LECERF SYLVIE*

Sylvie Lecerf put two cases before the Commission for assistance. In both cases, the applicant felt that she has been dispossessed of her inheritance by the Beau Champs Sugar Estates and by the Church.

**Case 1**

According to the applicant her great-grandmother married one Robert Lecerf. The latter owned a plot of land of 635A at l’Etoile, Beau Champs. Robert Lecerf, the grandfather died and the land was left unoccupied. Actually, avers the applicant, it is being occupied by Beau Champs Sugar Estates. Sugar cane is being cultivated there and a hotel also has been built on the land. The Lecerf family wants justice to be done and compensation for the illegal occupation of the land.

**Case 2**

Robert Lecerf owned a plot of land found at Quartier-Militaire. Since then, a Catholic Church has been built on this land. They want to get back the land.

In both cases, no document, no deed, no survey plan, and no family tree have been submitted.

After searches undertaken by the Commission, it has been found that the name of Robert Lecerf does not appear in the “*Répertoire*” or in the Name Index at the Register of the Conservator of Mortgages. So, it appears that Robert Lecerf has no land inscribed in his name.

As for the second claim for a plot of land on which there exists a church, the Saint Léon Church, the same land is also being claimed by Patrick Webb/ Changkye in another file (*Cross Reference: TJC/L/0046/ WEBB PATRICK /CHANG KYE*) - *CASE NAME: DIORE/CHAN KYE*.

\*\*\*\*\*

**CASE NAME: BEEHARRY**

*TJC/L/0115/ BEEHARRY ABDOOL SATAR*

The applicant, Abdool Satar Beeharry and who is a great-grandson of l’Indien Beeharry No. 234431, has submitted 3 cases before the Commission for investigation:-

- a plot of land of extent of 2/3 *Arpent* at Quartier de la Savanne.
- a plot of land of 4 *Arpents* at Curepipe purchased by his ancestors in 1854 which has been prescribed by Alphonse Lagesse which is presently part of the grazing land of Constantine Limited.
- a plot of land of 34A at Bois Cheri, Grand Bassin known according to oral tradition as “terrain Beeharry.”

**Case 1**

On 26<sup>th</sup> Nov 1879, l’Indien Beeharry bought a plot of land of an approximate extent of 2/3 *Arpents* at “*Quartier de la Savanne*”. This plot of land formed part of a larger portion of land. When applicant’s grandfather died, he left his property to 2 heirs: applicant’s father and applicant’s uncle. Applicant’s father moved so much on account of his work that he could not look after the land. At present, sugarcane and vegetables are planted on this land by people who are occupying the land illegally. Now, there are 15 heirs for this land.

**Case 2**

A plot of land of 4 *Arpents* was purchased by l'Indien Beeharry at "*Quartier des Plaines Wilhems*", Curepipe, in 1804. At present, the land is grazing land. Société Constantine is the owner of the whole plot of land situated at 16eme mille. This plot has been fenced including the portion belonging to the Beeharry family. Applicant says that the land has been prescribed by Constantine Ltd. According to Land surveyor Jean Jacques Desmarais, the land has been prescribed by Alphonse Lagesse and sold to Honorable Tristan Mallac and Constantine Ltd.

**Case 3**

The applicant adds that his great-grandparents were also owner of a plot of land of 34 *Arpents* at Bois Chéri, Grand Bassin. According to oral tradition, the land is known as "*Terrain Beeharry*".

Searches undertaken by the Commission have revealed the following:

**Case 1:** Beeharry No 234431 bought a plot of land at Savanne of extent of 2/3 *Arpents* on 19<sup>th</sup> November 1879 from F. Ganachaud as per TV 134 No. 429 and another plot of land at Savanne of the extent of ¼ *Arpent* on 29<sup>th</sup> September 1885 from one Ramkhalawon as per TV 168 No. 359. He sold the bare ownership of these 2 plots of land to F. O. Beeharry on 11<sup>th</sup> February 1890 as per TV 190 No. 4 in consideration of a price of Rs. 785 and the usufruct to Auskurrun and others. Mr. Abdool Satar Beeharry does not know the location of the plots of land nor has he produced a Constat Report.

The claim to the effect that the plot of land of 2/3 *Arpents* at Savanne allegedly prescribed by Britannia Sugar Estate does not hold.

**Case 2:** It is an interesting case. The former Land Surveyor Gustave de Coriolis sold to Beeharry 234431 a plot of land of the extent of 4 *Arpents* excised from Terrain D'Avray on 28<sup>th</sup> November 1881 under TV 143 No. 391 for the price of Rs 480, De Coriolis having himself bought it the year before from Jules Levieux under TV 142 No. 41.

It appears that on the 1<sup>st</sup> December 1937, Alphonse Lagesse prescribed the said plot of land together with other plots making a total extent of 34 *Arpents* 01 perches. In the survey report drawn up by Land surveyor Jean Jacques Desmarais dated 14<sup>th</sup> February 2006 registered in Reg. A 690 No. 1570 at the request of J. M. Antoine Harel, representative of "*Constantine Limitée*", it is clearly indicated that the 4 *Arpents* plot of land having belonged to Beeharry 234431.

It is also stated in the report "*que le terrain de la famille Beeharry a été bel et bien prescrit par Mons. Alphonse Lagesse et que les droits des héritiers Beeharry sont périmés vu que le terrain a été prescrit par Mons. A. Lagesse*". It is very unfortunate that small owners with an aggregate extent of 34 *Arpents* 01p have lost their lands due to the fact that "*Constantine Limitée*" have fenced the whole perimeter, closed the 3.90m wide road and landlocked the properties of the small owners.

This is indeed a case of dispossession.

**Case3:** The plot of land of 34 *Arpents* at Bois Chéri, Grand Bassin is nowhere to be found in the "*Case Hypothécaire*" of the ancestor. It still remains in the "*oral conscience*" and memory as "*Terrain Beeharry*".

If the first and third cases cannot be considered, the second case concerns a land which had already been sold to Beeharry. Today the Beeharry cannot have access to their inheritance because the land has been enclosed and included in a prescription.

\*\*\*\*\*

**CASE NAME: PADAYACHY***TJC/ L/0116/CATHAN PADAYACHY MAREEAYE*

Mareeaye Cathan Padayachy, the applicant, relates one of the saddest aventure that had occurred in her life with the loss of her property and that of the whole family through lack of experience I n doing business, and who, most unfortunately fell into the hands of a money lender. She relates that the land belongs to the grandfather of the grandmother of her father. They bought the land for her grandfather (Goinsamy Cathan Padayachy) who had 3 children (two daughters and one son).When applicant's grandfather died, the two daughters gave the land to their brother (applicant's father, Cathan Mootoo Katha Padayachy). She was the only child of her parents. When her mother died, Yanum Valaydon, she was looked after, and she took care of her grandmother until her father remarried her mother's sister.

The applicant worked as a social worker benevolently.

In 1990, her father helped her by giving her the land which is situated in Vallée-des-Prêtres. The land was about 2 *Arpents* 16 perches on which a house of more than 2000sqft was built. This house was one of the first concrete houses in Vallée-des-Prêtres.

She stayed in that house along with her aunt and her daughter.

In 1991, she took loans from different institutions (a) Rs. 600,000 from the Sugar Industry Pension Fund; (b) Rs. 300,000 from the Development Bank of Mauritius; and (c) from the Mauritius Commercial Bank. She also took money from her father.

The loans were taken with the final aim to finance the construction of a 3,000 sq feet supermarket. The project necessitating more funding, she borrowed more money from her father's friend, one Guillemen Glency and gave as guarantee a plot of 35 perches. Applicant said that the supermarket was opened on 15<sup>th</sup> May 1992. It was inaugurated by Lady Sarojini Jugnauth, wife of the then Prime Minister.

Since applicant did not have any experience in marketing, she made a loss of Rs. 300,000.

She turned to a money lender one Seeram Huree who was keen to finance her project. She was given for the first time some Rs. 140,000 but she was asked to sign a paper in which Rs. 200,000 was written and she signed it. Each time, she got an amount of money; she signed another amount on paper.

***Example:***

<b>Date</b>	<b>Amount stipulated</b>	<b>Amount received</b>
28/12/92	Rs. 200,000	Rs. 140,000
03/02/93	Rs. 240,000	Rs. 160,000
15/03/93	Rs. 450,000	Rs. 270,000
09/07/93	Rs. 455,000	Rs. 270,000
09/03/94	Rs. 400,000	Rs. 30,000

In 1993 she had to pay back the sum of Rs. 1,345,000 to Hurree. She turned towards another money lender to reap the amount requested to pay to Hurree. She was asked to put another plot of 25 perches of land as guarantee to the second money lender, but the DBM had a bond on the land.

Since she had taken too much money from DBM, which amounted to some Rs. 240,000, there were 5 mortgages on the land.

After 6 months, Hurree pressed her to pay back the total sum of Rs. 1.3 million. She had to mortgage the land. The only recourse was to sell her land, but the total amount reaped was insufficient to repay her debt.

All her property was seized and sold by levy before the Master's Court. She lost everything.

\*\*\*\*\*

**CASE NAME: LABUTTE**

*TJC/ L/0118/ LABUTTE*

Louis Alex Labutte avers that he is one of the descendants of Louis Maurice Le Père de La Butte who was allegedly the owners of several portions of land namely, (1) 315 *Arpents* at Tamarin, (2) 180 *Arpents* at Petite Rivière Noire, (3) 490 *Arpents* at Coteau Raffin, (4) 29 *Arpents* at Baie du Tamarin and (5) 8¼ *Arpents* at a place between Cascavelle and Rivière Noire.

Louis Maurice had a son, Guillaume, born from a first marriage. Guillaume married a freed slave, Toinette and had a child, Jean François La Butte.

Guillaume gave a plot of land of 8¼ *Arpents* to Toinette (*citoyenne de couleurs affranchie*) and her six children on 31<sup>st</sup> August 1800.

According to the provisions of *Code Noir*, the above donation was not legal.

The coming into force of Ordinance 21 of 1853, which repealed Ordinance No. 57 of 1829, meant that ex-slaves could now acquire property, receive donation, have a right of inheritance in the succession of their natural parents.

The Commission heard the case and the applicant was assisted by one J. Seenyen. The Commission has taken into consideration all the facts stated by him but notes with regret the situation prevailing at that time.

Should the applicant still believe that he has a claim in the properties of his white ancestors, he may enter a case against the other heirs before the Supreme Court.

This would be a very interesting case as the Supreme Court will have to deal with right of inheritance involving children of white and coloured ancestors.

\*\*\*\*\*

**CASE NAME: PIERRE**

*TJC/ L/0119/ PIERRE SAWDIC*

This is a non land case. The applicant, Pierre Sawdic declares that from a document found at the Nelson Mandela Centre for African Culture, his ancestors came from Mozambique. His family name is Pierre, whereas his sister's family name is Couronne. He ignores why and how he does not bear the family name of his father which is Couronne. He wants to regain the name Couronne instead of Pierre.

The Commission has advised the applicant to send a request to the Attorney General's Office to do the needful.

\*\*\*\*\*

**CASE NAME: UJOODHA**

*TJC/ L/0125/ SEEGOOLAM KAMLA DEVI  
(born UJOODHA) and LOCHUN DEWANTEE*

Kamla Devi Seegoolam's mother, Kevelee Ujoodha, owned a plot of land of an extent of 79 perches or 82 ½ perches at Athon Street, Pointe-aux-Piments, as per Volume 847 No. 35. On the death of applicant's mother, the land was shared among the heirs. A small part of the land (8½ perches) remained on the name of applicant's mother. This portion was prescribed by applicant's sister-in-law.

The Commission carried out extensive searches on this case because of its complexities.

Following a division in kind K. Ujoodha v/s J. Ujoodha registered and transcribed on 16<sup>th</sup> March 1961 in TV 847 No. 35, Kevelee Ujoodha was attributed the following portions of land namely:

- 19 perches out of 25 perches at Pamplémousses
- 79 perches at Solitude

According to TV 1320 No. 32 dated 15<sup>th</sup> April 1976, Kevelee Ujoodha sold to each of her children Dewantee Baboo, Kamla Devi Baboo and Geeany Baboo 0A10 (1/3) perches.

As revealed by TV 1320 No. 31 of the same above date, Kevelee Ujoodha sold to each of her other children Danwantee Baboo, Atmanand Baboo and Jeewa Baboo 10 perches 1/3, retaining for her the surplus out of the 79 perches, that is, about 10 perches.

At folio (10) one Amritha Seebun caused to be prescribed on 2<sup>nd</sup> December 2002 a plot of land of 347 m<sup>2</sup> (about 8 ½ perches) as per TV 5063 No. 54 (the very surplus of land of Kevelee Ujoodha).

It is further noted in the Affidavit of prescription that the said "*Amritha Seebun has occupied for more than 30 years, since the 2<sup>nd</sup> February 1968, the above plot of land and is still occupying in a peaceful, public and continuous, uninterrupted, unequivocal and "Animo Domini" à titre de propriétaire and in an apparent manner*".

The Commission is of opinion that the applicant be advised to retain the services of an Attorney and a Counsel to enter a case before the Supreme Court in order to declare the prescription null and void and to apply for a Writ of Injunction to prevent the sale of the land prescribed.

\*\*\*\*\*

**CASE NAME: JACQUES RENE**

*TJC/L/0120/VERNY CLENCY & CAMANGUE ROSEMONDE  
CROSS REFERENCE: LOUISE GEORGES FRANCE TJC/L/0147*

Rosemonde Camangue claims to be an heir of René Jacques and submitted several documents to sustain her averment. In 1827, René Jacques, "*homme de couleur*", she avers, was the owner of 120 *Arpents* in the "*quartier de la Savanne*". Out of this property, a plot of land of an extent of 20 *Arpents* was leased out to Gros Bois Sugar Estate for a period of 3 years as from 22<sup>nd</sup> February 1867. The lease was made between Jacques, the children and the estate. In spite the fact that Gros Bois Estate did not pay completely the lease they continued to occupy the land after the agreed period of 3 years. The Estate and Notaries declared that the heirs have sold the land to one Chuttoo, to one Churendoss and other people. But no mention of these "other people" is mentioned in the "*Case Hypothécaire*".

Rosemonde Camangue is of the opinion that the sale made by René Jacques in 1854 as reported in the "*Case hypothécaire*", is not true, so the "*sales are fraudulent*".

There is a will made by René Jacques in 1848 wherein it is mentioned that he shared the property among his widow and children. The will is registered on 30<sup>th</sup> November 1854 but René Jacques had already died on 5<sup>th</sup> August 1854. In fact, René Jacques died in 1874. It is also mentioned that he could neither read nor write; but he signed on the "*contrat d'achat*". The applicant is of opinion that the will is a false one. A sharing of the property was done in 1875 among the children of René Jacques. In 1876, it is said that the widow abandons her rights, but this document is registered in 1875 indicating that it is also a fraudulent one.

The applicant's Grandfather, Michel Camangue, and Grandmother, Rosemonde Camangue, called on Britannia Sugar Estate for an interview. A petition was sent to the Attorney General but the family was advised to contact Chief Justice Office, avers Rosemonde Camangue.

The heirs made a "*manifestation*" (demonstration) on the occupied land at la Flora. A letter was sent by Attorney Fulena to the Attorney General, the Permanent Secretary of the Ministry of Finance, the Consortium BBHM Holdings Ltd asking for the restitution of the land to the heirs of René Jacques.

A declaration was made to the Police against Britannia Sugar Estate. The answer was that the case is a civil one and the Camangue family may have recourse to civil remedy.

A permit to develop for an excision of a plot of land of an extent of 8441.74 m<sup>2</sup> out of the 506842.06m<sup>2</sup> belonging to the heirs of late René Jacques, for agricultural purposes was granted to Rosemonde Camangue. She adds that one J. Sylvain Ricaud, one of the heirs, is at present receiving a certain sum of money from the Estate.

The family wants justice to be done in their case and that the land be restituted.

An analysis of the whole case undertaken by the Commission reveals in 1827, that René Jacques purchased two plots of land; the first one being of an extent of 60 *Arpents*, made up of 38 *Arpents* 24 and 21 *Arpents* 84 and another plot of 60 *Arpents*.

From the "*Case hypothécaire*" submitted it appears that on 27<sup>th</sup> February 1875, a Division in kind took place before a Notary with the authorization of the Court because there were minors.

The land of 120 *Arpents* was divided into 9 plots and distributed to each heir, two portions land of 6 *Arpents* 66 perches each.

However, only 20 *Arpents* out of the 120 *Arpents* were leased to Grand-Bois Estate for a period of three years prior to the division in kind. It appears that after the expiry of the lease, Grand-Bois Estate continued to occupy the land.

Searches at the Registrar General's Office carried out by the Commission in the names of

- Louis Evénor Jacques;
- Marie Louise Jacques; and
- Jean Jacques

reveal that they have already sold their lands by small lots.

Rosemonde Camangue has been advised to retain the services of a Land Surveyor to make further searches to know whether there is still property belonging to heirs René Jacques.

**CASE NAME: SUHAWON ALAMAN**

TJC/L/0121/SUHAWON SOWKATALLY

Sowkatally Suhawon, the applicant avers that his father told him that the Suhawon family owned numerous plots of land inherited from Ahlaman Suhawon, his grandfather: 25 *Arpents* at Grand Port, 5 *Arpents* 18 perches at Savanne, 100 *Arpents* 50 perches at Grand Port; 100 *Arpents* 8 p at Cent Gaulettes, Mahébourg; 1 *Arpent* 50perches at Grand Port.; 37 *Arpents* 1 perche, 26 *Arpents* 14 perches; 397 *Arpents* 67 perches at Cluny; 2 *Arpents* at Courteau de Gros Bois, Grand Port; Trois Boutiques; 1 *Arpent* 50 perches at Grand Port; and 50 perches from his father, Ahmod Suhawon. The heirs think that they have been dispossessed by Mon Desert Mon Trésor Ltd.

The applicant requests the help of the Commission to locate the plots of land.

After searches made by the Commission, it is revealed that late Ahlaman Suhawon was the owner of several plots of land in Grand Port/Savanne Districts.

Even if some documents have been submitted, as well as extracts of birth and death Certificates, it is a disappointing that not a Survey Report or plan has been submitted to enable the Commission to fully investigate their claim.

However, the copy of a deed drawn up by Public Notary Edouard Lesur on 13<sup>th</sup> July 1915, reveals the sale by Louis Noël, Paul Montocchio, Maurice Montocchio and George Montocchio of "*Paul Montocchio et Compagnie*" to Ahlaman Suhawon of a plot of land of an extent of 675 *Arpents* commonly known as "Sauveterre" situated at Les Mares and composed of 3 plots of land, in consideration of a price of Rs. 425,000.

At the moment of the signature of the deed only Rs. 100,000 have been paid. The remaining sum of Rs. 325,000 was to be paid as follows:-

- Rs. 100,000 on 31<sup>st</sup> January 1916
- Rs. 100,000 on 31<sup>st</sup> January 1917
- Rs. 62,500 on 31<sup>st</sup> January 1918
- Rs. 62,500 on 31<sup>st</sup> January 1919

The above mentioned plot of land is burdened with conventional charges, namely Rs. 300,000 dated 27<sup>th</sup> May 1915 in favour of L. M. Noël &Co and another conventional charge in the sum of Rs. 47,000 dated 5<sup>th</sup> September 1928 in favour of K. H. Cassim. These charges have not been erased

In view of the fact that late Ahlaman Suhawon owned several properties in Camp Diable and he had donated various properties to charitable institutions, it is difficult to know which properties might still belong to succession Ahlaman Suhawon.

In the light of the above, succession Ahlaman Suhawon has been advised to retain the services of a Land surveyor to make a "*Constat* report" on land having belonged to late Ahlaman Suhawon in order to know which property has not been sold.

\*\*\*\*\*

**CASE NAME: SOOKHARRY**

TJC/ L/0122/SOOKHARRY PADURAMVIR

The applicant, Paduramvir Sookharry, claims to be one of the heirs of his grandfather, Balgobin Sookahrry, who owned several plots of land throughout the island. He avers that Balgobin

Sookharry, his brother Lutchmun and Hareeparsad Narrain, a relative were the owners of a sugar estate. He further avers that a false affidavit has been sworn to the effect that the grandfather, Balgobin Sookharry died without any heir.

Lutchmun Sookharry was married to one Ragoobar Dookhee. He died without any children and left all his possessions to his brother Balgobin Sookharry.

Hareeparsad Narain was married to one Soomareea Sewraj and from this marriage a boy named Gangapersad Sewraj was born. Gangapersad Sewraj was dumb. At the death of Hareeparsad Narain, Soomareea Sewraj became the concubine of Balgobin Sookharry who adopted Gangapersad Sewraj. A natural child named Canchanlall Sookharry (the applicant's father) was born from this relationship. Gangapersad Sewraj never married. He made an affidavit and left all his belongings to his natural brother, Canchanlall Sookharry.

Canchanlall Sookharry was illiterate. He joined the army during the Second World War and when he returned home, his father Balgobin Sookharry was very ill. Unfortunately, he did not have the time to show the exact location of his lands to Canchanlall. He died shortly afterwards. But before he died, Balgobin Sookharry made an affidavit leaving all his belongings to Canchanlall.

During the last years of Balgobin Sookharry's life, a young boy named Jugganlal Dooblall used to bring fresh milk every morning to him. That is how he established close relationships with Balgobin Sookharry and his family. He learned a lot about the transactions of the family.

Paduramvir Sookharry requests the help of the Commission for all cases: he avers that his family has paid for the services of several lawyers, Notaries and Land surveyors but these people never did anything to enable the Sookharry family to recover their lands. They have spent a lot of money to undertake research and to try to get back the lands of their grandfather. They want the Commission to locate the lands owned by Balgobin Sookharry, to cancel the prescription and get back the land of their grandfathers.

#### **Case 1**

When Balgobin Sookharry died, Jugganlal Dooblall took advantage of the situation and made Canchanlall Sookharry believe that part of the land that his father owned at Montagne Blanche was for him. Jugganlal Dooblall convinced Canchanlall Sookharry to lease out one portion of land of 70 perches to him for a period of nine years as from 30<sup>th</sup> November 1970 until 30<sup>th</sup> November 1979. At the end of the lease, Dooblall continued to occupy the land. He is now occupying all the land belonging to Sookharry at Montagne Blanche. An affidavit which - according to applicant, is false - has been sworn in to the effect that the grandfather, Balgobin Sookharry, has died without any heir.

#### **Case 2**

On the grounds that the applicant and his sister are false heirs, Dooblall entered a case in Court against him and his family making a false accusation that they have bulldozed 'his' land in Nouvelle France. The applicant does not know where this land is found and thinks that it is possible that this land belongs to the heirs of Balgobin Sookharry.

#### **Case 3**

The applicant avers that during his searches, he discovered that Balgobin Sookharry owned several plots of land throughout the island, some being located in Camp Fouquereaux & Quatre Bornes. When he went to the Registrar General's Office and asked for the title deeds for Balgobin Sookharry, the officer there told him that there are many title deeds for Sookharry. He also found title deeds for Dooblall that were attached to those of Sookharry. He claims that Dooblall has made many frauds on the lands of his family.

The Commission made searches and analysed all the many documents submitted by Paduramvir Sookharry and the following observations are made:

- Lutchmun Sookharry is not the brother of Balgobin Sookharry. He is in fact the nephew who has renounced all his parts/ shares in the heritage as evidenced by TV 552 No. 875 dated 19<sup>th</sup> July 1974.
- A perusal of “*Case hypothécaire*” 337 No. 414 revealed that the only plots of land belonging to heirs Balgobin Sookharry are 56 perches at Montagne Blanche acquired from R. Lauraté and others on 17<sup>th</sup> July 1944 as per TV 484 No. 416, and 2 plots of land prescribed by him on 14<sup>th</sup> January 1948 of extents 59 perches and 70 Perches as per TV 516 No. 186.

All the other plots of land claimed by R. Paduramvir Sookahrry, purportedly having belonged to Balgobin Sookahrry, have been sold out.

\*\*\*\*\*

**CASE NAME: BESAGUE**

*TJC/ L/0123/EDOUARD LOUIS GERARD*

Louis Gérard Edouard, the applicant, says that his family has been staying on a plot of land at Labondance Petit Val (near Chamarel) since very long. According to him, the family got that plot of land from their great-grandfather on his mother’s side, one Adelaïde Bésague, in the late 19th century. They had their home there and even had their own pineapple plantation.

On 7<sup>th</sup> May 2007, they were asked by Government to move to Contour Prune, Choisy, by the National Park. According to that letter, it was made clear that the plot of land formed part of the National Park.

The applicant says that the family refused to move to Choisy because they have been living there since childhood and the plot of land was his great grandfather’s.

They request the Commission to get back their land and to tell them the exact extent of land they own.

Following searches undertaken by the Commission, there is no land inscribed in the name of Besague or Bezegui in the “*Répertoire*” of the Registrar General’s Office.

In fact, an attempt was made on 22<sup>nd</sup> June 1990 by one Laurent Bézaguy to prescribe a plot of land of the extent 244810.40 m<sup>2</sup> (about 58 *Arpents*) at Chamarel following a survey report of Sworn Land surveyor Louis Maurice Dumazel. Laurent Bézaguy did not pursue further that attempt. None of the adjoining owners given in the survey report are owners of land at Chamarel. In view of the fact that some of them have already been served with “*Notice to Squatter*”, there is no indication that they are owners of land of Chamarel as they have squatted on forest lands.

The history of the case concerning this plot of land and the incident related in the said case before the Magistrate do not help the Commission more in the matter. The sentence of three months’ imprisonment imposed by the Magistrate says a lot.

The applicant has been advised to liaise with the Ministry of Housing and Lands in order to obtain a proper State land lease as the plot presently occupied is indeed included in the National Park.

\*\*\*\*\*

**CASE NAME: TOOLSY**

TJC/ L/126/ TOOLSY NOWRUTTUN

Nowruttun Toolsy, the applicant, says that his father died on 1986. According to him they had a plot of land at Pointe-aux-Piments of 1 *Acre* 37. The applicant explains that he has received a letter from the Registrar telling him that indeed he owns the plot of land, but his father's cousin has prescribed the land. His Attorney at Law told him that he could not have the land back again. Toolsy says that he has made an application for a title deed, but his uncle has lost it while doing research works on the said land. Nowruttun Toolsy wants restitution of the land.

Upon the request of the Commission, Nowruttun Toolsy was called to state where the plot of land is exactly situated. He answers that he does not know the exact location of the land. He stated that, according to information received from relatives, it appears that the land, which he believes, to belong to his father, uncles and grandfather is waste and unoccupied. He was advised that he ought to contact a Land surveyor or any other surveyor as soon as possible to make an assessment and give a site/ location.

He was also advised to afterwards report the matter to the Land Fraud Squad at Line Barracks. It will then be easier to explain to the Land Fraud Squad about his complaint.

The Commission is of the opinion that his share in the said portion of land of 1 *Arpent* 37 perches amounts to 1/28 only.

\*\*\*\*\*

**CASE NAME: HANNELAS**

TJC/L/0127/HANNELAS MICHEL GEORGES ANGE CYRIL

Georges Michel Ange Cyril Hannelas, the applicant, and other members of the family declare that they are heirs of Mathurin Jeannot through one Yolande Hannelas, *born* Farla, the mother of the heirs. Mathurin Jeannot bought a plot of land from one Lejuge in 1814. Many plots of land exist together and the total makes up about 156 *Arpents*. The land is found in the district of Black River, more precisely, at Albion but the applicant does not know the exact location.

To be able to sell the land, the heirs, the Hannelas family, together with the Dimba family, have started searches for the missing documents. They declare that the research has been made by Jean Claude Labavarde and one Rambert who are land promoters. All the searches have been done by these two persons only. The applicant has been swearing an affidavit upon the request of Labavarde as there are errors regarding the names of the heirs. They are still waiting for this affidavit since the 10<sup>th</sup> July 2009.

In August 2009, Labavarde told Hannelas and Bolka, *born* Hannelas, over the phone that they are not the heirs of Mathurin Jeannot. The reason put forward by Labavarde is that Aurélie Jeannot died at the age of six and it is not likely that she has left any heir behind. But, according to the applicant's document, Aurélie Jeannot was born in 1812 and got married to Pierre Louis Dimba on 11<sup>th</sup> February 1834. As per the applicant's research at the Civil Status Office of Port Louis, they found that the death date has been registered in 1838 but no original document has been received because there is no index at Central Statistics Office. The applicant says that he does not understand why and how they are not heirs of Aurélie Jeannot.

The Hannelas family requests the Commission to undertake searches in order to know and clarify the link of the heirs with Aurélie Jeannot.

The application was submitted on 09<sup>th</sup> October 2009. However, by letter dated 7<sup>th</sup> December 2009, one Aubierge Caliste has requested the Commission to keep the matter in abeyance. The applicant has taken back all documents submitted as the family, not up to now, has been willing to maintain the case put before the Commission.

\*\*\*\*\*

**CASE NAME: FRICHOT**

TJC/ L/0128/ GENEVIEVE PAUL JOSE

*Cross Reference: FRICHOT Serge Claude A. & others TJC/L/0005*

The applicant, Paul José G enevi eve, says that her mother used to say that they had a lot of land in Riviere Noire. He does not know where they are found. He went to the Registration and Mortgages' Office and got a list of a few lands in Riviere Noire. The family requests assistance from the Commission to find out documents and lands.

Paul Jose G enevi eve claimed that his mother had told him that they had a lot of land at Riviere Noire. He did not know the location of those plots of land nor had he any plan in his possession. Only one title deed TV 39/212 has been produced.

He had copies of 3 "*R epertoires*" wherein mention is made of various sale at Riviere Noire made by Louis Laurestin Frichot.

In June 2010, he came to the Commission's Offices and promised to come back with the necessary documents to draw up the family tree and would revert back to the Commission once he had obtained other documents. He has not turned up.

Even if no family tree has been submitted, yet, after searches made by the Commission, it appears that Louis Laurestin Frichot appears in the family tree of Serge Claude Frichot. But, further searches at the Mortgages' Office reveal that the three "*R epertoires*" do not belong to Louis Laurestin Frichot who was married to Hortense Sans Fa on. One "*R epertoire*" relates to Louis Frichot, who was married to L ecadre Ashme.

The applicant has failed to supply the required precise information for the lands he is claiming and in the absence of more precise land data, it would be impossible to carry out searches.

\*\*\*\*\*

**CASE NAME: FIGARO**

TJC/L/0129/FIGARO GUICHARD

Guichard Figaro, the applicant, says that his great-grandfather owned a plot of land at Olivia. The latter was a Malagasy who came to Mauritius as a slave. His grandfather used to tell him that the Figaro family owns a plot of land there even if neither he nor any member of his family has seen the land in question. After having made some searches on his own, the applicant was able to have a copy of the contract of the land, TV 91 No. 5, at the Registrar General's Office.

He made a request to the Commission to enquire into the present situation of land and to reconstitute the land to the Figaro heirs and to investigate other plots of land which the Figaro might own in Moka.

Although searches carried out at the Registrar General's Office revealed that the names Jean Elidor Figaro and Israel Figaro do not appear in the Name Index, analysis of the "*Case hypoth ecaire*" of Jean L eonel Figaro and Bertraud Figaro revealed that there is one plot of land for the Figaro family in Moka. Furthermore, analysis of the deed of sale TV 91 No. 5 dated 11<sup>th</sup> July 1866, Louis Etienne Figaro did acquire a plot of land of  $\frac{1}{4}$  *Arpent* at Flacq, '*Les Trois Ilots*', from Louis Hilaire Tagman, in consideration of a price of "*50 piastres*" and a portion of land of extent 2 *Arpents* at Moka as per TV 53 No. 20, transcribed on 14<sup>th</sup> April 1852.

When he passed away in 3<sup>rd</sup> July 1896, the plot of land has devolved on his heirs, namely his son Jean Elidor Figaro.

The Commission is of the opinion that the heirs may still initiate action, although they have not occupied the two portions of land purchased more than 150 years ago, through an Attorney/Surveyor, to try to retrace that plot of land which has a frontage of “32 *pièces sur le grand chemin de trois Ilots*” and the land of 2 *Arpents* at Moka.

\*\*\*\*\*

**CASE NAME: PRUDENT**

*TJC/ L/0130/PATRON MARIE JOSEPHINE born PRUDENT*

The applicant, Marie Joséphine Patron, *born* Prudent, lives at Elizabeth Ville, Baie Du Tombeau. She says that the NHDC has taken her out of her house and she is presently living at a relative's place. She is a widow. The house, she avers, belonged to her grandmother and, as such, is the heir and rightful proprietor of the house. At present, one Jack Désiré Laval Médon is living in the house. According to the applicant, the said person was a tenant but he has never paid her.

The Commission did searches in her case and came up with the follow analysis:

It appears that:

- NHDC had applied to the Judge in Chambers for a Writ Habere Facias Possessionem on 17<sup>th</sup> August 1998 against Joséphine Prudent.
- She resisted the application.
- In virtue of a judgment delivered on 6<sup>th</sup> April 1999, she was ordered to quit, leave and vacate the land of 3*Arpents* 66 by end of May 1999.
- She appealed against the said judgement.
- On 10<sup>th</sup> January 2001, in virtue of a judgement delivered by the Supreme Court, the appeal was dismissed.

The Supreme Court has already adjudicated upon the matter.

\*\*\*\*\*

**CASE NAME: REBET**

*TJC/ L/VF/0131/REBET (MRS)*

The applicant Rebet says that she is married since 1971; her husband has always worked at Les Salines, Black River, at a place commonly known as Domaine du Mont Calme. Her husband died in 2003.

She says that she actually lives on the property of the R.P.A de Ravel Company at Tamarin, Route Royale La Mivoie. The actual proprietors have tried to evict all the inhabitants living on the plot of land belonging to the de Ravel Company

The proprietors have asked them to leave the land giving as a pretext that the old huts erected there and occupied by applicant and other inhabitants, is an eyesore which devaluates the new “*Morcellement*”. It should be noted the proprietors have to go through this land occupied by the inhabitants to have access to the new “*Morcellement*”,

The applicant claims that the inhabitants are agreeable to the proposal of the promoters, but they are worried as the promoters want them to occupy a plot of land on lease based only on a verbal agreement. A deed will only be given to them after two years.

Now, applicant and the other inhabitants are at a loss.

The applicant Rebet says that she has in her possession all her electricity bills that she has paid since she has been living on the plot of land.

The Commission was keen to take up the case as applicant was requesting assistance.

On 5<sup>th</sup> August 2010, the Land surveyor and Senior Attorney of the Commission talked to the applicant on the phone. The Commission has thus been apprised that the matter has been settled and that the applicant does not wish to proceed any further with the application.

\*\*\*\*\*

**CASE NAME: AGATHE**

*TJC/ L/0133/VF/ AGATHE MARIE DENISE*

The applicant, Marie Denise Agathe, states that her mother’s name was Vélienne Agathe, her grandmother’s name Rosemay Agathe, and they are both deceased. She has four children. She submitted several birth and death certificates, with the wish that the Commission find out if she might have inherited any land somewhere in the country.

Searches were indeed carried out at the Conservator of Mortgages’ Office in the names of Roselmie Agathe and her late husband, César Agathe. Unfortunately, the two names do not appear in the Register of the Conservator of Mortgages.

\*\*\*\*\*

**CASE NAME: PAULIN**

*TJC/ L/0136/VF/ RAMSAY ELSIE MARGARETTE*

The applicant, Margarett Elsie Paulin, says that she is heir of Mylius Paulin and Georgina Paulin who each owned 2 *Arpents* out of a larger plot of 4 *Arpents* in the region of Rivière des Calebasses. She declares that it is possible that Georgina Paulin sold her part. The remaining 2 *Arpents* (Mylius Paulin’s part) is, according to applicant, still the family’s property. Applicant does not have any document but still remembers that her grandparents lived and stayed on the land before. At present, the land is unoccupied and some people are saying that they have prescribed the land and that it belongs to them. Applicant does not understand how these persons have been claiming the ownership of the land.

She wants assistance with research to understand what has really happened concerning the land and to get it back as well as to know its exact extent.

After analysis of the case from available Documents, it appears that applicant has not been able to read Document 10 submitted and does not know its content. Documents submitted at (10) and (11) do not reflect the portion of 4 *Arpents* as stated by applicant in her case summary. No Document testifies the relation of Adèle Paulin to Georgina Paulin.

Louis Mylius Paulin had acquired a plot of land at Rivière Calebasses, in the district of Pamplemousses, of the extent of 57 perches from one L.A. Sicard, as evidenced by title deed transcribed in Volume 324 No. 615 dated 11<sup>th</sup> September 1917.

According to TV 434 No.189 dated 5<sup>th</sup> July 1937, he sold 50 "*perches*" to A.Y Sham Yen. The heirs of Louis Mylius Paulin claimed that there is still a portion of land belonging to them at Calebasses.

However, TV 435 No. 66 confirmed that Louis Mylius Paulin has, in fact sold 57 "*perches*" of land and not 50 "*perches*" as mentioned in TV 434 No. 189. It must be noted that TV 435 No. 66 is in fact a rectification of TV 434 No. 189.

This being so, the heirs of Louis Mylius Paulin do not hold any property at Calebasses.

Moreover, as regards the land of 4 *Arpents* mentioned in the summary, this plot of land does not appear in the "*Case hypothécaire*" of Louis Mylius Paulin.

\*\*\*\*\*

### **CASE NAME: MURTHEN**

*TJC/L/0138 CHEDUMBRUM MOONEEAMAH*

Mooneeamah Chedumbrum claims that his family is the owner of a plot of land of 35 perches at Henrietta, Vacoas. On humanitarian grounds, they allowed one Mariaye Matchiapien to live on a part of their land of 507 m<sup>2</sup> where there was a small house made of wood and corrugated iron sheets. Without the consent of the Chedumbrum, she pulled down the house and constructed two new houses on the 507 m<sup>2</sup> without a housing permit.

In 1991, the case was brought to the District Court of Curepipe and later to the Supreme Court. Mariaye Matchiapien hired the services of Attorney K. Gungabissoon and the land was surveyed by Land surveyor Sureshing Bheehuspoteea. They made use of CEB & CWA bills and used one Claude Sardanam as a witness to claim the property of the land.

The Chedumbrum maintained that in 2006, they hired the services of Attorney K. D. Varmah to whom they paid Rs. 20,000 and Land surveyor Irsaad Nuckchady to whom they paid Rs 13,000. They later realized that both did nothing for the fees they had claimed. A case was lodged against them at Casernes Central and both were arrested. The Attorney and the Land surveyor returned the sum of money they took from the Chedumbrum and Attorney Varma withdrew from the case.

The Chedumbrum are from a modest background and have already spent Rs. 150,000 to regain back their land. They have 7 children who do not have any land property. One of their children is mentally retarded and they have to look after him. Both husband and wife are retired and they fear that due to lack of funds they would not be able to pay the new Attorney A. P. Mungroo whom they have hired as the case has been postponed for next year.

They request the Commission to get back their land by providing legal and other aids for this case as they have spent all their meager savings in their long struggle for justice without any results up to now.

The fact of the case is as follows:

Following a Division in kind drawn up by Sworn Land surveyor Randabel dated 2<sup>nd</sup> August 1921, it was attributed, amongst others, to Carpaye Murthen a portion of land of the extent of 35 perches at Henrietta, Vacoas.

According to a recent memorandum of survey carried out by Land surveyor Jeewa dated 8<sup>th</sup> April 2009, the land belonging to heirs Katpermal Chedumbrum and Mooneeah Chedumbrum has been formed to admeasure 1730 m<sup>2</sup>.

It is observed that Société Tamige Baroba GaraSangham has prescribed an extent of 436 m<sup>2</sup>, being the whole frontage along Henrietta Branch Road on 23<sup>rd</sup> October 1991 as per TV 2354 No. 62 by constructing buildings and a temple thereon.

MariayeMatchiapen and Moorooye Chedumbrum have made an attempt to prescribe an extent of 347.50m<sup>2</sup> on which stands the concrete building.

The prescription has been resisted by Mooneeamah Chedumbrum who has lodged an objection to the transcription of the affidavit.

It is not known how the Tamil Society has been able to prescribe 436 m<sup>2</sup> out of that plot of land. In fact the prescription is over an extent of 791.41 m<sup>2</sup>, as evidenced by TV 2354 No. 62.

The heirs of Carpaye Murthen have also lodged cases in the Supreme Court against Société Tamige Baroba Gara Sangham and against Moorooaye Murthen to quit, and vacate the premises and to pay damages for their illegal occupation. The case was scheduled to be heard sometime in 2011.

\*\*\*\*\*

**CASE NAME: GATEAU**

*TJC/L/0139/GATEAU MARIE MARLENE*

The applicant Marie Marlène Gâteau says that her son took a loan of Rs. 100,000 from Indian Ocean International, mortgaging her house. She is of opinion that she has already paid back the loan but according to the bank, she has not reimbursed that sum of money. Her house and her land have been seized.

The case was referred to Court by IOIB since the applicant has refused to accept the fact that she has not repaid back the loan. She says that she has paid a large sum of money to one Abbasakoor, Lawyer, to defend her case, but nothing has come of it. Every time her case is being postponed.

The Commission has looked into this matter. The case of “*Sale by levy*” is pending before the Master’s Court.

\*\*\*\*\*

**CASE NAME: CHARMANTE**

*TJC/ L/0140/LOUYAVA MARIE ADRIENNE*

Marie Adrienne Louyava, *born* Soopaul says, that there are four heirs on her mother’s side (Olivier Charmante, Manoir Charmante, Lixen Charmante and Noélida Charmante) Noélida Charmante. The four heirs possess a plot of land of 2 A 80 perches at Bambous. The applicant says that her step brothers named Cyril Sewpaul, built a pig pen on that plot of land which was unoccupied in 1992, while her other step-brothers Lewis, Jean-Claude Suzana, Mario Perrine and Marc Maccabla have built their houses on that plot of land belonging to the four above-mentioned Charmante heirs. It is to be noted that the heirs who have undertaken construction on that plot of land and herself have the same father but come from different mothers. Marie Adrienne Louyava’s cousin entered a case in Court in 1992. The Charmante family lost their case when the Court its verdict in 1998

The family appeals to the Commission to investigate the case presented in Court in 1998 and want the restitution of the plot of land.

The Commission has been made aware that there is a case pending before the Supreme Court. It appears that the case is scheduled to be heard in 2011, no precise date has been given to the Commission. In view of the fact that there is a case now pending before the Supreme Court, the Commission cannot entertain the application.

\*\*\*\*\*

**CASE NAME: TAKEN**

*TJC/ L/ / 0143/TAKEN MICHEL SALONI*

The applicant, Michel Saloni Taken, says that his father bought a plot of land of 9 perches at Route Palma, avenue Casquette, Quatres-Bornes from one Parsad. He built a house there. Next to this house was found another small plot of land which her father had also bought. The applicant declares that her father paid the full amount of money to Parsad and his son- in- law. However, no official document was signed regarding this transaction.

After the death of Parsad and applicant's father, Parsad's son-in-law decided to sell the small plot of land which applicant's father had already paid for, thinking that there was no heir to claim the land. Applicant declares that, now, the son-in-law does not want to sign the papers to finalize the sale of the land.

The Commission finds it very difficult to intervene in such a case and could not go any further as there was neither a deed of sale nor any "*promesse de vente*".

\*\*\*\*\*

**CASE NAME: AUNACHA**

*TJC/ L/0144/AUNACHA DENWANTEE & TEERWANTEE*

Denwantee and Reerwantee Aunacha, the applicants, declare that they are the heirs of Runglall Aunacha who bought a plot of land together with Jeebun Luckheea on 25<sup>th</sup> April 1916. The plot of land was of an extent of 1 *Arpent* 15 perches and is found in the district of Moka, Quartier Militaire, Providence. Each of these two persons owned half of the 1 *Arpent* 15 perches. The land has been shared among the heirs of the Aunacha family and the Luckheea family. The applicants' parents acquired the service of Land Surveyor Tupsy to survey the land in 1998. The family acquired the services of Attorney Charles Laval to make the sharing of the inherited land among the Aunacha family but he died without giving any documents to the family. According to the applicants, Charles Laval worked together with Attorney-at-law Gungabissoon but the latter has been suspended from his function and they have not been able to get any information from him. The family declares that actually three houses have been built illegally on their inherited land.

As per the file deposited at the Commission, it is revealed that document from the Supreme Courts reports to the sharing of 1 *Arpent* 15 perches among heirs of Aunacha family and of Luckheea family on 22<sup>nd</sup> July 2002 and 31<sup>st</sup> January 03.

Following a division in kind before the Master and Registrar of the Supreme Court on 24<sup>th</sup> February 2003 transcribed in Volume 5186 No. 20, heirs Basmatteea Aunacha and heirs Arjoon Aunacha were attributed in joint ownership 2 portions of land at Providence, Quartier-Militaire, viz:

- Lot 5A of an extent of 608m<sup>2</sup>
- Lot 5 of an extent of 1674.70m<sup>2</sup>.

Both plots of land have been at Rs. 540,000 which is equivalent to their share in the succession of Runglall Aunacha. In support of their complaint, the applicants have produced copies of building permits in the names of Dewantee Mungroo and Anouradha Jeehun and Soba Luckeea.

It appears from paragraph (4) of Folio (2) that the mother of Rajen Luckeea, Taramatee Dookun, has, in March 1998, prescribed the above plot of land of extent of 4642.96m<sup>2</sup> which was the subject of the above division in kind.

If the averment at paragraph (2) above is correct, the applicants have a strong case against the 3 squatters.

When they presented themselves at the Commission on 26<sup>th</sup> July 2010, Denwantee and Teerwantee Aunacha were informed that Soba Luckeea had put up her house on the plot of land attributed strictly to heirs Basmatteea Aunacha and heirs Arjoon Aunacha.

It seems that Soba Luckeea has put up her house on the strength of the prescription made by her mother in 1998 and has completely disregarded the division in kind ratified by the Supreme Court on 24<sup>th</sup> February 2003.

On the one hand, the Commission is of opinion that there is thus a need to declare null and void the prescription of the plot of land of extent of 4642.96m<sup>2</sup> as per TV 1873 No. 56 dated March 1988. There is also a need for the heirs Basmatteea Aunacha and Heirs Arjoon Aunacha to have the 2 plots of land lot 5 and 5 *Arpents* subdivided among their respective heirs with a view not to remain in "indivision".

The Commission is also of opinion that the only avenue opened to the applicants is to go before the Supreme Court to pray that the affidavit of prescription be declared null and void.

The applicants have been advised that as for financial assistance, they should apply for legal aid at the level of the Supreme Court.

\*\*\*\*\*

#### **CASE NAME: LEMASSON/ORANGE/NETTA**

*TJC/ L/0145/NETTA GEORGE JOSEPH*

The applicant's wife, *born* Marie Michelle Orange, now deceased, inherited from great-great-grandfather Gabriel André Lemasson, a plot of land of extent of 27 *Arpents* 52 perches at Bras de Mer, Le Bouchon bought from one Foisy on 27<sup>th</sup> July 1836. This land has been obtained by Foisy through a "concession".

The land, though unoccupied and covered with forests, remained the property of the Lemasson family. People have been occupying illegally the land for some seven years before the applicant decides to start procedures to recover the land. An affidavit was sworn in.

A request was made to the Ministry of Agro Industry & Fisheries to demarcate the private land from "Pas Géométriques". A site visit was then made by Officers of the Forestry Department. A reply was sent on 16<sup>th</sup> January 2006 whereby the Ministry of Agro-Industries stated that the applicant's family is the rightful owner of the plot of land. The applicant was asked to look for the services of a private surveyor to have his land surveyed. No surveyor has agreed to do the surveying.

After searches carried out by the Commission, The facts state the following:

- The 27 *Arpents* 52 was the property of Jacques Nicolas Foisy who obtained same through a concession.
- Foisy sold half undivided rights (1/2 indivis) in the portion of the land to André Gabriel Lemasson (*usufruit*), Jeanne Adèle Macquart (*usufruit*) and Joseph Dominique Lemasson

(*nue propriété*), Josephine Lemasson (*nue propriété*), as evidenced by the title deed transcribed in TV 35 No. 99.

- According to a title deed drawn up on the 6<sup>th</sup> December 1844, the remaining undivided rights (13A 76) were sold by the heirs Foisy to Isidore Charles Adolphe Collet. (“*Répertoire*” 12 No. 203)
- According to a survey carried out by E. Millien on 23<sup>rd</sup> October 1917 and 9<sup>th</sup> September 1918, the land acquired under (ii) was found to be 12 *Arpents* 76 made up of 9 *Arpents* 76 perches and 3 *Arpents*.

A “*Mise en demeure*” was served to (i) Sunway Estates Limited and (ii) Vijawtee Lutchigadoo requesting both of them to: (a) refrain from parceling out the aforesaid portion of land; (b) to reinstate the land to its original state; (c) to remove all buildings materials, etc. and (d) to refrain from entering the land and interfering with the peaceful enjoyment of the heirs.

From the Documents mentioned above, there is no evidence that G. André Lemasson purchased 27 *Arpents* 52; actually, he purchased usufructuary rights in one half of the land which were transferred to the children, Joseph Dominique Lemasson and Josephine, on his death. The memorandum of survey drawn up by Edgard Millien indicates the breakdown of the 5 *Arpents* 38 attributed to Josephine in two lots 2 *Arpents* 84 and 2 *Arpents* 04.

The Commission has now been made aware that the applicants have retained the services of Land surveyor R. Bhurtun to carry out a survey of their land of 27 *Arpents* 52 perches at Bras De Mer, Le Bouchon. Some occupiers have objected. The Commission is in the presence of R. Bhurtun’s Report.

Furthermore, a case had been entered against the said Land surveyor.

It appears that the applicants have retained the services of Harold Lam Shang to enter a case before the Supreme Court. George Joseph Netta has apprised the Commission that his case was scheduled before the Supreme Court on 16<sup>th</sup> February 2011.

\*\*\*\*\*

**CASE NAME: AUCHOMBIT**

*TJC/ L/0146/JOSEPH MARIE ROLANDE*

Marie Rolande Joseph writes that her great-great-grandfather came to Mauritius as an Indian Indentured labourer, and was registered as Auchombit No. 272742. Her grandfather was Sawdaghar Auchombit who, after his death, left two heirs, one son and one daughter. Louis Rolland Auchombit, the son, was the applicant’s great-great-grandfather, owned a plot of land of 1 *Arpents* 17 perches at Nouvelle Découverte. Her father told her that there was a well on that land from which the indentured labourers used to fetch water. She remembers that when she was still a child, her parents went to visit the plot of land. According to her, the land is at present unoccupied.

The applicant came to the Commission to ask for the restitution of the plot of land to her family and also needed assistance in the research procedures related to legal papers such as land contracts, etc.

Searches undertaken by the Commission reveal that “*Répertoire*” 117 No.129 indicates that Auchombit No 272742 was in fact the owner of a plot of land of extent 1 *Arpent* 17 perches at Nouvelle Découverte, Moka, as evidenced by TV 151 No. 251.

As there has not been any sale evidence in the “*Répertoire*”, it is assumed that heirs Auchombit 272742 are still the owners of the 1 *Arpent* 17 plot at Nouvelle Découverte.

The heirs have been advised to contact a private surveyor to carry out the works of identifying the land and drawing up a survey report and to start occupation as soon as possible, after the needful has been done.

\*\*\*\*\*

**CASE NAME: MEDAR**

*TJC/ L/0148/MEDAR JACQUES*

Jacques Médar, the applicant, says that his elders often related that they owned a plot of land of extent of 99 perches at Hermitage. The land had been completely neglected by his elders. He says that approximately 35 years ago someone took the land and started the cultivation of sugar -cane. His grandfather, Gaby Médar, told him also that the land belonged to him. His grandfather even put the case in Court. But according to applicant, on the very day set for the hearing of the case, the man occupying illegally the land paid Gaby Médar’s friends to make him take alcoholic drinks. The result was that he could not attend the Court’s hearing. Since that incident, the Médar family has not undertaken any action to get back the land due to financial difficulties. The applicant wants to have documents concerning the land and, the help of the Commission, to give legal assistance to get back the land.

In spite of several attempts made by the Commission to invite Jacques Médar to interviews and try to retrieve documents or to obtain more information from him, this was totally unsuccessful as both telephone numbers given by the applicant were wrong.

\*\*\*\*\*

**CASE NAME: BALISSON**

*TJC/L /0149/ FIERJAUN JIMMY DESIRE*

Jimmy Désiré Fierjaun, the applicant, says that his great-grandfather, Ernest Balisson bought a plot of land of 94 *Arpents* at Rivière-du-Poste. When he died, his family was neither aware of nor able to retrace, the exact extent of the land he owned. The applicant affirms that he had recourse to an Attorney and a Notary but he is now fed up with these long lasting procedures which according to him, even after 12 years, has given no results.

Jimmy Désiré Fierjaun went on site 2 to 3 times; he had recourse to the service of a Land surveyor who was able to situate the land only approximately. The applicant states that the State Investment Trust was launching a “*Morcellement*” process not far from the plot of land. Due to the unknown extent of the land, he does not know whether they are occupying his plot of land or not. But according to him, the limits of the land are in the surroundings of the Balissage Sugar Estate, Britannia Sugar Estate and Joli Bois Sugar Estate.

The applicant further submitted another claim purporting on a plot of land of approximately 126 *Arpents* at Rose-Belle, as he does not know the exact extent of land inherited by his grandfather.

He requests the Commission to investigate on the exact limit of the land bought by Ernest Balisson and to determine whether the land has been illegally occupied. He wants a restitution of the land and compensation.

Jimmy Désiré Fierjaun also avers that as heirs of the Clarisse family, he should have a share in a plot of land in Grand-Port.

#### **Case 1**

The Commission called in Jimmy Désiré Fierjaun to give further details and information on the case. After perusal of all the documents and according to a deed under private signatures dated 11<sup>th</sup> December 1848, the Belleville 'sold' to Ernest Charles Balisson a portion of land of 94 *Arpents* 20 at Grand-Port for the sum of Rs. 1,268 as evidenced by TV 49 No 24. However, after an analysis of the "*Case hypothécaire*", it appears that an inscription for the sum of Rs. 1,268 was taken on the very same day, that is, 11<sup>th</sup> December 1848 and inscribed in TV 64 No. 333 in favour of one Belleville. The deed under signatures, it is stated that the sale was made under conditions to the effect that approval should be obtained as the other co-owners were minor children of the Belleville. The amount due has not been paid as the inscription has not been erased.

The Commission is of the opinion that both vendor and purchaser have not fulfilled the conditions of the sale. One has not obtained the authorization as regards the minors; the other has not paid the purchase price. Consequently, the sale may have been annulled and her Belleville has taken back the land.

#### **Case 2**

According to "*Répertoire*" 21 No. 442, it appears that Ernest Balisson sold  $\frac{1}{4}$  undivided rights in the 106 *Arpents* situated at La Fôret, Grand-Port. There is no indication as regards the  $\frac{3}{4}$  undivided rights. In view of lack of precise information no further investigation could be made.

\*\*\*\*\*

#### **CASE NAME: CHARLOT**

*TJC/L/0150/CHARLOT JEAN MARC*

Jean Marc Charlot, who deponed before the Commission, relates that Camp Marcelin is a village locked in a sugarcane field under the authority of Constance La Gaité with access routes to Quatre-Cocos, Camp Ithier and Isidore Rose.

He says that all the inhabitants of Camp Marcelin are either linked by blood or by marriage. Some choose to leave the village but always have the possibility of returning home. No stranger can come to leave in the village unless s/he gets married to one of the village's inhabitants.

The inhabitants recognize that each one of them has the right to settle in the village with neither the obligation to purchase land nor any monetary transaction or exchange of any kind. One becomes land owner in Camp Marcelin by birth. All this result from a strong oral tradition that says:

- That all the inhabitants have Marcelin Charlot as ancestor.
- That the said Marcelin Charlot was a big landowner with one Desjardins and one Nozaic as immediate neighbours.
- That the said Marcelin Charlot presumably gave to his lineage as heritage his property, his lands, representing a portion of 800 *Arpents*.

- That the descendants of the said Marcelin Charlot have been dispossessed of the largest part of the land they had, leaving only the actual village of Camp Marcelin, thus explaining the unique and particular geographical position of the village.

The applicant explains that the consequences are:

- that the descendants of the said Marcelin Charlot have developed and still have ways of living resulting from this isolation and which further deepens this isolation (intermarriages within the family);
- that the descendants of the said Marcelin Charlot have suffered huge moral and legal prejudices and make a request to the Commission for reparation by:
- helping in the reconstruction of their family tree from Marcelin Charlot;
- assisting to trace back the complete surface area of the land and property of Marcelin Charlot and the related original Documents; and, by
- assisting them with the help of researchers, land surveyors, notaries or other legal professionals.

Searches undertaken at the Registrar General's Office have revealed that Marcelin Charlot was the owner of a plot of land of an extent of 12 *Arpents* at Quatre-Cocos. A plot of 2 *Arpents* has already been sold and the remaining land is still in the name of the Charlot.

\*\*\*\*\*

### **NAME CASE : L'AIGUILLE**

*TJC/ L/0151/L'AIGUILLE JEAN JOSÉ  
CROSS REFERENCE: ESPIEGLE LOUIS PHILIPPE TJC/L/0189  
GOURANNA JACQUES LAVAL TJC/L/VF/0155.*

Jean José L'Aiguille, the applicant declares that his grandmother, Marthe Anodin married to one L'Aiguille told him that the Espiègle family owned a plot of land at Saint - Paul, Plaines Wilhems. Françoise Provençale and Georgina Labonté chose Victorine Espiègle as their only heiress through a *testament olographe*. On 4<sup>th</sup> July 1856, on the death of her father, Françoise Provençale became the only heiress.

The applicant also adds that he is a descendant of the Espiègle family. He wants the Commission to investigate so as to know the exact extent of land that Françoise Provençale owned.

Neither the "*testament*", nor a survey plan has been submitted to the Commission. From perusal of the "*Répertoire*", no plots of land in the name of the family still exist. There is no plot of land in the deeds which speak of St Paul, Plaines Wilhems. There is no *testament olographe* from Françoise Provençale and Georgina Labonté to support Victorine as the only heiress.

But, according to searches carried out by the Commission at the Mortgage Office, it appears that the land of 2 *Arpents* at Plaines Wilhems have been sold as per deeds transcribed in Volume 92 No. 261, Volume 92 No. 239 and Volume 103 No. 248.

Mention of a *testament olographe* has been made by applicant but no copy has been produced. This testament is the basis of the claim and is very important to process the application concerning the other portions of land.

Jean José L’Aiguille presented himself at the Commission at the end of July 2011. A formal request was made to him by Commissioner Jacques David and Land surveyor M. Bahadoor of the Commission, to produce a copy of the testament as soon as possible. He promised to do the needful. But, he never returned. Therefore, the Commission did not proceed further.

\*\*\*\*\*

**CASE NAME: BOODENY**

*TJC/ L/0152/ BOODENY ROOKMEEN*

The applicant, Rookmen Boodeny, wrote a letter on behalf of late Heeralall Boodeny & Boodeny heirs, to the Chief Executive Officer of Grand Port Savanne District Council - a copy of which she has sent to the Commission, to complain about a Development signpost displayed by one Biness Bhadoo or Budhoo, on a land she claims to be hers, situated at Comblone Road, Nouvelle France.

She maintains that she has acquired the said land through legal & normal procedures issued by the Grand Port Savanne District Council, as per the Development Permit No. 14661 on 17<sup>th</sup> May 1991. The land in question had been occupied by Sohun Boodeny, the father-in-law of the applicant, since 1945.

In this letter, she appeals to the Grand Port Savanne District Council to take legal action against the same Biness who, being the Secretary of the Arya Samaj, and owner of Comblone Restaurant, is using her land illegally as parking for his restaurant and carry out social activities as an Aryasamajist without the Boodeny’s approval or consent. She further claims that her family is intimidated by people whenever they carry out any business on the land and that all “*Trepass boards*” which they placed on the electric poles have been removed and thrown away within hours of them leaving the site.

Even if this is not a case of dispossession, the Commission looked into the matter as this might result effectively into a way to dispossess the Boodeny of their land through an abuse of power.

It is confirmed that through a Title deed transcribed in TV 4167 No. 4, dated 30<sup>th</sup> July 1999, a division in kind established and allocated to the Boodeny Family of Comblones Road, Nouvelle France, in the District of Grand Port. Rookmee Boodeny, wife of late Heeralall Boodeeny, is the owner of the land situated in this area

In spite of letter sent to different authorities of the country relating to this case, everyone has turned a deaf ear.

Rookmeen Boodeny has been advised to seek the help of a Land surveyor to carry out a proper survey and take relevant action in the light of the findings of the surveyor. The only remedy is to enter a Court case.

\*\*\*\*\*

**CASE NAME: GOURANNA**

TJC/L/VF/0155 GOURANNA JACQUES LAVAL  
 Cross reference : TJC/ L/0151/L'AIGUILLE JEAN JOSÉ  
 TJC/L/0189 ESPIEGLE LOUIS PHILIPPE

Jean José L'Aiguille, the applicant, declares that his grandmother, Marthe Anodin married to one L'Aiguille told him that the Espiègle family owned a plot of land at Saint-Paul, Plaines Wilhems. Françoise Provençale and Georgina Labonté chose Victorine Espiègle as their only heiress through a testament "*olographe*". On 4<sup>th</sup> July 1856, at the death of her father, Françoise Provençale became the only heiress. At the death of Françoise, Victorine Espiègle became the only heiress.

The applicant also adds that he is a descendant of the Espiègle family. He wants the Commission to investigate so as to know the exact extent of land that Françoise Provençale owned.

In spite the fact that no survey plan was submitted, from perusal of the "*Répertoire*", made by the Commission, no plot of land in the name of the family still exists. There is neither plot of land in the deeds which speak of St Paul, Plaines Wilhems, nor any "*testament olographe*" left by either Françoise Provençale or Georgina Labonté to support Victorine as the only heiress.

The land of 2 *Arpents* at Plaines Wilhems have been sold as per deeds transcribed in Volume 92 No. 261, Volume 92 No. 239 and Volume 103 No. 248.

The *testament olographe* mentioned by applicant -but no copy produced- is the basis of the claim and is very important for any process concerning portions of land.

\*\*\*\*\*

**CASE NAME : TOULET**

TJC/L/0153/CHARNIERE JEAN MICHEL

The applicant, Jean Michel Charnière, claims that he is one of the heirs of Paul Toulet who came to Mauritius in 1869. The later bought various plots of land in Mauritius and on his death; according to Charnière, he left 500 *Arpents* at Rouge Terre and 25 *Arpents* at Midlands.

The family requests the Commission to investigate on land sold and unsold and to assist them for eventual restitution, to carry out research for Documents on land at Civil Status Office and assist them in restitution and compensation to the heirs of Paul Toulet.

In support of the claim, Jean Michel Charnière submitted some extracts of Birth and Marriage certificates and copies of 5 "*Cases hypothécaires*".

Although he submitted a survey report drawn up by Sworn Land surveyor Charles E. Ribet, dated 28<sup>th</sup> December 1869, in respect of the site of an extent of 500 *Arpents*, he could unfortunately not identify the plot of land. After a whole day of '*reconnaissance*', the Commission finally spotted the land.

The applicant laid a second claim at the Commission as to the fact that his great-great-grandfather, Jean Joseph Charnière bought a plot of land of 25 *Arpents* from Runjoo and Sunjeelee in the surroundings of Midlands. The applicant had great difficulties in situating the exact location of the land and wants the Commission to investigate and assist in locating the land so that the land be restituted.

Charnière main claim rests on title deed TV 145 No. 10 “*Répertoire*” 42/33 and “*Répertoire*” 4/301 respectively where it is reported that Paul Toulet did acquire 500 *Arpents* from E. de Chazal and George Clifford Mayer in consideration of a price of \$ 25,000.

An in-depth investigation and search reveal the following;

- While TV 145 No. 10 dated 3<sup>rd</sup> March 1882 indicates on one side occupied by Evénor de Chazal to Paul Toulet, Adrien Toulet and André Legreta, however, TV 11 No. 15, dated 5<sup>th</sup> August 1881, indicates a 2-year lease to expire on 15<sup>th</sup> August 1883 with option of renewal at a monthly rental of Rs. 350 for the 500 *Arpents* plot.
- As regards, TV 145 No. 10, there is a ‘*privilege inscription*’ as per CH 305/11 burdening the land to the tune of \$ 17,000 in favour of E. de Chazal and Mayers which inscription has not been erased.

As regards his claim of 25 *Arpents*, which supposedly had belonged to Jean Joseph Charnière at Midlands, searches undertaken by the Commission at the Registrar General’s Office have not revealed the existence of such plot of land.

In the light of the above, the heirs of Paul Toulet have no claim on the 500 *Arpents* of Rouge Terre.

In fact for the period 1883 to 1906 the Toulet family sold 23 plots of land around the island.

\*\*\*\*\*

**CASE NAME: MOOLCHAND**

*TJC/ L/0156/MOOLCHAND PURVURAM PRANNATH*

This file deals with eight cases submitted by the applicant, Purvuram Prannath Moolchand for plots of land in the region of Midlands having belonged to his grandfather, Lochund Moolchand; and his request is for the cancellation of the prescription of lands and their recovery to the family. A lot of documents were handed over to the Commission.

The summary of all claims and specific requests are thus listed:

**Case 1**

Lochund Moolchand, applicant’s grandfather, possessed some portions of land in Midlands. Most of the land was reserved for hunting; a small portion was cultivated.

One Issack Bulaty, a neighbor, was granted permission by applicant’s uncle, Ragoobeer Moolchand, to cultivate some creepers on a portion of land. The uncle often visited the land and was given a rent which has been agreed mutually. R. Moolchand could not visit the land for quite a long time due to illness. He then passed away.

When applicant afterwards visited the land, he was forbidden to do so. Bulaty informed applicant’s family that the land was his property. The land was prescribed in September 1990 and sold to the children (Documents submitted). A protest was lodged by late Mewachand Moolchand to the Land Fraud Squad in 2002.

Mr. Moolchand averred that Saveetree Jaggernath, who stood as witness for the prescription, declared to applicant that she was misled as she was told by Bulaty that he was going to purchase a piece of land and to stand as witness for that transaction. The lady had given that statement to the Land Fraud Squad.

On the death of Mewachand Moolchand, the Land Fraud Squad did not proceed further.

The applicant says that he made a fresh statement to the Land Fraud Squad. When Issack Bulaty passed away, the case was dropped by the Land Fraud Squad.

A case was entered in Court. It was struck out by the Court as Bulaty passed away. For lack of funds, the applicant says that he could not proceed further as he has already spent much money.

He requests the Commission to recover the land prescribed by Bulaty.

#### **Case 2**

Jadoonanun Bokhoree, a neighbor of Lochund Moolchand, has prescribed part of the plot of land belonging to the Moolchand (Documents submitted). A notice was served by applicant's Solicitor to stop the prescription. The case was heard in Court. As the applicant's Solicitor did not attend the Court, the case was stuck off in favour of Bokhoree.

The applicant requests the Commission to recover the land prescribed.

#### **Case 3**

One Bullywont Chatargoan caused the land belonging to Lochund Moolchand to be surveyed and leased it to Sanjiv Khedoo of Cluny. A new neighbour of Lochund Moolchand has witnessed by a deed that the land belonged to Lochund Moolchand. Furthermore, the applicant had the land surveyed to prove that it belonged to the Moolchand family and submitted a site plan locating the real plot of land of owned by Chatargoan.

#### **Case 4**

Jagroop family owns a plot of land of 1 *Arpent* at Midlands, cultivated with sugar-cane. At present, Ram Jagroop's grandson is using his land deed to occupy various plots of land not belonging to him. The Moolchand family had a survey of the land as a proof of the location. The Sugar Insurance Fund Board can locate the land of Jagroop family as it was planted with sugar cane.

#### **Case 5**

A member of Moolchand family authorized one Deokeenanand Pohiet (related to Moolchand) to occupy a piece of land as the latter was physically handicapped. In 1981, the lease was officialised for a period of 9 years. In 2001, the Moolchand family intended to proceed with a division in kind among heirs. Deerpuh Gokhool, lawful wife of eokeenanand Pohiet, refused to vacate the land. Afterwards, she prescribed the land.

The applicant made a request to the Commission to help him cancel the prescription and to recover the land.

#### **Case 6**

The late Deonarain Ramessur rented a plot of land of 1 *Arpent* 17 neighbouring the Moolchand's land. The land was cultivated with sugar cane and as it was surrounded by wasteland, monkeys attacked his plantation. Mewachand Moolchand was asked to clean a piece of land planted with some "*fatak*" to stop the monkeys' attacks. Ramessur agreed to pay a yearly rental of Rs 200. In 2003, the Moolchand family did not ask him for the rent as he was not in good health but he agreed to vacate the land when required. He was ready to leave the land but passed away. On the death of Deonarain Ramessur, his wife refused to vacate the land insisting that the land belonged to one Caleemoutou. But Caleemoutou had, years before, sold the land to Lochand Moolchand.

The Moolchand requests the Commission to intervene in order that the Ramessur to vacate the land.

#### **Case 7**

In the fifties, Sewnundun Ramundun was given a piece of land and materials by the Moolchand family to build a shelter as he was very poor. He paid a token rent of Rs. 8.00 yearly.

Now Ramundun has prescribed the land.

The case went to Court and Ramundun won his case. The Moolchand, having no funds to pay their Solicitor who stepped down as he was partly paid, could go no further in this case.

They want to recover the land.

**Case 8**

Pargasing and Takoorduth Balluck were neighbours of Taukoordoyal Moolchand. At the latter's death, the Balluck brothers prescribed Moolchand's land. The Land Fraud Squad made a visit on the land and found it in a wild and bare state.

In this case also, they want the Commission to stop all prescription procedures, to recover the land.

**Case 9**

One Hum Ting Sang has leased a plot of land from Mewachand Moolchand as from the 22<sup>nd</sup> December 1974. He paid a yearly rent of Rs. 100.

In the fifties, the Moolchand family was running a shop on the same land; it was destroyed in 1960 by cyclone *Carol*. Since then, the land has been rented to various persons and to a religious association.

Now Hum Ting Sang is claiming that his family has been occupying the land since 1946 which, according to applicant, is a false statement. He has entered a case in Court. The trial was scheduled to be heard on 18<sup>th</sup> March 2010.

The Moolchand family requests the Commission to stop all legal procedures and to recover the land. The applicant says that he has no funds to go to Court; even the lawyers have only been partly paid.

**Case 10**

Tankoordoyal Moolchand owned a plot of land of 50 perches at Bois Rouge, Pamplemousses. The land was leased to Foolmateea Seetohul, wife of Razdeo Rampergass Seetohul for sugar cane cultivation for a period of 7 years (1980-1987) and the lease was renewed. Seetohul witnessed the lease. At the end of the lease, Seetohul refused to vacate the land. He entered a case in Court. There was no follow-up. Rampergass Seetohul has now prescribed the land.

The Moolchand wants to stop the prescription procedure and to recover the land.

The Commission went into the details of each case and noted:

- The Notarial deed dated 21<sup>st</sup> February 1923 tendered by the applicant in support of his claim is in respect of twelve portions of land situated at Bananes whereas the lands mentioned in the cases are all referred to as being in Midlands.
- There is no family tree nor any affidavit to indicate the relation between the late Lochund Moolchand and the applicant, Purvuram Prannath Moolchand.
- The Land Fraud Panel Squad set up at the Police Department has been made aware of at least some of the cases, but it is not known what action has been taken.

After analysis, the Commission has reached the following conclusion:

**Case 1**

- It is observed that the land, subject matter of the prescription, is located at Midlands whereas the 12 portions mentioned in the title deed of Lochund Moolchand are all described as lands located in Bananes.
- Bananes Village is sandwiched between Midlands and Cluny. It lies partly in Grand- Port and partly in Plaines-Wilhems districts.
- The description of the land prescribed defines an area occupied and is not necessarily the same as the boundaries of the original plot of land nor is it necessarily of the same extent.
- The Commission is of the opinion that Purvuram Prannath Moolchand should relate the property of his forefather to the land prescribed and to seek to redress through a Court action if he can prove that the land prescribed and the land owned are one and the same land.

**Case2**

- It is observed that while Prannath Moolchand called at the Commission and spoke about land belonging to his forefather. Yet in the document submitted it would seem the land is said to belong to Hewachand Moolchand. The rights of Prannath Moolchand Moolchand in the land have been established.
- In any case, it would seem that there has been an objection to the transcription of land.

**Cases 3 to 8**

Prannath Moolchand called at the office of the Commission on Wednesday 14<sup>th</sup> April 2010. He has sought the services of a Surveyor, M Ramlakhan, to sort out the matter related to his portions of land at Bananes. The Commission drew his attention to the doubt on the actual location of these lands, i.e. Bananes/Midlands and explained to him that any defect in his title deed should be cured by a proper memorandum of survey.

**Case 9**

- There is no doubt that the 598m<sup>2</sup> forms part of the 35 perches, that is, 1477.30m<sup>2</sup>.
- While Prannath Moolchand who submitted the case to the Commission, has tendered a document as the Title deed for the family land, yet in a defence plea submitted to Court, another deed transcribed in Volume 790/71 is mentioned.
- Since a Court case has been initiated by the Heirs Hing Tim Sang, no further action is required on the part of the Commission.

**Case 10**

- In brief, the Moolchand are implying that by the action of Basdeo Seetohul, they are being dispossessed of their property.
- It should be observed that in terms of Prescription Act, the Moolchand had three months as from the date of publication in the *Gazette* to object to the transcription of the notice. Apparently this has not been done.
- In the circumstances, their only recourse is to lodge a case in Court for:
  - a) Decreeing that they are the lawful owners of the land "*in lite*" and
  - b) That the affidavit of prescription is declared null and void.

However, to succeed in Court, the Moolchand will have to prove their ownership rights but also the land which is the subject-matter of the prescription and the one claimed by them is the one and same land.

\*\*\*\*\*

**CASE NAME: UNJORE**

*TJC/L/0157/UNJORE KHEMRAJSINGH*

Khenrajsingh Unjore, the applicant, claims that he has been leasing a plot of land for sugar cane cultivation, situated at Beau Vallon/ Petite Cabane/Camp de Masque Pavé from one Sookasseeah Seesum since 1997. The first lease expired in 2006 and the second one runs from 2006 to 2015. He is registered at the Sugar Insurance Fund Board.

The applicant declares that one Beedeea Parcaass Ramdany, who owns a plot of land next to applicant's leased land, claimed that he has bought this land from Seesarrun and that the entire sugar cane plantation belongs to him. Ramdany, adds the applicant, has been harassing him and

even went as far as to intimidate and threaten him in 2008. He took the liberty of harvesting Unjore's sugar canes.

According to applicant, Ramdany lodged a false complaint against him and the matter was brought to Court at the Flacq District Court, to successively reach the Intermediate Court and finally the Supreme Court. According to applicant, when he went to Court, Ramdany refused to recognize that he assaulted the applicant. The matter was dismissed.

In the opinion of the Commission, the claim of land by applicant (who is only the lessee) and the land claimed by Ramdany are two different portions of land. It is for the heirs and successors of Sookasseeah Seesum, who are the landlords, to identify their property and initiate whatever action is called for to preserve their rights and those of the lessor.

Further searches have revealed that there are only two judgments of the District court of Flacq. There is no document concerning the cases before the Intermediate court or Supreme Court, as reported by the applicant.

\*\*\*\*\*

#### **CASE NAME: LARIDAIN**

*TJC/L/0158/BERTHELOT LOUIS ROLAND & others*

According to the applicants Gisèle Berthelot and Louis Roland Berthelot, their mother, Juliana Laridain was born in Chamarel. Their mother was not the sole owner of the plot of land of an extent of 37 *Arpents* in Chamarel as it belonged to all the heirs of Laridain consisting of descendants of Abel Laridain, father of Juliana, and Henri Laridain, brother of Abel. The plot of land was leased to the Bel Ombre Sugar Estate by the heirs Laridain. Each year, Bel Ombre Sugar Estate paid a rental to the heirs Laridain. Both applicants aver that their mother never saw the colour of the money, as Henri Laridain was the only person who received the money. Gisèle and his brother, Louis Rolland, Berthelot remember that Henri Laridain told their mother that the title deed was in his possession.

After the death of their mother in 1976, the widow of Henri Laridain with the help of Marcel Laridain, the eldest son of Henri Laridain prescribed the land. All the official land documents are actually in the possession of Marcel Laridain. In 2001, Gisèle Berthelot went to see Marcel Laridain. She told him that the heirs of Abel Laridain wanted their share of the plot of land, the latter told her that he had already prescribed the land. He gave her a site plan and told her that she will have to make a lot of legal procedures in order to recover her share.

Both Gisèle Berthelot and Louis Roland Berthelot request the Commission for Legal Assistance in order that the heirs of Abel Laridain could have an equitable share of the land among the heirs of Abel and Henri Laridain and also live on the land.

Marcel Laridain was called by the Commission to explain the whole affair and to say if, indeed, he received the rent from Bel Ombre Sugar Estate. While deponing, under oath, he maintained that that was never the case and was not aware of any land belonging to the Laridain family in the region of Chamarel.

In December 2010, Louis Roland Berthelot sent to the Commission a copy of the *Government Gazette* dated the 4<sup>th</sup> December 2010 concerning the prescriptions of two portions of land by Louis Marcel Laridain and Cyril Louis Laridain. The Commission tried to obtain a copy of the site and location from the Clerk of Senior Attorney, Cyril Huët de Froberville, under whose signature the prescription notice was published. His Clerk refused to give a copy to the Commission. Finally, Land Surveyor Seebaruth was contacted and he submitted the site and location plan as well as the Survey Report.

Louis Roland Berthelot was advised by the Commission to lodge an objection to the transcription of the notice. Subsequently, the Commission was advised that he had retained the services of Attorney, P. Boodhna, who served the appropriate notice on the Conservator of Mortgages.

\*\*\*\*\*

**CASE NAME: LAVIOLETTE**

*TJC/ L/0160/ BATOUR MARIE RENE born LAVIOLETTE*

Marie Renéa Batour, born Laviolette, the applicant, says that she came to know that her ancestor Jacques Laviolette owned three plots of land at Rivière Noire, Petite Bel Air (Ruisseau-des-Délices) and Mahébourg. According to her, those plots of lands have been taken over by different sugar estates of the said regions. The plots of land belonged to applicant's grandfather and she says that she is one of the heirs of the land. However, the applicant does not know the exact location of the land.

In her request to the Commission, she says that either the Sugar Estates should buy the land and give them money or they return back the land to the heirs.

In support of her claim, she submitted the following:

- A "*concession*" document delivered to Louis Laviolette ("*noir libre*"), of a plot of land of extent 222 *Arpents* dated 10<sup>th</sup> January 1764 registered by the "*Greffier aux Conseil supérieur et au Tribunal terrier*".
- A Survey report dated 18<sup>th</sup> May 1772 by Sworn Land surveyor Louis Merle at the request of Louis Laviolette for a plot of land of the extent of 312 *Arpents* as found in Folio 2, MA 62 Folio 396-401 in a file kept in Mauritius Archives.
- A Survey report dated 18<sup>th</sup> April 1771 drawn up by Sworn Land surveyor Louis Merle, at the request of searches, in respect of a plot of land of an extent of 5 *Arpents* 10 perches at Grand Port.

However, searches made by the Commission revealed that the said plots of land do not appear in the names of Louis Laviolette or Jean Laviolette in the "*Case Hypothécaire*".

The Commission analysed and undertook searches in the claim made by the applicant.

It is also revealed at "*Répertoire*" 180 No 302, that succession Louis Laviolette sold various plots of land from the year 1899 to the year 1925; and at "*Répertoire*" 190 No. 562, that Jean Laviolette sold undivided rights from the year 1904 to the year 1912.

In view of the fact that no affidavit had been submitted and no family tree produced, the claim of the applicants rests on very flimsy ground.

The claims of the three portions of land of 222 *Arpents*, 312 *Arpents* and 156¼ *Arpents* at Ruisseau-des-Délices and Plaines Saint-Pierre prompted much discussion at the Commission.

The first and third portions of land were received from concessions.

A thorough reading of the deed of concession reveals that the concession was given under certain terms and conditions. If the conditions were not fulfilled, the land would return back to the King. The document of "*concession*" was one like a "*Letter of intent*", not warranting any follow-up on the part of the Authorities at that time if those who received the concession disregard the rules and conditions. This may explain why in spite of the fact that the documents relating to the concession exist, searches carried out in the names of Jacques Laviolette, Louis Laviolette and Jean

Laviolette at the Office of the Conservator of Mortgages, the three portions of land cannot be traced out.

\*\*\*\*\*

**CASE NAME: PREAUDET**

*TJC/L/0161/PREAUDET SERGE EMMANUEL & others*

- Case heard on Wednesday 18 August 2010
- Serge Emmanuel Préaudet

**Claim of Deponent**

- His great-grandfather Ernest Préaudet owned several plots of land including 130 *Arpents* in Quatre Cocos which he purchased with five others (1857) in terms of deed transcribed in Volume 35 No. 294.
- The property has devolved now to the heirs and successors.
- Requests assistance of the Commission to get back the land.

**Hearing 18 August 2010**

Emmanuel Préaudet deponed before the Commission and explained that there are now 24 heirs, some of whom live abroad who may claim to have a share in the land. Since 1986, he started claiming the land and contacted Constance La Gaieté, the occupier of the said land. To assist him in his claim, he contacted one Eric Pitchen, a 'Researcher' to whom he paid approximately Rs. 350,000. The latter was to seek the services of a Land Surveyor (Mr Sakir) and arrange for the drawing up of the affidavit establishing all the heirs entitled to apprehend the estate and succession. As nothing had been done, he reported the case to the Police and Eric Pitchen was arrested.

The Commission is of the view that S.E. Préaudet should establish the family tree and finalise the drawing up of the affidavit.

Serge Préaudet has been advised accordingly and also to seek the services of a Land Surveyor to locate the land at issue should the heirs Ernest Préaudet decide to seek physical possession of the property through a Court action.

**Case 2 and 3**

The applicant adds that his grandfather told him that the family owned a plot of land in Plaines Wilhems. But he does not know the exact location. He also avers that the heirs have also 525 *Arpents* at Domaine Argy.

The Préaudet family requests the Commission to help them carry out land surveying and to reclaim their properties.

The Commission has examined the case and found that case No. 2 and case No. 3 are too vague to enable a proper examination. Hereto, the services of a Land Surveyor was advised in order to locate the properties and retrieve information as to their ownership (title deeds) that would enable the heirs to take a decision on any further move.

\*\*\*\*\*

**CASE NAME: ARMUGAM**

*TJC/ L/ /0162 ARMUGAM VISHWANADHAN PILLAY & OTHERS*

Vishwanadhan Pillay Armugam, the applicant claims that his father, Vinayron Pillay Armugam, was born at Vallée-des-Prêtres where he was brought up with his brother and two sisters. Before his father's death, the latter told him that his father (applicant's grandfather) had land(s) at Montagne Longue and Vallée-des-Prêtres. Throughout his life applicant's grandfather has been living at different places with his family that is why they have lost contact with their lands. The family wants assistance to identify these lands.

Searches have been carried out in the names of applicant's:

- 1) Father: Vinayron Pillay Armugam;
- 2) Grandfather: Soopaya Arunachalam;
- 3) Great grandfather: Armugum No. 417322.

The names of the applicant's grandfather and great-grandfather do not appear in the Registers of the Conservator of Mortgages as owners of any land.

\*\*\*\*\*

**CASE NAME: CORNET**

*TJC/ L/ VF/0163/ FRIQUIN ELSIE born CORNET*

Elsie Friquin, *born* Marie Elsie Cornet, writes that her father has told her that her great-grandparents owned several plots of land. She ignores where they are situated and requests the Commission to assist in research.

She claims that her great grandparents owned several plots of land about which she ignored their locations and the relevant title deeds. She has given the name of his grandfather, Emmanuel André Friquin.

Searches at the Conservator of Mortgages Office have revealed that Emmanuel André Friquin, son of Julius Emmanuel Friquin and Andréa Mars, married to Marie Elizabeth Cornet. They acquired on 2<sup>nd</sup> August 2002 from one L. Mars, a plot of land of an extent of 157.08 m2 situated in the District of Port-Louis place called Sainte Croix, 5, Leung Pew Antoine Street for the sum of Rs. 50,000 as evidenced by TV 4977 No. 29.

There is no property registered under the name of the grandfather.

\*\*\*\*\*

**CASE NAME: AUFRAY**

TJC/ L/0164/ PASCAL Elian Marie Wills

The applicant, Elian Marie Wills Pascal, says that after having undertaken some searches on his ancestors, the Auffray family, he has discovered that they owned a concession of 156¼ Acres that have been granted to Jean Pierre Auffray in 1770 in the region of Mare-Tabac. According to the applicant, this plot of land has since been passed over during several generations in the family. The applicant declares that the Auffray family was involved in fishing and plantation. He thinks that they might have used this plot of land for that purpose.

Elian Pascal adds that, according to him, the land had started to be neglected as from the 1860s, with Joseph Fernand Auffray, the applicant's great-grandfather, the one who had inherited the land during this period. He declares that someone has told him that the land is actually being occupied by the Savannah Sugar Estate; and he points out that after having made more in-depth searches at the Mauritius National Archives and other institutions, he has found no records mentioning the sale of the land. He concludes in underlying that he actually does not know the precise location of the land.

His request to the Commission is to locate the land, to investigate whether if the land has been illegally taken over by the Savannah Sugar Estate and if yes, when? He also wants to know whether the land has been prescribed by the Sugar Estate above-mentioned.

According to the records of the case, applicant has not submitted a written representation but has submitted several documents, the main ones of which are:

- A copy of a deed of concession bearing No. 758 copied in Volume 6 No. 105 and dated 15<sup>th</sup> March 1771
- A copy of a survey report of a plot of land of 156 ¼ *Arpents*

Searches carried out by the Commission at the Registrar General's Office revealed that the deed of concession is not mentioned in the "*Case hypothécaire*" of Jean Pierre Auffray (Jean Pierre Auffray according to deed of "*concession*"). Furthermore, the names of Joseph Fernand Auffray, Louis Lewis Andéol Auffray and Marie Leyla Routier have not been traced in the "*Case hypothécaire*"

However, according to a plan showing the plots of the "*concession*" in the area, the relevant site may be identified.

During a hearing, the applicant promised to look further into his claim and to obtain more precise and reliable information. No further information or documents had ever been produced to enable the Commission to investigate further.

\*\*\*\*\*

**CASE NAME: PERRIN**

TJC/ L/0166/GUIMBEAU JOSEPH ARNAULD GARY

Joseph Arnauld Gary Guimbeau, the applicant, claims that his great-grandfather, Edouard Perrin, was the owner of several plots of land at Constance which he bought or inherited from Jean Baptiste Martin, or his brother, Louis Perrin, who died childless. The applicant's family ignored the existence of this heritage until 1974 when one Gérard Bernard told the applicant's grandfather, René Perrin, that, while consulting a site plan of Constance, he discovered that Edouard Perrin owned several plots of land at Constance. René Perrin gave a '*procuration*' to Gérard Bernard to gather all necessary information about these lands. During his searches, according to Land surveyor Foiret, the lands had never been sold. Gérard Bernard has since retraced several plots of land.

On 4<sup>th</sup> February 1985, Bernard wrote a letter to Eddy Labat, the former Administrator of Constance & La Gaieté Sugar Estate. He was answered by Labat in a letter dated 15<sup>th</sup> March 1985, that the sugar estate could not retrace this transaction. He suggested to Bernard to do all necessary searches and to come back to him once he had all relevant documents to study their authenticity.

On 7<sup>th</sup> February 2005, Serge Guimbeau, the applicant's father, gave another '*procuration*' to Gérard Bernard to retrace back all these lands. When Bernard met Labat with all the Documents, he was told that the lands would be returned back and the family refunded. Bernard was asked to meet Land surveyor D'Hotman. At the said meeting, Bernard was told by D'Hotman that these lands belong to one Valet and that, according to him, there was no way Valet would give back the land. Bernard tried his luck and, indeed, met Valet. The latter told him that he is no more the owner of Constance.

The preliminary searches undertaken by the Commission establishes the fact that there was no substantial property left to be claimed by the heirs of the said Louis Edouard Perrin (*fils*). Most of the properties purchased by Louis Edouard Perrin (*Père*), as well as by Louis Edouard Perrin (*Fils*), at some point had been sold. There may be small "*solde*" of land here and there but this can be confirmed only by further searches coupled with a land survey. However, the major plot of land that the Surveyor Foiret refers to in his letter does appear in the "*Case hypothécaire*" of Louis Edouard Perrin. The letter of Robert Foiret on the 8<sup>th</sup> July 1985 mentions the ownership of the said portion of 78 *Arpents* purchased and transcribed in TV 12 Volume 183 as being owned by Louis Edouard Perrin.

In-depth searches also reveal that Elizabeth Perrin, the sister of Edouard Perrin, contracted a civil marriage with one Pringault. Since she was a minor, Edouard Perrin was his legal guardian. After the death of Pringault, Elizabeth Perrin married for the second time to one Odillard and a son named Emile Odillard was born from this marriage. In 1828, Emile Odillard bought a plot of land 312 *Arpents* and divided it into two equal two parts of 156 *Arpents* at Rivière-du-Rempart. In the "*Case hypothécaire*" of Emile Odillard, the land is registered in his name and no entry has been made therein to suggest that a transaction has been effected subsequently.

Joseph Arnaud Gary Guimbeau claims that Louis Edouard Perrin was his great-grandfather.

The Commission has observed that Joseph Arnaud Gary Guimbeau was born at Sainte-Clothilde, Ile de la Réunion, on 23<sup>rd</sup> April 1979. His father's name is Serge Guimbeau. It is not known how J.A. Gary Guimbeau is related to Louis Edouard Perrin, albeit the drawing up of a family tree by him in file.

Searches also reveal the following:

- 80 perches were sold to Caroopanen on 11<sup>th</sup> November 1904 as per TV 258 No. 189
- 2 *Arpents* 58 perches to J. Magha on the same date as per TV 25 No. 95, 64 *Arpents* 64 perches as per TV 28 No. 88 and 84 *Arpents* as per TV 46 No. 298.

In view of the family ramifications and its various documents submitted, the Commission is of the opinion that the claimant should carry out further investigation as same has not been done, by entrusting the work to a Land Surveyor for an appropriate Report.

However, it has also been found that actually Louis Edouard Perrin (*Le Père*) had a quite long list of charges that had been lodged against his various properties.

### **CASE NAME: GOPAUL**

TJC/ LI /0168/ GOPAUL POOSPAWTEE

Poospawtee Gopaul, the applicant claims that her husband, Mohunlal Gopaul, to whom she is married "*en communauté de biens*", has left her and their children in 1997 to live elsewhere. On 12<sup>th</sup> August 1970, he had bought a plot of land of 2 *Arpents* 50 perches at Tombeau in Pamplémousses District. In 1993 M. Gopaul made an application for a development permit for residential purposes at the Pamplémousses/ Rivière-du-Rempart District Council but he never went to fetch his permit. The applicant fears that his husband has already sold or is trying to sell this

land. On several occasions he has accompanied people unknown to applicant to visit the land. Once Mohunlal Gopaul, accompanied by a man, measured the land.

The applicant furthermore maintains that after the death of his parents, Mohunlal Gopaul inherited a plot of land of 4¾ perches where his son was living. He received a building permit for constructing a house there. But, without informing his family, he sold the land. Later, applicant's son received a notice of eviction from the Court. It was then and only that applicant learnt that the land had been sold.

She made a request to the Commission to find a way of preventing her husband from selling the land at Tombeau in Pamplemousses as her children and she have nowhere else to go.

The Commission showed much concern in this case as the interest of a family and, most importantly, the children might be at stake.

Mohunlal Gopaul married "*en communauté de biens*" Beefnah Poospawtee on 10<sup>th</sup> July 1968.

On 28<sup>th</sup> May 1973, he bought a plot of the extent of 2 *Arpents* 50p at Tombeau in Pamplemousses District as per TV 1215 No. 9 and he obtained in a "*Division in kind*" *ex parte* a portion of land of the extent of 4 ¾ perches (heirs Gopaul) as per TV 1690 No. 176, which he sold to Purmessur Prayagsingh on 21<sup>st</sup> July 2000 as per TV 4438 No. 4.

Searches have revealed that the 2 *Arpents* 50 plot of land purchased in 1973 (TV 1215/9) has not been sold. This property forms part of the "*communauté de biens*" and therefore cannot be disposed of by Mr. M. Gopaul without the consent of his legitimate wife.

As regards the land obtained through succession, the Commission has been advised that this is considered as a "*bien propre*" and as such, M. Gopaul was entitled to sell the land.

\*\*\*\*\*

**CASE NAME: RAGOONUNDUN**

*TJC/L/0169/RAGOONUNDUN SABITA*

Sabita Ragoonundun, the applicant is granddaughter of Mohabeer Ragoonundun, who owned approximately 3 *Arpents* in Calodyne and other plots in Grand Gaube and Melville. For 20 years, the family, i.e. the heirs of Ragoonundun, has been discussing for the sharing of the land but applicant affirms that she has no information as all initiatives have been made by her uncle Koomar Ragoonundun.

She requests the Commission to find a solution for the proper sharing of the land.

Searches carried out by the Commission at the Registrar General's Office reveals that the name of Ragoonundun Mohabeer does not appear in the index of owners. However searches have been carried out also in the name of Ragoonundun Mohabeersing, but to no avail.

Contacted several times to be apprised of the situation, Sabita Ragoonundun promised that she would come to the Commission "*soon*" but the lady never turned up.

In view of the fact that searches have revealed that the name Ragoonundun Mohabeer is not registered as a landowner at the Office of the Conservator of Mortgages, and the lady has not shown further interest to pursue her claim, the Commission is unable to investigate further as no dispossession has been disclosed.

\*\*\*\*\*

**CASE NAME: MADELEINE**

TJC/L/0170/MADELEINE LOUIS CLENCY

Louis Clency Madeleine, the applicant, presented two cases to the Commission, asking to retrieve his lands, which he did not know much about.

**Case 1**

The applicant claims that he is the only surviving heir of Louise Estasie Magdeleine *dite* Perrin who owned a plot of land of 30 *Arpents* at Trou d'Eau Douce, Flacq. He did not know about the existence of this land. The heirs of Edouard Magdeleine, thinking that they were the only heirs of Louise Estasie Magdeleine, have tried to sell the land to one Madhoo. They had to swear in an affidavit rectifying the terms of the contract.

One day, he recalls, Jude Seblin told him that his great-grandparents owned a plot of land which is now occupied by a certain one Oozeerally. The applicant trusted Seblin and gave him Rs. 10,000 to clear the land, believing that the said plot of land belonged to his great grandparents. Seblin, not only brought bulldozers to clear the land, but also removed the fences that had been erected by Oozeerally. Seblin paid for the work. However, it was later found that the land really belonged to Oozeerally. The latter sued the applicant for having destroyed the fences.

Later, the applicant paid Land surveyor Dwarka to locate the 30 *Arpents* of his great grandmother which he successfully did. Surveyor Dwarka found out that part of the land is now occupied by Marie Gracia Nadal, Joseph Christian Etiennette, Jean Joany Etiennette and Ootam Kumar Sauntoo.

Louis Clency Madeleine maintains that these people are illegally occupying his land as the land is still under the name of Louise Estasie Magdeleine. He decides to bring the case to the Supreme Court and hired services of Counsel G. Bhanji Soni to get his land back.

**Case 2**

The applicant declares that Armand Madeleine has sworn in an affidavit, which according to him is false. He is trying to sell the land. A press advertisement has been released concerning the sale and the contact person is one Ivan, son of Armand Madeleine. He wants to recover his land.

The Commission looked into the case presented by the applicant and heard the facts presented by the applicant which were far from convincing.

In fact, the heirs of L. Estasie Magdeleine tried to sell the land to Madhoo, and then the applicant admitted that the land belonged to Oozeerally. Therefore, the title deed of the applicant is "*précaire*" for all intents and purposes. The claimant cannot in law have the best of both worlds, that is, claim through the Court of its intention to get back the land and come to the Commission so that the latter may go on a fishing expedition for him!

The Magdeleine had another meeting at the Commission on 9<sup>th</sup> August 2010 and handed a copy of the plaint with summons issued by his Attorney at Court against five persons in which he is praying for a Court order, to the effect that the 5 persons had to quit and vacate the land "*in lite*".

This action confirms his intention expressed above and now does not need further examination by the Commission.

\*\*\*\*\*

**CASE NAME: GOTEEA***TJC/ L/0171/GOTEEA SOOREEADOO*

Sooreeadoo Goteea claims that when he was young, his grandfather always told him that his father owned land at Terre Rouge. The applicant made some searches and found out that his great grandfather, who came from India as an indentured immigrant and worked as a domestic servant for a British master had purchased a plot of land of 80 perches at Terre Rouge. He unfortunately died at an early age and left behind him an illiterate wife and seven children who were under-aged. The land was taken over by the "Curatelle" which published a notice in the newspaper. Being illiterate, the family could neither read nor get access to newspapers at that time. There was no protest on account of ignorance and illiteracy. The land was sold at a very low price. The applicant wants the Commission to shed light on this matter and see in what way Justice can be applied to either recuperate the land or compensate his family adequately.

Applicant has submitted no document. He had only consulted the registers at the National Archives and had not made any copy thinking that there was no way of getting back the land.

According to our searches in TV 151 No. 8, dated 17<sup>th</sup> October 1882, Sworn Land surveyor Gustave de Coriolis sold a plot of land at Pamplemousses, Le Hochet, of the extent of 86 perches undividedly to Goteea 154635, son of Mohugoo (half undivided) and to Luckeea 236147, son of Hurdoyal and to Cheekhoory 20488, son of Jeehaloo (half undivided) for the price of Rs. 200. Goteea paid Rs. 100.

Goteea 154635 passed away on 16<sup>th</sup> March 1888, Luckeea 236147 passed away on 20<sup>th</sup> July 1888 and Cheekhoory 204881 passed away on 5<sup>th</sup> October 1896.

It appears that the plot of land was declared a vacant estate and the then Curator of Vacant Estates, Huët de Froberville, obtained possession of this land together with other lands. He sold the said plot of land on 15<sup>th</sup> July 1918 to Eugène Solesse for the price of Rs. 80 as evidenced by TV 329 No. 604.

In a letter dated 16<sup>th</sup> September 2010, R. Lutchmun, the Curator of Vacant Estates, informed the Commission that he could not trace out any record of any payment effected to the descendants of Goteea 154635 and others.

In fact, there is no record at the Office of the Curator of Vacant Estates concerning how the Curator has been vested with the property, nor is there any document to shed light as to whether the sale price has been paid.

\*\*\*\*\*

**CASE NAME: TRIME***TJC/L/0172/EVREMONT ANNE MARIE PAULE, EVREMONT BERTY & ORS.*

Anne Marie Paule and Berty Evrémont, the applicants, claim to be one of the heirs of Marie Trime who owned a plot of land of 4 *Arpents* situated at Edgar Hughes Street, Curepipe, near Trou-àux-Cerfs. The land was purchased by Marie Trime and his two brothers Alfred and Augustin Trime but the two brothers died single leaving no descendant. Consequently, Marie Trime inherited of the 4 *Arpents*.

In about 1987, one Basdeo Ramudhin paid a Land surveyor to undertake searches on a plot of land of about 4 *Arpents* owned by his family in the Plaines Wilhems. The surveyor misled Ramudhin and made him believe that the land he was searching for was the 4 *Arpents* located at Edgar Hughes Street Curepipe, near Trou-aux-Cerfs. The surveyor even surveyed the land without the authorization of the applicants' family. It is much later that Ramudhin discovered that he had been misled. He died shortly afterwards.

The applicants have written a letter to the widow of Ramudhin but she never responded to it.

Now that the applicants intend to sell this portion of land, they fear that the daughter of Ramudhin - who has not accepted that the land is not the heritage of the family - may bring a case in Court against them claiming the property of the land.

The applicants want the Commission to make the Ramudhin family understand that they have been misled and that this portion of land is the property of the heirs of Marie Trime. They submitted the necessary documents to prove their ownership to the land and they want the Commission to help them to prove that the land belongs to them. They are ready to go to Court if circumstances make this necessary.

She, later, did produce copies related to the case which has been entered before the Supreme Court.

The Commission did searches in order to better understand where matters stand. "*Répertoires*" 68/322 and 68/323 reveal that on 8<sup>th</sup> October 1866 in TV 96 No. 109, Prosper Pellicot and his wife sold to Marie Trime, Alfred Trime and Augustin Trime 1/3 undivided rights in a plot of land of an extent of 4 *Arpents*, excised from a bigger plot of land acquired by Pellicot on 15<sup>th</sup> November 1818. There is not any charge burdening the plot of land nor is there any evidence that it has been sold. Sworn Land surveyor Ng Tong Ng Wah, on 9<sup>th</sup> December 2008 and Ahmad A. Khadaroo, on 5<sup>th</sup> April 2010 have their survey reports confirming the site and location place of the 4 *Arpents* plot at Trou-aux-Cerfs.

However "*Répertoire*" 451 No. 741 reveals that Ramudhin acquired a plot of land of an extent of 4 *Arpents* at Trou -aux- Cerfs from one Subsungkur for the price of Rs. 600,000 as evidenced by TV 1750 No. 111 dated 13<sup>th</sup> February 1989.

The case entered at the Supreme Court is still pending.

\*\*\*\*\*

**CASE NAME: DHUNOO**

*TJC/ L/0173/DHUNOO ROOPWANTEE*

The applicant, Roopwantee Dhunoo, claims that the great-grandfather of her husband, Dhunoo No. 222752, who came to Mauritius as an indentured immigrant in 1858, purchased a plot of land of 2 *Arpents* at 16<sup>ème</sup> Mille in the district of Plaines- Wilhems in 1883. Dhunoo 222752 had only one son, Ramchurn Dhunoo. The latter had two sons Gunganarain and Suddeo. Gunganarain had five children and Suddeo had two children. All these families are the heirs of the plot of land at 16<sup>ème</sup> Mille.

Roopwantee Dhunoo avers that one Pawan Kumar, an heir, has prescribed the land. Later, Devi Barosi, who is not an heir, prescribed the same land. A third person, who is not an heir, one Seeduth Sookharry, also prescribed the land. No copies relating to these prescriptions have been submitted.

In October 1993, one P.K. Tokising, one of the heirs Dhunoo, No. 222752 applied for a judgement against one Sibduth Sookharry advising the said S. Sookharry to quit leave and vacate the portion of land of 2 *Arpents* 00. On the day of the hearing on 29 March 1996, the respondent (Mr. S. Sookharry) left default and judgement was given in favour of the plaintiff.

There is no indication if the judgement has been executed or the defendant has complied with the judgement.

If the applicant wants to get the share of her husband in the land, she has to petition to the Master and Registrar of the Supreme Court for the division in kind of the property among all heirs entitled to a share. The Commission is of opinion that she is still a co-heir and has not been dispossessed of the shares and rights of her husband.

She has been called by the Commission to be appraised of this conclusion.

\*\*\*\*\*

**CASE NAME: POPLINEAU**

*TJC/ L/0174/POPLINEAU JEAN EMMANUEL GEORGES*

As it has been the policy of the Commission to receive and listen to one and each applicant who presented a case to us, it has also been our advocacy to understand how applicants have lost their house and land throughout some bad experiences. The case of Jean Emmanuel Georges Poplineau was indeed a sad one.

The applicant claims that he had a CHA house at Block H6, Talipot lane at Batterie Cassée Abercombie, Sainte Croix. He is a hawker. On 14<sup>th</sup> December 1995, he avers he approached a 'casseur' (money lender) - one Deeawoodee - and asked for a loan of Rs. 50,000. The money lender imposed an agreement on applicant whereby he would give him a sum of Rs. 35,000 in cash and the reimbursement sum would be Rs. 55,000; the Rs. 20 000 being required for paper work. Applicant had 1 year to reimburse the money. Each month, he paid a sum of money to Deeawoodee but the latter did not give him any receipt arguing that he would give him a single receipt when the final payment would be made.

Meanwhile, applicant's house was in a very a bad condition. He went to the Indian Ocean International Bank and asked for a loan of Rs. 100,000 for the renovation of his house. The loan was granted to him against a mortgage on his house as guarantee and he had five years to repay back the sum borrowed. The applicant had to pay about Rs. 2,000 per month.

He avers that he paid the loan regularly for a period of ten months but, unfortunately, fell ill and was unable to pay the loan.

One the other hand, he was deeply pressurized by the money lender who refused to give him a receipt for the payments he made. The applicant is certain that he has to pay back much more than the sum he had borrowed.

Quite desperate, he went to the *Diocèse* of Port-Louis and asked for help. He met with Mgr. Maurice Piat. The latter agreed to give him half of the sum that he owned to the bank and the rest was paid by applicant. The money, thus obtained was paid directly to the Attorney of the bank, one Dwarka.

Some weeks later, the applicant says that he was surprised to receive a letter from the bank informing him that his house would be sold through a "*Sale by levy*".

Hopeless, he could do nothing to stop this.

When the house was sold "*at the bar*", he discovered, that the same Deeawoodee- the money lender- bought his house. The Court gave Poplineau six months to leave his house. He went to the

office set up by Government to review the “*Sale by levy cases*” to ask for help but his request was rejected without any reason given to him.

The applicant cannot explain why and how the bank seized and sold his property when he avers that the amount has been paid. He does not contest the sale today and he is asking the Commission to help him to get a plot of State land.

Unfortunately, the Commission cannot be of any help to him but notes that the applicant has been dispossessed of his property as a result of debts.

\*\*\*\*\*

**CASE NAME: MANGALKHAN**

*TJC/ L/0175/ MANGALKHAN ABDOOL LATIFF*

In a letter dated 22<sup>nd</sup> October 2009, Abdool Latiff Mangalkhan informed the Truth & Justice Commission that his forefathers possessed a plot of land of 78 acres at Chemin Savanne, Grand Port. He wants the Commission to assist in locating exactly the land.

One document has been submitted and relates to a plot of land of extent of 28 ½ acres being a sale by Aboo Tauleb to Mangalkhan as per TV 82 No. 26 dated 22<sup>nd</sup> July 1864.

Searches of the “*Case hypothécaire*” (52 No.196), confirmed that Mangalkhan acquired a plot of land of 28 ½ *Arpents* from A. Tauleb on 20<sup>th</sup> July 1864 as per the above TV for the price of 3000 *piastres* and another plot of land of extent of 78 *Arpents* on the same date as per TV 82 No. 27 from H.V.J Allarakia for the price of “8000 *piastres*” .

However, the two plots of land are burdened with two inscriptions namely:

- At Volume 134 No. 645 an inscription of Privilege of “8000 *piastres*” in favour of H.V.J Allakaria for 78 A.
- At Volume 137 No. 131 Conventional Inscription of “6400 *piastres*” for the above 2 plots.

These inscriptions have not been erased.

It appears that the land of 28 ½ *Arpents* has been sold on 4<sup>th</sup> April 1871 to Allakaria for “2000 *piastres*”. According to the “*Répertoire*”, the land of 78 *Arpents* has not been sold but is burdened with two inscriptions of Rs. 8,000 and Rs. 6,400.

In view of the above, there is no indication that those 2 plots of land still belong to heirs Mangalkhan.

The Commission has advised the applicant to retain the services of a Land surveyor in order to locate the land.

\*\*\*\*\*

**CASE NAME: FELICIANE**

*TJC/ L/0176/ FELICIANE PIERRE ALAIN*

The applicant, Pierre Louis Féliciane, in a letter addressed to Truth & Justice Commission on 12<sup>th</sup> September 2009, informs that his great great grandfather, Frédéric Féliciane, possessed a portion of land of extent of 77 Acres since 1904 in Pamplémousses, According to him, the land has not been prescribed; however, some portions have been sold. The remaining 30 Acres are now occupied by some people.

1. Two Documents have been submitted in support of his claim namely:
  - A Notarial deed dated 23<sup>rd</sup> June 1838 registered in Register C58 No. 3282 (NA 79/23) drawn up by Notary Trébuchet;
  - “*Répertoire*” 12 No. 327 in the name of Jeanne Antoinette Moutou, wife of Frédéric Féliciane.
  - No survey plan has been submitted in regard to the plot of land described in the notarial deed or a family tree which would show the link between Pierre Alain Féliciane and Frédéric Féliciane.
  - The Notarial deed relates to a sale made by Pierre Louis Perrot and his wife Céline Darmont to Frédéric Féliciane and his wife, Jeanne Antoinette Moutou, (½ undivided) and to ailaire Mootoo (½ undivided) of a plot of land at Pamplémousses of the extent of 77 *Arpents* 25 perches for the price of “4000 *piastres*”. That plot of land is burdened with an “*inscription de privilège*” in favour of Pierre Louis Perrot (Inscription 33/191) for the sum of “4000 *piastres*” which has not been erased.
  - Furthermore, on 1<sup>st</sup> July 1857, Jeanne Antoinette Moutou sold ½ undivided rights in the 76 *Arpents* 25 perches to A. Florigny in consideration of a price of “5000 *piastres*”. (TV 61 No. 185).

In the light of the above, it appears that the shares held by Frédéric Féliciane and his wife have been disposed of and, consequently, the heirs held no rights.

\*\*\*\*\*

**CASE NAME: RAMESSUR**

TJC/ L/0177/ RAMESSUR SOOVENDRA

The applicant, Soovendra Ramessur, writes in a letter addressed to Truth & Justice Commission on 20<sup>th</sup> September 2009 that his great grandfather had several properties. The sister of his grandmother took possession of all the properties at the death of his great grandfather. The aunt of the applicant, in turn, took possession of all the family properties at the death of her mother. She sold the rest of the land of the applicant’s ancestors, thus depriving the applicant’s mother of her share of the property. Now, the applicant wants to have his share.

A family tree has been produced wherein the Commission learnt that the great grandfather bears the name of Sookdeo Boodoo, that of his grandmother, Dharmowtee Boodoo, as well as that of the sister of his grandmother Leelawtee Dabee. His father’s name is Goordeen Boodoo.

It must be noted that Dharmowtee Boodoo had not received any share in the property of his grandfather to whom she was not civilly married.

No affidavit has ever been made after the death of grandparents. No title deeds have been produced and no survey report or other relevant documents submitted.

Searches carried out at the Conservator of Mortgages office have revealed that the names Goordeen Boodoo, Dharmowtee Boodoo and Leelawtee Dabee do not appear in the *Répertoire*. However, it appears from the “*Case hypothécaire*” Sookdeo Boodoo, that the sister of his grandmother (Leelawtee Dabee) took all the properties.

In the absence of a proper affidavit of succession of the late Sookdeo Boodoo, it is difficult for the Commission to express any opinion in this case.

\*\*\*\*\*

**CASE NAME: RAMBARUTH**

TJC/L/00178/ LOTUN TARAMANDUTH

In a letter addressed to Truth & Justice Commission on 26<sup>th</sup> September 2009, Taramanduth Lotun writes that the father of his mother, one Gangaparsad Ramburuth owned a plot of land of 2 acres, and that the latter had 5 children.

The applicant's uncle took a loan of Rs. 6,000 from Rathen Baichoo, giving as guarantee that plot of land. Each time he went to repay the loan, he was told that Baichoo was not at home. As time elapsed, Baichoo finally '*seized*' the land.

The Ramburuth family wants to get back their share in the land.

The inquiry led by the Commission reveals that according to "*Répertoire*" 247/88, Gangaparsad Ramburuth born on 29<sup>th</sup> June 1894, acquired various portions of land in the Districts of Rivière-du-Rempart and Flacq, one of them being a plot of land of extent of 1 *Arpent* 20 perches at Laventure, Flacq acquired under TV 509 No. 334 dated 25<sup>th</sup> April 1947. The undivided rights in these plots of land were devolved to succession of B. Ramburuth, as confirmed by the entry in "*Répertoire*" 437/69, dated 4<sup>th</sup> June 1959 and as evidenced by the deed transcribed in TV 785 No.120. The plot of land at Laventure was subject to a seizure on 3<sup>rd</sup> September 1968 as per Seizure document 100 No. 29 in favour of R. Baichoo. Subsequently, the plot of land at Laventure becomes the property of R. Baichoo as per TV 1151 No. 138 dated 9<sup>th</sup> October 1968.

The Commission notes that the land had been seized and sold by levy and purchased by the creditor on account of a loan taken by the applicant's relative which had not been paid.

\*\*\*\*\*

**CASE NAME: CROUCHE**

TJC/ L/0180/ CROUCHE Andrée Laval

The applicant, André Laval Crouche, in a letter addressed to the Truth & Justice Commission on 28<sup>th</sup> September 2009, writes that his ancestors owned a plot of land at Route Vaudagnes, Bambous. The family is in the process of obtaining necessary documents to prove the claim.

The Crouches made a request to the Commission to assist them in recovering the land.

After searches made by the Commission, it is revealed that:

It is a case where two people are claiming the same plot of land.

At the request of Laval Crouche, Land surveyor Chamroo drew up a Memorandum of survey on 14<sup>th</sup> November 2000 registered in L.S 41 No. 6743 as a prerequisite for the said Laval Crouche to prescribe a plot of land of extent of 995.13m<sup>2</sup>.

On 24<sup>th</sup> March 2006, Louis Mario, of Vaudagnes Street, Bambous objected to the transcription of the affidavit, through his Attorney N. Rama in respect of the above-mentioned plot of land on the ground that Laval Crouche has never occupied that plot of land and that Louis Mario has always resided on the land.

On the other hand, the Commission has been made aware of the transcription of a declaration of prescription made by Louis Mario and prepared by Notary J.I.P. Avrillon dated 3<sup>rd</sup> May 2006 in TV 6493 No. 47 in respect of the same land.

The wife of Laval Crouche brought a copy of the affidavit of prescription made by Louis Mario, wherein it is stated that "*Louis Mario has presented a portion of land of 896.77 square mètres*

*situated in the district of Black River place called Bambous, Vaudagnes Road*". It was then that the Commission was made aware that the said Louis Mario is her step-brother. Her husband had authorized Louis Mario to occupy part of the land and the latter prescribed same.

Louis Mario and Marie Thérèsia Crouche were called to depone before the Commission on Wednesday 8<sup>th</sup> September 2010. Both gave different versions on how they prescribed the same plot of land at Bambous at different time. Whereas Marie Thérèsia Crouche said that the said land has belonged to her family for a very long time, it is only in 2002 that she and her husband decided to prescribe the land. Louis Mario, for his part, avers that he has been living on the same land for more than 35 years, built a small house thereon, and, in turn, decided to prescribe the land in 2006.

The Commission has been informed that Marie Thérèsia Crouche has referred the matter to the appropriate Court for a decision.

As the case is before a Court to decide who the real owner of the land is, the Commission cannot express an opinion in this case.

\*\*\*\*\*

**CASE NAME: NEERUNJUN**

*TJC/ L/0181/NEERUNJUN KRESHNA*

Khreshna Neerunjun, the applicant, writes in a letter addressed to the Truth & Justice Commission on 9<sup>th</sup> September 2009 that his land and house have been sold illegally by levy in 2005. He has lodged several complaints to several Departments but in vain. Furthermore, he has not been paid any salary from December 2004-July 2005.

The Commission wanted to know how and why Khreshna Neerunjun had to experience such a misfortune.

He was invited for a working session.

The applicant explained that he was working for the "*Keep Clean Company*" when the company for various reasons which the Director of the said company will have to explain to the Labour Office, he had not received his wages / salaries from his employer.

Neerunjun could not pay the monthly installments of his loan obtained from the Mauritius Housing Corporation. His land was seized and sold by levy.

Fortunately, his son was able to purchase the property at the Master's court.

The Neerunjun family has already lodged a complaint with the labour office concerning the non-payment of his wages/salaries and the case had been lodged in Court. This illustrates the difficulties that most small workers encounter and how they may easily lose everything: land, houses, properties.

\*\*\*\*\*

**CASE NAME: AUGUSTIN/EROOLEN**

TJC/ L/182 EROOLEN CYRIL ANDRE

Three cases were referred for investigation for the Eroolen family on their ancestor, Arthur Augustin. Cyril André Eroolen, the applicant, has no document concerning those lands and he wants to recover all the lands mentioned.

**Case 1**

The applicant says that after having done research with his brother on land owned by his ancestors, they discovered, through Attorney Khadaroo, that they owned a plot of land of 103 Acres, in Congomah, Les Marrianes, which originally belonged to their great-grandmother Elvina Sophie. According to him, the land was abandoned by the owners due to the epidemic of “*la peste*” [the plague] to resettle in Port- Louis. The land was left unoccupied and neglected. The applicant declares that since then there has been much construction of buildings and plantations on the plot of land. He also mentioned that Attorney Khadaroo asked them to bring someone who had information and testify with regard to that particular plot of land and its owners. Applicant and his brother deplored the fact that when they brought an old resident of that locality, they alleged, that the Attorney tried to dissuade them from pursuing their research and to put an end to their effort in trying to retrieve the land on the basis that the case was too old and too many developments had already been undertaken on the land. Applicant also mentioned that throughout his research, he has been misled by several persons whom he paid.

**Case 2**

Applicant says that the family owns land belonging to Arthur Augustin, his grandfather. Land is of the extent of one and a half acre situated at Roches Bois.

**Case 3**

Applicant declared that his family owned several plots of land at Pamplémousses and several other locations. Late Hervé Janvier had shown him a list of land that his family possessed.

Searches were carried out by the Commission on the issues presented.

**Case 1**

Searches revealed nothing in respect of that plot of land of an extent of 103 Acres at Congomah which allegedly belongs to Elvina Sophie.

**Case 2**

The Roche-Bois issue is interesting as copy of the title deed TV 138 No. 322 is appropriate. In fact, the “*Répertoire*” 107 No.288, of Arthur Augustin confirms the acquisition from Charles Brun by Marie Erasile Bazeilhac (widow of Arthur Augustin) dated 19<sup>th</sup> October 1880 of a plot of land at Roche Bois of an extent of ¼ individed in 1¼ *Arpent* (that is, 5/16 *Arpent*). There has not been any “*mutation*” and as such, the land is still the property of heirs Arthur Augustin. However, the plan submitted by the applicant is not relevant to that land.

**Case3**

There is no plot of land in the name of Arthur Augustin in the “*Répertoire*” for the Pamplémousses site.

The Commission is of opinion that if there is no substance regarding the first and third case as documents and information are missing or lacking, the 2<sup>nd</sup> case- concerning the land at Roches Bois, where widow of Arthur Augustin purchased undivided rights in the portion of land as per deed transcribed in TV 138 No. 322 appears genuine. According to searches carried out at the Mortgage office, undivided rights of widow Augustin in the land have not been sold.

A meeting was held with the applicants and other heirs during which they were advised on the course to follow to retrieve their inheritance.

\*\*\*\*\*

**CASE NAME: BOIVIN**

TJC/ L/0183 /BOIVIN ALEX

The applicant, Alex Boivin, mentions two plots of land, admeasuring respectively 72 Acres at Centre de Flacq and 17 Acres at Palmar, Quatres-Cocos as belonging to his great grandfather, Charles Alexy Boivin, to which he is a direct heir, through his mother, Marie Julie, granddaughter of the said Charles Alexy Boivin. The applicant says that he got to know about these two plots of land through one Gaëtan Duval, who works at the National Archives, a friend of applicant's son, Jean Patrick Boivin.

Alex Boivin relates that part of the land has been sold and he has neither been informed nor given a share of the sales, while another part of the land has been occupied by Société Constance for 200 years. According to the applicant, the "*Société Constance*" refuses to open any negotiations so that he could recover the land which, he believes, forms part of the "*héritage*".

The Commission analysed some of the Documents submitted. His averment is that his grandfather, Charles Alexy Boivin, had a plot of land of extent 17 Acres at Palmar was investigated.

"*Case hypothécaire*" 19 No.180 indicates an entry that Emilien Boivin had on 2<sup>nd</sup> February 1884 acquired from Alvare Michel undivided rights to a plot of land of the extent of 7 Arpents at Quatre-Cocos, as evidenced by title deed transcribed in Volume 170 No.126.

However, there is also another entry to the effect that this plot of land has been sold on 26<sup>th</sup> March 1912 "*les Droits indivis nue propriété*" to one J. E. Michel, as evidenced by TV 291 No. 322.

As regards the claim for the plot of land of extent of 72 Arpents (but in reality 62 Arpents 64) at Centre de Flacq, it appears from copy of Survey plan of land, Land surveyor Edouard Hallot dated 28<sup>th</sup> February 1858, that the said plot of land of Alexis Boivin was sub-divided among his heirs and attributed as follows:

- Portion of extent 31 Arpents 32p to Anna Perrin
- Portion of extent 5 Arpents 22p to Marie Noami Boivin
- Portion of extent 5 Arpents 22p to Michelle Aglace Boivin
- **Portion of extent 5 Arpents 22p to Charles Alexis Boivin**
- Portion of extent 5 Arpents 22p to Indérille Elonida Boivin
- Portion of extent 5 Arpents 22p to Jean Nemours Boivin
- A first portion of extent 4 Arpents 65p to Augustine Anais Boivin
- A second portion of extent 57 p to Augustine Anais Boivin,

thus, making an aggregate extent of 62 Arpents 64 perches.

The applicant avers that he is related through his mother, Marie Julie Boivin, granddaughter of Charles Alexis Boivin. In fact, Charles Alexis Boivin has obtained 5 Arpents 22 out of the 62 Arpents 64 perches at Centre de Flacq. Subsequently, on 19<sup>th</sup> December 1941, he sold his undivided rights to one J. Rosse as evidenced by title deed TV 465 No. 270 and TV 465 No. 273.

In the light of the above, it is felt that there is no plot of land still in the name of heirs Charles Alexis Boivin, at Quatre-Cocos.

\*\*\*\*\*

**CASE NAME: NOHUR**

TJC/0184/NOHUR MOHAMED YASHIN

Yashin Mohamed Nohur, the applicant says that his great-great-grandfather Nohur 85469 bis, married Sofina 324430. Nohur and Sofina had 3 sons and 7 daughters. One of them was Ismael Nohur who was applicant's great-grandfather. Ismael Nohur had a son named Mamode Aniff (applicant's grand-father). In 1923, Ismael Nohur bought a plot of land of 25 Acres at Goodlands, Rivière-du-Rempart and then he sold 10 perches to his son Mamode.

Mamode Aniff Nohur left the 10 perches to all his heirs through an “*affidavit de succession*”. Ayoob Nohur, the son of Mamode inherited 6 perches and his daughter, Rubeda Nohur, inherited 4 perches. The applicant is actually occupying the 6 perches of land without any problem.

Mohamed-Khaleed Nohur, is the grand-child of Mamode Aniff Nohur's brother. He is actually occupying the 4 perches of Rubeda Nohur which is mentioned in the will but not in the “*affidavit de succession*”.

His request to the Commission is to:

- (i) investigate about the real heir of the plot of land of 4 perches;
- (ii) how the land of his aunt Rubeda Nohur is actually occupied by his cousin Mohamed Khaleed Nohur even if his name is not mentioned in the will of Mamode Aniff Nohur; and
- (iii) why the name of Rubeda Nohur is not mentioned in the affidavit.

He also asks the Commission to retrace his exact family tree from the marriage of Nohur 85469 bis and Sofina 324430. The applicant declares that he had recourse to several Lawyers, Notaries, Attorneys, but, in vain. He relies on assistance from the Commission to establish the truth.

After searches, the Commission establishes the facts of the case are as follows:

In terms of a deed drawn up before Notary B. Seesurrun transcribed in Volume 367 No. 237 dated 14<sup>th</sup> April 1924, Mamode Aniff Nohur bought a plot of land of an extent of 10 perches at Goodlands from Ismael Nohur.

In terms of another deed drawn up before Notary Redmond Hart de Keating transcribed in Volume 1123 No. 35 dated 13<sup>th</sup> March 1970, Mamode Aniff Nohur sold to his son Ayoob Nohur the bare ownership of 6 perches (out of 10 perches), while he retained the usufructuary rights in the portion of land in his favour and that of his wife.

Mamode Aniff Nohur passed away on 23<sup>rd</sup> October 1971.

Ayoob Nohur passed away on 20<sup>th</sup> April 92 and left as heirs, six children and his surviving spouse.

In 1997, Z.A.K. Beegun surveyed the 10 perches (now in two lots) and found the area sold to Ayoob Nohur to be 253.25m<sup>2</sup> and the remaining area 191.25m<sup>2</sup>.

The contention of Mohamed Yashin Nohur, grandchild of Mamode Aniff Nohur, is that one Mohamed khaleed Nohur is actually occupying the land of extent of 4 perches which he avers belongs to his aunt Bibi Rubeda Nohur. Mohamed Khaleed Nohur's name, the occupier, does not appear as a heir in the will of the late Mamode Aniff Nohur.

The applicant had a meeting at the Commission on 22<sup>nd</sup> October 2010. He was informed that the above will was subsequently declared “*nulpare*”, simply by another will registered in Register B116 No. 1407 by Aniff Nohur whereby he left to Ayoob Nohur the bare ownership of the 6 perches and to Rubeda Nohur the bare ownership of the 4 perches.

The searches also revealed that according to a deed drawn up by and before Notary Joseph Marcel Joson, transcribed in Volume 7553 No. 8 dated 16<sup>th</sup> November 2009, Rubeda Nohur has sold the land of extent of 4 perches (now 191 m<sup>2</sup>) to Mohamed Khaleed Nohur for the sum of Rs. 300,000.

In the light of the above, there is no case of dispossession before the Commission and Mr. Mohamed Yashin Nohur was informed accordingly.

\*\*\*\*\*

**CASE NAME: APPADOO**

*TJC/ L/0185 VALLIAMAH VIRASAMY*

The applicant, Virasamy Valliamah, avers that a plot of land at Chamouny, belonging to his late father-in-law, Appadoo Virasamy, has not been equitably shared among the heirs and compensation has not been given to those who were allocated a lesser share of land. He filed a case in the Supreme Court ten years ago, but stopped the legal procedure because of increasing costs associated. He wants to have an equitable share.

The applicant has not submitted any document in support of his averment. No copy of Court case has also been submitted.

He has been called to submit necessary documents to show how he is related to Appadoo and to hand over the relevant document concerning the Court case.

In the absence of the documents asked for, the Commission is unable to advise the applicant.

\*\*\*\*\*

**CASE NAME: CASTOR**

*TJC/L/0186/SAVRY MARIE RHIMANTE born ANTOINETTE*

The applicant, Marie Rhimante Savry, avers that there are legal irregularities concerning a plot of land of an extent of 22 *Acre*s 85 perches located at Petite Pointe-aux-Piments, Pamplemousses District, which originally belonged to François Gustave Castor, her great-grandfather. In fact, the applicant declares that she is an heir, among many others, of the said plot of land through her grandmother Germaine Gustavie, the granddaughter of François Gustave Castor. Marie Rhimante Savry avers that there are people like late Soomundur & Heirs as well as one Bundhoo, who are using part of the land for plantation purposes and are now claiming ownership of the land.

In 2001, the applicant, with other heirs, entered legal action against the Mauritius Irrigation Authority to prevent them from using the land. The case was mentioned in a local newspaper. The applicant notes that the land is not abandoned, as some heirs of that plot of land have already built their houses on it and her cousins used it for cattle-rearing purposes.

She requests the Commission to intervene and regularize the legal situation of that plot of land so that all the heirs might obtain their fair share.

Marie Rhimante Savry deposed before the Commission and explained how over the years the land has passed on to a number of heirs and successors. In so far as the applicant is concerned, it appears that the share bequeathed to her was originally of 2 *Arpents* and not 22 *Arpents*.

A report by Land surveyor R.A. Jeewa, in the context of a case at the Supreme Court (SCR No. 59941) mentions that the limits of the property have been modified. For years, she has been trying to regain her lost property and has spent quite a considerable amount of funds towards that end, but in vain.

Solicitor Ramano, who has been looking after her case and who promised to attend the hearing session, failed to attend for unknown reason.

\*\*\*\*\*

**CASE NAME: L'INDIFFERENTE/THOMAS**

TJC/ L/O187/RUSSIE JOSEPH CARL

Jean Carl Russie claims that his great-grandmother, Gilda L'Indifférente, married one Thomas who was the owner of two plots of land of 1 *Arpent* 27p and 1 *Arpent* 20p approximately situated at Grand Gaube. The applicant occupies part of the second plot of land, that is, the 1 *Arpent* 20 p. The first plot of land, that is, the 1 *Arpent* 27 p is occupied by two families. He made a deposition to the Line Barracks Police Station but nothing has been done and these families are still illegally occupying the land. He has many problems with them.

Three heirs to these lands: Monique Lacharmante, Yolande Thomas and Stellina Laichoo have made a "*bordereau d'achat*" (purchase note) on the 1 *Arpent* 20 perches with one Ramano who has paid them a sum of about Rs. 1,100 – Rs .1,500. Meanwhile Russie's uncle has made a prescription on the 1 *Arpent* 20p occupied by him. In 1975, the applicant's father went to Court and was able to cancel the prescription. The Court sent Land surveyor Sunassee to survey the land. Since the applicant's father did not pay Surveyor Sunassee, the latter did not register his report at the Registrar Office.

As Ramano is now deceased, the applicant contacted his daughter who is an Attorney-at-Law. She told him that she has nothing to do with the agreement that her father made with the three heirs. She told Mr. Russie that her father was a "*prête-nom*" for Surveyor Sunassee who was the brother-in-law of her father. It is Sunassee who wanted to purchase the land. She also declared that the applicant could do whatever he wanted with this land and that she would not interfere. Jean Carl Russie wants the Commission to help him prove that he is a legal heir to both lands and to get his share of the land. He submitted no document, saying that that he would bring all his documents when he would depone.

After searches undertaken by the Commission, the facts of the case are as follows:

In terms a deed dated 14<sup>th</sup> November 1890 and transcribed in Volumes 193 No. 382 and 218 No. 3, late Marie Ezilda L'Indifférent (wife of Clément Thomas) purchased two plots of land at Grand Gaube each of extent of 1 *Arpent*. No affidavit establishing the names of the heirs to that succession was drawn up at the death of Marie Ezilda L'Indifférent and that of her husband.

On the 18<sup>th</sup> September 1958, Late Joseph Russie, apparently one of the heirs of Ezilda L'Indifférent, caused an affidavit of prescription to be sworn alleging that he has been occupying with all the requirements of prescription, a portion of land of the extent of 1 *Arpent* (being one of the 2 plots here referred. The affidavit of prescription is transcribed in Volume 762 No. 82. One of the heirs of Ezilda L'Indifférent, namely Elibert Russie, entered a case against the heirs of late Joseph Russie, before the Intermediate Court (CN 149/73) and obtained judgment against them namely: the affidavit is declared null and void and the land belongs to the legal community of goods and property which has existed between late Marie Ezilda L'Indifférent and late Clément Thomas and consequently it now belongs to the succession. There is in file a *dépôt* being an "*acte sous signatures privées*" registered in TV 2652 No. 8, dated 21<sup>st</sup> November 1975 purporting to be a sale of undivided rights amounting to 3/5 of the above properties made by the 5 heirs of E. L'Indifférent to Lutchmaya Ramano. It seems that only a part payment of Rs. 3,300 out of Rs. 15,000 was effected by Lutchmaya Ramano and that the "*solde*" was to be paid to Samy Sunassee on the day of the signature of an authentic deed.

In the meantime, Samy Sunassee as well as Lutchmaya Ramano, his brother-in-law, passed away.

Now the heirs who entered the deal are at a loss.

The Commission still notes that, as at today, no affidavit of succession has been made at the death of Ezilda L'Indifférent and the rightful heirs still hold undivided rights in the succession

The Commission is of opinion that the heirs may now proceed with the division in kind of the land and have been so advised.

\*\*\*\*\*

**CASE NAME: GEFREY or (GEOFFREY) WILFRID**

TJC/ L/0188 FRANCHIN MARGARET (born PAUL)

The applicant, Margaret Franchin says that her grandfather, Wilfred Geffrey, owned a plot of land of 1 *Arpent* at Saint-Martin, Baie du Cap. Wilfrid Geffrey borrowed money from one Cader Hossenbaccus and therefore sold the said 1 *Arpent* in a '*vente à réméré*'. The applicant says that Cader Hossenbaccus had by then sold the land to one Makia Luchmun and Wilfrid Geffrey did not do anything to get his land back. The land has been sold to 5 different persons since then. The family wants to know whether they still have rights to the property and eventually get it back.

Searches carried out at the Mortgage office confirmed that indeed Wilfrid Geoffrey owned 1 *Arpent* at St. Martin Baie du Cap. Same was sold to one Cader Hossenbaccus a "*vente à réméré*" in terms of the deed transcribed in Vol 705 No. 168 dated 5<sup>th</sup> January 1957.

According to the deed, "*droit de réméré de vendeur le Réserve expressément jusqu'au 4 janvier 1958, la faculté de réméré se fera par le vendeur en remboursant à l'acquéreur le prix principal de la présente vente et les frais et autres coûts du présent contrat à défaut par le vendeur d'avoir affecté à rembourser dans le délai et de la manière ci-dessus stipulée, il sera déclaré de plein droit et la dite faculté de réméré et l'acquéreur restera propriétaire comme totale du dit lieu sans qu'il soit besoin a cet égard d'aucun acte de procédure quelconque.*"

According to TV 739 No. 60 dated 23<sup>rd</sup> January 1958, Cader Hossenbaccus sold to Makeea Lucheemun, a plot of land at St. Martin. There is an observation in the deed to the effect that "*qu'aux termes du contrat d'acquisition sus relate Mons. Wilfrid Geoffray s'était jusqu'au 04/01/58 la faculté de réméré sur le dit terrain (bien) et que ce réméré n'ayant jamais été exercé par le dit Sieur Geoffray, Mons. Cader Hossenbaccus est resté propriétaire incommittable du dit bien*".

In the light of the above, the Commission is of opinion that Wilfrid Geoffrey having not exercised his right to re-acquire the land within the set period, Cader Hossenbacus was in his right to sell same. Consequently, the heirs have got no rights to the land now.

\*\*\*\*\*

**CASE NAME: ESPIEGLE**

TJC/ L/0189/ESPIEGLE Louis Philippe

Louis Philippe Espiègle, the applicant, says that his grandparents owned four acres of land at La Croisée, Glen Park, Vacoas, where he is presently living. There are many other people occupying the land. He says that one Antoine Teddy Ghoorana, a heir, prescribed part of the land and sold it to K. Gopaul. The applicant says that he is/was aware that Antoine Teddy Gourana prescribed the land but he was unaware when the land was sold. He further adds that the land is, however, still unoccupied and he wants to recover the land.

Searches undertaken by the Commission reveal the following:

- According to a deed of sale transcribed on 14<sup>th</sup> April 1875 in TV 118 No. 7, Delphine Battoire sold to Victor Espiègle  $\frac{1}{4}$  undivided right of a portion of land of extent 4 *Arpents* at Croisée Glen Park.
- According to another deed of sale dated the same day transcribed in 117 No. 364, Delphine Battoire sold to Ernest Maccabée  $\frac{1}{2}$  undivided right in the above- mentioned portion of land.

- According to an Affidavit of Prescription dated 15<sup>th</sup> April 1987 and transcribed in TV 1895 No. 86, Marthe Anodin (widow of Louis Gabrielle L’Aiguille) caused 2 portions of land at Camp Créole, Glen Park to be prescribed. The first of an extent of 1474.6m<sup>2</sup> and the second of extent of 1033.1 m<sup>2</sup>.

The above plot of 4 acres has been the subject-matter of many Court cases namely: M.D. Tickfine - versus W. Martha Christoharry and others.

The case of M.D Tickfine and others versus W.M. Christoharry has been resolved in the Supreme Court with S.L.S Max Derblay being appointed as Arbitrator.

As regards Antoine Teddy Goorana, the only plot of land having belonged to him is “*droits indivis*” in an extent of 18.5 perches which he sold to Carcasse and others at Vacoas, as evidenced by TV 1663 No. 55 dated 28<sup>th</sup> March 1989.

*The above report refers also to connected case no TJC/L/155 dated 21<sup>st</sup> June 2011. In reference to TJC/L/0155/Gouranna Jacques Laval/ Gouranna Rosemay*

The Commission notes that:

- The applicants declare that Delphine Battoire had given to Victor Espiègle the following:
  - Plots of land of a total extent of 210 *Arpents* at Glen Park, Camp Roches and Hollywood.
  - Plots of land on which stand Saint Paul church, C.W.A offered Glen Park Government School.
- It is not known how Jacques Laval Gourana is related to Victor Espiègle as no family tree has been produced nor any affidavit, drawn after the death of the ancestors, submitted.
- Searches carried out at the Register General’s Office revealed that Victor Espiègle had acquired on 14<sup>th</sup> April 1875 as indicated by TV 118 No. 7, one quarter of undivided rights in a plot of land of extent of 4 *Arpents* from Delphine Battoire.
- “*Répertoire*” 65 No. 325 indicates that this plot of land ¼ undivided rights in the 4A as purchased by Victor Espiègle has not been sold.

In conclusion, according to deed transcribed in TV 118 No. 7 and confirmed by searches carried out at the Mortgage Office, it appears that Victor Espiègle purchased ¼ undivided rights in ownership in a portion of land of 4 *Arpents* at Plaines Wilhems; the other co-owners are Jean Félix Sinapa and Jeanne Battoire. The land of 4 *Arpents* has not been sold and or disposed of.

The applicants have been advised to establish themselves by way of an affidavit of succession that they are the heirs and successors of Victor Espiègle. The heirs should then proceed with the division of land.

As regards the second case, the portion of land is not mentioned in the “*Case hypothécaire*” of Victor Espiègle.

\*\*\*\*\*

**CASE NAME: DALMOND**

*TJC/L/191/ DALMOND DEWANAND*

**Case 1**

The applicant, Dewanand Dalmond, says that in 2002, a loan of Rs. 2 million was approved for him by Delphis Bank. After two months, the bank shut down its business. On its last day of operation, a Friday, the bank issued a cheque and gave it to applicant’s Attorney, Me Avrillon. The applicant states that he did not receive this sum of money. When Dewanand Dalmond contacted the bank, the officers replied that nothing can be done. After two months, the bank re-opened as First City

Bank. The applicant saw in his statement of accounts that the Rs. 2 million was indeed credited in his account and a further Rs. 110,000, which represented the interest on loan, was debited.

Dewanand Dalmond, for his part, says that he never received this sum of Rs. 2 million. He went to the bank to protest and he was made to understand that the bank will return the amount of interest but this was never done.

He made a request to the Commission to help him recover his money.

**Case 2**

On the other item of land recovery, the applicant says that his grandfather, Jugdarry Dalmond, purchased 2 portions of land from Médine Sugar Estate. The two portions of land are respectively 2.2 Acres of land at Bassin Road, Quatre-Bornes and 2.2 Acres at Palma, Quatre-Bornes. The applicant does not remember the year of purchase. The father of Jugdarry Dalmond had nine heirs including the latter. However, the Civil Status Office does not recognize Jugdarry Dalmond. The latter died at the age of nineteen and the remaining eight heirs sold the land. Applicant says that the land belonged to the heirs of Jugdarry Dalmond and an injustice had been committed on them. They did not receive anything but they were aware when the land was being sold. The father of the applicant, Bennymadoo Dalmond, was sick and admitted to hospital for one month and he could not do anything. The applicant was asking himself how the authorities could have allowed this sale, without taking care of the heirs of Jugdarry Dalmond.

Dewanand Dalmond requests the Commission to prove that the land which the family is claiming belongs to Jugdarry Dalmond.

He further adds on 15<sup>th</sup> March 2010, whilst discussing his case at the Commission that when his grandfather purchased the land from Médine Sugar Estate, he was given a receipt. He asks also that the Commission looks for that receipt at the Mauritius Archives.

After searches and analysis of this case, the Commission concludes that Dewanand Dalmond’s claim that his grandfather, Jugdarry Dalmond purchased 2 portions of land of 2.2 Acres each at Bassin Road, Palma, Quatre-Bornes does not stand as the very name of Jugdarry Dalmond does not appear in the Repertory at the Registrar General’s Office.

However, there are 2 plots of land at Palma, La Louise having belonged to Dalmond Passenger as per TV 783 No. 29 dated 29<sup>th</sup> April 1958 and TV 353 No. 574 dated 4<sup>th</sup> April 1922. These have been sold out as evidenced by TV 795 No. 184 and TV 795 No. 144 dated same as at 25<sup>th</sup> September 1959.

In the light of the above, there is no plot of land still in the name of Dalmond (“Répertoire” 268 No. 807 and “Répertoire” 181 No. 147), as the two portions of land belonging to applicant’s grandfather - not his father - have already been sold.

Dewanand Dalmond has been informed accordingly.

As regards **Case 1** related to the Delphis Bank, it appears that a loan of Rs. 2 million had been approved and a cheque was sent to his Notary. Unfortunately, the bank was put in Receivership and later taken over by First City Bank.

So, Me. Avrillon, Notary public, returned the cheque and a new loan was granted to him by First City Bank.

The request of Dewanand Dalmond for the recovery of the interest from the Bank on the first loan does not fall within the ambit of the Commission.

\*\*\*\*\*

**CASE NAME: JOORAMUN**

TJC/L/0192 AJOODHEA DHARAMDEO

The applicant, Ajoodhea Dharamdeo, claims that his ancestor, Tooramun Luchmun, has a plot of land of an approximate extent of 4 - 5 *Arpents* in the region of Congomah. The land was used for agricultural purposes and his grandparents and other relatives were cremated thereon.

He claims that at the death of his maternal uncle in 1997, one Soobrun Tangaree occupied the land illegally. His request that the Commission recover back the plot of land and distribute it among the rightful owners.

Searches undertaken by the Commission reveals that Tooramun Luchmun married to Polestree Jankeepersad acquired in 1946, as per "*Répertoire*" 349 No. 267, 3 plots of land (i) at Calebasses of an extent of 1 *Arpent*, (ii) the family, then purchased ½ *Arpent* and 50 perches as evidenced by TV 499 No. 407 and, (iii) in 1975, acquired another 3 *Arpents* at Calebasses as evidence by TV 1275 No. 77.

However, on 3<sup>rd</sup> June 1992, Luchmun Tooramun sold the above-mentioned plots of land at Calebasses to C.Luchmun for the price of Rs. 100,000 as per TV 2356 No. 76.

The Commission is of the opinion that the claim of ownership of 4/5 *Arpents* does not arise as same has already been sold as per TV 2356 No. 60.

It is worth mentioning that a '*mise en demeure*' as evidenced by TV 466 No. 787 on 6<sup>th</sup> June 1998, was served by Attorney at Law O.N. Abbasakoor at the request of heirs Luchmun Tooramun on Soobrun Tangaree regarding the illegal occupation by the latter on a plot of land at Calebasses.

The heirs of Tooramun Luchmun has not gone to Court on that issue as the said Tooramun Luchmun has acquired undivided rights "*s'élevant à une mobilité en toute propriété et une huitième en usufruit dans un tiers indivis qu'il avait acquis....*" being all that remains (after several distractions) from a portion of land of 14 *Arpents* 14 perches at Plaines Calebasses.

So, concerning the land mentioned in the '*Notes mise en demeure*' same cannot be considered as the ancestors of applicant had '*only ½ TP, plus 1/8 "usufruit" in 1/3 undivided rights....*'

As regards the occupation by one S. Taugaree, the Commission is of opinion that it is worth mentioning.

It appears that the land is still in a state of undivision.

The applicant has been advised to proceed by way of division in kind ("*partage*") of the land among all the parties who have a share in the land.

\*\*\*\*\*

**CASE NAME: HOYBUN**

TJC/ L/193/HOYBUN BIBI FAWZIA (born BABOO)

The applicant, Bibi Fawsia Hoybun, says that her grandparents possessed a land of one acre at Grand River North-West. The land was equally divided between two heirs; the father and aunt of the applicant. She avers that she is now the only heir of the ½ acre of land.

She says that a family Goinden is living on part of the land since the 1980s. She made several complaints at the police station. She paid an Attorney the sum of Rs. 3,000 to put a case in Court, but he did nothing. According to her, the Attorney even insulted her and her husband.

The applicant even went to the Municipality of Port Louis, as the Municipal Council had a road built over their land without prior permission from the Hoybun family. This protest was not considered.

Several letters were written to ICAC, Municipality of Port Louis, *Cadastre* and other authorities concerned, but, to no avail. She adds that the Goinden family has obtained a Development Permit from the Municipality Council of Port- Louis to build their house.

On Tuesday 9<sup>th</sup> March 2010, the applicant went to the police station for assistance. Two policemen Nuttoo and Nasurally, from the Central CID visited the land. She has not been made aware of the outcome of the police enquiry.

Finally, fed up with such uncommon attitude from all quarters, the Hoybun family decided to put up a case in the Supreme Court, asking to declare the prescription made by R. Goinden & Ors to be null and void. No document in support of this submission has been produced. It is understood that the applicant has retained the services of an Attorney for that purpose.

In view of the Court case, the Commission has not examined this case further.

\*\*\*\*\*

**CASE NAME : ADYCALUM**

*TJC/ LI/ 194/314/ MAGON MARIE ANNE*

Marie Anne Magon claims that her grandmother, Adycalum No. 337790 had a plot of land of an extent of 42 perches at Quatre-Bornes and that the grandmother’s grandchild, one, George Thomassoo, lived on that land. It appears that George sold that land to people living in the surroundings. Another case has been referred to the Commission. It relates to applicant’s grandfather, Anthony Thomassoo, who owned a plot of land “*somewhere*” of the extent of 19 perches. This case is being supervised by Solicitor, Jean-Christophe Bellepeau. They would like the Commission to investigate about the plot of land.

Searches undertaken by the Commission at the Registrar General’s Office have revealed the following:

In virtue of a Notarial deed drawn up by Notary, Paul Baissac dated 15<sup>th</sup> October 1913 and registered in CL 57 No. 1587, the Mauritius Estates and Assets Company Limited sold to l’Indienne Adycalum No. 337790, wife of Thomadoo No. 337789 a plot of land at La Louise of the extent of 92 perches and bounded by the survey report of S.L.S Parsons dated 7<sup>th</sup> October 1913 registered in Register in L.S11 No. 860.

It appears that as per TV 3229 No. 7, one Goindasamy Runghen did cause an affidavit to be solemnly affirmed to the effect that he had allegedly been in possession of and occupying with all the requisites of prescription an extent of 1769.85 m<sup>2</sup> at La Louise according to a Memorandum survey drawn up by Land surveyor, S. Beehuspoteea, on 28<sup>th</sup> April 1997 and Registered in cs 33 No. 4597 on 17<sup>th</sup> November 1998 transcribed afterwards in Volume 3967 No. 2. R Goindasamy Runghen sold an extent of 1218.55 m<sup>2</sup> excised from the prescribed portion of land of extent of 1769.85 m<sup>2</sup> to Oomarduth Luchhun for and in consideration of a price of Rs. 578,000.

Thereafter Goindasmy Runghun sold the ‘*solde*’, that is, 464.30 m<sup>2</sup> to Marday Runghen on 17<sup>th</sup> November 1998 in terms of a deed transcribed in Vol 3967/103.

The applicant deponed before the Commission and was advised to initiate Court proceedings to recover the land prescribed. One Rajendri Veerapen later called at the office and informed the Commission that the Thomassoo family had retained the services of Land surveyor, K. Koheratee, to survey the land with a view to initiating a Court action. It is not known whether any progress has been made so far and whether legal views have been sought by the applicant.

**CASE NAME: ELISE***TJC/ L/196 ELISE MARIE MARCELINE (BORN BERNARDIN)*

The applicant, Marie Marceline Elise, says that she leased a plot of State land, obtained through the Central Housing Authority (CHA) located at No. 10 Chebel Housing Estate. She mentions that with much effort and sacrifice she got the permission to build a tobacco shop ("*tabagie*") annexed to her house on that plot of land. However, the poor condition of the building prompted her to take a loan of Rs. 225, 000 from The Mauritius Housing Corporation (MHC) for renovation purposes. As the previous loan was not enough to complete the works, she applied for an additional loan of Rs. 50, 000 at the MHC. The loan was refused and MHC gave as reason that applicant did not have the relevant document from CHA.

Marie Marceline Elise was requested by CHA to modify the lease and apply for the purchase of the land on which her house is found. She engaged in the required procedures but a police officer, one Thomas, residing in the locality interfered in the process. According to applicant, Thomas, she alleges, in connivance with an officer of the CHA, one Runghen, prevented her from obtaining the relevant Documents to get her loan approved. As a result of this, applicant had to face several difficulties ranging from inability to pay debts, additional rental claimed by CHA and the eventuality of her house being seized by MHC for non-repayment of loan.

Pertaining to the above mentioned difficulties, applicant has lodged a complaint to the Public Complaints Bureau in 1999 and to the Ombudsman's Office in 2008. Ombudsman's Office has perused her case with the relevant Ministry and cleared misunderstandings concerning arrears.

The applicant's request has been look into by the Commission. Her initial loan with the MHC has been written off. The applicant furthermore wants the Commission to investigate whether the said Runghen had the right to interfere and prevent applicant from having loan adjustment.

After investigation of this case at the Ministry of Housing and lands, the following came to light:

The complainant is owner of the CHA House standing on a portion of land at Cité Chebel leased as a residential site.

Apart from the house, she applied and obtained permission to have a General Retailer's shop on the land. Hence the rent was increased by Rs. 300.

While the question of arrears has been settled, the issue of ownership of the land is still arising. She may purchase the land as offered by Government, but in the first instance she has to settle the current rent.

Although the request of the applicant does not fall within the mandate of the Commission, it should be noted that after intervention, the issue of the payment of rent has been settled at a meeting held on 8<sup>th</sup> March 2010. The purchase by her of the land on which stands her house and shop from Government will solve all her problems.

\*\*\*\*\*

**CASE NAME: JADDOO**

*TJC/ L/0197/JADDOO MAHMAD FAWSI*

Mahmad Fawsi Jaddoo, the applicant, says that his grandfather owned a plot of land of 16 Acres at Petit Verger. When he died, the Spéville family prescribed the land and sold it. The applicant came to know this when the inhabitants of Moka told him that his grandfather had given 12½ perches to build a mosque. The Jaddoo family wants to get land back.

In a second claim, the applicant adds that his grandfather also owned an estate at Belle Rive. He does not know the exact location. When his grandfather died, the Island Estate took over the land. Moreover, he says that there are many prescriptions on the land and that he does not possess any document concerning this land.

Searches carried at the Mortgage Office revealed that the name Jaffar or Juffor or Jafar or Juffar No. 124029, does not appear in the Name Index of the "*Répertoire*" at the Registrar General's Office.

However, there is still a Court case between St. Pierre Mosque and Hifzul Iman Society and the claimant regarding a plot of land of extent of 12 ½ perches (1/8 *Arpent*) at Petit Verger, Moka, which plot of land is Waqf property.

In view of the above the claimant has been informed that after searches effected, his grandfather did not own land of the extent of 16 Acres at Petit Verger.

As regards, the land of extent of 12 ½ p, it is "*Sub Judice*".

\*\*\*\*\*

**CASE NAME CHRISTOPHE**

*TJC/ L/198 CHRISTOPHE GEORGES KARL: MOV BIEN ETRE BATTERIE CASSE*

This is a non-land issue, as the file deals with a project at Batterie Cassée for the construction of a development building and which requires State Land for that purpose.

In fact from the documents submitted, the project calls for the setting up of a "*centre polyvalent d'activités pour un public inter-génération*", while Government undertook to release 4 *Arpents* for a sport complex, as per document submitted by applicant Georges Karl Christophe.

On 15<sup>th</sup> August 1997, the Cabinet decided to release 4 *Arpents* of land at Carreau Ecalyptus, Batterie Cassée, for the purpose of constructing a polyvalent Sport Complex. The "*Movement Bien-être Batterie Cassée*" is complaining that nothing has been done up to now. The documents produced do not reveal a dispossession. As Batterie Cassée is a sensitive area where the residents feel excluded, the case has been referred to the Social Justice Section.

\*\*\*\*\*

**CASE NAME: MOLLIERES**

TJC/L/199 MOLLIERES EDLEY JOHN

Edley John Mollières, the applicant, and his brother say that their grandparents owned a plot of land of 15 Acres at Mare D’Albert. The cousins of the applicant inherited and bought several plots of land. They were proprietors of several sugar plantations. The applicant says that he is unaware of the history of land. But he knows that his cousins and the Chapman were partners. And the Chapman even guaranteed the Mollières for the purchase of land. The Chapman also filed a case against the Mollières for unknown reasons. The Mollières lost the case because they were not present during the hearing. The applicant says that he is unaware who the actual owners of the land are at present.

They request the Commission to rediscover the history of the land, recover the land and make justice prevail. They submitted a number of documents which have no bearing to the claim.

Searches undertaken by the Commission reveal that there is no plot of land of the extent of 15 Acres at Mare D’Albert in the name of the Mollières. In fact, the Mollières were in partnership with the Chapmans and, at one time, the Chapman became the owners of the land of the Mollières. No details were submitted regarding the Court case. In the circumstances the claimant has still to show how he has been dispossessed.

\*\*\*\*\*

**CASE NAME: SANS SOUCI**

TJC/ L/200 Louis Georges Jean Claude Sans Souci,  
Jean Ronial Cassadin & A.Ah-Siong

According to the applicant, M. R. Sans Souci, his great-grandfather on the maternal side, Noë Sans Souci, was an heir of a plot of land of 6 Arpents 14 perches, situated at Pointe-aux-Piments. However, applicants were unable to find any document concerning the existence of Noë Sans Souci, except for his name on the birth certificate of Félix Sans Souci who is the maternal grandfather of applicant Louis Georges Jean Claude Sans Souci.

The plot of land is currently partly unoccupied and according to applicants, planters have entered and cultivated the other part of the land. Applicants Sans Souci and Ah-Siong are descendants of Félix Sans Souci through their mothers, while Ronial Cassadin is married to another descendant of Sans Souci. The applicants want to prove that they have legal rights to the plot of land through their ancestor, Noë Sans Souci, and eventually recuperate the plot of land.

The Commission carried searches which revealed that the names of Noë and Félix Sans Souci do not appear in the “Répertoire” of the Registrar General’s Office.

However, further analysis of copy of “Répertoires” 30 No. 627 and 30 No. 632, obtained at the Conservator of Mortgages Office, the plot of land at Pointe- aux- Piments of an extent of 6 Arpents 14, belonged to the Sans Souci family namely Clara, Cécile, Victor, Loïd, Aline, René and Alphonse, jointly and individually 1/7 to each “dans la propriété de la moitié indivisé d’un portion de terrain de la contenance de 6 Arpents 14” as per TV 49 No. 213, dated 14<sup>th</sup> April 1848.

As there has not been entry to any sale, the Commission is of the opinion that the plot of land still belongs to the Sans Souci family by title. They have been advised to consult a Land surveyor to identify the land and subsequently to initiate action for the division in kind of the land once the family tree has been established.

**CASE NAME: POORUN**

TJC/ L/0201/RANBALLY BAGO (born POORUN)

Bago Ranbally, *born* Poorun, the applicant claims that her grandfather Sookur Poorun was the owner of a plot of land of 1 *Arpent* 13 perches situated at Anse Courtois, Les Guibies, Pailles which he acquired by prescription. Her family has been occupying this land and she herself was born on this land. In the beginning of 1980, one Baulaucky contested their title. One day, she avers the said Baulaucky came and forced them to vacate the land by using force. He took all the family personal belongings and put these on the street. The applicant and heirs have brought a case to Court but they have lost their case because, they claimed that their lawyer did not present all the title deeds to the Court. The family requests the Commission to help them to get back the land of their grandfather

The Commission inquired into this case.

In short, the claim of Ranbally Bago, *born* Poorun is to the effect that the plot of land of about 1 *Arpent* at Les Guibies, Pailles, belonging to heirs Sookun Poorun, has now been taken over and prescribed by one Mamade Baulaucky who apparently sold it to one Atchia (Atchia Ceramica). The Commission has looked into the judgement - B. Poorun & Ors (Plaintiffs) v/s M. Baulaucky (Defendants) - wherein the Judge "*agrees with the explanation given by the defendant's surveyor that the land mentioned in the said affidavit is probably lot 16, as earmarked by G. de Coriolis in his memorandum of survey and that the land claimed by the Plaintiffs comes from lot 7 of the same Document*".

Called by the Commission on 21<sup>st</sup> March 2011, Ranbally Bago, who was accompanied by his sister, was explained of the above. The attention of his sister has been drawn to the fact that she has been occupying the wrong portion of land and that in their interest, they should locate the plot 7 which, it would appear, belongs to them.

\*\*\*\*\*

**CASE NAME: RAMKALAWON**

TJC/ L/ 0202 RAMKALAWON VINITA

The applicant, Vinita Ramkalawon, says that in an exercise in connection with the division in kind of a piece of land situated at L'Espérance, Quartier Militaire, the applicant and her family discovered the existence of a piece of land of 65 perches situated at Dagotière, Valetta.

The applicant's grandfather, Ramdayah Ramkalawon, and grandmother, Durmateea Ramkalawon, maintained during their lifetime they once occupied and worked on a plot of land of approximately of 1 *Acre* in Dagotière. After the death of Ramdayah Ramkalawon, Durmateea asserted that they were dispossessed of that plot of land by their close relatives. The applicant did not clarify how this dispossession had taken place. However, it appears that the dispossession occurred in, what she qualifies, "*an unjust manner*." The applicant and her family was all living in UK and was unable to investigate into the matter.

In fact, the land was prescribed by applicant's family. The applicant's father and grandmother were unaware of this prescription.

Vinita Ramkalawon relates that her father was a minor at that time the whole issue of prescription occurred. His elder cousin, Haireelall Ramkalawon, having made successful application to become the guardian of minor Ramdayah Ramkalawon prescribed the land on behalf of the minor. Half of the land is sold and the other half is retained by one Charitar Ramkalawon, though the applicant is not sure about this.

The applicant's grandmother, having married her grandfather under legal community of goods and property in 1935, still had a right of usufruct as the surviving spouse. However, by virtue of a

*“délibération de conseil de famille”*, she was deemed to have sold all of her rights to the buyer, Charitar Ramkalawon. She insisted that during her lifetime that she had not sold her rights.

Charitar Ramkalawon’s father alleged that he was the actual person working on the land at Dagotière, not the grandfather and grandmother of applicant. And to back up this allegation, an affidavit was drawn up. This affidavit has been retrieved from the Registrar including prescriptions and subsequent sale documents of the land. The applicants have carefully read these Documents and discovered many inconsistencies in drawing up and execution of the Documents.

Some inconsistencies:

The applicant’s grandparents alone occupied the land, not the father of Charitar Ramkalawon who died almost 20 years before the prescription of the land.

Because the applicant’s grandparents alone occupied the land after their grandfather’s death, only the legitimate spouse and children would have the rights to prescribe the land. However, the 1956 prescription Document, as well as giving applicant’s grandmother and grandfather that rights, gave all the brothers, sisters and their children the same right to prescribe the land as it was maintained that the land was left to them on the death of Charitar Ramkalawon’s father who did not perform a civil marriage.

The Commission has, indeed, been put in front of a complicated case with many inconsistencies and difficult explanations.

The applicant has been requested to submit a proper affidavit of succession, but she has no locus standi as her father is still alive.

\*\*\*\*\*

**CASE NAME: TAKUN**

*TJC/ L/203 MANDEEA VISNOOH*

The applicant, Visnooh Mandeea, avers that he and his wife were owners of a plot of land of 20 perches at Floréal. The plot of land originally belonged to the grandfather of applicant’s wife. The latter lived on the land during 69 years while applicant lived there for forty years after getting married. The couple built their house on the plot of land. Visnooh Mandeea declares that no one in his family was aware that one Harry Mungur prescribed the plot of land.

The applicant says that Mungur has been claiming possession of the land for around 25 years. This culminated into a Court case in 2004 which the applicant lost. According to Visnooh Mandeea, his lawyer did not plead his case properly nor submitted all documents in Court.

He submitted a press article from which additional information was extracted.

Visnooh Mandeea requests the Commission to help him and his family in getting back the land.

On 12<sup>th</sup> August 2010, the Commission phoned applicant and requested him to contact the Police to know about the outcome of case, as advised by Director of Public Prosecutions. He promised to do needful and to inform the Commission as soon as possible.

An analysis by the Commission reveals that the case is thoroughly elaborated by a judgement delivered on 1<sup>st</sup> July 2002 by the Supreme Court against Nundloll Taken & Ors to quit leave and vacate a plot of land at Rivière Sèche, Floréal and to move out of the buildings by 31<sup>st</sup> August. Moreover, he was summoned to pay Rs. 25,000 as damages with costs, while the judgement holds that Harry Mungur is the rightful owner of the land by acquisitive prescription.

Nundloll Taken, not satisfied with the judgement, went on appeal against a decision of the Trial Court. The appeal was dismissed with costs by two Judges in March 2004.

There is also on file the *verbatim* record of an oral question bearing no B/97 relating to the Takun family and the prescription of their land put up by Honorable Megduth Chumroo to the Honorable Prime Minister at a sitting of the National Assembly held on 22<sup>nd</sup> February 2005.

Commissioner Jacques David wrote to the Commissioner of Police on 11<sup>th</sup> April 2011 to inquire into the case and to better understand the manner in which the prescription of the 25 perches was made as well as the role played by the witness, one Gangaparsad Binda, in the prescription plea and affidavit.

In a letter dated 11<sup>th</sup> May 2011, the Commissioner of Police, through the Assistant Superintendent of Police, A. Kissoondoyal, replied that:

- On the 2<sup>nd</sup> February 2005, the Director of the Public Prosecutions advised prosecutions as follows:-
  - **Against Mr. Harry Mungur for :-**
    - Giving instruction to solemnly affirm a false affidavit;
    - Giving false evidence in civil matter.
  - **Against Mr. Gangaparsad Binda for:-**
    - Solemnly affirming false affidavit;
    - Giving false evidence in civil matter.
- On 1<sup>st</sup> April 2005, the matter was referred to Intermediate Court for proceedings. On 30<sup>th</sup> August 2006, Defence Counsel communicated to the Court that his client Mr. Gangaparsad Binda has a fading state of health.
- On 13<sup>th</sup> February 2008, Mr. G. Binda was examined by Dr. S. Parsad Jankee, Police Medical Officer. In his report, Dr. S. Parsad Jankee stated that Mr. G. Binda is unfit to stand trial.
- Thereafter, the file together with the medical report was sent to the DPP's Office for further advice.
- On the 22<sup>nd</sup> April 2008, the DPP's Office advised no further action into the matter against both accused, Mr. Harry Mungur cannot be prosecuted as the testimony of Mr. Gangaparsad Binda is imperative to prosecute him.

It is worth noting that the Honourable Prime Minister, Dr. Navinchandra Ramgoolam, in his reply to PQ bearing No. B/97, underlined that "*it is the intention of Government to help the poor couple who is facing a very difficult situation*". The whole matter has been referred to the Trust Fund for the Rehabilitation of Vulnerable Groups and to report back to the Prime Minister.

\*\*\*\*\*

**CASE NAME: ROUSSEL**

**TJC/L/204 ROUSSEL DESIRE EMMANUEL**

Désiré Emmanuel Roussel, the applicant, says that his great-grandparents possessed a plot of land of 325 Acres at Plaine Magnien. He avers that the Mon Désert-Mon Trésor Sugar Estate cultivates sugarcane on the land. The applicant says that he is unaware of the history of land. He came to know about it by doing searches at the Archives.

He claims that his ancestors had a plot of land in the region of Grand-Port District. He avers that his family has been dispossessed of the land which is at present occupied by S.I.T.

He wants to recover the land and, in addition, to obtain compensation, he submitted some photos of a "pirate cemetery" being supposedly 'Cimetière Roussel' where members of the family are buried.

In support of his claim, Désiré Emmanuel Roussel submitted a deed of concession dated 12<sup>th</sup> April 1971 in Volume 6 No. 141 being a "concession" of 312½ *Arpents* situated at Rivière-La-Chaux in the District of Grand-Port, granted to Henri Roussel.

This case has been heard by the Commission. The applicant has not produced any affidavit of notoriety or Family Tree. He does not know the exact location of the land and it has not been surveyed. There is no site location plan or Survey report.

It is not known whether Désiré Emmanuel Roussel is the great-grandson of Henri Roussel as no family tree has been produced.

There is no indication that, apart from the tombs, the Roussel Family has ever occupied the land.

The "concession" document submitted is not an "Acte Authentique" and the dimensions of the "concession" are not given. The plan of the Land Surveyor Henri Mart drawn up on 22<sup>nd</sup> November 1770 is missing.

Searches undertaken by the Commission revealed the following:-

- The above plot of land does not appear in the "Case hypothécaire" of Henri Roussel or that of Jean Baptiste Alexis Roussel.
- The "pirate cemetery" is in fact the 'Cemetery Magnien' having belonged to François Magnien.
- Presently, the above-mentioned plot of land which bears field "Number 4314" of an extent of 328 hectares belongs to Sugar Investment Trust having been acquired from Mon Désert Mon Trésor in 2005 in virtue of title deed transcribed in TV 4839 No. 60.

The claimant has not been able to prove occupation and possession of the land by his parents, grandparents or great-grandparents. All he knows is that his father went on the land regularly "to clean the tombs". There is no evidence regarding plantation and/or occupation of such a big plot of land.

The applicant has been advised that he has no claim on the strength of the documents provided. He has been advised to seek legal action before pursuing the matter.

\*\*\*\*\*

### **CASE NAME: GUBHOO**

*TJC/ L/205 GUBHOO PRAKASH & Others*

The applicant, Prakash Gubhoo, avers that his grandfather, father and other immediate family members lived on a plot of land at Grand-Gaube, Bati. He himself lives on the said plot of land. He declares that, in 1995, the Bigaunah family claimed the plot of land which he and his relatives occupy. Later, the Bigaunah family sued the applicant and his relatives in Court. The Gubhoo lost the case. The applicant recalls that after losing the Court case against the Bigaunah family, he agreed to buy the plot of land for Rs. 3 million without consulting and seeking the approval of his relatives (also living on the plot of land). When made aware of the commitment by applicant, his relatives refused to proceed further in the purchase.

Gubhoo also avers that the Bigaunah family did not enter any procedure to sell the land to him; his move was intended to stop Bigaunah family from expelling him and his relatives from their houses. He appeals to the Commission to investigate how Bigaunah family won the case at the Supreme Court when the plot of land is still in the name of Gubhoo family.

The Commission analysed the whole issue and concluded it should not intervene in view of the settlement reached in court which was made the judgement of the court on the 17<sup>th</sup> February 2009. It is also understood that the applicant/s have caused an application for a new trial to be entered before the Supreme Court on 15<sup>th</sup> February 2010.

\*\*\*\*\*

**CASE NAME: DOOKNAH**

*TJC/ L/206 DOOKNAH FRANCE*

The applicant, France Dooknah, avers that his great-grandfather possessed a plot of land of 68.4 toises at Chemin Camp Poule, more precisely, at Distillerie Sainte-Hélène, Poste de Flacq. He explains that, in 1976, he paid off the other nine heirs to become the sole owner. One old lady used to live on the said land. As France Dooknah never lived on his plot of land, the neighbors always thought that the land belonged to the old lady. After the death of the latter, the neighbors squatted on the land.

In 1986, those who were still squatting the plot of land prescribed it. The applicant was not aware of this prescription. The applicant filed a case in Court, but, on the hearing day, that is on 28<sup>th</sup> January 2010, the Land surveyor was not present and he lost the case.

The Commission analysed the issue to understand what has happened.

In 1976, France Dooknah purchased from D. Dabeedoyal & others all the rights in apportion of land of an extent of 60 toises at Poste de Flacq in the District of Flacq. The said deed is transcribed in Volume 1337 No. 233.

In 2000, the applicant caused the land to be surveyed by Land surveyor, Bernard Desvaux de Marigny, who, in a comprehensive report, gave a fresh description of the portion of land and reported that it is occupied by a one-storey house.

Following searches, he found out that the property had been the subject-matter of a prescription in July 1991 and described according to a Survey report drawn up Robert Foiret, Land Surveyor, on 25<sup>th</sup> July 1990.

In 2002, the applicant filed his case at the Supreme Court asking for a judgement "*declaring and decreeing that the affidavit of prescription is null and void to all intents and purposes.*"

The matter was called on 28<sup>th</sup> January 2010 for continuation and from the records it is noted that Bernard Desvaux de Marigny, the Land surveyor, was absent on that day. A request for postponement by the plaintiff's Barrister was resisted by the respondent.

It seems that the Counsel appearing for France Dooknah had moved to withdraw the case on date of merits as his Land surveyor (a witness) did not attend Court and Counsel could not conduct the case. The case was struck out purely and simply.

The applicant Dooknah has been advised to contact his legal advisers to enter a new case. He met his Counsel who told him that he can re-appear for him for free of charge.

**CASE NAME: BUNDHOO**

TJC/L/207 BALGOBIN DANWANTEE (born BUNDHOO)

Danwantee Balgobin, the applicant, says that her father and mother possessed land at the following places:

1. Near school, Bois Chéri
2. Impasse, Bois Chéri
3. Route Royale, Bois Chéri
4. Near River, Bois Chéri.

There are eight heirs, and two are already deceased. Harry Bundhoo, applicant's little brother, has all the papers concerning the land. He has planted flowers and built a house on the land. He does not want to share the land and give the applicant her share of land. Applicant's father told her, before dying, that her sister and she will have their share of land near the school. The applicant says that she wants her share and she does not mind if she is given at any place. When applicant asked her brother for her share, he insulted her and even tried to beat her. Her brother even told her not to come at his house. She adds that her son and husband are seriously sick. She has a daughter who is still studying and one for whom she has to perform the marriage ceremony. Applicant does not have enough money to pay Land surveyors and Lawyers. She wants to have her share.

After analysis of this case, the Commission finds that her father passed away, leaving 8 children. Her father had sold 886.40 m<sup>2</sup> to her brother Premnauth. The lands are still occupied by one of her brothers.

The Commission has advised her to petition the Masters' Court, Supreme Court, for the division in kind of the properties among the heirs.

\*\*\*\*\*

**CASE NAME: DEVANNY**

TJC/L/M/208 DEVANNY OOMADUTSING

Oomadutsing Devanny, who deponed before the Commission, claims that he is one of the heirs of late Goordial Devanny and Shibdial Devanny who were co-owners of a portion of land of 5 *Arpents* situated at Bel Ombre, in the District of Savanne for having acquired same from Arthur Marrier d'Unienville on 15<sup>th</sup> March 1987 as per TV 175 No. 283 in consideration of a price of Rs. 250. However, that land is burdened with an "*inscription of privilege*" for the sum of Rs. 125 in favour of A. M. d'Unienville as per INS 338/155, which inscription has not been erased.

The said portion of land was, in fact, purchased from Arthur Marrier d'Unienville in 1887; the applicant claims that in 1988, Bel Ombre S. E. blocked the access to the said portion of land.

In 2002, Oomadutsing Devanny caused the said portion of land to be surveyed by S. Beehuspoteea, Sworn Land surveyor; and he further avers that as a result of the survey he found out that part of the said portion of land was sold by Bel Ombre SE to the "*Société de l'Abondance*".

The case of the applicant rests on the report, mentioned above, made by S. Beehuspoteea. The ownership of the portion of land is established in TV 175 No. 283 and the affidavit of succession establishes the rights of the applicant.

From further searches made in the "*Case hypothécaire*", the portion of land remains as property for the "*ayant droits*" of succession Devanny. From the said report, the Land surveyor concludes

that the 5 *Arpents* of land belonging to the heirs Devanny has been wrapped up and sold by Bel Ombre Sugar Estate to the “*Société de l’Abondance*” in 1999 by virtue of TV 456 No. 382 and TV 456 No. 383.

The evidence gathered during this hearing shall enable the Commission to call Bel Ombre Sugar Estate. The Commission should also consider the possibility of calling the surveyor for the applicant and the surveyor for Bel Ombre. It is the opinion of the Commission that blocking access may be one of the means that sugar estates use to wrap up surroundings lands not belonging to them.

The case is still before the Supreme Court.

\*\*\*\*\*

**CASE NAME: LATIOU**

*TJC/ L/0209/LATIOU*

Someone has deposited some documents at the Commission, without any request being made, nor any Civil Status Acts submitted or any location of property stated.

In the absence of Documents, no proper study and investigation could be carried out.

However, some searches have been effected in the name of Arthur Louis Latiou, the ancestor of Marie Rosemay Latiou. Unfortunately, his name does not appear in the “*Répertoire*” or “*Case Hypothécaire*” at the Registrar General’s Office.

\*\*\*\*\*

**CASE NAME: GOODUR**

*TJC/L/M/210 GOODUR ABDOOL RESHAD*

The applicant, Abdool Reshad Goodur, says that his great-grandfather possessed four *Acres* of land at Bois Pignolet. His father used to tell him that they possessed a plot of land there. He did some searches at the Mahatma Gandhi Institute. He once visited the land and found that there were sugarcane plantations thereon. Now, vegetables are being cultivated. Four persons were formerly occupying the land: one Sahabouah, one Bauboo, Tapsi and his daughter. They had leased the land from a deceased Goodur. At present, only one of them is occupying the land.

Abdool Reshad Goodur says that he has spent much money on research. He even had to bribe some officers working at the Civil Status Office at Moka and Port Louis to obtain Documents.

He requests the Commission to help him to recover the land and to know the family history.

The Commission did an investigation which reveals that the applicant’s great-grand-father and grand-father, Goodhur No. 191025, owned a plot of land of an extent of four *Arpents* at Plaines-des-Calebasses as per deed of sale dated 16<sup>th</sup> November 1882 and transcribed in TV 151 No. 327.

In the same deed of sale dated 16<sup>th</sup> November 1882, Louis Bouton (Miss) sold to:

- Goodhur No 191025, 3/8 undivided rights and
- Roopkholeea, daughter of Beeharry No 194345, 3/8 undivided rights and
- Didarally No 199454, son of Goodhur 2/8, undivided rights.

The above deed of sale is accompanied by a Survey Report, drawn up by Land Surveyor Langlois, dated 17<sup>th</sup> October 1882 register L.S 4 No. 734.

Land surveyor Maurice Dumazel drew up a new survey Report dated in March 1987 registered in L.S 23 No. 8362.

These are also copies of a lease agreement, where the land was given on lease for cultivation purposes for period of 5-7 years. The land was leased to one Osman Bauboo for period 1957 to 1964.

6. Further searches have revealed the following;

- In virtue of TV 626 No. 113 dated 25<sup>th</sup> May 1954 Allyjaun Didarally caused to be prescribed the above plot of land of an extent of 4 *Arpents*.
- According to a notarial deed drawn up by Notary Freddy Audibert dated 25<sup>th</sup> September 1964 in TV 961 No. 94, the heirs of Allyjaun Didarally have renounced '*purement et simplement à la prescription du dit terrain de 4 Arpents à Calebasses.*'
- In terms of a deed (TV 1899 No. 6) dated 21<sup>st</sup> December 1988 Adoo Bauboo is the owner of the plot of land at Calebasses.

In the light of the above findings and the fact that late Goodhur No. 191025 has undivided rights in the four-*Arpent* plot of land, it is difficult for them now to claim any share in the above plot of land.

The Commission showed it is of more serious concern when the applicant, Abdool Reshad Goodur, was assaulted by one Bauboo after deponing before the Commission, when he went to visit the land.

A police enquiry has started in this case.

\*\*\*\*\*

**CASE NAME: HERMINETTE**

*TJC/L/212/ RAGOO CHILA MERIENNE FRANCOISE*

The applicant, Chila Mérienne Françoise Rago, inherited a plot of land of 383.50 m sq. situated at Petit Verger, Pointe-aux-Sables from late Marie Lucienne Herminette. The latter passed away in 2008. The applicant became aware of her inheritance after knowing the contents of the will. She contacted Land surveyor Zahur Ahmad Khuram Beegun to survey the plot of land. One Toman Seewoo objected to the survey claiming ownership of the plot of land. The applicant declares that the latter had prescribed the plot and also claimed that Seewoo got the land surveyed by faking the signature of one Bise.

A Court decision enabled the land survey to take place and it was thus determined that Seewoo is not the rightful owner of the plot. The applicant has currently claimed ownership of the land. However, according to him, two deeds of ownership exist for that same plot of land, one being in the hands of Seewoo.

The Rago family requests the Commission to determine in which circumstances Seewoo prescribed a plot of land not belonging to him and thus clarify the legal status of land so as to prevent any future problem that could arise, due to irregularity in the documents

From documents submitted, it appears that the prescription made by Toman Sewoo is questionable for the following reasons:

- There is no ‘*occupation trentenaire*’ between the dates of the prescription of the T. Sewoo, that is, on the 2<sup>nd</sup> April 2002 and the date of the title deed of Marie Lucienne Herminette on 2<sup>nd</sup> April 2007, there is a lapse of less than 25 years.
- The names of adjoining owners put in by Land surveyor S. Beehuspoteea for Toman Sewoo seems to be fictitious as the title deeds of ownership are not given.
- However, the Memorandum of survey put up the Land surveyor A. K. Beegun for Chilla Marianne Ragoo (daughter of M.L. Herminette) is in line with the Land surveyors’ Act adjoining owners’ names and title deeds put up in Report.
- In the circumstances, there is a strong case for Marianne Françoise Ragoo to challenge the legality of the prescription before Court.
- This is a clear case of dispossession and Chilla Marianne Françoise Ragoo has been advised by the Commission to seek redress by initiating legal action before the appropriate Court.

This is a sad case of a person who has received a plot of land by Will and Testament but which has been prescribed by a third party, in an attempt to dispossess the real owner.

\*\*\*\*\*

**CASE NAME: RAMTOHUL**

*TJC/ L/0213/RAMTOHUL TRITIKUMAR*

Tritikumar Ramtohul, the applicant, avers that Bel Ombre Sugar Estate leased and sold marginal land, due to a lack of finance and manpower, to planters. The applicant underlined that he purchased this land from two planters ten years ago. He now owns seven acres of land at Sainte-Marie. He cultivates the land. There was a decrease in the price of sugar cane and an increase in the price of fuel. This increased the cost of production. Bel Ombre Sugar Estate proposed to 109 planters to vacate the land and compensate them. 104 planters signed and accepted the deal. Five did not, including the applicant. The Sugar Authority acted as a regulator between the applicant and Bel Ombre Sugar Estate. But the applicant avers that the Sugar Authority acted in favour of the Bel Ombre Sugar Estate.

Tritikumar Ramtohul had a meeting with Minister Satish Faugoo at the Ministry of Agro-Industry. The latter proposed a new formula to applicant which he did not accept. On the 19<sup>th</sup> July 2009, the applicant met the Minister at a second meeting. He promised him that justice will be made for his case. A Technical Committee was to be set up to evaluate the land and a report will be made. This, according to the applicant, was never done.

The applicant wants the land to be surveyed and an equitable compensation be made. He awaits that the report of the Technical Committee and wishes that Committee to treat his case separately from the planters of Flacq.

This case of “*métayage*” and not dispossession is being dealt with in this Report of the Commission at CHAPTER 2

\*\*\*\*\*

**CASE NAME: SREPAUL**

TJC/ L/M/218/ SREPAUL KULWANTSING

Kulwantsing Sreepaul, the applicant is the son of late Jaynutsing Sreepaul, a “*métayer*”, who had 40 *Arpents* of land under “*métayage*” at Chazal Chamouny, Chemin Grenier with St. Félix Sugar Estate, for the period 1950-1967. The applicant declares that in 1967, his father was deprived of “*métaying*” rights from St. Félix Sugar Estate.

Kulwantsing Sreepaul states that the loss of “*métaying*” rights in 1967 caused his father to suffer from a cerebral haemorrhage and this had several negative consequences on the lives his family. The applicant relates that he was about 11 years old, when the mishap happened and thus could not pursue secondary education, since he had to cater for his family and also the pitiful state of his father. The applicant also notes that his father had nine children and none of them could get proper education.

He wishes the Commission to investigate why St Félix Sugar Estate took back the land as well as the “*métaying*” rights from his father.

- He wants himself and his siblings to receive financial compensation or plot of land equivalent to that which his father had under “*métayage*” with St. Félix Sugar Estate.
- As he has a daughter aged 27 who is disabled and a son aged 14, he would like the Commission to cater for his children so that they do not undergo the same suffering as he endured during his childhood.

This case concerns a “*métayer*” land of 40 *Arpents* which was being occupied by the late father of applicant; the case is being dealt with along with the “*métayer*” cases in this report at CHAPTER 2.

\*\*\*\*\*

**CASE NAME: KHISTO**

TJC/ L/0214 KHISTO JAYSING

Jaysing Khisto brought two cases before the Truth and Justice Commission. In his first application, he sustained that his grandfather (Samchan/Sam Khisto) was occupying the Barachois Estate, Tamarin (801 Acres) as administrator. One L’Oiseau was working with him and knew all his secrets. When Sam Khisto passed away, L’Oiseau, from what the claimant says, fooled the uncles of the applicant to take loans and he took the money. The uncles could not repay the loans and they lost the land. Actually, one Dr. Jubhoo is occupying the land. The applicant explains that he tried to contact the actual occupier, but in vain. He adds that the tomb of his grandfather was located on the land but had recently been demolished. He also adds that his sister, Pushwantee, lived on the land for a period of 8-10 years.

Jaysing Khisto wishes to get back the land and is prepared to go as far as to buy the land as it represents a souvenir of his grandfather. He also expresses the wish to be compensated by Government as a measure of fairness.

In his second claim, he explains that on his father’s death, his family was living at Riche Mare, Central Flacq over a plot of land of 1 ½ acres. Some years later, the remaining family left the land and went to live at his grandmother’s place at Terre Rouge. He wants to get back the land at Riche Mare.

From searches carried out at Conservator of Mortgage Office, the Commission found that the said Khisto or Khistoo Samchan or Sumchund, son of Khisto (156679), husband of Doorpuuth Ram had sold all his properties at Rivière Noire, namely, a “*solde de 126 Arpents*”. Furthermore, he sold, on 29<sup>th</sup>

May 1927, 29 *Arpents* to one Constant Loyseau for the sum of Rs. 8,000, as evidenced by title deed transcribed in Volume 384 No. 495.

Jaysing Khisto was called to the Commission on the 23<sup>rd</sup> August 2010 to submit more documents for the second claim, but in spite of promises that he would bring all related documents the following week, he never turned up.

\*\*\*\*\*

**CASE NAME: TATTEEA**

*TJC/ L/M/217 TATTEEA BAJEERAO*

The applicant, Bajeerao Tatteea, is a “*métayer*” and was cultivating a land of 4 *Arpents* at Bel Ombre, more precisely at Section D’Ambris. He states that Bel Ombre Sugar Estate will take back land and supposedly, on Friday 14<sup>th</sup> May 2010, compensate all “*métayers*” financially or offer them a plot of land.

The applicant wants to be fixed as soon as possible whether Bel Ombre Sugar Estate will compensate him or offer him a plot of land.

This is a case of “*métayage*” which is being dealt with in the Report of the Commission at CHAPTER 2.

\*\*\*\*\*

**CASE NAME: SEERUTTUN**

*TJC/ L/0215 SEERUTTUN DAYADHARRY*

Dayadharry Seeruttun writes that his late father possessed a plot of land of half an acre at Triolet. A few years ago, someone built a house on the land. The applicant went to the District Council and paid for the services of a Land surveyor to help the family retrieve the land. But the Seeruttun heirs have been denied access by the people illegally occupying the land.

The Commission, keen to have an exact picture of the whole situation undertook some searches and found out that in terms of a Notarial deed drawn by E. Hart de Keating on 28<sup>th</sup> November 1945, duly registered and transcribed in Volume 672 No. 192, Ramduth Seeruttun purchased ½ A of land excised from a plot of 2 *Arpents* 08 in extent situated at Triolet.

Nevertheless, it is not clear from the deed, whether the description given relates to the ½ *Arpent* plot or the 2 *Arpents* 08 plot. At this stage, this has no bearing on the issue.

From a deed referred to as “*acte de notoriété après décès*” Ramduth Seeruttun passed away on 15<sup>th</sup> April 1995 and left as sole heirs to apprehend his estate and succession his 8 children. It follows, therefore, that the property purchased is now held by the heirs R. Seeruthun represented by the eight children.

It would appear that the land has been squatted upon or prescribed by someone who is denying them access to the property and who has objected to the survey of the land.

The applicant has been advised by the Commission that this is a legal issue which should be addressed to the appropriate Court of Law or Judge in Chambers.

The applicant must enter a case against the squatter before the competent Court. He has been advised to:

- Enter an “*action en bornage*” before the Supreme Court;
- Apply for a writ *Habere Facias* possession before the Honorable Judge in Chambers.

\*\*\*\*\*

**CASE NAME: BEEFNAH/CHOOOLUN**

*TJC/L/0219/BEEFNAH DHARAMDEO*

Dharamdeo Beefnah, the applicant states that he is the owner of a plot of around 50 perches at Mahatma Gandhi Lane, Arsenal, which he bought in 1992 from his maternal aunt, Lilawtee Choolun. He also avers that the land was originally acquired in 1929 by his maternal grandfather, Ramparsad Choolun.

Beefnah declares that Massillia Limited erected a canal on the plot of land in the period 1950-1955 without any written contract or agreement. He relates that the canal through the years has become larger and deeper, hence obstructing access to part of the plot of land. He further states that Massillia Limited is unwilling to look into the matter, for there is no written agreement with clearly stated terms and conditions concerning the canal.

Dharamdeo Beefnah requests the Commission to look into the matter so that a written agreement is established with Massillia Limited in order that (i) Massillia Limited takes the responsibility of maintenance of the bank and bed of the canal, (ii) to regularize access for applicant to the other part of the plot of land through a bridge or any other system.

The Commission analysed the whole situation: the land formed part of a plot of 50 perches which were divided into 4 lots in 1991, as per the plan of Sworn Land surveyor Tupsy. The Commission notes that no mention is made of any canal crossing the property in previous deeds, or any reference of that canal constituting a service burdening that property.

At the time of purchase, applicant was fully aware of the existence of the canal. He was satisfied with his purchase, as he has stated that he had seen and visited the land.

In the deed of Dharamdeo Beefnah dated 8<sup>th</sup> September 1992, it is stated that Beefnah accepts the plot of land as it is, having seen, visited and is satisfied ‘*ensemble tout ce qui peut en dépendre ou en faite partie sans aucune exception, ni réserve et sans plus ample désignation.*’

Massillia Limited has gone bankrupt and is now in liquidation.

The Commission talked to the Irrigation Authority, the Central Water Authority and Water Rights Administration, but to no avail, as the status of the canal crossing the property is not clearly defined.

The Commission is of opinion that in view of its location, the canal can still be diverted to follow the property of Massillia Property, or the applicant can construct a slab over the canal to get access to the small bit of triangular plot of land. And, as a last resort, Dharamdeo Beefnah has been advised to seek redress from competent authorities in the event that the case were to be administered by Rivérains and Syndics.

\*\*\*\*\*

**CASE NAME: PREMDUTH**

TJC/ L/ M/0220/ RAMCURUN PREMDUTH

Premduth Ramcurrun, the applicant is a “*métayer*” and has 6 Acres 4 perches of land under “*métayage*” at Sainte-Marie, Montagne Chapeau with Bel Ombre Sugar Estate, for the period 1959-2010. Initially the father of the applicant worked on that land and, in 1992 transferred to on the applicant’s name. Premduth Ramcurrun says that he is not satisfied by the way Bel Ombre Sugar estate is reacting towards him. He claims that Bel Ombre wants the said plot of land back.

The applicant enumerated several hardships “*métayer*” planters had to face and would elaborate further on the hearing day at the Commission.

He requests the Commission to establish the real ownership of the land and he wants to become owner of the plot of land or receive reasonable financial compensation or a plot of land of similar surface area.

The case of Premduth Ramcurrun is being dealt with along with other “*métayer*” cases at CHAPTER 2.

\*\*\*\*\*

**CASE NAME: GOBERDHUN**

TJC/ L/ M/0221 GOBERDHUN SATOORAM

The applicant, Satooram Goberdhun, is a “*métayer*” and has 4 Acres 5 perches of land under *métayage* at Bel Ombre with Bel Ombre Sugar Estate, for the period 1968-2010. The father of the applicant initially worked on that land and, in 1995, transferred it to the applicant’s name. Goberdhun is not satisfied the way Bel Ombre Sugar Estate is reacting toward him. Also he claims that Bel Ombre want back the said plot of land. He agrees to return back the land but does not agree with the compensation Bel Ombre is giving.

The case of the “*métayer*” is being dealt with at CHAPTER 2.

\*\*\*\*\*

**CASE NAME: LOUISE**

TJC/ L/0222 LOUISE ATISH KUMAR

The applicant, Atish Kumar Louise, avers that his legitimate father had constructed a house at Route Vingta No. 1, Vacoas on a portion of land of 167.2 m<sup>2</sup>.

According to an Affidavit of Succession, drawn up by V. Ramloll, Attorney-at-Law and sworn on 25<sup>th</sup> February 2011 before the Chief Registrar, it appears that:

- (1) Michel Hervé Louise passed away on 1<sup>st</sup> December 1996, leaving as sole heirs and parties, his two legitimated children: (a) Atish Kumar Louise and (b) Amrish Kumar Louise and his surviving spouse, Premila Soomary
- (2) Premila Soomary passed away on 22<sup>nd</sup> October 1997 leaving as sole heirs: (a) her acknowledged natural children: (i) Roshni Pandarun, (ii) Ashok Kumar Pandarun and (iii) Arouna Pandarun from her intimate connection with Vishnu Mardaymootoo

Pandarun and (b) her two legitimated children: (i) Atish Kumar Louise and (2) Amrish Kumar Louise

The applicant says that his father had started the procedure of a prescription and was bedridden after some time. The applicant went to the Registrar to make searches to know if the land had indeed been prescribed, but did not find anything.

The applicant requests the Commission to help him proceed with the prescription which is incomplete since his father became bedridden.

The Commission is of the opinion that the five children should contact their legal adviser to help them get a title deed of the property.

\*\*\*\*\*

**CASE NAME: LANAPPE/DAVID**

*TJC/L/0223 PERMAL MAURICE ROLAND*

The applicant, Roland Maurice Permal, mentions he is heir to a plot of land of 312 *Arpents* located at Providence, Quartier Militaire, to which his mother-in-law, Marie-Thérèse David, is the sole heiress. The applicant declares that the land was bought initially in 1862 by Emmanuel Lanappe, the grandfather of Marie-Thérèse David. However, according to the applicant, in 1864, Emmanuel Lanappe was prohibited from accessing the land through a legal '*gain de cause*' won by Mon Désert Alma Sugar Estate.

The applicant cited the existence of a document stating that half of the 312 *Arpents* were sold, but since the buyer settled the total payment, Marie-Thérèse David is entitled, as the sole heiress, to the 312 *Arpents*.

The applicant also pointed out that there is a river on that plot of land, '*La Rivière Française*' and also that one, '*Jean-Claude*', has once brought Marie-Thérèse David and her son to the plot of land, and mentioned the names of persons occupying several parts of the plot of land.

Since 2005, the applicant and a few relatives started procedures through an Attorney and a Land surveyor in view of recovering the land. However, due to uncertainty and high costs, the applicant and relatives did not take the procedures further.

The applicant declares that at present, there are sugar cane plantations, a poultry farm operated by "*Innodis Ltd.*" and houses built on the plot of land.

His requests to the Commission are:

- to do a land surveying; and
- to recover back the land. His request is supported by the following Documents:
- The TV 74 No.241 dated 21<sup>st</sup> March 1862 being the purchase of the plot of land of extent of 312 *Arpents* at Quartier Militaire (Moka) by Mootien Arnassalon and Edouard Louis Maximilien Hallot in individual rights.
- A document confirming that the said land had been divided and given to the three children, namely Ferdinand David, Angela David and Louise David
- Another document has been submitted which needs to be authenticated whether the applicant is an heir through her mother, Thérèse David.

However, the document produced contradicts the applicant in his claim.

A Court case was entered against Mon Désert Alma by the heirs of Emmanuel Lanappe. Judgement was given on the 17<sup>th</sup> August 1994, and it was established that Mon Désert Alma was the proprietor of the said 312 *Arpents* as per TV 74 No. 241.

\*\*\*\*\*

**CASE NAME: LAPEYRE**

*TJC/L/224/LAPEYRE JEAN PERCY HANSLEY*

Jean Percy Lapeyre, the applicant, avers that his forefather had:

- a) A plot of land at Pamplemousses
- b) A plot of land at Curepipe.

Both plots, according to him, are still in the name of the Lapeyre family but he could not sustain his claims by producing either a document or a family tree. He requests the Commission to get back the land of his forefathers.

To summarise, the claims are as follows:

**Case 1**

His forefathers had a plot of land at Pamplemousses which, he avers, is still in the name of the Lapeyre family and is now under sugar plantation. He does not know who is the owner of the sugar plantation.

**Case 2**

His forefathers also had a land at Curepipe which is still in the name of the family, and is actually occupied by some individuals. These individuals have constructed two houses on that plot of land. He claims that the land is occupied by a CID officer and a Barrister.

The Commission looked at his requests and searches have revealed the following:

According to TV 116 No. 248, dated 22<sup>nd</sup> February 1875, Louis Lapeyre had acquired from one F.A Delorme Ignard two plots of land in Pamplemousses District: the first one of the extent of 2 *Arpents* 68 at Roche Bois and the other one of extent 26 *Arpents* 8 p at Terre Rouge for the price of "2300 *piastres*".

On 23<sup>rd</sup> October 1911, Louis Lapeyre sold these plots to Tholman for the price of "4000 *piastres*" as evidenced by TV 389 No. 441.

On 17<sup>th</sup> September 1883, Louis Lapeyre acquired from Louis Victor de la Faye and, agreed by Alexandre André, a plot of land of extent of 7 *Arpents* at Pamplemousses for the price of "1375 *piastres*".

However, in the "Case Hypothécaire" 89 No. 110, it is revealed that there is a 'Privilège Inscription' 315 No. 230 dated 17<sup>th</sup> September 1983 in favour of Alexandre André for the price of "1600 *piastres*" "acquere subrogation jusqu'à concurrence de 1200 *piastres*". So, the "solde de" and not been paid, and there is no indication about its sale.

It appears that this plot of land is still burdened with that inscription as there is no indication of its erasure.

Furthermore, there is no plot of land still in the name of the forefather of Jean Percy Lapeyre. Two portions of land of 2 *Arpents* 68 p at Roche Bois and 26 *Arpents* 86 at Terre Rouge have already been sold on 23<sup>rd</sup> October 1911, as per TV 389 No. 411.

There is no entry made in the Register of the Conservator of Mortgages concerning the land at Curepipe, allegedly occupied by a CID Officer and a Barrister, whose names have not been given by applicant.

\*\*\*\*\*

**CASE NAME: LATIRE**

*TJC/ L/VF/0225LATIRE JOSE GABRIEL*

Jean Gabriel Latire, the applicant avers that his grand-parents possessed a house at Cité La Caverne, L6. At present, his cousin Eddy Latire is living in the house and is unwilling to leave. He has filed a case in Court.

He paid Rs. 18,000 to Attorney Appa Jala and Rs. 4,000 to Lawyer Nasime B. Sondagur. The latter did not attend the previous hearing and is now claiming Rs. 6,000 for the next hearing.

The applicant adds that he has no place to live and often has to shift.

After analysis of this request at the Commission, it was found that late Joseph Zephyr was a tenant of a CHA house at Cité La Caverne. He passed away on 26<sup>th</sup> May 1997, and according to an affidavit drawn up after his death, he left Gabriel Latire as sole heir to apprehend his estate and succession.

It is understood that J. G. Latire has entered a case in Court claiming the above leasehold.

\*\*\*\*\*

**CASE NAME: DODIN**

*TJC/ L/0226 DODIN MICHELLE DANIELLE*

Michelle Danielle Dodin, the applicant, remembers her mother telling that her grandparents the Don Bastien family and the Noble, had plenty of land in the vicinity of Pamplemousses, but as children, they just listened and did not pay much attention as it was like a fairy tale. She requested the Commission to look for the lands in Pamplemousses which one Rughoonath told her that the Don Bastien family owned; and to contact the latter to get further information. She did not submit any document, title deed or any plan.

On 11<sup>th</sup> October 2010, the Commission phoned Rughoonath to explain the whole issue. But, the latter was unwilling to provide information on lands which Dodin is claiming as she did not pay him for the research he carried out.

However, searches carried out by the Commission at the Mortgage Office reveal that the names of Marie Yvonne Don Bastien and François André Thompson do not appear in the Name index. Further searches also revealed that the name of Jean Edmond Noble does not appear in the "*Répertoire*."

However, the name of Pierre Feline appears at "*Répertoire* 30 No. 754, where Pierre Feline acquired on 15<sup>th</sup> November 1849, a plot of land of extent of 410 *Arpents* being Domaine Fair Fund from S. Baker for the sum of Rs. 7,000. That land is burdened with many charges; the inscriptions of which have not been erased, namely Rs. 58,750 from S. Baker and Rs. 20,000 from Banque d'Epargne.

In view of the above, Michelle D. Dodin has been informed accordingly.

**CASE NAME: ROMEO**

TJC/ L/0227/ROMEO MARIE ARLETTE

The applicant, Marie Arlette Roméo, avers that her great-grandfather, Yyempermal, from Tanjavour, worked for the Ceylan Tea Limited Company during colonial times. While working for the company, he bought a plot of land of 10 *Arpents* at Beau-Songes for Rs. 7,000. In Document No.1 submitted, it is mentioned that the same plot of land was sold for Rs. 1,200. When applicant's great grandparent passed away, the land was left unoccupied and Médine Sugar Estate Company occupied less than 5 *Arpents* approximately. The company erected a building on that land. The rest of the land belonging to the applicant is still unoccupied, and she wants to get the plot of land back.

She called at the Office of the Commission on 8<sup>th</sup> February 2010 and enquired about the land of Yyempermal. The Commission Land surveyor, having taken cognizance of her case, talked to Vince Ramsamy, the Surveyor of Médine Sugar Estate. The latter said that he is prepared to help the lady. A site meeting was organized between Marie Arlette Roméo and Vince Ramsamy and it was agreed that both parties would inform the Commission of the outcome of that meeting. In the meantime, the applicant has asked another Land surveyor, R. Bhurtun, to accompany her on site the very day of the meeting.

Nothing was heard about the meeting between the applicant and Vince Ramsamy.

On 29<sup>th</sup> March 2011, she called at the office and submitted copy of "*Répertoire*" 253/924, which the Commission had already retrieved from the Conservator of Mortgages' Office. She had a long story to tell before informing the Commission that she has entrusted her work to another Land surveyor, Mr. Kritanand, Seebaruth, and would revert back to us once the survey has been completed.

The Commission, having undertaken searches in that case, found that the grandfather of Marie Arlette Roméo l'Indien Yyempermal purchased 2 plots of land of 5 *Acre*s each at Roche-Ville, in the district of Black River having bought them from one Edgar Vaudagne as per TV 159 No. 248, dated 25<sup>th</sup> January 1884.

There is also on record a Survey Report drawn up by Land surveyor J. J. Moura dated 25<sup>th</sup> September 1883 for the 2 plots.

It appears that there is, on one of the sites, a concrete building erected by Médine Sugar Estates.

Mrs Marie Arlette Romeo should request her Land Surveyor to carry out a survey of both sites under Section 11 of the Land Surveyor Act, and thereafter claim any part which allegedly has been encroached upon.

\*\*\*\*\*

**CASE NAME: ARLAPIN**

TJC/ L/228/ARLAPIN BERTY

Berty Arlapin, the applicant, claims that the property of his ancestors at Black River (Tamarin Region) has been taken by one Dr. Jhuboo without permission of any owner of this land. In support of his claim, he has submitted the following:

- Affidavit of succession made after the death of Marcellus Toomany;
- A private writing being a lease agreement between the Toomany and Arjoon Bijloo over an extent of 20 *Arpents* at Mon Désert for a period of nine years which expired on 15<sup>th</sup> November 1946.
- A site plan indicating a "*Barachois*", as being the very site owned by the Toomany.

Searches undertaken by the Commission have revealed that the names of the Toomany appearing as lessor in the “*lease agreement*” are not registered as owners of any land at Tamarin. In fact, the names do not appear in the Index Repertory at the Conservator of the Mortgages’ Office.

Furthermore, the lease document submitted at (ii) above is not a Notarial deed, and the Memorandum of survey produced by Berty Arlapin is not related to this case as it is a survey carried out by Sworn Land surveyor E. Belcourt at the request of Dr. Jhuboo.

In the light of the above, the claim of the Toomany does not stand.

\*\*\*\*\*

**CASE NAME: PERRINE**

*TJC/ L/0229 PERRINE CLAUDIA*

The applicant, Claudia Perrine 44 years of age, has written that since the age of nine, she lived on CHA land in Rivière Noire. She married and lived on the same land with her children. In 1991, her step-father (who lived with her mother) and she have taken the necessary steps to acquire a plot of land on the same ground. Finally, in 1996, the applicant said she got hold of the lease contract and from then on, she started paying Rs. 150 per year for the lease.

Afterwards she has undertaken necessary measures for a one storey house and in fact she built one on the ground floor. As soon as the construction plan was approved the lease was raised to a sum of Rs. 1,150 in 1999. She continued paying the lease till the day the Government gave permission to buy the CHA land.

She applied at the office where she was asked to bring along a paper to pay the arrears. She paid them and was asked to wait for a letter. She received a letter bearing her step father’s name where they were asked to bring the heirs to be able to buy the land. Once at the office, she was told that it did not concern her plot of land but the land next to hers. In fact, the applicant wrote that it was the same plot of land which was divided into two parts.

She was told to keep on paying till the day the State grants her permission to buy her plot of land. She writes that she wants to know if she will own the plot of land one day, just like those who have already earned a plot of land in the housing estate.

She requests the Commission to shed light on the reason why she cannot buy the land which she is occupying now and why she was being asked to buy the other plot of land

Furthermore, her request has been referred to the Ministry of Housing and Lands (CHA unit).

This is a State land, within a CHA estate, which falls under the responsibility of the Ministry of Housing and Lands. The applicant has been requested to contact that Ministry for a proper land survey and in order to sort out the confusion on the site occupied by her.

**CASE NAME: BABYLONE/VALLY**

*TJC/L/ 0231Emmanuel Babylone*

Emmanuel Babylone claims the ownership of two plots of land which he avers belongs to the “*ancestors Vally*”, as mentioned in a Memorandum of survey dated 12<sup>th</sup> September 1919. He avers that Medine Sugar Estate is occupying the two plots.

In support of his claim, he has submitted 27 documents including a copy of the plan drawn up by Hall SLS, which plan accompanies the report dated 12<sup>th</sup> September 1919 above-mentioned.

After perusal of the documents produced, the Commission has confirmed that on the plan accompanying the memorandum of survey dated 12<sup>th</sup> September 1919, two portions of land are indicated as “Terrain Vally ou ayant droits”, but no extent is given. The Memorandum of Survey further indicates that the two portions of land are situated in an area of 1,389 *Arpents*, described as the fourth lot, but “*cette étendue ne comprend pas les terres concédées au Gouvernement pour le chemin de fer et les deux terrains Vally ou ayant droits et les terrains de Hattersing a Villaooty ou ayant droits.*” The plan further indicates that a triangular portion of land referred to as ‘*terrain Vally*’ or ‘*ayant droits*’ forms part of the land allocated to “*les légataires Bretonache*”, whereas the other portion is located outside the original limits of the land known as “*La Cantine.*” La Cantine was at one time owned jointly by Mathurin Jeannot and Joseph Fabre and was divided in two lots of 80 *Arpents* each in 1898.

In terms of a deed drawn up by Notary Claude Ernest Alexis Josselin Maingard on 27<sup>th</sup> June 1860, as evidenced by TV 70 No. 170, Justine Bretonache and Ors sold to Célestine Bretonache, wife of François Vally “*all their rights in a portion of land of 5 Arpents, having a triangular shape*”, situated at “*La Petite Rivière Noire*”. The deed fully explains that the portion of land is excised from the 80 *Arpents* allocated to Miss Valazanac, C. Bretonache and others following the division in kind effected by Numa Geoffroy, judicially appointed for that purpose on 26<sup>th</sup> January 1848. As a result of this acquisition, the wife of François Vally (born Bretonache) became the sole owner of the plot of land.

Among the documents submitted, there is a Survey Report, drawn up by late Maurice Dumazel, dated 30<sup>th</sup> March 1948, giving the description of a portion of land of an extent of 5 *Arpents* 36, triangular in shape, which it is said belongs to “*Monsieur Ange Balou par occupation*”. The report bears the Reg. No. LS 23, No.1735.

It also indicates an adjoining plot of an extent of 9 *Arpent* 49 marked at one corner “*ancien cimetière Vally*”.

The Commission has also taken note of a notarial deed drawn up by Jean Jacques Montocchio, on 1<sup>st</sup> October 1989 which witnesses an agreement between Médine Sugar Estate and Ange William Balou, also known as Ange Balou, whereby, against payment of Rs. 300,000, Ange Balou would renounce in favour of the Company whatever rights he may have on the portion of land of an extent of 5 *Arpents* 36 and also would withdraw the claim for damages he lodged against the Company (statement of claim dated 9<sup>th</sup> April 1948). Furthermore, he agreed that he would recognise the Company “*comme seule et incommutable propriétaire de la dite portion de terre*”.

Based on the documents produced, the Truth and Justice Commission is of the opinion that the owners, by title of the 5 *Arpents* 00, are the heirs of Celestine Bretonache, wife of Francois Vally. Neither Ange Balou, nor Médine Sugar Estate has a clear title to the said portion of land.

The deponent has also left newspaper cuttings relating to an old cemetery having the tombs of Jean François Vally, Joseph Favre and others. It is interesting to note that Joseph Favre expressed the wish, in his will, “*à être inhumé sur mon habitation auprès de la tombe de mon ami Bretonache*”. Bretonache, in his will, also expressed the wish to be buried next to Mathurin - presumably Mathurin Jeannot.

Another reference to the cemetery is made in the deed, registered in Reg. C 92 No. 1414, on May 1858, and duly transcribed in Volume 64 No. 105, concerning the chargers, clauses and conditions of the judicial sale of the remaining property, formerly owned by Charles Favre. Article 1 of the conditions of sale is reproduced below:

**“Article First:** *The purchaser or purchasers of the said plots of ground shall be bound to take the said plots of ground now to be sold, such as they shall stand at the time of the sale thereof, without being entitled to claim any indemnification or guarantee for default of measurement, extent and description or otherwise. And, in the sale of the lot above described, shall not be comprised a burial ground existing thereof being forty one feet three inches in length and thirty sixth feet five inches in breadth, the said burial ground, actually surrounded by walls and reserved for the use of the families of those who have already been buried*

*therein and among others of the late Charles Fanny Volamaire, commonly called Charles Favre."*

And the purchaser

*"shall not have and possess the said burial ground which shall remain a perpetual servitude on the second lot and he or they shall moreover be bound to suffer also as a perpetual servitude the existence of a passage fifteen feet wide leading thereto from the main road, which is about forty feet from the entrance of the said cemetery".*

It follows, from the above, that the purchasers and now the present owners of the second lot of an extent of about 13 Acres, are bound by the conditions attached to the sale above.

Searches have revealed that in 1932, an area of 10 Arpents 19 was excised therefrom (*vide* P.V. Khermann, 1<sup>st</sup> February 1932).

This portion of land has been acquired by Médine Sugar Estates in terms of TV 433 No. 416.

It is not known on which part of the land the burial ground is located.

The Truth and Justice Commission recommends that those in the rights of the late Clémentine Bretonache, wife of François Vally, should take up the issue of ownership of the two plots of land with Médine Sugar Estate. They should seek legal advice regarding their claim. As regards the burial ground, the Commission is of the opinion that those in the rights of the persons buried on site should pursue the matter with Médine Sugar Estate regarding access to the land.

The plot of 13 Acres, described as being a plot of land, is not the same as the one indicated on the plan drawn up by Hall. The present 13 Acres plot form part of the land allotted to Favre, while the 5 Arpents 00 on Hall's plan forms part of the land allotted to "*les légataires Bretonache*".

\*\*\*\*\*

CHAPTER FIVE

**DISPOSSESSION OF PROPERTY**

# DISPOSSESSION OF PROPERTY

## INTRODUCTION

From the applications made, documents submitted, and during the hearing of several land cases, it has become apparent that several persons have lost their properties and/or have been dispossessed of their properties due to the false, inaccurate, doubtful, wrongly-drafted misinterpretation of affidavits of succession and Wills and Testaments.

Some affidavits and Wills and Testaments produced before the Commission have been drawn up with the connivance of certain heirs. It has been observed that some affidavits have been wrongly drawn up by Attorneys at Law and sworn or solemnly affirmed by the doubtful witnesses before the Supreme Court.

More than one case has attracted the attention of the Commission after searches were undertaken and analysis made of claims put before the Commission during these last few months. Three of such cases - CLÉMENTINE (File No TJC/L/0142), FAOULEZ/MACCA (File No TJC/L180) and CAPIRON (File No TJC/L/031) - are here highlighted to sustain the above. The SPÉVILLE/CHOOOLUN case, as well as the GUIBIES/PAILLES case and the GERTRUDE/DASANI case (Gertrude Marie Fleurance, born Bontende - File No. TJC/L/312 - ; Dasani Lutchmeen, born Gowreeah/Sobrun Renouka, born Dasani - File No. TJC/L/0137) are other examples of how people have been victims of such dismeanours.

---

## CLÉMENTINE (FILE NO TJC/L/0142)

---

José Désiré Roland Clémentine claims to be one of the sixteen heirs of Marie Rosanne de Coriolis who owned many plots of land totalling 7 *Arpents* at Plaines Wilhems and Coromandel. Myriam Rabouine and, the agent of the Clémentine family, one S. Rago, deponed before the Commission. José Désiré Roland Clémentine avers that the heirs were induced to form a *Société* known as "*Société Beau Séjour*". They were later asked to bring their land of 7 *Arpents* as their share in the *société*. They were told that they will get 50% of its selling price. It was also averred that the land has already been sold for Rs. 65 million, from information received but only four heirs have received money and the other heirs do not know the exact amount which have been paid.

The representatives of the Clémentine submitted copy of an agreement dated 2<sup>nd</sup> September 2008 from the *Gérant* of "*Société Beau Séjour*" to pay Rs. 200,000 to each heir when the land will be sold.

The factual background is as follows:

- The heirs Clémentine claim that they are the heirs of late Fernand Clémentine, who was the heir of Gustave de Coriolis, the owner of a portion of land of 24, 058. 96 sqm. situated at Coromandel.
- Whilst deponing before the Commission, Myriam Clémentine explained that sometime in, around 2007, members of the family met with one Willy Rigobert who informed them that he would do searches with respect to land owned by their ancestors. It is averred by the heirs Clémentine that they paid a large sum of money to the said Rigobert in consideration of his searches. It is further averred that it was the said Rigobert who introduced the heirs Clémentine to Notary Arveen Ramphul and to one Parvez Maharaullee.
- They were then requested to meet with Notary Ramphul. The first meeting occurred in the presence of the said Rigobert. At the office of the Notary, in September 2008, the 16 heirs

were requested to sign a document, and they alleged that no one explained the contents of the documents to them. The heirs further averred that, in return for signing the document, they would receive the sum of Rs. 200 000, sum which they never received.

In fact, the document referred to the creation of a civil partnership known as the "*Société Beau Séjour*".

The deed was transcribed and registered in Volume 7144 No. 5 and the important features are as follows:

- The 16 heirs had "*parts sociales*" in the said "*Société Beau Séjour*", together with the said Parvez Maharaullee and one Bibi Nazreen Ismael;
- In consideration of their "*parts sociales*", the 16 heirs brought as "*apport*" the aforesaid plot of land situated at Coromandel, which was estimated at Rs. 5 millions; and
- The said Maharaullee, in consideration of his "*parts sociales*", brought as "*apport*" the sum of Rs. 5 millions; and
- The said Bibi Nazreen Ismael was appointed as "*gérant*" of the said "*Société*".
- On the 22<sup>nd</sup> July 2009, the said Bibi Nazreen Ismael transferred all her management powers in the "*Société Beau Séjour*" to one Mithyl Padaruth. The heirs alleged that they were not aware of this meeting.

On the 24<sup>th</sup> July 2009, in the presence of all 16 heirs and Mithyl Padaruth, it was proposed and approved that:

- The civil partnership "*Société Beau Séjour*" was agreeable to pledge the aforesaid plot of land situated at Coromandel in favour of any financial institutions so as to enable the company "Solar Watt Co. Limited" to raise funds; and
- Mithyl Padaruth was authorised to sign all relevant documents.

In their deposition, the heirs alleged that their signatures were forged in the said document dated the 24<sup>th</sup> July 2009.

- On the 29<sup>th</sup> July, in presence of all heirs and Mithyl Padaruth, it was decided that the resolution, approved on the 24<sup>th</sup> July 2009, be declared null and void.

While deponing before the Commission, Notary Ramphul denied all the allegations made against him and maintained that he has abided as per the law and that he has fully explained to the heirs Clémentine the clauses of the above-mentioned deed.

Lilette Fortune, Francis Clémentine, Bibi Nazreen as well as Willy Rigobert were called before the Commission to explain their involvement. Lilette Fortune confirmed that Willy Rigobert was the initiator of the searches and was one of the go-betweens the heirs and Notary Ramphul, whereas Francis Clémentine avers that right from the beginning he was not in favour of any involvement in securing the "*héritage*" to a "*Société*". Willy Rogobert put forward that he is someone "*who wants to help people*". He sustained that he needed the payment for searches, land surveying and the help of other researchers in his quest and that his clients needed to be patient even if in certain cases it would take time to retrieve information from the Archives. The Commission has been made aware that Willy Rigobert has a lot of "clients" from whom he has obtained large sums of money.

Bibi Nazreen Ismael put an appearance that she is a victim in this matter. She avers that she did not even know why she had to appear before Notary Ramphul in this case, together with the Clémentine family. She does not know if she was a "*gérant*" of the "*Société Beau Séjour*" and does not know about anything about land matters. She earns her living as a "marchand ambulant".

The Commission was surprised to learn that it was her husband, and not Parvez Maharaullee, who was present the very day she was appointed as "*gérant*" before Notary Ramphul.

After enquiry about the said Parvez Maharaullee, the Commissioner of Police informed the Commission that Parvez Maharaullee was in prison at that time and thus, could not be physically present at the office of the Notary Ramphul. He is still serving a prison sentence at the Beau-Bassin prison.

The whole matter was reported to the Land Fraud Squad.

---

### **FAOULEZ/ MACCA (FILE NO TJC/L180)**

---

In the case of Faoulez/ Macca, the Commission called Hugues Faoulez to depone on the 17<sup>th</sup> November 2010, after having heard in a previous session the version of the Macca family. In his testimony before the Commission, Hugues Faoulez avers that he requested one Maharaullee and the "Société Domaine Le Mapou" to make searches for him as regards a plot of land owned by his ancestors. He denied having ever created any company or "Société" and was not aware of same. He even denied giving instructions to swear any affidavits of succession on his behalf.

The factual background is as follows:

On the basis of a false affidavit of succession dated the 6<sup>th</sup> July 2007 and transcribed in Volume 6658 No. 64, Hugues Faoulez, together with May Victorria Faoulez, have allegedly presented themselves to be the sole heirs of Jean Falouez and therefore, the sole heirs to his plots of land.

On the 25<sup>th</sup> July 2007, by Notarial deed drawn by Notary Arveen Ramphul and duly transcribed in Volume 6684 No. 47, the said Hugues and May Faoulez, together with one Raj Rekha, created a civil partnership known as "*Société Civile Domaine Le Mapou*".

In consideration of their "*parts sociales*", the Faoulez brought as "*apport*" three portions of land namely 120 *Arpents* in Mapou, 9 *Arpents* 14 p in Poudre d'Or and 157 *Arpents* in Mapou.

The three portions of land were evaluated at Rs. 15 millions.

On the 25<sup>th</sup> July 2007, by deed drawn by Notary Ramphul, the said Faoulez, together with Parvez Maharaullee, formed the civil partnership "*Blue Coast*". As "*apport*", the Faoulez brought a portion of land of 75 *Arpents* situated at Mapou evaluated at Rs. 6 millions.

On the 12<sup>th</sup> October 2007, the said Raj Rekha delegated all his management powers of "*Société Civile Domaine Le Mapou*" to Parvez Maharaullee.

On the 15<sup>th</sup> December 2008, by Notarial deed drawn up by Notary Ramphul and duly transcribed and registered in Volume 7237 No. 16, the "*Société Civile Domaine Le Mapou*" sold 14 *Arpents* 5 p to "*Sandy Row*" for the sum of Rs. 20 millions.

As regards legal documents in the case of Faoulez/Macca where several portions of land of the total extent of 370 *Arpents* and 46 perches are involved, three affidavits have been produced.

The first one has been drawn up by Attorney Conhyedoss and sworn by two witnesses on 03/02/2005 before the Supreme Court whereby the witnesses have stated that Jean Faoulez has passed away in 1860 and as at 2005 he had left many heirs and successors.

The second affidavit has been drawn up in the Office of Attorney M. Conhyedoss but signed by Attorney S. Ramano and sworn by two witnesses on 02/04/2007 before the Supreme Court wherein it is stated that Jean Faoulez has passed away on 7<sup>th</sup> March 1869 and as at 2007 he had left two heirs and successors. One of the two heirs has even deponed before the Commission and written a letter to the effect that he had never retained the services of Attorney M. Conhyedoss to draw up the affidavit.

The third affidavit has been drawn up by Attorney Anil Kumar Jugnauth and sworn by two witnesses on 6<sup>th</sup> July 2007 before the Supreme Court wherein it is stated that Jean Faoulez has passed away on 11<sup>th</sup> December 1824 and as at 2007 he had left two heirs and successors. It is to be noted that in the 2<sup>nd</sup> and 3<sup>rd</sup> affidavits one witness is a common one.

Three Attorneys and the witnesses who had sworn the first two affidavits were summoned before the Commission. The Commission was not satisfied by the explanations given by them. The Commission had no alternative than to refer the matter to the Central C I D for investigation.

What is more disturbing in the case is that Attorney S. Ramano who had signed the second affidavit, has at the request of M. E. Faoulez and others lodged a case before the Supreme Court. In the Complaint with Summons it is stated *inter alia* that (a) Jean Faoulez has passed away on 11<sup>th</sup> December 1825, (b) Jean Faoulez had made a holographic Will dated 12<sup>th</sup> October 1821 in which it is stated that he had no heir and had appointed Jean Caillaud as his Universal legatee (c) Hughes Faoulez and May Victoria Faoulez have along with other persons formed a "*Société*" known as "*Domaine Le Mapou*" and have brought into the "*Société*" the "*apports*" about 14 *Arpents* of land situate at Melville, Grand-Gaube.

At a certain point in time, the Commission had no alternative than to refer the matter to the Police for enquiry.

The Land Team, under the supervision of the Commissioner, Mr. Jacques David and members of the Land Fraud Squad, which secured the help of Interpol (France) and the French Embassy in Mozambique, looked into the matter closely.

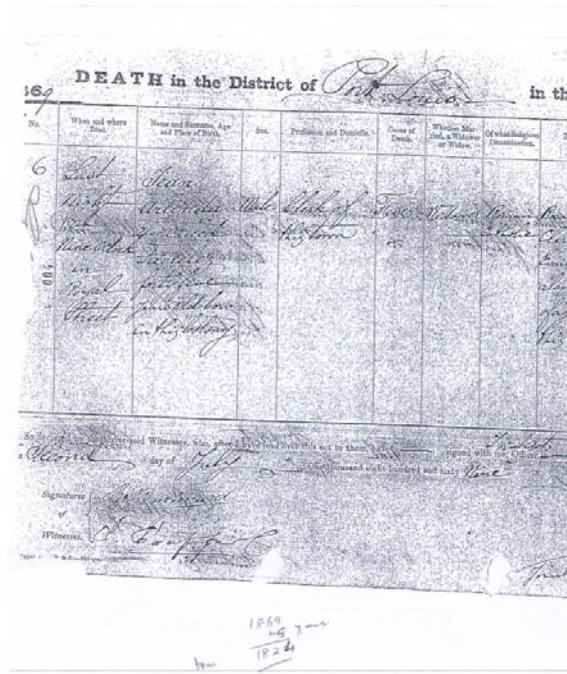

A thorough investigation has revealed that Jean Faoulez was born on 4<sup>th</sup> May 1777 in *Côte d'Armor*, France from the marriage of Jean François to Françoise Lequellec, as evidenced by documents from the Archives Department of the "*Conseil Général de Côte d'Armor*". Jean Faoulez arrived in Isle de France in 1790, at the age of 13, on board of "*La Belle Reine*" as can be evidenced by the Port-Louis Census on White population of 1803 (*Document KK2 Folio 76 + 77 Recto*).

In 1803, Jean Faoulez was a well-known "*Négociant*", having 4 male slaves and 3 female slaves to his service.

Between 30<sup>th</sup> May 1814 and 18<sup>th</sup> May 1824, he secured a lot of properties, obtained a "*concession*", and did a lot of business.

He got married on 31<sup>st</sup> January 1810 to one Adelaide Desperles. They had one son, also named Jean, who was still a minor on the death of his father.

Jean Faoulez passed away at Royal Road, Port-Louis on the 1<sup>st</sup> July 1869, as same is evidenced by the death certificate bearing No. 6 of 1869 of Port-Louis. A copy of the death certificate is thereto annexed.

Jean Arlanda, also called Faoulez, contracted a civil marriage with Eudoxie Arsene Domolard.

Five children were born from the said marriage, namely: Marie Faoulez, Eudoxie Faoulez, Albertine Faoulez, Wilfrid Faoulez and Edwin Faoulez.

The above information is to be found in the Memoranda of Charges filed in two cases of the Judicial Sales before the Master's Bar of the Supreme Court and transcribed in TJ 40 No. 8 on the 25<sup>th</sup> March 1878 and TJ 78 No. 54 of the 25<sup>th</sup> January 1893, respectively.

As can be proved, Jean Faoulez did leave five children.

The averment to the effect that Jean Faoulez did not leave any heir and that a niece, one Louise Belle, from Mozambique inherited all of his properties, does not stand.

In fact, Louise Belle, together with other members of her family, namely Victorien and Victorine, were the "*domestiques*" of Mathurine Michelle who lived on the "*La Ressource*" Estate at Rivière-du-Rempart. She was "*rougeâtre*", measured "*1-56 m avec une cicatrice au front et au lèvres supérieure*", as described at Reference No. T71 596-597 of the Slave Data 1826.

Being given that Jean Faoulez left 5 children as heirs, the Macca family has absolutely no share or right of succession of Jean Faoulez. The different sales of the said portion of land have given rise to several cases which have been lodged before the Supreme Court of Mauritius. The particulars of the cases are as follows:

- SCR 103347 (1/643/09) I. Koolmoteea & Ors v/s Lloyd Bowmaker (Mauritius) Ltd.
- SCR 104295 (1/389/10) M.E. Faoulez & Ors v/s MCCR Collet & Ors.
- SCR 105050 (1/84/11) Sandy Row (Mauritius) Ltd v/s Domaine Le Mapou.

All these cases were mentioned before the Supreme Court on 20<sup>th</sup> September 2011 and have been postponed to 03<sup>rd</sup> October 2011.

The Commission wishes to place on record the help and collaboration of the Land Fraud Squad in the present case and show its appreciation of the work undertaken, particularly by K. Yogita Poorunsing (WPC 153) and Jean Joyce Roussety (PS 4299).

---

### **CAPIRON (File No TJC/L/O31)**

---

Henri Vignes sold to Léonel Capiron and his wife two plots of land situated at Mozambique Street and Entre-casteaux Street Port Louis. Léonel in his will left all his assets to his wife Anna Beatrice Rebecca Vignes. Anna Rebecca Vignes made a will in favour of the wife of Ange Eloi Capiron (born Vignes). She made a will in September 1953 in favour of Louise Vignes. Louise Vignes sold the land in 1929 according to deed of sale dated 22<sup>nd</sup> March 1929. The applicant is questioning the date of sale of the land (1929), which according to the date of the will made in favour of Louise Vignes, that is 1953, should normally be her property in 1953.

The applicant requests the Commission to contest the date of the sale signed on 22<sup>nd</sup> March 1929.

The whole technical land team and, in the presence of a Commissioner Jacques David, had a working session with the applicant in the presence of his son-in-law, Stephan Clain on 23<sup>rd</sup> December 2010.

From further information from applicant it appears that:

- The land of 400 Toises situated at Beau-Bassin belonged to the late Anna Rebecca Vignes and bequeathed to Marie Lucie Lise Vignes, the wife of Ange Eloi Capiron.
- The land of 94 Toises situated at Beau-Bassin belonged to the late Marie Lucie Lise Vignes, the widow of Ange Eloi Capiron.
- Marie Lucie Lise Vignes had no children. She died on 23<sup>rd</sup> October 1969.
- According to her last Will and Testament made before Notary public Roger Hermane Louis on 20<sup>th</sup> October 1969, in the presence of four witnesses, she bequeathed all her properties to Marie Capiron.
- The will was registered on 29<sup>th</sup> October 1969.
- Consequently, Marie Lucie Lise became the owner of the two plots of land of 400 toises and 94 Toises.
- One Marie Thérèse Isabelle Capiron claimed that she is the very Marie Capiron who received the property.
- One Marie Joséphine Capiron also claimed to be the very Marie Capiron who received the will drawn up by Notary Roger Hermane Louis on 20<sup>th</sup> October 1969.

The question remains a real mystery: Who is the real Marie Capiron? Marie Thérèse Isabelle or Marie Joséphine? There is no clear answer to this very important question.

The Commission verified the files which reveal that indeed:

- Marie Joséphine Capiron sold the land of 400 toises to one Dr. Hurhangee and Lajputh Beeharry, as evidenced by TV 180/4188. Marie Joséphine Capiron passed away in 2000.
- The land of 94 toises has also been sold by the heirs.
- Marie Thérèse Isabelle Capiron also passed away in 1995.
- There are two groups of persons who claim to be the heirs and successors of late Marie Capiron.

The Commission is of opinion that it is for the Supreme Court to decide and adjudicate as to who are the heirs and successors of Marie Capiron.

---

## THE SPEVILLE/CHOOOLUN CASE

---

The Spéville case, although a time-consuming dossier, has been one of the most challenging. Searches all along these last few months revealed how the mechanism of fraud can work at all levels of the Mauritian society; it is neither a question of race or colour. It is only a question of the colour of the currency and the amount it involves.

The applicant, Raymond Doger de Spéville, writes that his grandparent, late Pierre Spéville was owner of a plot of land of extent of 490 *Arpents* situated in the District of Black River, place called "*Côteau Raffin*" as well as l'Ilôt du Morne. The applicant states that his family has been dispossessed of their rights on the said portion of land as nowadays the "*Société du Petit Morne*" is occupying the land.

The applicant avers that Sieur Doger de Spéville, the great grand parent of the applicant lived in Black River in a house ("*Campement d'habitation*") that he constructed on Ile-aux-Bénitiers and died on that property and his tomb is the proof that he owned the land. The said Sieur Doger de Spéville had also a "*habitation à Pamplémousses*" where his son, Pierre Spéville, lived. Pierre Spéville's mother was a slave at the service and belonging to the family. They all lived on the Spéville family "*habitation*", in Pamplémousses.

Pierre Spéville, "*un homme de couleur*" married Marie Elisa Anto. He died in 1859 and had an only son called Mylis. The latter was a "*forgeron*" living on the same "*habitation*" belonging to his grandfather at Plaine des Calebasses, Pamplémousses.

Mylis married Rosette Rogelaure and they had three children namely Hermina, Charles and Julius. Mylis died on 20<sup>th</sup> May 1909 at the age of 71.

Raymond Spéville, the applicant, who deponed before the Commission on Wednesday 13<sup>th</sup> October 2010 claims that Pierre Spéville was also the owner of several plots of land in Savanne and Rivière Noire, as evidenced by the "*Case hypothécaire*" and that the said land has never been sold as some of the property was leased for the cultivation of coconuts and vegetables.

The great aunt Hermina, who died at the age of 100 years and 8 months on 15<sup>th</sup> November 1967, who made several trips on that land in the Black River District, told the family how the great-grandfather used to bring all the children in "*locally-made carts*" to the island which, at that time, was accessible at low tide.

At the death of the said Mylis, who was illiterate, the family seemed to have been dispossessed by the family to whom the land was leased as it was difficult for the Spéville family to visit frequently the property as they were still living in Pamplémousses.

The Commission looked closely into this case.

After searches, TV 29 No. 46 reveals that there has been a sale before Notary Yves Isidore Jollivet made by Mathieu Wohnritz to Frederic Chardoillet of:

490 *Arpents* situated at Côteau Raffin bounded as follows:

North by habitation Case Noyale belonging to Mlle Frichot (later on, Benoni Labutte) East and South by habitation Case Noyale belonging to Frédéric d'Emmerez and

West by "*Pas Géométriques*" and the sea; and

Ilôt du Morne situated at 1000 ft. from the shore to an extent of about 130 *Arpents* plus 3 slaves, namely l'Eveillé Narcisse, Charles Boncoeur and César Fidèle.

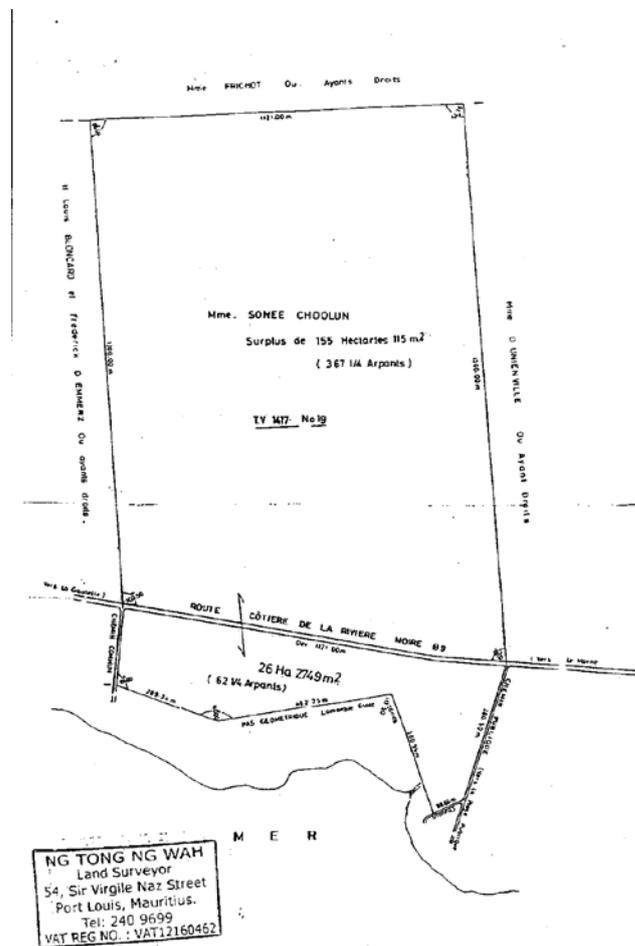

*Devant Me. Yves Jollivet et son collègue Notaire publics soussignés :*

*Fut présent :- Mons. Mathieu Wohrmitz, négociant demeurant au Port- Louis.*

*Lequel a par ces présents vendu a promis et s'est obligé garantir de tous dont :- domaines, dettes, hypothèques, privilège, éviction, revendications et de tous autres meubles et empêchements généralement quelconques à Mons. Frédéric Chardoillet, négociant demeurant au Port-Louis à ce présent et acceptant acquéreur pour lui les héritiers et ayant cause -*

*La propriété possession et jouissance :*

*De 490 A de terre situées au lieu dit le « Côteau Raffin » quartier de la Rivière Noire bornés au nord par les habitations communes sous le nom de Case Noyale appartenant ci-devant Mlle. Frichot, aujourd'hui à Mons. Benoni Labutte, à l'est et au sud par les habitations connues sous le nom de case Noy de Mons. Frédéric D'Emmerez et enfin à l'ouest par les pas géométriques et la mer.*

The 490 Arpents which belonged to Pierre Spéville

*De l'islot dit « l'islot du Morne » situés en face des biens ci-dessus mentionés éloigné de terre d'environ 1 000 et de la contenance de 130 A environ sous garantie ni recours de part et d'autre pour le plus ou moins d'étendue de terrain - sont compris dans les présentes ventes les maisons, bâtiments et dépendances et les plantations existant sur les dits terrains sans en rien excepter réserver ou retenir plus 3 esclaves nommés (i) L'éveille Narcisse cuisinier âgé de 38 ans indien (ii) Charles Boncoeur pioche âgé de 34 ans malgache et (iii) Cesar Fidele palfrenier âgé de 39 ans Mozambique et que le dit acquéreur dit bien connaître et dont il déclare être content et eu possessions par lui*

*ses héritiers et ayant cause en jouir faire et disposer de ce jour et à l'avenir comme de chose entièrement à lui appartenant au moyen des présents.*

*Les dits biens appartiennent au vendeur pour les avoir acquis savoir les esclaves de divers auxquels il en a payé le prix de ses derniers et les terrains suivant contrat passé devant Me. Jollivet l'un des notaires soussignés qu'en a garde la minute et son collègue le 10/09/1828 enregistré le 20 du sieur Lagoardette agissant au nom et comme fondé du pouvoir spécial du sieur Joseph Lousteau à qui lui appartenaient pour s'en être rendu adjudicataire à la barre du tribunal de première instance de cette île le 09/05/1825 par l'entremise du dit sieur Lagoardette fondé de son pouvoir spécial sur la vente par expropriation forcée poursuivie à sa requête sur les sieurs Julien et Charles Spéville suivant procès verbaux de mises d'enchères et adjudication en date à la fin du dit jour 09/05/1825 étant en un cahier extrait des minutes du greffe du dit tribunal.*

*Le dit Pierre Spéville avait acquis les 490A du sieur Joseph Lousteau suivant contrat passé devant Me. Guerin vivant notaire en cette île et son collègue le 16/09/1820 enregistré le 23.*

*Le dit Lousteau en était propriétaire au moyen de la déclaration faite à son profit par Me. Sabrat avocat et avoue près les Tribunaux de cette Isle le 02/09/1819 qui s'en était rendu adjudicataire pour le dit sieur Lousteau suivant procès verbaux d'enchères et adjudication définitive tranchée au profit du dit Me. Sabrat à la barre du tribunal de première instance de cette colonie le premier du dit mois de septembre 1819 par suite déspropriation force poursuivie sur le sieur Jean Nicolas D'emmerez père habitant de cette colonie à la requête du sieur Philbert Perret ansent représentée en cette île par Mons. Jacques Francois Lefèvre président du Tribunal de première instance.*

*Et le dit Pierre Spéville aurait acquis l'îlot dit L'islot du Morne suivant écrit sous signatures privée en date du 11/10/1807 déposé à l'étude du dit Guerin notaire suivant acte du 14/06/1819 du sieur Nicolas D'emmerez.*

*Le dit sieur D'emmerez aurait acquis la totalité des dits biens avec plus grande contenance suivant contrat au rapport de Me. Auffray et son collègue notaires en date du 5 pluviôse an 6. Les Sieurs Charles Francois Michelet et André Waullohen qui en étaient propriétaires, comme faisant partie des biens par eux acquis des citoyens Jean Marie Lelleivier et Pierre Michel Desseliers suivant contrat passé devant Me. Roux et son collègue le 22 Germinal an 5.*

*Desseliers et Lelleivier étaient propriétaires du dit terrains au moyen de l'adjudication qui leur en a été faite en 4 lots suivant procès verbal d'enchères et adjudications reçu par Guerin et son confrère notaires le 9 nivrose an 4. La dit adjudication poursuivie est faite sur une seule enchère à la requête de Thomas Etienne Bolgerd propriétaire en société avec Edouard Périchon.*

*Etienne Bolgerd aurait acquis les dit terrains par contrat au rapport de Me. Pelte et son confrère notaires le 23/02/1786 de Jean Lousteau fondé par procuration de Marie Anne Françoise de Joailles veuve de Louis Engelbert de Samareh à laquelle la totalité des dits terrains aurait été concédée le 25/01/1786 par les Gouverneurs et Intendant Souillac et Motais à Marbonne par acte enregistré au Bureau de l'Intendance le dit jour 25/02/1786 et au tribunal terrier le 06/02/1787.*

The title deed, dated 7<sup>th</sup> July 1820, transcribed in TV 16 No. 58, confirms the sale by Joseph Lousteau of the 490 Arpents at Côteau Raffin to Pierre Spéville of which the deponent claims to be one of the heirs.

Copy of the tampered document at the Conservator of Mortgages' Office

### TAMPERED DOCUMENT

The Spéville case could have been one of the easiest to resolve, if the Commission had not come across some disturbing elements during the searches undertaken. Indeed, after having heard Raymond Spéville on Wednesday 13<sup>th</sup> October 2010, the Commission wrote to the Conservator of Mortgages to obtain the "Case hypothécaire" of Pierre Spéville. Surprisingly, the document showed clearly that it had been tampered with.

The Commission was called upon to probe more deeply into this case in order to find out if there has been dispossession, examined all various transactions and wishes to establish whether these irregularities had not open the doors to fraud.

One Marie Yolande Andrea César, whose name was mentioned during the searches as being another claimant of the plot of land at Côteau Raffin, was called before the Commission on the 14<sup>th</sup> April 2011 to explain in what circumstances, she had on 21<sup>st</sup> July 1972 conferred the Power of Attorney to one Emunchul Misseer Madhoo, drawn up by late Notary Public Serge Gopee, duly registered in Reg. A383 No. 1229, to take hold of the 490 A. The deponent averred that she is one of the heirs of Pierre Spéville and had in good faith appointed the said Madhoo as her agent and proxy. While deponing before the Commission, Marie Andrea César underlined the fact that she was aware that her family possessed a plot of land but did not know the exact situation of the said land. In these circumstances, she retained the services of Counsel Madhoo as regards the land. She further averred that she never had any response from Madhoo and affirmed never having sold the land nor having agreed to any sale.

But, by virtue of a deed drawn by Notary Cooty, dated the 15<sup>th</sup> December 1976 and duly registered in Reg. A 401 No. 1956, the said Madhoo was replaced by one Harryparsad Choolun in lieu and stead in the exercise of the powers conferred in the afore-mentioned Power of Attorney.

On the 5<sup>th</sup> April 1977, a "bordereau" was registered in Volume 1353 No. 14. If a "bordereau" is a "promesse de vente", it seemed that, in the present case, the said "bordereau" has been used a document witnessing a sale. The sale was in respect of part of the plot of land of 490 Arpents, signed by Harryparsad Choolun, acting in the name of Marie Yolande Andrea César, in dealing with one Zwalaparsad Choolun.

On the 23<sup>rd</sup> May 1977, the said Zwalaparsad Choolun sold the said plot of land to her sister, Sonee Choolun, as duly transcribed in Volume 1378 No. 5.

In 1977, Sonee Choolun applied for a development permit to the District Council of Black River as regards the plot of land. In spite of the decision of the Works and Planning Committee of the

District Council, Sonee Choolun received under the signature of one Ms. V. Sunassee, then Planning Officer of the Black River District Council, her development permit.

In 2009, Sonee Choolun stood as surety for a loan of Rs. 50 million at the Development Bank of Mauritius for the development of Qay Call Centre and Outsources Services Limited, set up by one N. M. Fokeerbux, Director, thus pledging the said portion of land.

The factual background is as follows:

- By a hand-written deed under private signatures drawn up at Quatre-Bornes and dated 29<sup>th</sup> December 1976, late Harryparsad Choolun, allegedly acting as agent and proxy of Marie Yolande Andrea César in virtue of a power of Attorney, allegedly granted by the same Marie Yolande Andrea César to one Emmanuel Misseer Madhoo and in whose powers the said Harryparsad Choolun was allegedly substituted “*s’engage et oblige la dite mandante, that is Marie yolande Andrea César, à vendre sous les garanties ordinaires et de droits*” to Zwalaparsad Choolun and which was accepted by the latter a portion of land of an extent of ‘cent quatre-vingt dix Arpents environ’ situated in the District of Black River, called Côteau Raffin”.
- It was one of the conditions of the deed referred to above and that “qu’en cas le soussigné d’une part (meaning Harryparsad Choolun) pour n’importe quelle raison quelqueconque refuserait de vendre le dit terrain à l’acquéreur aux présentes (meaning Zwalaparsad Choolun), il devra verser à ce dernier une somme de quatre vingt milles roupies à titre d’indemnité....)”.
- The said deed was registered on 27<sup>th</sup> January 1977, in Reg. C 279 No. 5040 and transcribed in TV 1353 No. 14.
- On 5<sup>th</sup> April 1977, Harryparsad Choolun (still acting as agent and proxy of Marie Yolande Andrea César) and Zwalaparsad Choolun appeared before Marcel Cooty, Notary Public and deposited the deed under private signature referred to above.
- Marcel Cooty, Notary Public, stated in the deed drawn up by him on the 5<sup>th</sup> April 1977 that “une pièce qui est l’un des originaux d’un écrit sous signatures privés dit fait triple à Quatre-Bornes le 29 Décembre 1976 [...] *contenant vente par le mandataire de Madame Marie Yolande Andrea César à Mons. Zwalaparsad Choolun, d’une portion de terrain de la contenance de quatre cents quatre vingt dix Arpents environ...*”. The said «dépôt» was registered on the 14<sup>th</sup> April in Reg. A 403 No. 232 and transcribed in Volume 1362 No. 11.
- By a third deed under private signature dated 23<sup>rd</sup> May 1977, made in triplicate at Quatre-Bornes and transcribed in Volume 1378 No. 5, Zwalaparsad Choolun allegedly sold to Sonee Choolun a portion of land of about 490 Arpents situated in the District of Black River, a place called La Gaulette, Côteau Raffin. It has been stated in the said deed that Zwalaparsad Choolun is the owner of the said portion of land by virtue of deeds transcribed in Volume 1353 No. 14 and Volume 1362 No. 11.

The alleged sale mentioned above the conditions that:

*“la transmission du dit titre de propriété ne se fera que le jour du paiement intégral du dit solde de prix de vente de la signature du contrat authentique régularisant ces présentes...»*

*Qu’en cas le soussigné d’une part (Zwalaparsad Choolun) pour n’importe quelle raison quelqueconque refuserait de vendre le dit terrain à l’acquéreur (meaning Sonee Choolun) il devra verser à ce dernier une indemnité de la somme d’un million quatre cent mille roupies et lui rembourser la somme de Rs. 123. 000, à lui payer à titre d’indemnité».*

*Qu’au cas ou l’acquéreur (meaning Sonee Choolun) refuserait de faire la présente acquisition, toute somme versée par elle à Mons. Zwalaparsad Choolun restera acquise à ce dernier a titre d’indemnité».*

On the 11<sup>th</sup> July 1978, Sonee Choolun and the heirs of Zwalaparsad Choolun appeared before Notary Public Marcel Cooty and deposited the deed under private signatures referred to above. The said “dépôt” was registered in Reg. C 285 No. 4845 and transcribed in Volume 1417 No. 17.

Furthermore, Sonee Choolun has by a deed registered in Reg. A 507 No. 6177, given a power of Attorney to one Swee Pin Sing Fat, of Vacoas Road, Vacoas, empowering him to sell and/ or dispose of the said portion of land of 490 *Arpents*.

By another deed under private signatures, dated 29<sup>th</sup> April 1980, a sale is made on a portion of land of 300 *Arpents* from the said portion of land of 490 *Arpents* to one Mohamed Khateeb Hosany. Following a “dépôt”, the said deed has been transcribed in Volume 4684 No. 44.

Finally, *Le Petit Morne Limitée* claims to have purchased the land in lite from the *Société du Morne Brabant* on 17<sup>th</sup> March 1986 as per deed drawn by Notary Marie Joseph Pierre Doger de Spéville in virtue of the deed transcribed in Volume 1702 No. 82.

While deponing before the Commission, Marie Andrea Yolande César, (*See Appendix ii*) as far as she recollects, said that she has never given a Power of Attorney to Harryparsad Choolun to sell or dispose of the land referred to above, nor has she, in any way whatsoever, authorised him to dispose of the said property, or of any part of it.

**DEVELOPMENT PERMIT**

Reference: BLR/5945/97

Under the Town & Country Planning Act No. 6 of 1954 as Subsequently amended.  
Mess / Mrs / Mr / Messrs / Heir: SONEE CHOLUN

is / are hereby authorised to develop her / his / their land  
TV No. 1378/5 & 1417/19 situated at COPEAU RAFFIN

in the District Council's Area on the conditions mentioned below:  
Description of Development: ERUCTION OF A PLOT OF LAND OF AN EXTENT OF 26 Ha 2749 sq FROM A PLOT OF LAND OF THE EXTENT OF ABOUT 490 ARPENTS.

Conditions: \_\_\_\_\_

Remarks: \_\_\_\_\_

N.B. 1. Before starting any construction, the above developer must apply for and obtain a building permit from the ministry of works. The building to be erected should be according to the site plan approved by the Council.  
2. This permit along with the necessary plans should be kept on site of work and produced on demand of any authorised officer of this Council.  
3. For cases of Commercial or Industrial Development applicant should apply to obtain relevant operation licences from this Council. Attention of applicant is drawn to the fact that no payment whatsoever should be made for the obtaining of this permit.

Date: 31/1/97

Black River District Council

*The Development Permit obtained from the Black River District Council in spite of non- approval from the Council*

In the course of searches undertaken by the Commission and on the basis of documents gathered, certain irregularities have been found:

- In the “*casier hypothécaire*” of Pierre Spéville, Repertoire No. 7, it was found that:

- The entry of 1977 is made before another entry witnessing seizure in 1821; and
- The entries have been modified and amended, as evidenced by deletion.

In the said “bordereau” registered in Volume 1353 No. 14, it was found that:

- There are numerous erasures without any appropriate initials;
- Where the name Zwalaparsad Choolun appears, it is neither the same handwriting, nor colour as the rest of the document;
- The mention of “Le Morne”, as the location of the said property, was erased and only further was the name “Côteau Raffin” inserted;
- The document bears two signatures of Z. Choolun which differ from one another.
- Furthermore, while the said “bordereau” mentions only 190 A., in the “*case hypothécaire*” of Zwalaparsad Choolun, the corresponding entry mentions 490 A.

Furthermore, the Commission is of the opinion that the land sold should first have been registered under the name of the forefathers of Marie Andrea Yolande César, but on the documents, it can be seen that the sale was made directly from Pierre Spéville who died in 1859 to Z. Choolun.

The two representatives of the Development Bank of Mauritius (DBM), Messrs Geerjanand Prithvinath, Manager and his Assistant, P. Teeromalay, (*See Appendix ii*) who deponed before the Commission on the 14<sup>th</sup> April 2011, gave evidence that there was an application with respect to the loan of Rs. 50 million where the portion of land was given as surety. The representatives explained that the DBM found that there were irregular circumstances surrounding the said plot of land and therefore did not proceed with the loan. When questioned about the irregular circumstances, both Directors of the DBM stated that after queries about the site plan and title deed, the Board were not quite satisfied that the real owner of the land, as the “*Société Le Petit Morne*” had also a claim on the said portion of land.

Land Surveyor Georges Ng Tong Ng Wah, (*See Appendix ii*) who supposedly surveyed the land at the request of the Choolun family categorically denied on Wednesday 20<sup>th</sup> April 2011, having performed the work. When asked to explain how his name and stamp were found on the site plan submitted to the DBM, Ng Tong Ng Wah replied that he does not even know the site and had never been to Côteau Raffin. He was unable to ascertain how the stamp had been used. He avers that the site plan does not bear his signature.

While deponing before the Commission on the 20<sup>th</sup> April 2011, Mrs Koo Yuk Cheong, (*See Appendix ii*) Deputy Registrar General of the Conservator of Mortgages Office, confirmed that indeed the “*Case hypothécaire*” related to the plot of land of 490 *Arpents* belonging to Pierre Spéville, has been tampered with and that the land has, allegedly been sold to the Choolun for the sum of Rs. 100,000. And that the said entry in the “*Case hypothécaire*” related to this sale is false.

On the other hand, called to explain how a Development Permit could have been given for development on the said plot of land of Pierre Spéville, Mrs. Marie Aimée Bhujohory, Acting Chief Executive and Y. Hosenally, Chief Planner of the Black River District Council, (*See Appendix ii*) explained in details how and in what circumstances a Development Permit is given to somebody. When confronted with a copy of the Development Permit to the Choolun, both showed their astonishment and shock that such a thing could have happened being given in the present case, the whole Council, after perusal of the Choolun dossier and after having obtained the legal advice, twice rejected the request for the permit.

Vijayal Sunassee, the then Head Planner, attached to the District Council, (*See Appendix ii*) as Representative of the Ministry of Housing and Lands, who issued the Development Permit without the approval of the Black District Council, avers that she could not explain how her signature could have been on the approval letter, even if she accepted that it was indeed her real signature at the bottom of the letter.

On Friday 20<sup>th</sup> May 2011, Sanjay Choolun, who holds a Power of Attorney on behalf of Sonee Choolun, purported that he was handling the present case. In fact, Sonee Choolun who deponed

In the last paragraph of the Affidavit of Prescription, which was drawn up by Me Richard de Chazal, Notary Public, it is stated

*“that it is to our perfect knowledge that the said company “L’Anse Limited” has since the 14<sup>th</sup> December 1944 up to now occupied peacefully, publicly, continuously, uninterruptedly, unequivocally, animo domini “à titre de propriétaire” the four above portions of land.*

The Affidavit was registered on 21<sup>st</sup> February 1957 in Reg. A 332 No. 9720 and transcribed in TV 710 No. 175.

An in-depth study of the above land prescription has revealed that, in fact and truth:

- No survey plan signed by a Land Surveyor was submitted with the said land prescription.

It appears that Mr. Montocchio could also have ‘prescribed’:

- State-owned land ‘Mon Boudoir’ amounting to some 280A59P (Please refer to TV 257 No. 77 at the Registrar & Mortgage Office
- State-owned land ‘Legrand’ amounting to some 15A46P (TV 261 No. 76).
- Numerous Private-owned portions of land belonging to various small and medium landowners amounting to some 340A39P or much more.
- Company ‘L’Anse Limited’, incorporated following a deed drawn up by Me. Edouard de Keating, Public Notary, on 12<sup>th</sup> December 1944 and represented by René Mérandon du Plessis, purchased from the said Montocchio the four portions of land amounting to some 636A44P for the sum of Rs. 60,000 on 17<sup>th</sup> April 1957. It is explicitly mentioned in the title deed transcribed in TV 717 No. 1, and drawn up by Notary Public Richard de Chazal that *«Montocchio a déclaré qu’étaient aussi compris en la dite vente :*

*tous les terrains généralement quelconque sis à L’Anse Courtois dont il pourrait être propriétaire et qui n’auraient pas été inclus en la dite vente;*

*tous terrains qui peuvent être enclavés dans les terrains vendus ou qui peuvent les avoisiner et qu’il aurait pu acquérir par prescription ;*

*qu’en sus des 636A44P don’t il est question dans l’Affidavit de prescription, il existe d’autres terrains sis au même endroit dont la Compagnie L’Anse Limited est propriétaire à divers titres.»*

There have been several sales and exchanges of the said four portions of land from 1958 up to 2003.

In the light of the above-mentioned events, the Commission believes that Montocchio may have prescribed State lands “Mon Boudoir” and “Le Grand”, as well as those belonging to several small and medium land owners.

The different companies are still enjoying today the financial windfalls derived from the prescription of 636A44 perches made by Montocchio in February 1957.

The Commission without hesitation referred the matter for further investigation to the Ministry of Housing and Lands, as it believes State land may have been included in the prescription.

## VICTIMS OF THEIR GOOD FAITH

The Commission wishes to highlight two cases where people, through both good faith and illiteracy, lost their land, wealth, security and hope in everything they have been brought to believe in.

Other cases have been analysed by the Commission where “crooks”, be it “supposedly land searchers”, Notaries, Barrister-at-law, Bank and Insurance officials, “facilitators” roaming in the vicinity of the Registrar of Companies’ Building or at the Conservator of Mortgages Office, easy and complacent “witnesses” being paid some Rs. 50/100, acting as predators over their victims, leave no stone unturned to lay their hooks into poor and illiterate people.

The system, being too lenient, opens the door for well-dressed corrupt individuals to prey on innocent victims by making false promises to them.

CASE NAME: GERTRUDE (TJC/L/312 GERTRUDE Marie Fleurance born Bontende)

CASE NAME: DASANI (TJC/L/0137/DASANI Lutchmeen, born Gowreeah/SOBRUN Renouka, born Dasani)

---

### THE GERTRUDE CASE

---

Marie Fleurance Gertrude, the deponent, says on 21<sup>st</sup> September 2010 before the Commission that she is the owner of a plot of land of extent of 13 perches 20/100 situate at Bel Air Rivière Sèche by virtue of title deed Volume 1420, No. 26.

In 2002, both Marie Fleurance Gertrude and one Naidoo, a member of the 7<sup>th</sup> Day Adventist Church, reached an agreement to the effect that she donated half of her land to the Church and in consideration thereof, the Church would build a concrete house for her.

The deponent was brought to the District Council for the relevant permits and, subsequently, the land was surveyed and, in the division, the Church got 7 perches and the remaining portion to the deponent.

As a result of the survey, Gertrude was brought by the said Naidoo to Notary Gilles Catherine to sign the relevant documents.

While deposing before the Commission, Gertrude, the over-80 year-old could not stop crying because she was never aware of the ordeal she had to go through because of her good faith towards her God and her Church.

She claimed that nothing happened since both parties signed the agreement and; in 2005, she queried one Lutchman, a *Pasteur* from the Church. The latter again took the deponent to Notary Catherine who informed them that he had failed to register the previous deed but would now do the needful.

The deponent has not been provided with any papers as regards the division, and the concrete house, as agreed upon, was still not built at the time she came to the Commission.

Further, Gertrude had, at her own costs, to clean the land upon the request of the District Council. She avers that the cleaning amounted to a cost of Rs. 25,000/-. She did send a letter to the Church but never received any answer.

It was the request of the deponent that either she be given her papers and the proposed house or that she be handed back her plot of land.

The Commission decided that, should the relevant evidence be adduced, the next step would be to summon representatives of the Church. The District Council should also be summoned so as to produce the relevant permits.

"*Pasteur*" Lutchman was formally asked to depone before the Commission. He presented himself to the Commission and, surprisingly, he was in possession of the land contract as well as the development permits. He promised before the Commission to do everything to honour the contract entered into between the Church and Gertrude. "*Pasteur*" Lutchman even presented a site and building plan of the building to be erected for Marie Fleurance Gertrude, promising the members of the Commission to be invited to the inauguration of the house well before Christmas day 2010.

Neither Marie Fleurance Gertrude, nor members of the Commission were invited to the promised Christmas-day inauguration of the new building to house, since nothing happened.

---

## THE DASANI CASE

---

Deponent Lutchmeen Dasani, born Gowreeah, declares that in the year 1989, one Deoduth Mooklall Beegun asked her to act as surety together with his son, one Veerchand Mooklall Beegun, with the SICOM. She accepted to be the guarantor of Deoduth Beegun to enable the latter to purchase a bus to work and earn a living for his family.

She was of opinion that everything was working out smoothly.

Six years, that is, on 1<sup>st</sup> September 1995, the Insurance Company, SICOM LTD., where the loan has been contracted by Deoduth Beegun, sent a letter to Mrs. Gowreeah to inform her that her property will be seized.

The deponent avers that she was not aware that the loan had been contracted by Veerchand Mooklall Beegun, son of Deoduth Mooklall Beegun, and she was also under the impression that it was a simple transaction for Deoduth Beegun to be able to get a bus to work. She avers that she was totally unaware of the amount of the loan. She avers that she has been fooled as she does not know how to read nor write.

The land was seized and sold by levy. SICOM Ltd. bought the land and the house at the bar. While deponing before the Commission in September 2010, the representative of SICOM Ltd. explained that Mrs. Dasani was quite aware of what she was doing as she was put in presence of the pledge and was given all the explanation necessary by the Attorney of the Insurance Company.

The factual background is as follows:

- In 1989, the deponent was asked to act as surety for one Mr. Deoduth Mooklall Beegun for a loan contracted with SICOM.
- The deponent claims that the sum intended was for the purchase of a bus.
- The deed of loan was signed before Notary Lallah on the 5<sup>th</sup> October 1989 and inscribed in TV 1623 No. 103.
- As surety, the deponent pledged a portion of land of 50 perches situated at "Providence" which belonged to her.
- The deponent claims that she was unaware of the amount of the loan or the conditions attached to it.

The Commission raised some questions in this present case:

*Did the Deponent read the deed before signing?*

*Was the deed read over to her by the Notary?*

*Was she made aware of the terms and conditions of the deed?*

*Did she know for what amount she stood as surety and for what purpose the loan was taken?*

In the loan document, it can be found the mention “*read and approved*” written by the deponent in her own handwriting.

The deponent claims she was told that the loan was for the purchase of a bus.

*Did the deponent check whether the bus was bought and what actions did the deponent take?*

In 1995, the deponent was informed that her land would be seized in case of non-payment

*What actions did she take following this letter?  
Did the deponent contact the Beegun or SICOM?  
What actions were taken to stop the seizure?*

In 1997, the portion of land was sold by adjudication.

*What actions were taken between 1995 and 1997? What happened afterwards?  
Was the deponent represented during the proceedings? What was her stand?  
Did the deponent initiate any legal actions against SICOM or the Beegun?*

From searches undertaken by the Commission, the loan was taken to enable Deoduth Mooklall Beegun to build a concrete building on a portion of land.

In September 1995, the deponent was informed by SICOM that due to non-repayment of the loan, the property pledged would be seized;

On the 30<sup>th</sup> January 1997, the land was sold before the Supreme Court by adjudication and it was SICOM which purchased the land for Rs. 200,000/-;

The loan was given for the construction of a concrete building as shown in the agreement dated the 29<sup>th</sup> August 1989;

It was one of the terms of the agreement that the construction should be completed by nine months;

SICOM never ascertained whether the money was actually used for construction purposes.

Furthermore, while perusing the documents that Mrs. Dasani had signed and which were produced by SICOM Ltd., the Commission discovered that, indeed, Mrs. Dasani could not sign her name on the said document, but, instead, she had her thumbprint.

The Commission wonders how Mrs. Dasani could have written the words “*Read and approved*”...

The representative of the Insurance Company accepted, during his deposition, that the lady was illiterate.

Neither Deoduth Mooklall Beegun nor his son, Veerchan had ever been called to reimburse the sum received from SICOM Ltd.

## RECOMMENDATIONS

### THE COMMISSION FINDS

- The Commission has observed that affidavits have been sworn by witnesses who do not know the deceased person and the persons who are entitled to apprehend the estate and succession of the deceased person. These persons are called "*professional witnesses*" and swear affidavits upon payment of a sum of money. These persons are found lurking near the offices of Attorneys and Notaries and offer their services whenever needed.
- The Commission has also observed that some affidavits have been drawn up without verifying the Civil Status Acts. The dates of deaths are inaccurate and the numbers of the Civil Status Acts are fictitious. However, due to the new Rules and Regulations made by the Conservator of Mortgages, the affidavits drawn up, sworn and transcribed nowadays are accurate, well-drafted and contain precise information.
- It is a matter of concern that there is no Registry or Record kept for Wills and Testaments. Law Practitioners, heirs and successors and members of the public cannot know the existence of any Will and Testament left by a deceased person.
- This state of affairs gives rise to doubtful and inaccurate affidavits being drawn up. At times the legal heirs and successors are left out. At other times, the persons who have been bequeathed with properties are discarded in the affidavit.
- In such cases the parties are engaged in long and costly legal battles which take several years before the Court pronounces on the subject.
- The Commission has come across Wills and Testaments in which the Notary or the party making the Will has failed to mention the reserved portion of his properties, '*Quotité disponible*'. The testator has also failed to mention that he has other children. All the properties have been bequeathed to one person, instead of bequeathing the share which he can dispose of according to law.
- Representation has also been made to the Commission concerning the sale/donation/transfer of all properties by the father/mother to one/two children only, thus depriving the other children of a share in their parents' property.
- In such cases the heirs / successors who have not received any property or who have been discarded deprived of their rights, have to enter cases before the Supreme Court against their own brothers/sisters in order to get their shares either in cash or in kind.
- It has been observed that some Notaries would not draw up such deeds. However, it is a matter of regret that others Notaries still draw up such deeds which eventually leads to animosities between among heirs.
- The coming into force of the *Code Napoléon* (Amendment) Act No 8 of 1980 on the 8<sup>TH</sup> June 1980 has simplified the succession laws and has brought new hopes. Acknowledged natural children and legitimate children have the same shares and rights. It has also given to surviving spouse a share in the deceased property. The surviving spouse has also been attributed a right of *usufruct* on all the movables effects and the house which was used as the main residence of the family.

### THE COMMISSION RECOMMENDS

- It is high time that the Authorities find ways and means of keeping a record of all Wills and Testaments. One such way could be to make an entry in the "*Répertoire*" kept by the Conservator of Mortgages of the existence of a Will and Testament. This is possible for the authentic Wills and Testaments which are drawn up by two Notaries in the presence of the two witnesses or by one Notary in the presence of four witnesses.

- The registration concerning “*Testament olographe*” and ‘*Testament mystique*’, as provided for in Articles 969 and following of the *Code Civil*, cannot be done and this will give rise to problems in future, unless an amendment is made to the existing laws.
- The Notaries should ensure that the conditions laid down in Articles 913 and following of the *Code Civil* are observed fully.
- The Commission hopes that new laws should be implemented in order to protect, the spouses, the children, the family, the society and the country.

CHAPTER SIX

**PRESCRIPTION**

**ACQUISITIVE PRESCRIPTION:**

**A LEGAL PERSPECTIVE**

## INTRODUCTION

The Commission has laid down below the current legislation and practices regarding prescription. The purport of this chapter is to enable people to grasp the rationale behind the concept of prescription.

However, the Commission wishes to point out that the foregoing should not be considered as a reference for prescription of land.

1. Prescription is one of the means of acquisition of property which arises at the end of a fixed delay. It has been defined as : *“L’écoulement d’un certain délai au terme duquel elle transforme en une situation juridique définitive et inattaquable une situation de fait qui s’est prolongée.”* In the same way, prescription provides as a means to give legal validity to a set of events which have taken place over a definite period of time.
2. Although, as found in numerous cases before the Commission, prescription may lead to unfairness, when an owner is being deprived of his property, the rationale behind the law of prescription is to punish the owner who has failed to exercise any control or *entretien* over his property for such a long period. This lack of control or supervision does not entail occupying the land, but also to monitor that no third party is in occupation of the land. It is this lack of diligence or *“négligence grave”* that is sanctioned by our Law.
3. It must be borne in mind that prescription entails some advantages which cater for the true cases of unfairness. In fact, in most cases, prescription serves to strengthen a claim to ownership without depriving anyone. For example, in Mauritius and Rodrigues, many people are owners of plots of land but for one reason or another, these people do not have any documents, such as title deeds, witnessing same. By way of prescription, these people, although rightful owners from the very start, shall be in a position to prove their claim of ownership. *“La prescription alors ne change rien à la réalité juridique; elle ne fait que protéger l’ayant droit régulier en remédiant au défaut de preuve.”*

## RELEVANT LEGISLATIONS

### 4. *Civil Code (Code Civil Mauricien)*

**Art 2219-1 al 2 CCM :** « La prescription acquisitive est un moyen d'acquérir la propriété ou ses démembrements par l'effet de la possession. »

**Art 2229 CCM :** « Pour pouvoir prescrire il faut une possession continue et non interrompue, paisible, publique, non équivoque, et à titre de propriétaire.

Pour prescrire en matière immobilière, la possession doit, en outre, présenter un caractère apparent, manifeste par des signes matériels extérieurs, tels qu'une construction, un mur bâti servant de clôture, des plantations.»

**Art 2232 CCM :** «Les actes de pure faculté et ceux de simple tolérance ne peuvent fonder ni possession ni prescription.»

**Art 2233 CCM :** « Les actes de violence ne peuvent fonder non plus une possession capable d'opérer la prescription.

La possession utile ne commence que lorsque la violence a cessé.»

**Art 2235 CCM :** « Pour compléter la prescription, on peut joindre à sa possession celle de son auteur, de quelque manière qu'on lui ait succédé, soit à titre universel ou particulier, soit à titre lucratif ou onéreux.»

## EVOLUTION IN THE LAW

5. The Law regarding prescription has always found its source in the *Civil Code*. The Law has been amended twice, once in 1979<sup>1</sup> and the second time in 1983<sup>2</sup>. The time required for prescription has evolved from 20 years to 30 years and exterior signs of occupation added in Art. 2229 CCM.

## GENERAL CONDITIONS

6. Article 2229 CCM clearly lays down the conditions required to invoke prescription. It is to be noted that the conditions set down in Article 2229 CCM are cumulative.
7. *Possession continue et non interrompue*: the person should be in possession of the land in a continuous manner for the full period required for prescription. It is to be noted that by virtue of 2235 CCM, for the purpose of computation the time delay, subsequent owners may add to the time prescribed by the precedent owner. For example, an heir who has continued to occupy of a portion of land was entitled to rely on his father's acquisitive prescription and his own subsequent occupation.<sup>3</sup> The same principle applies for sales. It has been held that "*where a portion of land has been sold to different parties who occupied it, in turns, as owners, the periods of occupation can be added to make up the time required for acquisitive prescription to have effect.*"<sup>4</sup>
8. *Paisible*: "this condition entails that there are no interferences from people who claim that they are the rightful owner by any judicial means. For example, if an action is entered by someone against the possessor, this will suspend the time of prescription. In the same way, if someone else uses the plot of land as the rightful owner and interferes with the possession, the occupation cannot be termed as "paisible".
9. *Publique*: "this entails that the possession of the occupier should bear exterior signs of ownership. The occupier should act in an ostensible manner in so doing as owner of the land. For example, the occupier should erect buildings or cultivating crops or setting up of walls."
10. *Non équivoque et à titre de propriétaire*: This condition provides that the occupier should act as the rightful owner and in an unequivocal manner. The occupier should possess the *animus domini* which has been defined as "*L'animus est la volonté chez le possesseur d'agir comme il le fait parce qu'il se veut titulaire du droit auquel correspondent normalement ses actes matériels de maîtrise, de maniement, d'usage, de jouissance, ou de transformation. La légitimité de cette intention n'est pas à prendre en considération, faute de quoi la possession n'aurait aucune valeur par elle-même [...]*"<sup>5</sup>
11. It is worth noting that good faith is not required to prescribe under Article 2229 CCM and: further, is not an element of possession itself. As such, a person can prescribe a land, although he knows he is not the owner of the land and even if he knows the identity of the real owner, save that he abide by the conditions laid down above.

## PROHIBITION OF PRESCRIPTION

12. It is provided by Law that certain land or immoveable property cannot be subject to prescription. The first exception is State Land<sup>6</sup>, formerly known as Crown Land. This principle has been reaffirmed in various cases before the Supreme Court.<sup>7</sup> Please note that originally the Law applicable before 1991 was the Crown Lands (Exclusion from

<sup>1</sup> The *Code Napoléon* (Amendment) Act 37 of 1978.

<sup>2</sup> The *Code Napoléon* (Amendment No. 3) Act 9 of 1983.

<sup>3</sup> Vide *Dadool v. Jeetdeal 2006 SCJ 3*.

<sup>4</sup> *Solange v Aubeeluck 1955 MR 43*.

<sup>5</sup> Encyclopédie Dalloz, Droit Civil Vo. Possession at note 17.

<sup>6</sup> Section 35 of the State Land Act (1991): "Notwithstanding article 2227 of the Code Napoleon or any other enactment, State Land is imprescriptible".

<sup>7</sup> *La Société des Cascadeurs v. The Ministry of Works 1995 SCJ 15*: "One cannot acquire by prescription any right over State property."

Prescription) Ordinance 1945. Therefore, prior to 1945, crown lands were subject to prescription.

13. By virtue of Art. 2226 CCM, "*On ne peut prescrire le domaine des choses qui ne sont point dans le commerce.* » Being considered as such are, amongst others, sea, air, etc
14. Another prohibition to prescription is laid down in art 2236 CCM<sup>8</sup>. The operative word in this Section is "*précarité*". This word means that the occupier has been put in possession by virtue of the consent of the real owner. As such, the notion of possession required for prescription is vitiated and cannot be the basis of a prescription. The occupier is only holding the property on behalf of the actual owner. The most current examples are land leased or given by agreement. It has been held by the Court that "*la précarité n'est pas un simple vice de possession, c'est quelque chose de bien plus grave, c'est l'absence de possession: la possession précaire n'est qu'une simple détention de la chose, c'est-à-dire une situation juridique parfaitement distincte de la possession.*"<sup>9</sup> Further, by virtue of art 2237 CCM<sup>10</sup>, the subsequent heirs of a «détenteur précaire» cannot prescribe as their occupation is considered defective from the very start. The same principle applies even after the end of the lease period. It was considered that "*Les fermiers et locataires ne peuvent prescrire la chose donnée à bail ou à loyer, soit pendant la durée du bail, soit après son expiration. Il en est ainsi même si le bailleur n'est pas propriétaire de la chose : en ce cas, la possession du fermier ou du locataire profite au bailleur. Si le défunt n'était que détenteur, son héritier aura la même qualité. Ainsi les héritiers de celui qui a possédé pour autrui ne peuvent prescrire, si la possession primitive était viciée, l'héritier succède aux vices de la possession de leur auteur.* »<sup>11</sup>
15. It must be noted that even though the heirs cannot prescribe, if the land in issue is sold to a third party, the buyer can start to prescribe as from the date of sale.<sup>12</sup>
16. However, the *Civil Code* itself has brought an exception to the rule laid down in paragraph 14 above. By virtue of Art. 2238 CCM<sup>13</sup>, should there be *interversion* or *opposition au propriétaire*, the detention is no more considered as *précaire*. What is contemplated by Art. 2238 CCM is the situation where the occupier *précaire* acts as the rightful owner and challenges the owner on the issue of ownership. It has been held by the Court that "*La contradiction opposée aux droits du propriétaire, qui est la seconde cause d'intervention prévue par l'article 2238, peut résulter de tout fait ou de tout acte impliquant, de la part du détenteur à titre précaire, la volonté de posséder en maître et de contester à l'avenir le droit de celui pour le compte duquel il possédait. Il ne s'agit pas d'une simple négation du droit de propriétaire ; il ne suffit pas que le détenteur agisse, en fait, comme s'il était propriétaire, par exemple, en faisant des démolitions ou des constructions ; il faut qu'il y ait contradiction opposée au propriétaire, c'est à dire qu'un conflit s'élève directement entre eux sur la question de propriété.* »<sup>14</sup>
17. The next exception is the issue of *communiste* that is where a plot of land is owned jointly by several persons. This may be the case where several heirs inherit a plot of land or when there is *indivision* in ownership. The rule is that a co-owner cannot prescribe against the other co-owners.<sup>15</sup> The same exception, as provided in paragraph 16 above, applies. It has been held that "*il faut, de la part de celui qui prétend acquérir à titre privatif, des actes*

<sup>8</sup> Art 2236 CCM: "*Ceux qui possèdent pour autrui, ne prescrivent jamais, par quelque laps de temps que ce soit. Ainsi, le fermier, le dépositaire, l'usufruitier, et tous autres qui détiennent précairement la chose du propriétaire ne peuvent la prescrire.* »

<sup>9</sup> Nemdharry v. Rasmally 1955 MR 353.

<sup>10</sup> Art 2237 CCM: "*Les héritiers de ceux qui tenaient la chose à quelqu'un des titres désignés par l'article précédent, ne peuvent non plus prescrire.* »

<sup>11</sup> Parmessur v. Seeyave 2000 SCJ 348.

<sup>12</sup> Art. 2239 CCM : « *Ceux à qui les fermiers, dépositaires et autres détenteurs précaires ont transmis la chose par un titre translatif de propriété, peuvent la prescrire.* »

<sup>13</sup> Art 2238 CCM : « *Néanmoins, les personnes dans les articles 2236 et 2237 peuvent prescrire, si le titre de leur possession se trouve interverti, soit par une cause venant d'un tiers, soit par la contradiction qu'elles ont opposés au droit du propriétaire.* »

<sup>14</sup> Parmessur v. Seeyave 2000 SCJ 348.

<sup>15</sup> Bakooa v. Proag 1956MR 453.

*extérieurs et contradictoires, agressifs et persévérants qui, par une manifestation non équivoque, mettent l'associé en demeure de défendre son droit ; autrement il est censé représenter la communauté et jouir, en vertu de son titre, aussi bien pour elle que pour lui-même »<sup>16</sup>*

## DELAY FOR PRESCRIPTION

18. As provided for in Art. 2261 CCM, the length of time required for prescription is 30 years. There is the shorter delay of 10 years which shall not be dealt with in this Report. The delay is computed in days and the prescription shall be effective on the end of the last day.
19. Any person applying for prescription shall state, and give evidence of the duration and the starting date of the prescription, failing which the claim for acquisitive prescription will be rejected.<sup>17</sup>

## INTERRUPTION OF THE DELAY

20. The *Civil Code* has provided for circumstances that shall put an end to the period of occupation prerequisite for prescription. These are as follows:

**Art. 2242 CCM :** «*La prescription peut être interrompue ou naturellement ou civilement.*

**Art. 2243 CCM :** *Il y a interruption naturelle, lorsque le possesseur est privé, pendant plus d'un an, de la jouissance de la chose, soit par l'ancien propriétaire, soit même par un tiers.*

**Art. 2244 CCM :** *Une citation en justice, un commandement ou une saisie, signifiés à celui qu'on veut empêcher de prescrire, forment l'interruption civile.»*

21. For the purpose of Art. 2243 CCM, what is required is that the occupier is deprived from the possession of the land for a minimum period of 1 year be it by the rightful owner or a third party.<sup>18</sup> This principle is also explained as : *“la prescription acquisitive, reposant à la fois sur la possession prolongée d'une chose par celui qui prescrit et sur l'inaction de celui contre qui la prescription court, cette prescription cesse de courir, soit que le possesseur cesse de posséder, soit que le propriétaire de la chose sorte de son inaction et réclame la restitution de sa chose ou obtienne une reconnaissance volontaire de ses droits »<sup>19</sup>*
22. Another limb to Article 2243 CCM is when the occupier abandons by his own will the possession of the land. There is no requirement of 1 year, as provided above, but the material part is that the occupier chooses not to act as owner; therefore there is no *animus domini*.<sup>20</sup> However, mere non-usage does not constitute abandonment.
23. Another means to stop the delay is to initiate legal proceedings against the occupier. By legal proceedings, we mean any action brought before a Court of Law challenging the ownership and also services of a *mise en demeure*. The day the action is entered or the notice *mise en demeure* is served, shall constitute the effective date of interruption.<sup>21</sup>

<sup>16</sup> Bakooa v. Proag 1956MR 453.

<sup>17</sup> Amjad v. Ramloll & Anor 2002 SCJ 219.

<sup>18</sup> Vide Rioux v. Esplacathose 2003 SCJ 248.

<sup>19</sup> Dalloz, Vo Prescription note 129.

<sup>20</sup> Vide supra paragraph 10.

<sup>21</sup> Vide Foolman v. Chaytoo 1972 MR 232.

24. It is noted, however, that the principle laid down in paragraph 22 above shall have no effect if the plaintiff withdraws his case or his claim is rejected by the Court.<sup>22</sup>
25. Any interruption for the reasons given above result in nullifying the delay which has already lapsed. It has a retrospective effect and creates the legal situation that the occupier has not occupied the land for the purpose of prescription. However, nothing prevents the occupier from starting anew the prescription, provided the conditions laid down in Article 2229 CCM are met.

## SUSPENSION OF THE DELAY OF PRESCRIPTION

26. The suspension of the delay of prescription shall not be confused with interruption of the delay. The difference between the two notions is that suspension is a mere temporary interruption of the prescription where the time elapsed of prescription is still valid and shall continue upon resumption of the prescription.
27. Prescription cannot run against minors, incapacitated majors and spouses.<sup>23</sup> Hence, prescription started against a “majeur” shall be suspended upon his death and where the heir is still a minor. The prescription will resume at the majority of the heir.<sup>24</sup> However, viewing it from the other side, minors can prescribe through their legal administrator.<sup>25</sup> Therefore the rule as regards minors is that prescription can be made by a minor but not against a minor.
28. French jurisprudence also provides as a cause of suspension the “*impossibilité d’agir*”, although it has restricted its application. Dalloz explains: “*Lorsque l’impossibilité d’agir où il s’est trouvé provident, non pas de sa personne mais des circonstances, rien ne suppose a ce que les tribunaux tiennent compte de l’obstacle et puissant décider que la prescription a été suspendue.* »<sup>26</sup>
29. There remains the situation where someone is not aware of his rights over a plot of land. There has been a lot of debate on this issue in the French jurisprudence but it seems that the latest decisions go to the severe approach inasmuch as it has been decided that “*mais certains plus récemment ont exigé l’erreur invincible ou même posée en principe que l’ignorance de l’existence d’un droit ne constitue pas une impossibilité absolue d’agir équivalent à la force majeure.*”<sup>27</sup> This argument has never been tested before the Mauritian courts and it would be interesting to have a judgment on this issue.

## CONSEQUENCES OF PRESCRIPTION

30. If the occupier was the rightful owner as from the start, prescription would merely serve as evidence of his title. The person does not need to produce any title deeds but only show that the prescription has given him the status of owner.
31. If the occupier was not the rightful owner, he acquires the ownership by way of prescription. This does not only serve as a defence against claims of ownership by other parties, the prescription gives him all the rights accrued to a owner including the right to sell the land.

<sup>22</sup> Vide Art. 2247 CCM.

<sup>23</sup> Vide arts. 2251, 2252, 2253 CCM.

<sup>24</sup> Ramjeeawon & Ors v. Matapallut 2003 SCJ 138.

<sup>25</sup> Jankoo v. Gopaul 1992 MR 90.

<sup>26</sup> Dalloz Vo Prescription note 220.

<sup>27</sup> Dalloz Vo Prescription note 225.

32. To be able to exercise all the rights of an owner, the owner by prescription should abide by the Affidavits of Prescription Act 1958. Following such transcription, the prescription will act retrospectively as to the first date of occupation.
33. However, even when all the conditions of the Affidavits of Prescription Act 1958 are met, the title deed of the owner by prescription can always be challenged by any party. The delay for such an action is 30 years.
34. In a case before the court, the owner by prescription will have to adduce evidence to prove that he has occupied the land with all the requisites of prescription for 30 years. The opposing party will have to adduce evidence to the contrary and the Judge shall decide upon the merits of the case on a balance of probabilities.
35. Since the "title" can be challenged within 30 years, any sale of the land should bear the mention that the buyer has been informed that the land bought has been obtained by prescription and hence can be challenged.
36. Since prescription is concerned with "*possession utile*" and not ownership, even if the rightful owner produce a title deed, this shall not suffice to nullify the prescription provided the owner proves his occupation with all the requisites of acquisitive prescription.<sup>28</sup>

## AFFIDAVITS OF PRESCRIPTION LEGISLATION

As stated above in paragraph 32, each prescription needs to be transcribed.

The whole procedure of prescription rests upon the swearing of an affidavit of prescription. Basically, an affidavit of prescription is a legal document sworn by two witnesses who affirm that the applicant has occupied a portion of land with all the requisites of acquisitive prescription. In the spirit of the law, the swearing of a false affidavit is a criminal offence and as such, an affidavit is a document that can be relied upon. However, cases before the Commission have revealed that this has not prevented the emergence of so-called "*témoign de complaisance*", who, after payment of money merely affix their signatures on the said affidavits and, more often than not, without even understanding the contents thereof. This system has been encouraged by the complicity of other members of the judicial systems such as attorneys or clerks. It is not uncommon to find the same persons as witnesses on a large number of affidavits.

For the system to function in a just and fair manner, there need be two witnesses who have personal knowledge of an occupation of 30 years and the manner in which the occupation has been exercised. The Commission fails to see, save providing harsher penalties and an explanatory campaign, how to prevent these abuses and in any case, the power of control would be limited.

The second flaw of the system is the plan accompanying the memorandum of survey and affidavit of prescription. Each affidavit of prescription must be accompanied with a memorandum of survey with a plan in conformity with the Land Surveyors Act, showing the location and extent of the land subject matter of the prescription. Experience has shown that in certain cases, there is neither mention of adjoining neighbors or occupiers, nor the state of the land when it was surveyed.

The combination of these two flaws results in the fact that it is an easy task to obtain a false affidavit of prescription and a sufficiently vague plan which, as already stated, and as a result, a legal title.

The governing law is the Affidavit of Prescription Act 1958 which provides for the mechanism to swear affidavits of prescription.

Affidavit of prescription, which is defined as an affidavit witnessing the acquisition by prescription of immovable property, has for effect to give legal validity to occupation with all the prerequisites

---

<sup>28</sup> Khadaroo v. Dorson 1980 MR 45.

of acquisitive prescription, i.e., when someone has occupied a portion of land with all the requisites of acquisitive prescription, the only way to have a legal valid title is by means of an affidavit of prescription.

It is to be noted that an affidavit of prescription is not a clear and unequivocal title since it can always be challenged in Court. For example, in case of sale, the Notary is bound to inform the buyer that the seller's title is one of affidavit of prescription. Further, anyone feeling deprived by a prescription have 10 years to challenge the prescription before the Supreme Court.

## PRECONDITIONS

The Law provides for three basic conditions in order to swear an affidavit:

- the affidavit shall contain a mention of the situation, description and exact boundaries of the immovable property forming the subject-matter of the affidavit, and the open market value of the property at the time of completion of the statutory period for prescription;
- the affidavit shall contain the date on which the occupation started and shall be accompanied by a site plan showing the precise location of the property; and
- the affidavit shall contain, in respect of the party alleged to have acquired the immovable property by prescription -
  - his names in small letters and his surname in capital letters;
  - his date of birth, the birth certificate number and the Civil Status Office where the birth was registered; and
  - where applicable, his date of marriage, the matrimonial regime governing the marriage, the marriage certificate number and the Civil Status Office where the marriage was registered.

## PROCEDURE

- An affidavit containing the particulars mentioned above shall be sworn by two witnesses who shall, under oath, affirm that the person has occupied a portion of land with the prerequisites of acquisitive prescription;
- When the affidavit is sworn, in order to give it legal validity, the affidavit of prescription needs to be transcribed at the Office of the Conservator of Mortgages. The applicant shall cause an application to be made;
- The application shall be made at the Office of the Conservator of Mortgages and every application for the transcription of an affidavit of prescription shall be accompanied by:
  - (a) the duly registered affidavit of prescription; and
  - (b) a memorandum of survey by a Surveyor setting out the situation, description and exact boundaries of the immovable property forming the subject matter of the affidavit;
- The applicant shall cause a Notice of the application to be published once in the *Gazette* and on consecutive days in 2 daily newspapers in Mauritius, of which one at least shall be approved by the Conservator; and
- The Conservator shall enter in a special register kept for the purpose and known as the Register of Affidavits of Prescription the particulars of every affidavit of prescription

received by him for transcription and the said register shall be available for inspection by members of the public.

### **OBJECTION**

- Any person claiming to be the owner or part-owner of, or to have an interest in, the whole or part of the immovable property in respect of which an affidavit of prescription has been sworn, may, within 3 months of the last publication of the notice, object to the transcription of the affidavit of prescription by serving upon the Conservator and upon the applicant a notice setting out the grounds of his objection;
- The Conservator shall forthwith enter in the Register of affidavits of prescription particulars of any objection received by him as well as a mention of the date of service of the notice of objection;
- Any interested party may, within 3 months of the date of service on the Conservator of a notice of objection, apply to a judge in Chambers for an order setting aside the objection; and
- Where, after hearing the parties and later considering the grounds on which the objection is based, the judge is of opinion that the objection is frivolous and unjustified, he shall make an order setting aside the objection; he shall otherwise refer the parties to the competent court.

### **TRANSCRIPTION OF THE AFFIDAVIT OF PRESCRIPTION**

- The affidavit shall be transcribed only when the objection is withdrawn by notice served on the Conservator or there is presented to the Conservator either an order of a judge in Chambers setting aside the objection or a certified copy of the judgment of a competent court deciding the issue against the objector; or
- In the alternative where no objection is received by the Conservator or where any objection received has been withdrawn or disposed of against the objector, the affidavit of prescription' shall be transcribed on production by the applicant to the Conservator of the copies of issues of the *Gazette* and of the newspapers containing the publications prescribed and on payment of the transcription fees.

### **OBSERVATIONS**

- No deed, whether authentic or under private signatures, witnessing the sale or transfer of, or the constitution of any privilege, mortgage or servitude or right of use over, an immovable property the title to which is derived from acquisition by prescription witnessed by affidavit of prescription, shall be valid unless the affidavit has been transcribed, and a reference to the particulars of such transcription is endorsed on the deed.
- The above refer only to the transcription of an affidavit of prescription, be it the requirements or the objection, the substantive law of prescription is to be found in the civil code.
- The delay for the objection does not at no time preclude any interested party to contest the validity of the prescription itself before the Supreme Court.

## THE COMMISSION RECOMMENDS

1. After having reviewed the numerous laws regarding prescriptions, the Commission recommends to do away with the whole procedure of affidavit and to provide for an alternative way to effect the transcription of prescribed plots of land.
2. It is the opinion of the Commission that the appropriate Protocol would be to exercise more control upon the averments of a person alleging to have prescribed a plot of land. There should be an institution which will ensure the truth of the said averments and which shall have the powers to investigate upon the veracity of these averments. Further, before the same institution, an appropriate memorandum of survey would be required with the possibility of putting questions to the Surveyor.

To summarise, any person who claims to have occupied a plot of land, with all the requisites of acquisitive prescription, shall have the burden of proving same, with at least two witnesses to corroborate the claim. Be it the applicant or the witnesses, they would face a panel who would query them on their averments.

Although this system would not be foolproof, it will minimize the risks of frauds.

Also, it must be borne in mind that the creation of a single institution may result in it being overburdened, which might hamper a quick and efficient process. This is the reason why it has been deemed appropriate to share this role amongst our Local Authorities, although the possibility of one central institution remains.

Below is a proposal for a new system where the affidavit of prescription has been replaced by a prescription permit. To cater for these, the Affidavit of Prescription Act can be amended or simply repealed and the following added to the Local Government Act.

To conclude, the legislator needs add the appropriate penalties for non compliance or frauds.

1. There shall be established in every Local Authority, a committee to be known as the Prescription Committee (hereinafter referred to as "the Committee"), which shall consist of *the Chief Executive or his representative* as Chairperson, the head of the planning department, the legal adviser of the Local Authority, a government Land Surveyor and a representative of the Ministry of Housing and Lands
2. The Chief Executive shall also designate an officer of the Local Authority to act as Secretary to the Committee.
3. The authority for execution of the Committee shall be the local authority of the respective town or district where the land to be prescribed is situated.
4. The Committee shall disseminate clear and transparent guidelines for the application, processing and issue of prescription permits.
5. The Committee shall examine, process and approve applications for prescription permits without having to refer the matter to the Council and such approval shall be deemed to have been made *under the authority of the Chief Executive*.
6. The Minister may make regulations to prescribe such other conditions as he deems necessary for the purposes of this Act. Any regulations made under Section (6) may provide that any person who contravenes them shall commit an offence, and shall, on conviction, be liable to a fine not exceeding [...] rupees and to imprisonment for a term not exceeding [...] years.
7. Where any member of the Committee or his spouse or next of kin has any direct or indirect interest in relation to any matter before the Committee, he shall -

- a. disclose, at or before the meeting convened to discuss that matter, the nature of his interest;
  - b. not take part in any deliberation or any decision-making process in relation to that matter;
  - c. A disclosure of interest made under this Section shall be recorded in the minutes of the committee; and
  - d. Any person who fails to comply with the requirements of this Section shall commit an offence and shall on conviction be liable to a fine not exceeding 10,000 rupees and to a term of imprisonment not exceeding 2 years.
8. All applications for prescription permits shall be forwarded to the Chief Executive who shall refer same to the Committee within a period of fifteen days. The Committee shall hold a hearing within 3 weeks of the end of the period of 6 months as provided by Section 12.
9. The application for a prescription permit shall:
- a) state the date on which the occupation started and the open market value of the property at the time of completion of the statutory period for prescription;
  - b) be accompanied by a memorandum of survey by a surveyor setting out the situation, description and exact boundaries of the immovable property forming the subject matter of the application and the adjoining properties; and
  - c) in respect of the party alleged to have acquired the immovable property by prescription
    - i. his names in small letters and his surname in capital letters;
    - ii. his date of birth, the Birth Certificate number and the Civil Status Office where the birth was registered, his National Identity Card; and
    - iii. where applicable, his date of marriage, the matrimonial regime governing the marriage, the Marriage Certificate number and the Civil Status Office where the marriage was registered;
10. Notice of the application shall be published once in the Gazette and on 3 consecutive days in 3 daily newspapers in Mauritius, of which two at least shall be approved by the Chief Executive. Further, the notice shall be affixed on the notice board of the relevant Local Authority.
11. The notice shall be in the form specified in the Schedule.
12. Any person claiming to be the owner or part owner of, or to have an interest in, the whole or part of the immovable property in respect of which an application for a prescription permit has been made, may, within 6 months of the last publication of the notice required under Section 10 object to the granting of the application by the Committee by serving upon the Chief Executive and upon the applicant a notice setting out the grounds of his objection.
13. In the event of an objection under Section 12, the Committee shall not proceed with the application unless it is ordered to do so under Section 15.

14. Any interested party may, within 3 months of the date of service on the Chief Executive of a notice of objection under Section 12, apply to a judge in Chambers for an order setting aside the objection.
15. Where, after hearing the parties and later considering the grounds on which the objection is based, the Judge is of opinion that the objection is frivolous and unjustified, he shall make an order setting aside the objection and refer the application back to the Committee or he shall otherwise refer the parties to the competent Court.
16. At the hearing of the Committee -
  - a) The applicant shall be accompanied by -
    - i. at least two witnesses; and
    - ii. the land surveyor who has signed the memorandum of survey referred to in Section 9 (b).
  - b) The Committee shall examine the applicant and the witnesses present as to
 

The date and length of occupation;

    - i. The nature of the occupation; and
    - ii. The knowledge of the witnesses as regards the applicant's contention.
  - c) The Committee may examine the Land Surveyor on his memorandum of survey.
  - d) The Committee shall, if it deems necessary, summon any other witnesses more specifically, the owners of adjoining plots of land.
17. The Committee shall within 4 weeks of the hearing referred to in Section 16, grant or refuse to grant a prescription permit. In case of refusal, the Committee shall give notice in writing to the applicant setting out the reasons thereof.
18. Any applicant for a prescription permit under this Act may, within 30 days of the date on which the notice of refusal under Section 17 is given, apply to the Judge in Chambers for a summons calling upon the local authority to show cause why his application should not be granted.
19. An application to the Judge in Chambers under Section 18 shall be made in the presence of the local authority and the Judge may grant any application on such terms and conditions as he may deem fit or reject it.
20. The prescription permit shall henceforth be drawn up, on a prescription deed, by an Attorney or a Notary.
21. No person shall cause a prescription deed to be transcribed nor shall the Conservator of Mortgages transcribe a prescription deed unless -
  - a) he is the holder of a prescription deed issued under this Act authorising him to do so;
  - b) he has an order of the Judge granting the application and has subsequently drawn up the prescription deed; or
  - c) he has a certified copy of the judgment of a competent Court deciding the issue against the objector which has subsequently been drawn up in the prescription deed.

22. A prescription deed shall be transcribed on production by the applicant to the Conservator of the copies of documents mentioned in Section 21 and on payment of the transcription fees.

23. No deed, whether authentic or under private signatures, witnessing the sale or transfer of, or the constitution of any privilege, mortgage or servitude or right of use over, an immovable property the title to which is derived from acquisition by prescription witnessed by a prescription permit, shall be valid unless the prescription permit has been transcribed, and a reference to the particulars of such transcription is endorsed on the deed.

24. Any person who draws up a deed in contravention of Section 22 shall commit an offence and shall, on conviction, be liable to a fine not exceeding [...] rupees.

25. The transcription of a prescription permit shall not confer on any party any rights on any immovable property which but for this Act such party would not have possessed.

### **THE COMMISSION FINDS**

The Commission is of opinion that Notarial deeds witnessing the acquisition by prescription of landed property should bear the same conditions as laid down in the proposed Affidavit of Prescription Act, more fully described above..

As per the Prescription of Landed Property Act 41 of 1969 - November 1969 and amended by RL 4/253 - 24 April 1982, someone who is acquiring land by prescription needs not to swear an affidavit of prescription, but has to comply with the other conditions. The procedure remains the same.

The amendments in the Affidavit of Prescription Act, as proposed by the Truth and Justice Commission, would thus apply *de facto* to the Prescription of Landed Property Act.

### **THE COMMISSION RECOMMENDS**

The Commission recommends that the Prescription of the Landed Property Act be repealed which will thus prevent any confusion as to the procedure of prescription.

CHAPTER SEVEN

**LAND REFORM  
LEGAL PERSPECTIVES**

## LAND REFORM - LEGAL PERSPECTIVES

Land is the habitat of Man and its myriad and complex use of it is crucial for human survival. It is the source of all material wealth, be it food, clothing, fuel, shelter or precious stones. We live on the land and from the land, and to the land our bodies or our ashes are committed when we die.

Many members of the animal kingdom have a fundamental drive to stake out and possess territory. Evidence for this is seen in all societies where groups of individuals establish their own areas of defensible space.

Where land is plentiful and can be obtained by clearing jungle or woodland, with no concern for the future, the administrative machinery needs only be rudimentary, but whenever the society reaches a level at which competition for the land begins to arise, land control must be introduced.

In the earliest beginnings, all societies regarded land as belonging corporately to the social group, whether this was a tribe, village, lineage or family. This concept is eloquently expressed in the much quoted saying of a West African Chief:

*"Land belongs to a vast family of which many are dead, few are living, and countless numbers are still unborn."*

Land is finite in extent and permanent by nature, but the ownership and extent of the rights associated with it change.

*"Land is the most fundamental resource upon which society relies for its very existence. This is the one resource which cannot grow in size unlike any human and other physical resources. Thus, it is of utmost importance that this resource be optimized to support economic growth, provide social stability and underpin sustainable resource development in Mauritius".* (Hon. Abu Kasenally, Minister of Housing and Lands, 23<sup>rd</sup> August 2011).

All along, while studying the documents and deeds submitted to the Commission, it has been noted that the Deeds Registration which prevails in Mauritius is a system for registering documents, but not necessarily registering title to land.

A deed does not prove who owns the land; it only records an isolated transaction. The information in the deed may be inconsistent with previous transactions. Apparent consistency may be the result of copying from a previous deed that itself was erroneous.

In many countries, the deed registering system has been abandoned in favour of a new system of registration of title supported by a Cadastral Map. The advantages may be listed as follows:-

1. Better basic records management, including better administration and accounting arrangement.
2. Standardization of forms and procedures to expedite the routine processing of documents.
3. Physical improvements to record keeping and documents storage so that there is easier access.
4. The use of microfilm for both archiving and retrieving of data.
5. Computerisation of the abstracts of Titles to provide quicker access to information.

The Government is aware that the present system is no longer able to respond to the needs of a modern State. For two years, it has initiated a Land Administration and Valuation Information Systems (LAVIMS) project as a first major part of an ongoing land reform programme.

A landowner should never be encouraged to think that a map can be a substitute for boundary marking anymore, and that the negotiation of his title can rid him of the responsibility of looking

after his land. When rights to land were transferred by a public ceremony performed on the land itself, there was little scope for uncertainty or mistakes. Boundaries were self-evident to the witnesses, and any doubtful points were cleared "*in situ*". When, however, land came to be transferred merely by a document in writing, it was no longer certain that the land component in the transaction would be physically pointed out in the presence of witnesses and in any case, some form of written description was needed for inclusion in the document.

The best boundary wrote S. Rowton Simpson "*is still the boundary which speaks for itself and requires neither map nor survey to prove it.*"

Instead, Surveyors in private practice abuse survey reports and claim fees for memoranda of survey. These result in 'surveys' which are not binding on the parties and should not be admitted in Court. Survey Reports are undertaken by Land Surveyors for the purpose of determining the extent and acreage of land.

With the implementation of the LAVIMS Project, certain fundamental reforms should be envisaged. Professor P. F. Dale rightly pointed out that:

*"the Cadastral Surveyor and the Survey organization which he serves both lie in the field of land information. The rationalisation of this role requires a re-appraisal of the content of land survey education and a change of attitude towards the responsibilities of the Government Land Survey department. An understanding of land must be put into the education of the Land Surveyor; the mandate of the Survey Department must be extended to permit to coordinate the acquisition, processing and presentation of all land information as required for planning and development. Only then will boundary surveys be seen in their proper perspective."*

In the new Cadastral Act, a Disciplinary Board to sanction wrong doings and malpractices of Land Surveyors will go a long way towards restoring public confidence.

Ideally, there should be one single agency to perform the various land management functions, such as survey, registration, valuation, planning, engineering surveys etc. In practice, however, it is difficult to alter existing arrangements, sanctions established by law, for which there are historical and political reasons.

The survey profession, itself, is perhaps coming to the close of a period of profound change and these changes are quite fundamental. Previously, there were few changes in technique that could be easily absorbed into the traditional philosophy of land surveying. Surveying is of such a nature that it now requires a radical change in ideas as to what land surveying is all about, the basis of its underlying philosophy and the educational background needed to support it.

There are three distinct areas where recent developments in surveying technology have created a need for radical change in outlook:

- (1) Electronic Magnetic Distance measurements techniques ranging from the short distance infrared devices to the very long base Interferometer (VLBI).
- (2) Satellite technology both for position fixing and thematic purposes.
- (3) Digital techniques for both the acquisition of data and its storage and subsequent processing.

The basic principle of registration of title is that the document, when properly worked out and maintained, will unambiguously define the parcel, reveal its owner (person, body corporate, persons in co-proprietorship or proprietorship in common) as well as the conditions and limitations (interests, rights, mortgages, lands, charges, easements and other encumbrances) vested for the time being in the person and attached to his ownership. In such a system, the land parcel affects "*the transference of primary attention for the mobile, mortal, mistakable persons temporarily possessing or claiming rights over patches of the earth's surface to the movable, durable, precisely definable units of land affected and the adoption of these as the basis of record instead.*"

The main objective of the registration of title is to spare persons, dealing with registered land, from the trouble and expense of going behind the Register, in order to investigate the history of their author's title and satisfy themselves of the validity. That end is accomplished by ensuring that anyone who purchased '*bona fide*' and for value, from a registered proprietor and then enters his deed of transfer or mortgage on the register, shall thereby acquire an indefensible right notwithstanding the infirmity of the author's title. Registration of title gives finality and does away with the repeated, imperfect and costly examination of past title. It removes the possibility of '*bona fide*' mistakes as to the past titles or the existing burdens affecting the land. It removes the ever-present possibility of fraud by duplication or suppression of deeds. It gives State guaranteed safety and that positive security against adverse claims which the system of conveyancing by deeds cannot give.

The existing legislation does not indicate whether an interest, for which an instrument has not been transcribed, does or does not exist. Interest in a property can actually be created which runs contrary to each other. Transcription does not affect the creation of such interests; it merely makes them "*maintainable*" against each other in Law and to ascertain whose interests prevail; the parties would have to "*go to law*". In the case of a registration of title, an interest is registered only if it is in order, and until it is registered, it does not exist. There can thus be no conflicting interests registered and, consequently, there is no occasion for parties to "*go to law*".

Presently, a document is registered in the absence of the interested parties. In the new registration of title, no instrument will be registered unless the owner is present and proves his Certificate of Title. Similarly, no instrument involving a change in the identity of a parcel, such as sub-division and sale of parts, will be registered, until the plan affecting the change has been deposited with the relevant Authority responsible for lands and new documents of title for the resulting new lots have been prepared, registered and interference with the former document of title.

No amendments to boundaries are to be accepted unless it is based on a proper survey supported by plans of acceptable standards and satisfaction to the Commissioner of Lands.

## **FOR A BETTER METHOD OF REGISTRATION OF TITLE OF LAND**

### **THE COMMISSION RECOMMENDS:**

1. Grouping together of all activities now concerned with land title matters into one Central Authority.
2. The introduction of the principles of title to land and the creation and maintenance of a Cadastral Map.
3. To avoid duplication of staff and work, the Central Authority should be housed in one building.
4. The Cadastral Map will be a map compiled at a sufficient large scale to show clearly each parcel in the territory. This also applies for Rodrigues Island.
5. Surveyors' field-notes will be retained. All plans, field-notes and computations should be properly filed and numbered.
6. The use of microfiches and microfilms should be introduced to archival existing land registration volumes and other archival documents such as concession plans.

## CHAPTER EIGHT

**LAND UTILISATION AND ITS CONSEQUENCES**

In the early French period, the land policy was geared towards agriculture, the policy of gentleman farmer, a series of estates dotted all over the island. Only a small percentage, however, was put to use.

The term "Crown Land" probably originated with the purchase of the island by the French Crown from the Compagnie des Indes in 1765 for a price of around 12,8 million *francs*. By that year, about 85,000 hectares of land had already been conceded, although they had to be reunited to the Crown with the Royal take-over.

However, if by 1770 the conceded (private) land stood at some 25,325 hectares (60,000 *arpents*) against 85,000 hectares in 1765, in 1790, there were already some 156,136 hectares (369,918 *arpents*) of private holding against 26,490 hectares (62,761 *arpents*) of mostly bare lands as Crown property.

The situation regarding land tenure became even more erratic by 1804, which showed that out of some 70% of concession land, representing 132,000 hectares (312,734 *arpents*) of the island, some 26% had already been cleared and were being put under agriculture.

After 1810, the British Colonial Government had to take stock of Crown and privately-held lands. Three successive surveys were undertaken in 1814, 1816 and 1830.

	1814	1816	1830
Conceded land (with title deeds)	340,812 <i>arpents</i>	311,812 <i>arpents</i>	315,903 <i>arpents</i>
Private lands where title deeds had to be reviewed		27,649 <i>arpents</i>	
Unconceded or unconcedable lands, including Crown Land	Port- Louis Area + Surrounding Mountains	87,254 <i>arpents</i>	116,765 <i>arpents</i>

Source: Summary Data from Land Surveys, 1814-1830.

The Colonial Government initiated a series of small land acquisition in the capital mainly for the road network and construction. Apart from the Government's own uses, Crown land had been disposed of through private and auction sales, leases and free "*concessions*" (Grants) of small extents. Furthermore, in order to tighten control, the Colonial Government started to implement some of the provisions of the two "*Arrêtés*" of General Decaen - (*Arrêté* No. 83 of 1805 which was designed to act principally as a check on unrestrained land clearances) and (*Arrêté* of 5<sup>th</sup> May 1807, wherein are defined, amongst others, the inalienability of the *Pas Géométriques* and the prices to be put on land "*concessions*"). So the British decided, as from 1815, that land had to be granted by public auction only.

Nevertheless, this decision was not strictly followed as private sales continued, whilst some "*concessions*" still remained free in consideration of the social status of, and services rendered by, the potential beneficiaries.

The take-over by the British Colonial Government was mostly characterized by the pattern of use of

establishment of a monocrop economy between 1815 and 1861 which brought about dramatic changes in the agricultural land on the island. This policy disrupted the ratio between cashcrop and foodcrop production which had existed under French Administration.

The first 50 years of British rule brought about an irreversible situation - with the setting up of more than 300 sugar factories - whereby large extents of native forests had to be cleared, which resulted in important socio-economic changes: the development of the harbour and opening of trade facilities, the start of indentured immigration, the increase labour requirements, the creation of the Chamber of Agriculture in 1853, followed by the establishment and spread of railway communications in the 1860s for sugar transport, the acquisition of more lands for the railway network which lasted till the beginning of the 20<sup>th</sup> century.

The expansion of Sugar Industry was, however, checked by the outbreak of malaria in 1868, followed by the upsurge of serious sugarcane's pest and other diseases. As from 1870s, there ensued a slump in sugar prices as a result of the strong competition from sugar cane development in Cuba and Java and the beet sugar in Europe. The Sugar Industry tried to react with a restructuration programme in order to improve its technical efficiency; this led to centralization, with the creation of sugar companies and factory modernisation. Many factories had to close down; some localities had to be abandoned, thus leading to mass exodus of the population toward the Central Plateau.

The Colonial Government had to exercise stricter control over the utilization of Crown and forest lands. Ordinance No.18 of 1874 was amended by Ordinance No.15 of 1875 to make better provisions for the protection and disposal of Crown Lands and *Pas Géométriques*; free grants and private sales of Crown lands were therefrom prohibited and all sales had to be by public auction. The same Ordinance decreed that Crown lands became imprescriptible.

The 1880s saw the emergence of the small planters community with the first "*Morcellement*" of private lands mostly sugar estates . This policy gathered momentum, increasing steadily till the 1920s, with the result that small planters owned some 33,770 hectares, that is, 45% of the land under sugar. The Wilberforce Report of 1911 brought in the creation of the Cooperative Credit Societies in 1913, with the object of providing crop loans to the small sugarcane planters at reasonable rates of interest.

#### **STATE LANDS TO INDIVIDUALS GROUPED IN SMALL HOLDINGS**

While lands continued to be granted on lease to large and small planters for cane cultivation, aloe fibre and for hunting grounds, it was not before the early 1960s that Crown land - later on State lands - were allocated to individuals grouped in small holding Cooperative Societies. This was a major departure in the Government policy which started, in fact, before the Independence era. The objectives were three-fold:

- To boost the production of sugar and vegetables;
- To create job opportunities in the agricultural sector for small entrepreneurs cultivating tea and other crops;
- To give access to land to a wider range of people engaged in agriculture, thereby democratising land tenure.

In line with this policy, plots of land were allocated, in different parts of the island, to Cooperative Societies for sub-letting to their members. The area allocated to members as sub-leases ranged between 1 to 3 *arpents*. At the start, these plots were allocated for cane cultivation. Later on, other plots of land were given on lease for vegetable cultivation as well. Around the year 1959/60, following the possibility of tapping underground water, State lands located in the coastal regions, hitherto left idle for lack of precipitation, were rendered cultivable, thanks to the tapping of underground water, especially in the North and East of the island by the Irrigation Authority.

#### **TEA SMALL HOLDING SCHEME**

The Small Holding Project, a most significant development, was implemented in the context of the tea-growing small holdings scheme to diversify agricultural activity away from sugar. The project, in fact, started in 1959, when large areas of forest land were cleared and planted with tea in the Midlands valley. On reaching maturity stage, the tea gardens were then parceled out into plots ranging between 1 to 3 *arpents* and allocated to individual members of the society. The first Tea Marketing Cooperative was registered with 150 lease-holders at Midlands.

Other areas in the Midlands valley were devoted to tea cultivation, namely at Rivière-du-Bois, La Pipe, Canelière and Vuillemin, totaling around 2,700 *arpents*. Former labourers, engaged in the cultivation of tea plots, working in the Tea Division of the Ministry of Agriculture, were allocated on a priority basis to such tea plots and operated under the ambit of the Tea Credit and Marketing Co-operative Societies.

The project which, by the year 1980, comprised around 5,500 *arpents* of land being exploited by 3,100 beneficiaries, proved to be successful. Unfortunately, the fall in the price of tea on the world market (operating through London) rendered tea cultivation uneconomical and plots of land under tea were reconverted into plantations sugar cane and other crops, with or without the same beneficiaries of the original plots.

#### **ALLOCATION OF STATE LANDS FOR OTHER TYPES OF AGRICULTURAL ACTIVITY**

Other plots of land were allocated on the same basis to planters grouped in Agricultural Marketing Co-operative Credit Societies at Belle Mare, Palmar, Bel-Ombre, Plaisance North, and La Ferme St. Martin for onion, potato and other vegetable crops. Such projects have proved beneficial in that the bulk of the onion crop is produced on such lands, while production of vegetables remained important to meet the country's requirements. In 1984, 25 *arpents* of land were, for the first time allocated to pig-breeders grouped in the Plaisance Pig Credit and Marketing Co-operative Society. Each sub-lease, being '*bona fide*', pig-breeders who resided in the outskirts of the township of Beau-Bassin/Rose-Hill received notice to stop pig-breeding in the sub-urban areas. This project, consisting of 25 pig-breeders, is responsible for around 40% of national production of porkers, a remarkable feat in itself.

Between 1881 and 1904, the Colonial Government was involved in a vast acquisition programme and purchased some 27,534 *arpents* of land, mainly in the watershed regions of Plaines Wilhems, Moka and Savanne. Following the recommendations of Gleadow in 1904, further acquisitions were made in other districts up to 1930, thus bringing some 12,597 *arpents* more under Government control. Gleadow reported that these acquisitions ended up at times in the Court, owing to either non-compliance of the former owner or dispute over valuation and compensation.

Other areas were acquired under the La Nicolière and La Ferme Schemes (1944), the Pilot Land Settlement Schemes (in the early 50s), Richelieu (1934), Mare Anguilles (at Choisy, in 1963 for tea) and at Mon Bois (1967, for tea and fodder plantations). Moreover, lands were reacquired for non-agricultural purposes, mainly for the extension of educational infrastructures, the development of internal and external communications for the improvement of the road network and the establishment of Plaisance Airport, the Cyclone Rehousing Programme, after the passage of cyclone Carol for low-income groups.

Following the Independence of Mauritius, all land acquisitions were determined by existing economic constraints and social development: education, housing, rehabilitation, after cyclone Gervaise.

The new Government focused its attention on: rehousing schemes, the extension of Primary and State Secondary Schools in 1968, communications improvement with the creation of the First Highway Project, the Northern Entrance Road, Relief Roads to the North, the Phoenix-La Vigie-Mahébourg Road, better control on the main agricultural sectors, mainly sugar cane and tea, through the acquisition of the Rose-Belle Sugar Estate and the Nouvelle France Tea Estate in 1973, and the acquisition of land for the Plaine-des-Roches Airport Project (which has been shelved), while reclaiming, at the same time, land from the sea in the Mer Rouge area for harbour development.

It is worth-mentioning the remarks made by the Chairman of the Fact-Finding Committee, Jairaj Ramkissoon, on Crown Lands and *Pas Géométriques*, in his findings in June 1985:

*"Although this book (The Domaine Book) has served as a comprehensive catalogue of Crown Lands for the past half-century, it has some limitations". He adds: "No system has been developed so far to rationally complement and convey the dynamics of all land transactions of Government. The approach since 1934, which might have been worthwhile in the shortterm was simply to make hand-written entries and adjustments (for example, following an exchange and sale of land) on a few copies of the Domaine Book."*

The FFC highlights "*shortcomings*" of the Information System which suffers from some deficiencies:

- Manual, sometimes incomplete and inconsistent;
- An absence of a regular, periodical up-dating and evaluation;
- A lack of data on lands considered as "domaine public";
- No link with a Master Plan;
- A high reliance on the personal knowledge, experience and memory of Surveyors;
- Hence an archaic, and in practical terms, extremely time-consuming system to retrieve, process and analyse.

## CHAPTER NINE

# FINDINGS AND RECOMMENDATIONS

### LAND DISPOSSESSION

The setting up of the Truth and Justice Commission has created high expectations within the Mauritian population at large. Different people had different interpretations of the true mandate of the Commission, particularly as far as land is concerned. Most of those who presented themselves before the Commission were of the opinion that the TJC would do the utmost to retrieve the land that their ancestors might have possessed at different periods of our history. While others thought that they would be compensated for the land they probably owned and which they have lost. This perception has, moreover, been emphasized from certain quarters who have led people to believe that the Commission has been created, first and foremost, to take back large portions of lands, especially from sugar estates, and to undertake an equitable redistribution among the less privileged and those lower on the economic and social ladder.

Very few people were aware of the fact that the mandate of the Commission was to inquire into how people had been dispossessed of their properties and by what means.

Following findings of the Commission, which has probed deeply into the history of slaves and indentured descendants, it has been found that people have lost their land due to their inability to establish their claim or prevent people from acquiring their land through prescription and illegal means.

During the whole French occupation, the slaves had no right to hold land. Those who were emancipated and who managed, through enormous sacrifice to obtain plots of land, lost these due to legislation in force which prevented them from enjoying their rights.

The hearing sessions, meetings, interviews and research of the cases submitted from 2010 to 2011 have helped the Commission to better understand the system and to draw the relevant conclusions, thus paving the way for recommendations.

The Oral History Project research (See *ORAL HISTORY OF DESCENDANTS OF SLAVES Part 1, Volume 3*), commissioned by the Truth and Justice Commission to document and preserve the memories and views of people who consider themselves as slave descendants, surveyed the collective memory of the people who have a particular knowledge of the history, culture, lifestyle, heritage and traditions of slaves, ex-slaves and their descendants. The survey, which covered the islands of Mauritius and Rodrigues, Agaléga, Chagos aimed, amongst others, at uncovering the **“Causes of landownership and causes for loss of land”** by the descendants of ex-slaves.

People from different parts of Mauritius were interviewed and a sample of answers is given here. When interviewed, the respondents from lower Plaines Wilhems answered convincingly:

- *“Many families have lost their lands”- (R5);*
- *“Lost land my grandma Bhugaloo, a Creole. Her father came from India, had land from la Louise to Bassin. It was lost” - (R8);*
- *“My wife’s parents had land but they lost it. They did not care about land or had too many debts. Out of debts I could have lost my land. My children have built on that land - (R12);*
- *“We have lost land from dad’s in Pointe-aux-Piments” - (R13);*
- *“There was Teco family who lost hundreds of Arpents of land that Medine has*

taken from them”- (R14);

- “I know someone who has mortgaged his land for friends and it was sold to the bar and it was lost. If you have a land, you should not sell it. It’s not good to rent houses all your life. It’s important to have you own house”. (R10);
- “In Belvédère where I was born, my ancestors had allowed Hindus who had come from India to settle on a piece of their land. After that, these people stole their land- (R11);
- “My mum and dad had land, but my cousins stole those lands. We also lost lands in Curepipe. Before his death my grandfather gave a land contract to one of my aunts and told her to give it to me. One of my cousins stole the contract and now her sons are building houses on that land. Once my mother was called because there would be sharing of Simpson lands, she did not go”.- (R19);
- “We have lost a lot of land. Creoles have lost a lot of land. My grandmother had land in Ste Croix but lost it during the racial riots in 1968”.- (R20 );
- “My grandma father came from India, had land from la Louise to Bassin. It was lost”.- (R23).

The families of 10 out of 25 respondents have lost their lands.

Those from East and South-East (Flacq and Grand-Port Districts) related the same:

- “She claims that her great grandfather was given land (around 10 acres) by the owner of Sans Souci Sugar Estate as he was the guardian of the weighing Bridge. But she doesn’t have any document as no one in her family ever had any document. In the past, people even used to take permission from her grandfather to grow ‘filao’ on the land. Her brother still lives on the plot where the bridge was found. However, some years back, the land was being sold by a “courtier” upon the request of FUEL Sugar Estate. Even the small plot of around “140 toises” where she lives with her sisters and brothers has been sold to someone living in Rivière du Rempart. She is facing a legal battle. She claims that all her generations have lived on this land. She blames FUEL Sugar Estate to sell a land that didn’t belong to them. My mother has also lost her land in St Julien d’Hotman. I also know the Lamarque family who now lives in Port-Louis, who have lost 75 arpents of land, which is currently being occupied by the sugar estate”. - (R1);
- “Respondent says that her grandparents had land in the eastern part of the island. But he never managed to get precise information about its location to claim it”. - (R2);
- He explains that his mother had land around St Julien d’Hotman but the land was lost with time. Respondent also explains how in the past, people use to stay on land without having any document to prove their ownership. Some did manage to get their “bordereau” to claim their land. In other cases, the sugar estate owners simply cleared bare or unoccupied lands and planted sugarcane on it. Sur to lack of financial resources, the owners never managed to claim back their lands. - (R3);
- “I know the Tai family of Flacq who had vast portion or around 100 arpents of land in Bel Etang. The elders didn’t inform the upcoming generation about this land and it became unoccupied. The sugar estate had land on each side of the Tai property. First, they built a road across the unoccupied land. Little by little they cleared further land until they became the owner as no one is claiming the land. The Aza family also faced the same. When they claimed their land, the sugar estate in return claimed for much compensation for the money they invested in the land”. - (R3)

- *“My father-in-law has lost a land in Olivia. He had bought the land. He even has the title deed, but the sugar estate didn’t allow him to claim the land. I have handed the contract to the notary. My lawyer told me to give up even though I paid him Rs. 3000”. (R5);*
- *“I have a land which stretches from Trou D’eau Douce till Palmar, but “tablisma” had planted sugarcane on it. I even had my all my documents”.- (R6);*
- *“My family, the Charlot had lots of land, but the sugar estate has grown sugarcane on it. They were too careless. The Whites took away the land”. - (R7);*
- *“My mother has lost her land in Komason. My father- in- law lost his land in Carreau Banane. They were too focussed in enjoyment. For Rs. 45 and a “farata, curry banana ek curry coq”, they lost two ‘arpents’ of land”. - (R 10);*
- *“In Camp Marcelin, there was much land that belonged to Creoles. But the sugar estates have taken the land from them”. (R11).*

Nine respondents claim to have lost land.

In most cases, the sugar estate owners have cultivated sugarcane on these lands. Due to lack of education and financial resources, they have not managed to get back their land. According to them, the whites were financially too strong to fight against and justice is too expensive to afford and with growing age the respondents have even grown weaker.

The surface of the land that was lost is very important ones.

Research also revealed that the slave descendants were given land without any document to prove ownership. With time, they simply had no document to prove that they own the land which was being sold.

Some respondents are of opinion that the lack of education of their grandparents is also attributed for the lost of land.

The issue of land dispossession was also raised in the interviews West and South-West (Black River and Savanne Districts) with almost all the informants pointing out that the slave descendants lost their land.

Almost all the informants pointing out that their family have lost their land, either to the sugar estates or to members of other ethnic group or more rarely to their own kins. They were dispossessed of their land because they were illiterate or negligent. The surface of the land that was lost is very important ones. Had the respondents still owned them today, this would certainly have been an excellent way to better their future and overcome their poverty.

Some claim to have title deeds.

But, *“Creoles have lost their family tree. They have lost their names and have been given other ridiculous names. They have no Chamber of commerce, no economic centre”. - (R5)*

How do they react towards such loss of identity and properties?

- *“There are still many families from slave ancestry who don’t even have a house today. Indians came for sugar cane field work and they had priority to have lands. Creoles were left behind. They struggled but had nothing and still have nothing. Creoles are those who don’t have houses. The land they lived on was not theirs. They lost it. Many families have lost their lands. We must do research. I have moved 14 times in my life because of cyclones. Today I have a small cité house. Mother bought it*

*after cyclone Gervaise. I have lived in that house for 33 years, but we don't possess it fully because we are still paying for the land. There were 80 houses; these were the first houses to be built after Gervaise (Lakaz letaz - Storeyed House). It was a "sample". People have become owners of their houses 50 years after Carol. Housing is a serious problem. Some children cannot buy land, it is too expensive. And there are too many people on the list". - (R6);*

- *"Slavery had an impact on us. This is the history of my ancestors, they were living in their country, they worked, risked their lives, fought, lost their loved ones. To be healed from that, it needs time. They liberated themselves, created their language, and invented their music to fight the harshness of life. Sega is the intelligence and sweat of our ancestors to regroup and express the hardships of life. Their descendants still suffer from these wounds. They had no one to advise them as indentured labourers had. The French colonists educated the children they had with slaves but there were barriers between those categories of descendants. They are not liberated at 100% today. There are not enough advisors today. I have three children. I want to advise them for a job. Who will I turn to know about that? How to help orientate them professionally? Creoles that have succeeded do not help others. Other communities do that". - (R9);*
- *"Poverty is a consequence of slavery".- (R12 and R13);*
- *"As slave descendants, we have inherited nothing, no land, no economic power. 80% of land belongs to white people. Indians are organized since 1913; they had experience in economic development. Creoles did not have that experience. They were destitute". - (R16);*
- *"Consequences are hard - My biggest suffering is in the lack of self esteem. Because my father was mazambik, my mother's family rejected him. Creoles still have disdain for themselves. He cannot accept himself. It's a bad start in life. It has been hard for slave descendants, because the slave system is an economic system. The Catholic religion is the official religion of this system. 15 articles on Code Noir talk about the Catholic Church as a partner of this system. It is still damaging the descendants, by stigmatization. You remain tikreol for life whatever successes you have". - (R14)*
- *"Slavery is not the same as indentured labour - slaves did not have a salary - he has been snatched from his country and brought here". - (R16)*
- *"Long ago, we accepted totally and passively our marginalized situation. People had categorized us. There was reproduction of class and work, especially for boys who had to do their fathers' job. We were limited. Now there is emancipation.- (R8)*

Dispossession has indeed occurred throughout different periods and through different means and highlighted either under the headings of "**DISPOSSESSIONS**" at Chapter 5 or more profoundly under "**PRESCRIPTIONS**" at Chapter 6.

The sample of cases under review under the heading of "**Land - A Source of Conflicts**" and a few cases which have been more closely studied, namely the **Clémentine** (File No TJC/L/0142), **Faoulez/ Macca** (File No TJC/L180) and **Capiron** (File No TJC/L/O31), the **Spéville/ Choolun** case, as well as the **Guibies/ Pailles** case and the **Gertrude/ Dasani** case (*Gertrude Marie Fleurance, born Bontende - File No. TJC/L/312 - ; Dasani Lutchmeen, born Gowreeah - File No. TJC/L/0137*) in Mauritius and the **Bégué** case, in Rodrigues have been combined to show how people can be so easily victimized, even if laws exist to protect one and all.

In fact, people can easily be dispossessed of their properties, more so by a system which opens the

door to all sorts of malpractices on the part of certain professionals called upon to protect the interests of one and all. It is even easier to prescribe a plot of land whereby a Notary has simply to fetch two witnesses for a mean Rs 100 to swear an affidavit of prescription. But, it is extremely difficult for someone, without sufficient financial means who wants to safeguard his rights. The hurdles are set so high. All those who have been dispossessed of their land should, in the actual system, have recourse to a land surveying, establish his family tree, secure the services of a Notary and an Attorney to prepare and plead his case in Court. The larger the extent of land, more costly becomes the bill for surveying; the longer the case remains on the Register of the Court roll, the more they have to pay. The case of **Louis Chérubin (Karl) Lamarque** - (File TJC/L/0048) is an example.

All those who came to the Commission were people who did not have sufficient financial means to put up a fight, whereas those who already had a case in Court have been, during years, making enough sacrifice to find the necessary support to continue the legal battle. The Court cases are also analysed in Chapter 4.

Research is time consuming and strenuous.

This has given rise to a particular trade: that of "*Récupérateur de terres*", who, in fact, are mere swindlers. Many deponents made reference to more than one of these "*Récupérateur de terres*" who have not only received huge sums of money to undertake searches, but have simply taken possession of all documents, after retrieving them from the Archives, found the land and sold it to third parties. Moreover, these people have easy access to official documents, tamper these documents and use them to fraudulently deprive the real owners of their properties. The **Jean Albert Jerome** - (File TJC/ L/0070) as well as the **Spéville/ Choolun** issue is a showcase amongst all analysed by the Commission.

Research work is even more strenuous concerning claims related to the sugar estates/companies.

Several families continue the fight against the sugar estates/ companies in or out of the Court or against the system of prescription: The **Tancrel** (File TJC/L/ 0003), **Kisnorbo** (File TJC/L/ 0004), **Lebrasse** (File TJC/0009), **Ramphul** (File TJC 0047), **Harmon** (File TJC/L/0015), **Webb** (File TJC 0046), **Ram Nauris** (File TJC/L/0027), **Toulet** (File TJC/L/0153), **Preaudet** (File TJC/L/0161), **Laridain** (File TJC/L/0158), **Babylone** (File TJC/L/1231), **Roméo** (File TJC/L/0227), **Bégué** (Rodrigues case), **Seetul** (File TJC /L/0110), **Beeharry** (File TJC 0115), **Ujodha** (File TJC/L/0125), **Chedumbrum** (File TJC 0138), **Aunacha** (File TJC 0144), **Moolchand** (File TJC/L/0156), **Dhunnoo** (File TJC/L/0173), **Crouche** (File TJC 0180), **Magon** (File TJC/L/ 0194 - 0314), **Jaddoo** (File TJC/L/0197), **Bago** (File TJC/L0102), **Ramkhalawon** (File TJC/L0202), **Goodur** (File TJC /L/0210), **Naraisse** (File TJC/L/0201) or **Ragoo** (File TJC/L/0212), among others.

Some of them have, during years, been confronted with the problem of non- access to their ancestors properties due to the fact that these plots of land are found in the areas occupied by sugar estates/ companies. In order to reach out these plots of land, the deponents had to undergo searches, support their claims by a Land surveyor's Report/ Constat Report on the very plots of land which are not accessible. If the Commission has been able to help some applicants, **Tancrel Danielle & Others - FUEL** ( File TJC/L/0003); **Devanny Oomadutsing - Bel Ombre** (File TJC/L/M/208); **Patrick Webb/Chang Kye - Espitalier- Noel Group** (File TJC/L/0046); **Bonnefin/Clency Harmon & Others - Medine** (TJC/L/0015); **Mayeur/ Cazalens/Kisnorbo - Deep River Beau Champs** (File TJC/L/0004); to open the long awaited dialogue with the sugar companies; others had to have recourse to the Court (**Louis Chérubin (Karl) Lamarque - LE Petit Morne Limited** (File TJC/L/0048) - as have done the other 24 claimants who came before the Commission - to be able to make themselves heard and try to set their foot on their claimed property. Fortunately, in the cases mentioned, most of the claimants had already undertaken some searches and had a good set of documents which helped enormously the Commission.

When called to give their version, in most cases, the CEOs laid down heaps of documents which forced the Commission to spend a lot of time to find out to situate exactly these claimed plots of land.

However, the Commission has been satisfied to have been able to construct a bridge that will help

maintain the discussions/ negotiations between all parties concerned.

Furthermore, the Commission has also observed some disturbing factors which should be highlighted:

- The demand for more land and the rapid development of real estate has opened the door to a new breed of "*Récupérateurs de terres*". These individuals open and run modern offices, invest huge sums of money to better attract their clients, establish deals of 49%/51% or vice-versa, to retrieve lands with the promise of a better future for those who are in search of their heritage.
- Furthermore, some Land surveyors, seconded by certain Attorneys and Notaries are rapidly prescribing plots of land which are quickly sold, overnight, to new companies set up with the help of foreigners/ investors looking for greener pastures in Mauritius.
- Moreover, persons who have prescribed plots of land and who know that they could be challenged in Court have secured the help of some militia in order to prevent real owners to have access to their properties, (**Christian Grenade** - File TJC/L/0044) and **Goodur Abdool Reshad** - File TJC/L/M/0210). In the case of Grenade, the Commission views with concern that even a request made to the Commissioner of Police to give police protection to the heirs to clean up their land at Le Bouchon has remained unattended.

## RECOMMENDATIONS

### THE COMMISSION FINDS

The Commission has observed that affidavits have been sworn by witnesses who do not know the deceased person and the persons who are entitled to apprehend the estate and succession of the deceased person. These persons are called "*professional witnesses*" and swear affidavits upon payment of a sum of money. These persons are found lurking near the officers of Attorneys and Notaries and offer their services whenever needed.

The Commission has also observed that some affidavits have been drawn up without verifying the Civil Status Acts. The dates of deaths are inaccurate and the numbers of the Civil Status Acts are fictitious. However, due to the new Rules and Regulations made by the Conservator of Mortgages, the affidavits drawn up, sworn and transcribed nowadays are accurate, well-drafted and contain precise information.

It is a matter of concern that there is no Registry or Record kept for Wills and Testaments. Law Practitioners, heirs and successors and members of the public cannot know the existence of any Will and Testament left by a deceased person.

This state of affairs gives rise to doubtful and inaccurate affidavits being drawn up. At times the legal heirs and successors are left out. At other times, the persons who have been bequeathed with properties are discarded in the affidavit.

In such cases the parties are engaged in long and costly legal battles which take several years before the Court pronounces on the subject.

The Commission has come across Wills and Testaments in which the Notary or the party making the Will has failed to mention the reserved portion of his properties, '*Quotité disponible*'. The testator has also failed to mention that he has other children. All the properties have been bequeathed to one person, instead of bequeathing the share which he can dispose of according to law.

Representation has also been made to the Commission concerning the sale/donation/transfer of all properties by the father/mother to one/two children only, thus depriving the other children of a share in their parents' property.

In such cases the heirs / successors who have not received any property or who have been discarded deprived of their rights, have to enter cases before the Supreme Court against their own brothers/sisters in order to get their shares either in cash or in kind.

It has been observed that some Notaries would not draw up such deeds. However, it is a matter of regret that others Notaries still draw up such deeds which eventually leads to animosities between among heirs.

The coming into force of the *Code Napoléon* (Amendment) Act No. 8 of 1980 on the 8th June 1980 has simplified the succession laws and has brought new hopes. Acknowledged natural children and legitimate children have the same shares and rights. It has also given to surviving spouse a share in the deceased property. The surviving spouse has also been attributed a right of *usufruct* on all the movables effects and the house which was used as the main residence of the family.

### THE COMMISSION RECOMMENDS

It is high time that the Authorities find ways and means of keeping a record of all Wills and Testaments. One such way could be to make an entry in the "*Répertoire*" kept by the Conservator of Mortgages of the existence of a Will and Testament. This is possible for the authentic Wills and Testaments which are drawn up by two Notaries in the presence of the two witnesses or by one Notary in the presence of four witnesses.

The registration concerning "*Testament olographe*" and '*Testament mystique*', as provided for in Articles 969 and following of the *Code Civil*, cannot be done and this will give rise to problems in future, unless an amendment is made to the existing laws.

The Notaries should ensure that the conditions laid down in Articles 913 and following of the *Code Civil* are observed fully.

The Commission hopes that such new laws should be implemented in order to protect, the spouses, the children, the family, the society and the country.

---

## THE SMALL PLANTERS

---

### THE COMMISSION FINDS

With the effect of centralisation, many small planters are having transport problems, as they need to send their canes far away to the factory area. They also pay high prices for transport.

"What in the case of a very small planter? Will he be able to afford high prices of transport compared to a small amount of cane transported on long distances?"

Long queuing problems at the sugar mills arose because of the closure of small mills. Mills took long hours to crush abundant amounts of canes from the entire region had discouraged many small planters from cultivating canes.

Nowadays, the new generation of small planters is not interested in suffering from the same hardships as their elders and, instead, make education a key to a better living through white collar jobs.

It must also be noted that due to a 36% decrease in sugar prices in 2010, the revenue of planters was also reduced; there was an increase in the price of fertilizers. Thus many small planters preferred to abandon lands.

Many small planters have no time to manage the irrigation of their fields.

### RECOMMENDATIONS

Small cane planters should get financial help to buy other means of transport to motivate them to cultivate sugarcane.

Plots of small planters, falling under block irrigation projects of Estate factories, should be legally swapped for land amounting to the same value in other areas, if the planters so wish.

Training programs on research technologies in the Sugar Industry should be introduced for small planters, in order to increase sugarcane production.

Agricultural Policies and Legislations should be revised to enable small planters to be regrouped under irrigation projects.

---

## FURTHER RELEASE OF LAND TO VULNERABLE GROUPS

---

### THE COMMISSION FINDS

The policy of allocation of State lands in lots to cooperative societies for on letting to '*bona fide*' cane growers, vegetable growers and breeders has proved successful. In the context of greater democratisation of land, small holding projects have proved to be tools towards that end. While Creoles, descendants of ex- slaves after the abolition of slavery have been cut-off from agricultural activity in Mauritius, a situation which has not occurred in Rodrigues there is presently a desire for land acquisition and a return to agriculture.

The consequences of the divorce of Creoles in agriculture have proved damaging in that it has destroyed in them the urge for land ownership and a sense of entrepreneurship in agricultural Society. However, there is now a hue and cry from people of this category to return to agriculture and other farm activity.

### THE COMMISSION RECOMMENDS

The Commission therefore recommends that well-knit projects on whatever land granted by the private sector to the Government be allocated to *bona fide* planters and breeders grouped on Small Holding Cooperatives.

---

## PRESCRIPTION IN RODRIGUES

---

### THE COMMISSION FINDS

All the applicants - Private and Government Land Surveyors, Attorneys and Notaries, Chief Planner - invited to give their views before the Truth and Justice Commission readily admitted that the Law has been respected in all circumstances. Yet, it must be observed that the information contained in the Notice for the Transcription of an Affidavit as per the Second Schedule of the Affidavit of Prescription Act are not precise enough to allow the real owner to know whether the subject-site under prescription is his property or forms part of his property, and would thus allow him to lodge the appropriate objection for transcription of the affidavit. For example, in certain Notices, the description given is so vague. In so many Notices, mention is often made "*On the first side by a public road*", "*on the second side by an unknown proprietor*", "*on the third side, proprietor is unknown*", etc. The law is clear as to the "*precise description*", "*the exact location*", "*the precise description of the land surveyed and the exact extent of the land mentioning the nature of the occupation and value of the land.*" *It is very difficult to believe the person who has been occupying a plot of land since 30 years does not know the name of his neighbours.*

There have been cases where Notices have been published in a Chinese daily.

It has also been observed that the very person who prescribes a plot of land does not have to sign the affidavit. Only the two witnesses sign it. He just gives instructions to swear the affidavit but does not participate in the procedure.

It may happen that a person accused of having prescribed a plot of land might later say that he was not aware that this land had been prescribed in his name.

### THE COMMISSION RECOMMENDS

It is thus suggested that the Second Schedule of the Affidavit of Prescription Act should be amended

---

to include information on the searches, made by the Surveyor, relating to the last known owner of the land being prescribed.

The legal status of land either in Mauritius or Rodrigues falls under three categories:

State Land

Domaine Public inclusive of Pas Géométriques; and

Private Land

All State Land is imprescriptible under the Law as per Section 35 of the State Land Act.

The *Domaine Public* is a category of land which belongs to the public at large by nature of its use: roads, beaches, sea, rivers, etc.

The Private land is lands under private ownership which at a certain point in time either during the French occupation or the British occupation has been conceded/ granted to someone. As such, all the plots of private land must have originated from one of these grants.

There is thus no such thing as ownerless land.

Any professional being a Land Surveyor, Attorney or Notary, should be able to trace back the owner of any land in Mauritius or Rodrigues.

It must be made mandatory for any Notice of Affidavit of Prescription to be transcribed to contain the name of the last known owner.

At the same time, any Notice under the Affidavit of Prescription Act should be published with its appropriate location plan that will help in the identification of the land by the true owner.

No Notice of Affidavit of Prescription should be transcribed, if one of the adjoining owners is unknown. Thus, no prejudice could be caused if every endeavour is made to find the owner, or at least, its occupier.

Furthermore, any potential applicant for any prescription should make a formal declaration to the nearest police station to this effect and submit all particulars of his two witnesses, including names, residential addresses and identity card numbers. And an investigation should be made as to the credibility of any witness who are to be established by the police.

---

## **OTHER LAND ISSUES IN RODRIGUES**

---

### **THE COMMISSION RECOMMENDS**

- Adoption of a Physical Development Plan and of a Land use Plan.
- Finalise the Land Information System
- Ensure that projects are in line with defined strategies for land use development.
- Provide accurate information on state land ownership status and development at any point in time.
- Align and revise rental of land in accordance with market rates.
- Improve legal framework for town & country planning and land use.
- Regularise all eligible occupiers of State lands.

- Respond to the land requirements of all Commissions for timely implementation of public projects.
- Planning clearances for residential and commercial/industrial projects on state land prior and after lease of land.
- A digitalised Cadastre of all State lands in the island of Rodrigues effectively established and updated.
- Review of State land leases effectively for optimising Government revenue.
- Grant of lease to applicants occupying state land.
- Effective vesting of State lands and acquisition of private land for public projects.
- Land Use Planning and management processes in place and promoting improved and sustainable land use
- Effective land administration services in place, accessible to all and protecting the land rights of all citizens.

---

## CREATION OF A LAND BANK

---

### THE COMMISSION FINDS

The control of the use of land is a major problem to Governments. In both developed and developing nations, local and central authorities have tried in a variety of ways to shape the physical layout and contour of their cities and other areas in the realization that how land is used has profound consequences for the well being of their citizens.

As it is, land management is intertwined in a patchwork of overlapping authorities with diverse sources of authority.

The Ministry of Housing and Land Development plays a key role in land development and land use. Any development on State Land requires the approval of the Planning Division which acts on behalf of Government as lessor. Their activity is not restricted to Government owned land since their advice is sought by local and parastatal bodies for development on private owned land as well as "aménagement des territoires".

Under the Town and Country Planning Act, any development requires a permit. The Local Authority must ensure, before issuing a development permit that the proposed development is conformed to an approved Outline Scheme. In complex cases, the local authority refers the file to the Town and Country Board which in turn refers it to the Planning Division for technical advice before giving its own recommendations. In addition to a proposed development, developers need also a building permit under the Building Act or a morcellement permit under the Roads Act. In municipal areas, the local authorities are responsible for the issuing of Building Permits on behalf of District Councils. On morcellement matters, the Ministry of Public Infrastructure advises the developers to obtain clearance from the Central Electricity Board and the Central Water Authority that power and water are available and then consults the Planning Division before issuing the relevant permit.

D. Griggs in "The Harsh Lands-A Study in Agricultural Development" writes:-

*"Any plan for agricultural development should be essentially an essay in economic ecology. Agriculture is influenced by interdependent variables of the economic and the ecological environment and no policy that ignores either agronomic or economic problems can possibly succeed".*

Available areas by itself will not be sufficient to solve the problems of raising agricultural productivity. The cost of setting new land, of reclaiming land from the onslaught of the sea or of

bringing derelict land into productive use is rarely justifiable, however socially desirable it may be. New plans for development should concentrate upon intensifying output criteria for agricultural areas. Due to shortage of funds and the non-availability of recoverable lands, it is wisest to concentrate capital over trained personnel in areas which are likely to give reasonable returns on investment.

It is in the light of these reflections that the creation of a Land Bank is envisaged as a panacea to land management.

The Land Bank is a Central Land Authority which coordinates within a single institution all the functions and powers presently vested in a number of different corporations' authorities, department and ministries relating to the organization and management, especially in the context of land reform and environmental development.

Land being a scarce commodity, every attempt should be made not to endanger the aspirations of future generations by plundering this meager resource.

When contemplated in a context of land scarcity with possible conflicting land use, the Land Bank, if properly formulated by a comprehensive land use policy will ultimately control all forms of land development and will ensure a judicious allocation of lands needed for the island's development.

#### **THE COMMISSION RECOMMENDS**

It is in the light of these reflections that the creation of a Land Bank is envisaged as a panacea to land management.

The Land Bank is a Central Land Authority which coordinates within a single institution all the functions and powers presently vested in a number of different corporations, authorities, department and ministries relating to the organization and management, especially in the context of land reform and environmental development.

Land being a scarce commodity, every attempt should be made not to endanger the aspirations of future generations by plundering this meager resource.

When contemplated in a context of land scarcity with possible conflicting land use, the Land Bank, if properly formulated by a comprehensive land use policy will ultimately control all forms of land development and will ensure a judicious allocation of lands needed for the island's development.

The functions of that agency can be *inter-alia* summarised thus:-

- (1) Buying and selling of agricultural land so as to foster its distribution among small holders and the landless;
- (2) Purchasing of land for development for immediate projects;
- (3) Expediting the purchase and transfer of land so as to avoid administrative delays and allow the steady release of developable land;
- (4) Managing of stock Government-owned land;
- (5) Reducing land speculation and curtailing the increase in land value; and
- (6) Organising and regulating of a real estate market.

---

## PRESCRIPTION IN MAURITIUS

---

### OBSERVATIONS

- No deed, whether authentic or under private signatures, witnessing the sale or transfer of, or the constitution of any privilege, mortgage or servitude or right of use over, an immovable property the title to which is derived from acquisition by prescription witnessed by affidavit of prescription, shall be valid unless the affidavit has been transcribed, and a reference to the particulars of such transcription is endorsed on the deed.
- The above refer only to the transcription of an affidavit of prescription, be it the requirements or the objection, the substantive law of prescription is to be found in the civil code.
- The delay for the objection does not at no time preclude any interested party to contest the validity of the prescription itself before the Supreme Court.

### THE COMMISSION RECOMMENDS

1. After having reviewed the numerous laws regarding prescriptions, the Commission recommends to do away with the whole procedure of affidavit and to provide for an alternative way to effect the transcription of prescribed plots of land.
2. It is the opinion of the Commission that the appropriate Protocol would be to exercise more control upon the averments of a person alleging to have prescribed a plot of land. There should be an institution which will ensure the truth of the said averments and which shall have the powers to investigate upon the veracity of these averments. Further, before the same institution, an appropriate memorandum of survey would be required with the possibility of putting questions to the Surveyor.

To summarise, any person who claims to have occupied a plot of land, with all the requisites of acquisitive prescription, shall have the burden of proving same, with at least two witnesses to corroborate the claim. Be it the applicant or the witnesses, they would face a panel who would query them on their averments.

Although this system would not be foolproof, it will minimize the risks of frauds.

Also, it must be borne in mind that the creation of a single institution may result in it being overburdened, which might hamper a quick and efficient process. This is the reason why it has been deemed appropriate to share this role amongst our Local Authorities, although the possibility of one central institution remains.

Below is a proposal for a new system where the affidavit of prescription has been replaced by a prescription permit. To cater for these, the Affidavit of Prescription Act can be amended or simply repealed and the following added to the Local Government Act.

To conclude, the legislator needs add the appropriate penalties for non compliance or frauds.

1. There shall be established in every Local Authority, a committee to be known as the Prescription Committee (hereinafter referred to as “the Committee”), which shall consist of the Chief Executive or his representative as Chairperson, the head of the planning department, the legal adviser of the Local Authority, a government Land Surveyor and a representative of the Ministry of Housing and Lands
2. The Chief Executive shall also designate an officer of the Local Authority to act as Secretary to the Committee.

3. The authority for execution of the Committee shall be the local authority of the respective town or district where the land to be prescribed is situated.
4. The Committee shall disseminate clear and transparent guidelines for the application, processing and issue of prescription permits.
5. The Committee shall examine, process and approve applications for prescription permits without having to refer the matter to the Council and such approval shall be deemed to have been made *under the authority of the Chief Executive*.
6. The Minister may make regulations to prescribe such other conditions as he deems necessary for the purposes of this Act. Any regulations made under Section (6) may provide that any person who contravenes them shall commit an offence, and shall, on conviction, be liable to a fine not exceeding [...] rupees and to imprisonment for a term not exceeding [...] years.
7. Where any member of the Committee or his spouse or next of kin has any direct or indirect interest in relation to any matter before the Committee, he shall –
  - a. disclose, at or before the meeting convened to discuss that matter, the nature of his interest;
  - b. not take part in any deliberation or any decision-making process in relation to that matter;
  - c. A disclosure of interest made under this Section shall be recorded in the minutes of the committee; and
  - d. Any person who fails to comply with the requirements of this Section shall commit an offence and shall on conviction be liable to a fine not exceeding 10,000 rupees and to a term of imprisonment not exceeding 2 years.
8. All applications for prescription permits shall be forwarded to the Chief Executive who shall refer same to the Committee within a period of fifteen days. The Committee shall hold a hearing within 3 weeks of the end of the period of 6 months as provided by Section 12.
9. The application for a prescription permit shall:
  - a) state the date on which the occupation started and the open market value of the property at the time of completion of the statutory period for prescription;
  - b) be accompanied by a memorandum of survey by a surveyor setting out the situation, description and exact boundaries of the immovable property forming the subject matter of the application and the adjoining properties; and
  - c) in respect of the party alleged to have acquired the immovable property by prescription
    - i. his names in small letters and his surname in capital letters;

- ii. his date of birth, the Birth Certificate number and the Civil Status Office where the birth was registered, his National Identity Card; and
  - iii. where applicable, his date of marriage, the matrimonial regime governing the marriage, the Marriage Certificate number and the Civil Status Office where the marriage was registered;
- 10. Notice of the application shall be published once in the Gazette and on 3 consecutive days in 3 daily newspapers in Mauritius, of which two at least shall be approved by the Chief Executive. Further, the notice shall be affixed on the notice board of the relevant Local Authority.
- 11. The notice shall be in the form specified in the Schedule.
- 12. Any person claiming to be the owner or part owner of, or to have an interest in, the whole or part of the immovable property in respect of which an application for a prescription permit has been made, may, within 6 months of the last publication of the notice required under Section 10 object to the granting of the application by the Committee by serving upon the Chief Executive and upon the applicant a notice setting out the grounds of his objection.
- 13. In the event of an objection under Section 12, the Committee shall not proceed with the application unless it is ordered to do so under Section 15.
- 14. Any interested party may, within 3 months of the date of service on the Chief Executive of a notice of objection under Section 12, apply to a judge in Chambers for an order setting aside the objection.
- 15. Where, after hearing the parties and later considering the grounds on which the objection is based, the Judge is of opinion that the objection is frivolous and unjustified, he shall make an order setting aside the objection and refer the application back to the Committee or he shall otherwise refer the parties to the competent Court.
- 16. At the hearing of the Committee –
  - a) The applicant shall be accompanied by –
    - i. at least two witnesses; and
    - ii. the land surveyor who has signed the memorandum of survey referred to in Section 9 (b).
  - b) The Committee shall examine the applicant and the witnesses present as to
    - The date and length of occupation;
    - i. The nature of the occupation; and
    - ii. The knowledge of the witnesses as regards the applicant’s contention.
  - c) The Committee may examine the Land Surveyor on his memorandum of survey.

- d) The Committee shall, if it deems necessary, summon any other witnesses more specifically, the owners of adjoining plots of land.
17. The Committee shall within 4 weeks of the hearing referred to in Section 16, grant or refuse to grant a prescription permit. In case of refusal, the Committee shall give notice in writing to the applicant setting out the reasons thereof.
18. Any applicant for a prescription permit under this Act may, within 30 days of the date on which the notice of refusal under Section 17 is given, apply to the Judge in Chambers for a summons calling upon the local authority to show cause why his application should not be granted.
19. An application to the Judge in Chambers under Section 18 shall be made in the presence of the local authority and the Judge may grant any application on such terms and conditions as he may deem fit or reject it.
20. The prescription permit shall henceforth be drawn up, on a prescription deed, by an Attorney or a Notary.
21. No person shall cause a prescription deed to be transcribed nor shall the Conservator of Mortgages transcribe a prescription deed unless –
  - a) he is the holder of a prescription deed issued under this Act authorising him to do so;
  - b) he has an order of the Judge granting the application and has subsequently drawn up the prescription deed; or
  - c) he has a certified copy of the judgment of a competent Court deciding the issue against the objector which has subsequently been drawn up in the prescription deed.
22. A prescription deed shall be transcribed on production by the applicant to the Conservator of the copies of documents mentioned in Section 21 and on payment of the transcription fees.
23. No deed, whether authentic or under private signatures, witnessing the sale or transfer of, or the constitution of any privilege, mortgage or servitude or right of use over, an immovable property the title to which is derived from acquisition by prescription witnessed by a prescription permit, shall be valid unless the prescription permit has been transcribed, and a reference to the particulars of such transcription is endorsed on the deed.
24. Any person who draws up a deed in contravention of Section 22 shall commit an offence and shall, on conviction, be liable to a fine not exceeding [...] rupees.
25. The transcription of a prescription permit shall not confer on any party any rights on any immovable property which but for this Act such party would not have possessed.

### THE COMMISSION FINDS

The Commission is of opinion that Notarial deeds witnessing the acquisition by prescription of landed property should bear the same conditions as laid down in the proposed Affidavit of Prescription Act, more fully described above..

As per the Prescription of Landed Property Act 41 of 1969 - November 1969 and amended by RL 4/253 - 24 April 1982, someone who is acquiring land by prescription needs not to swear an affidavit of prescription, but has to comply with the other conditions. The procedure remains the same.

The amendments in the Affidavit of Prescription Act, as proposed by the Truth and Justice Commission, would thus apply *de facto* to the Prescription of Landed Property Act.

### THE COMMISSION RECOMMENDS

The Commission recommends that the Prescription of the Landed Property Act be repealed which will thus prevent any confusion as to the procedure of prescription.

---

### CASES OF LAND DISPOSSESSION

---

#### THE COMMISSION FINDS:

From the numerous cases heard before the Commission and significant research carried out, the Commission has come to the conclusion that on a general basis, cases of dispossession often arise because claimants are illiterate, without sufficient financial resources and face the uphill task of collecting the required documents.

In order to tackle any case of dispossession, a claimant needs first of all to collect the relevant documents, be it title deeds or establishment of succession rights through affidavits and secondly to bring the matter before the competent Court in order to have a judicial decision that shall validate his claim.

As stated earlier, the whole process requires assistance, be it on a financial basis or competence to find and collect the appropriate and relevant documents.

#### THE COMMISSION RECOMMENDS

The creation of a **Land Research and Monitoring Unit** which shall cater for the technical side of the search and an appropriate Tribunal to give legal sanction to a valid claim.

The functions, powers and of this Unit are outlined below:

---

#### FUNCTIONS AND POWERS OF THE LAND RESEARCH AND MONITORING UNIT

---

##### **The functions of the Land Research and Monitoring Unit would be:**

1. To receive legitimate complaints from persons who allege that they, or their family, have lost or have been dispossessed of their property;

2. To carry out an in-depth investigation concerning an alleged complaint or hold an enquiry into land issues, out of its own initiative or at the instance of interested parties;
3. To advise the applicant, after thorough investigation and enquiry, on his claim and any other relevant issues;
4. To assist the applicant to retrieve all necessary documents, including title deeds, plans and Civil Status documents and in collaboration with other appropriate institutions, to draw up genealogical trees;
5. To study plans of *grants*, relevant Notarial Deeds and any other relevant documents related to land movement;
6. To provide, within statutory limits, assistance, financial or otherwise, to claimants as regards land surveys or other necessary actions;
7. To submit or refer the matter to Mediation and to promote amicable settlements which shall be binding upon all the parties; and
8. Where appropriate, to refer the case to a specialized Tribunal.

The Commission wishes to stress that, in its considered opinion, a two-fold approach is recommended, since neither the proposed Unit nor the suggested Tribunal would be effective on its own.

The Commission has purposely refrained from making specific suggestions as to where the Unit should be set up, or its composition, or as to whether the Tribunal should, for example, be a Division of the Supreme Court or an *ad hoc* Tribunal. That is because, on the one hand, the Government may wish to consider including the Unit in an existing framework such as those catered for in the LAVIMS (Project Implementation) Act or the Cadastral Survey Act 2011 and, on the other hand, the Government may prefer to consult the Chief Justice as to how he feels that the Judiciary could best lend its support to the scheme.

---

## RECOMMENDATION FOR A NOTARIAL ACTS DATABASE

---

The Commission recommends:

1. That the work initiated by the Notarial Acts Database (outline of which follows) be continued by the proposed Land Research and Monitoring Unit **as a matter of urgency**.
2. That the server to host the database be the Linux Operating system (Open source) which is reliable, highly performing and resilient. The server has been configured to allow only authenticated users to connect to and use the system.
3. Training: Users (research assistants) to be trained at each stage of prototype deployment. However those having been trained by the Commission can be used to train others and to continue this database. The Notarial Acts Database

## BACKGROUND

The design of a Notarial Acts Database was commissioned of a team composed of the members of the Computer Science and Engineering department of the University of Mauritius:

- Miss Begum Durgahee, Lecturer, Department of Computer Science & Engineering, University of Mauritius
- Mr. Paramasiven Appavoo, Lecturer, Department of Computer Science & Engineering, University of Mauritius
- Mrs. Anuja Meetoo-Appavoo, Lecturer, Department of Computer Science & Engineering, University of Mauritius
- Mr. Raj Kishen Moloo, Lecturer, Department of Computer Science & Engineering, University of Mauritius
- Mr. Anwar Chutoo, Lecturer, Department of Computer Science & Engineering, University of Mauritius

**The work undertaken included:**

- Analysis of proposed system
- Delivery of Prototype 1 of the Truth and Justice Database on 15<sup>th</sup> July 2009
- Hardware and infrastructure specification document to be completed by 30<sup>th</sup> July 2009
- Completion and Delivery of Prototype 2 of the Truth and Justice Database on 15<sup>th</sup> August 2009
- Overseeing infrastructure set up and Installation of software on server 30<sup>th</sup> August 2009
- Completion and Delivery of Prototype 3 of the Truth and Justice Database on 15<sup>th</sup> December 2009
- Delivery of final project on 31<sup>st</sup> March 2010
- Evaluation by Truth and Justice Commission and refinement of system till July 2010

**The details of the assignment was as follows:**

- To design a software and database to allow for the collection of notarial acts in Mauritius
- To make provision for the addition, update, deletion and view of different data  
(Notaries, Surveyors, Lawyers, Purchaser, Seller, Property, Transactions ...)
- To allow for key word search by different categories (notary, buyer name, seller name, surveyor name, location, immigrant number, district, locality and other relevant information)
- To allow for qualitative and quantitative analysis of information for land ownership
- To allow for tracing records relating to land claims
- Allow conversion between different currencies of the time (livres, piastres ...)
- To allow for a detailed study of the land ownership patterns per month, year and decade as well as within a particular district and in other districts throughout the island
- To allow the study of the land transactions by price range, year, district, locality ...
- To make provision in the database for upgrades and for the inclusion of new information that can be added from other primary sources
- To allow statistical analysis of notarial acts details and automatically generate charts and graphs in order to identify trends
- To allow for the localization of a plot of land on a map using GPS coordinates
- To allow for view of the different property of a particular person on a map
- To allow for provision for the addition of maps and plans and other documents

- To provide for export of data into Excel and Word

### **Non-Functional requirements**

The major system quality attributes to be achieved for the software are:

- Usability
- Security
- Performance
- Modifiability
- Portability

### **Architecture**

The system was deployed over an Intranet infrastructure and was accessible within the Truth and Justice commission. The software to be designed was a standards-compliant web-based application which would allow multiple authorised users (using popular browsers like Mozilla Firefox and Microsoft Internet Explorer) to access the system

- The front-end will thus be decoupled from the back-end (database and domain logic)
- The server will host the Apache Web server and will also use the MySQL database.
- This infrastructure is very flexible and extensible- for example, authorized users can easily be added to the system and requires minimal installation at the clients workstation.

The project also involved the following activities:

- Analysis of system
- Database and UML class design
- Set up of test environment
- Table design
- Form designs and implementation
- Report designs and implementation
- Hardware specification document
- Software installation and configuration on server (Linux Operating System, Database, Web Server, security configurations)
- Backup strategy design
- Graphic Design and overall wrapper
- Map Design and Implementation
- User Training (ongoing process)
- User guide preparation

A user guide for the system follows.

## LAND ISSUES DATABASE

The Land Database contains details about transaction dealing with Land Sales and Loans. The Land Database has been built around Open Source Technologies, namely Apache [2], MySQL [3] and PHP [4].

To deploy the application, MoWeS Portable II [1], has been used and provides for setup of WAMP on any Windows system. To launch the database, Open the contents on the pen-drive provided and double-click on "TJC-DoubleClickMe". This will launch the different services (Apache and MySQL) and the application will start as shown in Figure 1 below.

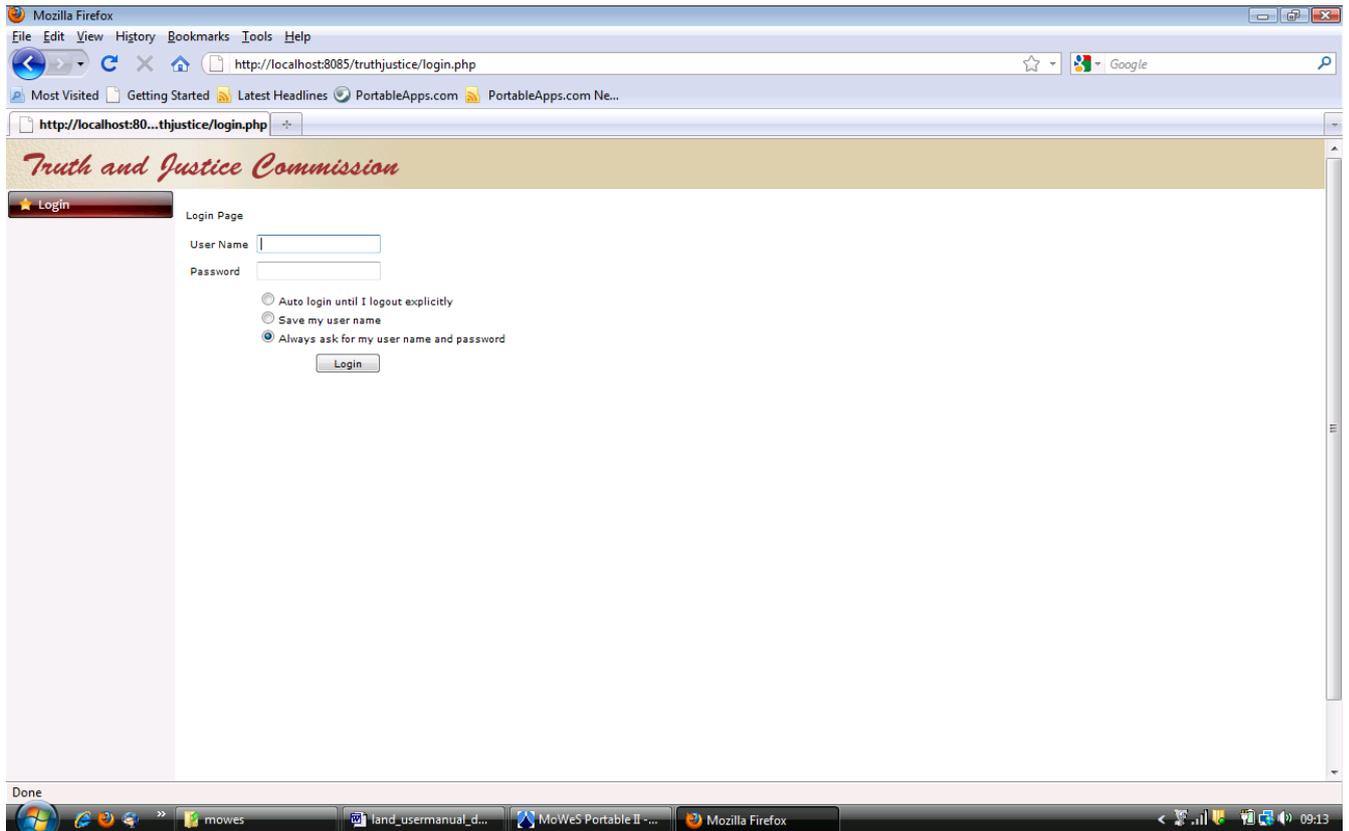

Figure 1: Land Issues Database Launched

The User Name "tjc" and Password "tjc" gives full access to the system as shown in Figure 2.

Figure 2: Land Issues Database Main Page

The menu on the left allows the users to navigate to different pages of the system. All the pages except for *Sale Reports* and *Loan Reports* are modeled in a consistent way: the user is presented with a list of existing entries and she can view, edit or delete the entry, while she can also add a new entry.

The main/master component of the system is the Transaction page. A transaction can be of different types: Loan, Sales, Auction Sales as shown in Figure 3 below:

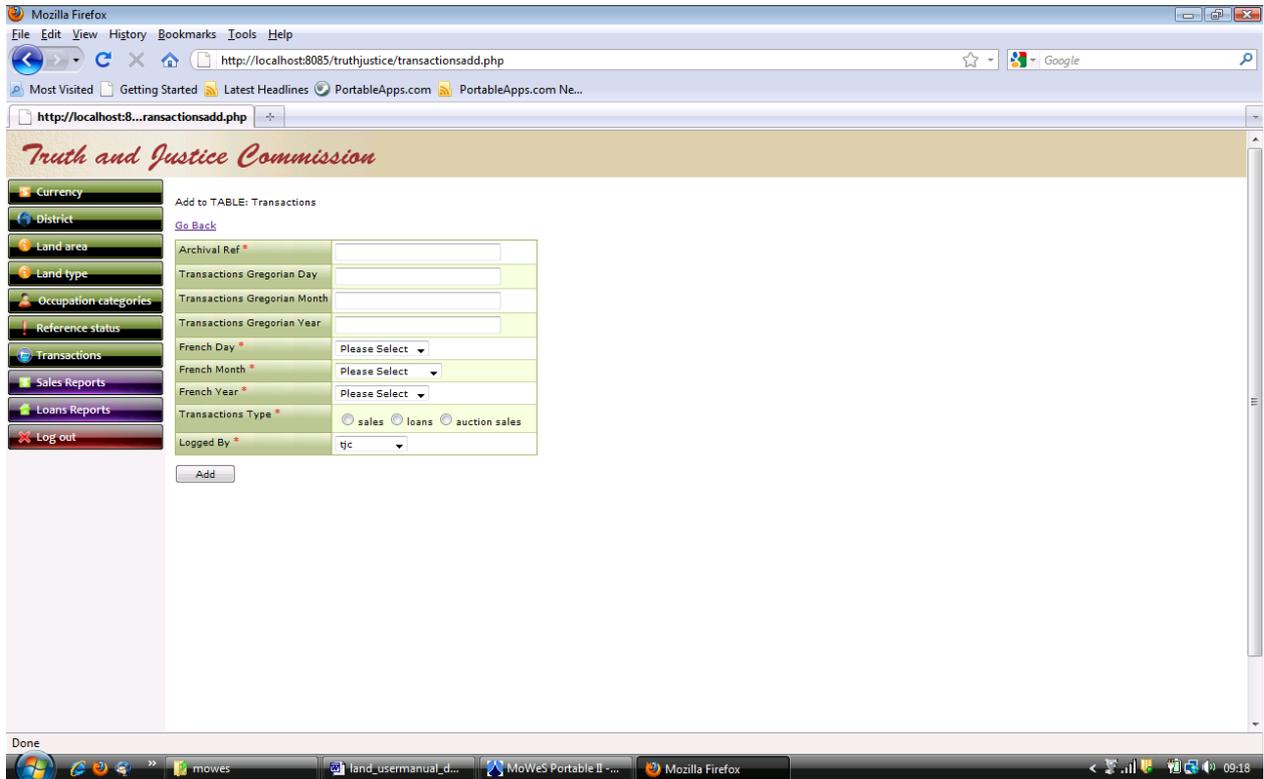

Figure 3: Adding a new transaction

Once a transaction has been added, depending on its type, the “Sales...” or “Loan...” links will appear on the list and the user can make entries for the loan or sale as shown in Figure 4. The user clicks on the “Add” link and can add as many entries as there are in the archival reference.

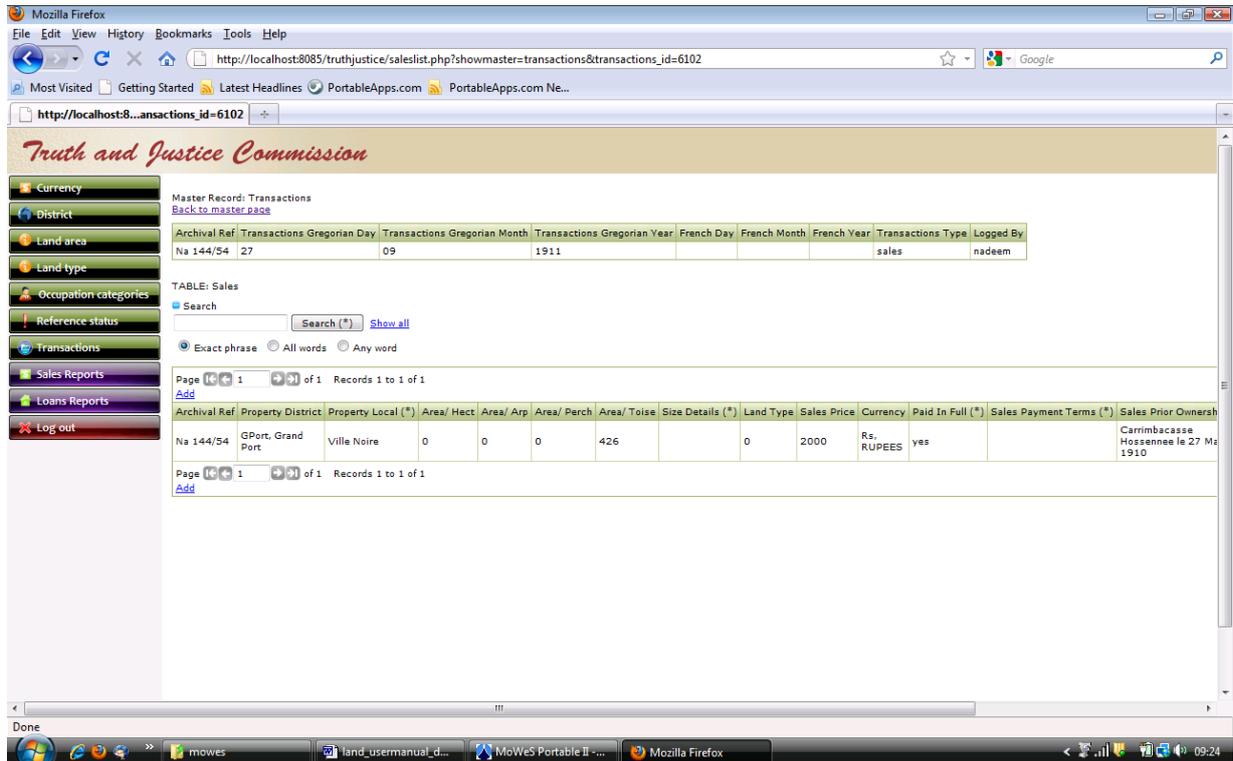

Figure 4: Adding Sales details for a transaction

The user can also make entries for all people involved in the transaction, by clicking on “*Transaction Person Details*” and is presented with a screen similar to Figure 5. The user can add persons involved in the transaction by choosing the “*Add*” link and making relevant entries.

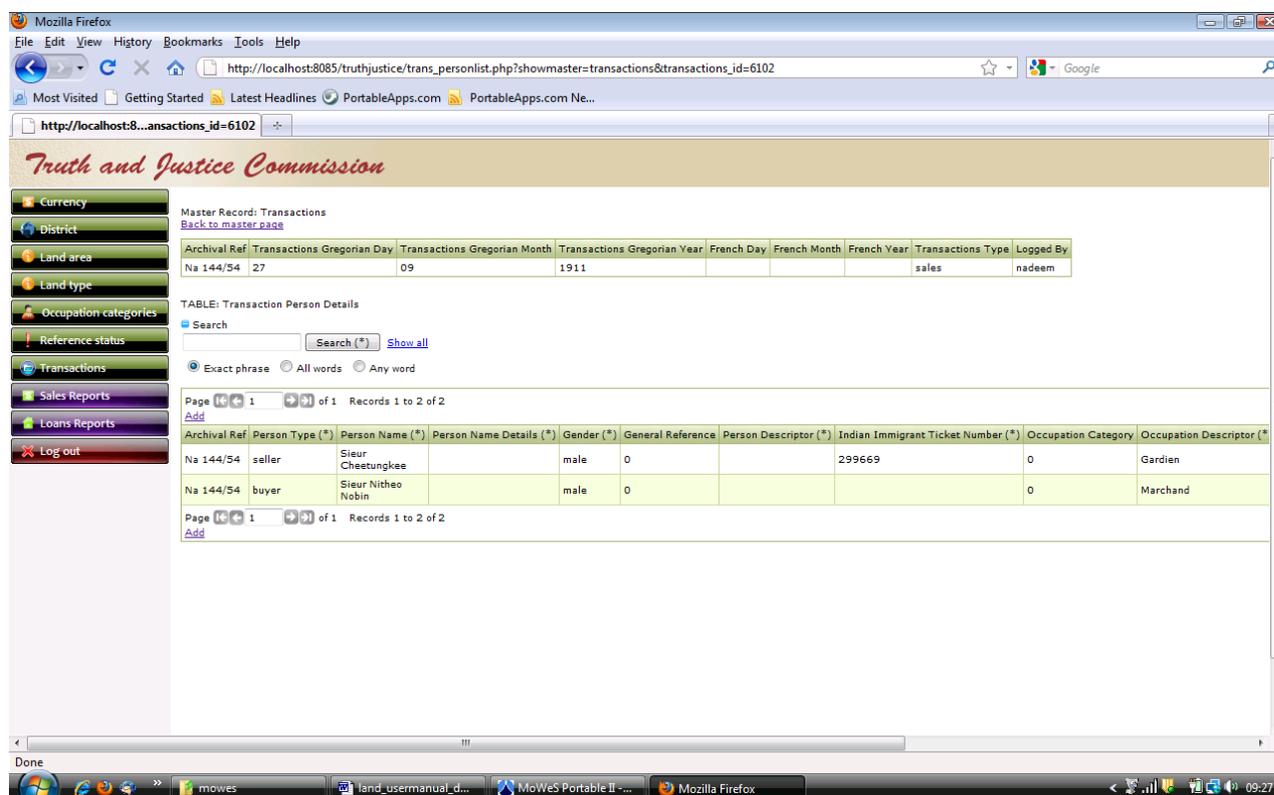

Figure 5: Screen to allow the user to add persons involved in the transaction

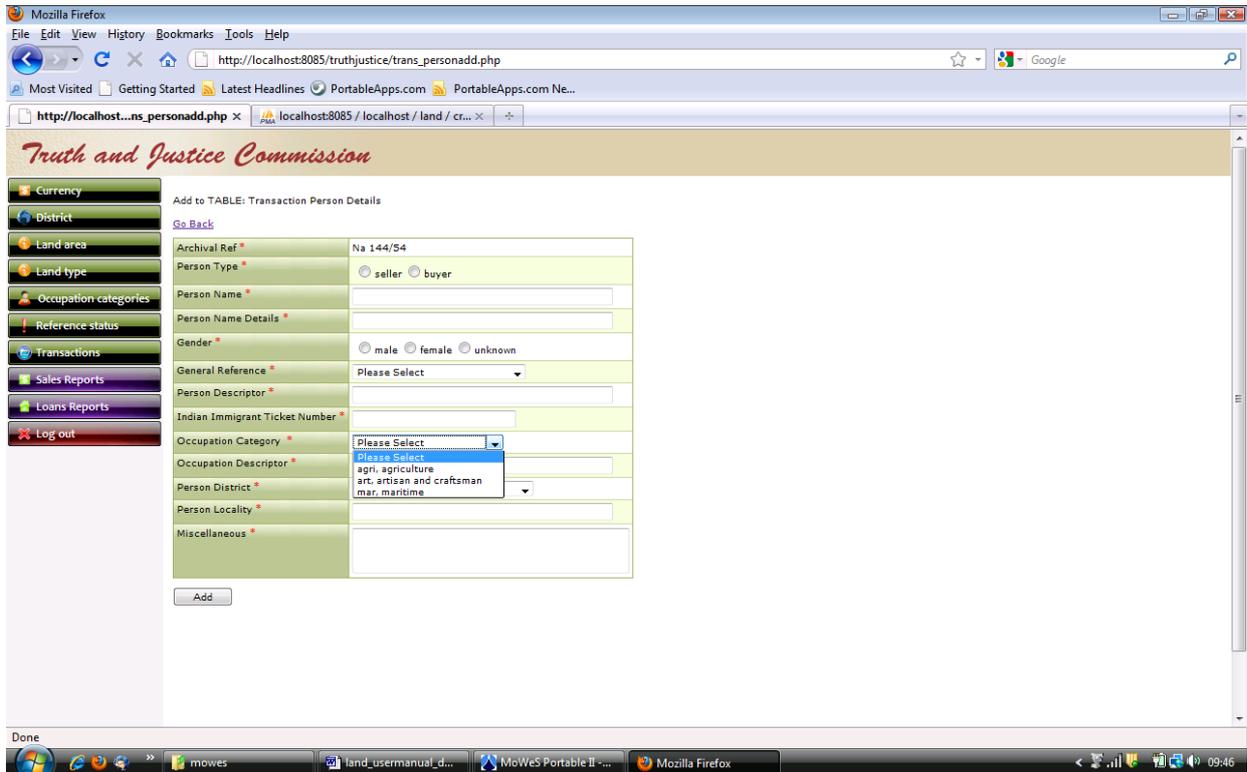

The “*Sales*”, “*Loans*” and “*Transaction Person Details*” options are kept separate from the main “*Transaction*” page, since there can exist more than one of each of them in an archival reference. The model adopted is that of the master-detail pages, where the master can have many related detail records.

The Other links on the menu, namely, “*Currency*”, “*District*”, “*Land Area*”, “*Land Type*”, “*Occupation Categories*”, “*Reference Status*”, are used to populate items used as drop down lists in the transactions, “*Sales*”, “*Loans*”, and “*Transaction Person Details*” pages. These ensure that similar records are entered consistently into the system such that relevant reports can be inferred. Also, they ensure that the system is dynamic and can be enhanced in the future.

The purpose of each of them are summarized as follows:

- **Currency:** Defines the different currencies as used in the archives
- **District:** Defines the districts that occur in the archive registries
- **Land Area:** Defines the abbreviations used to specify the areas of land (*arpent*, *toise*)
- **Land Type:** Defines the types of land involved in the archival registries (Terrain emplacement, Terrain Habitation)
- **Occupation Categories:** Defines the occupation of the people involved in the transactions (Agriculture, artisan)
- **Reference Status:** Defines the reference of the people involved in the transaction (femme de couleur libre, Ancien Immigrant)

The above will dynamically change the drop down lists presented to the user. For example, if a new "Occupation Category" is added, this will be available in the drop-down list for adding person details as shown in Figure 6.

**Figure 6:** Screen shot illustrating drop down list populated from Occupation Category form

The above mechanism allows the system to be extensible in the future, by allowing new parameters to be entered into the system. The different reports created for the system will be automatically modified accordingly.

Different reports have been created to represent the patterns in the land transactions. These can be accessed by clicking on the "Sales Reports" and the "Loans Reports" links in the menu., and clicking on the drop down list "Reports", where the different reports available in the database will be shown. This is illustrated in Figure 7 below.

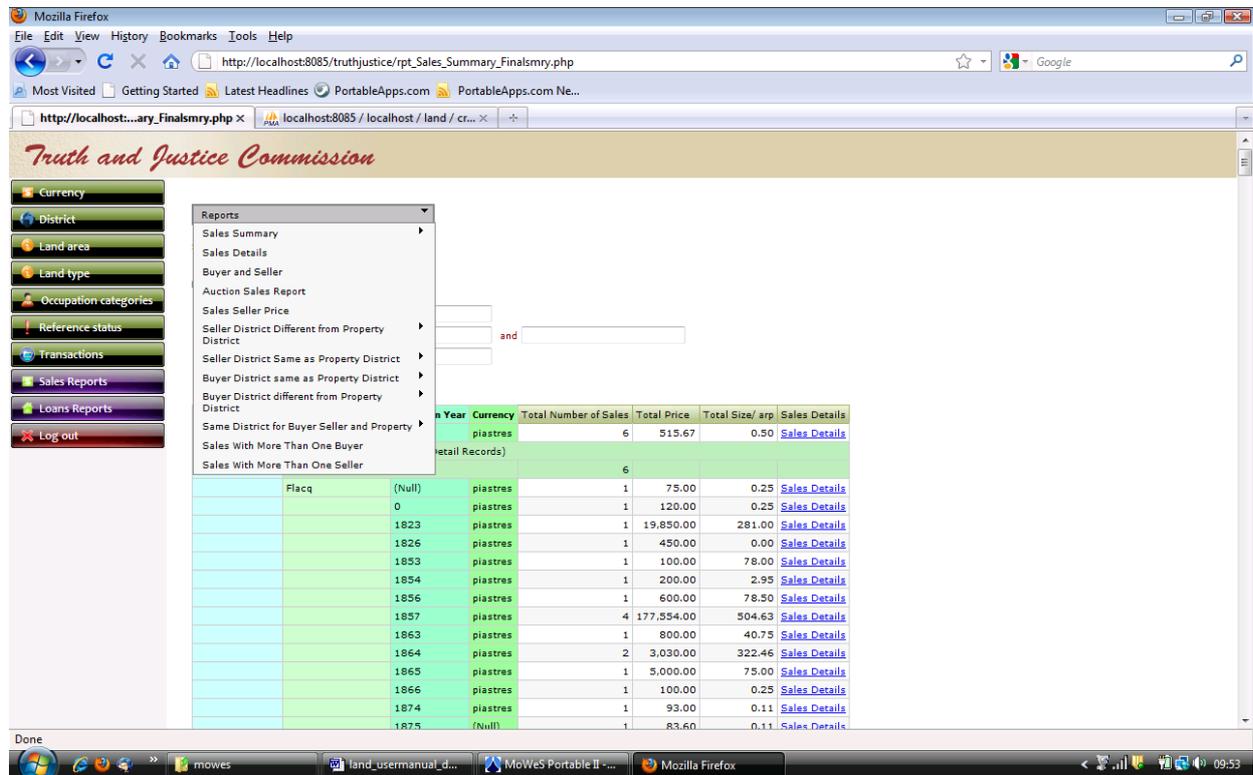

Figure 7: Accessing reports in database

The data accessed via the different reports can be exported to Excel, by clicking on the “*Export to Excel*” link. This allows the data to be easily extracted from the system. The reports also contain diagrammatic representations of the data (line charts and pie charts), as shown in Figure 8:

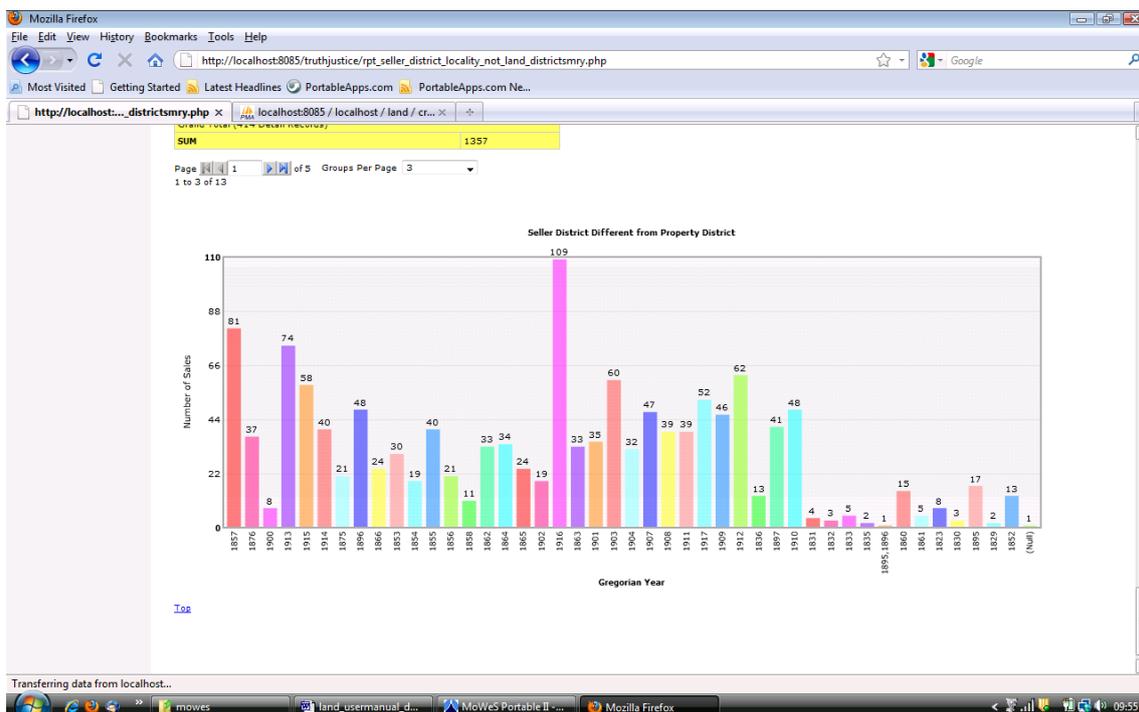

Figure 8: Showing sample Bar Chart

All the reports created in the system are dynamic. That is, they reflect the actual content of the database. If new data are added, the reports will change accordingly.

#### Technical notes:

- Since the data entry will be carried out by different Research Assistants, in order to sanitize the data entered, different scripts were written to extract inconsistent data in the form of Excel sheets, so Research Assistants can easily verify their entries. Examples of such reports were where the persons name contained “veuve”, “sales Size Other” field contains the “portion” keyword.
- The overall system can be modelled using the following class diagrams:

A transaction is composed of the following entities: Transaction Person, Loan, Sale. The transaction can consist of more than one of the above entities.

- Although the database has been distributed via MoWeS, the different services (Apache, MySQL, PHP) can be installed on a computer and the relevant files restored as appropriate. This can give better performance.
- The port on which the Apache within MoWeS is listening is port 8085. If this port is already in use in your system, modify the configuration for Apache to listen to a different port.

22. **MRS S. CHOOLUN** :- Oui.
23. **DR P. VEERAPEN** :- Bonjour, Mme Choolun. Sa fer moi enn gran plezir akeyir ou azordi. Li
24. pas ti fasil pou ou kapav vini. Nou bizin enn ti pe klarifikasion. Ena enn problem, nou bizin
25. kompran problem la ki finn arive. Ou pe kompran moi la, ou pe swiv seki mo pe dir ?
26. **MRS S. CHOOLUN** :- Oui. Mo finn amen mo neveu ensam ek moi, kouma dir moi monn vie,
27. mo pa kapav fer narien, get koze mem parfwa mo pa kapav koz bien. Be mo neveu mem pou
28. okup tou sa la. Tou seki ena la, mo donn li drwa. Ou kompran moi la, misie ?
29. **DR P. VEERAPEN** :- Oui, mo kompran ou. Me ou kone simpleman ou ou enn gran dimoun,
30. sa lepok la ou mem ki ti aste, Nou bizin serten renseyman avek ou avan apre nou pou appel ou
31. neveu, ok, pa bizin pren traka, nou pou appel ou neveu.
32. **MRS S. CHOOLUN** :- Oui.
33. **DR P. VEERAPEN** :- Pour le moman, parski ou enn gran dimoun, ou neveu pa ti la letan sa

34. bann transaksion la ti fer ou bien mem li ti la, nou ti a kontan dabor gagn serten klarifikasion avek
35. ou apre sa nou pou appel ou neveu. Pa pren traka, nou pou appel ou neveu, ok ?
36. **MRS S. CHOOLUN** :- Oui.
37. **DR P. VEERAPEN** :- Les mo demann ou enn de ti kestion. Ou rappel ki ou ti aste enn terin
38. avek Mons. Jwalaparsad Choolun ?
39. **MRS S. CHOOLUN** :- Oui.
40. **DR P. VEERAPEN** :- Ou rappel sa ?
41. **MRS S. CHOOLUN** :- Oui.
42. **DR P. VEERAPEN** :- Ou rappel bien sa ?
43. **MRS S. CHOOLUN** :- Oui.
44. **DR P. VEERAPEN** :- Ou ti kapav donn moi impe detay lor sa terin la dabor ?
45. **MRS S. CHOOLUN** :- Mo pa kapav, misie, parski impe lontan sa. La monn vie, lerla kouma
46. dir mo ti zen kouma enn zenfan, me la monn vie, mo pa kapav dir ou, akoz sa mem monn amen
47. mo neveu. Mo neveu ki pou explik ou, ki pou koz ek ou.
48. **DR P. VEERAPEN** :- Merci, Madame, me mo ti envi dir ou Mons. Jwalaparsad Choolun, ou
49. konn li sa misie la ?
50. **MRS S. CHOOLUN** :- Mo frer sa, mo gran frer.
51. **DR P. VEERAPEN** :- Ou gran frer sa, dakor. Ou gran fer, li kinn vann terin la avek ou ?
52. **MRS S. CHOOLUN** :- Oui.
53. **DR P. VEERAPEN** :- Ou kapav dir moi ou gran frer li, li ti dan sa terin la bokou avan ?
54. **MRS S. CHOOLUN** :- Avan ?
55. **DR P. VEERAPEN** :- Avan li ti vann sa ar ou, li ti vann sa ar ou le 23 mai 1977.
56. **MRS S. CHOOLUN** :- Oui.
57. **DR P. VEERAPEN** :- Li ti ena sa terin la depi lontan ?
58. **MRS S. CHOOLUN** :- Sa mo pa kapav dir ou.
59. **DR P. VEERAPEN** :- Seki mo pou dir ou seki efektivman apepre enn mois de sa setadir avan
60. ou aste li, en mai 1977, ti ena enn misie Harryparsad Choolun.
61. **MRS S. CHOOLUN** :- Mo ti frer.
62. **DR P. VEERAPEN** :- Ou ti frer et Mons. Jwalaparsad Choolun ou gran frer ?
63. **MRS S. CHOOLUN** :- Mo gran frer.
64. **DR P. VEERAPEN** :- Mons. Harryparsad Choolun li paret ti ena enn dokuman ki li ti fer enn
65. promesse de vente a ou gran frer. Se enn mois avan sa.
66. **MRS S. CHOOLUN** :- Sa mo pa kone.

67. **DR P. VEERAPEN**:- Kan nou dire enn promesse de vente, sa mem nou appel bordereau.
68. **MRS S. CHOOLUN**:- Oui.
69. **DR P. VEERAPEN**:- Li pann enn la vente sa, li enn bordereau.
70. **MRS S. CHOOLUN**:- Mo pa kapav dir ou.
71. **DR P. VEERAPEN**:- Ou pa konn sa ditou ?
72. **MRS S. CHOOLUN**:- Non.
73. **DR P. VEERAPEN**:- Me gete tou lede frer mem?
74. **MRS S. CHOOLUN**:- Oui.
75. **DR P. VEERAPEN**:- Enn gran frer, enn ti frer.
76. **MRS S. CHOOLUN**:- Oui.
77. **DR P. VEERAPEN**:- Ou bizin au courant ki avan avril 1977 ni ti frer ni gran frer pa ti ena  
78. terin la ?
79. **MRS S. CHOOLUN**:- Mo pa kapav dir ou, misie, parski zot pann dir moi. Moi mo pa kone.
80. **DR P. VEERAPEN**:- Ou rod dir moi ounn aste enn terin avek ou gran frer et ou pa kone depi  
81. kan ou gran frer ti ena terin la ?
82. **MRS S. CHOOLUN**:- Non, sa terin la, sa mo kone. Zot ti pe dir ki zot inn aste sa terin la.
83. **DR P. VEERAPEN**:- Zot ti pe dir depi kan zot ena terin la, ase lontan avan zot vann sa ar  
84. ou ?
85. **MRS S. CHOOLUN**:- Impe lontan.
86. **DR P. VEERAPEN**:- Depi ase lontan ki zonn dir ou zot ena terin la ?
87. **MRS S. CHOOLUN**:- Oui.
88. **DR P. VEERAPEN**:- Savedir en 1977 ou aste terin la, savedir li kapav enn 10 ans avan, enn  
89. 20 ans avan ?
90. **MRS S. CHOOLUN**:- Pa kapav dir ou. Kot monn arrive la, mo pa kapav donn tou sa  
91. explikasion la.
92. **DR P. VEERAPEN**:- Oui, be dizon enn 5 ans avan ?
93. **MRS S. CHOOLUN**:- Pa kapav dir ou.
94. **DR P. VEERAPEN**:- Pa kone. Me selman ou okuran ki depi lontan zot ena terin la ?
95. **MRS S. CHOOLUN**:- Parski mo impe malad, malad, mo pa kapav donn ou tou explikasion, si  
96. ti appel mo neveu li ti kapav dir ou.
97. **DR P. VEERAPEN**:- Ale right, ok.
98. **MRS S. CHOOLUN**:- Mo la tet fatigue, mo pa kapav koz bokou.
99. **DR P. VEERAPEN**:- Ou frer Harryparsad Choolun, li enkor vivan, non?

100. **MRS S. CHOOLUN** :- Non, linn mor.
101. **DR P. VEERAPEN** :- Ki li ti pe travay sa lepok la ?
102. **MRS S. CHOOLUN** :- Sa lepok la zot ti ena komers.
103. **DR P. VEERAPEN** :- Ti pe fer komers?
104. **MRS S. CHOOLUN** :- Oui.
105. **DR P. VEERAPEN** :- Dakor, et ki so komers ti ete?
106. **MRS S. CHOOLUN** :- Komers dile.
107. **DR P. VEERAPEN** :- Aster la letan ounn aste terin la, ki ou finn fer avek terin la ?
108. **MRS S. CHOOLUN** :- Terin la koumsa mem. Sa mem mo pe dir ou appel mo neveu.
109. **DR P. VEERAPEN** :- Oui, mo pou appel li enn ti moman la.
110. **MRS S. CHOOLUN** :- Fer apel li, mo fatigue, mo pa kapav koz bokou.
111. **DR P. VEERAPEN** :- Pa trakase, Madam, nou kompran ou. Nou pa pou tro tarde. Me
112. mo ti envi gagn enn serten klarifikasion avek ou. A lepok kouma ou dir impe lontan kit fwa
113. ou neveu pa tro kone ki ti arive lontan la, be ounn temwagn se kinn arrive lontan la. Akoz sa
114. nou pe demann ou enn de ti zafer.
115. **MRS S. CHOOLUN** :- Be misie mo blie, lakoz sa mo pe dir ou appel mo neveu.
116. **DR P. VEERAPEN** :- Oui, nou pou appel li taler enn ti moman la, nou pou appel li.
117. Be selman mo ti envi dir ou savedir terin la ou pann fer narien are sa. Ounn les terin la
118. koumsa ?
119. **MRS S. CHOOLUN** :- Pe gagn impe problem, akoz sa pa pe kapav fer narien. A koz sa
120. mo neveu pou vinn koze, ou va kapav pli kompran.
121. **DR P. VEERAPEN** :- Ou ti kapav dir moi ki kalite problem ounn tende ki ena lor terin
122. la ?
123. **MRS S. CHOOLUN** :- Ti ena enn blan ti pe fatig fatig nou, pa ti pe kapav fer narien lor
124. la.
125. **DR P. VEERAPEN** :- Ki sann la ti pe fatig fatig ou koumsa ?
126. **MRS S. CHOOLUN** :- Enn blan.
127. **DR P. VEERAPEN** :- Ki sa blan la sa, kouma li apele ?
128. **MRS S. CHOOLUN** :- Mo pa konn so nom, be koz sa mem nou pa pe kapav fer narien
129. lor la. Ala mo pe dir ou fran.
130. **DR P. VEERAPEN** :- Ok, ou rappel apepre terin la komie ti koute ?
131. **MRS S. CHOOLUN** :- Non, sa mem mo pe dir ou mo pa pe kone parski monn blie,
132. impe lontan sa. Mo mem mo krwar mo ti impe kouma zenfan zenfan, impe zen. Aster get sa

133. monn vinn vie, mo pa kapav rappel tou sa la, mo la tet fatigue, kompran.
134. **DR P. VEERAPEN** :- Oui, me ou ti ena kas pou aste normal, ou ti pey li kontan ?
135. **MRS S. CHOOLUN** :- Oui, nou ti pe travay. Nou travay sa mem fer komers dile ek mo
136. mama tou sa inn donn koudme. Be lerla mo mama donn moi kas ar sa arsam. Be lerla nou
137. ramas sa larzan la, be lerla noun resi al aste, kompran.
138. **DR P. VEERAPEN** :- Dakor, ale right, ok. Merci, mo bann koleg kapav poz keston.
139. **DR V. TEELock**:- Donc, nou pa pou tard ou tro bokou. Me enn de ti keston enkor mo ti a
140. kontan demande. Et ou rappel komie arpan terin ou ti aste ?
141. **MRS S. CHOOLUN** :- Sa mem mo pe dir ou apel mo neveu la, li kapav dir ou. Mo pa
142. kapav koz sa kouma dir mo la tet fatigue mo pa kapav.
143. **DR V. TEELock** :- Ou pa rappel komie arpan ounn aste ?
144. **MRS S. CHOOLUN** :- Mo pa kapav, mo pa rapel parski monn blie la.
145. **DR V. TEELock**:- Ok, et larzan ki ounn peye ounn gagn sa ek komers dile?
146. **MRS S. CHOOLUN** :- Oui, inn travay, inn fatigue bokou pou gagn sa kas la. Ou kone sa
147. lepok la kouma dimoun ti ete, sa ou kone la. Be noun travay bokou.
148. **DR V. TEELock** :- Ou tou sel ti pe travay ek ou mama ?
149. **MRS S. CHOOLUN** :- Mo papa, mo mama, mo bann frer, ser tou koumsa kouma dir
150. nou finn travay, kompran, ena Harryparsad Choolun, li osi linn travay, mo ti frer sa. Li si linn
151. travay kan papa inn malad, papa inn mor. Be lerla linn pran travay la, li ti enkor impe zenfan,
152. bel er linn mor, travay la apre dile nepli, pena dile, pena mem vas.
153. **DR V. TEELock** :- Komie vas ou ti ena ?
154. **MRS S. CHOOLUN** :- Vas nou ti pe aste. Nou aste nou reavann, nou fer travay
155. koumsa. Nou pa nourri vas. Zame noun nourri vas nou.
156. **DR V. TEELock** :- Et dan ki rezion ou ti pe vann dile ?
157. **MRS S. CHOOLUN** :- Rose Hill impe pa kone, preske moi mo res impe parfwa, moi
158. mo donn enn koudme par si par la, parfwa kan mo dan lakaz, kompran.
159. **DR V. TEELock** :- Donc a komie frer ser zot ti ete dan la fami ?
160. **MRS S. CHOOLUN** :- Nou ti enfin seki inn mor, impe lontan sa mo pa rappel, enn frer,
161. enn ser, kitfwa frer la konn moi, be moi mo pa konn frer la, entou nou ti kouma dir 5 frer, 5
162. ser. Be la nou zis 3 ena, enn moi, ena enn santener, apre ena enn enn ti pli gran ki moi, sa
163. mem.
164. **DR V. TEELock** :- Et kot li ti pe reste a lepok ?
165. **MRS S. CHOOLUN** :- La mem, Avenue Wilson, Belle Rose.

166. **DR V. TEELOCK**:- Tou letan ounn res laba ?
167. **MRS S. CHOOLUN**:- Tou letan noun rest la, tou letan. Noun ne, noun grandi, ala nou
168. pe vinn vie.
169. **DR V. TEELOCK**:- Be kouma ounn al pens aste enn terin a Riviere Noire?
170. **MRS S. CHOOLUN**:- Be mo pe fek pe dir ou la apel mo neveu la li kapav dir ou.
171. **DR V. TEELOCK**:- Be ou neveu pa ti la sa lepok la, li pa ti enkor ne ?
172. **MRS S. CHOOLUN**:- Be ena papier, li kapav dir ou.
173. **DR V. TEELOCK**:- Dakor, ok. Et Mons. David ena enkor enn de ti kestion.
174. **MR J. DAVID**:- Merci. Enn sel kestion en tou ka. Bon, bokou kitsoz ou pa pe rappel.
175. **MRS S. CHOOLUN**:- Oui, be aster monn vinn impe vie, mo ti impe zen. Apre sa
176. memwar la tout letan li pa parey.
177. **MR J. DAVID**:- Ou memwar tre bon quand il s'agit pou koz lot kitsoz me kouma koz
178. lor terin ou perdi memwar rapidman ?
179. **MRS S. CHOOLUN**:- Non, non, li arive koumsa, misie, sorry. Li ariv koumsa,
180. nimport ki koze mo ou le koze la mo kapav koz li koumsa apre mo blie, mo perdi.
181. **MR J. DAVID**:- Dir moi sa terin la linn res vag koumsa mem, pa finn met fencing tou sa
182. non ?
183. **MRS S. CHOOLUN**:- Pann kapav fer narien, monn dir ou pe gagn problem.
184. **MR J. DAVID**:- Pann met narien otour terin la ?
185. **MRS S. CHOOLUN**:- Zot ti pe oule. Me mo bann frer la zot pa la. Si zot ti la, zot ti
186. kapav dir ou, be zot gagn problem, pa pe kapav fer narien.
187. **MR J. DAVID**:- Zordi zour zot ti kanmem 10 zenfan, ti a 10, sesa ki ou fek dir, komie
188. zenfan ti ete dan la fami, 5 garson, 5 tifi -
189. **MRS S. CHOOLUN**:- Be mo pa pe dir ou enn la ti gran, kitfwa li ti enn garson, apre
190. enn tipti la -
191. **MR J. DAVID**:- Komie lezot memb la fami ki reste, bann frer ser enkor la ?
192. **MRS S. CHOOLUN**:- La ena 3.
193. **MR J. DAVID**:- Zis 3 ?
194. **MRS S. CHOOLUN**:- Enn ser santener.
195. **MR J. DAVID**:- La li pou al gagn telefonn gratis ek gouvernman.
196. **MRS S. CHOOLUN**:- Apre ena moi, mo pli tipti. Apre ena mo ser impe pli gran, moi
197. mo pli tipti, sa mem, sa ti frer la inn disparet.
198. **MR J. DAVID**:- Ecoute, merci. Nek zis sa mem mo ti pe envi kone, pena fencing, zame

199. ounn al res lor terin la, zame ounn okip terin la.
200. **MRS S. CHOOLUN** :- Pa kapav, mo pe dir ou pe gagn problem. Mo bann frer oule
201. mem fer kitsoz lor la, pa kapav.
202. **MR J. DAVID** :- Merci, mo retourn la parol.
203. **DR V. TEELOCK** :- Ok, Madame, merci.

Date: 9<sup>th</sup> May, 2011

TJC/H/Ng Tong Ng Wah G/200411/Me  
Original Version

1 DR TEELOCK: Ou Mr George Ng Tong Ng Wah, Land Surveyor? Vous êtes arpenteur?

2 MR G N T NG WAH: Oui

3 DR TEELOCK: O.k. Vous savez pourquoi vous êtes là aujourd'hui ? Ou koné ki fer ou la  
4 aujourd'hui ?

5 MR G N T NG WAH: Je suis un peu dur d'oreille, I am a bit hard of hearing

6 DR TEELOCK: Do you know why you are here today?

7 MR G N T NG WAH: I am a bit hard of hearing doctor

8 DR TEELOCK: Do you know why you are here today? Ou koné ki fer ou la aujourd'hui ?

9 MR G N T NG WAH: I am a Land Surveyor, I am Ng Tong Ng Wah, Land Surveyor of 52  
10 Volcy Pougnet street, Port Louis

11 DR TEELOCK: Thank you. Mrs Damory, our secretary, will make you swear; Mrs Damory?

12 THE SECRETARY : Bonjour, veuillez vous mettre debout s'il vous plait, levez la main droite et  
13 affirmez que vous allez dire la vérité

14 MR G N T NG WAH: (*raising his right hand*): I, Ng Tong Ng Wah, Land Surveyor of 52 Volcy  
15 Pougnet street, Port Louis

16 THE SECRETARY : You must affirm whatever you will say will be the truth

17 MR G N T NG WAH: I wish to inform the commission that I had never carried out any survey  
18 and that Mrs Choolun had never requested me to carry out any survey...

19 THE SECRETARY : You must affirm...

20 MR G N T NG WAH: ...any survey being the subject site of 490 arpents situate in the district of  
21 Black River...

22 DR TEELOCK: You have to swear first

23 MR G N T NG WAH: I affirm to the commission that whatever I shall say will be the truth

2

24 THE SECRETARY : O.k. thank you, you may sit down

25 DR TEELock: In what language do you want to speak? Anglais, français or créole? In what  
26 language do you want to speak?

27 MR G N T NG WAH: Je sui un peu dur...j'ai un peu problème avec mon oreille là

28 DR TEELock: In what language...

29 THE SECRETARY : Vous allez parler en anglais ou en français ?

30 MR G N T NG WAH: I prefer English, I prefer to speak in English

31 DR TEELock: Do you know why you are here?

32 MR G N T NG WAH: Yeah

33 THE SECRETARY : Pourquoi vous êtes là ?

34 MR G N T NG WAH: Pourquoi je suis là ?

35 THE SECRETARY : Oui

36 MR G N T NG WAH: I am here because I was requested by the The Truth & Justice  
37 Commission to speak on the subject matter of a plot of land of 490 arpents situated in the district  
38 of Black River and which was produced in an application of development permit in 1997 but I  
39 wish to inform the commission that I had never carried any survey in favour of Mrs Soonee  
40 Choolun being the subject site of the plot of land of 490 arpents situate in the district of Black  
41 River and which was produced in an application for a development permit in 1997.

42 I wish to inform the commission that in 1997, I worked at the Ministry of Housing & land as  
43 Principal Surveyor. So I am not entitled to carry out private work.

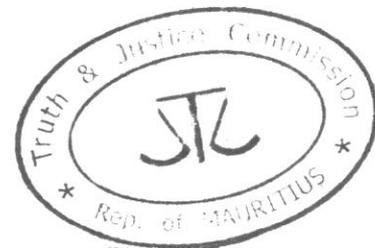

44 DR TEELock: Dr Veerapen is going to ask you a few questions

45 THE SECRETARY : Dr Veerapen va vous parler

46 MR G N T NG WAH: Yeah

- 47 DR VEERAPEN: Mr Ng Tong Ng Wah, it is a pleasure to have you today present at the The  
48 Truth & Justice Commission. You have just said you were working for sometime at the Ministry  
49 of Land & Housing, am I right, you get me? When did you work at the Ministry of Land &  
50 Housing, when was it?
- 51 MR G N T NG WAH: I joined the Ministry of Housing in June 1966 and I worked there for the  
52 past 37 years, I retired in April 2003 and I carried private practice at the Arcades Bahemia office  
53 in Port Louis up to now.
- 54 DR VEERAPEN: You retired in April 2008?
- 55 MR G N T NG WAH: Yeah about 37 years I was there, 37 years
- 56 DR VEERAPEN: O.k. more than 37, that's make 42 years; Oh 2003, o.k. thank you
- 57 MR G N T NG WAH: You know sometimes we may work in the civil service and occasionally  
58 you can do some private work, is that not? This happens, am I right?
- 59 MR G N T NG WAH: I can't hear
- 60 THE SECRETARY : Although you were working for the Ministry, you were doing private work  
61 sometimes, occasionally
- 62 MR G N T NG WAH: Quand j'étais au Ministère des Terres ?
- 63 THE SECRETARY : Oui
- 64 MR G N T NG WAH: No when I was at the Ministry of Housing, I did not carry any private  
65 work because I am not allowed; surveyors are not allowed to carry private work
- 66 DR VEERAPEN: Thank you but can I now just show you a document?
- 67 MR G N T NG WAH: Yes may I see?
- 68 DR VEERAPEN: Yes I am going to show that to you in a minute. A document which indicates a  
69 plot of land of Mrs Soonee Choolun and where we have the seal of your office
- 70 MR G N T NG WAH: Can I see it?

71 DR VEERAPEN: Yes to have a closer look at it

72 *At this stage, a document is shown to deponent*

73 MR G N T NG WAH: No, I have never drawn up the plan, it appears to be my stamp but I have  
74 never drawn up the survey nor carried out with the report, no there is no survey report only the  
75 plan, only the plan with my stamp. Normally I initial the plan and I sign the survey report. No  
76 it's not mine.

77 DR VEERAPEN: Now I am going just to say something of a general nature not for you (Mrs  
78 Damory just take care of word), sometimes it happens I don't say it's you, sometimes it happens  
79 for some officers?

80 MR G N T NG WAH: Yeah

81 DR VEERAPEN: O.k. though they are working for the government, they may occasionally do  
82 some private work?

83 MR G N T NG WAH: No

84 DR VEERAPEN: You agree with me on that?

85 MR G N T NG WAH: Qu'est-ce qu'il dit ?

86 DR VEERAPEN: Question générale

87 THE SECRETARY : It appears that some government officers though they are employed by the  
88 government, they may do occasionally some private work?

89 MR G N T NG WAH: Quand j'étais au gouvernement ...

90 THE SECRETARY : Generally speaking ?

91 MR G N T NG WAH: Quand j'étais au gouvernement ... When I was at the Ministry of Housing  
92 in 1997, I was in charge of the Pamplemousses and Rivière du Rempart districts as Principal  
93 Surveyor and there were two surveyors working under my supervision. So I do not know where  
94 the plan comes from, I do not know and it is not me who has drawn up the plan here.

95 DR VEERAPEN: Who were the surveyors working under your supervision? Give me the names  
96 of those two surveyors who were working under your supervision?

97 MR G N T NG WAH: In 2003 I practiced private work at the Arcades Bahemia but in 2003, I  
98 worked at home at my place, I lived at that time at 59, La Paix street, Port Louis, 54 Sir Virgile  
99 Naz street, Port Louis and my stamp, my telephone number is 2409699, I put it there but now I  
100 change my stamp, I join I work at Arcades Bahemia but at that time my stamp is that, my stamp  
101 is kept in my drawer, I had no office I worked at home at that time but I do not know who has  
102 falsified my stamp. There is neither my signature nor my initials. It is not mine.

103 DR VEERAPEN: No, I am just asking a very specific question, you just ask him again that  
104 question Mrs Damory: Could Mr Ng Tong Ng Wah tell us who were the surveyors who were  
105 working under your supervision when you were at the Ministry? The names of the surveyors?

106 MR G N T NG WAH: I have never surveyed the land, I have never been on site

107 DR VEERAPEN: No, no, my question is different...

108 MR G N T NG WAH: I do not know Mrs Choolun and she has never requested me to survey her  
109 land

110 THE SECRETARY : The names of the surveyors working with you at the Ministry of Housing?

111 MR G N T NG WAH: At the Ministry of Housing in 1997, I was Principal Surveyor in charge of  
112 two districts, Pamplemousses and Riviere du Rempart districts, two districts. Black River is not  
113 mine, I do not know Black River at that time and I don't know where the plan comes from. Mr  
114 Choony has never contacted me neither at the Ministry not at my office my private at Arcades  
115 Bahemia, I do not know her. The name of the two surveyors working with me at that time?

116 THE SECRETARY : Yes

117 MR G N T NG WAH: At that time 97, there were two surveyors working with me but I don't  
118 remember their names because I changed the district, every two years I changed district and they  
119 changed the surveyors and I do not know, I can't remember the names of the two surveyors  
120 working with me may be the Registry of the Ministry of Housing would confirm. The Ministry  
121 of Housing could confirm.

122 DR VEERAPEN: O.k. thank you but first I would like to ask you to help us. When you looked at  
123 this plan which I showed you to tell us whether you can confirm as a Sworn Land Surveyor  
124 whether this plan is a fake plan?

125 *At this stage, deponent is shown a document*

126 MR G N T NG WAH: No I do not know... whether the plan is a fake one? I wish to confirm to  
127 the commission that the plan is not mine, I do not know who has drawn up the plan, right who  
128 has drawn up the plan and who has put the stamp, put my stamp on the plan without my initials  
129 or signature. So I could confirm that it is not mine and I don't say it is a fake one but it is not  
130 mine and I do not know who has drawn up the plan, right and I have no computer, it appears to  
131 be from a computer but I have no computer at my place.

132 DR VEERAPEN: Listen it is very important to tell us who are those people who work with you  
133 as clerks, as assistants, as whatever when you work in private practice and when you were at the  
134 Ministry? You've got to think about it though you can't give us the answer today, you think  
135 about it in 1997, who were those who were working with you? You will give us the information  
136 in writing, you write to the secretary of the commission

137 MR G N T NG WAH: I can give the commission the names of the people working with me at  
138 Arcades Bahemia but at the Ministry of Housing, I can't remember

139 DR TEELock: Please check the Vat Registration Number

140 MR J DAVID : Check it first

141 MR G N T NG WAH: Alright

142 MR J DAVID : Say yes or no?

143 THE SECRETARY : S'il vous plait parlez

144 MR G N T NG WAH: Yeah, in 1997 the VAT Registered Number mentioned on the plan is  
145 mine, its correct VAT: 12160452, that's correct my VAT number

146 DR TEELock: But you were working at the ministry at that time

147 MR G N T NG WAH: My VAT number, my stamp appear to be mine my stamp

148 DR TEELock: But you were working at the ministry at the same time

149 MR G N T NG WAH: That's correct my VAT number, my telephone number is right

150 THE SECRETARY : The VAT number?

151 MR G N T NG WAH: The VAT number is right, that's correct because I left the government  
152 service, I left the ministry in April 2003 but in 2003 my stamp is the same that's right and my  
153 telephone number is at my place at 59 La Paix street, right 2409699 I worked at my place, I did  
154 not work, I worked for myself at my place. At that time there was no assistant working with me.  
155 In 2003, no assistant.

156 DR TEELock: Do you have any idea who could have taken your stamp?

157 MR G N T NG WAH: No I wish to confirm to the commission that I have no idea who could  
158 have taken my stamp but I kept my stamp in my drawer at home, I do not know, I don't know,  
159 my brother was living with me at that time, I don't know whether...I can't confirm whether my  
160 brother has given my stamp to somebody

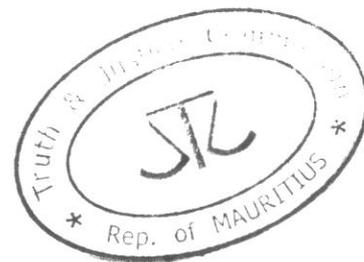

161 DR VEERAPEN: Now have you ever done any work of surveying in Rodrigues? Mrs Damory is  
162 writing it

163 MR G N T NG WAH: I wish to inform to confirm to the commission that I worked at Rodrigues  
164 for 18 months, 1985 and 1986. I was at that time a Senior Surveyor. Senior Surveyor and I  
165 worked at Solitude, at Citronelle, the survey office was at Citronelle in Rodrigues and I went to  
166 Rodrigues for a tour of service, a next tour of service of 1 year of 12 months in 2001 and 2002,  
167 right; August 2001 and I returned back to the Ministry in August 2002, 1 year I spent there.

168 DR TEELock: Thank you very much, you are free to go, there is need for you to come on  
169 Friday

170 MR G N T NG WAH: There was a letter, I got your letter right concerning the prescription at  
171 Rodrigues, Heirs Begué, right

172 THE SECRETARY : Any comments on this?

173 MR G N T NG WAH: In the year 2006 and 2008, a name is mentioned in the letter, the survey  
174 may have been done by Aldo Ong Tone because he was my colleague, he worked under my  
175 supervision in 2001 and in 2002, Aldo Ong Tone but at that time he was not allowed to sign any  
176 plan, any survey plan...So I carried out...he came to see me at my place and requested me to  
177 sign the plan, the survey report but I have never drawn any affidavit of prescription. It is the  
178 notary or the avoué who has done the affidavit of prescription but this is not mine, not Aldo  
179 because he is not allowed to prescription

180 MR J DAVID : Repeat what you just said, Aldo Ong Tone has no right...

181 MR G N T NG WAH: I can't submit to the commission any report, any survey report. All the  
182 reports have been kept by my colleague Aldo Ong Tone, Land Surveyor, he is now Senior  
183 Surveyor at the Cadastral Office

184 MR J DAVID : Concerning Aldo Ong Tone he was not allowed to do any prescription?

185 MR G N T NG WAH: Yeah, Ong Tone was not allowed, he is a Land Surveyor, he is not  
186 entitled to draw up affidavit of prescription but he is allowed to carry out survey work, right,  
187 survey in view of prescription, right, survey, he carried out the survey, o.k.

188 DR TEELock: Thank you very much.

Date: 9<sup>th</sup> +May, 2011

TJC/H/Bhujohory M/200411/Mf  
Original Version

- 1 DR TEELOCK: Le CEO
- 2 MRS BHUJOHORY: Le CEO est en congé préretraite, il est parti depuis le 1<sup>er</sup> Janvier cette  
3 année
- 4 DR TEELOCK: La secrétaire va vous demander de prêter serment et de vous identifier
- 5 MRS BHUJOHORY: O.k.
- 6 DR TEELOCK: Et vous êtes au courant du cas ?
- 7 MRS BHUJOHORY: Oui, d'ailleurs je vais table les détails sur ça
- 8 THE SECRETARY : Bonjour, madame si vous pouvez vous mettre debout, si vous pouvez lever  
9 la main droite et affirmez que vous allez dire la vérité et rien que la vérité pendant la déposition
- 10 MRS BHUJOHORY: Oui je vais dire la vérité, rien que la vérité pendant toute la déposition
- 11 THE SECRETARY : Merci, identifiez-vous devant la commission
- 12 MRS BHUJOHORY: Je suis Marie Aimée Bhujohory
- 13 THE SECRETARY : En tant que ?
- 14 MRS BHUJOHORY: Acting Chief Executive
- 15 THE SECRETARY : D'accord, merci
- 16 DR TEELOCK: Alors vous allez parler anglais, français, créole ?
- 17 MRS BHUJOHORY: Peu importe, français disons
- 18 DR TEELOCK: Français ou créole
- 19 MRS BHUJOHORY: Créole, nou la langue chose sa
- 20 DR TEELOCK: Donc vous êtes au courant du cas ?
- 21 MRS BHUJOHORY: Si, je vais faire un petit historique, d'ailleurs le table...
- 22 DR TEELOCK: Une minute, le commissaire David qui va vous poser des questions suivi par les  
23 autres commissaires

24 MRS BHUJOHORY: O.k.

25 MR J DAVID : Merci, madame je n'ai pas retenu votre nom

26 MRS BHUJOHORY: Marie Aimée, mon prénom, Marie Aimée Bhujohory

27 MR J DAVID : Merci. Oui madame donc merci d'être venu à défaut de votre Chief Executive  
28 mais surement vous allez nous donner les réponses qu'on cherche

29 MRS BHUJOHORY: Certainement

30 MR J DAVID : Donc allons procéder par étape

31 MRS BHUJOHORY: O.k.

32 MR J DAVID : Quelqu'un vient chez vous et demande un permis de développement ; quelle est  
33 la procédure enclenchée ?

34 MRS BHUJOHORY: Quelqu'un normalement ce qu'on lui demande ce sont il y a les application  
35 forms à remplir, il y a trois sets de plan à soumettre, un location plan. Il fait sa demande, sa  
36 demande est examinée par les inspecteurs ou le Planning Department...

37 MR J DAVID : Planning Department

38 MRS BHUJOHORY: Et s'il n'y a rien et que tout est en règle il respecte tout ce qu'on lui  
39 demande, il a le set back, disons il veut construire une maison il a le set back requit donc il donne  
40 son permis.

41 MR J DAVID : O.k. est-ce que vous avez combien de type de permis de développement que  
42 vous offrez, développement résidentiel ?

43 MRS BHUJOHORY: o.k. commercial

44 MR J DAVID : Résidentiel, commerciale

45 MRS BHUJOHORY: Commercial et puis sergenerist...*(difficult to understand the word)* ça veut  
46 dire industriel et autre chose hein

47 MR J DAVID : Industriel, morcellement et tout ?

- 48 MRS BHUJOHORY: Excision
- 49 MR J DAVID : Excision, donc plusieurs types de permis ?
- 50 MRS BHUJOHORY: De développement
- 51 MR J DAVID : De développement ?
- 52 MRS BHUJOHORY: Oui
- 53 MR J DAVID : O.k. bon quand cela arrive chez vous, quelles sont les étapes que vous  
54 engagées ? Vous avez différents départements ?
- 55 MRS BHUJOHORY: Oui
- 56 MR J DAVID : D'abord ça part... allez je viens moi comme n'importe quel mauricien je dis j'ai  
57 un terrain à faire développer à Rivière Noire, je vais remplir...
- 58 MRS BHUJOHORY:...les formulaires qu'il faut, oui
- 59 MR J DAVID : Les formulaires ?
- 60 MRS BHUJOHORY: Oui
- 61 MR J DAVID : Je donne mon title deed
- 62 MRS BHUJOHORY: Tout ça, oui
- 63 MR J DAVID : Je donne les plans
- 64 MRS BHUJOHORY: Oui
- 65 MR J DAVID : Je donne le location plan, site plan
- 66 MRS BHUJOHORY: Oui
- 67 MR J DAVID : Je donne aussi le Surveyor's Report ?
- 68 MRS BHUJOHORY: Oui
- 69 MR J DAVID : Ça aussi il faut ?

- 70 MRS BHUJOHORY: Oui
- 71 MR J DAVID : Tout là, donc ça part où ? Je dépose ça avec le secrétaire, ça part où après ?
- 72 MRS BHUJOHORY: Non, vous déposez ça dans le Planning Department
- 73 MR J DAVID : Planning Department d'abord ?
- 74 MRS BHUJOHORY: Oui comptoir d'accueil, ce sont les clerical officers qui accusent réception
- 75 du dossier
- 76 MR J DAVID : O.k.
- 77 MRS BHUJOHORY: On vous donne une référence pour le dossier
- 78 MR J DAVID : Pour le dossier
- 79 MRS BHUJOHORY: Voila
- 80 MR J DAVID : Oui et puis ça part où ?
- 81 MRS BHUJOHORY: Comme je vous dis l'application est processed par les inspecteurs pour
- 82 voir si tout est correct, s'il respecte les planning policy guidance disons...
- 83 MR J DAVID : Inspecteurs ?
- 84 MRS BHUJOHORY: Le Planning Department
- 85 MR J DAVID : Planning Department, o.k. et par la suite?
- 86 MRS BHUJOHORY: Ils vont voir si c'est conforme au PPG hein, planning policy guidance. Ils
- 87 regardent disons pour la hauteur du bâtiment, les trucs comme ça
- 88 MR J DAVID : Bâtiment, environnement qu'il faut protéger
- 89 MRS BHUJOHORY: C'est ça
- 90 MR J DAVID : Les arbres qu'il ne faut pas détruire ?
- 91 MRS BHUJOHORY: O.k. c'est ça

- 92 MR J DAVID : C'est tout pour que ça s'intègre totalement dans l'environnement ?
- 93 MRS BHUJOHORY: C'est ça, voilà
- 94 MR J DAVID : Ça c'est le environment impact assessment que l'on fait ?
- 95 MRS BHUJOHORY: Oui
- 96 MR J DAVID : Nous sommes tout à fait d'accord là-dessus là ?
- 97 MRS BHUJOHORY: O.k. ça veut dire le Planning Department processed, il fait ces  
98 recommandations, si c'est o.k. on a un formulaire il met ces recommandations, s'il y a à  
99 soumettre les trucs, les trucs, enfin je ne sais pas moi, additionnels...
- 100 MR J DAVID : Pour ou contre ou en faveur
- 101 MRS BHUJOHORY: C'est ça
- 102 MR J DAVID : Où il manque des choses ?
- 103 MRS BHUJOHORY: C'est ça
- 104 MR J DAVID : Oui...
- 105 MRS BHUJOHORY: Et puis l'ingénieur qui entre en jeu pour la structure hein
- 106 MR J DAVID : Voilà alors premièrement planning ?
- 107 MRS BHUJOHORY: Oui
- 108 MR J DAVID : Deuxième ingénieur ?
- 109 MRS BHUJOHORY: Oui
- 110 MR J DAVID : Oui tout à fait d'accord
- 111 MRS BHUJOHORY: Il donne ces recommandations
- 112 MR J DAVID : Il donne sa recommandation

113 MRS BHUJOHORY: Street o.k. on a un comité qui s'appelle le Permits and Business  
114 Monitoring Committee (PBMC), on se rencontre une fois la semaine minimum les mardis. Donc  
115 ça passe dans le comité et puis on issue le permit à la personne.

116 MR J DAVID : Voila. Est-ce que vous avez des chercheurs chez vous par exemple pour vérifier  
117 si un titre de propriété est véritablement ça appartient à monsieur or madame X ou Y ?

118 MRS BHUJOHORY: Non

119 MR J DAVID : Vous ne le faites pas ?

120 MRS BHUJOHORY: Non

121 MR J DAVID : Ce n'est pas votre...

122 MRS BHUJOHORY: On n'a pas la compétence pour le faire, les inspecteurs n'ont... enfin ils  
123 peuvent lire comme ça mais si il y a quelque chose entre, je comprends ce que vous voulez  
124 dire...

125 MR J DAVID : Face value, quelqu'un vous dit je suis propriétaire de la montagne du Morne,  
126 vous m'écoutez vous dites oui vous êtes propriétaire, non ?

127 MRS BHUJOHORY: Oui mais normalement...

128 MR J DAVID :...c'est peu ça ?

129 MRS BHUJOHORY: Ils étudient les title deeds et comme je vous dis ce n'est pas comme un  
130 juriste comme un notaire peut le faire

131 MR J DAVID : Vous ne croyez pas que c'est une...c'est très grave ?

132 MRS BHUJOHORY: C'est une lacune, oui

133 MR J DAVID : C'est une lacune très très grave ?

134 MRS BHUJOHORY: Oui

135 MR J DAVID : Parce que moi comme je vous dis si j'ai envie de construire un château sur le  
136 sommet de la montagne du Morne je peux le faire ?

- 137 MRS BHUJOHORY: Oui...*laughing*
- 138 MR J DAVID : Personne ne pourra m'en empêcher
- 139 MRS BHUJOHORY: C'est vrai
- 140 MR J DAVID : Donc ...
- 141 MRS BHUJOHORY: Si c'est falsifié comme je vous dis c'est difficile pour nous de le savoir
- 142 MR J DAVID : Difficile de savoir ?
- 143 MRS BHUJOHORY: Oui
- 144 MR J DAVID : Allons dire pour ce qui est du morcellement, vous-même vous donnez le  
145 permis ?
- 146 MRS BHUJOHORY: Enfin ça dépend si c'est un Division in kind disons entre héritiers...
- 147 MR J DAVID : Entre héritiers ?
- 148 MRS BHUJOHORY: C'est nous qui donnons, si c'est un gros projet plusieurs lots ça va avec le  
149 morcellement board
- 150 MR J DAVID : Ah bon très bien. Morcellement Board d'abord et puis ça revient vers vous ?
- 151 MRS BHUJOHORY: Oui
- 152 MR J DAVID : Dans le cas qui nous intéresse est-ce que vous êtes au courant vous pouvez  
153 confirmer ou non si c'est une demande pour un morcellement dans le cas Choolun ?
- 154 MRS BHUJOHORY: Dans le cas de Choolun on a reçu deux applications en 1997
- 155 MR J DAVID : Voilà c'est ça que je voulais savoir
- 156 MRS BHUJOHORY: Le premier était pour une excision
- 157 MR J DAVID : Oui, mil neuf cent quatre vingt... ?

158 MRS BHUJOHORY: ...dix-sept, en 1997 oui, le premier c'était pour une excision, l'application  
159 était datée le 12 Novembre 1997

160 MR J DAVID : De 26 arpents?

161 MRS BHUJOHORY: Non

162 MR J DAVID : C'est ça?

163 MRS BHUJOHORY: Non il y a deux là

164 MR J DAVID : Il y a deux, allez le premier ?

165 MRS BHUJOHORY: Le premier une excision de 297.24 mètres carrées d'un total de 2,  
166 068,226.30 mètres carrées...

167 MR J DAVID : Vous partez trop vite pour moi là. En terme d'arpent ?

168 MRS BHUJOHORY: 400 plus

169 MR J DAVID : 400 arpents, disons hein, allez...

170 MRS BHUJOHORY: Le head planner peut vous donner...

171 MR J DAVID : 2 million allez je m'arrête je ne vais pas plus loin, 2 million

172 MRS BHUJOHORY: Oui

173 MR J DAVID : Donc quelques 400 arpents ?

174 MRS BHUJOHORY: Oui

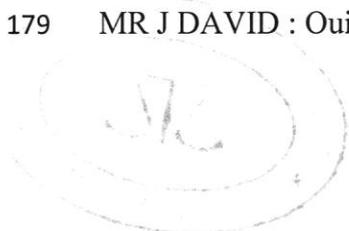

175 MR J DAVID : Nous sommes d'accord bon voila. Donc c'était premièrement une excision hein ?

176 MRS BHUJOHORY: Une excision

177 MR J DAVID : Très bien, en faveur de qui ?

178 MRS BHUJOHORY: De Mme Sonee Choolun

179 MR J DAVID : Oui en faveur de Mme Choolun

- 180 MRS BHUJOHORY: A Coteau Raffin, La Gaulette
- 181 MR J DAVID : O.k. et le deuxième ?
- 182 MRS BHUJOHORY: Ça a été rejeté hein par le conseil
- 183 MR J DAVID : Ça a été rejeté ?
- 184 MRS BHUJOHORY: Oui
- 185 MR J DAVID : O.k. oui
- 186 MRS BHUJOHORY: Le deuxième c'est une application faite le 30 Décembre 1997
- 187 MR J DAVID : 30 Décembre, quelques semaines après ?
- 188 MRS BHUJOHORY: Oui pour une excision de 70 arpents, là c'est en arpent hein, 70 arpents 25
- 189 d'un gros lot de 490 arpents for agricultural purposes ; la première c'était pour residential
- 190 MR J DAVID : Le deuxième c'est pour ?
- 191 MRS BHUJOHORY: Agricultural purposes, c'est toujours à Royal Road, Coteau Raffin, La
- 192 Gaulette
- 193 MR J DAVID : O.k. pour le même lot ça hein ?
- 194 MRS BHUJOHORY: Pour le même lot
- 195 MR J DAVID : O.k. très bien
- 196 MRS BHUJOHORY: On avait des doutes sur le title deed, on avait écrit d'ailleurs à notre then
- 197 legal adviser, Mr Balmanno qui nous a répondu qu'on ne peut pas...
- 198 MR J DAVID : ...donner le permis ?
- 199 MRS BHUJOHORY: C'est ça on n'a pas donné
- 200 MR J DAVID : On n'a pas agréé?
- 201 MRS BHUJOHORY: Non

202 MR J DAVID : Oui donc il n'y a pas eu une troisième demande ?

203 MRS BHUJOHORY: Non...je ne peux pas vous dire je n'ai pas...

204 MR J DAVID : Si je peux me permettre

205 MRS BHUJOHORY: Oui

206 MR J DAVID : Il y a eu un development permit référence 0946/97 : « He is hereby authorised to  
207 develop his or her land situated at Coteau Raffin. Description: Excision of a plot of land of an  
208 extent of 26 arpents, 2,747 metres carrés de 490 arpents” et cela a été octroyé le 3.11.1997

209 MRS BHUJOHORY: Un development permit? C'est grave ça

210 MR J DAVID : Ben madame ce n'est pas moi qui faite, je n'ai pas fais de commentaire c'est  
211 vous qui dit que c'est grave

212 MRS BHUJOHORY: Oui très grave

213 MR J DAVID : Et jetez un coup d'œil

214 *At this stage deponent is shown a document*

215 MR J DAVID : Vous n'êtes pas au courant de ça ?

216 MRS BHUJOHORY: Non

217 MR J DAVID : Ah c'est doublement plus grave si vous n'êtes pas au courant

218 MRS BHUJOHORY: Du tout

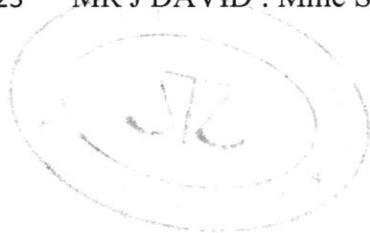

219 MR J DAVID : Donc vous voyez que ça sort de chez vous ?

220 MRS BHUJOHORY: Oui

221 MR J DAVID : Vous pouvez... il y a une signature qui n'est pas trop lisible ?

222 MRS BHUJOHORY: Ça c'est Mme Sanassy

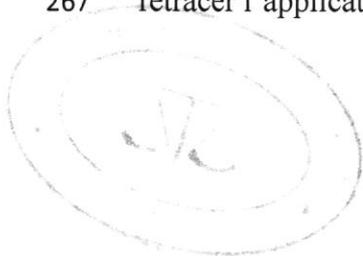

223 MR J-DAVID : Mme Sunassee?

- 224 MRS BHUJOHORY: Oui je dois confirmer
- 225 MR J DAVID : Elle était quoi là-bas ?
- 226 MRS BHUJOHORY: Elle était Planning Officer
- 227 MR J DAVID : Planning Officer, donc Mme Sunassee donne un papier de permis de  
228 développement et vous en tant que Acting Chief Executive, vous n'êtes pas au courant ?
- 229 MRS BHUJOHORY: Non
- 230 MR J DAVID : Maintenant vous allez voir ; est-ce que elle avait le pouvoir de signer un tel  
231 papier ?
- 232 MRS BHUJOHORY: Dans le temps c'était elle qui signait en 1997 et puis...
- 233 MR J DAVID : Dites moi qu'est-ce qui a changé ?
- 234 MRS BHUJOHORY: Avec le Business Facilitation Act de 2006, donc là maintenant c'est le  
235 Chief Executive qui signe
- 236 MR J DAVID : Oui donc Mme Sunassee, elle était donc Chief Planner à l'époque ?
- 237 MRS BHUJOHORY: Oui elle était responsable, oui du département planning
- 238 MR J DAVID : Du département parce que elle, elle signe for the secretary of...
- 239 MRS BHUJOHORY: of the council
- 240 MR J DAVID : Of the council et elle est toujours attaché à ce département chez vous ?
- 241 MRS BHUJOHORY: Non elle n'est plus chez nous
- 242 MR J DAVID : Elle a eue une promotion ?
- 243 MRS BHUJOHORY: Non, elle est consultante en feng shui
- 244 MR J DAVID : Pardon ?
- 245 MRS BHUJOHORY: Consultante en feng shui

- 246 MR J DAVID : Feng shui, donc elle a pu retrouver son bien-être dans le feng shui ?
- 247 MRS BHUJOHORY: No comments
- 248 MR J DAVID : Pour avoir eu avec une telle facilité la possibilité de signer un tel papier et que  
249 vous vous me donnez deux...
- 250 MRS BHUJOHORY: Je veux vous donner ça
- 251 MR J DAVID : J'aurais souhaité si vous pourriez laisser une copie de cela ?
- 252 MRS BHUJOHORY: Non je vous donne, je laisse l'originale
- 253 MR J DAVID : L'originale, merci, merci
- 254 MR J DAVID : Donc deux demandes ; la deuxième demande vous aviez acceptée ou rejetée ?
- 255 MRS BHUJOHORY: Rejetée
- 256 MR J DAVID : Rejetée, deux demandes rejetées et pourtant il y a un qui passe comme une lettre  
257 à la poste et sans que nous ayons un commentaire à faire, vous étiez au courant de ce plan qui  
258 était déjà accompagné des détails ?
- 259 MRS BHUJOHORY: Le problème Mr David que lors des émeutes de 1999, la plupart des  
260 archives du Planning Department ont été détruites par le feu
- 261 MR J DAVID : Ah ! Heureusement nous avons pu conserver ça
- 262 MRS BHUJOHORY: La plupart ils ont eu le feu là-bas carrément hein
- 263 MR J DAVID : Détruites ?
- 264 MRS BHUJOHORY: Détruites
- 265 MR J DAVID : Mais...
- 266 MRS BHUJOHORY: Ça on a pu retracer d'ailleurs c'est attaché là, que les registres que j'ai pu  
267 retracer l'application, il y avait un livre qu'on gardait mais les dossiers...

268 MR J DAVID :...ont disparus et c'est encore plus grave, grave, grave. Est-ce que dans vos  
269 relevés aujourd'hui, vous avez cela (*At this stage a document is shown to deponent*) ?

270 MRS BHUJOHORY: Non

271 MR J DAVID : Non, vous n'avez pas de trace du tout ?

272 MRS BHUJOHORY: Du tout

273 MR J DAVID : Donc c'est le feng... Vous n'étiez pas au courant de ça vous ?

274 MRS BHUJOHORY: Du tout

275 MR J DAVID : Bon ça c'est très important comme je vous dis. Donc maintenant vous me dites  
276 qu'on a signé comme cela, là ça devient plus grave qu'on y pensait. C'est authentique ça ?

277 DR TEELock: D'après vous c'est authentique ce document ou ça a pu être...

278 MRS BHUJOHORY: Oui d'ailleurs il y a un numéro

279 MR J DAVID : Un numéro dessus, tout est là-dedans

280 MRS BHUJOHORY: Ça veut dire avant c'était dans un carnet, donc on retirait on gardait une  
281 copie dans le dossier et on donnait l'originale à la personne

282 MR J DAVID : Voila, o.k. Combien de temps est-ce que Mme Sunassee a travaillée à votre...

283 MRS BHUJOHORY: Chez nous ?

284 MR J DAVID : Chez vous ?

285 MRS BHUJOHORY: Ça veut dire en 1994 elle était au Ministère Housing & Lands

286 MR J DAVID : Housing & Lands en 1994, oui ?

287 MRS BHUJOHORY: En 94, elle est arrivée chez nous

288 MR J DAVID : Ah ! Elle était au Ministry of Housing avant ?

289 MRS BHUJOHORY: Avant, oui

- 290 MR J DAVID : Et combien temps elle a fait chez vous ?
- 291 MRS BHUJOHORY: Ça veut dire elle a quittée il y a à peu près deux ans
- 292 MR J DAVID : Elle vient de quitter ?
- 293 MRS BHUJOHORY: Oui
- 294 MR J DAVID : Les documents qui ont disparus ; à quelle période à peu près ?
- 295 MRS BHUJOHORY: Non les documents comme je vous ai dis les émeutes de 99
- 296 MR J DAVID : Voila
- 297 MRS BHUJOHORY: Février 1999
- 298 MR J DAVID : Elle était là en 1997 et nous avons la preuve qu'elle y était. Très bien et puis en  
299 98, 99 pardon, en 99 tous les plans...
- 300 MRS BHUJOHORY: ...partent en fumée
- 301 MR J DAVID : partent en fumée, voila donc on retrouve... donc est-ce qu'elle a le droit de  
302 donner un permis par elle-même...
- 303 MRS BHUJOHORY: Non
- 304 MR J DAVID : ...elle peut s'octroyer ce droit ?
- 305 MRS BHUJOHORY: Bien sûr que non. Avant c'était le Works and Planning Committee qui  
306 déterminaient les applications
- 307 MR J DAVID : Voila tout ça est fait en règle générale selon la procédure ?
- 308 MRS BHUJOHORY: Oui
- 309 MR J DAVID : Donc ce qui fait qu'elle doit suivre les étapes ?
- 310 MRS BHUJOHORY: Oui certainement

311 MR J DAVID : Si jamais donc, si jamais elle a donnée un tel permis ce serait derrière le dos de  
312 tout le monde alors ?

313 MRS BHUJOHORY: Bein oui, définitivement

314 MR J DAVID : Vous avez dit grave une fois, j'ai dit deux fois, trois fois

315 MRS BHUJOHORY: Je suis choquée, outrée

316 MR J DAVID : Vous vous êtes choquée ?

317 MRS BHUJOHORY: Choquée, outrée

318 MR J DAVID : Voila

319 DR TEELock: Si elle a donnée ce permis de développement, elle était aussi dans la même  
320 équipe avec les deux autres qui ont dit qu'il y avait des problèmes avec les title deeds ? Elle était  
321 au courant ?

322 MRS BHUJOHORY : Oui bien sûr

323 DR TEELock: Donc elle était en full knowledge que c'était faux ?

324 MR J DAVID : Full knowledge?

325 MRS BHUJOHORY: Certainement

326 DR TEELock: Que c'était faux ?

327 MRS BHUJOHORY: Certainement, ça veut dire on a écrit à Me Balmanno et c'est elle-même  
328 qui a signée la lettre d'ailleurs

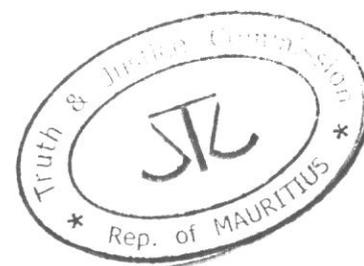

329 MR J DAVID : La lettre ?

330 MRS BHUJOHORY: Oui c'est attaché là hein

331 MR J DAVID : Donc je vois donc une lettre en date du 5.2.98

332 MRS BHUJOHORY: Oui

→

333 MR J DAVID : Où elle écrit à Me Balmanno

334 MRS BHUJOHORY: Me Balmanno

335 MR J DAVID : Donc elle signe, donc elle est très au courant qu'il y avait quelques doutes sur ce  
336 terrain là ?

337 MRS BHUJOHORY: Me Balmanno a carrément... d'ailleurs si on voit son advice qui est clair et  
338 net

339 MR J DAVID : Oui

340 MRS BHUJOHORY: C'est attaché là-dedans

341 MR J DAVID : Voila et Me Balmanno qui répond en lettre du 18.2.98 à l'effet qu'il a regardé le  
342 document et que...*(reads the document)* il demande de vérifier si Mme Choolun a un good title  
343 deed

344 MRS BHUJOHORY: Oui

345 MR J DAVID : « The document submitted by her is a document under private signature. It  
346 provides 13<sup>th</sup> line from bottom "la transmission du titre ainsi de suite.... » She is therefore not  
347 yet the owner of the plot of land" Ça c'était en 98?

348 MRS BHUJOHORY: Oui

349 MR J DAVID : Mais pourtant en 97, elle a signée pour donner le permis à Mme Choolun. Avec  
350 ce permis de Mme Choolun, Mme Choolun fait une demande auprès de la DBM en mettant ce  
351 terrain en garantie pour 50 million

352 MRS BHUJOHORY: Je tombe des nus

353 MR J DAVID : Donc voila nous nous voulions savoir quelle était votre responsabilité en tant  
354 qu'institution. Donc vous tombez directement sous the Ministry of Local Government?

355 MRS BHUJOHORY: Of Local Government

356 MR J DAVID : Et que tout ce qui touche à cette institution touche le ministère, touche aussi le  
357 gouvernement dans son ensemble ?

358 MRS BHUJOHORY: Certainement, certainement

359 MR J DAVID : Donc si une personne arrive à octroyer des permis derrière le dos de tout un  
360 chacun, je crois qu'il y a enquête à initier ?

361 MRS BHUJOHORY: Oui

362 MR J DAVID : Dans ce cas

363 DR TEELock: Moi j'ai une petite question. Est-ce que c'est possible qu'une personne seule  
364 soit responsable, une personne peut faire autant et que personne autour de lui, les officiers, les  
365 collègues ne soient pas au courant ?

366 Je trouve ça un peu surprenant que personne ne soit au courant

367 MRS BHUJOHORY: Il y a une personne qui était responsable de la section planning et donc elle  
368 avait toute la latitude de faire ce qu'elle veut

369 DR TEELock: Pour donner un permis comme ça, il faut qu'elle est le the support du CEO,  
370 l'aval du CEO ou pas nécessairement ?

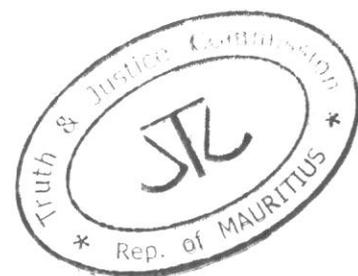

371 MRS BHUJOHORY: Je ne peux pas répondre, je ne crois pas non

372 DR TEELock: Mais quelle est la procédure normalement pour donner un development permit,  
373 the CEO should be aware ?

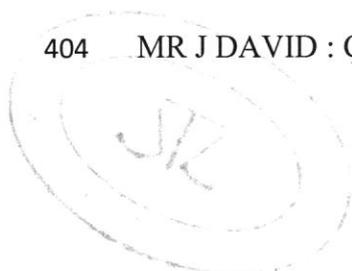

374 MRS BHUJOHORY: Normalement pour donner un development permit comme je vous dis, ça a  
375 été au Works and Planning committee, c'est minuted c'est recorded telle personne le permis a été  
376 approuvé, telle personne le permis a été rejeté.

377 Ça peut-être je peux essayer de retracer les minutes of proceedings de ça, ça je vous ai pas  
378 donnés je peux vous les donner ça hein. Donc on octroie des permis à la base de ce que le Works  
379 and Planning...

380 MR J DAVID : ...soumet comme...

- 381 MRS BHUJOHORY: ...approuvé mais sinon...
- 382 MR J DAVID : Approuvé ou pas approuvé
- 383 MRS BHUJOHORY: Si ce n'est pas approuvé, on dit ce n'est pas approuvé
- 384 MR J DAVID : Voila
- 385 DR TEELock: Est-ce que le CEO peut disapprove ce que le planning committee dit? Est-ce  
386 qu'il doit donner son aval ?
- 387 MRS BHUJOHORY: Non, non, auparavant c'étaient les conseillers qui... c'étaient les  
388 conseillers
- 389 MR J DAVID : Oui
- 390 MRS BHUJOHORY: Maintenant c'est le staff qui s'occupe
- 391 MR J DAVID : Donc j'ai bien compris vos points madame et je crois que nous avons suivis les  
392 procédures qui doit donner et qui ne doit pas donner ainsi de suite.
- 393 Est-ce que vous seriez au courant ou pas, est-ce qu'il y aurait d'autre demande de développement  
394 sur ce terrain en question ?
- 395 MRS BHUJOHORY: Ce que je veux faire aussitôt que je rentre au bureau je vais essayer de voir  
396 si on a reçu d'autre application de Mme Choolun après, ça je n'ai pas vraiment vérifié et je me  
397 suis concentrée que sur ça hein
- 398 MR J DAVID : Bon je retourne la question ; est-ce qu'il y aurait eu des demandes de  
399 développement par une autre société sur ce terrain là ?
- 400 MRS BHUJOHORY: Difficile de vous dire, je dois vérifier
- 401 MR J DAVID : S'il vous plait parce que vous voyez ce n'est pas difficile de retrouver, vous avez  
402 chez vous votre Bible
- 403 MRS BHUJOHORY: Oui
- 404 MR J DAVID : Ça c'est votre Bible ça ?

405 *At this stage a document is shown to deponent*

406 MRS BHUJOHORY: Oui

407 MR J DAVID : Et à partir de là vous découvrez dans quelle partie de la région il y a  
408 développement, il y a demande de développement donc et tout ; en tant qu'institution de cette  
409 région, c'est totalement...

410 MRS BHUJOHORY:...sous notre responsabilité

411 MR J DAVID : Sous votre responsabilité, la moindre petite roche que l'on bouge vous devez être  
412 au courant ?

413 MRS BHUJOHORY: Oui

414 MR J DAVID : Donc nous c'est ça donc que nous voulions savoir et donc vous avez donné les  
415 réponses à certaines questions. Donc maintenant je retourne la parole donc à Mme Teelock

416 MRS BHUJOHORY: Mais dites moi, excusez moi hein, ce que vous m'avez montré attaché avec  
417 le development permit ce n'est pas un proper survey plan ça hein

418 MR J DAVID : Pardon ?

419 DR TEELock: C'est faux

420 MRS BHUJOHORY: Ce n'est pas bon

421 MR J DAVID : Ah oui vous êtes en train de confirmer pour ça là ?

422 MRS BHUJOHORY: Oui, ça veut dire ça se situe tout près de la route Royale parce qu'il faut  
423 que je situe pour que je puisse voir

424 MR J DAVID : Oui vous allez pouvoir retracer facilement

425 MRS BHUJOHORY: D'après ça hein...laissez moi voir ?

426 MR J DAVID : D'après ici

427 MRS BHUJOHORY: Laissez-moi voir ça ?

2

428 MR J DAVID : Voila

429 *At this stage a document is shown to deponent*

430 MRS BHUJOHORY: Laissez moi voir ça, ça veut dire Route côtière de la Rivière Noire vers La  
431 Gaulette, ça veut dire c'est à gauche

432 MR J DAVID : Oui

433 MRS BHUJOHORY:... Ah c'est vers Le Morne, ça veut dire c'est à droite de la route côtière, là  
434 c'est le chemin vers la plage publique mais je connais cette région c'est développée maintenant

435 MR J DAVID : Pardon ?

436 MRS BHUJOHORY: C'est complètement développée c'est presque

437 MR J DAVID : Voila exactement, exactement, si vous dites maintenant que c'est développée,  
438 nous la commission on aurait voulu savoir qui, quand, comment tout ça a été développée avec ou  
439 sans l'aval de votre institution ?

440 MRS BHUJOHORY: Ça veut dire à la suite de ça il devrait y avoir eu un morcellement

441 MR J DAVID : Ah ! C'est pourquoi je vous ai posé la question sur le morcellement

442 MRS BHUJOHORY: Oui, oui

443 MR J DAVID : C'est pourquoi je vous demande qui donne le feu vert pour un tel développement  
444 parce que si je me trompe, il y a des développements à hauteur de million où si je veux être  
445 modeste en parlant de million, je ne parle pas de milliard

446 MRS BHUJOHORY: Oui, oui

447 MR J DAVID : C'est pourquoi je vous pose la question en ce qu'il s'agit de développement de  
448 morcellement, je me situe très bien à cette partie là moi aussi là

449 MRS BHUJOHORY: Non maintenant je me retrouve, je sais où c'est

450 MR J DAVID : Voila

- 451 MRS BHUJOHORY: C'est-à-dire c'est tout juste après La Gaulette, le village de La Gaulette
- 452 MR J DAVID : Voila, juste avant d'arriver, il y a cannes à sucre le restaurant à côté et puis vous  
453 tombez tout de suite dans Le Morne
- 454 MRS BHUJOHORY: Oui, oui, Coteau Raffin, oui
- 455 MR J DAVID : Coteau Raffin
- 456 MRS BHOJOHORY : Il y avait des squatters là-bas
- 457 MR J DAVID : Est-ce que moi une question que je vous pose aujourd'hui ; vous étiez au courant  
458 de ces développements ?
- 459 MRS BHUJOHORY: Comme je vous dis, il devrait y avoir eu un morcellement qui a  
460 techniquement ça a dû être au morcellement board
- 461 MR J DAVID : Voila
- 462 MRS BHUJOHORY: Et on peut retracer chez nous
- 463 MR J DAVID : Voila. Vous nous rendriez énormément service à la commission surtout si on  
464 pourrait avoir les minutes de tout ça parce que comme je vous dis ce terrain qui a été vendu à  
465 plusieurs personnes et que si le District Council n'est pas au courant, il y a quelque chose  
466 d'extrêmement grave
- 467 MRS BHUJOHORY: Laissez moi vous interrompre Mr David, le problème ce qu'on a comme je  
468 vous dis quand on a plusieurs lots, ça va au morcellement board.
- 469 Lorsque la personne a son morcellement permit, il commence à vendre
- 470 MR J DAVID : Voila
- 471 MRS BHUJOHORY: Il n'y a rien à faire avec nous là
- 472 MR J DAVID : Oui
- 473 MRS BHUJOHORY: Enfin je vous suggère de convoquer le morcellement board

474 MR J DAVID : Très bien merci, on suivra bien votre conseil, c'est très judicieux, d'ailleurs nous  
475 nous voulons passer par l'étape et de savoir qui donne le feu vert

476 MRS BHUJOHORY: Oui

477 MR J DAVID : Du moment que vous mettez le contact et que la voiture commence à rouler,  
478 nous voulons savoir qui est le chauffeur qui guide par la suite d'où votre présence madame.  
479 Donc vous nous avez beaucoup éclairés et je retourne la parole au chairperson.

480 DR TEELock: Je rejoins Mr David pour les renseignements très précieux. Donc vous nous  
481 confirmez qu'une fois que ça va au morcellement board, ce n'est plus dans les mains du District  
482 Council ?

483 MRS BHUJOHORY: Non, non, ce n'est plus

484 DR TEELock: Donc malgré le fait que vous géré toute cette région, vous n'avez aucun contrôle  
485 sur ce qui se passe après...

486 MRS BHUJOHORY: C'est le morcellement board qui décide

487 DR TEELock: O.k. Dr Veerapen va vous demander quelques questions

488 MRS BHUJOHORY: Oui

489 DR VEERAPEN: Je reprends la ligne de questions que la chairperson Dr Teelock a initié. Vous  
490 savez vous avez un Permit and Development Committee. C'est un comité ; est-ce que le comité  
491 peut se substituer au District Council ? Est-ce que le comité par définition, n'importe quel comité  
492 n'importe quelle instance ne doit pas faire soumettre un rapport avec ces recommandations  
493 à l'instance suprême entre guillemet qui doit ensuite donner son aval ou bien refuser ou quoi que  
494 ce soit ?

495 MRS BHUJOHORY: Comme je vous dis avant c'était le Works and Planning Committee, c'était  
496 les conseillers qui décidaient hein et depuis 2006 on a le Permit and Business Monitoring  
497 Committee qui est normalement chaired by the Chief Executive.

- 498 Et il peut nommer quelqu'un pour le représenter et puis on a ce sont les officiers, ce sont les  
499 officiers qui travaillent chez nous ça veut dire ce ne sont pas des politiciens ou autre qui prennent  
500 des décisions, ce sont les officiers de chez nous.
- 501 DR VEERAPEN: Si je comprends bien donc à l'époque ce sont les conseillers donc qui ont  
502 avalisés le rapport ?
- 503 MRS BHUJOHORY: Oui
- 504 DR VEERAPEN: C'était en 19... mais quand le District Council se réuni et à quelle intervalle ?
- 505 MRS BHUJOHORY: Chaque mois
- 506 DR VEERAPEN: Chaque mois ?
- 507 MRS BHUJOHORY: Oui
- 508 DR VEERAPEN: Parce que si c'est le 3 Novembre donc ça devrait être avalisé en Novembre ou  
509 Décembre ?
- 510 MRS BHUJOHORY: Oui
- 511 DR VEERAPEN: O.k. Merci
- 512 DR TEELock: O.k. Merci. Une petite chose, je reviens sur ce truc de relationship entre vous et  
513 morcellement, quand ils font des morcellements il y a tous les permis de l'électricité, drainage  
514 tout ça ; tout ça ne passe pas par vous pour donner les permis, pour installer les pylônes  
515 électriques et tout ?
- 516 MRS BHUJOHORY: Normalement ils vont au morcellement, ils soumettent une application au  
517 morcellement board et normalement ils nous demandent our views. Nous c'est normal ils doivent  
518 provide electricity, électricité, l'eau, l'infrastructure, chemin, des drains, ça c'est générale, c'est  
519 tout.
- 520 DR TEELock: Mais quand ils vous ont demandés vos views sur ce développement ?
- 521 MRS BHUJOHORY: Ça je veux aller voir là

522 DR TEELock: Vous aviez dû voir que vous aviez refusé le permis avant, non ?

523 MRS BHUJOHORY: Certainement

524 DR TEELock: O.k. Vous allez nous faire savoir?

525 MRS BHUJOHORY: Je le ferais

526 DR TEELock: Merci beaucoup madame

527 MRS BHUJOHORY: Ok

TJC/H/Koo Yuk Cheong H/200411/Mf  
Original Version

- 1 DR TEELock: On va vous faire prêter serment
- 2 THE SECRETARY : Vous pouvez vous mettre debout, vous pouvez lever la main droite et  
3 affirmez que vous allez dire la vérité et rien que la vérité pendant la déposition
- 4 MRS KOO YUK CHEONG : Je vais dire la vérité et rien que la vérité pendant la déposition
- 5 THE SECRETARY : Merci, identifiez-vous devant la commission
- 6 MRS KOO YUK CHEONG : Je suis Har Man Yung Koo Yuk Cheong, Deputy Registrar  
7 General au Conservateur des Hypothèques
- 8 THE SECRETARY : Merci bien
- 9 DR TEELock: Merci madame. Vous voulez parler anglais, français, créole ; quelle langue ?
- 10 MRS KOO YUK CHEONG : N'importe
- 11 DR TEELock: On va faire l'anglais potiche en ce cas là et donc ça ne va pas prendre  
12 longtemps. On voulait simplement certifier certains documents que vous nous avez remis mais  
13 aussi avant ça on voulait simplement si vous pouvez nous donner une idée de comment  
14 fonctionne votre bureau ?
- 15 MRS KOO YUK CHEONG : D'accord. Bon le document est présenté à la caisse premièrement à  
16 la taxe... premièrement le Notaire dépose les actes à la taxe pour être taxé. Si tout est o.k. on fait  
17 la taxe et puis les clercs de notaire en principe qui viennent prendre les documents pour passer à  
18 la caisse et puis après la caisse ça va à la présentation. Je parle des documents qui sont transcrits.  
19 Les documents vont à la section présentation là où on donne les numéros, on passe les  
20 documents d'après l'ordre du dépôt et puis on donne les numéros et puis l'original...
- 21 DR TEELock: Just relax we are not a court of law here so just relax
- 22 MRS KOO YUK CHEONG : Non, non, après les numéros qu'on a attribué l'officier prend  
23 l'original, l'acte où le notaire a signé on met d'un côté et puis les feuilles de transcription on met  
24 d'un autre côté qu'on remet au Binding Section pour être relié. Et puis le Registration Officer  
25 prend les actes notariés pour passer dans le Répertoire. Auparavant c'était fait dans le livre  
26 manuellement mais maintenant on fait...on entre les données dans les ordinateurs.

27 DR TEELOCK: O.k. il y a certain enfin comme vous savez il y a eu beaucoup de plaintes à  
28 la commission concernant ce fameux registre où on fait les entrées manuellement

29 MRS KOO YUK CHEONG : On est au courant

30 DR TEELOCK: Et on voulait que vous nous donnez une idée comment ça se fait qu'il y a autant  
31 de...on voit qu'il y a des gens qui ont mit des ratures qui ont scrubbe là-dessus et on voulait  
32 savoir comment ça peut se faire qu'une personne peut entrer ou même je ne sais pas si ce sont  
33 des officiers qui le font qui déchirent des pages, on a eu beaucoup de plaintes là-dessus.  
34 Donc vous pouvez me dire un peu comment ça se fait qu'il y a pu avoir tant de manipulations de  
35 ce document aussi important ?

36 MRS KOO YUK CHEONG : Parce que le Search Room est opened to the public, ça veut dire on  
37 paye un droit de recherche et les gens viennent faire des recherches.

38 DR TEELOCK: Il n'y a pas de vérification du comportement des gens qui viennent dans votre  
39 bureau pour voir ces documents ?

40 MRS KOO YUK CHEONG : Mais non les officiers sont en train de travailler, ils sont libres de  
41 vérifier les registres

42 DR TEELOCK: Donc nous avons un document en particulier que Mr David va vous montrer et  
43 je crois que vous avez une copie ?

44 MRS KOO YUK CHEONG : Oui

45 DR TEELOCK: Vous allez voir qu'il a des traits qui ont été fait dans le document et si vous  
46 pouvez nous donner une explication ? Vous avez l'original avec vous ?

47 MRS KOO YUK CHEONG : Une copie certifiée, l'original est au bureau

48 DR TEELOCK: Vous pouvez expliquer comment ça se fait, il y a un nom par exemple Lousteau  
49 qui est quelqu'un qui date du 18<sup>ème</sup> et comment ça se fait que son nom apparaît ?

50 MRS KOO YUK CHEONG : Parce que là les entrées je ne sais pas à quelque moment, ça a été  
51 fait après l'année 78, la date de la saisie est datée du 1825, 20 ou 25 mais l'acte de dépôt est daté

52 de l'année 1978, ça veut dire il y a quelqu'un je ne sais pas je ne peux pas confirmer ni infirmer  
53 qui a mit ça dedans mais ce n'est pas...

54 DR TEELock: Ce n'est pas votre bureau ?

55 MRS KOO YUK CHEONG : Non

56 DR TEELock: Donc c'est faux en principe ?

57 MRS KOO YUK CHEONG : En principe c'est faux

58 DR TEELock: Et aussi vous allez voir dans le même document un terrain de 490 arpents ?

59 MRS KOO YUK CHEONG : Oui

60 DR TEELock: Vendu pour Rs 100,000, c'est celui là Pierre Speville

61 MRS KOO YUK CHEONG : On était en train de voir pour Soonee là, Soonee Choolun

62 DR TEELock: Oui, c'est vendu à Choolun pour Rs 100,000 – 490 arpents

63 MRS KOO YUK CHEONG : C'est le volume 1353 que vous êtes en train d'en parler là ?

64 DR TEELock: Oui, est-ce que vous croyez que c'est quelque chose qui est faux ? C'est un de  
65 vos officiers qui a fait cette inscription ?

66 MRS KOO YUK CHEONG : Parce que l'entrée comme je viens de vous dire, on travaille avec  
67 l'original, la transcription on envoie directement à la section du relieur pour être relié en volume.

68 DR TEELock: Mais ce que je vous demande c'est est-ce que vous êtes sûr ce qui a été inscrit là  
69 ça vient de votre bureau ce n'est pas n'importe qui peut venir écrire...

70 MRS KOO YUK CHEONG : 1353, je peux confirmer que c'est un officier de notre bureau

71 DR TEELock: 1353, vous êtes sûr que c'est un officier de votre bureau qui a fait ça ?

72 MRS KOO YUK CHEONG : Oui mais par contre pour saisie 2946, non

73 DR TEELock: 2946 vous pensez que ça c'est faux ?

→

- 74 MRS KOO YUK CHEONG : 2946 c'est faux parce que la saisie est datée du 1821 par contre...
- 75 DR TEELock: 1977 qui est impossible ?
- 76 MRS KOO YUK CHEONG : C'est impossible
- 77 DR TEELock: Je vais passer la parole à Mr David
- 78 MR J DAVID : Madame, le fait que nous ayons un tel papier ça rend légal ?
- 79 MRS KOO YUK CHEONG : Oui
- 80 MR J DAVID : Quelle est la valeur d'un tel papier pour vous ? Disons je viens demander ma  
81 case hypothécaire, ça devient un papier extrêmement important ça ?
- 82 MRS KOO YUK CHEONG : Oui
- 83 MR J DAVID : Bon à partir de là si jamais il y a une manipulation, toute cette manipulation peut  
84 être utilisée par la suite pour la vente d'un terrain, n'est-ce pas ?
- 85 MRS KOO YUK CHEONG : Je pense que si
- 86 MR J DAVID : Donc de ce fait quelque chose d'illégal peut devenir très légale à partir d'un  
87 casier hypothécaire
- 88 DR TEELock: Ce qu'on a constaté dans les deux Speville et Choolun, c'est la même écriture  
89 qui a été...
- 90 MRS KOO YUK CHEONG : Pour la saisie ?
- 91 MR J DAVID : Pour la saisie oui effectivement
- 92 DR TEELock: C'est même écriture
- 93 MR J DAVID : même écriture
- 94 DR TEELock: Donc c'est une personne en particulier qui a manipulé le document ?
- 95 MRS KOO YUK CHEONG : Oui ce n'est pas un officier de...

- 96 MR J DAVID : Est-ce que chaque officier n'appose pas sa signature lorsqu'ils font des entrées  
97 dans les livres ?
- 98 MRS KOO YUK CHEONG : Dans répertoire, non par contre dans l'acte notarié on met leurs  
99 initiales
- 100 MR J DAVID : On met les initiales où on peut savoir qui l'a fait ?
- 101 MRS KOO YUK CHEONG : Qui l'a fait, oui
- 102 MR J DAVID : Donc la...
- 103 MRS KOO YUK CHEONG : Et puis d'après le nouveau système comme c'est informatisé on  
104 query on va savoir
- 105 MR J DAVID : On peut savoir...
- 106 MRS KOO YUK CHEONG : ...qui a fait l'entrée et qui a collationné parce que j'ai oublié de  
107 vous dire pour la procédure lorsqu'on a, un officier fait l'entrée et un senior officer qui  
108 collationne pour voir si l'entrée a été bien faite
- 109 MR J DAVID : De ce fait on a enlevé tout ce qui se rapporte à la saisie ?
- 110 MRS KOO YUK CHEONG : Oui
- 111 MR J DAVID : Sur le répertoire 587, donc les trois ont été rayés de même comme dans le  
112 répertoire 7 numéro 208, la saisie aussi de 1821 a été rayée ?
- 113 MRS KOO YUK CHEONG : Non là on n'a pas rayée, là...
- 114 MR J DAVID : Là on n'a pas rayée là ?
- 115 MRS KOO YUK CHEONG : En principe il faut enlever
- 116 MR J DAVID : Il faut aussi enlever ?
- 117 MRS KOO YUK CHEONG : Oui
- 118 MR J DAVID : Parce que si vous maintenez...

- 119 MRS KOO YUK CHEONG :... la logique de la date
- 120 MR J DAVID : Exactement, parce qu'à ce moment là donc...
- 121 DR TEELOCK: ...la même personne en 1821 et 1977 c'est la même écriture ?
- 122 MRS KOO YUK CHEONG : Non 1825
- 123 DR TEELOCK: Il y a la même écriture 1821 et 1977, la même personne qui a fait ces entrées ?
- 124 MRS KOO YUK CHEONG : 1977 non, 1977 c'est un officier de notre bureau, ça c'est la vente  
125 c'est l'entrée pour 1353 No 14
- 126 MR J DAVID : Ah oui 1353 No 14
- 127 DR TEELOCK: Regardez l'écriture madame
- 128 MRS KOO YUK CHEONG : C'est ça 2946 c'est le même numéro qui figure partout
- 129 MR J DAVID : Il faut faire une expertise pour comprendre. Une question que je souhaite vous  
130 poser encore, pourquoi est-ce que vous ne mettez pas des photocopies à la disposition du public  
131 plutôt et gardez les originaux et de ce fait il ne pourrait pas modifier ou manipuler les originaux ?
- 132 MRS KOO YUK CHEONG : Ça c'est le Code Civil mais là on est en train d'informatiser, enfin  
133 ça va venir très prochainement, on est en train de scanner tous les... all the documents are being  
134 scanned and put in our system
- 135 MR J DAVID : Oui mais vous savez que pendant des années donc il y aurait pu avoir de telles  
136 manipulation ?
- 137 MRS KOO YUK CHEONG : Ça c'est government policy on ne peut pas le faire par nos  
138 propres... par nous-mêmes
- 139 DR TEELOCK: Vous n'avez jamais reçu des plaintes venant de la part du public à l'effet  
140 que les pages ont été déchirées ou coupées ?
- 141 MRS KOO YUK CHEONG : Oui on a rapporté des cas à la police
- 142 DR TEELOCK: Et quelle a été la suivie ?

143 MRS KOO YUK CHEONG : Mais pour les anciens cas je crois qu'on a rien reçu de la police et  
144 ça il faudra confirmer je vais...

145 DR TEELock: Si c'est possible pour vous de confirmer ?

146 MRS KOO YUK CHEONG : De confirmer et de vous dire...

147 DR TEELock:... quelle a été le suivi par la police

148 MRS KOO YUK CHEONG : D'accord

149 DR TEELock: Dr Veerapen?

150 DR VEERAPEN: Moi je voudrais revenir sur votre système comment ça fonctionne, il est vrai  
151 maintenant avec le système informatique les choses évolues différemment mais le faite reste que  
152 jusqu'à maintenant on a pas mal de cas des gens qui ont fait des photocopies au Conservator of  
153 Mortgages et on a des problèmes. Je reprends ce que vous avez dit dans votre introduction parce  
154 que lorsqu'il y a un document pour être enregistré, vous vérifiez si c'est o.k., votre bureau vérifie  
155 si c'est o.k. ?

156 MRS KOO YUK CHEONG : Oui

157 DR VEERAPEN: Comment cela se fait cette vérification ? Pouvez-vous nous donner des détails  
158 additionnels ? Qu'est-ce que cela veut dire, la vérification qu'est-ce que cela veut dire c'est o.k. ?

159 MRS KOO YUK CHEONG : Disons pour une vente on regarde si tous les renseignements  
160 concernant les personnes qui comparaient dans l'acte on a donné, c'est d'après la section 36 du  
161 Registration Duty Act. Si c'est o.k. on accepte la vente, l'officier qui fait la taxe impose le  
162 montant qu'il y a à payer

163 DR VEERAPEN: D'accord et comment ça est réglé à ce moment là ?

164 MRS KOO YUK CHEONG : A ce moment là la procédure se déclenche

165 DR VEERAPEN: Maintenant vous dites que le Search Room is opened to the public, c'est  
166 toujours comme ça sa, ça a existé toujours ?

167 MRS KOO YUK CHEONG : Oui, oui

168 DR VEERAPEN: Ça a été toujours comme ça mais cela n'est jamais venu en tête au niveau de  
169 votre bureau qu'une fois c'est ouvert au public, il y a des risques de manipulation, il y a un  
170 risque de falsification, non cela ne s'est jamais venu ?

171 MRS KOO YUK CHEONG : Parce que ça a été toujours comme ça

172 DR VEERAPEN: Est-ce que vous n'aviez pas besoin d'un genre de risk management c'est-à-dire  
173 le risque existe et le fait qu'il y a un risque pareil, est-ce qu'il n'y a pas une politique de risk  
174 management au niveau de votre bureau pour vérifier les documents qui ont été pris par les  
175 membres du public ? Je ne dis pas que peut-être ça doit être fait pour chaque document mais en  
176 terme d'avoir un terme d'échantillon au moins de pouvoir voir ?

177 MRS KOO YUK CHEONG : Je vais proposer ça à mon supérieur

178 DR VEERAPEN: Oui

179 MRS KOO YUK CHEONG : Pour ce...

180 DR VEERAPEN: Parce que combien de temps ça va prendre pour vous d'informatiser tous vos  
181 systèmes là ?

182 *Officer accompanying Mrs Koo Yuk Cheong* : D'ici Juillet de cette année ci

183 DR VEERAPEN: Juillet ça fait quand même a peu près, Juin-Juillet, a peu près trois mois, le  
184 temps suffira pour encore falsifier des documents. Ce qu'on vous demandera si c'est possible  
185 d'avoir un système de risk management

186 MRS KOO YUK CHEONG : Oui c'est ça

187 DR VEERAPEN: Parce que en attendant juillet, ça risque d'être trop tard ; d'accord ?

188 MRS KOO YUK CHEONG : Oui

189 DR VEERAPEN: Et bon ceci dit c'est l'essentiel...

190 DR TEELock: Mr Jacques n'a pas d'autre question ?

191 MR J DAVID : Non, non

192 DR TEELOCK: Merci beaucoup madame

193 MRS KOO YUK CHEONG : Oui

194

(L R Luckhoo)

Contractor

Date: 18<sup>th</sup> May, 2011

TJC/H/Teeromallay P/200411/Mf  
Original Version

1 DR TEELock: O.K. We will start, this is the 4<sup>th</sup> session of the The Truth & Justice Commission  
2 for 2011. C'est la quatrième session des auditions du Truth & Justice Commission de 2011. I  
3 welcome you ladies and gentlemen. Mo accueil ou mesdames et messieurs et nous avons le cas  
4 de César-Choolun aujourd'hui et le premier témoin c'est le directeur de la banque de  
5 développement de Maurice. Welcome gentlemen. The secretary will ask you to identify yourself  
6 and to swear to tell the truth.

7 THE SECRETARY : S'il vous plaît vous pouvez vous mettre debout pour jurer

8 MR P TEEROMALLAY : Oui

9 THE SECRETARY : Si vous pouvez lever la main droite et affirmez que vous allez parler la  
10 vérité et rien que la vérité pendant la déposition

11 MR P TEEROMALLAY : Oui, Parmeseeven Teeromallay de la banque de développement, je  
12 jure que je vais dire la vérité et rien que la vérité

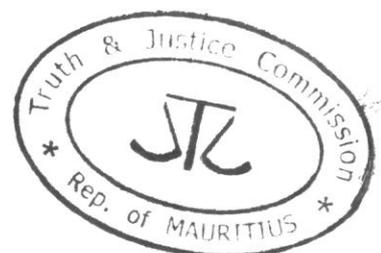

13 THE SECRETARY : Merci bien, vous pouvez vous asseoir

14 DR TEELock: O.k. thank you, I think you are aware why you have been asked to come and  
15 depone today at the commission. I will pass on to Mr David who has been following this case  
16 and to submit the documents and to seek clarifications from you. Mr David?

17 MR J DAVID : Thank you. Bonjour messieurs, on peut parler français, anglais ou soit créole

18 MR P TEEROMALLAY : Pas de problème

19 MR J DAVID : Dans une langue ou tout le monde arrive à se comprendre. Donc écoutez je vais  
20 venir rapidement sur le cas qui nous intéresse du fait qu'il a été porté à votre connaissance que ce  
21 dossier concernant un prêt donc à la compagnie Qay Call Center and Outsourcing et ainsi de  
22 suite et que Mme Choolun a été si je comprends bien une garante. Donc nous la commission  
23 souhaite surtout savoir les procédures de la banque quand à ce prêt, qu'est-ce que la banque a fait  
24 et comme vérification si la banque est satisfaite donc avant d'octroyer ce prêt et surtout  
25 concernant la garante. Est-ce qu'elle est viable ? Est-ce qu'elle est fiable ? Donc c'est ça que  
26 nous aurions souhaités vous entendre.

27 MR P TEEROMALLAY : Donc ce que je vais faire c'est que je vais faire un résumé de all the  
28 steps that have been followed

29 MR J DAVID : Yes

30 MR P TEEROMALLAY : Donc en aout 2008, la compagnie a fait une demande d'emprunt de  
31 Rs 50 million pour set up a call center, an outsourcing unit at Candos. Les promoteurs étaient  
32 Mme Bibi Nushreen Fokeerbaccus et Mme Sonee Choolun. L'emprunt a été approuvé par notre  
33 board le 31 Octobre 2008 et le loan agreement a été signé le 12 Décembre 2008 et dûment  
34 enregistré à l'office du Registrar.

35 La sécurité qu'on avait prit c'était en premier un first rent fixed charge sur une portion de terrain  
36 de 62 ¼ arpents appartenant à Mme Choolun et se trouvant à Cotteau Raffin à Rivière Noire.  
37 Ensuite il y avait une sûreté flottante sur les biens de la compagnie et troisièmement une sûreté  
38 flottante sur les biens des promoteurs c'est-à-dire Mme Fokeerbaccus et Mme Choolun.

39 MR J DAVID : O.k. sur les deux

40 MR P TEEROMALLAY : Avant le décaissement le board avait reçu ce qu'on appelle des  
41 disturbing information qui a été passé au directeur, à ce moment-là Mr Chooramun, à l'effet qu'il  
42 y a des craintes sur le terrain qu'on a donné à la banque comme garantie. On avait fait savoir  
43 qu'il se peut que ce terrain n'existe pas en tant que telle et que aussi le contrat qu'on a eu comme  
44 titre de propriété pourrait être fake.

45 Alors suite à ça, le directeur a ordonné à ce que les promoteurs soumettent d'autres documents,  
46 fresh documents originaux, surtout un fresh Land Surveyor's report, un fresh valuation report et  
47 aussi que la banque fasse des nouveaux searches au bureau de l'enregistrement.

48 MR J DAVID : O.k.

49 MR P TEEROMALLAY : En plus de ça on a fait des enquiries auprès des Land Surveyors qui  
50 d'après nous étaient au courant des problèmes qui pourraient exister concernant ce terrain là et le  
51 titre de propriété.

52 MR J DAVID : Est-ce qu'il y a eu un nom d'un Land Surveyor qui était mentionné ? Vous  
53 connaissez qui avait soumit les documents en premier ?

54 MR P TEEROMALLAY : Non, c'est-à-dire là je connais, je connais les documents qui ont été  
55 soumis par les promoteurs et je peux vous dire

56 MR J DAVID : Quel est le nom du Land Surveyor ?

57 MR P TEEROMALLAY : Bon lorsqu'on a redemandé le original surveyor's report, c'était  
58 Ravindranath Bhurtun

59 MR J DAVID : Bhurtun ?

60 MR P TEEROMALLAY : qui a soumis ça pour le client hein, au nom du client

61 MR J DAVID : Non le premier, le premier ? dans le premier land surveying effectué ?

62 DR TEELock: The original survey ?

63 MR J DAVID : The original one before you discovered that it was fake? I should like to know  
64 the name of the Land Surveyor, please. There should be a plan attached to the first request, a site  
65 plan. We just wanted to verify the name of the Land Surveyor

66 DR TEELock: At the time of submission

67 MR J DAVID : Yes you could continue, have you seen it? There must be a signature of the Land  
68 Surveyor with the site plan

69 MR P TEEROMALLAY : Là je vois qu'il y a un document, le valuation report qui a été fait en  
70 2008 par Allan Tinkler et Ramlackan company Ltd

71 MR J DAVID : Oui

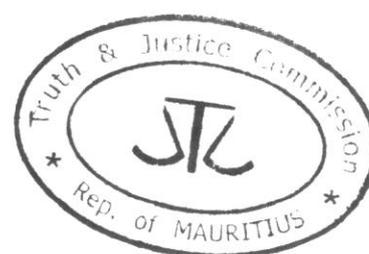

72 MR P TEEROMALLAY : Bon ça c'est le valuation report, il y a aussi le surveyor's report

73 MR J DAVID : But I wish to know the name of the Land Surveyor who submit the site plan, o.k.  
74 In the meantime...

75 DR TEELock: ...we continue

76 MR J DAVID : We continue. Now what I should like to know, what were the disturbing factors  
77 that kept you from...

g

- 78 MR P TEEROMALLAY : Certains membres du board, certains membres de notre board étaient  
79 je ne sais pas au courant ou bien avaient eus des renseignements de faire attention qu'il se peut  
80 que le terrain n'existe pas ou bien que le contrat, il y avait quelque chose de...
- 81 MR J DAVID :...de pas clair ?
- 82 MR P TEEROMALLAY : De pas clair dans le contrat, o.k. et c'est suite à ça qu'on a fait et  
83 qu'on avait demandé des nouveaux documents que le promoteur a soumis, c'est ça que je vous  
84 dis là
- 85 MR J DAVID : Oui
- 86 MR P TEEROMALLAY : Les nouveaux documents c'était un nouveau Sworn Land Surveyor's  
87 report effectué par Ravindranath Bhurtun, un nouveau valuation report fait par Mr Saddul
- 88 MR J DAVID : Saddul ?
- 89 MR P TEEROMALLAY : De la compagnie Property & Assets Valuation Limited. Voilà je vous  
90 dis il y avait un plan qui a été effectué par Ng Tong Ng Wah
- 91 MR J DAVID : So with this plan, vous n'étiez pas satisfait du tout parce que le Land Surveyor  
92 doit donner un rapport ?
- 93 MR P TEEROMALLAY : Oui
- 94 MR J DAVID : Accompagnant le terrain ?
- 95 MR P TEEROMALLAY : Oui
- 96 MR J DAVID : Donc vous ça a été...
- 97 MR P TEEROMALLAY : On a fait des recherches au niveau de l'enregistrement et à ce  
98 moment-là tout paraît correct, les documents étaient dûment enregistrés, c'était dans le livre du  
99 Conservateur et à ce moment-là ça paraît correct
- 100 MR J DAVID : Oui ?
- 101 MR P TEEROMALLAY : Oui

102 MR J DAVID : Et après par la suite ça n'a pas paru correct ?

103 MR P TEEROMALLAY : Oui lorsqu'on a eu ces informations là, bon aussi Mme Choolun m'a  
104 soumit un affidavit pour jurer qu'elle est le propriétaire du terrain et qu'elle donnait son  
105 consentement pour donner ce terrain là en garantie

106 MR J DAVID : Oui

107 MR P TEEROMALLAY : O.k. il y avait aussi Me Bertrand Maigrot, ça c'était un undated  
108 search report qui avait soumit un document pour certifier ownership du propriété. Maintenant de  
109 l'autre côté nous, nous avons des verification officers qui travaillent pour la banque, pour le  
110 compte de la banque. Un de nos senior verification officer a été à la recherche des informations.  
111 O.k. je peux vous dire from a discreet investigation amongst fellow search officers, il est tombé  
112 sur un document à ce moment là un site plan qui disait que soit le terrain ou bien une partie du  
113 terrain appartient à d'autre personne.

114 MR J DAVID : Voila

115 MR P TEEROMALLAY : O.k. c'est ça le disturbing information peut-être que certains membres  
116 du board avaient mais que nous mais nous nous avons pu avoir, je ne peux pas vous dire certifier  
117 mais on a pu avoir

118 MR J DAVID : Quelle est la personne qui à part, allons dire votre researcher de la banque, vous  
119 avez d'autre source d'information à l'effet qu'il pourrait y avoir des défauts sur ce terrain ?

120 MR P TEEROMALLAY : Non là je ne pourrais vous dire, seulement je sais qu'on a eu une  
121 copie du document et que à partir de là on a fait d'autres recherches, on a fait tirer des  
122 documents, les title deeds originaux

123 MR J DAVID : Originaux

124 MR P TEEROMALLAY : certifiés par le Conservateur

125 MR J DAVID : conservateur, o.k.

126 MR P TEEROMALLAY : Et à partir de là, nous avons ces documents là maintenant qui sont en  
127 notre possession en possession de la banque qui dit que ce terrain là il y a un problème et que en  
128 partie du terrain ou bien tout le terrain ownership is being claimed by other companies

129 MR J DAVID : Oui, vous rendriez service à la commission en soumettant copies de ces  
130 documents ?

131 MR P TEEROMALLAY : Oui bien sûr si c'est demandé on va avoir l'aval du management et on  
132 va certifier

133 MR J DAVID : On est en train de chercher la vérité sur toutes ces histoires, si vous avez une  
134 partie de ces documents qui pourrait aider la commission, nous vous serions très redevables

135 MR P TEEROMALLAY : Oui

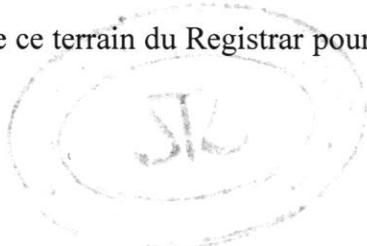

136 ? (*a person from DBM sitting near deponent*) : Nous sommes prêts à soumettre tous les  
137 documents parce que vous aviez pu voir il y a deux dossiers remplis avec les documents et nous  
138 sommes au courant de quels sont les documents spécifiques que vous auriez besoin mais nous  
139 sommes prêts à donner une fois que nous avons la requête officielle nous avons l'approval de  
140 notre board et nous allons certifier chaque copie qu'on va faire et soumettre à la commission.

141 MR J DAVID : Oui, vous comprenez que tous qui auraient pu être disturbing pour vous l'est  
142 aussi pour la commission, d'où donc notre appel d'une part pour que vous veniez nous dire ce  
143 qui s'est passé et comme ça on va tirer toute cette histoire au clair. Ben nous vous remercions  
144 d'avance et donc nous allons faire la demande par la suite. Oui, continuez s'il vous plait.

145 MR P TEEROMALLAY : Donc suite à ça, Mr Bahorun notre senior verification officer a été à la  
146 recherche d'autre information et nous sommes tombés sur deux titres de propriété, l'un  
147 appartenant au Petit Morne Brabant, compagnie de Petit Morne Brabant, là je peux vous donner  
148 le volume number, c'est le TV 1702 No 82 et une autre société du Morne Brabant, le T.V. No  
149 c'est 577 No. 48.

150 MR J DAVID : O.k.

151 MR P TEEROMALLAY : On a fait une demande à ce moment-là pour avoir des certified copies  
152 de ce terrain du Registrar pour voir les titres de propriété et à partir de là on était convaincu qu'il

153 y a un problème et qu'il ne fallait pas aller vu la somme conséquente de Rs 50 million pour  
154 l'emprunt, il ne fallait pas aller de l'avant avec ce terrain là. On a communiqué ces détails là aux  
155 promoteurs pour leur dire o.k. to find out alternative security.

156 MR J DAVID : Très bien, donc écoutez messieurs merci pour votre explication sauf je  
157 reviendrais sur un petit détail. Bon vous n'avez pas été de l'avant avec l'emprunt ?

158 MR P TEEROMALLAY : Oui

159 MR J DAVID : Mais il y a toujours sur la case hypothécaire donc de Mme Choolun, il y a une  
160 petite remarque qu'on voit encore là, il y a une inscription déjà which has not been erased,  
161 l'inscription de Rs 50 million, donc si on peut savoir comment est-ce que ça a pu atterir, cette  
162 inscription ?

163 MR P TEEROMALLAY : Comme je vous ai dis au commencement avant de découvrir les  
164 disturbing information, le document a été dument signé et enregistré. Après avoir communiqué  
165 avec le promoteur, je peux vous dire que le main promoteur ce n'est pas Mme Choolun, on a  
166 communiqué à Mme Fokeerbaccus en écrit, par écrit et on lui a dit o.k. la banque est d'accord  
167 pour enlever ces charges à condition que vous payez les frais de l'enregistrement qui montent à  
168 Rs 304,500

169 MR J DAVID : Bon il faut qu'elle paye ?

170 MR P TEEROMALLAY : ça c'est au frais du client

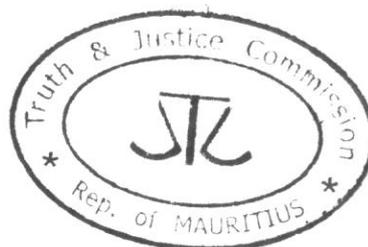

171 MR J DAVID : O.k.

172 MR P TEEROMALLAY : Et jusqu'à maintenant le paiement n'a pas été fait et c'est pourquoi la  
173 banque n'a pas encore enlevé ces charges là. On est prêt à enlever du moment qu'on a le  
174 paiement.

175 MR J DAVID : Qu'on n'a pas payé ?

176 MR P TEEROMALLAY : Non

177 MR J DAVID : O.k. oui bon écoutez voila les explications sont là donc nous voulions surtout  
178 savoir pourquoi this has not been erased. Donc moi je vous remercie, oui

179 ? (a person from DBM sitting near deponent) : Je pourrais confirmer dès que nous avons les Rs  
180 300,000 et quelques et si nous avons ça aujourd'hui, ça va être erased dans les jours...dans  
181 quelques jours

182 MR J DAVID : Et si la banque ne reçoit pas cet argent là, ça va rester...

183 ? (a person from DBM sitting near deponent) : ça va rester jusqu'à ce que on va voir quel sera à  
184 travers les avis légaux que nous avons quelle sera la marche à suivre, c'est toujours là une dette  
185 pour le moment

186 MR J DAVID : C'est au détriment de qui ? Allons dire c'est Rs 50 million qui figure toujours à  
187 l'inscription, aussi longtemps que la dame ne paye pas c'est elle qui est toujours endetté ?

188 ? (a person from DBM sitting near deponent) : C'est le client qui est supposé...

189 MR J DAVID : La compagnie ?

190 ? (a person from DBM sitting near deponent) : La compagnie, le client de la banque, ce n'est pas  
191 encore client, il était le client potentiel pour le moment qui est supposé encourir les frais légaux.  
192 Alors aussi longtemps que ce n'est pas payé, la radiation n'est pas faite

193 MR J DAVID : Il ne passe pas, d'accord. Dites moi, une dernière question, il y a eu un  
194 engagement, vous dites que par la suite il y a eu Mr Bhurtun qui a fait un autre travail, il y a  
195 d'autre valuation qui ont été effectués ; est-ce que ça a été de l'avant ce prêt là ?

196 MR P TEEROMALLAY : Non, non, c'est-à-dire qu'on a reçu des documents, on a demandé aux  
197 promoteurs de nous soumettre des documents et c'est qui a été fait mais par la suite aux  
198 recherches qu'on a fait, on a vu malgré tous ces documents là on n'était pas satisfait de par le fait  
199 qu'il y a d'autres documents qui tente à certifier que il y a d'autres personnes qui claim owners of  
200 the property.

201 MR J DAVID : Oui est-ce que vous êtes satisfait avec le rapport de Bhurtun, 2<sup>ème</sup> Land  
202 Surveyor ?

203 MR P TEEROMALLAY : Je ne pourrais vous dire parce que lui il n'a fait que baser sur le titre  
204 de propriété de Mme Choolun, le titre de propriété est...

205 MR J DAVID : ...déjà il y a des doutes ?

206 MR P TEEROMALLAY : Oui

207 MR J DAVID : Donc dans les deux cas la banque n'est pas satisfaite ?

208 MR P TEEROMALLAY : Non

209 MR J DAVID : O.k.

210 ? (*a person from DBM sitting near deponent*) : Je pourrais ajouter que c'est un peu une partie du  
211 risk management que la banque exerce régulièrement. Alors là nous avons vu il y a un cas où il y  
212 a certain risque. Alors exposant Rs 50 million pour...et en présence de ces risques là, on a  
213 préféré et c'était officiellement communiqué au demandeur d'emprunt que nous n'allons pas allé  
214 de l'avant avec ce garantie, il faut qu'il vienne avec des garanties alternatives bien sûr avec la  
215 satisfaction de la banque et entretemps nous allons retenir. Alors ils sont d'accord, ils étaient  
216 d'accord à venir avec d'autres...

217 MR J DAVID : garanties

218 ? (*a person from DBM sitting near deponent*) :...acceptable à la banque mais jusqu'à l'heure ça  
219 n'a pas été fait et le décaissement n'a jamais été fait par la banque et ce que nous pouvons dire.

220 MR J DAVID : Très bien merci. Je retourne la parole à la chairperson, merci beaucoup.

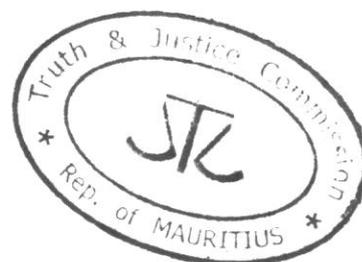

221 DR TEELock: Deux petites questions ; I wanted just to confirm what you said it was Mr  
222 Bertrand Maigrot who certified the ownership of Mrs Choolun's property?

223 MR P TEEROMALLAY : Oui parmi les documents soumis par Mme Fokeerbaccus, il y avait un  
224 document qui a été rédigé par l'étude de Bertrand Maigrot qui dit que...le notaire certifie que le  
225 terrain appartient à Mme Choolun

226 DR TEELock: C'est possible d'avoir une copie de cela ?

227 MR P TEEROMALLAY : Oui, on va prendre note de ça

228 DR TEELock: Et deuxième chose, le main applicant for this loan was madame, ce n'était pas  
229 Mme Choolun c'était Fokeerbaccus ?

- 230 MR P TEEROMALLAY : En fait c'est une compagnie qui a fait la demande et d'après nos  
231 données, Mme Fokeerbaccus is the main promotor
- 232 DR TEELock: Main ?
- 233 MR P TEEROMALLAY : Avec 51% des actions
- 234 DR TEELock: des actions and so there are only two persons involved in this company?
- 235 MR P TEEROMALLAY : Yes
- 236 DR TEELock: D'accord, thank you
- 237 MR P TEEROMALLAY : Je peux ajouter que Mme Choolun était représenté par son neveu  
238 Sanjay Choolun, ce n'était pas Mme Choolun qui faisait le va et vient à la banque. On a demandé  
239 à Mme Choolun de venir à la banque qu'une seule fois c'est là à la requête de notre legal adviser  
240 qui avait dit o.k. vu l'âge de Mme Choolun, c'était bon pour la banque de faire Mme Choolun  
241 venir à la banque pour lui parler directement et d'avoir son consentement directement avant  
242 d'aller de l'avant. C'était Mr Sanjay Choolun qui représentait Mme Choolun.
- 243 DR TEELock: Et vous avez rencontré Mme Choolun vous-même ?
- 244 MR P TEEROMALLAY : Oui il y a moi, il y a le directeur à l'époque Mr Chooramun, oui
- 245 DR TEELock: O.k. merci, Dr Veerapen?
- 246 DR VEERAPEN: Just some clarifications; could you give us the name of the company, Mme  
247 Fokeerbaccus et Sonee Choolun?
- 248 MR P TEEROMALLAY : La compagnie c'est Qay Call Center & Outsourcing Services Ltd
- 249 DR VEERAPEN: Qay Call Centre and?
- 250 MR P TEEROMALLAY : And Outsourcing Services Ltd
- 251 DR VEERAPEN: O.k. Ensuite vous avez fait mention d'un new Land Surveyor's report de Mr  
252 Bhurtun ?
- 253 MR P TEEROMALLAY : Oui

254 DR VEERAPEN: C'est quel Bhurtun ça ?

255 MR P TEEROMALLAY : C'est Ravindranath Bhurtun

256 DR VEERAPEN: Et les valuator, les nouveaux valuator report ?

257 MR P TEEROMALLAY : C'est Mr G Saddul c'était de la compagnie Property & Assets  
258 Valuation Ltd

259 DR VEERAPEN: O.k. Et Mr Ng Tong Ng Wah, qu'est-ce qu'il fait dedans lui ?

260 MR P TEEROMALLAY : C'est lui qui avait soumis le premier surveyor's report

261 DR VEERAPEN: O.k.

262 MR P TEEROMALLAY : Non, non, il y avait Mr Beehuspoteea et puis il y a un site plan je  
263 crois qui est certifié par Ng Tong Ng Wah, c'est Beehuspoteea le surveyor et le site plan certifié  
264 par Ng Tong Ng Wah

265 DR VEERAPEN: O.k. très bien, merci

266 DR TEELock: Thank you very much

267 ? (a person from DBM sitting near deponent) : Pour les documents on va travailler ensemble  
268 avec madame, oui, merci

269 DR VEERAPEN: Donc on va simplement envoyer une lettre officielle, n'est-ce pas c'est ça que  
270 vous demandez et on le fera d'accord.

Original Version

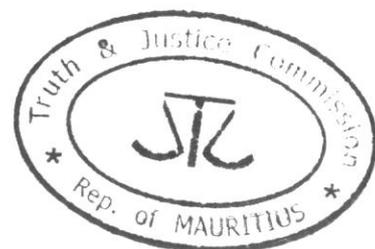

- 1 DR TEELOCK: Ou koné ki fer oune vine ici aujourd'hui ?
- 2 MRS Y A CESAR : Oui
- 3 DR TEELOCK: Donk nou pé guette ou cas et Mme Damory qui est la secrétaire pou fer ou prete  
4 serment et identifier ou même
- 5 MRS Y A CESAR : Oui
- 6 THE SECRETARY : Bonjour
- 7 MRS Y A CESAR : Bonjour
- 8 THE SECRETARY : Si ou ti capave mettre ou debout s'il vous plait ?
- 9 MRS Y A CESAR : Oui
- 10 THE SECRETARY : Si ou ti capave leve ou la main droite et affirmez ki ou pou koze la vérité et  
11 rien que la vérité
- 12 MRS Y A CESAR : La main la enflé la
- 13 THE SECRETARY : Ou bisin repeté ou bisin dire ki ou pou koze la vérité et rien que la vérité  
14 pendant la deposition
- 15 MRS Y A CESAR : Mo pou dire la vérité, rien que la vérité
- 16 THE SECRETARY : Merci kuma ou appeler?
- 17 MRS Y A CESAR : Marie Yolande Andrea Cesar
- 18 THE SECRETARY : Kot ou habiter ?
- 19 MRS Y A CESAR : Cité Sugar Planters, Pointe aux Sables
- 20 THE SECRETARY : Merci ou capave assize ou
- 21 DR TEELOCK: Donk ou koné ki fer noune fer ou vini aujourd'hui, nou pou pose ou aine deux  
22 kestions
- 23 MRS Y A CESAR : Oui

- 24 DR TEELOCK: Concernant terrain a Cotteau Raffin
- 25 MRS Y A CESAR : Oui
- 26 DR TEELOCK: Donk Mr David ki pou pose ou banne kestions
- 27 MRS Y A CESAR : Pardon ?
- 28 DR TEELOCK: Mr Jacques David ki commissaire Truth & Justice Commission li pou demande  
29 ou quelques kestions
- 30 MRS Y A CESAR : Oui koze un peu fort, aine tipé zoreille... pli fort
- 31 DR TEELOCK: Mr David ki commissaire Truth & Justice Commission li pou demande ou aine  
32 deux kestions
- 33 MRS Y A CESAR : Oui, oui
- 34 DR TEELOCK: O.k.
- 35 MR J DAVID : Merci, madame bonjour
- 36 MRS Y A CESAR : Bonjour
- 37 MR J DAVID : Ou tanne moi bien la ?
- 38 MRS Y A CESAR : Oui
- 39 MR J DAVID : Oui merci oune vini
- 40 MRS Y A CESAR : Pardon ?
- 41 MR J DAVID : Merci oune vine devant la commission et nou ti envie koné aina buku problème  
42 lors sa zafer terrain Cotteau Raffin la
- 43 MRS Y A CESAR : Ayo
- 44 MR J DAVID : Allez raconter dire moi aine ti coup d'abord ki grandere terrain sa ?
- 45 MRS Y A CESAR : 490 arpents

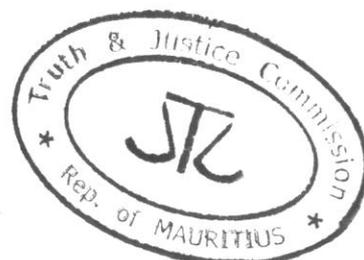

- 46 MR J DAVID : 490 o.k.
- 47 MRS Y A CESAR : Li kumens acote Cotteau Raffin
- 48 MR J DAVID : Oui
- 49 MRS Y A CESAR : Et sa termine balisage Morne plage
- 50 MR J DAVID : O.k. 490 arpents?
- 51 MRS Y A CESAR : Oui
- 52 MR J DAVID : Entierement d'accord, ou ou dire ki terrain la li ti pou ou banne grand dimun ?
- 53 MRS Y A CESAR : Pou Pierre Speville
- 54 MR J DAVID : Pierre Speville ?
- 55 MRS Y A CESAR : Mo arriere grand père
- 56 MR J DAVID : Kuma ou vine, raconte moi astere, kuma ou vine descendant Pierre Speville ou ?
- 57 MRS Y A CESAR : Et bien mo papa kine raconte moi Pierre Speville marier avec aine fille
- 58 Angelique, on ne sait pas si c'est Angelique Speville même
- 59 MR J DAVID : Oui
- 60 MRS Y A CESAR : Pas de surnom, il a une fille Armanda Speville. Armanda Speville fine
- 61 gagne aine jumelle, deux filles
- 62 MR J DAVID : O.k.
- 63 MRS Y A CESAR : Eugenie, ma grand-mère et Hermenie aine lot sœur
- 64 MR J DAVID : Houn, houn
- 65 MRS Y A CESAR : Eugenie Sevenne marier avec Phenelon Cesar, c'est mo grand père
- 66 MR J DAVID : Ou grand pere bon, dire moi aine coup astere kan oupé dire moi Armanda
- 67 Speville, Armanda Speville marier avec ki sane na ?

- 68 MRS Y A CESAR : Jean Numas Sevenne
- 69 MR J DAVID : O.k. parski sa nom Sevenne la important sa ?
- 70 MRS Y A CESAR : Oui
- 71 MR J DAVID : Ou koné ki fer li important ?
- 72 MRS Y A CESAR : Oui
- 73 MR J DAVID : Ki fer sa nom la li important?
- 74 MRS Y A CESAR : Parski la fille appelle marier Sevenne non
- 75 MR J DAVID : Non aine zafer important la. Dire moi aina oune mettre aine cas la cour ?
- 76 MRS Y A CESAR : Bien longtemps avec avocat Jaddoo
- 77 MR J DAVID : Oui ki fer sa?
- 78 MRS Y A CESAR : 11 ans li panne fer narien
- 79 MR J DAVID : Ki fer ou ti mettre aine case la cour ?
- 80 MRS Y A CESAR : Case la cour moi ?
- 81 MR J DAVID : Ki fer oui?
- 82 MRS Y A CESAR : Non sa aina aine Jaddoo avec so courtier kine fer sa pas moi
- 83 MR J DAVID : Jaddoo la c'est ki sa?
- 84 MRS Y A CESAR : Aine avocat
- 85 MR J DAVID : Aine avocat?
- 86 MRS Y A CESAR : Oui
- 87 MR J DAVID : Pas aine avoué ?
- 88 MRS Y A CESAR : Non

- 89 MR J DAVID : Aine avocat?
- 90 MRS Y A CESAR : Oui
- 91 MR J DAVID : Bé ki fer ti mettre case la cour dire moi aine coup ?
- 92 MRS Y A CESAR : Mo pas capave dire ou si pas ine poursuivre kikaine mo pas koné
- 93 MR J DAVID : Eski ou personnellement ou ti donne aine pouvoir a aine missier pou okupe sa
- 94 terrain la ?
- 95 MRS Y A CESAR : C'est sa dans la main Hosseney et avocat Jaddoo, ces deux là
- 96 MR J DAVID : Ou ou ti donne zot sa terrain 490 arpents la ?
- 97 MRS Y A CESAR : Pou occuper
- 98 MR J DAVID : Pou occuper?
- 99 MRS Y A CESAR : Oui
- 100 MR J DAVID : Eski ou pas ti donne sa aine missier ki appelle Mr Madhoo ?
- 101 MRS Y A CESAR : Avocat Madhoo
- 102 MR J DAVID : Avocat Madhoo?
- 103 MRS Y A CESAR : Sa premiere fois sa
- 104 MR J DAVID : Parski ou ti signe aine papier avec li sa ?
- 105 MRS Y A CESAR : Ti fer aine bordereau, ti dire moi fer aine bordereau...
- 106 MR J DAVID : Non, non, avant ti fer bordereau ou tine signe aine procuration ? Ou rappelle sa
- 107 papier la ? *(At this stage a document is shown to deponent)*
- 108 MRS Y A CESAR : C'est ça mo pas koné li dire moi bordereau
- 109 MR J DAVID : Allez, allez, d'accord
- 110 MRS Y A CESAR : Li pas dire moi procuration li

- 111 MR J DAVID : Allez oune signe aine papier avec Mr Madhoo ?
- 112 MRS Y A CESAR : Donne li droit pou envoye aine nommé Ramparsad Choolun lors sa terrain  
113 la alle guetter
- 114 MR J DAVID : Ah bon revinne doucement astere la; ou oune donne Mr Madhoo pouvoir ?
- 115 MRS Y A CESAR : Droit
- 116 MR J DAVID : Droit pou fer quoi ? Ki pouvoir li ti aina dans so la main ki oune donne li lors sa  
117 terrain la ? Ki oune dire li fer ou ? Ki ou ti dire li fer ?
- 118 MRS Y A CESAR : Bé sa kuma dir monne donne li sa travail la pou li fer
- 119 MR J DAVID : Han
- 120 MRS Y A CESAR : Parski mo pena l'argent mo pena narien
- 121 MR J DAVID : Ou dire li vende terrain la ?
- 122 MRS Y A CESAR : Pardon?
- 123 MR J DAVID : Ou ti dire li vende terrain la ?
- 124 MRS Y A CESAR : Non monne dire li fer demarse et puis pou vender
- 125 MR J DAVID : Voila
- 126 MRS Y A CESAR : Jamais li ti dire moi pé vender ziska li mort
- 127 MR J DAVID : Han
- 128 MRS Y A CESAR : Lere la line donne moi aine lot copie li dire moi prend sa ou va alle au  
129 devant avec sa, aine copie de 12 arpents, sa avec moi 12 arpents la
- 130 MR J DAVID : Ou aina sa papier la avec ou ?
- 131 MRS Y A CESAR : Non li pas avec moi la, li a la maison

- 132 MR J DAVID : A bein nou ti dire emmene papier madame. Bon eski sa papier la sa même 12  
133 arpents ?
- 134 MRS Y A CESAR : Oui
- 135 MR J DAVID : Cotteau Raffin?
- 136 MRS Y A CESAR : Oui
- 137 MR J DAVID : Ou rappelle kit fois li aine tiguine kume sa, papier la ?
- 138 MRS Y A CESAR : Pardon?
- 139 MR J DAVID : Li aine tiguine kume sa papier la ou koné ?
- 140 MRS Y A CESAR : Li même longueur chose aine copie
- 141 MR J DAVID : Aine copie?
- 142 MRS Y A CESAR : Oui
- 143 MR J DAVID : Ti aina aine dessin tout sa la lors la ?
- 144 MRS Y A CESAR : Aina so map
- 145 MR J DAVID : Aina so map?
- 146 MRS Y A CESAR : Map la mer sa même ki l'Ilot Bénitier, pas l'Ilot Bénitier sa nou ti appelle sa  
147 l'Ile aux Cocos
- 148 MR J DAVID : L'Ile aux Cocos ?
- 149 MRS Y A CESAR : Parski mo grand pere Pierre Speville fine plante 600 cocotiers lors la, alors  
150 ti aina tombe ti aina tout zot enterrer, Pierre Speville ine mort noyer avec aine gouverneur ler alle  
151 baigner. Alors ti enterre li la, alors aine musulman Habid si pas Hossenbaccus, Ramgoolam père  
152 dire li reste gardien là. Lere line reste gardien la, zot fine enleve tout, zot ine zete dans la mer li  
153 dire moi gardien la
- 154 MR J DAVID : Nepli aina cocos?

155 MRS Y A CESAR : Nepli aina narien lere la sa c'est pas une ile sa, li forme partie nou terrain  
156 490, alors letemps ti aina volcan, mo croire oune apprane a l'époque moi mo pas koné

157 MR J DAVID : Mo pas ti enkor la moi aussi

158 MRS Y A CESAR : Mo croire moi aussi et lere la li vine kuma dir, sa volcan la ine fer aine  
159 chemin dans la mer kuma aine lac, alors la mer sa allez allez li prend place et lere la ti aina aine  
160 coquille en dehors, ti ena aine pretre mo papa zot banne fami ti fer beni sa, lere la appelle sa Ilot  
161 Bénitier

162 MR J DAVID : Voila, a nous vine aine tiguine a l'essentiel...

163 MRS Y A CESAR : Oui mais li aine sel sa, la mo tanne dire Nando Bodha pé alle fer dimande  
164 location lors la si pas ki commerage mais pas pou ni gouvernement ni pou li sa

165 MR J DAVID : Ouai nou revinne aine ti coup a l'essentiel ; au depart ti ena 490 arpents ?

166 MRS Y A CESAR : arpents

167 MR J DAVID : Kumaniere Mr Madhoo dire ou ki ou aina zis 12 arpents rester ?

168 MRS Y A CESAR : 12 arpents la lere li arete fer sa travail la sa

169 MR J DAVID : Ouai, li li dire ou reste 12 arpents la ?

170 MRS Y A CESAR : Lere la li donne moi sa copie 12 arpents la alle lors la mo a gagne de tout

171 MR J DAVID : Très bien letemps reste 12 arpents oune fer aine lot papier avec banne Sevenne,  
172 banne Sevenne oune mentionne moi talere la banne Sevenne ou fami tout sa la sa ?

173 MRS Y A CESAR : Oui

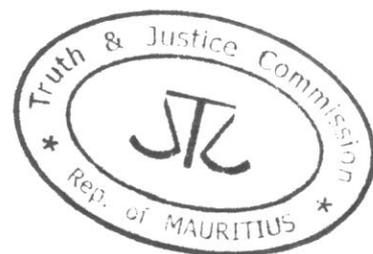

174 MR J DAVID : Sevenne, oune fer aine lot...

175 MRS Y A CESAR : Madame la fek apprane line mort le 4 Mars La France, line alle La France  
176 et so mari zot tout fine mort alors ti fille la fine vini ine prend li ine aller line mort le 4 Mars

177 MR J DAVID : O.k. mais so banne zenfant encore la même zot reste Ste Croix ?

- 178 MRS Y A CESAR : La ici Maurice li aina aine sel garçon
- 179 MR J DAVID : Li aina aine sel garçon reste Ste Croix ?
- 180 MRS Y A CESAR : Li habite Tranquebar
- 181 MR J DAVID : Tranquebar voila. Non nou revine mo envie tire sa au clair sa zafer 490 arpents
- 182 Mr Madhoo dire ou coume sa reste 12 arpents, o.k. ?
- 183 MRS Y A CESAR : Houn
- 184 MR J DAVID : Bon eski ou oune fer aine lot papier cot oune vende terrain avec banne Sevenne,
- 185 300 arpents la ?
- 186 MRS Y A CESAR : Ek banne Sevenne?
- 187 MR J DAVID : Hein?
- 188 MRS Y A CESAR : Mais zamais
- 189 MR J DAVID : Zamais ?
- 190 MRS Y A CESAR : Non
- 191 MR J DAVID : Ou panne zoindre zot banne Sevenne ?
- 192 MRS Y A CESAR : Au contraire la Cour, banne Jaddoo mo croire pas ti avoye zot la Cour
- 193 MR J DAVID : Houn, houn
- 194 MRS Y A CESAR : La Cour dire zot ki zot pas heritier
- 195 MR J DAVID : Oui
- 196 MRS Y A CESAR : Et puis sa la fami pas trop bien are moi mais moi mo ti dire zot si zamais mo
- 197 gagner mo pou partage ek zot parski mo koné deux sœurs même mama zot besoin gagner,
- 198 Eugenie ek Hermenie mais zot pas ti d'accord are moi et ala lere li aller li oussi li pas dire moi li
- 199 aller. Astere so garcon dire moi line mort la le 4 Mars.
- 200 MR J DAVID : Bon oune joindre garçon la ou ?

- 201 MRS Y A CESAR : Oui mo joindre li
- 202 MR J DAVID : Ou joindre li ?
- 203 MRS Y A CESAR : Mais mo...
- 204 MR J DAVID : Parski aina aine problème lors sa zafer c'est pas 12 arpents sa, c'est 300 arpents  
205 ki banne Seienne ine prend ?
- 206 MRS Y A CESAR : Non sa 390 arpents la, le gouvernement zamais line prend lotorisation nou  
207 pas koné ek ki, li fine fer chemin et c'est pour cela ki sa ine diminuer la
- 208 MR J DAVID : Houn
- 209 MRS Y A CESAR : Pas ti aina chemin là-bas, ti aina pieton au Morne mais le gouvernement ine  
210 fer chemin mais zamais ti donne nou aine recompense aine narien
- 211 DR TEELock: Mais aine chemin pas capave fer aine terrain 490 fine 12 ?
- 212 MRS Y A CESAR : Abé Ramgoolam la mo lé zoindre li, li ti emmene moi lot fois dans so l'auto  
213 tout sa la noune alle manger, boire mais banne la police pas laisse moi rentrer, mo zoindre li  
214 dehors li en pressant et li dire moi vine bureau, pas laisse moi rentrer pou alle koze avec li
- 215 MR J DAVID : Mais si nou guette bien la...
- 216 MRS Y A CESAR : Lere la monne met 12 arpents la dans la main Ramgoolam c'est sa ki mo  
217 croire ine met sa dans la main vasa... mo même mo pas koné. Ou koné moi aussi mo pé vine  
218 vieux, avant-hier monne gagne 85 ans et sa même mo pas zen pou pense tout sa la
- 219 MR J DAVID : Mais astere avec banne Mme Choolun, oupé dire nou ou pas fine met li la Cour ?
- 220 MRS Y A CESAR : Pardon?
- 221 MR J DAVID : Oupé dire ou pas fine met li la Cour ? Situation tel ki li été ou ou croire ki ou  
222 propriétaire zis 12 arpents, zis 12 arpents oune dire nou la et tout le reste terrain oune perdi  
223 alors ?
- 224 MRS Y A CESAR : Perdi?

- 225 MR J DAVID : Hein oupé tendé ki mo pé dire la ? Dans sa 490 la, oune perdi tout ?
- 226 MRS Y A CESAR : Pourquoi ?
- 227 MR J DAVID : Bé sa même oupé dire Mr Madhoo ine dire ou reste zis 12 arpents, nou nou envie  
228 koné kot sa 400 arpents la fine aller ?
- 229 MRS Y A CESAR : Pas koné, en ce temps la ti aina aine nommé Choolun, Ramparsad Choolun
- 230 MR J DAVID : Voila
- 231 MRS Y A CESAR : Lere la li aller sencé li trop grand missier, Madhoo dire li li pou donne li  
232 aine part, li fine alle au Morne line tire barblé, dans li alle tire barblé banne Desvaux si pas  
233 Grand Baie fine donne li coup de fusil, ti aina aine gardien ti aina so fusil. Dans television tout sa  
234 la demander, demander et après ine alle gagne so lé corps dans bois et la li aina aine so neveu ki  
235 la.
- 236 MR J DAVID : Madame mo croire bon faudrer pas nou ajoute film la hein parski l'époque pas ti  
237 aina television ou ti pé dire sa l'époque la la, pas ti aina television narien pou alle dire...oupé  
238 dire banne zafer ki ou a dirait bon oune tanne dire, ou panne chose, faudrer pas nou vine trop lors  
239 sa banne kozé la, nomme banne noms banne dimun. Moi mo pé dire ou de ou vivant ou, ou ti  
240 kone zis missier Madhoo ?
- 241 MRS Y A CESAR : Madhoo premier personne kine occupe sa
- 242 MR J DAVID : Premier personne; deuxieme dimun lors ki oune gagne zafer lors sa 490 arpents  
243 la ?
- 244 MRS Y A CESAR : Avocat Jaddoo
- 245 MR J DAVID : Jaddoo, alors Madhoo d'abord et puis Jaddoo, ki fer oune alle guette avocat  
246 Jaddoo ou ?
- 247 MRS Y A CESAR : Aine courtier ki ti vine rode moi kot mo rester
- 248 MR J DAVID : Oui

249 MRS Y A CESAR : Non au commencement ti aina aine nommé aine fille chretienne rentre chose  
250 marier ek Ibrahim Dawood, aine jour mo truve li vine ek l'auto vine cherche moi, li alle fer  
251 demarse fer demarse, li emmene moi kot aine monsieur ki appelle Akini la rue La Poudriere li  
252 dire moi signer pou li capave gagne l'argent pou kuma dir paye dimun pou travay. Li aller li  
253 prend Rs 600,000 li pas donne moi 5 sous, aine sel aller ziska zordi mo perdi li, sa fam la marier  
254 avec Ibrahim Dawood reste Curepipe. Aller aller lere la aine jour chose ki vini sa Hosenny la

255 MR J DAVID : Hosenny, oui allez?

256 MRS Y A CESAR : Lere la ki line emmene moi avec avocat Jaddoo

257 MR J DAVID : Oui, Hosenny astere line fer ou signe aine papier li ?

258 MRS Y A CESAR : Line fer moi signe aine papier bureau, li dire moi ou koné mo pas pou  
259 capave travay sans ou lotorisation, signe aine papier aine bordereau...

260 MR J DAVID : Voila

261 MRS Y A CESAR : ...donne avocat lotorisation pou li occupe sa

262 MR J DAVID : O.k.

263 MRS Y A CESAR : Depuis 11 ans

264 MR J DAVID : 11 ans. Donk line prend papier li aller ?

265 MRS Y A CESAR : Aine sel aller, zamais, tous les zours demain, tantot, rien et mo tanne dire ki  
266 zot ine prend l'argent lors la preter la banque sensé pou zot fer travay mais zamais ti fer narien.  
267 La deuxiemement sa coup la fine gagne aine lot Choolun kine mort la so neveu fine vine regarde  
268 moi ine emmene moi ek avoué Dauhoo

269 MR J DAVID : Oui, o.k.

270 MRS Y A CESAR : Dauhoo

271 MR J DAVID : Oui

272 MRS Y A CESAR : La lipé occuper line emmene moi au Morne, line emmene arpenteur ek  
 273 camion zom alle arpente terrain, fine emmener tout correct la, ine alle presente moi la Cour tout.  
 274 Alors lere la...

275 MR J DAVID : Ine emmene ou pou alle fer l'affidavit sa ?

276 MRS Y A CESAR : Lere la monne alle fer serment devant magistrat ki mo retire mo plainte, mo  
 277 travay ki monne donne Jaddoo

278 MR J DAVID : Donne zot sa ?

279 MRS Y A CESAR : Donne sa Dauhoo

280 MR J DAVID : O.k.

281 MRS Y A CESAR : Alors la Cour fine accorde moi, alors la Dauhoo pé occuper la, mo pas  
 282 capave dire ou encore

283 MR J DAVID : Ki sane la kine explik ou ki la Cour fine donne ou sa possibilité fer sa la ?

284 MRS Y A CESAR : Ki possibilité ?

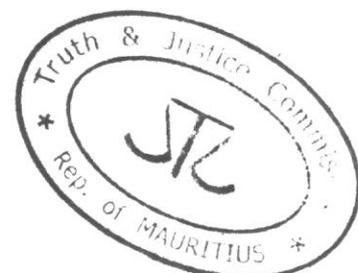

285 MR J DAVID : Ki tire sa dans la main untel et donne sa dans la main lot dimun ?

286 MRS Y A CESAR : Oui parski avocat Jaddoo so madame aine avoué li ti vine presente la Cour

287 MR J DAVID : Ah bon

288 MRS Y A CESAR : Li pas ti accepter bé lere la mo ti dire avec magistrat mo pou gagne 85 ans  
 289 mo pas zen, mo aina zenfant nou malheureux nou misere, a bein mo ti a content mo zenfant  
 290 gagner. Abé lere la mo explik la Cour devant magistrat mo dire li, excuse moi mo capave  
 291 raconter ?

292 Mo aina aine chaise ine casser et monne done ou, oune arranger, oune prend dix ans pou arranger  
 293 et la mo pé bisin mo chaise pou mo assizé, il ne reste zis pou mo capave prend mo l'objet tire li  
 294 ek ou pou mo donne aine lot arranger hein. Lere la magistrat rier guette moi et lere la li dire moi  
 295 oui et lere la Mme Jaddoo en colere, lere la li dire moi oui madame.

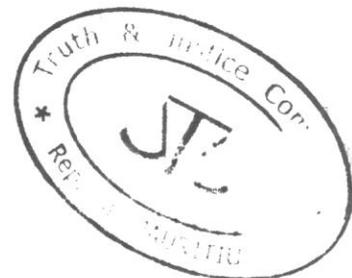

↪

- 296 MR J DAVID : Sa veut dire oune gagne aine papier officiel de la Cour pou dire ou fer sa ?
- 297 MRS Y A CESAR : Mo pas koné si pas li ek Dauhoo mais mo pena aucaine papier are moi...
- 298 MR J DAVID : Donk si Mr Jaddoo astere ki pé occupe sa?
- 299 MRS Y A CESAR : Non, Dauhoo
- 300 MR J DAVID : Dauhoo, Dauhoo...
- 301 MRS Y A CESAR : Avoué Dauhoo
- 302 MR J DAVID : D'accord, o.k. Eski line dire ou kan pou retourne la Cour enkor la lors sa zafer
- 303 la ?
- 304 MRS Y A CESAR : Pardon?
- 305 MR J DAVID : Eski ine dire ou kan pou retourne la Cour pou ou enkor la lors sa zafer la ?
- 306 MRS Y A CESAR : Non line dire moi la li pé guette l'acquireur pou vendé
- 307 MR J DAVID : Oui
- 308 MRS Y A CESAR : Ti aina aine messieur tine sorti dehors ine vini ine dire oui, après li panne
- 309 retourner, c'est sa ki li pé attendre l'acquireur arriver, kuma dir bisin gagne dimun pou acheter
- 310 lere la li donne moi mo part
- 311 MR J DAVID : Non la Cour fine dire ou retourne enkor la la pou vine...
- 312 MRS Y A CESAR : La Cour, non
- 313 MR J DAVID : Non ?
- 314 MRS Y A CESAR : Non
- 315 MR J DAVID : Ou pas koné ki au mois de Mai la Cour ine dire ou revine guetter, la Cour
- 316 Suprême ine dire ou revini, ou pas au courant ?
- 317 MRS Y A CESAR : Non

- 318 MR J DAVID : Ou avoué panne dire ou sa ?
- 319 MRS Y A CESAR : Non
- 320 DR TEELock: Mo croire ou bisin contacter...
- 321 MRS Y A CESAR : Nek line dire moi et hier même monne alle là-bas li pé attane dimun même  
322 pou acheter
- 323 DR TEELock: Ine fini fixer la Cour
- 324 MR J DAVID : La Cour ine fixer pou en Mai, ou bisin fer aine demars ou alle la Cour au mois  
325 de Mai sa zafer la pou passer
- 326 MRS Y A CESAR : Avec avoué la ? Parski monne déjà...Gambier ine aller li, li ti koze bonne a  
327 vini, line guetter chose line aller labas li lors montagne la, c'est Desvaux ki ti la mo ti alle chez  
328 Desvaux...
- 329 MR J DAVID : Mo croire ou pé melange aine ti peu banne chose la...
- 330 MRS Y A CESAR : Mo ti alle chez Desvaux...
- 331 MR J DAVID : Madame...
- 332 MRS Y A CESAR : ...lere la li ti dire moi oui li reconnaître ki Gambier ine vende terrain are li,  
333 pas pou li sa. Lere Mme Desvaux koze ek Gambier li dire les héritiers voudraient vous parler, li  
334 dire moi je m'en fous avec les héritiers li avoye promener
- 335 MR J DAVID : Bon mo croire nou pé melange aine ti peu plan, nou retourne a l'essentiel,  
336 l'essentiel pou nou c'est sa terrain 490 arpents la donk zamais oune okuper ou, oune passe sa les  
337 autres dimun, c'est sa kine arriver, dans ou cas c'est sa kine arriver ? Oune prend, oune donne  
338 Mr Madhoo, Mr Madhoo ine donne Mr Jaddoo, Mr Jaddoo ine passe Mr Dauhoo, donk c'est aine  
339 la file dimun kine vini ?
- 340 MRS Y A CESAR : Non moi kine mettre sa dans la main Dauhoo
- 341 MR J DAVID : Oui seki mo pé envie dire ou fine aine aine tralé dimun ine vine divant ou...

- 342 MRS Y A CESAR : Ine embete moi et pas fer narien
- 343 MR J DAVID : ...pou fer business 490 arpents, valeur du jour ou pena narien ?
- 344 MRS Y A CESAR : Pena
- 345 MR J DAVID : Ou pena narien?
- 346 MRS Y A CESAR : Mo pé reste dans aine ti lacaze cité misere...
- 347 MR J DAVID : Ki sane na pé okupe sa terrain 490 arpents zordi ? Ki sane la ki pé occupe sa ?
- 348 MRS Y A CESAR : Hein?
- 349 MR J DAVID : Ki sane la ki pé occupe sa d'apres ou, sa 490 arpents la ?
- 350 MRS Y A CESAR : Bé lors la ti aina Gambier, Desvaux
- 351 MR J DAVID : Non, Mr Choolun li enkor lors la ou li pas enkor lors la ? Banne fami Choolun
- 352 enkor lors sa terrain la ou pas ?
- 353 MRS Y A CESAR : Mais Choolun mo panne dire ou line mort et zot ine tuer li
- 354 MR J DAVID : Ah bon, so banne zenfant ou pas koné ?
- 355 MRS Y A CESAR : So neveu ki la pé... so neveu ki pé occupe sa ensemble avec Dauhoo, avoué
- 356 MR J DAVID : Avoué Dauhoo?
- 357 MRS Y A CESAR : Oui
- 358 MR J DAVID : Ah bon, astere nou pé kumens gagne explication la trankil la, doucement
- 359 doucement ; donk Dauhoo et neveu Mme Choolun ?
- 360 MRS Y A CESAR : Neveu Choolun kine mort la ki pé occupe sa
- 361 MR J DAVID : O.k.
- 362 DR TEELock: Est-ce que vous êtes allé voir Mr Hossen ?
- 363 MRS Y A CESAR : Pardon?

- 364 DR TEELOCK: Oune alle guette aine Mr Hossen?
- 365 MRS Y A CESAR : Hein?
- 366 DR TEELOCK: Oune alle guette aine Mr Hossen?
- 367 MRS Y A CESAR : Ki Hossen?
- 368 MR J DAVID : Avocat?
- 369 DR TEELOCK: Ou panne tanne parler de Mr Hossen ?
- 370 MRS Y A CESAR : Hossen?
- 371 DR TEELOCK: Hein?
- 372 MRS Y A CESAR : Non mo kone zis avoué Dauhoo la
- 373 DR TEELOCK: Parski aina aine plainte ki ou oune metter ek Hossen ?
- 374 MRS Y A CESAR : Ki sa Hossen la ?
- 375 DR TEELOCK: Pourtant aina aine plainte kine metter par ou contre Choolun par Hossen, zamais
- 376 oune alle guette aine Mr Hossen ?
- 377 MRS Y A CESAR : Non
- 378 MR J DAVID : Plainte la ine fer par Mme Jadoo avec avocat Hossen lors ou nom ?
- 379 MRS Y A CESAR : Non, pas kone narien
- 380 DR TEELOCK: Ou pas au courant ?
- 381 MR J DAVID : Ou pas au courant di tout sa ?
- 382 MRS Y A CESAR : Non, non mo pas au courant narien, tout mo zafer dans la main Dauhoo la
- 383 ek Choolun, avec Sanjay Choolun, mo pas kone narien
- 384 DR TEELOCK: Mo croire nou banne avocat pou explik ou aine ti peu ki pé arriver, houn

385 MR J DAVID : Oui, mo croire aina buku kikchose nou pou bisin explik ou madame parski nou  
386 croire ou pas au courant buku kikchose. Entretemps mo ti envie kone aine zafer, oune tanne aine  
387 Mr Sim Fat, Sim Fat, aine Mr Sim Fat ti vine guette ou pou fer transaction terrain ?

388 MRS Y A CESAR : Pou alle lors terrain ?

389 MR J DAVID : Hein

390 MRS Y A CESAR : Chinois ?

391 MR J DAVID : Hein ?

392 MRS Y A CESAR : Zamais

393 MR J DAVID : Zamais ?

394 MRS Y A CESAR : Mo panne truve personne

395 MR J DAVID : Han, panne truver

396 MRS Y A CESAR : Non, attention aina aine heritier de côté Sevenne appelle Jacqueline, li La  
397 France la, chaque fois li vini li alle guette bureau, li alle ici li alle là-bas a koze la Cour ti dire  
398 kume sa zot mama pas marier, zot declare lors nom zot mama zot pena droit lors sa terrain la.  
399 Alors li ki pé fer tout banne desordre la, kit fois li mais mo pas au courant.

400 MR J DAVID : Mais madame mo capave dire ou aine zafer ; aina buku kikchose ki ou pas koné,  
401 li malheureux pou dire ki déjà a l'époque en 1972 ou signe aine procuration pou donne aine  
402 missier, aine avocat Madhoo ; eski ou koné ki avocat Madhoo ine donne sa terrain la, ine vender,  
403 ine fer aine transaction a Mr Choolun ? Ou koné sa, non ? Oune apprane sa, non ?

404 MRS Y A CESAR : C'est sa ki mo dire ou, li line fer sa lors Choolun, Choolun sa même ki mo  
405 dire ou ine alle fer so grand noir, ine tire barblé, ine dire pou li, sa même ki zot ine tuer li.

406 MR J DAVID : Voila, o.k.

407 MRS Y A CESAR : Ramparsad la, sa même so neveu aster la ki pé fer sa travail la avec Dauhoo  
408 la

409 MR J DAVID : Li pé continue travay la ?

410 MRS Y A CESAR : Choolun la so neveu

411 MR J DAVID : Seki noune decouvert madame, mo pu dire ou li malheureux c'est ki oune donne  
412 pouvoir a toute un chacun, ou donne pouvoir Mr Madhoo, Madhoo ou tirer ou donne pouvoir Mr  
413 Jaddoo, ou tire pouvoir dans la main Mr Jaddoo ou donne Mr Dauhoo et donk seki après par la  
414 suite ou pas pé kone narien seki pé passer ?

415 MRS Y A CESAR : Non

416 MR J DAVID : C'est sa le problème. Astere monne comprend en conclusion astere c'est ou  
417 banne neveu, niece ki en France ki pé fer demars pou gagne terrain la

418 MRS Y A CESAR : Aine sel niece La France

419 MR J DAVID : Aine sel niece, aina aine lot reste, aine neveu reste Tranquebar li appelle  
420 Sevenne

421 MRS Y A CESAR : So mama fek mort la

422 MR J DAVID : Li appelle Sevenne?

423 MRS Y A CESAR : Sevenne, Odile Sevenne

424 MR J DAVID : Voila, li donk de ce fait...

425 MRS Y A CESAR : Apres zot aina aine tonton exister la...

426 MR J DAVID : Mo pou dire ou aine sel kestion, aine sel kestion mo pose ou ; kan ou ti dire Mr  
427 Madhoo ki ou aina sa terrain 490 arpents la, eski ou ti aina aine titre de propriété pou dire ki ou  
428 propriétaire sa terrain la ?

429 MRS Y A CESAR : Bé oui li li ti dire moi mo tout sel héritier...

430 MR J DAVID : Non madame mo pé dire ou, eski ti aina aine papier officiel kot dire ou c'est ou  
431 ki propriétaire sa terrain la

432 MRS Y A CESAR : Mo pas koné, Madhoo dire moi mo propriétaire terrain mo pas koné

- 433 MR J DAVID : Bon
- 434 DR TEELock: Madame...
- 435 MRS Y A CESAR : Alla kot Jaddoo aussi, sa Hosseney la ti dire moi ou tout sel héritier
- 436 DR TEELock: Ou ou dire nou, oune dire nou talere la ki ou grand pere ou fami ti dire ou ki ou  
437 aina terrain ou alle visite terrain tout sa la
- 438 MRS Y A CESAR : Pardon?
- 439 DR TEELock: Depi ou tipti ou koné ki ou aina sa terrain la
- 440 MRS Y A CESAR : Mo papa ti dire moi avant li mort, oui
- 441 MRS Y A CESAR : Ou ti alle visite sa terrain la kan ou ti tipti ?
- 442 MRS Y A CESAR : Mo pas kone narien moi, li même line explik moi
- 443 DR TEELock: O.k.
- 444 MRS Y A CESAR : Lere la mo alle fer fer demarse, mo pas kone narien
- 445 DR TEELock: Lere la Mr Madhoo vine dire ou ki effectivement ou aina sa terrain la ?
- 446 MRS Y A CESAR : Oui
- 447 DR TEELock: Oui, astere kuma Mr David ine fek dire ou oune alle donne pouvoir aine kantité  
448 dimun pou fer banne transaction mais seki nou pé truver seki zot ine fer banne zafer ki peut-être  
449 ou pas au courant
- 450 MRS Y A CESAR : Mais moi mo truver d'apres l'ordre kuma dir mo pas kone narien, c'est aine  
451 banne escroquerie qui zot ine fer ek moi
- 452 DR TEELock: Seki mo pou demande ou...
- 453 MRS Y A CESAR : Parski zot truver mo pena aine homme, mo pena personne pou debouter mo  
454 vieux zot embete moi

455 DR TEELock: Seki mo pou demande ou fer c'est assizé ek nou conseiller legale après sa  
 456 hearing la, li pou explik ou ki pé arriver parski cas la pé apparaître en Cour en Mai et ou pas  
 457 même au courant

458 MRS Y A CESAR : Mo pas koné, mo pena aine lettre mo pena aine narien

459 DR TEELock: Li pou explik ou ki bisin fer, o.k. si ou assize ek li aine ti moment, ou pou  
 460 capave assize ek li aine ti moment ?

461 MRS Y A CESAR : Pardon ?

462 DR TEELock: Ou pou capave assize ek nou conseiller legale ki pé assizer la, Mr François ?

463 MRS Y A CESAR : Oui mo capave assize ek li

464 DR TEELock: Ou assize ek li et li pou explik ou ki pé arriver

465 MRS Y A CESAR : Oui

466 DR TEELock: O.k. ?

467 MRS Y A CESAR : Oui

468 DR TEELock: O.k.

469 DR VEERAPEN: Madame, nou bien sympathise avec ou seki pé arriver. Seki mo ti envie  
 470 demande ou letemps ou papa dire ou, ou aina aine terrain, o.k.

471 MRS Y A CESAR : Pardon?

472 DR VEERAPEN: Ou papa ti dire ou, ou aina aine terrain ?

473 MRS Y A CESAR : Oui

474 DR VEERAPEN: Zamais line dire ou alla li la mo aina aine papier, ala aine papier dans tiroir ou  
 475 bien dans l'armoire aina aine papier ki certifier sa terrain la pou banne grand dimun ?

476 MRS Y A CESAR : Non mais mo papa letemps zot ti Rivière Noire zot mais letemps zot vine  
 477 Port Louis ici ek so mama tout sa la, zot ti aina zot banne zafer. Abé lere l'epidemie arriver, so

5

478 mama mort l'artillerie la li dire moi mais li pas koné, li même li lors lilit bien faille, so mama pé  
479 mort la l'epidemie, li pas koné kot tout sa la.

480 Aine cousin ki ti sorti dehors vine guette li et dire li occupe to terrain to aina, lere la papa, mo  
481 papa ine paralyser lors lilit, ere la li dire moi aine deux aine deux parole, truver ? Bé seki line  
482 dire aine deux parole avant li mort en 61 et lere la monne marse lors la même, mo pas kone  
483 narien.

484 DR VEERAPEN: Mais sa cousin ki fine vine dire, dire li occupe terrain la, cousin la enkor la  
485 même li ?

486 MRS Y A CESAR : Line mort longtemps

487 DR VEERAPEN: Line mort, sa veut dire ou pena personne dans fami...

488 MRS Y A CESAR : Pena personne, mo tout sel, de côté mo papa mo tout sel

489 DR VEERAPEN: Oui mais ki aina aine papier lors terrain la, ou pas kone ditout sa ?

490 MRS Y A CESAR : Pardon?

491 DR VEERAPEN: Ou pas kone ditout ki aina aine papier, aine papier ki dire sa terrain la pou  
492 banne grand dimun, ou pena li ?

493 MRS Y A CESAR : Aine sel chose aine fois mo ti alle archives, aine dimun ti emmene moi mo ti  
494 alle guetter, alors nou ti alle guetter Pierre Speville so terrain non-vendu. Alors lere la même,  
495 lere fine mettre sa non-vendu la même ki Madhoo vine occuper, oune comprend ?

496 DR VEERAPEN: Ki sa dimun ti emmene ou la, archives ?

497 MRS Y A CESAR : Banne courtier tire papier là-bas la

498 DR VEERAPEN: Ki sa courtier la ? Ou pas rappelle so nom ?

499 MRS Y A CESAR : Li prend moi Rs 300.- ce jour la pou alle guette dans livre

500 DR VEERAPEN: Ki so nom sa courtier la?

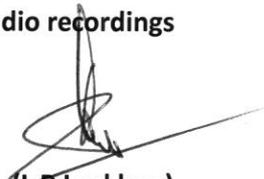

501 MRS Y A CESAR : Pierre Speville, terrain non-vendu

- 502 DR VEERAPEN: Oui, oui, non mo pé dimande ou ki sa courtier la, ou rappelle so nom ?
- 503 MRS Y A CESAR : Pardon?
- 504 DR VEERAPEN: Sa courtier kine emmene ou archives la...
- 505 MRS Y A CESAR : Kot li pou vivre, aine vieux dimun sa ziska sa lere la, aine musulman sa et
- 506 line mort
- 507 DR VEERAPEN: Oui, ou pas rappelle so nom ?
- 508 MRS Y A CESAR : Mo pas rappelle so nom
- 509 DR VEERAPEN: Ou pas rappelle so nom, allez right, o.k., merci madame
- 510 DR TEELock: O.k. merci madame, ou pou assizé ek Mr François aine ti moment ?
- 511 MRS Y A CESAR : Oui
- 512 DR TEELock: Oui, merci ou capave aller astere
- 513 MRS Y A CESAR : Pardon?
- 514 DR TEELock: Ou capave aller ou assizé ek Mr François
- 515 MRS Y A CESAR : Ou sa ?
- 516 DR TEELock: Dans so bureau

TRUTH

AND

JUSTICE COMMISSION

Friday 1 April 2011

Afternoon Session

## **Members Present**

Dr Parmaseeven Veerapen - Commissioner

Mr Jacques David - Commissioner

**Apology:-** Dr Alex Boraine  
Dr Vijaya Teelock  
Mr Benjamin Moutou

**Chairperson of Session:** Mr Jacques David

## **In attendance**

Mrs How Man Yoon Koo Yue Cheong (Deponent)

Mr Seewoo Tookraj

**TJC/H/How Man Yoon K.Y.C/01.04.11/Af**

**Original Version**

1. **DR P. VEERAPEN** :- We start the session of afternoon session, this Friday 1 April 2011, and we are
2. dealing with the case of Speville and we have invited several individuals to depone today. The first
3. one would be the Conservator of Mortgages. Who is who? Who is the Conservator?
4. **MRS HOW MAN YOON**:- The Conservator has delegated me to come and depone.
5. **DR P. VEERAPEN**:- In a minute, you introduce yourself. So, the first thing I am going to ask you
6. please is to swear your oath, okay, that you are going to say the truth nothing but the truth with the
7. help of the acting secretary, Mr Gobin, okay. So each of you and then you present yourself to the
8. Commission.
9. **MR GOBIN**:- Dir ki tou seki ou pou dir se la verite rien que la verite.
10. **MRS HOW MAN YOON**:- Je le jure.
11. **MR GOBIN**:- Quel est votre nom ?
12. **MRS HOW MAN YOON**:- C'est How Man Yoon Koo Yue Cheong, I am Deputy Registrar
13. General.
14. **MR GOBIN**:- Say all that you say the truth nothing but the truth, you have to repeat it.
15. **MRS HOW MAN YOON**:- All that I have to say the truth nothing but the truth.
16. **MR GOBIN**:- You raise your right hand and say whatever you will say will be the truth nothing but
17. the truth.
18. **MR T. SEEWOO**:- Whatever I will say it is the truth but nothing than the truth.
19. **MR GOBIN**:- Can you present yourself?
20. **MR T. SEEWOO**:- I am Mr Tookraj Seewoo. I work at the Registrar General Department. I am a
21. Principal Registrar Officer there.
22. **MR GOBIN**:- Okay.
23. **DR P. VEERAPEN**:- Okay. Would you like to depone in what language, any choice, Anglais,
24. Français, Creole ou quoi? Choisissez, le choix c'est vous, c'est à vous de choisir.
25. **MRS HOW MAN YOON**:- English or French.
26. **DR P. VEERAPEN**:- Okay. So, now I would ask Mr David to lead the discussion, okay and he has
27. been working in the case of Speville and he will ask any question and clarifications that we require. I
28. pass over on Mr David.
29. **MR J. DAVID**:- Okay, thank you. Bonjour et bienvenue à la Commission. Merci, donc, d'avoir fait
30. le déplacement pour nous donner un peu plus de – on voudrait éclairer sur certain point que nous
31. profane, nous n'arrivons pas toujours à trouver cette lumière là. Vous vous êtes spécialistes des
32. documents et c'est la raison pour laquelle on vous a appelé aujourd'hui. Je ne sais pas si vous êtes au
33. courant du cas qui est en litige aujourd'hui, le cas Speville. Il s'est passé que Mons. Speville donc,

34. Mons. Raymond Speville déclare être propriétaire du fait d'être les descendants de Pierre Speville. Il  
 35. est donc un des héritiers possédant quelques 490 arpents à Côte aux Raffins. Nous allons voir les  
 36. documents. C'est surtout pour les documents disposés que nous voulons avoir plus d'éclaircissement.  
 37. Ce terrain par la suite est passé sous la responsabilité d'un certain Hurryparsad Choolun et qui lui de  
 38. son côté déclare avoir obtenu ce terrain donc par procuration d'un certain Marie Hollande Darien  
 39. Cesar. Voyez un petit peu donc beaucoup d'acteurs et d'actrices entre en scène dans ce genre de  
 40. dossier. Donc, nous voulons avoir comme je l'ai dit plus de lumière sur ce cas d'où le fait que nous  
 41. avons demandé à ce que vous apportez les documents pour voir s'il y a eu manipulation dans les  
 42. photocopies ou qu'est-ce qui s'est passé dans les originaux. Comme vous êtes de spécialistes, donc,  
 43. nous vous allons vous soumettre, vous n'avez pas apporté de document.
44. **MRS HOW MAN YOON**:- Malheureusement les livres ne peut pas quitter le bureau parce que c'est  
 45. ouvert pour le public. Vous pourrez aller voir mais on ne peut pas retirer les livres du bureau.
46. **MR J. DAVID**:- Vous ne pourrez pas avoir un certified copy ?
47. **MRS HOW MAN YOON**:- Certified copy vous pourrez avoir mais pour original on ne peut pas  
 48. comme ci dirait l'original ne peut pas quitter le bureau.
49. **MR J. DAVID**:- Ok, très bien.
50. **MRS HOW MAN YOON**:- Vous pouvez faire quelqu'un venir au bureau pour voir.
51. **MR J. DAVID**:- Peut-être si nous vous envoyons une lettre par la suite nous avons souhaité d'avoir  
 52. des copies certifiées.
53. **MRS HOW MAN YOON**:- Ça vous pouvez avoir.
54. **MR J. DAVID**:- Parce que nous nous avons des copies.
55. **MRS HOW MAN YOON**:- Mais c'est pas une copie certifiée, excusez-moi.
56. **MR J. DAVID**:- Allons dire par exemple j'aurais souhaité, la Commission aurait souhaité mieux  
 57. comprendre un casier hypothécaire, un casier hypothécaire relative à des mouvements de terre de  
 58. Speville. Si par exemple je vous soumettais ce document là, est-ce que vous pourriez jeter un coup  
 59. d'œil et nous dire ? Je vous donne le papier là. Ça fait beaucoup de paperasse et comprend que vous  
 60. vous avez encore plus que ça. Jetez un coup d'œil sur le document de casier hypothécaire ce qui nous  
 61. a été soumis et nous dire si ça conforme à des genres très effectués ou si cela si rien ne vous gêne  
 62. dedans, seulement le premier là, vous allez voir des entrées, si vous pouvez lire s'il vous plaît ?
63. **MRS HOW MAN YOON**:- D'après la Remarque qu'on a mis il y a un officier qui a fait l'entrée  
 64. avant et puis un senior officer qui collationne. Si jamais il y a des corrections à faire, le Senior  
 65. Registration Officer fait la correction.
66. **MR J. DAVID**:- Oui, fait la correction.

67. **MRS HOW MAN YOON**:- Oui.
68. **MR J. DAVID**:- Mais ça c'est une photocopie dès ce qui a été obtenue ?
69. **MRS HOW MAN YOON**:- Oui.
70. **MR J. DAVID**:- Chez vous. C'est pourquoi je vais vous dire par la suite –
71. **MRS HOW MAN YOON**:- Mais c'est pas une copie certifiée.
72. **MR J. DAVID**:- C'est ça. Nous, on croyait que –
73. **MRS HOW MAN YOON**:- On donne certified copy parce que là je ne vois pas le tampon qu'on a
74. demandé at the request of -
75. **MR J. DAVID**:- Voilà, pourquoi on vous avait demandé d'apporter l'original.
76. **MRS HOW MAN YOON**:- Malheureusement on peut pas apporter l'original.
77. **MR J. DAVID**:- Ça ne fait rien puisque ... n'est pas perdu parce que nous allons vous demander
78. cette copie par la suite.
79. **MRS HOW MAN YOON**:- D'accord.
80. **MR J. DAVID**:- Mais vous selon votre point de vue, quelle est votre commentaire dessus ? Il y a un
81. premier achat, il y a une première acquisition et puis il y a une première vente.
82. **MRS HOW MAN YOON**:- L'encre qui est tombé sur le premier document, on n'a pas trouvé le
83. nom qui est là-dessus là. Dans l'original ici il y a a –
84. **MR J. DAVID**:- Oui.
85. **MRS HOW MAN YOON**:- Oui, je l'ai vu, il y a dans l'original.
86. **MR J. DAVID**:- La tache d'encre ?
87. **MRS HOW MAN YOON**:- La tache d'encre.
88. **MR T. SEEWOO**:- Il y a dans l'original.
89. **MR J. DAVID**:- Il y a aussi dans l'original ?
90. **MRS HOW MAN YOON**:- Oui.
91. **MR J. DAVID**:- Quel est votre interprétation sur la séquence d'échange, vente, ainsi de suite. Il y a
92. un premier signature de Lousto au départ ?
93. **MR T. SEEWOO**:- Ça était acquit, la première entrée, ça était acquit de - ?
94. **MRS HOW MAN YOON**:- De Mons. Demerez.
95. **MR J. DAVID**:- Demerez, oui, c'est ça.
96. **MR T. SEEWOO**:- Et puis je vois acheter un autre terrain de 490 arpents de Mons. Lousto.
97. **MR J. DAVID**:- De Mons. Lousto, ok.
98. **MR T. SEEWOO**:- Le numéro de transcription -
99. **MRS HOW MAN YOON**:- C'est que l'encre est tombé là-dessus là, c'est le titre.

100. **MR J. DAVID** :- Voilà.
101. **MR T. SEEWOO** :- Le titre.
102. **MR J. DAVID** :- Donc, personne ne comprendrait. Même vous demain ça va être
103. extrêmement difficile pour vous d'interpréter –
104. **MRS HOW MAN YOON** :- Dans le précédant volume il y a la vérité mais d'après la vente
105. on pourra remonter au titre.
106. **MR J. DAVID** :- Voilà, donc, maintenant voyez la date, voyez un petit peu la séquence, ça ce
107. que je vous voulais avoir vos commentaires sur la séquence là, ça remonte à 1820.
108. **MRS HOW MAN YOON** :- Oui.
109. **MR J. DAVID** :- Et puis c'est vendu en 1977 ?
110. **MRS HOW MAN YOON** :- Oui.
111. **MR J. DAVID** :- Et puis la saisie, date de 1821 ?
112. **MRS HOW MAN YOON** :- L'entrée n'est pas fait de chez nous ça. C'est pas possible.
113. **MR J. DAVID** :- Donc, vous comprenez pourquoi je vous ai demandé les originaux.
114. **MR T. SEEWOO** :- Oui.
115. **MR J. DAVID** :- Tout est là. Toutes les questions que la Commission se pose tourne autour
116. de ça.
117. **MRS HOW MAN YOON** :- Une petite Remarque que je puisse faire, hier lorsque j'ai été
118. voir le livre, il y avait trois entrées concernant le même terrain.
119. **MR T. SEEWOO** :- Quand nous faisons des entrées, on n'écrit pas comme ci la date.
120. **MRS HOW MAN YOON** :- 2/4/1821.
121. **MR T. SEEWOO** :- Oui, comme ça on n'écrit pas.
122. **MR J. DAVID** :- Vous n'écrivez pas ?
123. **MR T. SEEWOO** :- Non, comme ça non. Nous avons un principe d'écrire d'abord.
124. **MR J. DAVID** :- Oui.
125. **MR T. SEEWOO** :- Je crois pas que ça a été fait par nos officiers.
126. **MR J. DAVID** :- Ok.
127. **MRS HOW MAN YOON** :- A l'époque.
128. **MR J. DAVID** :- Oui, parce que comment se fait-il qu'un terrain d'une part acheter ou la
129. transaction se fait en 1820 et puis par la suite nous arrivons quelques années, plusieurs années
130. plus tard en 1977 et que nous faisons un retour en arrière dans l'histoire à 1821, d'où la
131. question c'est quels sont vos commentaires en tant qu'experts à la matière ?
132. **MRS HOW MAN YOON** :- Il y a quelqu'un qui a écrit ça dans le livre.

133. **MR J. DAVID** :- Voilà, ok. Et voilà pourquoi la Commission souhaite obtenir une copie  
134. certified pour voir si selon vos recherches, est-ce que vous avez vu vous hier en regardant ces  
135. documents qu'il y a quelque chose qui a été ajoutée ou pas ?
136. **MR T. SEEWOO** :- Il y a un casier hypothécaire 587/85, vous n'avez pas dedans.
137. **MRS HOW MAN YOON**:- /45.
138. **MR T. SEEWOO**:- C'est ça. On n'a pas une copie mais on a copié.
139. **MRS HOW MAN YOON**:- C'est ça, qu'il y avait trois entrées.
140. **MR J. DAVID** :- Voilà les trois entrées, ça vous avez vu ?
141. **MR T. SEEWOO** :- Ça, j'avais vu.
142. **MR J. DAVID** :- Bon, ma question maintenant en regardant le premier papier que je vous ai  
143. soumis, est-ce qu'à chaque fois qu'il y a acquisition, vente, mouvement, est-ce que ça entre  
144. automatiquement dans le casier hypothécaire dans vos livres à chaque fois qu'il y a –
145. **MRS HOW MAN YOON**:- Oui, lorsqu'on a déposé le document disons il y a une vente qui a  
146. été déposé, si on a payé à la caisse, les officiers qui ont les procédures à suivre qu'on fasse  
147. l'entrée dans nos répertoires.
148. **MR J. DAVID**:- Bon, dites moi maintenant est-ce que les bordereaux sont enregistrés chez  
149. vous, un avoué ou un notaire a fait un bordereau sur une promesse de vente ?
150. **MRS HOW MAN YOON**:- C'est enregistré seulement.
151. **MR J. DAVID**:- C'est enregistré seulement mais est-ce que –
152. **MRS HOW MAN YOON**:- Mais ça ne figure pas dedans.
153. **MR J. DAVID** :- Le mouvement ne figure pas ?
154. **MRS HOW MAN YOON**:- Non, on met seulement les documents transcrits à part si c'est  
155. transcrit on le met dedans.
156. **MR J. DAVID** :- Si le bordereau est transcrit –
157. **MRS HOW MAN YOON**:- Si c'est transcrit en même temps.
158. **MR T. SEEWOO** :- Nous faisons les entrées pour tous les documents qui sont transcrits.
159. **MR J. DAVID** :- Nous sommes en train de parler bien de 490 arpents à Côte aux Raffins ?
160. **MRS HOW MAN YOON**:- Oui.
161. **MR J. DAVID**:- Ok, en tant que expert à la matière, je vais vous soumettre un deuxième  
162. exercice. Donc, allez, on passe à quelque chose d'autre. Voilà, un bordereau fait touchant le  
163. même terrain. Vous allez voir que nous avons highlight un peu les choses qui vous intéressent.
164. **MRS HOW MAN YOON**:- Il y a quelque chose qui ça paraît -
165. **MR T. SEEWOO** :- Dans le contenu de répertoire.

166. **MR J. DAVID** :- Voilà.
167. **MR T. SEEWOO** :- On a, c'est vérifié c'était 490 arpents.
168. **MR J. DAVID** :- Qu'est-ce que vous lisez dessus ?
169. **MRS HOW MAN YOON** :- 190.
170. **MR T. SEEWOO** :- Ici, je vois 190 arpents. Il y a quelque chose qui cloche ici parce que les
171. 190 arpents ça ne correspond pas à l'écriture qui a été écrit, ce n'est pas la même écriture.
172. **MR J. DAVID** :- Voilà, c'est ça au fait que nous sommes en train de – C'est pourquoi j'ai
173. demandé encore une fois les originaux parce que là –
174. **MRS HOW MAN YOON** :- Malheureusement on ne peut pas apporter les originaux.
175. **MR J. DAVID** :- Voilà, alors 490 arpents est réduit à 190. Maintenant ça veut dire il y a 300
176. arpents qui se baladent dans la nature.
177. **MR T. SEEWOO** :- Non, ça je ne peut pas le confirmer parce que je dois avoir les originaux.
178. **MR J. DAVID** :- Ok.
179. **MRS HOW MAN YOON** :- Il faut confirmer avec les originaux.
180. **MR J. DAVID** :- Est-ce que d'habitude vous voyez les documents, il y a beaucoup de rature,
181. ça veut dire il y a, on met slash quand on met slash, ça doit se rapporter à la fin à une note ?
182. **MRS HOW MAN YOON** :- Oui.
183. **MR J. DAVID** :- Est-ce que vous pourriez voir s'il y a une note quelconque sur les slashes
184. qu'on a mis un petit peu à gauche et à droite.
185. **MRS HOW MAN YOON** :- Sans les originaux, on ne peut pas savoir si c'est bon.
186. **MR J. DAVID** :- Bon, premier analyse de ce que vous voyez aujourd'hui.
187. **MR T. SEEWOO** :- Oui.
188. **MR J. DAVID** :- Quelles seront vos commentaires ?
189. **MRS HOW MAN YOON** :- On peut pas se prononcer vu que nous n'avons pas des
190. documents avec nous pour dire si c'est vraiment ce qu'il y a dedans.
191. **MR J. DAVID** :- Oui, prenons par exemple si les originaux sont conforme exactement,
192. l'hypothèse que c'est ça. Quel serait vos commentaires, vous allez voir qu'il y a stamp que ça
193. sort de chez vous-même.
194. **MRS HOW MAN YOON** :- Oui.
195. **MR J. DAVID** :- Vous avez vu dans la marge, donc quand nous parlons de ce terrain de 490
196. arpents et que ici on a oublié 300 arpents, c'est un papier où on a mentionné, oui, est-ce que le
197. contraire pourrait, allons dire est-ce que 490 pourrait devenir 190 par la suite ?
198. **MRS HOW MAN YOON** :- Peut-être il y a erreur si en copiant, je ne sais pas à l'époque.

199. **MR T. SEEWOO** :- Si la transcription est mentionnée 490 et l'entrée dans le répertoire c'est  
200. 490 –
201. **MRS HOW MAN YOON**:- Parce qu'on travaille avec l'original et l'acte.
202. **MR J. DAVID** :- L'acte, d'où le fait encore une fois la Commission va vous faire la demande  
203. pour obtenir les originaux de ces documents. Ça devient extrêmement important concernant la  
204. rature que vous voyez là, les ratures, ils doivent lire au bas la note qui correspond à ces ratures  
205. là.
206. **MR T. SEEWOO** :- Non, il y a une chose que je peux vous dire.
207. **MR J. DAVID** :- Oui.
208. **MR T. SEEWOO** :- Parce que quand il y a des photocopies des documents, on peut pas  
209. différencier qu'est-ce qui est l'original et qu'est-ce qui a été falsifié.
210. **MRS HOW MAN YOON**:- Qui a été falsifié comme ci.
211. **MR J. DAVID** :- S'il y a –
212. **MRS HOW MAN YOON**:- Falsification.
213. **MR T. SEEWOO**:- Parce que la photocopie est en noir et blanc.
214. **MR J. DAVID** :- Est-ce qu'il vous faut des appareils plus sophistiqués ?
215. **MR T. SEEWOO** :- Non, il faut voir les originaux.
216. **MRS HOW MAN YOON**:- Il faut l'original.
217. **MR J. DAVID**:- Ok, la commission donc va faire appel à vous. Donc, puisque les documents  
218. ne peuvent pas venir jusqu'ici donc encore une fois il va falloir que la Commission vous  
219. réclame ces documents certifiés et à ce moment là donc –
220. **MRS HOW MAN YOON**:- On peut comparer à ce moment là.
221. **MR J. DAVID** :- Oui.
222. **MRS HOW MAN YOON**:- D'accord.
223. **MR J. DAVID**:- Je serais donc – C'était surtout ça, que vous puissiez nous donner vos  
224. commentaires. Mais les commentaires viendront par la suite encore une fois, mais comme je  
225. vous dis si c'est le premier document, le répertoire donc 7/208 donc il y a quelque chose qui  
226. ne tourne pas rond.
227. **MR T. SEEWOO** :- Surtout je peux ajouter sur le répertoire 587, il y a trois entrées, trois  
228. même entrées saisies, regardez le répertoire.
229. **MR J. DAVID** :- Oui, trois entrées saisies.
230. **MRS HOW MAN YOON**:- 584 –
231. **MR T. SEEWOO** :- Oui, ça, nos officiers ont remarqué. Je ne sais pas qu'est-ce qui s'est

232. passé.

233. **MRS HOW MAN YOON**:- On avait déjà coupé l'entrée.

234. **MR J. DAVID**:- Vous avez rectifié ?

235. **MRS HOW MAN YOON**:- Non, on a coupé l'entrée.

236. **MR T. SEEWOO**:- On a coupé l'entrée parce que ça n'était pas fait par nos officiers. Les  
237. trois entrées ce n'est pas –

238. **MRS HOW MAN YOON**:- Si je peux ajouter.

239. **MR J. DAVID**:- Oui.

240. **MRS HOW MAN YOON**:- On ne peut pas saisir un terrain en trois fois.

241. **MR J. DAVID**:- Bien sûr. A ce moment là vous avez vu la copie que nous avons obtenue,  
242. s'ils ne sont pas les officiers qui ont accès à ces documents ?

243. **MRS HOW MAN YOON**:- Tous les membres du public. On ... un droit de recherche, on fait  
244. les recherches.

245. **MR J. DAVID**:- Oui, est-ce que vous voulez dire un membre du public peut ajouter quelque  
246. chose ?

247. **MRS HOW MAN YOON**:- Peut-être.

248. **MR T. SEEWOO**:- Oui, ce n'est pas la première fois.

249. **MRS HOW MAN YOON**:- Il n'est pas autorisé mais on le fait.

250. **MR J. DAVID**:- C'est bien grave.

251. **MRS HOW MAN YOON**:- On a déjà des cas où quelqu'un a pris juste pour vous faire  
252. savoir comment on a ajouté une entrée dans le disons dans le hypothèque qu'on a pris.

253. **MR J. DAVID**:- Oui.

254. **MRS HOW MAN YOON**:- On a dit qu'on rayé la date, on a mis une initial, au fait quand on  
255. a ouvert le livre c'est pas rayé, c'est la ... et le cas est en Cour.

256. **MR J. DAVID**:- Heureusement pour deux cas, vous avez pu mettre la main dessus. Mais  
257. dans d'autre cas comme ce cas ici là où je vois 1819, 1920 et nous passons immédiatement à  
258. 1977, c'est incroyable pour revenir à 1821. A moins qu'on a retiré Mons. Louisto de sa tombe  
259. pour lui dire de venir signer. Et c'est très grave. Donc on parle de saisi, on parle de vente ainsi  
260. de suite. Ecoutez moi, je vous remercie et c'est tout le point que je voudrais vérifier avec  
261. vous. La Commission va vous écrire officiellement.

262. **MRS HOW MAN YOON**:- D'accord.

263. **MR J. DAVID**:- Pour demander donc on a fait mention aujourd'hui et surtout ces bordereaux  
264. qui encore une fois portent beaucoup d'écritures différentes. C'est ça qui est intrigant. Il y a

265. une écriture quelconque et puis au milieu donc c'est une écriture différente qui apparaît. Par la  
 266. suite il y a des ratures et avec les ratures il y a aucun commentaire.
267. **MR T. SEEWOO** :- Oui.
268. **MR J. DAVID** :- Et de ce fait celui qui prend tout ça et je ne sais pas qu'est-ce qui s'est passé  
 269. par la suite. Certains sont dépossédés, donc comme je vous dis sortir de 490 arpents pour  
 270. arriver à 190 arpents, ça soulève beaucoup de question. Ecoutez, je vous remercie si vous êtes  
 271. dérangés.
272. **MRS HOW MAN YOON** :- Non.
273. **MR J. DAVID** :- La Commission a besoin beaucoup de vos lumières.
274. **MRS HOW MAN YOON** :- D'accord, on est à votre disposition.
275. **MR J. DAVID** :- D'ailleurs je profite de l'occasion pour transmettre la remerciement de la  
 276. Commission. Jusqu'ici vous avez énormément aidé. Je sais que les chercheurs viennent chez  
 277. vous très souvent pour retirer certain document, des papiers et vous avez été d'une aide  
 278. précieuse. Et c'est une très bonne collaboration et la Commission vous remercie et encore une  
 279. fois nous allons avoir besoin de votre collaboration.
280. **MRS HOW MAN YOON** :- D'accord.
281. **MR J. DAVID** :- Merci.
282. **MR T. SEEWOO** :- Merci.
283. **DR P. VEERAPEN** :- Tout simplement donc vous n'avez pas les moyens de vérifier des  
 284. documents qui étaient consultés par les membres du public. Vous n'avez pas un moyen  
 285. quelconque pour les faire.
286. **MRS HOW MAN YOON** :- Non, malheureusement il n'y a pas des vidéos caméras, rien.
287. **MR T. SEEWOO** :- Il y a des officiers qui travaillent.
288. **DR P. VEERAPEN** :- Ils savent nécessaire de la faire, il me semblerait-il, d'une part ?
289. **MRS HOW MAN YOON** :- Mais là, très prochainement on est en train d'informatiser nos  
 290. système, je crois juin.
291. **MR T. SEEWOO** :- D'ici juin ou juillet.
292. **MRS HOW MAN YOON** :- Juin, juillet, on va mettre tout sur ordinateur.
293. **DR P. VEERAPEN** :- Mais en attendant on risque d'avoir des problèmes majeurs.
294. **MRS HOW MAN YOON** :- Malheureusement on a demandé à mettre caméra.
295. **DR P. VEERAPEN** :- Mais entre temps ce sera possible pour vous là bas de faire une  
 296. vérification sur une base d'échantillons quelconque. Disons il y a combien de personnes qui  
 297. viennent par jour, disons en moyenne à peu près 100.

298. **MRS HOW MAN YOON**:- Plus.

299. **DR. P. VEERAPEN**:- Disons je prends 200, vous n'allez pas pouvoir vérifier 200  
 300. documents, je comprends. Est-ce que c'est possible de prendre disons 5%. Ça fait 10  
 301. documents, au hasard d'après le système systématique de vérifier ce 10 là va donner quelque  
 302. chose. Bon bien sûr on a un échantillon on le sait, mais en attendant parce qu'on peut dire on  
 303. se rend compte qu'il y a pas mal de cas, pas simplement chez vous. Il y a d'autres institutions,  
 304. des documents qui disparaissent et des documents qui sont faussés. D'accord donc on  
 305. demande aux institutions s'il vous plait, ... l'avis de cette Commission Il y a quelque chose  
 306. qui se passe plus vite encore. Ces activités là sont indépendantes de la Commission. Le fait  
 307. qu'il y a pas mal de cas qui se présente devant la Commission, donc les choses accélèrent et  
 308. on est au courant de cela. Donc, on vous demande si vous pouvez faire quelque chose au lieu  
 309. d'attendre juillet, établir un système de vérification. Je suggère échantillons mais moi je suis  
 310. un profane, vous êtes des experts. Vous êtes des connaisseurs dans le domaine. Réfléchissez  
 311. là dessus, essayez d'avoir des mesures par intérim en attendant que vous arrivez à  
 312. l'information s'il vous plait parce que –

313. **MRS HOW MAN YOON**:- On va informer notre supérieur.

314. **DR P. VEERAPEN**:- On a enregistré pas mal de cas. C'est assez sérieux. Ce matin  
 315. quelqu'un qui nous a dit, j'ai vu un contrat au Archive National de Coromandel, maintenant le  
 316. contrat a disparu. Vous comprenez il n'y a plus maintenant, on n'a plus d'institution, on n'a  
 317. plus, vous comprenez et nous sommes au courant de tout cela. Il y avait un jugement  
 318. important sur la propriété d'un terrain en 1821. Voilà ce jugement a disparu, 200 arpents donc  
 319. encore une fois donc s'est passé chez vous. Donc, je demande s'il vous plait faites quelque  
 320. chose maintenant, n'attendez pas en attendant, regardez, vous êtes des experts.

321. **MRS HOW MAN YOON**:- Oui.

322. **DR P. VEERAPEN**:- Merci, Monsieur et Madame.

323. **MR T. SEEWOO**:- Merci.

**Original Version**

1. **DR V. TEELock** :- Donc, on recommence. On a attendu Mme Sony Choolun, mais Mme Choolun
2. ne vient pas. Pouvez-vous présenter disons, prêtez serment, ok. Vous présentez avec l'aide de Mme
3. Damoree, la secrétaire de la Commission.
4. **MRS DAMOREE** :- Bonjour Mons. Choolun. Si vous pouvez vous mettre debout. Si ou kapav lev ou
5. lame drwat affirme ki ou pou koz la verite rien que la verite pendant la depozision.
6. **MR S. CHOOLUN** :- Mo affirme ki mo pou koz la verite rien que la verite pendant la depozision.
7. **MRS DAMOREE** :- Identifiez vous devant la Commission, kouma ou apele ?
8. **MR S. CHOOLUN** :- Mo nom se Sanjay Choolun.
9. **MRS DAMOREE** :- Ou ou habit ?
10. **MR S. CHOOLUN** :- Avenue 25 ....
11. **MRS DAMOREE** :- Merci.
12. **DR P. VEERAPEN** :- Ou pfer koz en ki lang ?
13. **MR S. CHOOLUN** :- En kreol.
14. **DR P. VEERAPEN** :- Bon en ki tit ou prezan la, Mons. Choolun parski nou finn invit Mme Sony
15. Choolun.
16. **MR S. CHOOLUN** :- Oui, le fe ki depan so laz li pa en bonn sante en se moman. Mo ena la
17. prokuration ki linn donn moi pou –
18. **DR P. VEERAPEN** :- Se enn prokuration ki date de 2008 sa.
19. **MR S. CHOOLUN** :- 2008, oui.
20. **DR P. VEERAPEN** :- Ki laz Mme Choolun ena la ?
21. **MR S. CHOOLUN** :- 83 ans.
22. **DR P. VEERAPEN** :- Oui, li ena problem de sante, me selman li ti importan ki ou kone ki nou ti
23. prefer kapav tann Mme Choolun en person.
24. **MR S. CHOOLUN** :- Oui, be ou kone seki mo ti pou dir, seki monn gagn enn short notice. Monn
25. gagn la let mercredi et jeudi, hier monn rappel isi pou demande eski o fe mo ti pe demande si nou
26. kapav gagn en renvwa mo kapav amen madam la ensam.
27. **DR P. VEERAPEN** :- Ale right.
28. **MR S. CHOOLUN** :- Koumsa lerla mo kapav prepar tou le done et dokuman.
29. **DR P. VEERAPEN** :- Ok, dakor. Bon dan lekel ka mo pense se posibil sa, sinon ou kapav fer nou
30. gagn sa prokuration dabor, nou pou fer enn kopi de sa prokuration la. Si ou pou dakor nou pou fer en
31. kopi de sa prokuration la, me etan done nou nou ti pe interese kapav ekout Mme Choolun. Ou reket
32. nou pou agre a ou reket, ki nou kapav fer enn renvwa. Nou ava donn zot plis letan, ok, notre konseye
33. legal Mons. François, oke. A ce moman la lerla nou kapav gagn version Mme Choolun. Etan done se

- 34. enn Choolun sa generasion la li paret li ti implik dan sa bann tranzaksion la. Li ti tre importan.
- 35. Absoluman importan ki li vini, dakor, ok. Alor ceci dit, mo pou simpleman pas enn parol a komiser
- 36. Mons. Jacques David ki get dosie la pou li kapav fer enn de komanter parski sinon nou pou renvway
- 37. la seans nou pou invit ou pou enn prosin seans, merci.
- 38. **MR J. DAVID** :- Oui, merci. Donc si nou gete ounn gagn enn prokurasion et mo dout for ki sa
- 39. prokurasion la donn ou enn pouvwar pou vinn explik sa ka la devan la Commission parski
- 40. imediatman mo kapav dir ou ki nou pou donn ziska vendredi prosin. Si Mme Choolun kapav vini, ou
- 41. akompagn li parski ou dir moi li ase aze et ki li pa tro tro bien nou ou donn li donc vendredi prosin a
- 42. 1.30 hrs. Si li kapav vini donc se sa ki li ena, donc enn semenn li kapav prepar li, li rod so bann
- 43. dokuman et tou. Donc a se moman la nou va atann li, ok, merci oun deranze. Me nou bien sagrin, se
- 44. surtou elle ki nou ti pe envi tande. Ok, merci bokou. Je repasse la parole a mes collègues.
- 45. **DR P. VEERAPEN** :- Ok, bon donc merci.
- 46. **MR S. CHOOLUN** :- Merci.
- 47. **DR P. VEERAPEN** :- I declare therefore the session for today closed.

### MORNING SESSION

**Mr SAUZIER T**

This is to certify that the following **09** pages are a true and accurate version of the audio recordings of Friday 13<sup>th</sup> May 2011 (Afternoon Session-Original Version)

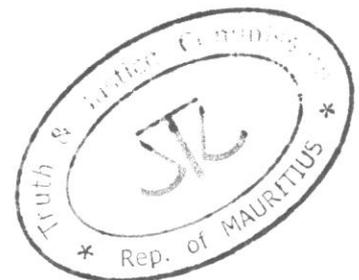

(L R Luckhoo)

Contractor

Date: 29<sup>th</sup> June 2011

TJC/H/Sauzier T/130511Af  
Original Version

1 DR VEERAPEN : We are starting the afternoon session of the Truth & Justice Commission and  
2 today we have got the Chief Executive Officer of Medine Ltd

3 MR T SAUZIER: Deputy Chief Executive

4 DR VEERAPEN : Deputy Chief Executive Officer of Medine Ltd whereby we shall deal with  
5 the case dealing with the whole issue of the purchase by Medine of Reufac, o.k. and there is a  
6 piece of land which is in litigation following the submission of the case by a deponent here. So  
7 we will call the Deputy Chief Executive Officer of Medine here to be able to help us in our  
8 research and to be able to establish what are the real issues, o.k.

9 With this in mind therefore, Mr Thierry Sauzier, I understand that's your name o.k. So we are  
10 pleased to meet you today, we will like you please if you can with the help of the secretary, Mrs  
11 Damory, to take oath, right and then we will start the interaction with you.

12 THE SECRETARY: Vous voulez parler en anglais, français ?

13 MR T SAUZIER: Français

14 THE SECRETARY: Vous pouvez vous mettre debout s'il vous plait, vous pouvez la main droite  
15 et affirmer que vous allez dire la vérité et rien que la vérité pendant la déposition

16 MR T SAUZIER : Je vais le faire

17 THE SECRETARY : Vous pouvez répéter s'il vous plait

18 MR T SAUZIER: Je vais dire la vérité, rien que la vérité

19 THE SECRETARY : Merci identifiez-vous devant la commission, identifiez-vous comment  
20 vous vous appelez ?

21 MR T SAUZIER: Jean Thierry Sauzier et je suis deputy Chief executive officer de Medine Ltd

22 THE SECRETARY : Merci, vous pouvez vous asseoir

23 DR VEERAPEN : O.k. I will now, you are free to express yourself in English, French or creole,  
24 you choose the language which you would like to choose

25 MR T SAUZIER: Français

26 DR VEERAPEN : O.k. and then I will pass over to Mr Jacques David who has been dealing with  
27 this case, o.k.

28 MR J DAVID: Merci, bonjour et merci d'être venu et d'avoir accepté notre invitation donc pour  
29 traiter de ce cas. Il y a plusieurs cas qui nous intéressent et touchant aux terres vendues, achetées  
30 par Médine donc, les terres touchant surtout l'ancienne propriété de Réunion et le cas qui nous  
31 intéresse aujourd'hui donc c'est le cas Bonnefin.

32 Je ne sais pas donc si vous êtes si vous comprenez bien cet état de situation concernant ce terrain  
33 ou si vous avez été emmené à vous pencher sur ce problème. Donc c'est de ça qu'on aurait voulu  
34 parler aujourd'hui

35 MR T SAUZIER: Oui bein merci. Personnellement nous ne pouvons savoir le terrain, nous  
36 n'avons pas eu beaucoup de détail de la part de la commission par rapport au terrain qui était en  
37 litige. Donc nous aurions souhaité avoir peut-être un peu plus de détail pour pouvoir investigate  
38 et revenir vers la commission avec plus de réponses aujourd'hui donc.

39 Personnellement moi je suis rentré dans la compagnie très récemment et donc je n'étais pas là au  
40 moment du transfert du terrain à l'époque mais par contre nous allons collaborer pleinement pour  
41 fournir les documents nécessaires à la commission afin de vous éclairer dans votre travail.

42 MR J DAVID: Oui

43 MR T SAUZIER: Donc personnellement je ne suis pas très au courant du cas parce que je ne sais  
44 pas

45 MR J DAVID: Vous arrivez tout juste donc

46 MR T SAUZIER: Au faite Médine n'est pas trop au courant de what is the claim ?

47 MR J DAVID: O.k.

48 MR T SAUZIER: De la part des Bonnefin.

49 MR J DAVID: Oui

50 MR T SAUZIER: Donc c'est pour ça qu'on n'a pas penché sur le dossier. Moi j'ai porté avec  
51 moi deux titres de propriété que nous pensons être les titres de propriété dont on est en train de  
52 parler mais nous sommes pas 100% sûr de cet état de chose.

53 MR J DAVID: Oui, bon si vous avez les documents on peut jeter un coup d'œil rapidement et de  
54 ce fait nous allons voir s'il s'agit bien de ce terrain. Merci. Au fait il s'agit bien des titres de  
55 propriété touchant à Reufac anciennement Réunion Ltée ?

56 MR T SAUZIER: Oui

57 MR J DAVID: Donc si je revois donc c'est un document donc qui a été signé en 1994 si je me  
58 trompe ?

59 MR T SAUZIER: C'est un document qui a été signé en 1974

60 MR J DAVID: 74, pardon, 74

61 MR T SAUZIER: et 77

62 MR J DAVID: Voila hein, donc ce document a été dressé par Pierre Doger de Speville donc  
63 entre les représentants de Réunion et le représentant de Médine et je vois le nom d'un quelqu'un  
64 qui vient de partir, donc Mr Christian Rivalland qui à l'époque était donc le représentant de la  
65 compagnie Noel

66 MR T SAUZIER: Exactement

67 MR J DAVID: Noel hein, écoutez effectivement il s'agit bien de ce document mais vous n'avez  
68 pas allons dire entièrement en tête ce que contient ce document, ce n'est pas évident je sais?

69 MR T SAUZIER: C'est un document qui est très long et fastidieux

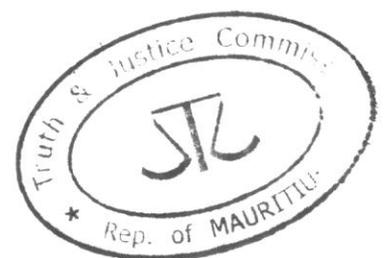

70 MR J DAVID: Fastidieux

71 MR T SAUZIER: Et dont je ne suis pas forcément un technicien notarial...

72 MR J DAVID: Oui

73 MR T SAUZIER: ...ni un technicien du land surveying ou des titres de propriété non plus

x

74 MR J DAVID: Bien sûr, écoutez ce serait difficile pour moi à ce moment là donc de vous poser  
75 des bonnes questions parce que vous n'allez pas pouvoir avoir les réponses forcément

76 MR T SAUZIER: Absolument je pourrais essayer...

77 MR J DAVID: Ce que je peux convenir si après avoir prit lecture de vos documents et de ce que  
78 nous avons parce que nous avons des plans de situation et autres ; est-ce que nous pourrions  
79 ensemble avec ceux qui disent avoir donc un claim sur ce terrain avec nos arpenteurs et vos  
80 représentants aller voir le terrain aller faire un constat, est-ce que ça...

81 MR T SAUZIER: Nous nous sommes dans une logique de collaboration totale à l'intérieur des  
82 droits et de la législation existante de la commission

83 MR J DAVID: de la commission bien-sûr

84 MR T SAUZIER: Si ça fait partie de vos prérogatives il n'y a pas de raison pourquoi on ne  
85 pourra pas le faire mais je ne suis pas ni un lawyer ni un notaire donc nous on est là pour  
86 collaborer en tout cas entièrement avec la commission pleinement

87 MR J DAVID: Oui si donc dans le courant de la semaine nous arrivons nous à faire une  
88 délimitation selon un plan de réunion que nous avons déjà et nous arrivons à situer  
89 l'emplacement de ce terrain bien-sûr accompagné de vos land surveyors

90 MR T SAUZIER: Les techniciens, oui

91 MR J DAVID: de vos techniciens, on va sur place et à ce moment là on verra quels sont vos  
92 titres. Il est très facile si nous allons sur un point x, y, z, nous allons pouvoir délimiter. A partir  
93 de là vous pourriez dire si vous êtes d'accord ou que ce terrain vous appartient ou ce terrain est  
94 en litige, à ce moment là donc nous allons voir dans vos documents où se situe ce terrain là

95 MR T SAUZIER: D'accord

96 MR J DAVID: Donc je...

97 MR T SAUZIER: Je crois, si je peux me permettre ?

98 MR J DAVID: Bien sûr je vous en prie

- 99 MR T SAUZIER: Je demande humblement à la commission de nous donner tout d'abord un peu  
100 de temps pour réagir
- 101 MR J DAVID: Bien sûr
- 102 MR T SAUZIER: Nous avons des équipes et beaucoup de projets sur qui ils travaillent
- 103 MR J DAVID: Oui
- 104 MR T SAUZIER: Donc de nous donner un délai raisonnable
- 105 MR J DAVID: Raisonnable
- 106 MR T SAUZIER: Afin qu'on puisse agréer à votre requête d'une part et si aussi si on pouvait  
107 avoir vraiment de détail du claim je veux dire qui est fait aujourd'hui vis-à-vis de Médine
- 108 MR J DAVID: De Médine, oui
- 109 MR T SAUZIER: Quoi que nous nous n'avons pas de raison de croire que ces titres de propriété  
110 là ne sont pas valides
- 111 MR J DAVID: Oui
- 112 MR T SAUZIER: Il y a eu un transfert qui a été fait à l'époque mais c'est très important que  
113 nous obtenions les détails du claim pour que nous puissions faire notre travail aussi de notre côté  
114 au préalable
- 115 MR J DAVID: Bien sûr
- 116 MR T SAUZIER: De nous donner un délai raisonnable pour fixer la visite
- 117 MR J DAVID: la visite
- 118 MR T SAUZIER: Si c'est possible d'avoir les détails en écrit aussi ce serait bien...
- 119 MR J DAVID: Bien sûr, par ailleurs puisque vous êtes là donc j'aurais souhaité savoir, est-ce  
120 que vous auriez un master plan vous de...
- 121 MR T SAUZIER: Au faite à ces titres de propriété là n'étaient pas attachés le plan de situation

122 MR J DAVID: Le plan de situation

123 MR T SAUZIER: Et comme nous n'avions pas de détail exact de what is the claim

124 MR J DAVID: Oui

125 MR T SAUZIER: C'est un peu difficile pour nous de venir donner un master plan vous voyez

126 MR J DAVID: Oui dites moi mais à partir donc vous avez votre titre de propriété et tous les  
127 détails...

128 MR T SAUZIER: Absolument...

129 MR J DAVID: ...couvrant cette superficie de Réunion, vous n'avez pas fait votre master plan en  
130 conformité...

131 MR T SAUZIER: On a fait des recherches par rapport à ce titre que nous pensions être le bon  
132 titre pour ce hearing là aujourd'hui, il n'y avait pas de plan de situation attaché à ces titres de  
133 propriété là

134 MR J DAVID: Oui

135 MR T SAUZIER: Donc c'est pour ça qu'on ne pouvait pas fournir ce titre de propriété....

136 MR J DAVID: Allons dire pour Réunion Ltée est-ce que vous auriez un plan de situation ?

137 MR T SAUZIER: Nous allons devoir aller chercher dans nos archives ce plan de situation

138 MR J DAVID: S'il vous plait, ça nous aiderait énormément d'une part, nous nous allons lire  
139 donc au faite je l'ai déjà lu parce que la commission aussi a fait son travail autant que pour vous  
140 c'est petit et pour nous nous avons donc tout le plan de situation que j'ai lu et merci de nous  
141 avoir fait parvenir ces copies.

142 Le travail est là mais avec ce qu'on appelle le site plan, le plan de situation ça nous aurait donné  
143 donc une plus grande visibilité sur tel terrain se trouve où et qu'est qu'il y a parce que là dans  
144 nous avons quand même huit chapitres

145 MR T SAUZIER: Absolument

146 MR J DAVID: Huit chapitres où vous détaillez tous les terrains qui ont été achetés de Réunion  
147 donc par Médine. Je crois que ces huit chapitres sont assez clairs d'où le fait comme je vous dis  
148 si nous allons sur le terrain après que nous ayons donc fait un plan de situation à ce moment avec  
149 les parties concernées, nous allons pouvoir et je crois que dans deux ou trois jours près, vous  
150 pouvez nous dire donc si il y a un TV number si c'est enregistré, donc

151 MR T SAUZIER: Absolument donc nous allons faire notre home work nous aussi

152 MR J DAVID: Voila

153 MR T SAUZIER: Simplement on a besoin d'avoir les détails précis et écrits...

154 MR J DAVID: Tout à fait

155 MR T SAUZIER: Et avec les différentes requêtes pour pouvoir soumettre toute la documentation  
156 nécessaire

157 MR J DAVID: Certainement

158 MR T SAUZIER: Et ensuite on va faire le travail within les paramètres

159 MR J DAVID: Oui les paramètres qu'il faut

160 MR T SAUZIER: Et de l'organisation totale globale de notre travail aussi afin de coopérer avec  
161 vous

162 MR J DAVID: Très bien je crois que l'on s'entend donc...

163 DR VEERAPEN : Envoyer le claim

164 MR J DAVID: Donc ce que nous faisons, allons dire la semaine prochaine hein nous vous  
165 enverrons donc un papier

166 MR T SAUZIER: Très bien

167 MR J DAVID: Disons bien et voila le claim et de quoi il s'agit

168 MR T SAUZIER: O.k.

g

169 MR J DAVID: Et à ce moment là...

170 MR T SAUZIER: Au faite on vous a écrit aussi je crois hier on a déposé un lettre

171 MR J DAVID: Oui j'ai eu la lettre

172 MR T SAUZIER: Et j'ai signé personnellement pour vous dire si vous pouvez enfin ce que je  
173 viens de vous dire

174 MR J DAVID: Voila moi je suis entièrement d'accord, donc il y a un esprit de collaboration bien  
175 sûr

176 MR T SAUZIER: Absolument

177 MR J DAVID: Parce que pour nous nous devons trouver la réponse à chaque cas qui nous est  
178 soumis. Donc nous allons de l'avant, voir tout ça et vous allez avoir votre réponse et on aura  
179 notre réponse

180 MR T SAUZIER: Très bien

181 MR J DAVID: Merci

182 DR VEERAPEN : O.k. merci Jacques. Tout simplement donc une fois qu'on vous fera avoir les  
183 détails de notre claim d'accord, combien de temps vous croyez vous aurez besoin enfin ?

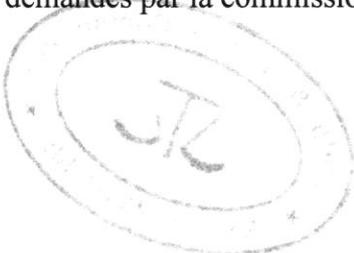

184 MR T SAUZIER: Ecoutez c'est un peu c'est difficile pour moi de répondre là tout de suite...

185 DR VEERAPEN : Oui, oui

186 MR T SAUZIER: Parce que ça va dépendre de la quantité de travail

187 DR VEERAPEN : Certainement, oui

188 MR T SAUZIER:....associé aussi à vos requêtes et comme on n'a pas vraiment de détail des  
189 requêtes c'est difficile à dire, ça va dépendre de la disponibilité de nos arpenteurs et de nos  
190 consultants interne et externe mais je redis qu'on va faire le nécessaire pour que ce soit fait dans  
191 les délais les plus brefs par rapport au load de travail qu'il y a et par rapport aux détails  
192 demandés par la commission

193 DR VEERAPEN : Oui bon certainement et naturellement je comprends, je comprends moi les  
194 contraintes de par et d'autre mais simplement je vous demande cela peut-être on va faire des  
195 liaisons, on va pouvoir planifier pour que ça puisse vous aider de votre part et de notre part, du  
196 côté de time management aussi, o.k.

197 MR T SAUZIER: Absolument

198 DR VEERAPEN : Et pour pourvoir donc ensuite faire le suivi. O.k. alors vous aurez donc le  
199 claim la semaine prochaine et ensuite à partir de là, on va faire le suivi et planifier les rencontres  
200 et en fin de compte

201 MR T SAUZIER: Très volontiers, merci

202 DR VEERAPEN : O.k., alors merci. Donc la séance est terminée et c'est clos pour aujourd'hui,  
203 merci.

JUSTICE COMMISSION

Friday 20 May 2011

Morning Session

## **Members Present**

Dr Vijaya Teelock - Vice Chairperson  
Dr Parmaseeven Veerapen - Commissioner  
Mr Jacques David - Commissioner

**Chairperson of Session:** Dr Vijaya Teelock

**Apology:-** Dr Alex Boraine  
Mr Benjamin Moutou

## **In attendance**

Mr Geerjanand Prithvinath, Manager of DBM (Deponent)

Mr Teeromalay, Assistant Manager of DBM (Deponent)

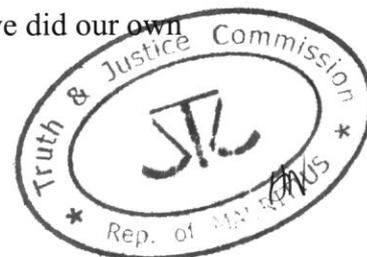

**TJC/H/Geerjanand P./20.05.11/Me**

**Original Version**

HN

1. **DR V. TEELOCK**:- Short hearing for you. Mrs Damoree, our secretary, is going
2. to make you swear.
3. **MRS DAMOREE**:- Could you please raise your right hand and affirm that
4. whatever you will say will be the truth nothing but the truth.
5. **MR P. GEERJANAND**:- I affirm.
6. **MRS DAMOREE**:- You must repeat, please.
7. **MR P. GEERJANAND**:- Whatever I am going to say, I am going to say the
8. truth and nothing but the truth.
9. **MRS DAMOREE**:- Can you identify yourself before the Commission?
10. **MR P. GEERJANAND**:- My name is Prithvinath Geerjanand and I am
11. working as Manager at the DBM, Development Bank of Mauritius.
12. **MRS DAMOREE**:- Thank you. Mr Teeromalay, could you please?
13. **MR TEEROOMALAY**:- ... Teeromalay, Assistant Manager of
14. Development Bank of Mauritius. I swear to tell the truth, only the truth.
15. **MRS V. TEELOCK**:- Thank you, I think you know why you are here today.
16. When you came last time, you had mentioned that there are certain irregularities in
17. the document and you are going to provide some details about them.
18. **MR P. GEERJANAND**:- Yes.
19. **MRS V. TEELOCK**:- So, I will ask you to go ahead and provide these details.
20. **MRS P. GEERJANAND**:- In fact, we didn't use the word irregularities, we had
21. mentioned that after sanctioning the loan, some disturbing information were received
22. concerning the risks that may be involved in the sanctioning of such a huge amount
23. backed by a collateral security in terms of the property which was being given at that
24. time. In view of the risks which were involved, we were requested by our board to
25. find out more information. When we did our search, we found that there may be some
26. – the risk involved was more apparent. So, the bank decided that instead of taking
27. such a big risk for this amount, we requested the applicants to provide an alternative
28. security. So, when the processing of the loan was going on, we are today giving
29. copies of the documents which were initially submitted for the bank to consider the
30. loan. This is a first batch which was submitted by the applicants.
31. **MRS V. TEELOCK**:- This is the alternative security?
32. **MR P. GEERJANAND**:- No, the alternative security has not yet been given,
33. has never been given. Now, after we got disturbing news and we did our own

34. searches and research, then we came out, we got copies, additional copies of other  
35. title deeds which confirm the probability of risks concerning this property. I am  
36. submitting now the documents which we now have obtained ourselves.

37. **MRS V. TEELock**:- Could you summarise the documents just briefly?

38. **MR P. GEERJANAND**:- The documents which we have submitted second  
39. batch shows a lot of similarities, a lot of overlapping between the property which was  
40. given as security originally and the other title deeds which we have obtained from the  
41. efforts we have made. There are drawings where it is clear that there is a little bit of  
42. overlapping of the property of different owners. So, again we cannot say that we have  
43. been able to confirm all these things, but as a bank, our main concern was to give a  
44. loan of Rs50M and to obtain a clear property of the value to cover that loan and since  
45. this one had a lot of difficult questions to be answered, we preferred to ask the  
46. applicants to provide alternative security. So, we sent letter to the applicants and we  
47. also got a reply from the applicants confirming that they will provide an alternative  
48. security and will pay whatever legal cost that have been involved so far and I am  
49. handing copies of these two documents, the one which the bank had sent a letter and  
50. the reply where the clients confirmed that they will provide an alternative security  
51. and they will also pay the legal fees.

52. **DR V. TEELock**:- Just to clarify, you did not ask them to confirm or provide  
53. additional documents confirming the ownership of the land?

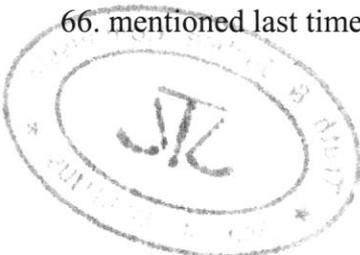

54. **MR P. GEERJANAND**:- In the first batch of documents which I have  
55. submitted, initially the applicants had submitted only one document which was not a  
56. clear titled deed. So, we requested first to get a clear title deed with a survey report  
57. and you will see in the first batch, in the first document, there are some mentions  
58. below by our officers that they will require additional information and this is  
59. followed by the additional information which was submitted.

60. **DR V. TEELock**:- So, you were satisfied that the title deeds and additional  
61. information supplied were satisfactory for the bank?

62. **MR P. GEERJANAND**:- Standard documents that we usually require to  
63. complete our legal formalities, loan deeds.

64. **DR V. TEELock**:- And what has been the outcome?

65. **MR P. GEERJANAND**:- The outcome was that until today, as we have  
66. mentioned last time, we have not disbursed, we are still waiting as undertaken by the

67. applicants that they will provide alternative security. But we have also mentioned in  
68. our documents, due to time lapse, more time it takes, we will require to re-examine  
69. the project.

70. **DR V. TEELock**:- Just for the record, what time lapse there have been now  
71. between the original submission and -?

72. **MR P. GEERJANAND**:- So, the whole story started, they applied in August  
73. 2008 and the loan was approved by the board in October 2008 and after carrying out  
74. our own investigation, we reached March 2009 when we informed the clients, the  
75. applicants that we will require alternative security.

76. **DR V. TEELock**:- And how much more time do these applicants have now?

77. **MR P. GEERJANAND**:- Basically when we send a letter of loan offer, it is  
78. already got, if I am not mistaken, three months time, but if in case there are  
79. continuous correspondences between the client and the bank, this shows that there is  
80. still the interest of getting the loan. Now, as I have mentioned, since we have not got  
81. any further reply to the letter that was addressed to us, even if the clients come back  
82. to the bank with alternative security, we will have to re-examine the whole proposal  
83. in view of present circumstances.

84. **DR V. TEELock**:- I will pass on to Mr David and Dr Veerapen.

85. **MR J. DAVID**:- Good morning, first of all you talked about the disturbing factors  
86. that you find before, you issued a new letter saying you need a new security. Before  
87. you went on research, what are the disturbing factors?

88. **MR P. GEERJANAND**:- Unfortunately, the bank has got a board of directors  
89. and these loans are submitted for approval at the level of board of directors. Once it  
90. was approved, it is ratified in the next board and we got information from our  
91. managing director that some members of the board that they have requested the bank  
92. to review this case because they feel that there is some problem relating to the  
93. security. This is what prompted us to go ahead for more information.

94. **MR J. DAVID**:- But they did not give any specific information as to -?

95. **MR P. GEERJANAND**:- No, we didn't get any specific information and even  
96. up to today the bank cannot confirm whether there is a problem on this, but as I  
97. mentioned, we found that there are risks involved. So, we preferred to mitigate the  
98. risks.

99. **MR J. DAVID**:- Tell me, the loan was asked ... guarantee of 490 arpentis or only on 190, can

EW

100. you recall what was the security handed over?

101. **MR P. GEERJANAND**:- Our Security was –

102. **MR J. DAVID**:- Was it on 490 or 190 arpents?

103. **MR P. GEERJANAND**:- As security, we had a fixed charge on 62¼ arpents or 26

104. Hectares 2749 m2 found at Coteau Raffin belonging to Mrs Sunee Choolun.

105. **MR J. DAVID**:- The last time you were here, you talked about the loan of Rs50M, the  
106. erasure has not been done yet at the Conservator of Mortgages. Has it been done now?

107. **MR P. GEERJANAND**:- Not yet.

108. **MR J. DAVID**:- So, still pending, they are owing you Rs50M?

109. **MR P. GEERJANAND**:- No. If you go through the letters which we have sent, last two  
110. letters, they are replied by K Call Centre. They have acknowledged that they will come  
111. forward with an alternative security pending which and they have agreed they will erase the  
112. charge on this particular property once the legal cost has been settled.

113. **MR J. DAVID**:- So, following what you just said, so they are still on with the project,  
114. they are still on to get the loan from the bank?

115. **MR P. GEERJANAND**:- We have not got any further correspondence till then. So, we  
116. will not be able to say whether the parties are still interested with the project or not.

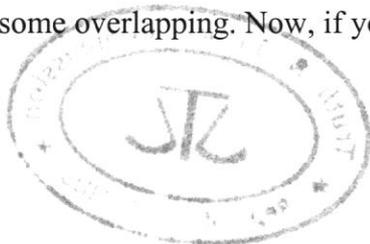

117. **MR J. DAVID**:- Okay, thank you.

118. **DR P. VEERAPEN**:- Now, you've talked of first set of documents, this is clear,  
119. second set of documents, okay. The second set of documents, the title deed for the same  
120. property or for a different property? Could you a bit more elaborate on that?

121. **MR P. GEERJANAND**:- I will request my colleague to –

122. **DR P. VEERAPEN**:- Okay.

123. **MR TEEROMALAY**:- I would like first to say that the first document that we received  
124. was from an unknown source. We have our research officers, we call them verification  
125. officers, they go everyday to the Registrar Office to make searches. Now, they gather from  
126. one of the colleagues over there that really there might be some problems of ownership on  
127. that particular property and it happens that he did have a copy of the location plan from one of  
128. them. Unfortunately we can't say from whom because they did not want to say from where  
129. they got it. We did get that copy and on that copy we requested for transcriptions copies and  
130. certified copies from the Conservator and from there we happened to know, they might not be  
131. the same property, but it tends to be the same property. As my colleague say there must be  
132. some overlapping. Now, if you look at the location plan, it appears to be the same property

133. and from there, you will find on the title deeds given, they are different owners, Société du  
134. Morne Brabant, Le Petit Morne, they are different owners. This is why we say okay, we can't  
135. accept that property because we are not clear about the ownership of that property.  
136. **DR V. TEELock**:- That's all the questions we have for today. Thank you for all the  
137. documents you have supplied.  
138. **MR P. GEERJANAND**:- Thank you.

## Preface

Volumes three and four contain all the research reports, technical studies and surveys carried out by the team of consultants, researchers and volunteers appointed by the Truth and Justice Commission. Where the Commission could not find appropriate or qualified persons, Commissioners have headed teams of younger researchers to study a particular topic. The mandate of the Commission is to investigate the history of slavery and indenture, its consequences and suggest reparations. It was clear that two years would not allow for the task of reviewing 350 years of history and consequently, the Commission focused on a number of topics for in-depth study. Assessing the consequences or even identifying descendants was less easy as the reports show, since so few Mauritians are aware of their history and still less of their family history. Consultants, scholars and researchers have expressed their personal views on issues, and it is clear that not all views converge. The Commission has studied and considered all views expressed and given its own views in its report in Volume 1. It is understood that the views expressed here are those of the writers themselves, and not those of the Commission.

There are many myths and perceptions about Mauritian history that Mauritians have. This has become evident from the nationwide surveys undertaken by the Commission to seek the views of, not only those who are vocal and visible, but also of Mauritians who do not normally have the chance to express their views publicly. The analysis of these surveys by various consultants and researchers are reproduced here, while the original interviews and transcripts are to be found in Volumes 5 and 6. Some interviews have been 'anonymised' to protect the interviewees.

The studies were regrouped under twelve projects monitored by the Commission. In each project, a Team Leader was appointed responsible for guiding and supervising the studies and preparing the final report for the Commission. In some projects, however, Team Leaders could not be found and so Commissioners acted as Team Leaders.

The most important set of studies for the Commission has been those which directly examined the situation of 'descendants' of slaves and indentured labourers and which sought their views. However, it was important also to study descendants of slave owners as well, since slavery is both about slaves and slave owners. Among descendants of slave and indentured labourers, *métissage* has led to difficulties in identifying who were descendants, and it is clear in Mauritius, that phenotype is the popular delimiting factor in deciding who may be a descendant of a slave or indentured labourer. Yet these stereotypes are not only misleading but dangerous and need to be vigorously corrected. Not all 'blan' (white) are descendants of slave owners, as not all those with an African phenotype are descendants of slaves, and not all Indians were indentured labourers. For the population of mixed origins, we have used the term 'gens de couleur' to refer to descendants of the following relationships: a) whites and Afro-Malagasy and b) whites and any other group. These represent also persons of a higher social class.

It is, above all, the variety of life experiences of Mauritians that is highlighted in these studies, and it is hoped that they will provide material for institutions and individuals in the future to better plan people-centred policies, more in line with Mauritians' wishes, interests and expectations.

Vijayalakshmi Teelock GOSK

## INTRODUCTION

This oral history project research has been commissioned by the Truth and Justice Commission to document and preserve the memories and views of people who consider themselves as slave descendants. It surveys the collective memory of the people who have a particular knowledge of the history, culture, lifestyle, heritage and traditions of slaves, ex-slaves and their descendants. The survey covers the islands of Mauritius and Rodrigues, Agaléga, Chagos and aims at uncovering the following topics identified by the Truth and Justice Commission:

- A. Experience of inverse and adverse racism
- B. Contributions of slaves and their descendants to the economic, political, social and cultural life of Mauritius
- C. Perceptions of slavery and its consequences
- D. Perceptions of descendants of slaves and indentured labourers
- E. Life histories of the individuals, their parents and grandparents
- F. Particular constraining experiences of living in *cités* (coastal and non-coastal) and occupation etc.
- G. Causes of illiteracy
- H. Causes of landownership and causes for loss of land
- I. Perceptions of other ethnic and cultural groups and their history
- J. Experience at work-place taking into account social, ideological, psychological and historical factors
- K. Expectations and hopes for the future

## METHODOLOGY

The University of Mauritius was asked to take over the assignment. An academic team composed of seven Researchers under the direction of Associate Professor Jocelyn Chan Low (Historian) was set up. The island was divided into seven regions under the responsibility of a regional coordinator as follows:

- Assoc. Prof. Arnaud Carpooran (Socio-linguist): Port Louis North and South
- Dr. Danielle Palmyre (Anthropologist): Lower Plaines Wilhems
- Daniella Bastien (Anthropologist): Upper Plaines Wilhems
- Raviraj Beechook (Historian): East and South East (Flacq and Grand-Port Districts)
- Ms. Sophie Le Chartier (Anthropologist): West and South West (Black River and Savanne District); North (Pamplemousses and Rivière du Rempart Districts) and Rodrigues

Each Researcher was assisted by Research Assistants who acted also facilitators and interviewers. For each region, around 30 interviews were conducted.

The terms 'slavery, slaves and slave descendants' convey diverse meanings for different people. Hence, first, for the project to reflect people's idiosyncratic perceptions, conceptions and beliefs, and second, to avoid any bias and preconceptions which could jeopardise the validity of this study, the informants were asked to define and identify themselves, how they conceptualise the above-mentioned terms and how they define their origins without any subjective intervention of the

interviews. However, in the Port Louis region, the team interviewed only those whom they identified as potential slave descendants and the facilitators were chosen likewise.

Given the short time-span for carrying out 200 in-depth interviews, key informants had to be identified. To ease the identification process, a questionnaire about the nature of the study was designed with focused and basic questions on the topics that have to be investigated and as per the profile of the interviewees.

For Rodrigues, a local facilitator/research assistant, familiar of local realities was responsible for identifying key informants and only one regional coordinator was responsible for compiling and collecting testimonies. The informants were mainly men and women aged 50 years old and above, Mauritians, Rodriguans, Agaleans and Chagossians who identify themselves as descendants of slaves. The sample was representative of the various occupational activities, both white collar and blue collar workers.

Semi-structured interviews were conducted. Face-to-face semi-structured interview methods have been chosen because they are considered effective in yielding insights into people's personal opinions, attitudes and values and expressed in their own words. It is also efficient in providing in-depth information. In addition, since informants might have a low literacy level, they would feel more confident when using their verbal aptitudes than writing skills. A better response rate was thus obtained.

For methodological purposes and to make interviewees feel comfortable, the interviews were conducted in Creole. However, some interviews were in French for those who felt more at ease in this medium. The informants chose the time, date and venue of the interview, the duration of which was not more than two hours.

Since Rodriguan informants might have felt uncomfortable in front of a stranger who is not a native of Rodrigues, the local facilitator assisted the researcher during the interview. Two interview guides were designed, translating the aims of the study. Given that the slave history of Rodrigues Island differs from that of Mauritius Island and, consequently, that the experiences of Rodriguans and Mauritians, might diverge, a different interview guide was designed for Rodrigues to reflect Rodriguans' reality. Open-ended questions were used to encourage the informants to talk freely and the guides were translated into Creole.

In line with the aims of the project, the questions were regrouped under fourteen main topics:

1. Life History
2. Literacy
3. Family History
4. Property
5. Identity/Perception of descendants of slaves
6. Slavery and its consequences
7. Contribution of slaves and their descendants to the economic life of Mauritius
8. Contributions of slaves and their descendants to the political life of Mauritius
9. Contribution of slaves and their descendants to the social life of Mauritius
10. Contribution of slaves and their descendants to cultural life of Mauritius
11. Slavery and its consequences and perceptions of descendants of slaves
12. Life in *cités*
13. Perceptions of other ethnic and cultural groups
14. Racism
15. Expectations and hopes for the future

The interviews were conducted in an ethical way as per the code of ethics of the American Anthropological Association. This included explaining the aims of the project, the procedure related to copyright, right to anonymity, etc. A written consent form was designed to ensure that the anonymity of the informants and their copyright privileges would be respected (Please refer to Appendix D for copy of consent form). The consent form was translated into Creole. In instances when the informant was illiterate, the facilitator or a family member signed the consent form as a witness.

A written consent form was obtained to ensure that the anonymity of the informants and their copyright privileges would be respected.

The interviews were audio taped. Data collection took more than four months.

## ORGANIZATION

The start of the project was delayed due to several unforeseen circumstances; initially, the project was designed and organized so as to start in November 2009. However, it was delayed because of legal issues to be cleared and as result of changes at the TJC. The interviewing process was further delayed by the unexpected announcement of General Elections which the academic team felt would greatly influence the research which covered also politics and slave descendants' perceptions of other ethnic groups. It was further delayed by the resignation of one member of the Academic Team from UOM to proceed abroad and finally by the acute shortage of voice recorders on the local market after the General Elections.

The initial 400 interviews were halved later on conditions that transcriptions of the tapes be effected. However, the team decided on a more exhaustive report which meant working on all the interviews for the report instead of a sample. This greatly delayed the transcription process.

Moreover, the submission of the report for the Port Louis region was considerably delayed by the hospitalization of a key investigator at the Burns Unit at Candos Hospital. The interviews of the Chagossians could only be carried after the New Year festivities.

### Interviews

- (a) The questionnaire was tested among individuals from various socio-professional categories perceiving themselves as slave descendants. After testing, it was obvious that the questionnaire could not be put to respondents as it was. It was too academic and hard and they quickly lost interest in answering. The team members opted for an open question as a starter with other questions on particular subjects where it seemed necessary. It was more fruitful to let respondents narrate their own story around the topics which seemed important to them, while providing a leading thread.

But for the East and South-East (Flacq and Grand-Port Districts), it turned out to be a more "récit de vie" type of research. The questionnaire, in fact, dictated much more the interview, with the informant answering mostly to the questions asked to him or her rather than narrating his or her life or past experiences.

A major difficulty was the lack of understanding of the word 'descendants' by most respondents. This being the crucial entry point, it took time to make them talk about this topic, but the life narratives were easier. Respondents could reflect on their own lives and the lives of their families and organize their thought in a rational way

- (b) One major obstacle was the fact that the informants were most of the time not aware of the existence of the Truth and Justice Commission. To make them sign the consent form was even more difficult. It took much time and, at times, several meetings to educate them about the project, win over their trust and make them participate in the project.

- (c) Some people who, according to people surrounding them, have heard a lot about stories related to slavery simply refused to participate in this project, as they felt it was useless and that it was not going to be of any benefit to them.
- (d) The whole section of the questionnaire relative to slavery and its consequences and on the contribution of slaves to economic, political, social and cultural life in Mauritius was very difficult for the respondents. Most of them did not understand what was expected of them, and it was impossible to put the questions in such a detailed manner.
- (e) There were the time constraints and fatigue of respondents. For the Sections H, I, J, K on the economic, political, social and cultural contribution of the slaves and descendants being too lengthy, many respondents gave no answers. Some interviews were interrupted because the informants were quite old and could not talk for long.
- (f) At times, it was somewhat delicate for the informants to discuss the issue of 'racism' with the researcher or research assistant as some were not comfortable to express their views on the community the researcher and the research assistant belonged to, when the latter was not of the same religious or ethnic group as the respondent.
- (g) The conditions of recording were not always ideal; e.g. at times, the noise of traffic interfered with the work. To these technical obstacles, there were those of an emotional nature. Some respondents wept while answering, some fell silent for a while (and it was not always easy to interpret the meaning of this), some answered by non-verbal signs to emotionally sensible questions (for the majority) refused to answer.
- (h) Very often, the informants were not able to specify the exact time of events they were narrating, which makes it difficult to date the facts. In addition, some of them have 'interiorised' the popular myths related to slavery.
- (i) For the West and South-West (Black River and Savanne Districts) the investigator reported that the quality of the interviews was hampered because of constraints with respect to the quota of informants to be interviewed and the date of submission of the report. It was impossible for the researcher to conduct proper ethnographic fieldwork and oral history interviews because of time constraints.
- (j) The section of the questionnaire that dealt with the contribution of the slave descendants in the social, economic, political and cultural life of Mauritius was difficult to tackle as the informants very often did not understand the questions and their approximate answers were not the ones expected from them.

## 1. LIFE HISTORIES

### PORT LOUIS NORTH AND SOUTH

- R1-R4 - Most of the respondents worked at two or three jobs at the same time. The women could be housemaids, social workers, women labourers etc. For the men-folk, too, working at two jobs simultaneously is not rare. The most common jobs are manual work; tailor, blacksmith, carpenter, charcoal maker, docker, sugar cane labourer. The grandparents had been labourers, stockbreeders, etc.
- R5 Retired; had worked at several jobs: housemaid and in a factory.
- R6 Docker but had been a bricklayer in the past.
- R7 Exiled from Chagos; had done several jobs since 12 years old; in coprah factory, in the house of the staff; fisherman then on several ships. In Mauritius, worked on lorries, in the harbour, and as fisherman. Came to Mauritius to buy fishing equipment but learnt here, after some time that the islands were closed. The deportation of the inhabitants of his island to Mauritius then started.
- R8 Widow, Seamstress (50)
- R9 Docker (retired) - Catholic
- R10 Assistant-mason, musician, 'bricoleur, soudeur'
- R11 Retired
- R12 Retired. Had been a mason at the municipality
- R13 Housemaid in a hotel; had done several jobs here and there
- R14 Foreman at a construction site
- R15 Housemaid and several other jobs
- R16 Seamstress and other small jobs
- R17 Carpenter/wheelwright/ blacksmith apprentice/mason/ gathering sugar cane
- R18 Many small jobs
- R19 Not decipherable

### LOWER PLAINES WILHEMS FINDINGS

All respondents come from working-class families.

Most of them are still masons, labourers, cane cutters, worked in CHA, *4 jours à Paris*, *femme de ménage* (maids), security-officers, plumbers, electricians, sewerage-worker, cleaners, toilet cleaners, and a few now have other jobs (teachers, foremen, financial officers, civil servants, nursing officers, musicians). Men have done many jobs: worked in *Moulin goni* (sack factory), were coffin-makers, iron-maker apprentices, painters, mechanics, cooks, laboratory attendants. Some of them have done dangerous jobs (for example with chemicals in paint industry etc. without protection). One of the respondents said he illegally made *tilambic* to sell to have a few rupees to feed his children.

All of them - men as well as women - have done different jobs, mostly because they were not employed on a regularly basis, but on a seasonal basis especially those who worked as labourers or *kouper kann* in the sugar-cane estates. They have not known security of employment.

All of them bear witness to the hardness of their living conditions and how they have managed to survive and to better their existence as much as they have been able to. They have all experienced poverty, the majority of them in an acute form.

They mention how they ate a piece of bread with only sugar. They ate 'mines' (*noodles*) their mother prepared herself with a little flour with *bouillon brède martin* from *karo kann*. At night they had a *goble delo disik* (*cup of sugared water*) to dine. Drank rice water. They did not eat rice but manioc etc.

They cooked on wood which they went to fetch with their mothers in the woods, after very long walks under the sun and without any food.

These people can measure the difference between their present life and the life they had as children with their parents. The majority are happier with their present life, though many of them still face economic difficulties.

The children of those who have not been able to accumulate even a very small capital are doing the same jobs as their parents, but most of the children have jobs like teachers, contractors, working in the printing industry and port, but they say they have to face difficulties in the employment sector. They feel that although they have made lots of self sacrifices to give their children better opportunities, the social, political and economic system is not helping their children in their social mobility. Many have had to struggle hard, to face injustices before being able to find a job.

Some have been married once, others have had children without being married, others have been married more than once. Women have their own stories to recall. Some of them have educated their children without the support of a husband (widows or single mothers). They have worked very hard for very low wages and show a great sense of sacrifice. They have been forced to leave their children with family members to find better paid jobs, either in places other than their living places or abroad. Some of them have worked as maids, embroiderers, in textile factories.

Many of them have had their houses destroyed during cyclone 'Carol'. They then moved to other places, from rural areas to *cités* in Plaines-Wilhems towns.

#### UPPER PLAINES WILHEMS FINDINGS

All of the respondents, coming from working-class background had worked at several jobs like masons, painters, mechanics, carpenters, labourers, tailors, attendants, blacksmiths, woodcutters, drivers, cabinet-makers for the men. It is interesting to note that even those who were civil servants had another parallel job (R21, R28). The women, for the most, were and some are still are housemaids, nurses, cooks, women labourers.

All had known poverty and had done several jobs to survive. «Finn toultan travay pou reysi manze ek bwat» (Eng: Had to work all the time to get enough to eat) (R 21). They had thus never known job security, for the work was seasonal. Their outlook on the past is full of bitterness but also of a certain pride to have survived and made it possible for their children to grow up. That is why many find that their life today is not to be pitied although they face financial hardship.

#### EAST AND SOUTH-EAST (FLACQ AND GRAND-PORT DISTRICTS) FINDINGS

All the respondents come from a working-class background and have done more than many jobs in their lives. The occupations vary from drivers, fishermen, masons, brick-layers, *tailleurs-roche*, labourers, tailors, maids, wood-cutters, carpenters, gardeners, civil servants, plumbers, electricians, etc. Most of the jobs were manual and physically very exhausting ones.

For those who have not been in the civil service or on sugar estates, we find that they (both men and women) have changed jobs throughout their lives. Most of the time, this was dictated by the need to feed the family and primarily the children. We have accounts of men having to cycle for long distances to go for work when they could find work in neighbouring area. It was driven by the

philosophie “ki pu fer, bisin trace pu gagne ou boussé mange.” (What else could we do? Had to struggle to get a living). Seasonal jobs like cane-cutters did not ensure regular incomes for the workers and weeks or even months of unemployment very often followed the end of seasonal jobs.

Most respondents recall the following from their life: “avant ti ena buku misère, aster ki la vie facile”. (Before it was hard; now life is easy). No matter how hard their present life is, they still believe that their past was much more difficult. This poverty, or at times acute poverty, is often characterised by unavailability of food whereby the respondents had to skip dinner and lunch regularly. Families had to depend on oil lamps “*la lampe pétrol*” to light the house. In case they did not have money, they would face days or even weeks of darkness. Even though slavery was abolished, some of them, like Mrs Jacksony, recalls that her mother had to look for manioc and “patate” (sweet potato) to feed the family, a situation which is similar to slavery. That poverty has left a strong imprint in the memory of the respondents. Life was not, or could simply not be, planned as families had to struggle for food.

Women have played a crucial role within the family. They were the ones who faced the pressure of feeding the family. They would go far in the woods to cut wood to cook food. They would collect vegetables (brède), fruits (Jack fruit, fruits à pain) and roots (maize, manioc, sweet potato, “arouille”) that were available to feed the family. For New Year, they could hardly afford meat and “saumon”, i.e. canned pilchards were the best they could have once or twice a year. It is women who mostly cared about the future of the children. They were the ones who would really bother sending the children to school to acquire education, at times without the support of the husbands. Women used to cumulate jobs (maids, field-workers, cleaners, cane-cutters, etc.) and very often had to face domestic violence.

For those who have succeeded in sending their children to school, they actually either work in the civil service or in private companies as electricians and IT Officer. Some agree that being a “Creole” is a stigma, and this is an obstacle to their social mobility. But in cases where the children have not been able to acquire education, they are still doing the jobs their parents were doing like masons, “casser roche” (stone breakers), or, in the hardest cases, “p bat baté par ici par la” (work here and there).

Most of the respondents coming from working-class background had worked at several jobs. The occupations vary from drivers, fishermen, masons, brick-layers, *tailleurs roche*, labourers, tailors, wood-cutters, carpenters, gardeners, civil servants, plumbers, electricians, etc. for the men. Women used to cumulate jobs (maids, field-workers, cleaners, cane-cutters, etc.) housemaids, nurses, cooks, women labourers. All had known poverty and had often taken parallel jobs to survive. They had thus never known job security for the work was seasonal. Life was not, or could simply not be, planned as families had to struggle for food.

Their outlook on the past is full of bitterness but they also show a certain pride to have survived and made their children grow up. That is why many find that their lives today are not to be pitied though they face financial hardship. That poverty has left a strong imprint in the memory of the respondents.

Some have been married once, others have had children without being married, others have been married more than once.

Women have their own stories to tell. Some of them have educated their children without the support of a husband (widow or single mother). Women have played a crucial role within the family. They were the ones who faced the pressure of feeding the family. They would go far in the woods to cut wood and to cook food. They would collect vegetables (*brède*), fruits (Jack fruit, fruits à pain) and roots (maize, manioc, sweet potato, “arouille”) that were available to feed the family. They were the ones who would really bother sending the children to school to acquire education, at times without the support of the husband. Women used to cumulate jobs (maids, field-workers, cleaners, cane-cutters, etc.) and very often had to face domestic violence.

## 2. LITERACY/EDUCATION

### PORT LOUIS NORTH AND SOUTH FINDINGS

- R1 Had done up to Std VI .Knows how to read and write
- R2 Not schooled as a child but has followed literacy classes at 60. Knows a little how to read and write.
- R3 Had done Std 1; does not know how to read and write.
- R4 Had done up to Std V. Knows how to read and write a little.
- R5 Up to Std IV. Left because of financial difficulties.
- R6 Up to Std VI but did not get through that level.
- R7 Not schooled in Chagos but follows evening classes in Mauritius.
- R8, R9 Std IV. Lack of means to continue.
- R10 Had completed CPE, had reached Form 1, then stopped to follow courses in a technical school.
- R11 Until Std VI, then at the Loreto College until SC.
- R12 Until Std VI.
- R13 Until Std IV. (It is the mother who had 10 children who decided thus).
- R14 Until Form II; had stopped through disinterest for school.
- R15 Until Std III: left at father's death.
- R16 Until Std VI; no shoes to go to school.
- R17 Std II; *déménagement* Std II. Moving out.
- R18 Form III
- R19 Not decipherable

	Std 1 (1)	Std 2 (1)	Std 3 (1)	Std 4 (3)	Std 5 (1)	Std 6 (6)	Secondary (4)	Night School (2)
Respondent	R3	R17	R15	R5, R9, R13,	R4,	R1, R6, R11, R12, R16,	FI: R10 FII: R14 FIII: R18 FIV: R8	R2 R7

### UPPER PLAINES WILHEMS FINDINGS

3 respondents only took Secondary Level R1 (Form V), R2 (Form V), R16 (Form III)).

9 completed Primary Level (R6, R8, R9, R12, R15, R17, R21, R25, R28)

And those who did not say that it was because of a lack of means, because they were too numerous and that the parents gave priority to boys' education. The girls stayed at home to look after the children and help their mothers at house chores or at work (housemaid, etc...) An interesting fact: The boys followed their father throughout the island to look for work and the whole family moved depending on where the father was working, hence making continuous schooling difficult. The expression *al kampe* (to go camping) illustrates very well this nomadic aspect

Today, all see that education is important. Even though some are ashamed of being unable to read and write, they are proud to have worked hard to allow their children to continue their studies. R1 and R3 are proud to have been able to get their children schooled in the French system. And they think that if there are still children who are illiterate, the fault lies with the parents for education is free. They are all conscious that education is the key to getting out of poverty.

	Std 1 (1)	Std 2 (1)	Std 3 (4)	Std 4 (4)	Std 5 (5)	Std 6 (9)	Went on and off to school(1)	Form 3 (1)	SC (2)	No schooling (1)

Total	18	2	2	2	1	3	1

62% of respondents know how to read and write.

#### LOWER PLAINES WILHEMS FINDINGS

All children went to primary school but only the last brother went on till Form 3. Std 1 (2). Std 2. Std 3. Std 4 (2). Std 5 (2). Std 6(5) Did not go to school.

Read and write: 1 Eng. and French: 1 Read and write a little: 2

I can read but not write very well: 4 cannot read and write: 4

It is hard to be unable to fill in a form. I cannot write. I have to put a cross as signature.

Poor people cannot read. They feel bad and inferior. Feel ashamed (3). Cannot travel because they do not read.

Those who were into primary school with me and in college, these people have become illiterates. They do not read and write. If after school we do not continue to read and write, it is lost. In Mauritius, we are culturally weak, we do not like to read and write; we are lazy.

Secondary: F4 (2) SC: 2

## Tertiary: 1

Some have learned by themselves (autodidact), on coal tar, especially one who had a passion for books and reading.

One asked why Creoles are doing such high studies that will not give them a job in Mauritius.

The education system is terrible in Mauritius. Teachers leave mistakes in children's copybooks.

In Government schools, non Creole teachers do not take Creole children into consideration (2). They are stigmatized. This is why many Creoles do not want to say they are Creoles. They are afraid.

	Std 1	Std 2	Std 3	Std 4	Std 5	Std 6	Primary	F 4	SC	Tertiary
No of respondents	1	1	1	2	1	7	4	2	2	3

All respondents believe it is important to acquire education. Many blame either poverty and/or ignorance of parent's for illiteracy.

- R1 We did not have anything to eat, how do you think we would go to school
- R2 At times, parents were themselves not educated and this is why we find children roaming around and not going to school.
- R7 Be mo banne grand dimounn ti miser zotte pa in envoye moi l'école.  
My parents were poor and did not send me to school.
- R15 Mo panne pratik li dans l'armée la bas nu in alle école, mo ti coze anglais bien mais monne blie. Créole panne aprane, les autre ti aprane.  
I did not learn in the army; there we went to school; I used to speak English well but I've forgotten. The Creoles did not learn; the others did.  
Did not have this in mind, rather enjoy life. And now  $\frac{3}{4}$  of the children roam here and there.  
Pas ti ena sa dans la tête, plito amuser. Be aster la meme  $\frac{3}{4}$  zanfan traine par ici par la.
- R17 Mo pas conne lire mo chagrin, ler moi monne marie, mo envoyé mo zanfan l'école, mo pas même capave prend ene livre de messe mo lire.  
I don't know how to read; I'm sad about it. When I got married, I sent my kid to school, I cannot even read a prayer book.

#### NORTH (PAMPLEMOUSSES AND RIVIÈRE DU REMPART DISTRICTS)

There is a generational transmission of menial jobs, because as it is reflected by the life histories of the informants, they stopped schooling at a young age to start working. For example, R6 and R13 stopped schooling after Standard 6 and Form 2 respectively because of financial problems. They were poor and education was not free at that time.

For the informants, although illiteracy is present in all ethnic groups, yet Creoles are mostly illiterate because in the past, they did not have the opportunity either to go to school or to continue schooling.

While for some they do not feel ashamed of being illiterate, for others, they see it as a shame such as R12 and R8:

'...non li pa normal li pa normal parski mo mem mo pa kon lir ester mo  
sagrin parski parfoi mo dir mo tifi get sa pou moi get sa si 1 zournal mo pou  
dir li lir sapou moi mo truver lir li bien inportan aster...'<sup>4</sup>

(Eng. Trans.:...No it is not normal, it is not normal because me too I do not  
know how to read; now I am sad because sometimes I ask my daughter to look  
at that for me if it is a newspaper I will ask her to read it for me I find that  
reading is very important.

About half of the respondents can read and write, having done part or the whole of primary schooling. Some have learned by themselves. Those who did not complete their primary schooling blame lack of means. And parents gave priority to boys' education. The girls stayed at home to look after the children and help their mothers at house chores or at work (housemaid, etc). Moreover the boys followed their fathers throughout the island to look for work and the whole family moved, depending on where the father was working, hence making continuous schooling difficult.

All respondents believe it is important to acquire education. They are all conscious that education is the key to getting out of poverty. Many blame either poverty and/or ignorance of parents for illiteracy. However, some state that in Government schools, non Creole teachers do not take Creole children into consideration. They are stigmatized.

### 3. FAMILY HISTORY

#### PORT LOUIS NORTH AND SOUTH FINDINGS

- R1 Rodrigues
- R2 Father born in Madagascar but grew up in Rodrigues
- R3 Rodrigues
- R4 Agaléga
- R5 Mother Mauritian; Father Rodriguan
- R6 Mother and Father Mauritians; ancestors from mother's side India, according to what he has been told; father's from Africa according to him
- R7 Father born in Solomon Islands; mother from Mauritius. Had lived in Peros Banos until deportation; in Mauritius lived in Cassis
- R8 Had known only his maternal grandmother. Origins of parents: 'Father from Madagascar'; 'mother from Scotland'.
- R9 Does not know origins of family; believes it originates from India
- R10 Father's origins from India; mother's African
- R11 Had kept documents on parents; had known maternal grandmother and says that knows this branch is from India.
- R12 Had not known the grandparents and does not really know history of family.
- R13 Considers himself without any shame as descendant of slave; knew his grandfather and makes no mystery as to the origins of his ancestors. Thinks the parents of his grandfather came from Madagascar and that those of his grandmother came from India.
- R14 Has no information on the origins of his parents but would have liked to know
- R15, R17 All Mauritians
- R18 Has no information. Believes they are all Mauritians
- R19 Information not decipherable

#### Jobs of parents and grandparents

- R5 Mother did not work; father Docker
- R6 Mother Housemaid; father mason
- R7 Father blacksmith; grandfather (paternal) born in the islands; mother's parents from Mauritius; Grandmother married to a Mauritian who had been in the army, which explains his return to Diego Garcia. Origins-Africa, Madagascar; maternal great grand-mother from Reunion Island
- R13 Father worked on board ships (to carry merchandise); mother did not work
- R14 Father docker; mother did not work
- R15 Father Driver; paternal grandfather; worked at a furnace
- R16 Father carpenter, mother; Paternal grandfather no information; maternal grandmother; Sick Attendant
- R17 Father, carpenter; mother handicraft (making of bags, hats and carriers bags)

#### UPPER PLAINES WILHEMS FINDINGS

Most did not know the origins of their family. If some had a vague idea it is because they heard their parents discuss among themselves. Before, children did not listen to adult conversations

##### Origins

- R1 Madagascar, Mozambique and India
- R5 Grandmother's originated from India
- R12 His father was Tamil
- R13 India. He has been told that his grandparents were slaves
- R14 His maternal grandmother came from India
- R19 Great great-grandfather originated from Madagascar
- R22 Grandfather told him that his family came from Mozambique
- R23 Father was Seychellois
- R26 Great-grandmother was Seychellois
- R28 Thinks family came from Madagascar
- R29 India and Madagascar

##### Jobs of parents and grand parents

Many had worked «*dan lakour blan*» (as domestic servants of the whites) and lived in *dépendances*. Women were housemaids, «*nenenn*».

- R20 Mother earned Rs 25 per month and she had to be available all the time «Pa ti ena lesklavaz, me mo mama ti kouma enn esklav».

##### Other occupations

Seamstress, cabinetmaker, joiner, labourer, mason, woodcutter, bus-driver, sacristan, railwayman, cook, at making *vacoas* bags and mats.

If many had lived in Curepipe region since their birth, their parents and grandparents came from villages throughout the island:

Plaine Magnien, Bambous, Montagne-Longue, Grand-Baie, L'Escalier, Chamarel, Rivière des Anguilles, Mahébourg, Bel Air, St-Pierre, Camp de Masque.

#### LOWER PLAINES WILHEMS FINDINGS

##### Origins

- R5 Portuguese
- R8 Indian+ mixed black and white
- R11 grandfather was a French merchant navy captain who had children with a slave descendant
- R13 Father was a French descendant and his mother had ancestors from Madagascar
- R16 His mother's family from India
- R17 Ancestors from France who married a Bengali

- R18 Her grandfather (mother's side) came from India and was a slave in Réunion, then fled to Mauritius + father's side came from Madagascar.
- R19 My mother's father was a tamoul from India who had a British name because he had a British father and a tamoul mother - my grandfather came when the British came to Mauritius. My father's dad was a Bombay and his mother baptized Creole madras. My family name is from India.
- R20 Grandfather was a Malagasy. We have African ancestors. My mother is a descendant of *madras batize* (Tamil Christian) Grandmother talked about our African slave ancestors and what they endured.
- R22 I don't know about the origins of my family, but my mother is a mazanbik, black with *tiseve* as an African descendant. My father was from a high-class family.
- R23 Dad's mother came from Pondicherry - I have a grandma with a Creole name - I don't know where my ancestors came from.
- R26 My grand grandmother is a catholic from Pondicherry. Their fathers were hairdresser, carpenter, shoemaker, mechanic, reared animals, had seasonal work such as sofer kamion pandan lakoup on sugar estates, coalmen. Six fathers went to the army. Mothers worked as maids, sewers, worked in aloe factories, planted peanuts.
- R8 "My grandma was born of an Irish dad and a Malagasy mother. She has a European phenotype. Her father left heritage but a sister married in a white family wanted to take my grandmother. She said no and she signed a paper. In fact she lost her heritage. My grandpa was a shoemaker. His mother was Malagasy and father white. They had values though no education."
- R6 "My grandfather practiced animal rearing and planted maize, sweet potatoes and manioc. He had a small plot of land and did barter with fishmongers etc."
- Their parents or grandparents have worked for white people. They feel they have been oppressed. They describe their conditions of life as that of slaves and modern slaves. Women were servants and worked 24/7 for their masters, going to "campements" with them, taking care of their children, but were ill treated for some of them. They slept under the table and when their family lived in dependence, their children had to be shut in the house so as not to disturb the masters.
- R10 "My grand grandmother was a Madras from India, with long dresses and big holes in her ears. My mother's name is Lecoq. My dad was a Sookoonah, a Bombay. His family had become catholic. My father in law says his family came from Madagascar."
- R26 "My grand grandmother (father's side) is a catholic from Pondicherry. My father was born from a métissage of Indo-Catholic and a White. My mother is a Creole but her grand grandmother had money. She has a French name. After that they became poor."

#### Change or sale of names

2 respondents stated that white people bought the family names of their ancestors.

- R3 "My father's family was Theodore. My grandfather was in fact called Giraudoux. White people came and asked to sell his name with them. My grandfather was stupid. He took the name of Theodore and sold the name of Giraudoux. But my father's cousin did not want. His children are called Giraudoux. Giraudoux was the name of a white, a French."
- R5 "It's astonishing that I am called Antoine, because my ancestors were not Europeans. We have been called Soulange. We have looked in the archives. It seems my ancestors were Portuguese. My great grandfather was a guitarist (1850). My

father was born in Vieux Grand Port. His father was Antoine Soulange. Then Soulange was dropped and we were called Antoine."

#### Relationship between classes in families

Problem can arise when a member of the working class family has a white collar job.

- R2 "What is sad in Creole families is that there is a gap between the working class world and the intellectual world. It is not that they met dan zar. There is a bad reaction from members in working class. There is a social crisis in families. For me it was very difficult to make these two worlds meet. Lots of efforts. They shed away from intellectuals; feel ill at ease. I say that it is important to keep close. We can help each other. They come to me for services only. Workers are now educated and have progressed."

#### EAST AND SOUTH-EAST (FLACQ AND GRAND-PORT DISTRICTS)

The knowledge of family and its origins very often don't go beyond great grandfather (two generations). This is perhaps because, families have moved from one area to another resulting in a cut off from family ties and most probably because of absence or lack of oral transmission of family origins.

The parents were metal workers, labourers, wood cutters, fishermen, 'toiler', 'chaudronnier', drivers, masons, stone cutters, seasonal workers on sugar estates. Women were maids, housewives (but often seasonal workers). Many worked for the whites and the respondents remember their dominant attitude.

For the respondents, the lives of their parent's grandparents and ancestors were characterised by poverty and hardships. However, they tend to associate what they have heard or seen about slavery on TV (fiction) about slavery to the sort of their grandparents. At times, their narration is driven by emotions related to their grandparent's hardships.

- R1 "My father's name was Laval Jacksony. My mother's name was Simone Tuyau and is 81 years old. My great grandfather came to live in Lallmatie. Before that he was in th'to work of the Sans Souci Sugar estate. He was a slave of the British. He got married in Mauritius. My grandfather became an "engagé" (indentured labourer). He was doing the "Kalipa" ( a fight like judo) without any money in return. My father was a planter. He was growing manioc, peanuts and manioc to sell. This is how he fed his eleven children."
- R3 "My grandmother came from India as a coolie. She was wearing big earrings. My father used to tell us that our ancestors were slaves. They didn't tell much though."
- R6 "I have family who came from Madagascar. Some came from India. My grandfather used to tell us how poor they were and how much hardship they had to face. They were working with the whites who were dominating them."
- R9 "I was born on the Beau Champ Sugar Estate. I was working there with my father who was a head mechanic. My mother was a Boucherville and was a housewife. I don't know much about my grandparents. I'm a descendant of the Bazerks who had cousins (Germain) in Rose Hill."
- R11 "My grandparents had their own land. You know, formerly people did not live a luxurious life. They were growing sugarcane and vegetables. When, these were not available, they use to work for others as labourers".

- R12 "My father was a "toiler" and 'chaudronnier' on the St Antoine Sugar estate. My mother died when I was four years old only. My grandfather (paternal) was a 'sirdar' and "colomb". My grandfather (maternal) was a veterinary on the FUEL Sugar Estate. My ancestors came from Madagascar. I don't know if they were slaves and what they were doing. I've heard about Le Morne where they were committing suicide."
- R13 My father used to tell me that our ancestors came from Madagascar. So, I'm a slave descendent.
- R14 My father was a fisherman. He taught me this job too. My grandfather who was also a fisherman came from Albion. I've heard him saying that our ancestors came from Africa.

#### Slave descendant

13 respondents consider themselves as descendants of slave. They believe that their ancestors have come from Africa (the continent), Madagascar, India, South Africa and Mozambique.

Two respondents claim to have written proof of being descendant of slave.

- R1 She has a written document from the Nelson Mandela Centre for African Culture which states that her forefather came to Mauritius as a slave who came from South Africa. He first was working in the region of Plaine Wilhems then moved to Lallmatie to work for the Sans Souci Sugar Estate. He was the "gardien" of the weighing bridge. Her brother still lives on the plot where the ruins of the weighing bridge are found. Respondent claims loss land.
- R4 He has a copy a legal document of the year 1819 whereby his great grandfather, Mathurin Jeannot, born in Mozambique, left behind a large plot of 156 arpents in the District of Black river to his children Alcide, Abédé, Guillaume, Frédéric and Delphine Jeannot. R4 claims to be the descendant of Alcide. Respondant claims loss land.

1 respondent (R9) doesn't know the origins of his ancestors.

None of the respondents are aware that slaves have ever come from India. Very often they tend to mix up slavery and "coolie", i.e, indentured labourers.

For some respondents, being Creole is an element that makes the respondents feel that they might be descendent of slaves. Other characteristics are the "frizzy" hair and dark colour of the skin. So here, we understand that there is a biological conceptualisation of slave.

Poverty is another crucial factor that makes the respondent feel that they are descendants of slaves. R11 states that she is a slave descendent as she does not have anything. So here, we have an account of an economic conceptualisation of slavery. The testimonies reveal that not all respondents believe that all Creoles are descendants of slaves.

Family origins and identity construction.

#### WEST AND SOUTH-WEST (BLACK RIVER AND SAVANNE DISTRICTS)

Interviews revealed that there has been either no or limited transmission of family origins. For many people recollections of family history were limited to their grandparents and sometimes to their great grandparents. The knowledge of family and its origins very often don't go beyond great grandfather (two generations). This is perhaps because, families have moved from one area to another resulting in a cut off from family ties and most probably because of absence or lack of oral transmission of family origins.

They do not know why their ancestors came to Mauritius but they think it was to develop the country.

For example, Harvey's grandparents used to say that they are of *Mazambik* descent meaning that they are of Mozambican descent and Daniel's father used to say that they are of Malagasy descent. For those who do not know their origins, most of them guessed about their family ancestry based on their physical appearance and what their parents told them

#### NORTH (PAMPLEMOUSSES AND RIVIÈRE DU REMPART DISTRICTS) FINDINGS

Either no or limited transmission of knowledge of family origins. Generational transmission of family history was limited to one to two generations and hence for many people recollections of family history were limited to their grandparents and sometimes to their great grandparents. Although they did not know their origins they identified themselves as of slave descent because of their African phenotype. For example, Rosemay considers herself as being Mauritian of African descent because of her skin colour, she is Black and hair type is 'frizzy'. She does not know when her ancestors came to Mauritius but she thinks they came enchained as shown in films. Although the informants who did not know their origins mentioned that they would like to know about their family origins, some of them such as Joseph questioned what this knowledge will bring him?

The knowledge of family and its origins very often don't go beyond great grandfather (two generations). This is perhaps because, families have moved from one area to another resulting in a cut off from family ties and most probably because of absence or lack of oral transmission of family origins. Interviews revealed that there has been either no or limited transmission of knowledge of family origins. Generational transmission of family history was limited to one to two generations and hence for many people recollections of family history were limited to their grandparents and sometimes to their great grandparents. Although they did not know their origins they identified themselves as of slave descent because of their African phenotype. For example, Rosemay considers herself as being Mauritian of African descent because of her skin colour, she is Black and hair type is 'frizzy'. For those who do not know their origins, most of them guessed about their family ancestry based on their physical appearance and what their parents told them. Their identification is not derived from knowledge of ancestral origins but rather on shared legacies of slavery such as social experiences and lack of education and opportunities. On the other hand, some informants' identification with the slaves descendant seems also to be founded on racial grounds. This biological identification associates the African phenotype, skin colour (being black) and hair style (frizzy hair) with slave ancestry.

Most did not know the origins of their family. If some had a vague idea it is because they heard their parents discuss among themselves. Before, children did not listen to adult conversations. For some respondents, being Creole is an element that makes the respondents feel that they might be descendent of slaves. Other characteristics are the "frizzy" hair and dark colour of the skin. So here, we understand that there is a biological conceptualisation of slave. However some have written documents from the Nelson Mandela Centre for African Culture which states that her forefather came to Mauritius as a slave.

None of the respondents are aware that slaves have ever come from India. Some tend to mix up slavery and "coolie", i.e., indentured labourers. Some indicate that one of their ancestors came from India. The correlation between Creoles and slave descent clearly transpires in the interviews. But the definition of Creole diverged. For some Creoles are descendant of slaves and are of African descent; the Blacks with frizzy hair are the real descendant of slaves.

Poverty is another crucial factor that makes the respondent feel that they are descendants of slaves.

For the respondents, the lives of their parent's grandparents and ancestors are characterised by poverty and hardships. At times, their narration is driven by emotions related to their grandparent's hardships. Their fathers were hairdresser, carpenter, shoemaker, mechanic, reared barber animals, had seasonal work such as 'sofer kamion pandan lakoup' on sugar estates, coalmen. Six fathers went to the army. Mothers worked as maids, sewers, worked in aloe factories, planted

peanuts. Mothers worked as maids, sewers, worked in aloe factories, planted peanuts. Many had worked «dan lakour blan» and lived in dépendances. Women were housemaids, «nenenn».

The other jobs: Seamstress, cabinetmaker, joiner, labourer, mason, woodcutter, bus driver, sacristain, railwayman, cook, *vacoas* bag and mat maker. The parents were metal workers, labourers, wood cutters, fishermen, 'toiler' , 'chaudronnier', drivers, masons, stone cutters, seasonal workers on sugar estates. Women were maids, housewives (but often seasonal workers). Many worked for the whites and the respondents remember their dominant attitude.

The parents were metal workers, labourers, wood cutters, fishermen, 'toiler' , 'chaudronnier', drivers, masons, stone cutters, seasonal workers on sugar estates. Women were maids, housewives (but often seasonal workers). Many worked for the whites and the respondents remember their dominant attitude.

## 4. PROPERTY

### PORT LOUIS NORTH AND SOUTH FINDINGS

- R1 Householders
- R2 Householders
- R3 Householder in Rodrigues. Owner of an NHDC house that she is still paying
- R4 Inherited from her husband
- R5 Owned a house in Vallée Pitot but sold after the ethnic riot of 1968 to live in a longère (shed) and then in a *cité ouvrière* (working class estate) at Cité Briquetterie. Owns today a house but not the land
- R6 Owns his house (in a *cité ouvrière*) but not the land
- R7 In Chagos the land belonged to the Etablissement; a sum was deducted from their wages as rent but there was no question of ownership. In Mauritius, the respondent's grandfather had bought a piece of land near La Butte (Rue Moka) and hoped to bequeath it to his daughter but the sister of the grandfather had taken over the land despite his daughter. Presently the responder owns a house at Cassis while living in another at la Tour Koenig.
- R8 The grandfather had land at Roche Noire but was cheated by his own brothers when respondent was still very young
- R9 Knows that the family from the paternal side had plots of land
- R10 On the maternal side they were proprietors but had lost their land.
- R11 Had inherited the house from his parents. The parents from maternal side had lost plots of land through neglect
- R12 Father owned a large plot of land that he lost
- R13 Is presently a tenant but the maternal grandparents owned land at Plaine des Papayes. They lost the land through neglect.
- R14 Owns a house inherited from the mother who had bought it
- R15 Owns a house at *Cité la Cure* and a plot of land at Mme Azor
- R16 She lives with his son who owns house at *Cité la Cure*. The forefathers had a plot of land at Pamplemousses that they lost through neglect and declaration of property rights
- R17 Owns the house in *Cité la Cure* and lived on «Crownland at Vieux Grand-Port. The forefathers had a plot of land of 2 acres which cannot be sold as they were dead
- R18 Is not a householder but had understood through several oral sources that there had been loss of land in the family. This was due to the fact that elders had left no will at their death
- R19 Information not available

## UPPER PLAINES WILHEMS FINDINGS

Most of the respondents own their house

- R1 The parents bought the land
- R2 Had bought where he lives
- R3 Got his house after Cyclone *Carol*. Then bought the house
- R4 Got his house after Cyclone *Carol*. Then bought the house
- R5 Bought his house
- R6 Father bought the house where she lives
- R7 Had bought the house where she lives
- R8 (./.)
- R9 (./.)
- R10 The land belongs to the family since a long time.
- R11 (./.)
- R12 Lives with the son
- R13 Had bought the house where he lives. Had a house built at Camp Caval on a plot of land he bought
- R14 Had bought his house
- R15 Owns the house he lives in. Built the house himself
- R16 (./.)
- R17 (./.)
- R18 Owns the house he lives in
- R19 Inherited his house
- R20 Householder
- R21 Householder
- R22 Does not own his house
- R23 Householder
- R24 Householder
- R25 Householder
- R26 Householder
- R27 Householder
- R28 Owns the house he lives in. Built the house himself
- R29 Householder

## LOWER PLAINES WILHEMS FINDINGS

- R1 when her father came back from the army, her mother took the money he had earned and bought the land and house in which they are still living today.
- R2 his parents rented houses and he has his own house.
- R3 she has bought the house in the *cit *, but is still paying for the land.
- R4 lives in a house which belonged to his grandfather and there too many heirs to find a solution. He lives in the house, takes care of it but it is not his. He has no means to buy a house on his own.
- R5 is the owner of his house.
- R6 her ancestors did not have any house. Her grandfather built a wooden house in the woods which was destroyed by *Carol*. She is still paying the land on which her *cit * house is built.
- R7 owns his house
- R8 Is owner of her house.
- R9 His mother's family had a small house and advised her children to have their own house. He has succeeded in having his own house but it was with the help of a French couple. His children are having their own house.
- R10 has not inherited of land or house. She has rented a *cit * house for 22 years, then bought it and later sold it to buy another house.
- R11 recalls that her ancestors had land in the east. They allowed Indians to settle on to help them but they finally lost their land. She has bought a small plot of land from a family member.
- R12 parents could not save to have a plot of land. His wife's parents had land but lost it. The ancestors were not aware of the value of land. When they had too many debts, they lost their land.
- R13 parents have lost land. Now she lives in her mother's house which is hers.
- R14 is well off. He has a house which he rents and one in which he lives. He recalls that his family lost large plots of land because *M dine Sugar Estate* took them.
- R15 rents a house in the *cit *.
- R16 His parents have a plot of land but no property act. He lives in his mother's house.

- R17 Lives in her son's house.
- R18 Has saved little by little and has bought her house with the help of her children.
- R19 Does not own a house.
- R20 Wanted to have his own house but he lives in his mother's house because he cannot obtain a loan from the bank. Too many debts for too long
- R22 Lives in her mother's house. There are 4 heirs.
- R24 His family lost land. He has his own house.
- R25 Won the lottery and bought land. He obtained a loan from the bank. He has built himself his house. His grandparents had land.
- R26 Her father bought the land and she built her own house.

	Own their house	Still paying for house	Rent their house	Lives in a relative's house/ no house of own	
	R1, R2, R5, R7, R8, R9, R10, R11, R13, R14, R18, R24, R25, R26	R3 (site), R6(site)	R15 (site), R19	R4, R16, R17, R20, R22	
Total	14	2	2	5	23

14 respondents own their house. 2 own the "site" house but are still "paying for the land. 2 rent houses and 5 live with a relative. Those who have managed to have a house are mainly situated in "site" and have struggled very hard to be owners. They all are aware of the importance of being a house owner.

#### EAST AND SOUTH-EAST (FLACQ AND GRAND-PORT DISTRICTS) FINDINGS

- R1 She has a single room made up of wood and iron sheets. She claims that the land belongs to her family, but she doesn't have any document to prove it. In fact, the land has been sold to someone else living in the region of Rivière du Rempart. So officially, she doesn't own the land.
- R2 He has bought a plot of land. But actually he lives in a house made up of wood and iron sheets which belongs to his concubine. She expects her daughter who has studied up to form five to get a job in the civil service so that she can have a loan to build her house. She has spent her entire life in a "lakaz tolle" and hopes to stay in a concrete one before dying.
- R3 He is the owner of a concrete house, but has given it to his sons. He actually lives in the house of his concubine who is renting it from a Hindu. The respondent is a part-time driver for the owner of the land.
- R4 He lives in a one storey concrete house which belongs to him along with his mother and two sisters.
- R5 He lives in the house which his late wife inherited from her parents. Legally, he is the owner of both land and house.

- R6 She lives in a *Cité* Argy and has bought the house. She has even opened a shop in front of her house.
- R7 She lives in a concrete house on a land that belong to her ancestors (Charlot Family). She has worked hard and “met sit” to save money for her house. She wanted a secured housing for her children.
- R8 He lives in a concrete house on a plot of land that belonged to his family.
- R9 He lives on a plot that he inherited from parents.
- R10 She lives in *Cité* Argy where she has bought the land and house from the state.
- R11 He actually lives in the plot of land that belongs to his wife. He himself owns land in Quatre-Cocos.
- R12 Lives on the FUEL Sugar Estate blocs.
- R13 Lives in a concrete house on a land inherited by his wife.
- R14 Lives in a concrete house on a land inherited by his wife.

All respondents own their land, except R1.

Those living in *cité* (R6 and R10) have bought the house and even extended the premises. The women have played an important role in saving money to buy the house and land.

Most of the respondents owned their house, having through either purchase or inheritance. Those living in *cité* have bought the house and even extended the premises. But some own the “*cité*” house but are still “paying for the land. They all are aware of the importance of being a house owner. The women have played an important role in saving money to buy the house and land.

#### LOWER PLAINES WILHEMS FINDINGS

- R5 The land they lived on was not theirs. They lost it. Many families have lost their lands.
- R8 Lost land my grandma Bhugaloo a Creole her father came from India, had land from la Louise to Bassin. It was lost.
- R12 My wife parents had land but they lost. They did not care about land or had too many debts. Out of debts I could have lost my land. My children have built on that land.
- R13 We have lost land from dad’s in Pointe aux Piments
- R14 There was Teco family who lost hundreds of *arpents* of land that Medine has taken from them.
- R10 I know someone who has mortgaged his land for friends and it was sold to the bar and it was lost. If you have a land, you should not sell it. It’s not good to rent houses all your life. It’s important to have you own house.
- R11 In Belvédère where I was born, my ancestors had allowed Hindus who had come from India to settle on a piece of their land. After that, these people stole their land.
- R19 my mum and dad had land, but my cousins stole those lands. We also lost lands in Curepipe. Before his death my grandfather gave a land contract to one of my aunts and told her to give it to me. One of my

cousins stole the contract and now her sons are building houses on that land. Once my mother was called because there would be sharing of Simpson lands, she did not go.

R20 We have lost a lot of land. Creoles have lost a lot of land. My grandmother had land in Ste Croix but lost it during the racial riots in 1968.

R23 My grandma father came from India, had land from la Louise to Bassin. It was lost.

Families of 10 /25 respondents have lost lands.

#### EAST AND SOUTH-EAST (FLACQ AND GRAND-PORT DISTRICTS) FINDINGS

R1 She claims that her great grandfather was given land (around 10 acres) by the owner of Sans Souci Sugar Estate as he was the guardian of the weighing Bridge. But she doesn't have any document as no one in her family ever had any document. In the past, people even used to take permission from her grandfather to grow 'filao' on the land. Her brother still lives on the plot where the bridge was found. However, some years back, the land was being sold by a "courtier" upon the request of FUEL Sugar Estate. Even the small plot of around "140 toises" where she lives with her sisters and brothers has been sold to someone living in Rivière du Rempart. She is facing a legal battle. She claims that all her generations have lived on this land. She blames FUEL Sugar Estate to sell a land that didn't belong to them. My mother has also lost her land in St Julien d'Hotman. I also know the Lamarque family who now lives in Port-Louis, who have lost 75 *arpents* of land, which is currently being occupied by the sugar estate.

R2 Respondent says that her grandparents had land in the eastern part of the island. But he never managed to get precise information about its location to claim it.

R3 He explains that his mother had land around St Julien d'Hotman but the land was lost with time. Respondent also explains how in the past, people use to stay on land without having any document to prove their ownership. Some did manage to get their "bordereau" to claim their land. In other cases, the sugar estate owners simply cleared bare or unoccupied lands and planted sugarcane on it. Sur to lack of financial resources, the owners never managed to claim back their lands.

I know the Taï family of Flacq who had vast portion or around 100 *arpents* of land in Bel Etang. The elders didn't inform the upcoming generation about this land and it became unoccupied. The sugar estate had land on each side of the Taï property. First, they built a road across the unoccupied land. Little by little they cleared further land until they became the owner as no one is claiming the land. The Aza family also faced the same. When they claimed their land, the sugar estate in return claimed for much compensation for the money they invested in the land.

R4 Respondent has shown an "affidavit" whereby his ancestor, who came from France, has left 156 *arpents* of land for his children. The land is found in Black River and is currently being occupied by Médine Sugar Estate. The matter has been brought in front of the TJC. There's even a family cemetery on the plot whereby tombs bear the names of Jeannot.

R5 My father-in-law has lost a land in Olivia. He had bought the land. He even has the title deed, but the sugar estate didn't allow him to claim

the land. I have handed the contract to the notary. My lawyer told me to give up even though I paid him Rs. 3000.

- R6 I have a land which stretches from Trou D'eau Douce till Palmar, but "tablisma" had planted sugarcane on it. I even had my all my documents.
- R7 My family, the Charlots had lots of land, but the sugar estate has grown sugarcane on it. They were too careless "contant manzé boire" ('love to eat and drink, i.e. enjoying themselves)' The Whites took away the land.
- R10 My mother has lost her land in Komason. My father in law lost his land in Carreau Banane. They were too focussed in enjoyment. For Rs. 45 and a "farata, currybanana ek curry coq", they lost two 'arpents' of land.
- R11 In Camp Marcelin, there was much land that belonged to Creoles. But the sugar estates have taken the land from them.

9 respondents claim to have lost land. In most cases, the sugar estate owners have cultivated sugarcane on these lands. Due to lack of education and financial resources, they haven't managed to get back their land. According to them, the whites are financially too strong to fight against. It a "David vs Goliath" situation. Justice is too expensive to afford and with growing age the respondents have even grown weaker.

The surface of the land that was lost is very important ones. Had the respondents still owned them today, this would certainly have been an excellent way to better their future and overcome their poverty. Hence, these losses of land have deprived slave descendants from the opportunity of social mobility.

Research also reveals that slave descendants were given land without any document to prove ownership. With time, they simply had no document to prove that they own the land which was being sold. Some respondents also blame the 'manzé-boire' attitude as well as lack of education of their grandparents for the lost of land.

#### WEST AND SOUTH-WEST (BLACK RIVER AND SAVANNE DISTRICTS) FINDINGS

The issue of land dispossession was also raised in the interviews with almost all the informants pointing out that the slave descendants lost their land. They were dispossessed of their land because they were illiterate and these injustices have to be repaired. The relationship of the latter with land is not solely practical (such as for economic reasons) and physical but also symbolical as indicated by Elizabeth for whom land is not physically important but the symbolism of the land is important because she remembers the sufferings of her ancestors on that land. She does not have any physical attachment to the land and does not want to go back on the land where she was born and where her ancestors lived. But many young people are claiming back the land which was not theirs and which neither belonged to their ancestors. They do not understand the importance of the symbolism of that land.

#### GENERAL RESEARCH FINDINGS

Almost all the informants pointing out that their family have lost their land, either to the sugar estates or to members of other ethnic group or more rarely to their own kins. They were disposed of their land because they were illiterate and these injustices have to be repaired. If land had been lost, it's because «dimounn finn anbet zot» and also because they were illiterate, or negligence. The surface of the land that was lost is very important ones. The surface of the land that was lost is very important. Had the respondents still owned them today, this would certainly have been an excellent way to better their future and overcome their poverty. Hence, these losses of land have deprived them from the opportunity of social mobility.

Some claim to have title deeds.

## 5. IDENTITY/PERCEPTION OF DESCENDANTS OF SLAVES

### PORT LOUIS NORTH AND SOUTH FINDINGS

- R1 Creole
- R2 Mauritian
- R3 Mauritian and Catholic
- R4 Mauritian
- R5 Defined herself as Mauritian and Catholic and as slave descendant. For her, the slaves were those who were ill-treated before.
- R6 Defined herself as Creole and slave descendant. What is a Creole? Answer: «Enn Nasion». Is conscious being a slave descendant because of the history of the family that he had learnt.
- R8 The Creole and Indian communities are those who had produced slave descendants. But respondent sees herself as Mauritian.
- R9 Everyone is a descendant of slave. General population + Creole and are all descendants of slaves
- R10 Everyone is Mauritian and he calls everyone nations whatever their origins
- R11 Sees self above all as Mauritian
- R12 Does not want to talk about community and defined herself as Mauritian
- R13 Hesitated a long time before answering the question but thinks all Creoles are slave descendants
- R14 Defines himself as Mauritian; does not know if he is a slave descendant but thinks it's possible.
- R15-R17 The three respondents showed great incomprehension as to the word descendant, not understanding the meaning of the word. This has necessitated stopping the recording several times to explain the term. Besides, though they had acknowledged themselves as descendant of slaves at the time of selection, it turned out that when questioned, the majority could not elaborate on the subject, as they lacked detailed knowledge. Besides, when they were young, it was prohibited to ask too many questions from elders. It was taboo, or impolite to talk with elders. However, they all considered a having a link with slavery because of their present ethnic belonging. More concretely, they did not identify themselves as slave descendants but thinks their parents or forefathers were.
- R18 Define himself as Mauritian and Catholic, but consider himself as descendant of slave, after having heard speaking about this on television and elsewhere. Has no shame to recognize himself as such.
- R19 Does not know what is a descendant of slave or how to define a Creole. But considers that in general the Creoles as slave descendants.

Hence defines himself as descendant of slaves and has no shame in stating this.

## UPPER PLAINES WILHEMS FINDINGS

The question «*Kouma ou defini ou lidantite?*» (How do you define your identity) had to be reformulated for the respondent to understand the term *identity*. They answered 'Mauritian'.

- R1 Mauritian, not from just one origins. Physically I belong to one community. I am of mixed blood
- R2 Creole. All Creoles are descendants of slaves. A culture, religion had been imposed upon us. Does not feel he had an identity proper. His physiomy shows his belonging. Today we talk more of Creole than slave descendants
- R3 Is considered as Creole in Mauritius but he feels his Mauritian. The Creoles are the sole descendants of slaves
- R4 Considers herself as Mauritian but Creole pure race, that is not mixed
- R5 Creole
- R6 Creole
- R7 Mauritian
- R8 Thinks there is only one community which is poor. Believes himself inferior
- R9 Creole and Mauritian. But has relatives coming from India
- R10 Creole. Believes that there is a need to forget the past as this prevents us from living
- R11 Mauricienne. Mauritian. Ethnic belonging is linked with religion
- R12 Catholic
- R13 Marathi. For him the coolies were slaves
- R14 Creole
- R15 Mauritian but is still downtrodden
- R16 Feels still a slave
- R17 Slave descendant. They are still badly perceived by society and government
- R18 Creole. All Creoles are descendants of slaves
- R19 Mauritian and also Creole because it's my language. Slave identity is not perceived as a shame
- R20 Mauritian
- R21 Mauritian but also slave descendant « *santiman desandan esklav bizin viv li ek li inportan rapel sa bann zanfan* ».
- R22 Creole. All Creoles are descendants of slaves
- R23 Mauritian but says he has suffered another form of slavery. There are different types of Creole the poor and the «*de kouler*». (lightskinned Creoles)
- R24 Mauritian
- R25 Mauritian. Says he is a descendant of slave as his father had talked about it. He knew Liberated Africans who came to Mauritius. «*zot ti mars dan kote patron*». (They sided with the boss)
- R26 Mauritian but also descendant of slave because of her skin colour
- R27 Mauritian
- R28 Not all Creoles are descendants of slaves for there are of mixed origins
- R29 Creole

Though a majority consider themselves as Mauritian, Creole identity is very present (in its ethnic sense). R19 believes that speaking Creole makes one Creole. R26 thinks her skin colour is proof she is of slave descent. Slave ancestry is not perceived as shameful but on the contrary as a source of pride. But many stated that this identity is perceived negatively at work. (R8, R15, R17, R20, R21, R23).

#### LOWER PLAINES WILHEMS FINDINGS

##### Slave ancestry

12/26 finds a link between them and slaves. For 1 respondent, no one in the family ever talked about it. Three more find a link between them and Africa or Madagascar.

R5, R7, R10, R12, R13 Obvious link: not proud to be but accepts it.

R14 Rodriguan father proud of Africa and Mauritian mother; he knows also his ancestor Jolicoeur who was affranchised in 1740

R15 - R16 declares "there is the memory of our body", there are invisible but real traces of that period with its suffering in us, and it will take time to change the traces of that collective experience - R20 -R22 - R25

R6 Obvious link to Africa or Madagascar: his grandfather told her that Fanfan (her family name) has been given to his grandpa's grandpa who came from Mozambique to Mauritius.

R15 - R25 looks like Nelson Mandela and considers him as a "brother".

R1 No one in the family ever talked about slavery

##### Creole

All respondents see themselves as Creoles. 9 made different kinds of comments on the subject. This has to do with Creole language being one of the elements defining their identity, with a wide variety of mixed origins, namely Madras and Malagasy (see ORIGINS). Creole identity is seen as an open one.

R3, R4, R11, R12, R13, R24 I am a Creole (and proud to be a Creole).

R26 This respondent is aware of the existence of Creoles all over the world.

These identity definitions specially "being a Creole" cover a wide variety of explanations and perceptions, with a strong feeling of being born in Mauritius, of speaking Creole and also for some of being of mixed origins.

Creole identity - linked to Creole language: "I am a pure Creole: From birth, I speak Creole. I cannot read or write Creole. I read and write French. French is easy. Creole is difficult.

R3 A typical declaration where the culture-language-social question is obvious. This respondent states she is a Creole because from birth she speaks Creole, but as she was never taught to read and write in Creole, she finds it difficult. It is easier to read and write in French.

R11 Creole identity: I am a full Creole. From birth, I speak Creole. (R 4 is married from a Christian woman of Indian origin. "My children will be Creole by their name. But I have an open mind, I feel as a human being.

R12 "I think of my ancestors as slaves from Africa. I have visited Morne and heard my grandparents talk about slavery. I have suffered a lot, so I think I have followed the steps of my ancestors. I consider myself to be a descendant of slaves. I define myself as a Creole and I am proud being a Creole. People used my ancestors as slaves. We have our value."

R19 I am a Creole madras (his mother was descendant of a Malagasy slave) and he speaks a little madras.

Creole is a *métis*, mixed blood:

R5 R11 Creole culture is a mixed culture

R24 gave the example of jazz music in Louisiane; this music is not an African music but a Creole music, a mixed music.

R14 has a broad definition of Creole: "If someone declares he is Creole, we should accept the fact, and if a black person does not say he is a Creole, we should accept it also. A Creole is one who chooses to be Creole. The pride of a Creole is not only slavery history because it transcends history and in the modern world - this is a "parti-pris d'espérance" because the world is becoming intercultural and Creole. Then racism and xenophobia and protectionism will disappear."

R25 Creole mixed with madras

All respondents consider themselves as Mauritians. Their motherland is Mauritius.

R10, R13, R25 I am a Mauritian:

R10 I see myself as a Mauritian and part of my family came from India, Madagascar. Long ago, slaves have been sold and came to work for white people and suffered a lot. We come from these people.

R14 I have friends from all communities and I like it. I was raised in a Hindu environment and I am impregnated with Indian culture and religion. We reared animals and grew with Hindu friends.

R25 attracts our attention on the values and traditions in Creole families. Adults did not speak familiarly to their children to recount the past or give them information on their ancestors. But what we see is that mothers and grandmothers are the ones who shared the most, perhaps because of the natural closeness between mother and child. Nevertheless some fathers also did transmit memories

#### NORTH (PAMPLEMOUSSES AND RIVIÈRE DU REMPART DISTRICTS)

In line with the testimonies, the slaves were people that were not paid for their labour, they had no rights and did not consent to come to Mauritius. They slept in common sheds on straw mattresses. They were ill-treated as stated by Joseph, they were treated like animals, enchained and whipped.

It transpired from the testimonies that there is a biological conceptualisation of slavery and slave descent as being genetic and 'passed on' in people's blood. The legacy of slavery, hence, seems to be not only cultural but also genetic. For example, according to Pierre, everyone has slave blood because at a point in time people mixed and there has been interbreeding.

For Joseph, when a man of slave descent marries a Madras woman, the children will be descendant of slaves but if a Madras man marries a woman descendant of slaves, the children will not be of slave descent. His conception of ancestry is rooted in patri-lineal. For Donald, he heard that people who fall under the category General Population are the descendant of slaves but the term General Population is vague hence how to prove that they are descendant of slaves? Furthermore, following interbreeding it may not be possible now to recognise a slave descendant

Also, whilst there are people who are proud of their slave ancestry and claim it, others deny their origins because they do not want to be considered as slave descendants.

For some interviewees, even though they consider themselves as descendants of slaves, they primarily identify themselves as Mauritian such as R2 and R4 although they might be of slave descent they consider themselves as Mauritian. Among the informants who identified themselves as

Mauritian, for some knowing their origins is not important because they identify themselves to the capitalist system and to contemporary times and they obliterate past history that is not significant to them. For example, R5 stated that she cannot say that she is either a slave or of slave descent. Her statement is rooted in a conceptualisation of slavery that if we do not experience modern forms of slavery we are not slaves or of slave descent.

Although they do not recognise their descent, they all mentioned that people need to be of their slave origins. Indeed, even if they do not assert a slave stock, yet they assert a slave history and identify themselves to this history. One explanation for this identification might be that it is rooted in a collective history of slavery, in other words, a sharing of this history.

When questioned on identity construction, many informants answered that they consider themselves as Mauritian Creoles because of their African and Malagasy phenotype, their skin colour (they are dark skinned; in other words Black), hair type (they have frizzy hair), culture and food habits. For example, R9 thinks that his ancestors came from Pondicherry and from Africa as well because of this skin colour, hair type and physical appearance. Also, he identifies himself with the suffering of the slaves and is proud of his origins.

On one hand, based on interviewees' testimonies, it appears that their identification as descendant of slaves is based on their shared feelings and experiences of sufferings and oppression rooted in the belief that 'the others' and society keep them in oppression by refusing or repressing their social mobility and undermining their history and consequently the memory of the slaves. A collective memory of suffering and oppression is perpetuated with the generational transmission of suffering, misery and poverty that keep the descendants of slaves in the continuous cycle of deprivation. Their identification is not derived from knowledge of ancestral origins but rather on shared legacies of slavery such as social experiences and lack of education and opportunities.

On the other hand, some informants' identification with the slaves descendent seems also to be founded on racial grounds. This biological identification associates the African phenotype, skin colour (being black) and hair style (frizzy hair) with slave ancestry.

Along the same lines, Black Creoles who are not necessarily of slave ancestry also identified themselves as being of slave descent as they share the same experiences as the descendant of slaves because of their African phenotype. Society's behaviour towards the Afro-Creoles is based on racial grounds with all people of African appearance being considered of slave origins. This is illustrated by R15 declaration. His paternal great grand father was Belgian and on his mother's side they are of Indian origin and maybe of Malagasy origin also. For him there is a difference between being of African and of Malagasy origin since slaves came mostly from Africa than from Madagascar. He considers himself as a descendant of slaves because he is Black and for him all Blacks are of slave descent.

## WEST AND SOUTH-WEST (BLACK RIVER AND SAVANNE DISTRICTS) FINDINGS

### Conceptualisation of slavery and slave descent

For the informants living in Tamarin, the real descendants of slaves live in Chamarel because their language - the way they speak Kreol - and their lifestyle are different compared to those living in Tamarin. For example, France found that they look like Rasintatane. Since the inhabitants of Chamarel live a rather simple life reclusive from others, they are perceived by the other Creoles as being different because of their way of living that is considered as being similar to that of the slaves.

For Harvey and Daniel, the slaves came from Africa by ship and they did not have names but numbers. They were sold, whipped, chained and were starved (causing high infant mortality and morbidity). When sold they were separated from their families. According to Chris when they came they did not negotiate their working conditions and were dominated by others.

The descendants of slaves are people whose ancestors came as slaves. Some of them have succeeded in life but according to Shirley, those who have achieved success are of mixed European

and African descent and their 'White' fathers helped them in their schooling. For her, the educational achievers are the Coloured Creoles and many of them got abroad to study and do not come back to Mauritius. Yet she pointed out that there are also Creoles whose parents are both 'Black' Creoles and who have been quite successful.

For everyone, with the exception of festivities, the government has done nothing for the descendant of slaves and they are still waiting for recognition. Children do not know the history of slavery as it is not taught in schools. Hence, there is a need to correct this error and to include the history of slavery in the school curriculum.

We should distinguish between slavery and slave ancestry for according to Shirley following mixed relationships the notion of pure descendants of slaves is erroneous and with evolution there is a need to remember and preserve the memory of slavery and slave origins. Moreover, for almost all informants, the question of being or not of slave descent is a political discourse and is no more the key issue. Chris stated that it is time to stop talking of slave ancestry and to start considering reparation for the damage and wrong caused to descendants of slaves who were dispossessed of their land and have since been oppressed. Instead of giving money to the descendant of slaves, there are other means to improve their life such as improving.

## 6. SLAVERY AND ITS CONSEQUENCES

### PORT LOUIS FINDINGS

- R5 Does not have much to say about the sequels of slavery but is conscious that the poverty of the descendants of slaves is linked with this history; thinks the Creoles still suffer from these sequels in the form of discrimination when it comes to recruitment.
- R6 Has no opinion on the sequels of slavery. But is conscious that the discriminations the Creole sufferings are linked. Besides does not believe in the ability of Creole politicians to advance the cause of the slave descendants
- R7 Have lost their traditions and customs; racism and education; discriminated against; did not come to Mauritius to stay; had job security in Chagos
- R8 Those that had few means (descendants of slaves) remained in poverty, either because they could not or did not make efforts to get out.
- R10 The slave descendants are uprooted. A different lifestyle from others
- R11 The descendants of slaves are poor and rejected. The sequels of this suffering is still present and there is still among them a feeling of marginalisation
- R12 The descendants of slaves are penalised in several fields, namely in education and in the field of employment. The feeling here is that access depended less on competence than on skin colour
- R13 Had no idea of the sequels of slavery and does not seem to understand the question. Makes no direct link between filial ancestry with slavery and present poverty of Creole.
- R14 Slavery has as sequel that many among the population remained backward, illiterate.
- R18 Does not well understand the link to establish between slavery and its present consequences
- R19 As the slaves had nothing to preserve («Bann esklav pa ti ramas nanye»), it follows that their descendants found themselves with nothing

### UPPER PLAINES WILHEMS FINDINGS

This section was difficult for the investigators as the respondents had difficulties understanding the meaning of the questions. The consequences of slavery are visible today specially in the economic and social field

- R10 Poverty is a direct consequence of slavery
- R15 The descendants of slaves do not have sufficient means to get out
- R16 Injustice envers n'ont pas assez de moyens pour s'en sortir.

### Injustice

- R17 Injustice, unemployment, lack of education
- R19 A bad image. It's visible in social life and mentalities

- R20 There are still those who oppress the others. Today, there is another form of slavery
- R21 «*Santi nou kraze, lezot imilie nou*». We feel oppressed. The others humiliate us
- R25 There are other forms of slavery today
- R28 «*Sibir imiliasion, diskriminasion dan travay ek lasosiete*». Have to face humiliation and discrimination at work
- R29 Miscegenation

#### LOWER PLAINES WILHEMS FINDINGS

Creole mindset and attitude to life: a consequence of slavery (mistrust, credulous)

This respondent has a very deep analysis on his situation. He is conscious of his own fears and auto-limitations but he is very creative, has written poems and theatre plays. He explains that those fears are experienced by many Creoles and he sees that as a consequence of slavery. This auto-censure is reinforced by the development of power distribution in post- Independent Mauritius.

R5 - R16 fear to undertake new projects: “Mo panse mo enn desadan esklav - ena kiksoz mo anvî fer mo pa kapav - mo finn aste enn arpan kann, me ena kiksoz ki bloke - zot anvî sorti, me zot per pou al de lavan - pena bokou devlopman - avek diplom ou pa telman kapav devlope”.

R2 The destiny of Creoles is dramatic because they were made to believe they are different and do not have the same qualities, human values, intelligence, right to the same education, even religion. This did not help him to think he is a full-fledged Mauritian. So he is afraid to ask for his rights, he has an inferiority complex. These are the sequels of that period. There will be progress through education.

The way history has been presented does not help him. He is revolted and that does not help psychologically.

Creoles are born with many handicaps: they have no bank account, they are born in a small house, poor environment. They are ill at ease. Difficult to manage his life conditions as a Creole. Teaching of history must help him think of the future.

We should be careful about REPARATION. Some see only MONEY. I think money won't repair sufferings. What is needed is education, lift his conditions of life, make him be accepted as a fully-fledged Mauritian.

Psychological reparation is more important than material. This will not repair the damages caused by slavery; He has been hurt in his mind, flesh, guts, body. Show him he is part of that society everywhere in society and Church.

R4 Slavery has consequences today. There are sequels. Creoles are marginalized. They lack everything, they cannot progress, have no opportunities. To have money, you need to have a little, but if you have nothing, you will still have nothing. I myself am still fighting, have not enough money. I could not go to college because of lack of money. I wanted to further my education. More Creoles are studying. There must be people to advise them. You lack knowledge. You don't know how to do. We did not have ideas, we could not think of business. My family lived from day to day. I could not have any dream. Our focus was on our everyday meal.

- R5 Creoles have lost their family tree. They have lost their names and have been given other ridiculous names. They have no Chamber of commerce, no economic centre.
- R6 There are still many families from slave ancestry who don't even have a house today. Indians came for sugar cane field work and they had priority to have lands. Creoles were left behind. They struggled but had nothing and still have nothing. Creoles are those who don't have houses. The land they lived on was not theirs. They lost it. Many families have lost their lands. We must do research. I have moved 14 times in my life because of cyclones. Today I have a small *cité* house. Mother bought it after cyclone *Gervaise*. I have lived in that house for 33 years, but we don't possess it fully because we are still paying for the land. There were 80 houses; these were the first houses to be built after *Gervaise* (*Lakaz letaz* - Storeyed House). It was a "sample". People have become owners of their houses 50 years after Carol. Housing is a serious problem. Some children cannot buy land, it is too expensive. And there are too many people on the list.
- R9 Slavery had an impact on us. This is the history of my ancestors, they were living in their country, they worked, risked their lives, fought, lost their loved ones. To be healed from that, it needs time. They liberated themselves, created their language, and invented their music to fight the harshness of life. Segá is the intelligence and sweat of our ancestors to regroup and express the hardships of life. Their descendants still suffer from these wounds. They had no one to advise them as indentured labourers had. The French colonists educated the children they had with slaves but there were barriers between those categories of descendants. They are not liberated at 100% today. There are not enough advisors today. I have three children. I want to advise them for a job. Who will I turn to to know about that? How to help orientate them professionally? Creoles that have succeeded don't help others. Other communities do that.
- R12 and R13: Poverty is a consequence of slavery.
- R16 As slave descendants, we have inherited nothing, no land, no economic power. 80% of land belongs to white people. Indians are organized since 1913; they had experience in economic development. Creoles did not have that experience. They were destitute.
- R14 Consequences are hard - My biggest suffering is in the lack of self esteem. Because my father was mazambik, my mother's family rejected him. Creoles still have disdain for themselves. He cannot accept himself. It's a bad start in life. It has been hard for slave descendants, because the slave system is an economic system. The Catholic religion is the official religion of this system. 15 articles on Code Noir talk about the Catholic Church as a partner of this system. It is still damaging the descendants, by stigmatization. You remain *tikreol* for life whatever successes you have.
- R5 The negative role of the Catholic Church that has associated all that is evil with blackness.
- R16 Slavery is not the same as indentured labour - slaves did not have a salary - he has been snatched from his country and brought here.
- R8 "Long ago, we accepted totally and passively our marginalized situation. People had categorized us. There was reproduction of class and work, especially for boys who had to do their fathers' job. We were limited. Now there is emancipation.
- As a civil servant for 30 years, I lived that. I had to accept that other less qualified people than me were promoted before me. Now we fight

for our rights, because we have the same qualifications as others. We react. Creoles were accepting totally their situation. I think this is a sequel of slavery. It made us become obedient (servile). There was so much pressure on us to make us accept everything. After slavery this attitude became that of Creoles.

MANY OF THE RESPONDENTS ARE AWARE THAT SLAVERY HAS HAD A NEGATIVE IMPACT ON THE CREOLE MINDSET AND ATTITUDE TO LIFE AND HAS MADE HIM PASSIVE AND OBEDIENT FOR A LONG TIME. HE HAS LOST HIS SELF-ESTEEM, IS FEARFUL TO ENGAGE IN NEW PROJECTS, PRACTICE A DEEP AUTO-CENSURE ON HIMSELF, PARALYZING ALL HIS GOOD WILL AND POTENTIALITIES. THE PROFOUNDEST WOUNDS ARE INVISIBLE AND ARE ENGRAVED IN HIS PSYCHOLOGY. THE REPARATION WILL TAKE A LONG TIME.

The second main consequence is the lack of economic power and social mobility. It is very difficult if not impossible to come out of poverty and climb the social ladder if you have nothing at the start, not the slightest capital. Moreover, slavery and its effects have confined a large proportion of Creoles/slave descendants in the working class.

Property and housing: 300 years after French colonization and 162 years after the abolition of slavery, many very poor descendants of slaves and Creoles in general are still struggling to get a decent house.

Creoles did not have the economic expertise like Indians had. They had no leaders or counselors to guide them as in other communities.

R4 declared he could not have any dream. Creoles are criticized for their lack of aspiration, but the psychological impact of slavery and extreme poverty leave no room for that.

The Catholic Church was a partner of the slave and colonial system.

Slavery as a holistic system with a strong economic dimension must be treated in a different way than indentured labour to do justice to those who suffered from both systems.

#### WEST AND SOUTH WEST (BLACK RIVER AND SAVANNE DISTRICT) FINDINGS

When questioned on the legacy of slaves, the informants mentioned a form of 'couillonisme' (English. Translation Idiocy) and arrogance that the descendant of slaves have inherited from their ancestors and that they perpetuate. For them the Creoles are individualist and "pernickety" such as R6 talked of how there was and there is still cohesion among the Indo-Mauritians who value the importance of education and saving for tomorrow whereas the Creoles are not land owners because they sold their land. The latter are not far sighted and do not have the 'brains' to plan for future generations. Presentism is a philosophy of life that the Creoles (referring to the Creoles as descendant of slaves) have adopted. This philosophical approach to life is a generational transmission that dates back to slavery, when at the abolition of slavery the emancipated slaves adopted a hedonist lifestyle and did not regroup but were divided.

Moreover, based on R15 testimony, there is a generational transmission of jobs which is as well a legacy of slavery. The Indian indentured labourers did not come as slaves but to cultivate land and subsequently their descendants remained in agriculture while the Blacks work mainly in the construction industry as labourers and stone masons.

'...Et plus de Créoles, de noires, enfin je ne sais pas comment dire ça qui sont dans la construction.... Peut-être au fil de la génération si vous voulez, ils ont appris a... ceux qui savent cultiver la terre, ils ont appris de leur père, des trucs comme-ça à cultiver la terre, et ceux qui sont habitués a la lignée de la famille construction, ou peut-être aussi les échecs scolaire qui vous amène a ça...'11

(Eng. Trans.:...And more Creoles, Blacks, i do not know how to say that who are in construction...Maybe through generations if you want they learnt...those who cultivate

land, they learnt with their father, things like cultivating land and those who are through generations in construction, or maybe schooling failures that bring you there...)

All the people interviewed stressed that it is time for the future generations to get rid of this idiocy and arrogance that still hold them back. According to R6, the last five years has witnessed a change among the Creoles who have gained consciousness of the importance of education and of rectifying past mistakes. They also stressed the need to recognise the history of the slaves

#### NORTH (PAMPLEMOUSSES AND RIVIÈRE DU REMPART DISTRICTS) FINDINGS

There is a generational transmission of menial jobs because as reflected by the life histories of the informants, they stopped schooling at a young age to start working. For example, R6 and R13 stopped schooling after Standard 6 and Form 2 respectively because of financial problems. They were poor and education was not free at that time.

For the informants, although illiteracy is present in all ethnic groups who are illiterate yet Creoles are mostly illiterate because in the past they did not have the opportunity either to go to school or to continue schooling. While for some they do not feel ashamed of being illiterate for others they see it as a shame such as R12 and R8:

'...non li pa normal li pa normal parski mo mem mo pa kon lir ester mo sagrin parski parfoi mo dir mo tifi get sa pou moi get sa si 1 zournal mo pou dir li lir sapou moi mo truver lir li bien inportan aster...'<sup>4</sup>

(Eng. Trans.:...No it is not normal, it is not normal because me too I do not know how to read now I am sad because sometimes I ask my daughter to look at that for me if it is a newspaper I will ask her to read it for me I find that read is very important now...)

#### LOWER PLAINES WILHEMS FINDINGS

As per the answers of the respondents, one can say that they had never looked at this dimension of slavery in terms of contribution. If they find a contribution, it is at the personal level, that is in the transmission of a craft and also a cultural heritage (music)

Politically, they feel the Creoles are not represented. There is a lack of persons who put pressure on the political authorities. Politicians only come to them at elections time. For Pour R18, Sylvio Michel represents the Creole community. The descendants of slaves who enter politics end up like all politicians, looking after their own personal interests R17 is a member of FCM for she wants to militate for the uplifting of the Creole community, R25 is a member of l'Organisation Fraternelle. Except for R21 who does not vote, the respondents do not cast their vote according to the ethnicity of the candidate

Economically, even if many agree that the Creoles are poor, they don't deny the fact that poverty hits all communities. Poverty is material (lack of food, of decent lodging) and the reason why they are trapped in that spiral is through lack of education. R1 believes that the descendants of slaves had been kept away from progress through lack of education but also because many had come to accept their situation.

For R2 the Government had not played its role of supporting the Creoles, the Catholic Church too.

Hence though many have studied, it's difficult to get a job in the civil service.

R21 «Kreol pa gagn travay dan gouvènmàn» (Creoles do not get jobs in government service) or R26: «Fode ena inpe kouler pou gagn enn travay» (You need to be light skinned to get a job). They are conscious that even though everyone has access to education, access to work is not equal.

However, R25 and R12 believe «travay ena, dimounn ki pa le travay» (there are jobs but people do not want to work).

The retired persons are grateful to the government for the old age pension.

R26 “aster mo erez dan mo vie zour”. (Now I’m happy in my old days)

Few consider themselves as poor for compared to their past life, today they have a house and enough to eat even though some have difficulties making ends meet.

The living conditions of the past have left a deep imprint on them. Many speak of the Second World War era where food was rationed. Besides this period, their food consisted of manioc, sweet potato (which grew up in the courtyard), mashed up maize, «kanbar sousou», fish for those who lived on the coastal area, and green leaves

Some added that at the time everything they consumed was fresh and perhaps that’s why there were less diseases. The dishes were cleaned with ashes which were left in the hearth. The houses were made of cowdung. Many respondents were nostalgic of the times when they themselves fetched the cowdung. That was part of their weekend walks during their childhood. Another fact that certainly left an imprint was the *baydoun*. If in villages the latrines were the water closet, in the towns there were the *baydoun*, those prisoners who came each morning to fetch the excreta. R19 has even kept a recipient. Medicinal plants made up their pharmacy: Ayapana, citronnelle, boileau, «fandamann», «fey tourtrell», «liladpers».

Culturally, they all agree that music, the sega is a heritage from their slave ancestors. R21 thinks we are losing this heritage, this *sega ravanne* culture as today other instruments are used.

#### UPPER PLAINES WILHEMS FINDINGS

This whole section of the questionnaire on contribution of slaves to economic, political, social and cultural life in Mauritius was very difficult for the respondents. Most of them did not understand what was being expected of them and it was impossible to put the questions in such a detailed manner.

## 7. CULTURAL, SOCIAL, POLITICAL AND ECONOMIC CONTRIBUTION

The way the question was put was not easily understood by the respondents. The notion of “contribution” was understood as a “payment” slaves paid and it was clear that this was impossible. Many understood that the question was about their actual economic situation and it was quite impossible to make them say anything on the topics concerning contribution of slaves.

Generally few respondents have a reflection on politics and when they have one, it is about the post-Independence politics and not about the contribution of slave. It seems that they cannot imagine that they can be part of decision-making

It was evident that respondents had never thought about that dimension, though all a large proportion of them know that their fore parents have worked very hard. This is perceived rather in terms of class relationship with White people. They were the have-nots who had to work in harsh conditions, but they have not reflected on their slave ancestors as having contributed to the development of Mauritius.

One respondent, R14, stated that “by their forced work, slaves developed the country. They have largely contributed to nation-building: there was a time not too far away when most teachers were slave descendants and have educated children from all walks of life. There is a need to acknowledge that contribution.”

R10 Slaves have worked hard.

R26 “When slaves came, there was nothing. They did the hardest work in the beginning. Under the lashes, they did everything that had to be done. Then others came to work. We cannot forget that they were the first to toil the soil of this country. Their work is not acknowledged. Creoles themselves have no recognition, whereas they have been the first to come here. Today Creoles have no place.”

See the FINDINGS on the life history and the consequences of slavery as regards to economy.

### CULTURAL CONTRIBUTION

Kreol language must have its place in social life.

R5 The heritage is Sega, ravann, triangle makalapo, zez, banbou, bobre. Many instruments have been lost. People expressed their lives through onomatopoeia; He was crying on his misery. I have found these instruments back and put them back in our culture. Culinary heritage: galet manioc, etc. Young people don’t know. Creole used to do “mafât” (kind of galette in earthen oven); Zendwi: galantine ou tête de porc, andouille boucanée. Keep fish fresh in charcoal dust in a box. Old technique.

R7 I was a teacher and considered as an intellectual and I sang sega considered a low class cultural trait. Sega is our Mauritian folklore. People liked my songs. I composed Lil Moris mo zoli pays, Zarina and Mme Eugène. They became a disk. Mme Eugène became a big success. I had an ulcer. When I was well, I went to P. Laval. Cocono pa le mor. I was greeted everywhere. (...) I always wanted to know what had happened in the past and what will happen in the future. When I went to Paris, I went to cultural places: libraries, museums. Same in England and Italy. When I began with sega, I was encouraged by my parents and the public. I travelled a lot. I progressed. I researched on sega, the most Mauritian thing that exists. I think I have slave ancestors from what I have read. Sega helped me to know the history

of my country. I went to archives to know where I came from. Lebrasse in Bordeaux University. The first French Lebrasse who came to Mauritius came from Bretagne and he met a slave. There is a lot of phenotypes in my family. We adapt with different languages and milieus. Creole culture is open.

R14 Creoles have contributed to the language and lifestyle adopted by all Mauritians.

R26 Creole culture is the biggest contribution of Creoles to Mauritius, because it was created here.

#### SOCIAL CONTRIBUTION

R8 I have done social work with poor people for 15 years.

R12 Creoles do a lot of social work, visit poor and sick people etc.

R15 I do a lot of social work.

R16 I do a lot of social work and I think a lot.

#### POLITICAL CONTRIBUTION

R14 Creoles are despised because they voted against Independence but this must be analysed in context. The Labour Party was founded by slave descendants. My father was member of the Labour Party. Because of the struggle of port workers, social and work laws have progressed. In Free Zone and tourism, black women were called "p" because they dared to work in these sectors.

Generally few respondents have a reflection on politics and when they have one, it is about the post-Independence politics and not about the contribution of slave. It seems that they cannot imagine that they can be part of decision-making. They are preoccupied with basic necessities and the economic dimension of their lives.

The role of politicians is severely criticized. Government is seen as being partial. There is wide corruption.

#### WEST AND SOUTH-WEST (BLACK RIVER AND SAVANNE DISTRICTS) FINDINGS

The testimonies diverged on the recognition of the contribution of slaves with some recognising the participation of the slaves to the development of the country

All informants mentioned that the slaves contributed to Mauritian cultural life with the creation of the Segga music and dance, art and creativity, Mauritian cuisine and food habits even if they have evolved and also with the ascription of Le Morne Mountain as a world heritage site. In line with R6 testimony, Creole use skills to express themselves through music and partying and these things are 'in their blood' but blood washes away quickly because people are mixing more. These skills are integral to Creole customs. Along this line the informants give to the Creole customs and musical skills biological underpinnings as if they are within people's blood and genes and with mixed relationships increasing, people are mixing their blood and hence skills are not transmitted to future generations.

But few people made the correlation between the island's cultural patrimony and local economy. Also, when referring to the cultural legacy of slaves, many mentioned the architectural heritage with the Cathedral, Martello Tower, churches such as the Church of Cassis, the Citadel and other stone buildings as being the tangible inheritance from the slaves and old jobs that have disappeared

such as stone cutters, charcoal makers, sugar cane labourers and wood cutters. In people's collective memory, the architectural patrimony dating backing to the French and English colonial periods are legacies of the slaves as for them the legacy of slaves and of slavery are same.

'....Zot '....Zot inn travay bokou, zot mem bann premie planter kann; o fe zot inn fer tou devlopman me ki san ki zot kone ki zot pe fer parksi zot ti bizin zis pou planter, zis pou fer sa...kinn devlop pei, kinn fer tousala. Parski kan zot komans plant kann-la, inn komans vann kann-la inn gagn kas, inn trouve enn bon zafer. Ler-la komans fer bann indistri fer li pli gran tousala. Me inn komans par zot, bann esklav.... Nou pli gran kiltir se la dans, la sanson. Parski Kreol lontan, esklav li ti kominik par sante, par ravann. Se par sa fason-la ki nounn kominike, anfin dapre seki mo'nn aprann. Se sa ki nou veritab kiltir se la dans, nou exprim nou par ladans, par la sanson...10

(Eng. Trans.:...They worked lots, they are the first planters; they unconsciously did all the developments because they had to be planters only, only to do that, they are the one who developed the country who did all that. Because when they started growing and selling sugar cane, they earned money and found it a good thing. Then they started developing bigger industries. But it started with them, the slaves...Our greater culture is dance and songs. Because Creoles before, the slaves communicated by singing, by *ravanne*. Based on what I learnt it is by this means we communicated. This is our real culture it is dancing we express ourselves through dancing and singing...)

Based on R4 and R5 testimonies, our cultural morals and values are a legacy of the slaves. For them we have preserved the ways of living like the slaves without being savages but civilised people. Such a statement is anchored in and brings back the perception that traditions and practices that slaves brought with them and perpetuated were barbarian as they did not conform to western ones. Only western and traditional practices, norms and values were considered as civilised because civilisation was and is still associated to westernisation.

There is a commonly held belief that the ancestral culture of the slaves was eradicated by Christianisation but from the testimonies it transpires that traditional practices and values survived but under modified forms which constitute Creole culture. They all mentioned the need to recognise the history and cultural heritage of the slaves.

Although for some the slaves and descendants of slaves have their input in the economic and political life of the country, they were unable to explain and identify their contributions. Few mentioned that the descendants of slaves participate in political life of the country either by making requests to the government or by voting. For example, for R9, the political contribution of the slaves was through the political involvement of the Creoles like Guy Rozemont, Balancy and Sylvio Michel. For others, the slaves and descendant of slaves contributed the cultural life of the island only.

The responses to the questions on the participation of slaves and slave descendants to the economic, social, cultural and political development of Mauritius indicated that for people these spheres are not interconnected but rather distinct and isolated. Only some informants mentioned that the slave descendants contribute to the economic development of the country by working in the sugar industry as skilled workers and labourers and that the Mauritian culture underpins the development of the tourism industry.

Another contribution of the slaves that the interviewees mentioned and that we did not think of initially was their struggle for our freedom and that this fight is wherefore we gained independence and our rights. As mentioned by R12 and R13, if they had not fought for their freedom and against the slave system we would still be a colony. By struggling for their emancipation they fought for our independence. The Whites' domination resulted in the descendants of slaves gaining consciousness that they had no rights and subsequently they lobbied for their rights and their identity as Creoles. In a certain way, the slaves are perceived as the precursor of independence. 11 TJC

Only a few interviewees considered the Minister Xavier Luc Duval as an eventual representative of the Creoles descendant of slaves; but before doing so they need to see his track record. He has to show his ability as Minister of Social Integration and Empowerment. However, almost all the people mentioned the need to have a Creole at policy making level, in other works to have a representative at national decision making levels for the advancement of the Creoles. For them, as

long as they are under-represented in key and influential political positions, the Creoles will stay backward and underprivileged. This conveys the commonly held idea that above all politicians stand for their ethnic group and hence that they promote their community interest before that of their political party.

#### NORTH (PAMPLEMOUSSES AND RIVIÈRE DU REMPART DISTRICTS) FINDINGS

The informants recognised the contribution of the slaves and their descendants to the development and to the future of the island. For example R1 mentioned that the slaves did not only contribute to the construction of churches but she also believes that they gave the land in Saint Croix for the grave of Father Laval. They were hard workers, carrying heavy loads in the sugar cane plantations. The informants pointed out that they were the ones who developed the sugar cane plantations in the country such as R3 stressed that the history of the sugar industry is closely related to the history of slavery:

*'...Anfin mwa seki mo'nn tande seki bann legliz, bann legliz ki ena bann gran gran batiman kouman Notre Dame; Poudre d'Or tousala. Kan mo get sa bann legliz la mo panse bann esklav kinn fer sa...Be sem zot ed ki zot inn fer be zot mem kinn fer devlopman pei-la letan bann franse bann kolon ti amenn zot. Sem zot devlopman ki zot inn fer dan sa pei-la mo pa trouve apre. Nek apre kan linn aboli kinn ena enn levolisyon. Si mo pe lir, tosi to pe lir, nounn vinn egal...'*<sup>3</sup>

(Eng. Trans.:What I have heard is that the churches that have huge buildings like Notre Dame, Poudre D'Or etc. When I look at these churches I think the slaves built them. They are the one who developed the country when the French and the Colon brought them. These are the developments they brought to the country I do not find anything else. When it was abolished, there was an evolution. If I can read, you also you are reading, we are equal...)

Regarding the political contribution of the slave descendants, only R2 and R3 mentioned that they contribute politically by voting in the elections. By electing people of other communities as Ministers, that demonstrates that Creoles are not racists. For others, even though the slave descendants are represented at political level and have contributed to the local cultural patrimony, yet they are not sufficiently represented at social levels as they do not enjoy freedom of expression against the government.

There is a common perception that when the slaves came to Mauritius they had no culture as if they left their cultural traditions and practices in their mother land and cultural milieus, that they forgot all of their cultural customs and values when they landed in Mauritius and hence that they lived in a vacuum without any cultural marks. For example, Pierre stated that many slave descendants do not have a culture and do not know their culture. It seems that people have difficulties to conceive that slaves were cultural bearers and when they came to Mauritius they formed cultural units. They had to culturally adapt to communicate and survive. There were cultural exchanges and a syncretism of cultural elements to form common cultural practices shared by all such as the Creole language to communicate, the Segga dance as a communication medium and also traditional medicine as healing practices. From this blending of traditions and practices, new cultural forms emerged that over time evolved and changed for survival under modified forms. The slaves came from various regions of Africa and that is why according to R3 Creoles now are underprivileged and face so many problems because they do not have a homogeneous culture.

#### GENERAL FINDINGS FOR H, I, J, K

This whole section of the questionnaire on contribution of slaves to economic, political, social and cultural life in Mauritius was very difficult for the respondents. Most of them did not understand what was being expected of them and it was impossible to put the questions in such a detailed manner.

## ECONOMIC CONTRIBUTION

The way the question was put was not easily understood by the respondents. The notion of “contribution” was understood as a “payment” slaves paid and it was clear that this was impossible. Many understood that the question was about their actual economic situation and it was quite impossible to make them say anything on the topics concerning contribution of slaves.

Slavery is seen more in terms of suffering and forced labour than in terms of positive contribution to the nation.

There is deep ignorance of historical facts and so, very little to refer to

It would be tedious to make a list of the enormous contribution in terms of labour force of slaves and slaves’ descendants/Creoles. In the plantation sector, in sugar cane estates and textile and other factories (sack). In Free Zone and tourism. Listening to their life history would be enough.

The economic contribution is tremendous in the plantation sector, in sugar cane estates and textile and other factories (sack). In Free Zone and tourism, black women were called “putes” because they dared to work in these sectors.

Of course, this contribution is also invaluable and invisible because it is at the same time an artisan work and an artistic work, in different types of crafts, in the art of cooking, stone carving and building, woodwork and carpentry.

From everything that was said during the interviews, the contribution of Creole women has been underlined and it is tremendous. Women are in the forefront when it comes to acquiring land and houses, to provide for the basic needs of children, to make sure (as best they can) that their children get education.

Their contribution is also very important on the cultural level. The greatest contribution is the creation of the Creole culture itself. Culturally, they all agree that music, the sega is an heritage from their slave ancestors. R21 thinks we are losing this heritage, this sega ravanne culture as today other instruments are used.

Creoles have contributed to the language (Mauritian Creole) and lifestyle adopted by all Mauritians. Creole oral tradition, narratives, music, instruments, sega, danse, theatre, poems are a rich part of Mauritian culture. In sports and physical activities, Creoles are bright.

In the field of education and social work, Creoles have contributed and still contribute a lot.

In the political sector, Creoles are despised because they voted against Independence but this must be analysed in context. The Labour Party was founded by slave descendants. Because of the struggle of port workers, social and work laws have progressed. Almost all the people mentioned the need to have a Creole at policy making level, in other works to have a representative at national decision making levels for the advancement of the Creoles. For them, as long as they are under-represented in key and influential political positions, the Creoles will stay backward and underprivileged. This conveys the commonly held idea that above all politicians stand for their ethnic group and hence that they promote their community interest before that of their political party. Politically, they feel the Creoles are not represented.

## 8. LIFE IN *CITÉS*

### PORT LOUIS FINDINGS

- R1-R5 Considers life in the *cités* as normal where there live a majority of Creoles and poor persons who are often descendants of slaves.
- R6 The *cités* are linked in popular imagination to Cyclone *Carol* and the Creoles. Does not make a difference between the descendants of slaves who live in the *cités* and those who live elsewhere.
- R8 The *cités* are linked in popular imagination to cyclones and the Creoles.
- R9 Everyone lives there
- R12 Area where all communities can live.
- R13 Area where everyone gets mixed up.
- R14 Symbolizes life in suburbs of towns. Not necessarily linked to slave descendants but to those who are not rich.
- R15-R17 They are housing which the government offers for shelter. From a general point of view, according to the respondents, it's the poor people who live in the areas called *cités*. In these areas, each one looks at his occupation, some work, some do not. It's also seen as an area where lives namely the créole community.
- R18 The *cités* denote people who have been allocated by the state a place to live; they are more associated with poor people than to the vdescendants of slaves.
- R19 Thinks that the *cités* are inhabited by a majority of Creoles. Sees no difference between the descendants of slaves living in the *cités* and the descendants of slaves living elsewhere.

### UPPER PLAINES WILHEMS FINDINGS

- R1 Place where persons in town that had difficulties were put. There are today organizations in the *cités* to improve things, especially with regards to poverty.
- R2 There is a majority of descendants of slaves in the *cités*
- R3 There are more Creoles in the *cités* though we find other communities
- R4 The majority of the inhabitants are descendants of slaves. People live like a big family.
- R5 The inhabitants of the *cités* live close to each other, like a family
- R6 Most of the inhabitants of the *cités* are Creoles, descendants of slaves.
- R8 The government has contempt for the inhabitants of the *cités*. They place there the delinquents.
- R9 Everyone lives in harmony. The poorest live there. There is contempt for the inhabitants of the *cités*
- R10 The *cités* are for persons that have no accommodation. The majority are Creoles but one finds all communities, except the Chinese.
- R11 Many descendants of slaves in the *cités*
- R12 For her, the *cité* is simply a home.
- R13 There are unfortunate people who live in the *cités*.

- R14 There are many descendants of slaves in the *cités*
- R15 The inhabitants of the *cités* are poor
- R16 In the *cités* everyone rubs shoulders with each other. The different communities get on very well
- R17 Life in the *cités* is difficult as there are problems like drugs but she likes the atmosphere of the *cité*
- R18 It's quiet place. It's 45 years since he lives there. There are many descendants of slaves in the *cités*. There is a difference between them and those from the coasts. The latter are badly dressed and have a different way of life. Does not think he could one day live in a coastal village.
- R19 Those who live in the *cités* have lost their home as a result of Cyclone Carol. There are many descendants of slaves in the *cités*. The people from the coasts are different from those of the *cités*. They are more hospitable. All her relatives live on the coast. She would have liked to live there.
- R20 The inhabitants of the *cités* are unlike those of the coastal areas. Their speech («Maybwa» for Mahébourg) and their mentalities are different.
- R21 A majority of Creoles live in the *cités*. The people of the coasts are different. Their way of life is different. They buy less than in the towns. One must be accustomed to that way of living to live there.
- R22 Many Creoles live in the *cités*. Had lived on the coast and can go back to live there again
- R23 There is a family life in the *cités*. There is mutual help. Many descendants of slaves live in the *cités*. Could live in a coastal village. «dimounn lakot konn fer lekonomi». (People there know how to save money)
- R24 It's after Cyclone Carol that the *cités* were built
- R25 Idem
- R26 There are many Creoles in the *cités*. It's after Carol that the *cités* were built. «Duval (Gaëtan) finn bien okip nou» Duval (Gaëtan) did look after us very well. (Could not live in a coastal village. *Dimounn lavil pli sivilize ki dimounn lakot.* (Townfolk are more civilized»)
- R27 In the *cités* there all communities, except the Chinese
- R28 There are many descendants of slaves in the *cités* but we also find other communities. The descendants of slaves of the *cités* are different from those of the coast.
- R29 There are many Creoles in the *cités*.  
Above all it's a place where it's nice to live. Many talk about as a family.  
The majority of the inhabitants of the *cités* are slave descendants  
A concentration of people who had lost all after Cyclone Carol  
Today we find other communities except the Chinese  
Those who live there do not think they could live in a coastal villages  
Stereotypes of people from the coast: Uncivilized, badly dressed, frugality, does not speak well  
Those who could live on the coast either have grown up there or had relatives living there.

## LOWER PLAINES WILHEMS FINDINGS

- R3 People are ok in *cités*, they manage to live.
- R5 There are too many ghettos in Rose-Hill in contrast with these exclusive residential places as Balfour. These ghettos are the consequences of Carol.
- R10 I have lived in a *cité* for 22 years, there were lots of Creoles. I was ok. I have a good experience of life in a *cité*. I am still the same. People have prejudices on people in *cité*, but it does not correspond to the reality.
- R12 The majority of people in *cités* are Creoles. We have bad reputation but this is unjust and sad. I take care of young people suffering from alcohol or drug abuse and I help them. With the police, to get a job or to get married with someone outside, it's not easy. R24. If you called SAMU or a taxi, they do not want to come. In St. Pierre, there is a *cité* in which there is a price for Indians and a price for Creoles.
- R13 It's poor people who live in *cités*. If you know how to live, there is no problem.
- R14 I am close to poor people and people in *cités*. It's society that puts these people in ghettos. Then they get accustomed to it and cannot get out of it. They now auto-ghettoise themselves. Societal forces press them.
- R15 It's Creoles who live in *cités*. There are good and bad people and things. I live in a *cité*.
- R16 70% of Creoles live in *cités* because they don't own land. It's the way these *cités* have been built which is not good. *Cité Trèfles* was built in 1985; for 5 years you did not have water. It's in 1990 that they built a football playground. *Cité Mallory* is known as "*Cité Mal nourris*". I personally would not want to live in a *cité* because of the lack of space.
- R19 Poor people who have to live in *cités*. It's a post-Carol phenomenon.
- R26 *Cité* is a place where people live. If he has not been able to have another house, he has a cite house. But this must be a springboard for him. He must not be discouraged and stop striving for a better situation. He must not say I live in a *cité* so I live day by day. No he must use that as a springboard perhaps not for himself but for his children. He gives them education and tomorrow they can progress. They will not live eternally in *cités*.

Very few respondents know anything about Chagos or Ilois. In most cases, we could not interview the respondents on that item.

- R26 First and foremost, we are talking about people. *Cités* are just places where people live and these people happen to be among the poorest.

R3, R10, R12, R13, R15 stated that it is ok to live in cites. People manage to live.

Social responsibility in the problems of *cités*

People who live in *cités* are economically at the bottom of the social ladder. They are poor, have little or no education, are not qualified for the employment market though they have huge abilities and competencies which, in the actual social organization, are not acknowledged, cannot be assessed and receive no accreditation.

People have come to cites due to life problems. Cyclones (Carol, Gervaise) have destroyed their fragile houses and they have been forced to find new housing. Government has provided very small ready-made houses built in small areas, with few amenities, structural facilities and leisure opportunities.

As in any other poor group of people with no regular employment or economic viability, the people in *cites* have many social problems and have been tagged by the rest of society, with a snowball effect. This has largely contributed to the marginalization of these people. This in turn has reinforced the “tendency” of Creoles not to venture outside their known world, creating a “ghetto” effect.

#### GENERAL RESEARCH FINDINGS

First and foremost, we are talking about people. *Cités* are just places where people live and these people happen to be among the poorest

The *cités* are linked in popular imagination to Cyclone Carol and the Creoles People have come to *cites* due to life problems. Cyclones (Carol, Gervaise) have destroyed their fragile houses and they have been forced to find new housing. Government has provided very small ready-made houses built in small areas, with few amenities, structural facilities and leisure opportunities.

The majority of the inhabitants of the *cites* are slave descendants But Today we find other communities except the Chinese

The answers of the respondents of *Cité La Cure* show they do not have real problems as to social relations with persons from other ethnic groups but are globally conscious that the political issues related to the cultural diversity of the inhabitants are prone to create relational problems and tensions. For there is a family-life in the *cités*. There is mutual help.

People who live in *cités* are economically at the bottom of the social ladder. They are poor, have little or no education, are not qualified for the employment market though they have huge abilities and competencies which, in the actual social organization, are not acknowledged, cannot be assessed and receive no accreditation As in any other poor group of people with no regular employment or economic viability, the people in *cites* have many social problems and have been tagged by the rest of society, with a snowball effect. This has largely contributed to the marginalization of these people. This in turn has reinforced the “tendency” of Creoles not to venture outside their known world, creating a “ghetto” effect.

There are today organizations in the *cités* to improve things, especially with regards to poverty.

## 9. PERCEPTIONS OF OTHER ETHNIC AND CULTURAL GROUPS

### PORT LOUIS FINDINGS

- R1-R4 Thinks there is a good understanding among the groups. But the Creoles are at a disadvantage as regards the system.
- R6 Feels discrimination from Mauritians of other communities towards slave descendants.
- R7 Difference between Chagossians and Mauritians for the Chagossians are always struggling for their rights
- R8 Through work contacts are established
- R9 Had kept painful memories of interethnic riots of 1968 and distrust contacts with the others since.
- R10 It's politicians who always make distinctions while we are all Mauritians
- R11 Workplaces help to establish contact with others but there is a feeling that those who make up the majority community believe themselves superior.
- R12 Even if the cultures are different, contacts are fine in the workplaces
- R14 Considers everyone in the same way and keeps good relations with the others. Believes the workplaces favour interethnic relations
- R15-R17 The answers of the respondents of *Cité La Cure* show they do not have real problems as to social relations with persons from other ethnic groups but are globally conscious that the political issues related to the cultural diversity of the inhabitants are prone to create relational problems and tensions.

According to the informants, the inequalities that we see in the country are the consequences of the weight that dominant ethnic groups exert toward the more vulnerable groups

- R18 Considers there is no equality in Mauritius but is not conscious of having experienced personally discrimination because of his ethnic belonging.
- R19 Does not believe equality exists in Mauritius. «Seki ena pa konn bann seki pena». The haves do not know the have-nots.

### UPPER PLAINES WILHEMS FINDINGS

Respondents have an understanding of the pluri-ethnic nature of Mauritius

1. Have no problem to mix other communities in their neighbourhood, in old aged clubs, in festivities, like marriage ceremonies. Though there are clashes at times, each one respects each other. But R21 adds «me si zot kav kwins ou, zot fer li».
2. In the interethnic classification they find that the Creoles are at a disadvantage and the Indo-Mauritians are privileged.
3. R16, R20, R26, R27, R28 know the Ilois but have never mixed with them. R21 knows the Ilois as he is a driver.
4. Very few know the word 'indentured labourer'. However they know the «coolie». For R23, «travayer angaze pa ti esklav». Indentured labourers were not slaves For R27, «azordi zot desandan minis, avoka. Zot, zot finn bien larg lasenn». Today their descendants are ministers. They've broken their chains all too well.

#### LOWER PLAINES WILHEMS FINDINGS

1. Whites are seen as being those who were responsible for the fate of slaves. They were cruel and arrogant. They are those who possess 70% of all lands in Mauritius; they have taken lands from Creoles. Médine Sugar Estate is cited as an example. Today Whites are still those who are the masters in hotels. Workers still suffer from them. Many respondents, specially the women, have worked “dan lakour blan”. Those who have French or white ancestors acknowledge it.
2. Indian, African and Malagasy origins are acknowledged.
3. Respondents stated that in their childhood life between people of different cultures was easy. Neighbours helped each other and shared. Now people are individualistic and tend to live inside their cultural group.
4. There is acceptance of Indian culture, as being part of Creole origins and part of multicultural Mauritius.
5. The unfair treatment of Creoles by Indian politicians and civil servants is severely denounced by respondents. Indians are seen as those who deny Creoles the right to exist and have access to social mobility. Indians are perceived as those who have taken a total control of political power in order to be the only group which benefits from the (economic) fruits of the development of the country.

Respondents have an understanding of the pluri-ethnic nature of Mauritius and have no problem to mix other communities in their neighbourhood, in old aged clubs, in festivities, like marriage ceremonies. Though there are clashes at times, each one respects each other. But R21 adds «me si zot kav kwins ou, zot fer li». If they can corner you they will.

Workplaces help to establish contact with others but there is a feeling that those who make up the majority community believe themselves superior.

6. In the interethnic classification they find that the Creoles are at a disadvantage and the Indo-Mauritians are privileged. The unfair treatment of Creoles by Indian politicians and civil servants is severely denounced by respondents. Indians are seen as those who deny Creoles the right to exist and have access to social mobility. Indians are perceived as those who have taken a total control of political power in order to be the only group which benefits from the (economic) fruits of the development of the country.
7. Whites are seen as being those who were responsible for the fate of slaves. They were cruel and arrogant. They are those who possess 70% of all lands in Mauritius.
8. It's politicians who always make distinctions while we are all Mauritian.

## 10. RACISM

### PORT LOUIS FINDINGS

- R5 Yes, feels there is still racism against dark skinned Creoles
- R6 There is still much racism in Mauritius against the «nasion» (Descendants of slaves.)
- R7 Marriage, way of life
- R8 Discrimination in the field of education and work
- R9 Has a feeling that there is much racism at the level of the civil service which does not recruit enough Creoles
- R10 One becomes racist when one sees discrimination against someone from his own community. Capitalism leads to racism
- R11 There is racism and discrimination in the field of work and employment
- R12 All the communities are faced with racism
- R13 Thinks there is much racism against the descendants of slaves. Defines racism as a form of discrimination and exploitation that those who possess (*bann ki ena*) towards those who do not possess (*bann ki pena*).
- R14 Yes there is racism but it does not affect only the Creole community.
- R15-R17 The three respondents from Cite La Cure do not deny the existence of racism emanating namely from cultural diversity. They mention at one time discrimination against dominated ethnic groups by dominating ethnic groups, at other time physical attributes. Indeed one respondent mentioned his preference for white skin and beautiful hair.
- R18 Thinks there is much racism in Mauritius, which is defined as contempt and exploitation by the powerful
- R19 Racism continues to exist in Mauritius because some think they are superior to others and ignore or despise them. But has no memory of having been personally victim of racism

Very few respondents know anything about Chagos or Ilois. In most cases, we could not interview the respondents on that item.

### LOWER PLAINES WILHEMS FINDINGS

- R1 Racism is visible in the field of work. There is discrimination against the Creole
- R2 There is discrimination against the slave descendant in the field of work
- R3 The rich are superior
- R4 Before there was racism but now it's better.
- R5 Racists Those who commit crimes, take drugs
- R6 Racism exists in Mauritius
- R7 The country is becoming racist
- R8 Racism is when one looks at someone through his appearance, according to his community
- R9 Racism exists. There is discrimination in jobs. Has still the feeling of bowing down to others

- R10 Does not think there is so much racism as there are less whites in Mauritius
- R11 More one is rich and more one is racist
- R12 Much racism in Mauritius. There is discrimination in all fields as people judge through appearance
- R13 The rich are more racist
- R14 There is racism because of wealth
- R15 Thinks in Mauritius one looks at skin colour before joining the others
- R16 Does not feel racism
- R17 Has suffered from racism. She went to an office where she was treated as «ti seve».
- R18 Even if in principle everyone is equal, there is racism. «Blan finn touzour dominn nou». There is racism when a distinction is made according to skin colour.
- R19 Everyone is equal but racism exists. He is called «Kreol mazanbik». Racism is identical to communalism. There are people who don't like «bann nwar, bann ti seve. Dan enn mem kominote kapav ena rasism. When the time for marriage comes then we see racism
- R20 There is racism even though everyone is equal. «Bann blan santi zot siperyer». Has a feeling that we cannot still live together
- R21 «Zis par parol ki tann dir ki dimounn ena mem drwa, dan lavi toulezour pa trouv li.» «Rasism ek kominalism se 2 brans mem pie».
- (Eng. trans. Only in words that we hear of equal rights for everyone, in daily life it does not exist. Racism and communalism it's 2 branches of the same tree).
- We see this at elections time. There is racism against the Creoles. His personal experience. Not situations which would have ended in physical fighting but humiliating situations where he was denigrated.
- R22 There no racism in Mauritius. Racists look at skin colour. It's money that is the source of all this. «saki ena lamone rest enn kote».
- Eng. trans. Those who have money live apart.
- R23 "Pena mem draw" (Do not have the same rights) Racism is different from communalism. Someone had once called him «Mazanbik». Skin colour is important in Mauritius and there are places where the descendants of slaves cannot reside.
- R24 Even if in principle everybody is equal, there is still racism. Had once heard the term communalism but does not know it's meaning.
- R25 Racism exists and it's linked with money.
- R26 Had suffered racism at school.
- R27 There is also racism among the blacks
- R28 Racism is a poison and it's an obstacle to entry to a job. Hs once suffered from racism at work. A Whiteman took off his hat aggressively and with force.
- R29 Racism exists «Dan Kreol ousi ena rasism» «Bann milat santi zot siperyer» (Among the Creoles too there is racism. The mulattoes feel superior.

«Racism, communalism are but words for the respondents. They have suffered from bad treatment because of their skin colour or their social conditions. That is why many associate racism with money. The term 'Mazanbik' or 'ti seve' are currently used to denigrate them. Their ethnic belonging is an obstacle to job access. Some point to racism in the Creole community

## UPPER PLAINES WILHEMS FINDINGS

- R1 No racism - R5 no discrimination
- R16 How can Morne and other places belong to Blancs and we don't have access to those places? - R20 - R19 *Blancs* are racist.
- R8 A big suffering is that others talk about Creoles in a bad way. If someone is drinking, someone will say *Sa enn Kreol sa!* as if it is normal for a Creole to drink. Here is my own personal experience. I have a Hindu neighbor. One day she said *My husband and I we talk about you. Oh I said what were you saying?* She said *Yes we were thinking that you and your husband are like Hindus. Your husband does not drink, you are calm (reserved) people. I said But you know not all Creoles drink. She was prejudiced against us. When she learned that Creoles were going to be her neighbours, she thought immediately oh! They will drink and organize parties all the time. Often we hear this. On Easter Monday, my colleagues are surprised to see me work. They say Ta to pa enn vre kreol twa! They qualify us by bad things. It's normal for Creoles to be like that.*

Civil servant in 1970 when I became a civil servant, there were Creoles. By the end of the eighties, Creoles began to diminish as civil servants. There were lots of Creole working as nurses and doing night shift. Now Creoles are very few in the civil service. At the start of my career, it was ok, but when I began to progress, there were schemes from a Hindu superior. They are communalistic. To have promotion, you must fight a lot. But if you are passive, you will never be promoted. I retired prematurely because every time for a promotion, I had to fight. This is not normal. It was hard. No meritocracy. There are many injustices but as we are a minority, we are harassed verbally and in many other ways. My secretary was a Hindu. She put a *permanente* in her hair, she spoke French, all said she had become a *Créole*. We are excluded. They make us feel it is not natural for Creoles to succeed. It is frustrating."

- R9 "When I wanted to have a permit, others had and I did not, though I met all the requirements. As a Mauritian Creole, I see that Creoles are underrepresented in decision making bodies. There is a protection system. You have to know somebody to have what you deserve. When will we have leaders who will treat all Mauritians as Mauritians? My own experience is that there were many Creoles who were postmasters, in hospitals, had scholarships, and when Creoles go abroad they succeed everywhere in the world. Do people there implant a new brain in them? Here they don't have a chance. Creoles are blocked and are not given a chance to develop his potentialities. There is discrimination in Mauritius. When politicians speak publicly they say one thing, but when they have power they act differently. When I hear that politicians and deputies are coming in their region to meet their constituents, is that not corruption since I have to go to him to have a job for my son or parent? This is not right. This is *passé-droit*, corruption. For political reasons, or because you are so and so, or because you live in such a place, you are not treated in an equal manner. So many children from *cités* have done so many efforts, are blocked and discouraged and then find no opportunity. Sometimes those who help are evil people and they get lost. Mauritius could be a paradise. It would not be a "paradi an dey".
- R2 Discrimination is a strong word. I feel there is rather a lot of egoism, especially in political parties to preserve the cake for their members and not share with others. Lets us share amongst ourselves. Others will have bits and pieces. And this leads to exclusion. Creoles are those who lose and are prevented from having access to institutions, jobs, etc. Education opens

the door, but after that the door is closed and that brings revolt. So that's why there should be institutions to support young Creoles and help them. It's not easy for Creole families to finance their children's studies. They make a lot of sacrifices so there must be justice in the work field. That will motivate the younger Creoles. - R10 -

- R26 Creoles have no place, because they do not have employment in the public sector. I have applied for 12 years for a post in hospitals. I never obtained it. Other people were employed but I was not. At the end, I quit. Other Creoles like me have applied and we have not been employed. And when I look at these governmental bodies, there are no Creoles. Because they don't take Creoles. At times, they were saying that Creoles did not have education. But Creoles had Primary certificate. They could work as cleaners in hospitals but even these jobs, they did not get. There are 70% of other communities, Creoles are few. We are not asking for 70% of places but we could have 10%, 20%. This is INJUSTICE. It's normal for them to have more but we should be proportionately or justly represented.
- R14 In the Constitution, all citizens are equal. The problem is in the application of the law. In the course of our recent history, a communal-economic intelligentsia has implemented a system of recruitment, promotion and social mobility in society that has marginalized slave descendants. Some have been able to go through but the majority has been ostracized. This anti-African OSTRACISM (young mulattoe girls are secretaries in good jobs without qualification ) has been initiated by the emerging catholic non African bourgeoisie - it's only recently that African phenotypes young people have become visible in the private sector. This is reinforced by prejudices that are kept alive by those who see Creoles as an economic threat.
- R16 There was a turning point when MMM left power in 1982. There has been a new political ideology to favour Hindus and Muslims who are MSM. The civil servants are MSM people. They have set up a strategy to protect Hindus to isolate Creoles. This is discrimination. How about the Equal Opportunity Act? In our family, all of us have studied but none of us has had a job in government bodies. Why? Many have been forced to emigrate to get out of poverty.

#### Racism and communalism

- R3 - R4 worked as lab attendant and was paid as a labourer, was nominated at the eve of his retirement. His brother in the police force was never nominated and went to Australia.)
- R10 Racism among Creoles (class struggle)
- R7 his father was a shoemaker, his mother from a high class family)
- R18 -
- R13 No equal opportunities, no equal treatment.
- R24 get figur
- R6 We lived together long ago, but now everyone lives in his own group.

Racism is not really considered an issue by respondents. But INJUSTICE and GET FIGIR are denounced as being social and political evil which gangrene Mauritian life and affect Creoles.

These bad practices are supported by a wide range of PREJUDICES against Creoles that are publicly expressed by Hindus.

In the public service, the few Creoles who are employed are harassed verbally, are never promoted on the basis of meritocracy and are subject to punitive treatment. Frustration, discouragement, anger and finally resignation are the common fate of Creole civil servants.

There is a political reason and power struggle issue in that. For two of our respondents, a Hindu communal-economic intelligentsia has implemented an unjust system of recruitment, promotion and social mobility in society that has marginalized slave descendants.

#### EAST AND SOUTH-EAST (FLACQ AND GRAND-PORT DISTRICTS) FINDINGS

- R1 Hindus are too racist. They behave as if Mauritius belongs to them. Muslims are very generous persons. You go to them and they fill your baskets. Whites are very racist.
- R2 I haven't suffered from any form of racism and discrimination. Muslims are racists. They tend to protect Muslims only. Whites tend to always adopt a dominating attitude.
- R3 No discrimination.
- R4 No discrimination. However, he believes that racism exists and that Muslims are racist.
- R5 Some whites are nice, some aren't. They only protect whites. Some do cater for the poor. Even in Creoles, we find "white Creoles" who are fairer and are rich who are racists towards those who don't have.
- R11 No discrimination. dan tou, hindu ENA grand nation, ti nation, vaish ...Quatres coco pa invite banne ti nation, zotte préfère banne créole .  
Zot dire charmarre mangeur cochon. Among all, Hindus there are high caste, low caste, vaish. Quatres coco does not invite low castes, they prefer Creoles. They say charmarre eat pork.
- R12 No discrimination
- R14 No discrimination. «si ou in al cote sa indien la li dire moi manger et li aussi li vine manger cote moi, musulman la si linne fer brie mo pu aller mo pu manger, ou allé fer se ki nu content»  
If you visit this Indian he tells me to eat and he too comes to eat at my place; the Muslim too if he makes bryani, i'll go and eat; you go and do what you want.
- R15 racism Cuma dire moi mo ene créole mo pas ouler frekent ou... ti pe prend li mal, banne dirigeant l'église ki ti mette sa barrière la. Zotte panne explik dimune la kan ene dimune marie, ve dire ou reconnaitre un tel pour le pire et meilleur  
Racism is like I am a Creole I don't want to mix with you. It was taken badly; the Church dignitaries put up those barriers. They did not explain that when someone got married, you come to know such and such for the best and for the worst.
- R16 Racism exists. If i have my certificates, I won't get the job. There must be meritocracy. Creoles suffer from discrimination more than others.
- R17 blan Letan in née li ena so travail, avant ou gagne ene travail li bien difficile sa  
The white man when he's born has got this job; before you get a job it's very difficult

## WEST AND SOUTH-WEST (BLACK RIVER AND SAVANNE DISTRICTS) FINDINGS

The interviews made apparent that in Mauritius to succeed people need to be wealthy and that there are still people who work for 250 rupees for a day's work starting at 6 hrs 30 to 16 hrs. Discrimination, inferiority and superiority views and values are based on occupation, skin colour and name. The Indians and Chinese were abusive and manipulative with them. One of the reasons put forward for the over-representation of Creoles descendant of slaves in absolute and relative poverty is because when freed the slaves received no training and no education and were dispossessed of their land because they were illiterate and not long sighted and were deceived financially.

For example, Shirley's family had a plot of land in Piton which they lost and for Gabriel, the descendants of slaves are still trapped in the vicious circle of poverty as they are still being discriminated against, negatively stereotyped, victimised and considered as being inferior.

All the informants mentioned All the informants mentioned that they do not enjoy the same rights and privileges as others such as when job seeking, as potential employers will take into consideration names (which are religio-ethnic markers), promotional prospects in the public sector are difficult for the descendant of slaves (Creoles) and in hospital the health officers often speak ethnic languages instead of speaking Creole. All Mauritians should enjoy equal rights but there is favouritism. Also, there is a commonly held perception that Creoles are lazy but in fact they are intelligent but there is a form of intimidation exercised on them to make them feel that they cannot achieve success in life. For example, Harvey and Daniel pointed out that there are still submissive house workers who do not have the choice but to comply because they need to work to survive. People were not prepared for this sudden development boom that was too fast whilst people were still subservient in their mind. They are still submissive to the 'Whites', 'Blacks', Chinese (referring to Sino-Mauritians) and Indians (referring to Indo-Mauritians) because they lack education and training.

In the same line of thought, Paul mentioned that he feels that 'the others' do not want the descendant of slaves to succeed and that is why they ('the others') are not willing to recognise the history of slaves. When talking of the history of slaves, we should distinguish between the history of slavery which is rather the history of the slave system whereas the history of the slaves refer to the history of the people who were slaves such as their life histories. Based on the information gathered, what people are claiming is the recognition of the history of the slaves which implies looking at their experiences of slavery and subsequently of the slave system from the perspective of the slaves.

Daniel and Harvey two entrepreneurs in the construction industry highlighted that Mauritius has a high level of unemployment but we import labour not because Mauritians refuse to work or are lazy but because they refuse to return to slavery.

The government refuses to increase salaries as they do not know their value. For example, a gardener works for 3,500 rupees per month which currently is worthless and is merely slavery but without chains. For five years Harvey has been working for an estate in conditions of quasi-slavery, working for a meagre living only.

Furthermore, even though the government has launched various institutions and programmes for the social and economic integration of destitute people such as the Small Enterprises and Handicraft Development Authority, the National Empowerment programme, yet, as said by Harvey, the government discourages the small entrepreneurs to succeed in business. There is a boycott of small construction businesses/small contractors because they might develop into big construction companies. Also, they work for a profit margin of 2% and they have to pay 6% business taxes and 3% individual taxes. Hence at the end they work for almost nothing.

In light of both Harvey's and Daniel's testimonies, it seems that there is an 'entrepreneurial mafia' on the island that keeps businesses within the hands of a minority and with potential small companies seen as threatening competitors to big and medium enterprises. For this reason small business expansion should be retrenched so that the economy of the country stays within the hands of a selected and limited network.

From the interviews we can say that the Capitalist system in Mauritius is a legacy of slavery with the colonial mentality that manual workers should be kept in underpaid jobs and the descendant of slaves constitute the main pool of menial low paid workers. The poor become poorer and the rich richer leading to a polarisation of society.

#### NORTH (PAMPLEMOUSSES AND RIVIÈRE DU REMPART DISTRICTS) FINDINGS

1. For generations R1 family has been working for a sugar estate located in the north of the island. Her maternal grandmother and her great grandfather on her father's side and her mother were *sirdars* (English. Translation: overseer). She explained that the sardars were Creoles and Indians (referring to Indo-Mauritians) while the *colomb* (Eng. Trans.: overseer) were the Whites or Mulattos that were the proprietors of the estate. She testified that during her grandmother's period, the supervisors used to give instructions to the sardar to beat the labourers but when her mother was a *sirdarine* (Eng. Trans. Female overseer) they did not ill-treat the labourers. Her parents also told her that her great grandfather's supervisor beat him to death and to buy his silence the *colomb* gave him a plot of land on which her cousins are living now.
2. When questioned on the term 'Malaise Creole', R3 stated that initially it referred to the demands for the elimination of discriminations against the descendants of slaves. Education is one of the means for the social mobility of Creoles, for them to progress in life. His statement reflects the perception that Creoles are the only descendants of slaves that hence discarded those that are of non slave descent.
3. The informants working in the public sector testified experiencing racism with their colleagues being essentially Indo-Mauritians and those working in the private sector also mentioned being discriminated against such as R10.
4. '...nou pren 1 lexemple mo p dir ein si kumadir moi mo 1 kreol deza mai dison moi mo enan 1 plas 1tiper pli haut si pou enan si kumadir pou enan 1 hindou sa ban lexperiens ki moi mon viv ein si enan 1 hindou p vini kumadir sa si ena 1 lot hindou la li pou pren plis intere sa hindou la si enan 2 kreol la li pa pou get li li pa pou get sa kreol al sa moi mon truver sa...'5

(Eng. Trans. ...We take an example, I am saying if me I am a Creole but let say ilhave a higher job but let say there was a Hindu these are experiences I have lives if there is a Hindu let say another Hindu there he will take into consideration the interests of this Hindu if there are two Creoles there he will not take him into consideration he will not look at this Creoles this I have observed...)

5. During daily negotiations and inter-ethnic interactions, Jules feels that some groups think they are superior to others especially when they are 'en bande'. Inter-ethnic relationships are rooted in racism with the Creoles being victims of stereotypes. Racial segregation can be observed with people of same ethnic group regrouping in same region of the island.
6. For R13 racism permeates Mauritian society but Creole informants feel that mostly Creoles are discriminated against and especially those who are dark skinned with frizzy hair
7. '....enfin 1 dimun li poseder li enan 1 gran lakaz li tu mai kan ou dir li bonzour li get ou fran dan ou figir kumsa pena 1 repons penan nanien ou konpren mai pou moi li pa zoli... se sa 1 bonzour li pa kout nanien sa mo pan deman li 1 rupi pou moi li 1 bonzur 1 sourir...'6

(Eng. Trans. One wealthy person who has a big house but when you say good morning he looks at you bluntly in the face without any reply nothing, you

understand but for me it is not nice...a good morning costs nothing I did not ask him one rupee for me it is a good morning a smile...)

8. '...mon deza al rod 1 travai dan 1 magazin mo kamarad pli klair ki moi alors lin pren li mon pas avan lin dir moi pa p pren dimun mo dir mo kamarad pa p pren li dir moi lais mo al geter moi ler li al tan so san ban la pren li e ler mo geter tu ban blan ban klair klair lapo blan mem ki travai laba dan 1 magazin...'<sup>7</sup>

(Eng. Trans. I once went to look for a job in a shop my friend is fair skinned my turn was before her and they told me they do not employ people and i told my friend that they are not recruiting but she told me she will try and she was recruited when I observed all the whites and fair skinned work in shop...)

#### GENERAL RESEARCH FINDINGS

Racism is not really considered an issue by some respondents. But INJUSTICE and GET FIGIR are denounced as being social and political evil which gangrene Mauritian life and affect Creoles. For others Racism, communalism are but words for the respondents. They have suffered from bad treatment because of their skin colour or their social conditions. That is why many associate racism with money. The term 'Mazanbik' or 'ti seve' are currently used to denigrate them. Their ethnic belonging is an obstacle to job access. Some point to racism in the Creole community Racism is visible in the field of work. There is discrimination against the Creole Creoles have no place, because they do not have employment in the public sector

These bad practices are supported by a wide range of PREJUDICES against Creoles that are publicly expressed by Hindus.

In the public service, the few Creoles who are employed are harassed verbally, are never promoted on the basis of meritocracy and are subject to punitive treatment. Frustration, discouragement, anger and finally resignation are the common fate of Creole civil servants.

There is a political reason and power struggle issue in that. For two of our respondents, a Hindu communal-economic intelligentsia has implemented an unjust system of recruitment, promotion and social mobility in society that has marginalized slave descendants.

## 11. EXPECTATIONS FOR THE FUTURE

### LOWER PLAINES WILHEMS & PORT LOUIS FINDINGS

- R1-R4 Rather optimistic for self in the immediate future but expect a dark future for grand children.
- R5 Great improvement on the personal level and in a general way in relation to the past but thinks life will become more and more difficult in the future. Hopes the state looks a bit more at the slave descendants and their sufferings.
- R6 Life was much better before, even though we had few means and the future looks even more difficult.
- R7 Improvement in the life of the Mauritian in general but the youth will want more modernity.
- R8 The situation in Mauritius will deteriorate.
- R9 Pessimist vision of the future as there are no perspectives for the youth. Hopes that everyone treated equally.
- R10 The politicians have to contribute to ameliorate society. Hopes that everyone feels Mauritian above all.
- R11 People are becoming more and more intelligent but also more selfish. There is a need of more training and support to people who need it.
- R12 A change in mentality is needed. People are too selfish. There is a need to help the descendants of slaves to find their place in society. There are too many places where some communities are concentrated.
- R13 The future will be only for those who work. Hopes that all Mauritians, in particular the descendants of slaves find a roof and what to eat and drink.
- R14 On a personal level, for the time being everything is fine but the future generations will have to keep up through education and work to get out.
- R15-R17 The three respondents of *Cité La Cure* hope a better future for themselves namely on the economic and political levels for they have often a tendency to bring back the subject to their own person remembering the vicissitudes and difficulties they face daily. However their answers reveal also a form of lack of concentration due to fatigue, given the number of questions asked.
- R18 Is rather satisfied of his own situation but ask himself questions as to the future that awaits the youth. «Mwa mo pe ale, pa kone ki pe atann deryer».As to me, I am leaving; don't know what's waiting behind) Hopes there will be more understanding among each other.
- R19 The future is bleak for future generations. They will have to give much of themselves if they want to succeed («Zot pou bizin konn trase»). They'll have to find their way ...). Hopes there will be more equality in society.

## LOWER PLAINES WILHEMS FINDINGS

- R2 Optimistic. But perhaps there is a problem with the Creole community. They need to be gathered not periodically but on the long run. Many Creoles are fed up with these so-called leaders. This must succeed someday otherwise this will seem a fatality. But I am optimistic because Creoles are still fighting and moving forward. *L'Union fait la force.*

I would like Creole intellectuals to show themselves and be examples to others. There is opacity on Creoles performance. We must show the beautiful and good things, successes of young Creoles. That will stimulate. If there is a Creole laureate, show it. Open new avenues,

inform about courses and training that can be followed, even in the Church. Give visibility to those good events. Don't stay in the dark.

There must be a change in mentality. Don't stay enclosed in ghettos. Open up. Creoles are open to others. They accept anybody. The doors of others are closed. They have to change. Creoles should not concentrate on the past. Look at the future. Not look always back in slavery but forward to the future.

R3 I don't know. Life is good, better than before but everything is expensive and it is hard to have money. Some Creoles are better off, others are poor.

R4 I want to see my children grow and do my job as a father. Creoles must do many efforts. Education is important. We must begin by education. Learn to save money. If you work and have money, you have to think of the future. You must have economic means.

R5 I wish that Creoles become more responsible of their future and that of their children. Unfortunately I see that these children around me will die in the ghetto. Their parents drink, smoke gandia, drug. Children drink alcohol. I don't see who will come and take them away from there. The Catholic Church must come to them in the *cité*. Who will save them? People must come to them. I am pessimistic.

I also see other Creoles. Mothers work in offices and *cybercité*. They have money and leisure, are a bit *francisé*. Those who go to l'Ecole du Centre and Lycée Labourdonnais will become elite. These children want to know their culture. So in the future, Creoles will be mi-elite and *mi-proletariat*.

R6 Mauritius should evolve. University and the employment market are not easily accessible to Creoles. Their efforts are not rewarded. They are discouraged. Many have to emigrate. Things must change in education and in the work market. Manual work should have a better social status. People work hard but cannot cope because everything is expensive. My children must work during the week-end also; otherwise they cannot cope with their salary to repay the loan for their house. To have a table or chairs, we have to get indebted and then work to repay. If we spare some money, it is for our health problems. Those in the low class cannot progress. It is very slow. Everyone is doing effort but little progress. I think training, formation is very important for manual work also. We need to have a part of the cake. Women want to better the life of their family. When young people don't have opportunities, they fall in drug, prostitution etc. We need to help them. Government should help. Families with young people in drugs cannot progress. It is not easy for those young to find help. Government should work for all the people, not for some people only. All should work together for our country. All children should have equal rights, food etc.

R7 One day Creoles will have a status. There is too much preference for Indians. But government will have to accept that Mauritius is for all.

R8 Creoles are progressing. There are a few Creoles in the University of Mauritius. Many are qualified but don't find jobs in the public sector. Creoles should be interdependent. Those who have succeeded should help those who need help. We cannot wait for government or others to help. We should organize to help others. The State has a big responsibility. As citizens we have rights. The State says but never does. ZEP schools have not progressed in any way. Those who are at the back stay at the back. My social experience proves that to me. We don't have the means to implement projects and initiatives. Creoles are conscious but more must think. In far away regions, Creole children are interested

to go to school. The education system must be revised. We Creoles have to go in poor regions to do something in the educational field. These children know only that environment. We should open their minds to other things. I don't expect much from government. The Ministry of integration has not done much. They have projects. These are implemented by people who have academic qualifications but no field experience at all. This does not work. They make bad decisions and people stay in their problems. Bureaucrats cannot change anything. They must go at grassroots level to know the real situation. Solutions are often inappropriate to people's needs.

- R9 Things can change but it will take time. The young generations will do it. We need people with a vision of Mauricianism, who will work for all people equally and do politics in another way. It will take time. Social justice, meritocracy, equality of chances, these are very important. We must be treated as human beings. Mauritius will be better.
- R10 For the future, Creoles can have jobs but it depends on others if they will give them. We must eliminate backing. Someone must stand for Creoles (leaders).
- R12 When I look back and today, Creoles work and think about their children's future. Solidarity is important. We must have our place in society and our part of the cake.
- R14 I cannot name people slave descendants. Because a slave descendant can be a businessman, a middle-class and have a piscine in his yard. But there are those who are poor economically. The process of "ghettoisation" will go on and on if we don't identify the true causes to be able to bring these people out of poverty, and if we don't have an efficient housing policy. Promiscuity is a big problem 3 and 4 generations are living in the same small house. Government does not look into the problem. If this is not coupled with a decent work, all his life will be precarious.
- R16 Creoles must be sensitized. The future depends on each Mauritian and on intelligent politicians. We are living in a paradise. In Europe, in Africa, life is not easy. Creoles must provide education for their children and government must give them work.
- R19 The future of Mauritius is good. I trust my government.
- R20 In ten years time, Mauritius will drown. Creoles must start saving, make plans with their money and provide books for their children.
- R23 If it goes on, Creoles will wait for a Moses - I prefer to work rather at grassroots level with people rather than look up to a leader.
- R26 Even with the new generation of politicians, it's the same thing. I had hoped it would be different (the unfair system), but they act in the same way. They have education but the same mindset as the previous generation.

Creoles are more conscious. They know who they are and can be more affirmative. They give education to their children. They have courage to go forward. If Creoles continue their efforts, by his own means, he will progress. He must take his destiny in his own hands. It will not be easy for him, to have a job in public sector etc, but he must not expect that. He can be disappointed. But if by his own means he gives education to his children and do other things, he must count on himself and not on others. We can progress. Education will help a lot. We don't have to become laureates, but do our very best.

Creoles must not get discouraged; they must take their destiny in their hands and progress. Perhaps he will not go to the University of Mauritius, but there are other possibilities today. If he saves, he can find alternative means here, there are educational schemes that help. They must seize all opportunities. They must not focus on what they do not have, but on what they can have.

The vision of respondents concerning the future is realistic. There is a fair bit of optimism because of the efforts already being made by a large number of Creoles. Creoles are more conscious. They know who they are and can be more affirmative. The Creoles are open people; this is a precious value. Creoles are more sensitized they know the value of education, think about their children's future, spare money and work hard.

But Creoles do not possess sufficient economic power.

Those in the low class cannot progress. It is very slow. Everyone is doing effort but little progress. Things can change but it will take time.

Children and young people in *cités* are having lots of problems. They need help and don't get it.

Families with young people in drugs cannot progress.

The process of "ghettoisation" will go on and on if we don't identify the true causes to be able to bring these people out of poverty, and if we don't have an efficient housing policy. Promiscuity is a big problem 3 and 4 generations are living in the same small house. Government does not look into the problem. If this is not coupled with a decent work, all his life will be precarious.

Things can change but it will take time. There must also be changes in the socio-economic and political organization of the country.

The future depends on each Mauritian and on intelligent politicians.

Social justice, meritocracy, equality of chances are very important. All people should enjoy equal treatment. Creoles need to have a part of the cake.

We need people with a vision of Mauricianism, who will work for all people equally and do politics in another way.

Backing must be eliminated. Government should work for all the people, not for some people only.

Things must change in education and in the work market.

Manual work should have a better social status. Training, formation is very important for manual work also.

1. Economic- Descendants need education to get out of poverty
2. Social - A change of mentality is necessary and they must be better perceived.
3. Political - They need deserve more from the political class.

There must still be a change in mentality and attitudes:

- There must be more sensitization among Creoles.
- Creoles need to be organized. Solidarity is important. They need to be gathered not periodically but in the long run.
- Creole intellectuals must be role-models.
- Creoles should be proud of their achievements and make them visible. That would be stimulating for others.
- Creoles should open themselves up more.
- They should give less importance to the past and look forward on the future.

- Creoles will wait for a Moses - I prefer to work rather at grassroots level with people rather than look up to a leader.
- There must also be changes in the socio-economic and political organization of the country.
- The future depends on each Mauritian and on intelligent politicians.
- Social justice, meritocracy, equality of chances are very important. All people should enjoy equal treatment. Creole need to have a part of the cake.
- We need people with a vision of mauricianism, who will work for all people equally and do politics in another way.
- Backing must be eliminated. Government should work for all the people, not for some people only.
- Things must change in education and in the work market.
- Manual work should have a better social status. Training, formation is very important for manual work also.
- Behind all these aspirations, there is a fundamental one: Creoles must be treated as human beings and fully-fledged Mauritians.

## 12. GENERAL CONCLUSION AND PROSPECTS FOR FUTURE RESEARCH

The Oral Research History project has unraveled the perceptions of respondents who consider themselves as slave descendants from various regions of Mauritius, Rodrigues and Chagos as to a series of fundamental issues identified by the Truth and Justice Commission.

Above all it has revealed the existence of a community that is proud of its identity and its achievements despite the acute poverty and deprivation that have characterized its forebears. Though it has revealed no clear definition of what is a descendant of slave, yet there is a strong feeling that Creoles are the descendants of slaves, despite the mixed origins of many from the community.

This research has also shown that within the community, knowledge of family history and of ancestors is rather blurred. However, there is a strong belief that many members of this group have been spoliated of the lands they once possessed and that reparation is necessary.

In terms of identity, though they consider themselves Mauritians, they are proud of their slave ancestry and achievements, economic, social and cultural. Moreover, they have no deep resentment against any ethnic group in particular and understand the plural nature of Mauritian society.

However, there is very strong resentment against discrimination and racism which debar them from access to jobs, especially in the civil service. There is also a feeling of under representation at political/decision making level. This is accompanied by a general mistrust towards the political class.

In general, their expectations for the future are realistic. Education is perceived as the key to the way out of poverty but there is the need for government affirmative action's and greater internal solidarity and organization for empowerment of the group.

This research has targeted mainly the older generation. The same research could be carried among the younger generation for a comparative study. Moreover, cultural, linguistic and intangible heritage have not been explored in depth but could be the object of a further study. Likewise, the mixed origins and cross-cultural exchanges affecting the group could be investigated in detail.

# 1. EXECUTIVE SUMMARY

This report falls under Project 4 of the Truth and Justice Commission (TJC) entitled: Culture, Ethnicity and Identity. It is a multi-disciplinary study of Cité La Mivoie and aims at assessing the social and economic conditions of the residents of the Cité La Mivoie also known as *Cité* EDC Grande Rivière Noire.

It is a low cost housing estate situated on the western coast of Mauritius in the Black River District. It is located at the southern end of the village of Grand Rivière Noire, before the village of Petite Rivière Noire.

To meet its objectives, this research intends to answer the following guiding questions: (1) Are the social and economic conditions of the residents of Cité La Mivoie better than in the 19<sup>th</sup> century? (2) How has the *Cité* evolved since the time of slavery to the present day? (3) Have the job patterns evolved since the time of slavery and indentured-ship or are the inhabitants still performing menial jobs and adopting a subservient attitude towards the wealthier residents and new owners of the luxury residences? (4) What can be done to improve this situation?

In line with the objectives of the research, this report is divided into two parts. The first part is a historical survey of Cité La Mivoie and the second part is a social and economic survey of the *Cité*. The report concludes with recommendations to improve the social and economic situation of the local inhabitants.

The social survey focuses on the social life in Cité La Mivoie in an attempt to gain a deeper understanding of, firstly, the social organisation in the *Cité*, secondly, the ethnic relationships within the housing estate, thirdly, the gender relationships and family patterns in the *Cité*, fourthly, the settlement in Cité La Mivoie, fifthly, its housing conditions and sanitation and finally the social conditions of the residents.

This social survey reconstructs the social evolution of Cité La Mivoie from the perspective of the local population aiming at assessing the local social conditions and identifying the social problems the residents are presently facing in order to make recommendations to address the problems identified and ultimately improve their social conditions.

The economic survey focuses on the economic life in the *Cité* in an attempt to gain a deeper understanding of, firstly, the infrastructural development of the village of Petite Rivière Noire and the *Cité*, secondly, the occupation patterns in the housing estate during the 20<sup>th</sup> century, thirdly, the educational patterns within the *Cité* and finally other economic problems that the local residents are facing.

This economic survey reconstructs the economic evolution of Cité La Mivoie from the perspective of the local population and aims at assessing the local economic conditions and identifying the economic problems the residents are presently facing in order to make recommendations to address the problems identified and ultimately improve their economic conditions.

Field research concluded that Black River village is at a transitional stage facing a population expansion with the mass influx of human resources as well as economic resources. High population density will in the end cause more economic problems related to security, space and natural and environmental resources.

Albeit, some local inhabitants have seen an improvement in their standard of living and there is a situation of quasi-full employment in Cité La Mivoie, yet, this pseudo development does not benefit everyone. The residents of Cité La Mivoie are facing the negative effects of these developmental projects.

This report concludes with recommendations for improving the social and economic life of the *Cité* residents and for the preservation of the local tangible and intangible heritage to ensure that the history of the residents' ancestors do not go in oblivion and ensure that the memories of their ancestors remain alive.

## 2. INTRODUCTION

Cité La Mivoie also known as *Cité* EDC Grande Rivière Noire is a low cost housing estate located at the southern end of the village of Grand Rivière Noire, in Black River District. (See Appendix 2)

Black River District is the third largest and longest district of the Republic of Mauritius, encompassing an area of 346 Km<sup>2</sup> over a distance of more than 60 km with a population of approximately 74,572<sup>1</sup> that represents approximately 6% of total population living in Mauritius.

Unfortunately, it is impossible to state the exact number of people residing in Cité La Mivoie as all figures available give aggregate statistics for Grande Rivière-Noire VCA whose population in 2000 amounted to 2,042<sup>2</sup> (1,010 males and 1,032 females) and the population density per km<sup>2</sup> was 47.4<sup>3</sup>. As at 1<sup>st</sup> July 2009, the local population was estimated at 2,571<sup>4</sup>.

However, based on the electoral list of 2010, the resident population in the *Cité* was estimated at 5,000. Statistics on Grande Rivière-Noire VCA are included in this report for referencing purposes only and it should be emphasised that they do not reflect the social and economic reality of the *Cité*. Established in October 1989, the Black River District Council Area is the youngest local authority composed of 13 Village Councils Area (VCA). Prior to its setting up, under the French period, Black River was a division of the Plaines Wilhems district and, later, the district was under the jurisdiction and administration of the Moka/Flacq and Grand Port/Savanne District Councils respectively. The *Cité* (Eng. Trans. Low Cost Housing Estate) falls under the administration of the Grande Rivière Noire VCA.

As per the Local Government Act of 1989, every five years the villagers in accordance with the Representation People Act elect the village councillors. The chairperson and vice chairperson of the council are elected, by secret ballot, by the members of the village council during a special meeting convened by the chief executive of the district council.

The southern part of the district is known to be among the poorest localities of the island in terms of social and health conditions such as sanitary, infrastructure, academic achievements and economic and employment opportunities as illustrated in Map 1 below.

According to inhabitants' testimonies, the region and the local population have, for years, been stigmatised by people living in other parts of the island, as the 'back country' populated essentially by Mauritians presumed to be the descendants of slaves and of the maroon slaves. There is a shared feeling that this stigmatisation has, for many years, negatively impacted on the local social and economic evolution as illustrated in Marie Michele's testimony below:

...parce que tout le monde sait qu'à Rivière Noire c'était majoritairement des Créoles tu vois et tout le monde savait à cette époque là et que c'était considéré comme un endroit défavorisé et que, comme si que c'était pas que ma personne, c'était, parce que ce que j'étais...<sup>5</sup>

(Eng. trans:...because everyone knows that in Black River it was in majority Creoles you understand and at that time everyone knew that it was considered an underprivileged area and that it was not just me, it was because of who I was...)

### 3. BRIEF HISTORICAL BACKGROUND

Black River was commonly perceived as being a land of predilection for the maroon slaves and as being inhabited by Mauritians of Afro-Malagasy origins that, subsequently, led to its exclusion and marginalisation by the colonial and postcolonial society. The socioeconomic conditions of northern and southern Black River differed and after emancipation the district experienced demographic changes:

The Northern part benefitting from better water supply, more roads, and large plantations developing into sugar plantations in the 19<sup>th</sup> century. In Southern Black River which starts from the village of Black River going southwards, the story is very different. There were few roads; it was dry with little major economic activity except for the large estates which did not necessarily produce crops because of lack of rainfall and small scattered populations. The state of health was a preoccupation throughout its history as was the problem of communication... (Teelock (2010, p. 51),

According to Teelock (1998), in 1806, 1826 and 1832, the slave population in the Black River district amounted to 4,687; 5,397 and 4,429 respectively.<sup>6</sup> In 1831, the number of slaves in Black River amounted to 4,642 slaves of which 2,926 were men and 1,716 were women. There were 264 French settlers and 588 'Free Blacks'. At the abolition of slavery, in 1835, most inhabitants (French and Coloured) were still living in the region and between 1835 and 1935; about four percent of the ex-apprentice population of Mauritius lived in Black River.<sup>7</sup>

Emancipation led to the emigration of two-thirds of the slave population out of the district. 'As the Stipendiary Magistrate stated, only one third of ex-slaves were left and were replaced by other ex-slaves from other districts as well as by indentured immigrants. However, their exact location is not known. We know they left the large estates because returns from these large estates show only a handful of ex-apprentices listed as working there. Stipendiary Magistrates also reported that few wanted to stay on large plantations, but they probably stayed close to smaller estates or moved to where they could settle or purchase land'.<sup>8</sup>

With the arrival of the Indian indentured labourers, the local demography changed (Table 1).

Year/Population	Indian Population		General Population		TOTAL
	Male	Female	Male	Female	
1846	2,014	261	2,532	2,024	6,831
1851	4,106	888	2,791	2,306	10,091
1861	7,822	2,945	3,592	2,812	17,171
1871	5,437	2,695	2,052	1,813	11,997
Total	19,379	6,789	10,967	8,955	46,090

Source: Appendix No. 10, Appendices to the Report of the Census of Mauritius

The population of Indian origins in the Black River region came essentially from Madras and Calcutta and the men outnumbered the women. Some of them were living on estate land while others were not living on Sugar Estates (Tables 2 and Table 3).

Sex/Immigrant	Calcutta	Madras	Bombay	Not Stated	Indo-Mauritians	Free Passengers
Males	1138	646	347	9	1351	146

Females	408	181	150	20	977	28

Source: Appendix No. 13, Appendices to the Report of the Census of Mauritius

Oral history revealed that until 1960 the local people were still living in the camps on the surrounding estates and after the construction of the Cité La Mivoie under the Cyclone Housing Schemes of the Central Housing Act of 1960, people moved from the neighbouring localities to settle in the housing estate.

The settlement of the *Cité* dates to the beginning of the 20<sup>th</sup> century and the present resident population is composed of majority Creoles presumed to be descendants of slaves and a minority of Hindi-speaking and Marathi-speaking Indo-Mauritians.

In accordance with Marie Michele's testimony quoted above and with Daniel's testimonies, the local inhabitants believe that they are being marginalised and ostracised because of, firstly, their political preferences and, secondly, their presumed ancestral origins. They feel that they are further discriminated against when the local councillors are not of the same political background as the government in power.

...Site la...ou kone ki arrive...ki fer site...demoli parseki bann dimunn aster zot tro met zot lespri dan sa MMM MMM la Zot ena lespoir ladan. Zot servi politik buku...Me selman lenvironmen ti pli bon....pena droger, pena piker...selmen pu li pa develop, c gras a politician. Kombien tan Ganoo ici la 25 an Ganoo dan sa soz la.....mo pa truv nenryen...<sup>9</sup>

(Eng. trans:...The housing estate...you know what is happening...why the housing estate is shattered because people now are too focused on MMM they have placed their hope in the MMM. They use politics lots...but the environment has improves...there are no drug abuser, there are no heroin addict...but it is because of politicians it is not developing...how long has Ganoo been here? 25 years in this (electoral ward)...I see nothing...)

Over the past ten years, following mass development, inward migration of people from urban areas to Black River and of foreigners especially French, South Africans and English<sup>10</sup>, the region has undergone much transformation in terms of infrastructural developments. For example, the opening of new restaurants, commercial centres and the construction of new residential areas that led to a reversal in the local employment structure. New Integrated Resort Schemes developments are planned in the region such as La Balise Marina and Matala Lifestyle and Spa.

The changes in the demographic profile and in the social, economic and cultural landscape of the area have other correlated impacts such as affecting the social fabric of the community. For example, the criteria under-pinning social stratification and social mobility are evolving and consequently social relationships as well with the historical econo-ethno pattern is resurfacing or even intensifying.

Although Black River has experienced burgeoning developments, field research uncovered that only part of the village and its population are benefiting from the opportunities of these developments with others being further victimised.

## 4. CONTEMPORARY CITÉ LA MIVOIE - SOCIAL SURVEY

This chapter focuses on the social life in Cité La Mivoie, in an attempt to gain a deeper understanding of social organisation, ethnic and gender relations, family patterns, settlement and social, sanitary and housing conditions of the residents.

Based essentially on oral interviews of residents, this social survey reconstructs the social evolution of Cité La Mivoie from the perspective of the local population. It aims at, assessing the local social conditions and identifying the social problems the residents are presently facing in order to make recommendations to address the problems identified and ultimately improve their social conditions.

### 4.1 SOCIAL ORGANISATION SPATIAL ORGANISATION

For non-residents of Cité La Mivoie, it is a common perception that the *Cité* dwellers are not organised, unable to take care for themselves and are dependent on the welfare state for social assistance as illustrated in the testimony of Devi below:

...Wi. Me koma mo pe dir ou ? ena boukou kapav pa interese pou zot fer lavansman. Zot atann kouma dir tou letan ler....ou tann dan zot la bous, gouvernman pa pe fer nanien. Be gouvernman la, pou vinn met manze ar ti kouyer dan ou la bous, ou bizin fer zefor...<sup>11</sup>

(Eng. trans: Yes. But how shall I tell you that? Maybe there are many who do not want to progress in life. How to say that? They always wait...you hear them say government does nothing. But the government will feed you, you need make efforts)

The *Cité* has its own internal organisation similar to a 'kinship' system. It is a discrete unit with distinctive identifiable values such as a strong sense of collectivism and comradeship and social systems different from that of other housing estates.

As stated by Emilienne Faron, Nicole Papeche and Marie France Hippolyte respectively '*...sak Site ena so diferans. Tou pa parey. Sak Site ena so diferans...*'<sup>12</sup> (Eng. trans. Each housing estate is difference. They are not similar. Each housing estate is different) and Cité La Mivoie is '*...fason viv monn gagn enn site spesial...Mwa mo trouve nou enn ti pe pli vivan parski la to trouv dimounn dan simin me ena site to ale pa trouv personn... saken konn so kamouad isi...*'<sup>13</sup> (Eng. trans. [Our] way of living, I have a special housing estate...I find that we're a little more lively because now you see people on the road by there are housing estates when you [go there] there is no-one on the road...We know each other).

Indeed, the *Cité* can be conceptualised as being an organic space in that it is an extension of the residents, it evolves with its residents and functions like a body.

It is a space constructed by its residents that shapes their lives. It is a shared and common space where the notion of private property and individualism are absent.

The centre of the housing estate is its most densely populated and lively part - along *Sime Boulodrome* (Eng. trans. Boulodrome Road) - that represents its heart. The arms and legs form the periphery of the *Cité* that corresponds to *Sime Quatre Saisons* (Eng. trans. Four Season Road) and *Sime Eucalyptus* (Eng. trans. Eucalyptus Road) (Map 1).

*...Eski ou pou dir site ena enn kiltir prop a zot isi ? enn konportman ?...Kouma mo pou dir ou ? Touzour de konportman mal vu o zie de zot. Ou pou trouv zot pe mars pjeni. Pe mars pjeni ek zot kapav asiz lor shemin. Zot dezene lamem, zot gard kous zot baba lamem, zot donn zot baba bwar lamem, zot trye zot bred lamem, zot koup zot legim lamem. Olie ki zot asiz dan zot lakour anfin petet mo konpran osi ki lespas e tro sere. Me kanmem, mo redir ankor ena bann fami ki byen rezerve, zot kot zot mem zot zanfan ou pa pou touv...<sup>17</sup>*

(Eng. trans: Would you say that the housing estate has its own culture? Behaviour?...How shall I tell you that? As usual behaviour that others criticise. You will see them walk bare footed. Walking bare footed and you can see them sit on the road. They have lunch there, they keep their nappies there, they feed their babies there, they clean their greens there. Instead of sitting in their yard, but maybe I understand that space is limited. Whatever, I repeat myself, there are families that are aloof, they remain at home and you will not see their children).

The *Cité* functions like a family clan; an extended family and in accordance with Nicole and Marie France, collectivism dominates over individualism as the collectivity is responsible for each resident. The residents have constructed a collective identity and each member of the extended family cares for the other.

Indeed, individualism does not seem to be the residents' precept compared to the surrounding residential areas and particularly the restricted type of secure and gated *Morcellement* such as Plantation La Marguery.

Like a clan protective towards its members, the residents of Cité La Mivoie protect each other and consider outsiders whom they do not know with suspicion and hence do not disclose information easily. They can also be sensitive but once the outsider is accepted by the clan and is considered as a fellow member, a rapport of trust is established and people share information.

Spatial and land problems and high population density in the *Cité* are currently negatively affecting social cohesion. These problems have become 'grafted onto' long-standing social and economic problems and consequently social unity is threatened.

These family tensions, as well as frustration, might, in the end, lead to internal conflicts. Hence, the urgent need to address the problems of space and housing in the *Cité* as well as other social problems identified for this report.

It might be a cultural shock for people, who do not know the living conditions on estates and in underprivileged localities, when entering the housing estate and observing the lack of hygiene, the poor living conditions and housing conditions that do not conform to the modern standards and norms.

However, even if from an external western vantage point, it appears that the *Cité* has remained on the brink of societal development; in fact, 'tradition' and modernity co-exist in this microcosm.

Certain core traditional values and knowledge endure and are passed on across generations while others have faded away. Collectivism is still predominant in the *Cité*. It can be seen as an adaptation strategy used by the residents as a survival mechanism that has allowed them, on one hand, to preserve their traditions and on the other hand to face harsh social and economic conditions by ensuring the welfare of the group.

But, in the process of social modernisation, some traits of modernity that are indicators of social evolution and of improvement of standard of living can be observed and some have merged with traditional values to form a new value system. This is reflected in generational differences such as in the family dyad, residential and occupation patterns that will be further developed in the report.

Field research exposed that post-1960 was a significant turning point for the local residents as it brought drastic reconfigurations in spatial and social arrangements and organisations such as the disappearance of gardens and camps and a shift from a semi-subsistent lifestyle to one based on obtaining mass produced goods.

Given the strong correlation between social organisation, space, place and behavioural patterns, these reconfigurations have had negative aftermath on the social, cultural and economic life of the latter and especially on their relation to space. The villagers are still bearing the weight of these changes.

For example, one main negative outcome is that they are denied access to the mountain and land for small-scale farming because it is private property as testified by Varnanaden Veerapen ...*Ti enn terin lagrikultur sa zordi terin la inn konverti...pe morsel pe cande...*<sup>18</sup> (Eng. trans. It was an agricultural land. Now they converted the land...it is being divided and sold).

The recent residential developments and the depletion of the lagoon have 'taken their toll on' the plight of the villagers as stated by one of the school directors.

...Donc, la l'hiver, ils n'ont rien...Moi j'ai rencontré des parents, des papas, qu'ils me disent que la, la actuellement, il y a pas de poisson, il n'y a presque quasiment plus de poisson...l'homme qui va a la pêche il va peut être avoir 2, 3 poissons...<sup>19</sup>

(Eng. trans:...Thus, now its winter they have nothing...I have met parents, fathers, that told that presently there is no fish, there is almost no fish...the fisherman might catch 2-3 fish...)

People have strong animist belief and the sea, the mountain, and its wood are not seen as mere environmental features. The villagers had a close and symbiotic relationship with the environment based on respect of nature. The sea and the mountain were, and are still, conceived by the local inhabitants as their 'nurturing mother' in the sense that they provided the residents with abundant food and medicinal herbs that they needed.

These open spaces were the children's playgrounds as well. Nevertheless, now, their 'nurturing relationship' has forever been altered.

Poaching, gathering and hunting were common traditions and a means of subsistence since the mountain and forest provided the villagers ample space to hunt and collect edible fruit and plants. For example, they hunted hedgehog, hare, deer, monkey and wild boar for meat.

Before, 1960, the local inhabitants cultivated gardens and reared cattle on the surrounding plots of land and especially on the mountain. Their daily meals were composed of fish and vegetables, supplemented with meat. Venison, hedgehog and wild boar are still very much appreciated whereas monkey is rare. This abundant wildlife ensured inhabitants did not suffer from starvation.

In line with Teelock (1998, p. 171), these forms of subsistence patterns date back to slavery when, 'slaves traditionally supplemented their rations given by their owner by procuring their own food through a variety of means. There were also periods when the supply of food to slaves was interrupted and slaves left to fend for themselves. Other slaves fished, hunted or simply gathered wild fruit and vegetables'.

After working hours and during their free time, the farmers who were essentially the *Bombaye*<sup>20</sup> worked in the fields whereas the Creoles went fishing. The women were responsible for the household chores. The forest provided them with cooking wood and they did their laundry in the river.

The appropriation of the surrounding natural waterways and of the mountain transformed these natural features into domestic spaces for the local residents. The use of natural landscape by the inhabitants includes farming land, residential places (where the camps were located) and laundry places.

## 4.2 LOCAL HERITAGE SITES

Seven-laundry/washing places were identified that form part of the local heritage. They are mostly located along the road leading to the Black River Gorges. (See Appendix 3)

...kanal Raffia, lav linz. Ladig Bambous...ti ladig osi avan lav linz, apre lor pon ti lav linz. Kouma lontan, pa ankor ena bann developman, ici pon Misel osi ti lav linz...<sup>21</sup>

(Eng. Trans: Canal Raffia, (used to) wash clothes. Bambous dam...Small dam as well long ago (used to) wash clothes, then on the bridge used to do washing. Long ago these developments did not exist, there Michel bridge also used to do washing...)

When one travels from the Black River Gorges towards the main road, the following washing places were identified:

### 1. *Ladig Bamboo* (Eng. trans. Bamboo Dam):

It is located on the left side of *Sime Gorgz* (Eng. trans. Black River Gorges Road) before *Pon Blan* (Eng. trans. White Bridge) and after *lacrwaze 5 Sime* (Eng. trans. Crossroad 5 Road)

...sur le kote ti ena kann ek bwa. Pli lwin dela, kote drwat, apel sa la dig Bambous. Lot kote ladig Bambous. Kot sa?...andan va dir la ena enn sa, la rivier ki sorti depi Gorge, delo la pas la mem la, li al ziska lor pon. Lor gran pon Rivière Noire...<sup>22</sup>

(Eng. trans:...On the side there were sugar canes and wood. Further, on the right side it is named Bamboo Dam. Where? Inside there is a river that springs from the Gorges, it flows from there to the bridge, the bridge of Grande Rivière Noire...)

### 2. *Ti Lagig* (Eng. trans. Small Dam):

It is located on the left side of *Sime Gorz* after *Pon Blan*, before *Pon Misel* (Eng. trans. Michel Bridge) and next to *Pon Raffia* (Eng. trans. Raffia<sup>23</sup> Bridge)

### 3. *Pon Misel*:

It is located on the right side of *Sime Gorz* opposite *Kanal Raffia* (Eng. Trans. Raffia Canal) and is located on *Sime Bef* (Eng. trans. Cattle Road). This place is a *lieu de mémoire* in that a young man died there and his death forms part of the collective memory of the residents.

The bridge was named after a young man named Michel, the brother of a man named *Ton Néné* (Eng. trans. Old man Néné), who died in the river. He went to a Sega night in *Kan Laserp* (Eng. trans. Camp Billhook) and on his way back, he drowned in the river. His mother found his dead body the next morning.

...ti ena park bef, wi, lao, apre ti ena enn bann kan par laba. Ti ena enn bann kan, ena enn la rivier la, ena enn ti la rivier ki pas la, bann dimounn inn donn sa non la, Pon Misel...pon Misel akoz, ti ena enn garson ki ti apel Misel...li sorti anba, dan Vilaz, ti ena sega. Lontanbann dimounn ti fer sega la nwi, bann gran ti pe fer tipik, kan linn vini, mo krwar linn gagn soif, linn vers dan sa pon la pou bwar inpe delo. Kan linn verse pou bwar inpe delo, linn tom la mem. Kan so mama, ki ti res inpe lao laba, linn vini, pou vinn, pou plin so delo dan gramatin, linn trouv enn dimounn. Apre ler li get byen, li dir, be sa linz mo garson, linn al dekouver ki so garson inn al mor la...<sup>24</sup>

(Eng. trans:...there was a cattle-breeding land, yes, uphill, then there were camps over there. There were camps, there is a river there, there is a stream flowing there, people named it Michel bridge...Michel bridge, because there was a boy named Michel...he came from downhill, from the village, there was Sega. Long ago people used to organise Sega nights, the elders used to do Typical Sega, when he came back, I think he was thirsty, [when he reached the bridge] we bent down to drink water. When he bent down to drink water, he fell in the river. When his mother, who lived uphill there, came in the morning to fetch water, she saw someone. When she looked attentively, she said, it is my son's clothing, she found out that her son was dead...)

Photo 3 *Pon Misel*

Source: TJC/6/AC/SiteVisit/ PH 1/P/LaMivoie/20June2010

4. *Kanal Raffia*:

It is located at the entrance of *Sime Gorz* on the left side of the road and opposite *Sime Bef*.

...mo konn li Kanal Raffia, parski etan done kan gagn bann sesres, koma dir bann delo la rivier anba pa, bon pou lave, nou vinn lave isi...<sup>25</sup>

(Eng. trans:...I know it as Raffia Canal since when there is draught, the water in the river down over there is not adequate for washing, we come to do our washing there...)

5. *Kanal Maraz* (Eng. trans. Maraz Canal):

It is located opposite the shop named *Boutik Trwa Bra* (Eng. trans. Three Branches shop).

It was named after a man named *Bonhom Maraz* (Eng. trans. Old man Maraz) whose garden was located there, near the canal.

...isi ti ena karo kann...Kot ou, ena bann karo banann la, lot kote la, ti ena enn bolom ti res la ti apel bolom Maraz....li ti ena so zardin, ena enn la rivier ki pas la, nou touzur apel sa la rivier la canal maraz...<sup>26</sup>

(Eng. trans:...here there was a sugar cane field...where there is a banana plantation there, on the other side there, there was a man named Old man Maraz living there...he had his garden, there is a river flowing there, we always named this river Canal Maraz...)

Photo 4 *Kanal Maraz*

Source: TJC/6/AC/SiteVisit/ PH 2/P/LaMivoie/20June2010

When leaving the Black River Gorges, along the main road when going towards Cité La Mivoie, the following washing places were identified:

6. *Kanal Dharma* (Eng. trans. Canal Dharma):

It was located on Mr. De Senneville land inside Black River Gorges and there were *Bombaye* (from Maharashtra) living there. It was named after a *Bombaye* named Dharma. (See Chapter Social Survey)

7. Another washing place was identified but has no name. It is located near the bridge named *Pon La Grande Rivière Noire* in front of Village Bougainvilliers.

Out of the seven sites listed above, three were identified as still being used by the *Cité* dwellers as washing places: *Kanal Raffia*, *Pon La Grande Rivière Noire* and *Kanal Maraz*.

Indeed, during fieldwork, women with their buckets on their head walking to the river were observed.

It is to be noted that the scene of women, commonly referred to as *dhobi*, carrying their basket full of clothes on their head and doing their washing at river, is perceived as a folkloric scene. 'Dhobi' are considered as being inherent to Mauritian folklore and the Indo Mauritians might probably name these places 'dhobi ghat'.

#### 4.3 OTHER NATURAL SITES USED BY INHABITANTS THAT ARE POTENTIAL HERITAGE SITES:

More sites were identified in the Black River Gorges and on the surrounding estates. Some could not be located exactly as they are found inside the gorges and inside the estates. (Appendix 3)

- *Basin Zigret* (Eng. trans. Egret Pond):

When going towards the gorges, it is located along *Sime Gorz* after the *Kalimaya*. According to Nicole, there are four legends associated to this pond. Two legends are about mythological aquatic animal creatures living in the pond and two others are about legendary human beings.

One legend says that in the pond, there is a cave underneath the mountain and that a mermaid or a baby mermaid lives in this cave. Another is about a giant eel that lives in this cave.

Another legend says that Paul and Virginie swam in the pond and the last one is about the slaves or maroons who came to this pond. These two legends take place with the history of slavery.

...ki fer apel sa basin zigret? me mwa monn konn sa non la tou letan basin zigret, me dapre listwar, zot dir ena enn lezann. ki lezann ena? ena dimounn pretann ki zonn deza trouv bann...Otre fwa en, zot trouv la sirenn...Parseki li fer bann ros, bann gro ros...kuma dir kot ou truv sa basin ponfon la, enn cav endsou sa...Dan sa cav la ena enn gros enguil, ena enguil ladan. Me, la selma avek, la sesres, parseki si normalman, ti gagn bann...gagn bon delo la. Me tou letan dimounn mem bizin pran delo avan pa kapav pran li kot sa basin la parseki, kot bassin la zot dir li byen profon laba...Me donk, me ki zistwar la sirenn sa en? Sa anfin monn tann bann gran-gran dimounn kinn dir sa, zot fami inn dir zot, zonn deza trouv enn, bebe sirenn. Me koma li ti ete sa la sirenn la en?...mwatie imin, mwatie poison... apre sa si mo pa kone. Mo pa kone si li vre ou si li manti. Parski zot dir, ki, tou letan Paul e Virginie, ti abitie vinn baigne la...pa kapav dir ou kisanla kinn tann sa zistwar la, me mo pa krwar si pa Paul ek Virginie ti vinn dan isi. Mwa...monn panse ki tou letan ki bann esklav ki ti vinn par isi. Ek ki fer ou panse ki ti ena esklav?...Kouma dir, zot ti rod bann plas pou kasiet...<sup>27</sup>

(Eng. trans:...Why name it Aigrette Pond? But me I always knew it as Aigrette Pond, but as said by history, there is legend [associated to it]. Which legend? There are people who say that they saw...long ago a mermaid...because it forms stones, big stone...how to say that? You see this pond [is] deep, there is a cave underneath...in this cave there is a giant eel, there is an eel inside it. But, now, because of draught, because normally, there was...lots water in the pond they say it is deep...thus what is the mermaid story? It is, finally, I have heard, the elders said that, their family told them, they saw a baby mermaid. But how the mermaid looked?...half human, half fish...after that I do not know. I do not know whether it is true or if it is fake. Because they say that each time Paul and Virginie, used to swim there...I cannot tell you who heard that story, but I do not believe that Paul and Virginie came here. Me...each time I thought it were the slaves who came here. And why you thought there were slaves?...How to say that, they searched for hiding places...)

Photo 5 *Basin Zigret*

Source: TJC/6/AC/SiteVisit/ PH 3/P/LaMivoie/20June2010

- *Pon Papay* (Eng. trans. Papaya Bridge):

It is located after Lacrwaze 5 Sime on Old Black River Gorges road on the way to a place named *Matala* in the Black River Gorges. According to Antonio, '...Nou sort pon Papay pou nou kapav al Tamarin Falls sa...'<sup>28</sup> (Eng. trans: You leave Papaya Bridge to go to Tamarin Falls...)

- *Brize*<sup>29</sup> *Dharma*:

It was named after a *Bombaye* or Marathi person named Dharma and was located on Mr. De Senneville estate. Further information will be provided later in the chapter entitled settlement.

- *Laveret*:

It was on Mr. De Senneville land near the tobacco plantation. According to Antonio, a man named Robert Deline, who worked as watchman, used to live there.

...Saem dan kote sase li trouv kot misie Desenville mem Laveret Laveret Taba tousala pou misie De Senneville mem sa. Taba ? Wi Taba. Enn landrwa sa ? Wi Sa karo la apel karo Taba. karo Taba ? Wi Li akoste ar Laveret Laveret anba Taba kote lao dan kote misie De Senneville mem...<sup>30</sup>

(Eng. trans:...It is on the hunting ground of Mr. De Senneville Laveret Laveret tobacco all this for Mr. De Senneville. Tobacco? Yes tobacco. A place this? Yes this plantation is named tobacco plantation. Tobacco planraron? Yes it is near Laveret downhill tobacco is uphill on Mr. De Senneville...)

- *Tamarin Lapel* (Eng. trans. Tamarind Call):

It refers to a Tamarind tree that was in front of the property of Mr. De Senneville, on the roadside apposite the place named *forum*. The Tamarind tree still standing and is located in front of the place named the Ranch.

The workers of Mr. De Senneville named it Tamarin Lapel because every morning at this place their supervisor used to assign their daily work duties.

...sa De Senneville sa. Ti, avan ti enn bwa, ti enn bwa, epwi devan la ti ena de trwa ti lakaz an paye, kot bann dimounn ti abite, apre koma dir, dan gramatin kan tou bann dimounn pou vinn travay, dimounn sorti ti Rivière Noire avek Grande Rivière Noire, zot vinn atann devan la, ena enn gro pie tamarin, zot ti apel sa tamarin lapel. Parski kouma dir la ki, sa dimounn responsab la, li klas ou travay kot ou bizin al travay...<sup>31</sup>

(Eng. trans:...It is De Senneville. Before it was wooded, it was wooded, and in-front here there were 2-3 straw houses where people lived, and then how to say that, in the morning when people came to work, people came from Petite Rivière Noire and Grande Rivière Noire, they waited in front here, there is a big Tamarind tree, they used to name it Tamarind muster. Because how to say that, the responsible person, gives you your task and where you had to work...)

Photo 6 *Tamarin Lapel*

Source: TJC/6/AC/SiteVisit/ PH 4/P/LaMivoie/15June2010

Other places identified in the Black River Gorges as potential slave heritage sites: *Matala*, *Walala*, *Magenta*, *Macondé*, *Marmit Kase* (Eng. trans. Broken Pot), *Later Koupe* or *La coupée* (Eng. trans.

Cut Soil or Land), *Plato Remous* (Eng. trans. Plateau Remous) and *Brize Nik Mous* (Eng. trans. *Brisé Fly Nest*) which according to Olivier are located on Tamarin Estate.

...Plato Remous se kan ou monte ou pran simin Gorz ou monte ou kontinie monte pran simin pou mont La Marie ou trouve ena enn mirador laba an metal en rel bann la ti ranze sa mo kone mwa monn ranze mo ti, ranze parseki mwa ek Benoit ki ti al mont sa...Allan Cambier...ti amenn nou...nou ti travay ansam ti ena enn lot ti al mont sa laba ena 2 sa...<sup>32</sup>

(Eng. trans:...Plateau Remous is when you go up Black River Gorges you continue take the road that goes to La Marie you shall see a metal mirador over there they constructed it I know I constructed it because Benoit and me that built it...Allan Cambier took us there...we worked together there was another that was built over there there were 2...)

According to Nicole, the name *Walala* dates back to slave time when ‘...sega sa mo sipoze non?..Sega? Bann esklav ti fer sega laba?..’<sup>33</sup> (Eng. trans: I think its Sega no?...Sega? the slaves did Segas over there?) and also that there are more place names in the gorges such as, *Basin Sevret* (Eng. trans. Pond of fresh water shrimps) and *basin Mamzel* (Eng. trans. Young Lady Pond), with stories attached to these places.

However, the real name is ‘Walhala’ after a sugar estate that used to exist in this area.<sup>34</sup>

Furthermore, based on her testimony, *Macabé* Forest as well is a potential slave heritage site as there are artefacts in the caves inside the forests.

...Parski, ena enn dimounn ki deza dir mwa, me li inpe lwin dan la fore de Maccabe. Dan la fore de Maccabe...ena enn la kav, kot bann esklav ti abite. Enn dimounn ki travay dan Mauritius Wild Life ki ti dir mwa sa. ki fer li panse ti ena, bann esklav ki ti abite dan sa la kav la en? Ek kuma linn dir mwa, linn trouv bann le zo, apre kouma dir enn plas kot zot ti aranze, ar di bwa pou fer zot lili. Plis linn trouv enn bann ros kot bann la ti pe kwi zot manze. Maccabe fore la kot trouve sa? li andan la mem la, dan sa sime Gorge la-la. Mo pa kapav dir ou ekzakteman kot li ete. Li li andan net, li travay pou Wild Life, linn gagn lokazion pou al laba. Li ti deza dir mwa, enn zour li pou amenn mwa, be kan li dir mwa bizin mars bouku, mo pann ou le ale...<sup>35</sup>

(Eng. trans:..Because someone told me but it is far inside the Macabé Forest. In the Macabé Forest...there is a cave, where the slaves lived. Someone that works for the Mauritius Wild Life who told me that. Why he thinks lived in that cave? As he told me he saw bones, then how to say that, a space that they prepared with wood to build a bed. Besides, he saw a stone [fireplace] where they cooked food. Where is Macabé Forest found? It is further inside, in Black River Gorges there. I cannot tell accurately where it is located. It is further inside, it is for the Wild Life, he had the opportunity to go there. He told me that one day he would take me there, but when he told me that there is much to walk, I did not go...)

The Maroon Slave Archaeological Investigation Project Report confirms this statement of Nicole Papeche as artefacts possibly relating to maroonage have been found in these caves.<sup>36</sup>

...Me enn zafer ki drol parfwa kan mo marse mo al lasas ena plas kot nou trouve tomo ena plas kot nou trouve ena bann vesel ki inn kase bann lasiet...Bann porseleenn. Bann porseleenn lontan ou trouve ou trouv bann bann kokiy de mer...<sup>37</sup>

(Eng. trans:...but something that is sometimes weird, when I hunt there are burial places that we see, there are places where we can see broken utensils, plates...porcelain. You see old porcelain you see seashells...)

There are both male and female heritage spaces, so far unrecognised on heritage lists: washing places became ‘socialising’ spaces, spaces where women could express themselves freely without being constrained by their husband’s presence and where they could ‘gossip’. Developments have negatively impacted on the continued availability of these spaces for inhabitants of Cite La Mivoie.

Many elders regret their past life, which they feel was of better quality as they were to some degree self-sufficient as the district was far less populated than it is now. Whereas nowadays they are more vulnerable since they are part of a consumer, society and they feel the burden of financial poverty.

Their standard of living has depreciated and their conditions are likely to worsen resulting from the scarcity of resources and the high population density. Most inhabitants wish to get out of the current economic system and live a self-sufficient lifestyle as they used to.

CENSUS DATE	Male	Female	Both Sexes

#### 4.4 ETHNIC RELATIONSHIPS

Although Cité La Mivoie is perceived as a homogenous egalitarian Creole *Cité* or as a Creole traditional fishing village, yet it is a heterogenous housing estate with residents of other religio-ethnic groups living there. Among the residents there are many descendants of indentured labourers of Indian origin, particularly of Marathi origin, commonly referred to as *Bombaye* as illustrated in Tables 2 and 3 respectively.

In contemporary Black River, this diversity has continued : in Grand Rivière Noire VCA there were in the year 2000: 3 Buddhist Chinese; 1,434 Christians; 415 Marathi Hindu; 5 Tamil Hindu; 2 Telegu Hindu; 129 other Hindus (but excluding Hindi Hindus); 2 Muslims and 52 who did not state their religious affiliation.<sup>38</sup>

Oral history confirms there are three Hindi-Speaking families living in the housing estate, namely, the Sukhoo or Sokoo Family, the Saradee Family and the Gobinsingh Family. In addition, there are

approximately seven Marathi-speaking families in the *Cité*. Most Indo-Mauritians live outside the housing estate. This implies that Creoles and Marathis are in majority in the region.

The housing estate has evolved from a traditional fishing village to a complex *Cité* with internal cleavages caused by, differential positions in the labour market. It is stratified along econo-ethno lines and internal econo-ethno stratification often leads to ethnic tensions.

#### Inter-ethnic relationships

Despite overt social cohesion with no visible signs of inter-ethnic conflicts, politics and social mobility gap do lead to ethno-religious antagonisms. Sylviana stated: '*...Ena ene parti, ena ene parti non. Ene parti ki enten, comme si trwa kar pas enten zot...*'<sup>39</sup> (Eng. trans. There are some (who get along), there are some no. Some who get along, as to say three quarter do not get along)

Some of the tensions seem to have racist underpinnings with a perception that the Creole residents are less 'civilised' than the other local residents like Devi who stated that people living in *Sime Quatre Saison* and in *Sime Boulodrome* are '*pa civilize*' (Eng. Trans. not civilised) compared to those living in *Sime La Jetée* and *Sime Eucalyptus* who are '*serye, bon, prop ek korek*' (Eng. Trans. serious, good, clean and nice).

...kouma mo pe dir ou ena enn tiginn desord isi osi. Dan lapre midi tou sala, koma monn dir. Sak pa chez swa, zot pa kouma bann dimounn sivilize osi, ou pa trouve zot bwar, zot zoure tou sala, ou konpran...<sup>40</sup>

(Eng. trans:...how shall i tell you there is some mess here too. In the afternoon as I told you. There is not each in their home, there are not like civilised people as well, you do not see they drink, they swear, you understand...)

Ethnic differences in living conditions have been observed between Marathi-speaking and Hindi-speaking Indo-Mauritian residents being seemingly better off than Creole residents and the former enjoying more opportunities compared to the Creoles such as they are academic achievers and have better jobs.

'...Donk la mazorite klas sosial bisin dir nou ena blan avek indyen. Zot klas sosial ot konpare ek mem, la plipar anfin isi mem bann sinwa ki reste isi se bann klas byen ot mem me kom mazorite nou ena abitan Kreol kom bann indyen ek bann blan me mazorite se trwa kar banla ki okip ot mazorite sosial... Bann kreol tou le tan zot retrouv zot dan bann ba, bann plas tou le tan ba. Kom si bizin dir tou move kitsoz se Kreol mem ki ladan...Ban blan boukou biro ek bann indou, bann indien plito dan bann plas gouvernman, komersan ek kreol se tou le tan bonn a tou fer ou byen maxi clean ou byen peser. Avan kan ti ena kann, ti ena enn ti pe labourer...byen souvan de fwa bann blan ena plis soz ki, ki nou. Ena fwa avan zot pran nou kas an konsiderasyon, si enn blan li, li pou pas kouma mo pou dir ou li pu pran enn tret enn problem mazer me si li enn kote blan so problem pou fini resoud tou de swit ki enn kreol li pou kapav pran de lane ou kan le problem inn fini, kouma dir li aprofondi, li fini net lerla zot pou pran sa an konsiderasyon...'<sup>41</sup>

(Eng. trans:...Thus the main social classes there are whites and Indians. Their social class is high compared and most Chinese that live here their social class is high but since the inhabitants are mostly Creoles Indians and whites these three mostly the latter have mostly high social class...the Creoles are always low, they always find themselves in low positions. As if we have to say Creoles find themselves in bad things...Many whites (work) in offices and the Hindus, the Indians in government, shopkeepers and the Creoles it's always been housemaids or maxi clean<sup>42</sup> or fishermen. Before when there were sugar canes there were some labourers...often whites have more (privileges) than us. Sometimes before taking our cases into consideration, if a white he will, how to say that he will, his (case) will be a prime problem, the white his problem will be solved immediately than the Creole, (the Creole) he can wait years or when the problem has already been solved, let say sorted out and solved then they will take it into consideration...)

These segregationist perceptions show the tendency to attribute others success and personal failures to extrinsic factors and to attribute others failures and personal success to intrinsic factors. In other works, the Creoles attribute the Indo-Mauritian mobility opportunities to political

patronage and not to the individuals' efforts to achieve in life. The attribute the Creoles lack of upward mobility to absence of political support and not to personal factors.

Besides, the value systems, history, psychosocial health and other social and cultural traits should be taken into account when considering differential mobility like education, family background and socio-economic positioning.

We also observed that the Indo-Mauritian residents are the owners of the retail shops, snacks, *tabagie* (Eng. trans. Small Retail Shop) and the hardware shops in the village with the exception of the hypermarkets and luxury shops.

The Creoles are at the 'other end' of the economy; they are consumers that guarantee the survival of these businesses and subsequently contribute to the upward vertical mobility and horizontal mobility of the Marathis. Hence, it can be said that the social and economic system maintain the Creoles in this dependency relationship with the latter being dependent on the wealthy families who are their employers and on the Indo-Mauritian business owners.

Furthermore, spatial arrangements of the property as well act as ethnic markers such as in most of the Indo-Mauritian gardens there is a *Mabhiswamiavk Hanuman*<sup>43</sup> to protect their house and the house dwellers and differences in housing conditions and constructions are a visible symbol of social inequalities.

Considering that houses and asset accumulation are powerful symbols of wealth, it was observed that the design of the houses of the Marathi-speaking and the Hindi-speaking residents were more elaborate which are visible signs of upward social mobility compared to the majority of Creoles in the housing estate.

It should be noted that, the material modern signs of wealth such as visible satellite dishes or an LCD television set in a shattered iron-sheet house or a 'tuned' car in the housing estate can be misleading on the actual financial situation of some of the local residents. There are indicators not only of consumption choices but of life priorities as well. For example, one of the informants (who is not among the wealthy residents) mentioned that she would buy an LCD television set to watch international football. Later on, during fieldwork, she mentioned that she was not yet a property owner because of lack of financial means to pay the legal proceedings.

In addition, during the interviews, verbal cues indicated tensions between Creoles and the Indo-Mauritians. It seems that the Hindi-speaking villagers and the Creoles get along better and that the Marathi-speaking inhabitants are perceived by others as being more ethno-centric than the Hindi-speaking villagers.

...mo pa kasiet pou dir ou, pli boukou bann Marathi. Par bann lasosiasion sosio kiltirel, zot le selman zot mem ladan, zot pa le ni enn indou ni enn Katolik ek zot. Mo mem monn pas dan sa ka la, mo enn presidan lasosiasion feminin, mo ti pe fer mo renion dan enn klub laba, laba ti ena lasosiasion feminin, ouver pou tou le mond, pou tou madam san distinksiyon de ras de kast. Ounn konpran la...mazorite ladan ti bann Marathi, minorite ti ena inpe bann kreol zot dir mwa tir bann madam kreol la depi dan lasodiadion la. Seki mo pa finn aksepte, mo dir non...Be lerla letan mo pann finn dakor zot inn tir mwa depi ladan. Be lerla monn fer tou se mwa. Parski akoz mo fer li midi li tir mwa depi laba, li dir mwa, si mo anvi res laba tir tou bann kreol depi ladan. Be ou konpran mo pa finn le sa...<sup>44</sup>

(Eng. trans:...I will not hide, mostly Marathis. In the socio-cultural organisations they want Marathis only, they do not want neither Hindis nor Catholics. I also happened to me, I am the president of the Women Association that is opened to all women irrespective of their race [and] caste. You understand...majority were the Marathis, minority there were some Creoles, they told me to take the Creole women out of the association. I did not agree, I said no...hence, since I disagreed they took me out of the association. Hence, I organised [meetings] at my place. Because I organise them midday they expelled me from over there, they told me, if I want to stay I need to take out all the Creoles. But you understand I did not want to do that...)

However, these tensions are, until now, not a direct threat to social cohesion as in their daily life, mutual aid and good 'entente' between the residents prevail over ethnic tensions. Collectivism ensures a state of internal equilibrium in the *Cité*.

### Intra-ethnic relationships

Even though no visible signs of conflict were observed among the Marathi-speaking and Hindi-speaking residents and among the Creoles, intra-ethnic tensions were still identified.

The tensions amongst the Creoles seem to be caused by socio-economic differences and differences in upbringing and not just in issues of origins. Because of their behaviour and way of living, others look down on them. For example, a Creole respondent mentioned that some Creoles tend to misbehave; they fight and are vulgar which she considers as unacceptable social behaviour.

Problems of land and space in the *Cité* are exacerbating these tensions as residents who were living on Li Mo Yo's land will soon be evicted and they need to find a new place.

...me parfwa kreol la si nou pa dir ki tou ki pe ena mal konportman. Ena bokou ki ena zot bon konportman. Me kan ou viv la dan enn landrwa enn site kan de-trwa dimounn pe fer tapaz, dimounn la pa pou dir de-trwa dimounn. Li pou dir bann site. Vwala se sa, bann site...<sup>45</sup>

(Eng. trans:...But sometimes the Creole do not all misbehave. There are many who behave properly. But when you live in a region in a housing estate when 2-3 are being noisy, the person will not say 2-3 people. They will say the housing estate...)

Intra-ethnic conflicts among the Indo-Mauritians seem to be grounded in minority-majority tensions. This can be explained by the fact that the Marathis are in minority in Mauritius and hence the dilemma of preserving their religio-ethnic distinctiveness and perpetuate their traditional religious and cultural beliefs and practices.

Internal hierarchies and diversities cause intra-ethnic tensions in the *Cité*. There is a popular perception that ethnic groups are homogenous when actually they are heterogeneous and their inner-structure and internal power dynamics are rooted in socio-economic inequalities.

These ethnic tensions are not only inherent to Cité La Mivoie. They are present in other regions of Mauritius. However, in a closed system these tensions are intensified by competition for resources. Scarcity of resources; natural, economic and cultural resources exacerbate minority-majority tensions.

Furthermore, they share the same space and social reality and common cultural traits that cut across ethnic borders. Yet, the social fabric is fragile in a small and closed space like Cité La Mivoie.

## 4.5 GENDER RELATIONS AND FAMILY PATTERNS

### Family Patterns

In Cité La Mivoie, ambilocal<sup>46</sup> residence patterns have been identified whereby couples tend to establish their home either at the bride's or the groom's relatives' residence. They either build an individual housing unit on the same plot of land or live within the same housing unit depending on disposable space. For example, Jasmine Lalouette and her husband live with her mother and Nicole Papeche used to live with her uncle.

In fact, in the aftermath of the current economic turmoil and social crisis that led to an upsurge in land and housing prices, young couples cannot afford to buy or even rent a house or apartment and thus are compelled to live at their parent's or in-laws homes.

One of the social outcomes of this crisis is a return to extended family patterns especially among the working and middle classes who might not voluntarily choose extended residential patterns.

As Teelock (1998) wrote, during slavery multitude family patterns were formed that were not consistent with the western notion of the family. Various forms of social interactions, network relationships, 'family consciousness' and social situations developed to form the 'slave families' and kinship relations.

For example, 'when slaves called each other 'brother', 'sister', 'cousin' it did not necessarily mean a biological relationship but 'implies a greater degree of intimacy and friendship with certain persons than with the rest of the comrades.'<sup>47</sup>

There is a strong correlation between residential and family patterns with one influencing the other. The *Cité* can be seen as an extended family whereby the residents have kinship links to various degrees; biological and non-biological links.

Presently, two forms of extended families were identified in the *Cité*, firstly joint families and, secondly, combined families. Single mothers on the other hand tend to prefer matri-focal residential patterns given that women tend to assume prominence.

Even though patriarchy underpins the structure of the social system within the *Cité*, the family space remains the woman's space as the woman remains the pillar of the family. The feminisation of the domestic space is not a contemporary social feature but according to Burrell (2010) it can be retraced back to slave times when the woman was the dominant figure of the family while the man was relegated to the second place and when he lost his prerogative on his wife, he was denied his dominant role as the family protector.

For the Hindi-speaking and the Marathi-speaking residents, the cultural pattern is different as traditionally, once the daughter is married, she leaves her parents' house to live with her in-laws.

For example, when Devi got married in 1975 she settled in her parent-in-law's house in the *Cité*. They had to reconfigure their internal arrangement with the expansion of the family. Her daughter went to live at her in-law's house in Baie-du-Cap when she got married.

...Ietem monn marye monn vini...pa ti ena mem la mezon, ti ena bann site, bann mezon an lamiant la, bann site, anfin ti ouver, kouma dir se ta ki ti pe al kot so kamarad, tou sa la, ou konpran! Ek pa ti ena oken konstriksion, an beton...bann semin la mem pa ti byen fer...Mo ti ena mo belmer mem, mo boper, ek an plus de sa li ti ena so bann zanfan, ek mwa letan monn marye monn vinn, mintenan mo si monn bizin enn lasam ladan, dan sa kat pies la. Lerla kouma dir mo belmer inn ranz enn lot, pou mo bann bofrer dormi ladan, enn kote...<sup>48</sup>

(Eng. trans:...when I got married I came...there was no house, there were *Cité* [houses], asbestos houses, the *Cité*, it was open, how to say that people went to their friends' [place], all this you understand! There were no concrete buildings...even the roads were not done properly...I had a mother-in-law, my father-in-law, besides he had his children, and when I got my I came, then me too I needed a room among these four rooms. Then how to say that, my mother-in-law built another [room] for my brother-in-law to sleep aside...)

Women in the *Cité* have children at a young age, as young as 13 years of age, and it is common for women in their thirties to have five children from different fathers as illustrated in Devi's testimony below.

It seems that female-headed households constitute the majority in the housing estate resulting from serial monogamy and multiple sexual partners.

...Donk me...ena boukou mer selibaterdonk dan la site? Enn dizain.... Ant 17 a 27. Ant 17 a 20, 27. Ek komien zanfan zot ena? la ena 11, seki dernie mo kone, mo kone ena 3, anfin maximum 3...Ena diferan papa...Donk si mo konpran se enn jeun madam ki zot inn rankontre enn zom, zot inn gagn zanfan la, papa la pa in deklar zanfan la? Ena pa in deklare...<sup>49</sup>

(Eng. Trans:...So...are there many single mothers in the housing estate? there are ten...between 17 and 27 [years old]. Between 17 to 20, 27 [years old]. And how many children they have? What I last learnt there are now 11, I there are 3, maximum 3 [children]...there are from different father...So, if I understand it is a young woman who met a man, they got a child, the father did not declare the child? There are who did not declare...)

These family patterns are commonly perceived as being dysfunctional and that combined with spatial arrangements problems, foster 'promiscuity' and unhealthy living environments.

The testimonies revealed that some women do not even know the name of the father of their child and thus do not receive any alimony for their children. These women sometimes are unemployed and live in abusive relationships with domestic violence being widespread in the *Cité*.

Denial and minimisation were identified as a survival mechanism that helps them cope with the abuse and stay with their abuser. The various barriers restraining them to leave abusive relationships entrap these women in the vicious cycle of domestic violence.

The main barriers are: (i) lack of financial means and affordable housing facilities, (ii) fear of loneliness and violent reprisal, (iii) limited access to resources, training and education for women; (iv) children and (v) fear of social stigma.

*...La zot pou, petet seki zot, si bann jeune tifi ki finn viktim de zot konkibin...petet ki zot pou al retourn kot zot fami ou bien si le konkibin ki finn viv isi avek so konkibin, se li ki pou ale. Konkibin la ki pou ale me zame zot pa pou al de lavan kom si pou, petet zot pa pou mem defann zot drwa ou bien accepte lakoz zot zenfan...<sup>50</sup>*

(Eng. trans:...they will maybe, if it is the young girl who is the victim of her partner...maybe they will return at their family [place] or if it is the partner who settled at the girl's place, he will leave. They male partner will not leave, they will never go forward let say maybe they will not even defend their rights or even accept because of their children...)

Genealogical research revealed that residents favour endogamy to exogamy in that they prefer to marry people within their personal network either natives of the *Cité* or people living in the neighbourhood such as in Morcellement Les Tamariniers or people from surrounding villages such as from Chamarel, Tamarin Village, Petite Rivière Noire or Le Morne Village.

For example, Pierre Auguste married Toinette Verlope both were living at Le Morne Brabant and their son Albert Pierre Auguste married Olivia Victorinne who lived in the same locality. Jean Louis Malgache living in Chamarel married Marie Elizabeth Townsend living in Petite Rivière-Noire.

Morcellement Les Tamariniers commonly referred to as *Kan Tamarinier* (Eng. trans. Tamarin Camp) or *Cité Tamariniers* was constructed three years ago and is located opposite *Cité La Mivoie* between *Kan Lakol* and *Kan Diosez*. It can be considered as an extension of *Cité La Mivoie* given the close relationship between the two. They are related by kinship and some people moved from *Cité La Mivoie* to settle in these localities. For example, the Faron Family live in Morcellement Les Tamariniers as illustrated in Chart 1 below.

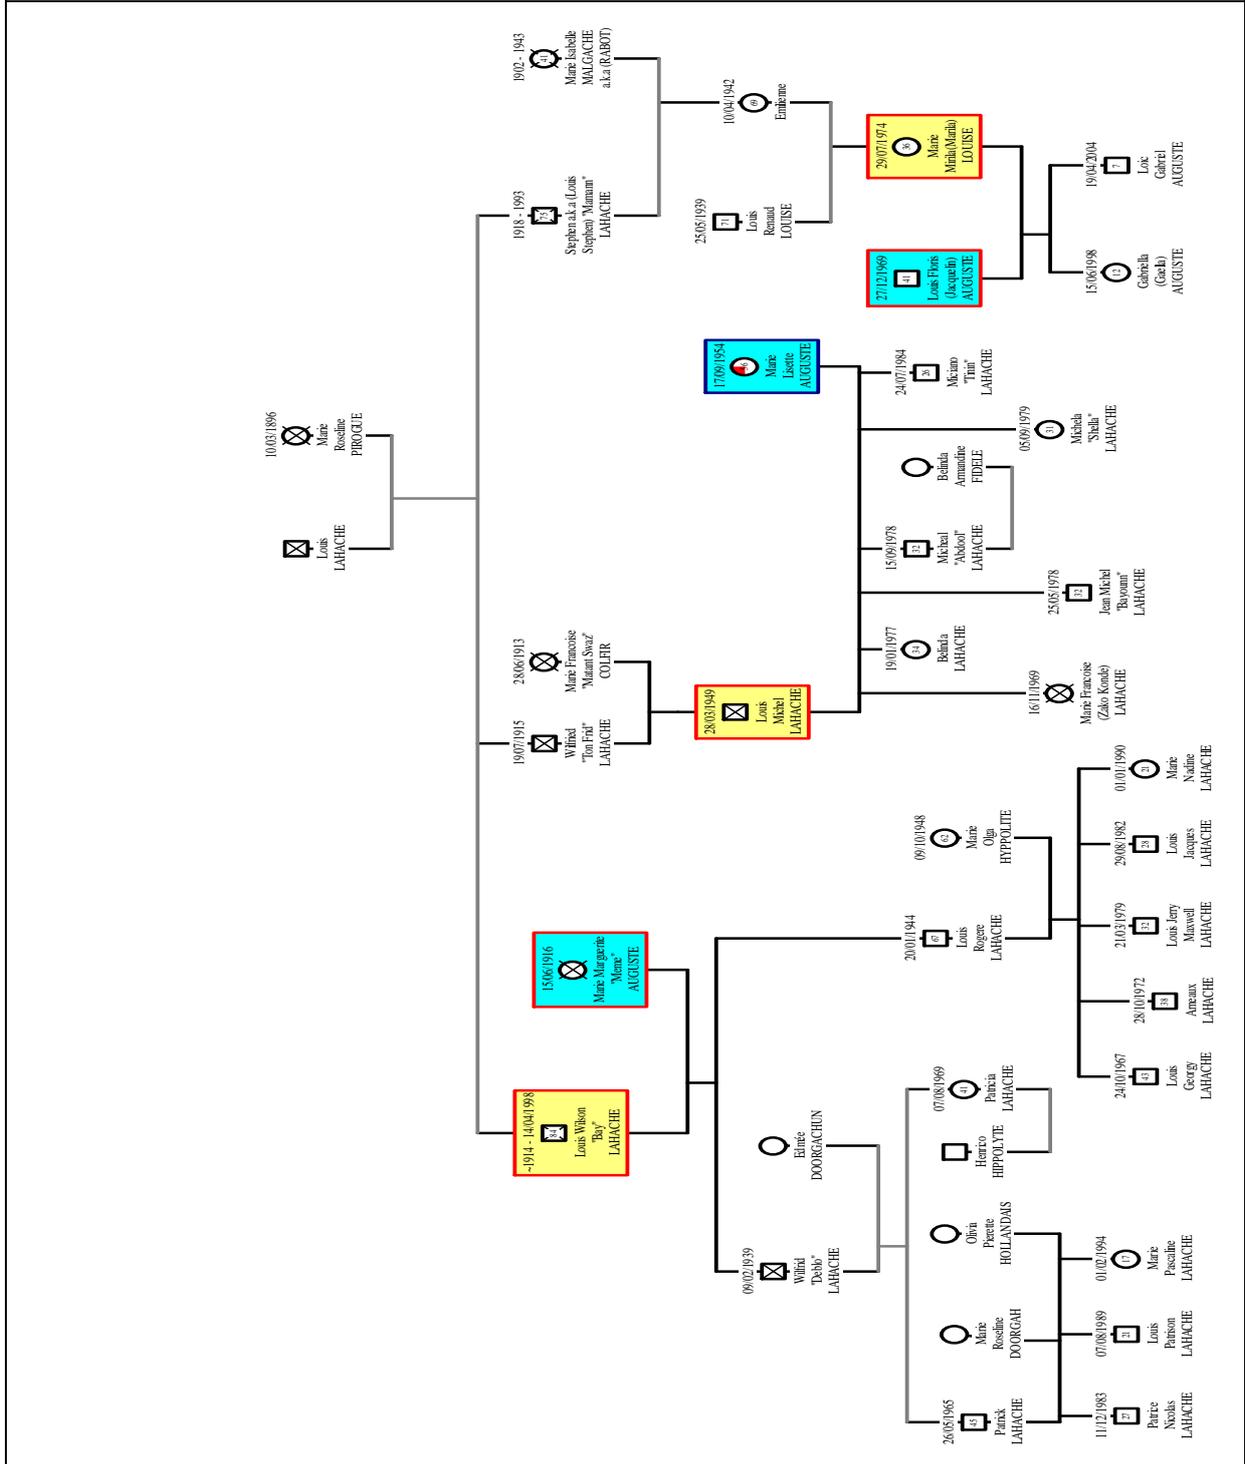

It can also be observed that some family members tend to marry within the same family through generations such as Lahache family (uncle and nephew) marrying in August Family as illustrated in Chart 2.

Emilienne's father had a wife whose maiden name was Louise and Emilienne is presently living in *concubinage* (Eng. trans. Cohabitation) with Louis Renaud Louise as indicated in Chart 3.

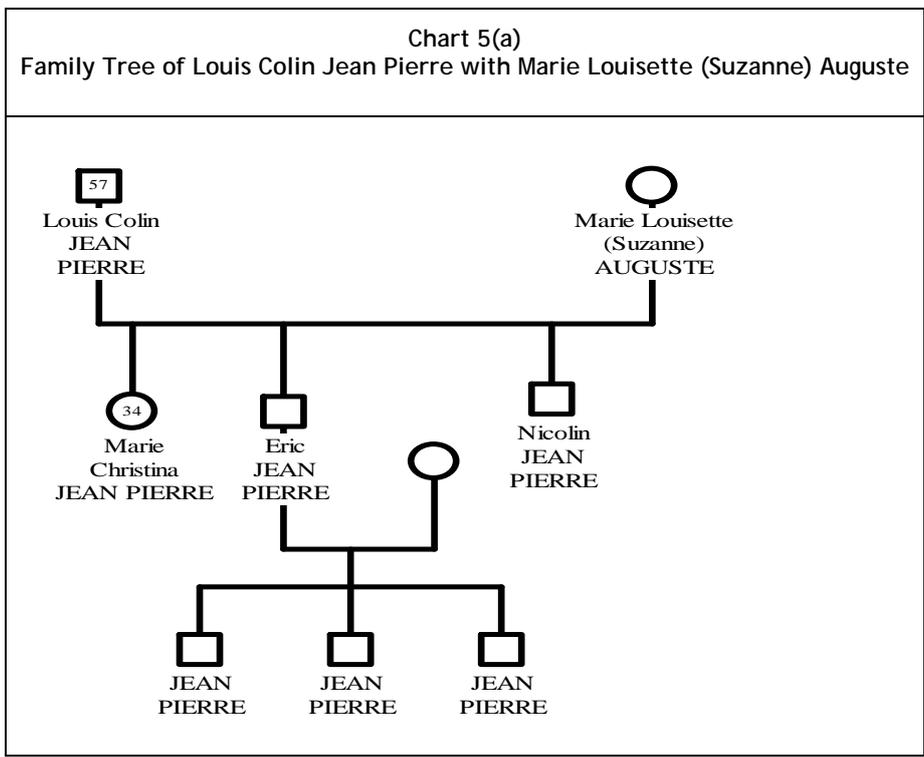

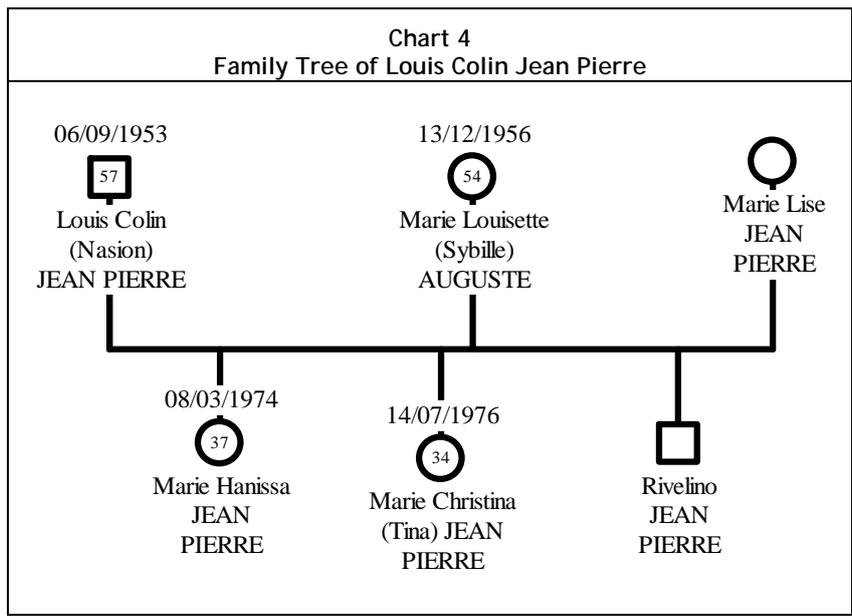

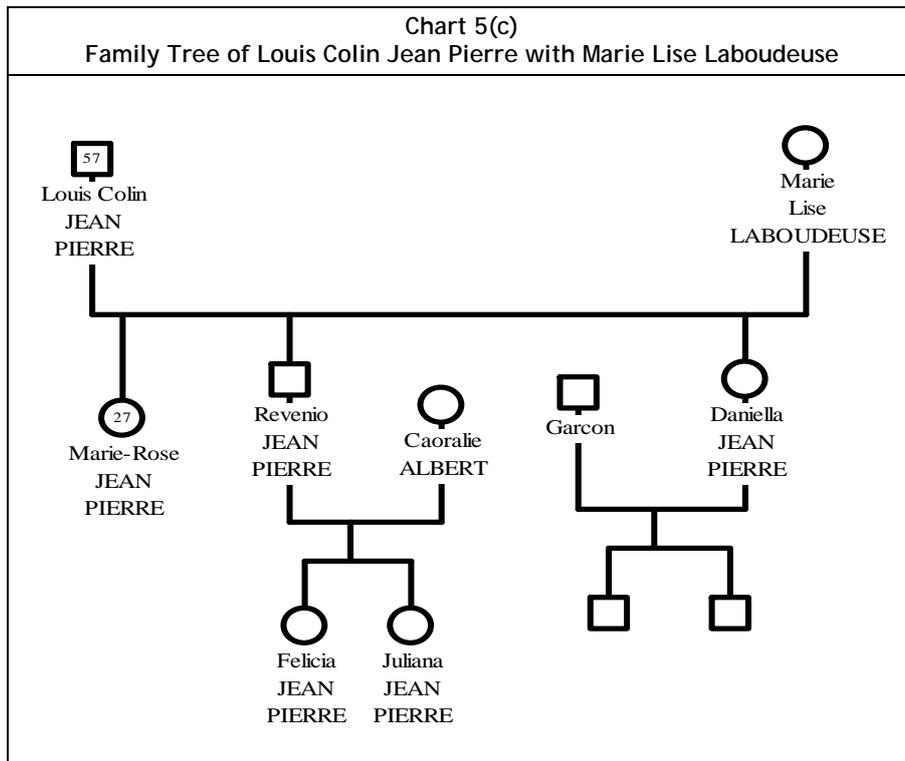

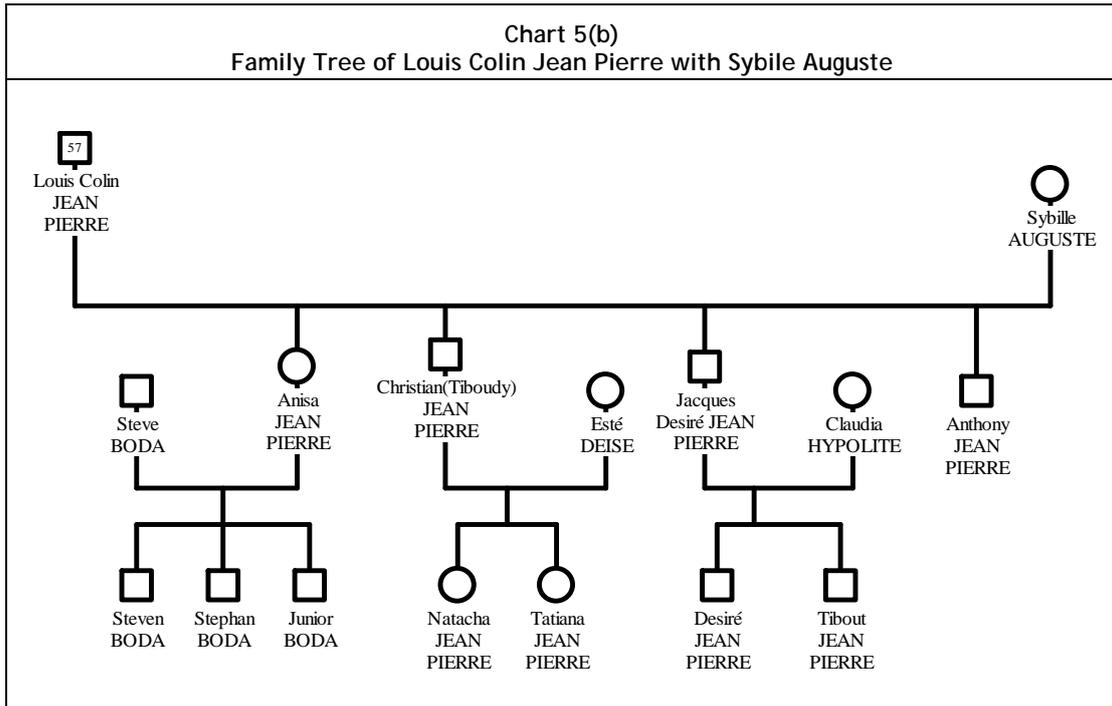

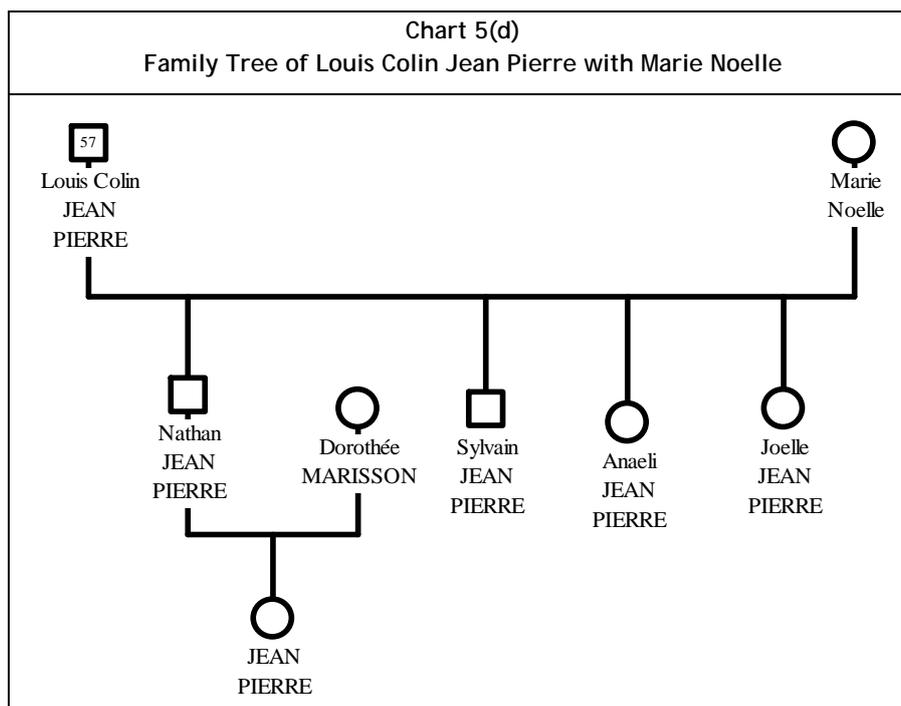

Chart 3  
Branch of the descendant Tree of Louis Lahache illustrating kinship links with the August Family

The tree entitled Chart 4 is based on official documents and indicates that Louis Colin Jean Pierre had children with two partners namely Marie Louise Auguste and Marie Lise Jean Pierre. Whilst, the family trees entitled Chart 5 (a) to Chart 5 (d) were built based on the oral testimonies and indicate that he had four partners.

It should be noted that the genealogy trees do not reflect the exact extent of multiple partnerships in the *Cité*. Moreover, respondents do not make the distinction between *concubinage* and marriage.

They conceptualise both relationships as being similar because they conceive both as being husband and wife relationships. For example, they used the morpheme *fam* (Eng. Trans. Wife) to designate the various female partners of a man.

This can be explained by the fact that in the Mauritian Kreol lexis, the equivalent for an intimate female partner is *fam* since in intimate cohabitation; the man and the woman are related by an intimate conjugal relationship.

Therefore, it was difficult through oral history to retrace the nature of these various intimate cohabitations and multi-partner relationships especially when children born from these relationships were declared under their mother's patronymic name.

It is worth noting that *concubinage* and serial monogamy are not modern forms of family patterns and they can be traced back to colonial times. For example the 1871 census reported that 'amongst Indians there was a large number of females who were living in *concubinage* and one of the causes of their doing so was that they were not allowed by the laws of the colony to marry before the age of 15 unless they obtained a special dispensation from the governor.'<sup>51</sup>

Although Cité La Mivoie is predominantly a cognatic society, in some instances, when children were born out of illegitimate relationships or of serial monogamy, they were declared under their mother's name (either because the father did not recognise his paternity or was unknown) which hence made it difficult or sometimes impossible to retrace their patrilineage.

In the past, it was common practice that children were not declared by their biological parents but by friends or by relatives. Sometimes, these children were not declared under the same patronymic name as their parents or they carry the patronymic name of the person who declared them. Hence, this practice disrupt contemporary family lineage.

This naming practice dates back to colonial times such as Arthur Townsend born in 1898, the son of Louis Malache, was declared under his mother's name Marie Elizabeth Townsend. This practice might stem from the fact that during slavery, maternity and the nurturing role of women were recognised whereas slave owners undermined paternity and hence only the mother's name was registered in the plantation records.<sup>52</sup>

Another reason might be children born outside marriage and from ‘illegitimate’ relationships were considered, as ‘illegitimate’ children and the father did not recognise their paternity. For example, Emilienne is an illegitimate child of Louis Stephen Lahache and it might be one of the reasons why she does not have a patronymic name.

...Mo mama ti apel Marie Isabelle Rabot...Ek ou papa? Mo papa ti apel Louis Stephen Lahache...Non. Zot pa marye. Mo maman ti marye avek Cyril LaBoudeuse...Mo papa ti marye avek...Wi Ti marye Roselda Chambac...Mo gramer appel Marie Amandine Malgache. Mo granper mo pa kone...<sup>53</sup>

(Eng. trans:...My mum was named Marie Isabelle Rabot...And your father? My father was named Louis Stephen Lahache...No they were not married. My mother was married with Cyril LaBoudeuse...My father was married to...Yes it was Marie Roselda Chambac...My grandmother is named Marie Amandine Malgache. My grandfather I do not know...)

Her mother’s patronymic name is Rabot whereas her mother’s sister or half-sister was named Simone L’Hermitte. She thinks that a man named Rabot might have declared her mother.

...Be lontan zot ti pares. Li pati difisil. Li kapav pe asize dan lakaz: To pe al deklar to zanfán? Dir wi. Ayo deklar pou mosi enn kou...<sup>54</sup>

(Eng. trans:...Long ago they were lazy. It was not difficult. They might be sitting in the house: you going to declare your child? Say yes. Ayo declare for me too...)

According to Burrell (2010), disproportionate ‘black family’ dysfunction is directly linked to American chattel slavery with slave owners having no regard for family attachment. They made a conscious and willing decision to control slaves’ minds through decimating the ‘black family’. Deconstructing the very concept of the ‘black family’ was central to massive enterprise to build a new economy and to lay the cornerstones of personal fortunes.

The female-headed families can be conceived as a by-product or a consequence of slavery that destroyed all ancestral family bonds within the ‘slave families’ (separating families upon their arrival on the island or before their deportation) with the exception of the mothers-children dyad with mothers and children that remained together.

To make the slaves more compliant and submissive, the slave owners destroyed their identity markers. The deconstruction of ‘slave families’ can be considered as a strategy used by the colonisers to destroy the slaves ancestral identity and cultural markers so as to submit the latter to their control and power.

This was achieved through de-culturation and acculturation that systematically implied the branding and breaking of ancestral traditions and value systems. Hence, slavery led to changes in family patterns from ancestral male-headed families to families headed by mothers.

The breaking of family and marriage ties among slaves and constant separation of families led to a shift in family patterns and structures that still impact on the contemporary family.

However, how far the present local community structures and family patterns are legacies of slavery have yet to be determined given that they might result from other social, economic, historical and cultural influences dating back to post-slavery period.

### Gender relations

Women are the pillar of the *Cité* in that based on the respondent’s testimonies, the women residents are more active than men are and they are the pillar of the family as they play a crucial role in the formation of community life. But, the *Cité* inner-structure remains patriarchal.

...Ou fek dir enn zafer la se bann fam ki plis mobilize dan la rezion... Kouma ou explik sa ein?... Ena boukou bann papa ayo pa mo zafer sa mo pa rant ladan mo pa dir tou ena papa santi li bien kapav fer kitsoz par kont dan le PTA ti dir douz mam ena 1 sel zom parmi 11 fam... Me eski ou pou dir dan la site se bam fam ki tenir latet lakaz?...Ah oui oui fasil kler ek net!...<sup>55</sup>

(Eng. trans:...you just said that women are more active in the region...how you explain that?...you hear fathers say ayo this is not of my concern I will not get involved in that I do not say all, they are fathers you feel they can do things but in the PTA there are 12 members there is one man amongst 11 women...would you say that in the housing estate it is the woman who is the head of the household?...yes yes easily clear and straight...)

Even though, at the surface, women seem to be empowered, yet, field research uncovered that female residents have internalised low self-esteem and low self-confidence that result from negative self-images and self-representations. They believe that they are socially and economically dependent on men and that their social and individual identity can only be constructed through a man.

The generational transmission of these beliefs perpetuate serial monogamy and multiple sexual partners among both men and women. For example, Stephane Lahache, the father of Emilienne Faron, had three three wives.

Emilienne has two partners (she was previous married to Mr. Faron and is presently living in *concubinage* with Louis Renaud Louis) and her son Antonio Faron was married one and is actually living in *concubinage* with his second partner.

In keeping with Teelock (1998), these types of relationships seem to date back to slavery when women were convinced that the route to 'material improvement', social mobility, social recognition and a better standard of living was through a man and especially 'free men that could provide for their subsistence' which implies a man with a higher social status. These relationships were also a means for women to build sense of social image and social respect.

The economic dependence of women also was retraced to slave times when few opportunities of socio-economic mobility were available and women 'were for the most part dependent on the men when they wanted to provide additional comforts and necessities to their children and a path to social advancement.'<sup>56</sup>

There is also a transmission of gender-based violence across generations, as it seems that through generations people have internalised the behavioural patterns that they reproduce.

For example, during the interview of a woman, behavioural cues were identified indicating that she might be abused by her husband and we found out that her mother also was physically abused by her father and was beaten to death.

We tend to forget that 'black female' identity was shattered under slavery. Slave women were treated as sexual objects that imply that they were denied sexual integrity and they were the property of their slave master. They had no control over their sexuality and bodies.

Subject to rape and other sexual abuses, they were stripped of their self-esteem and were emotionally fragmented. They were negatively stereotyped as being of 'loose' character and of having an uncontrollable sexuality.

This sexual stereotyping that was perpetuated in post-colonial times such as in the post-colonial literature, has impacted on the 'black female' psyche with women across generations internalising that their body and sexuality were just a 'bartering tool for love and affection' and social status.

In line with Burrell (2010), the slave system also negatively affects the 'Black male' identity in that 'slavery and its aftermath constituted an unrelenting assault on black male identity. The trauma was a serious blow to the sense of manhood prevalent in male dominated societies and which many Black men still 'wrestle' with today.

It is impossible to understand our current family crisis without examining the historical ways in which black fathers, mates, brothers and sons were emasculated.' Actually, slavery disrupted gender relations and roles that left the slave men and their descendants with a sense of emasculation that has been internalised and transmitted across generations.

For example, the rape and sexual objectification of slave women and the helplessness of the slave men who watched their wife, sister or daughter being abused are present in the collective memory.

The distribution of work duties on the sugar plantations during slavery as well further disrupted gender roles since, slave women were 'forced into male roles', they 'performed almost all the tasks performed by male slaves'<sup>57</sup> and were, in reality, subject to harsh corporal punishment.

Indeed, the impact of the long-term trauma and psychological disempowerment of the slave system on contemporary gender relations should not be undermined. Slavery and even post-slavery was a dehumanising and denigrating system whereby slave men were forced to stifle their male identity and it bore prejudice to their sense of manhood.

In other words, slave men were denied their manhood since they were dehumanised and objectified. They had to submit to the oppression of another man, the slave owner, and be docile and subservient.

This sense of emasculation might be one of the reasons why the male *Cité* dwellers still feel the need to prove their manhood and male prerogatives in a patriarchal society that reminds them how their male ancestors did not defend nor protect their female ancestors.

Indeed, during fieldwork, it was observed that the male residents at a very young age adopted a macho and misogynistic behavioural pattern as a means of affirming their male identity and their domination such as in their language codes that are heavily loaded with violent slang and in their attitudes towards the female residents.

Since a young age, they are socialised to adopt and nurture the 'appropriate male dominant behaviour and traits' with male-hood being associated with aggressiveness, domination, power and control.

'...Zot ena respe pou fam indien...Wi, de fwa enn fam indien pou pase la, zot pou dir he aret zoure ena madam pe pase la me de fwa ou pe pase zot pou kontinye betiz. Si zot bisin pou fer tiss en plin air pou ou trouve, zot fer tiss. Li bann ak koumsa kot nou pase...Be bann fam sinwa, bann fam blan ek bann fam milat? Non zot pou kone sa bann lot kalite par dimounn sa ou zot be zot pou les li, zot pou atan, zot pou les li pase lerla zot pou fer seki zot bizin fer ou lot la pou dir res trankil...kom si pou zot kreol bizin res tou le tan koma koze la derier midi... De fwa fason depann, koze ein... Be ki zot dir, ki koze ou antan lor ban kreol? Kreol voler, Kreol souler, Kreol pitin...'<sup>58</sup>

(Eng. trans:...they respect Indian women...yes sometimes an Indian woman will pass by, they will say stop swearing there is a woman passing by but sometimes they you pass by they continue swearing. If they need urinate in the open air for you to see, they urinate. They behave like that when we pass by...but Chinese women, white women and mulatto women? No they will know these people they will leave her, they will wait, they will let her pass by then they will do what they have to do or the other will say stay quiet...as if for them Creoles have to always remain (backwards)...sometimes way of talking...But what they say, what you have heard on Creoles? Creoles thieves, Creoles drunkards, Creoles whore...)

Gender differences in academic achievement and occupational distributions as well was observed with men being mostly fishermen and gardeners whereas women are housemaids and blue collar workers which means that the skilled and qualified workers are mainly women.

Nonetheless, it seems that once reaching adolescence, girls experience more societal pressure to find a potential life partner leading to changes in the hierarchical organisation of motivation with their focus targeted towards finding their life partner. Subsequently, they tend to leave school either because they are pregnant or to get married. The issue of the school 'drop-out' will be further developed later in the report.

...ki fer zot aret lekol, ki zot al fer? Abe zot marye, zot fini al form enn foye, enn menaz. Donk ou dir mwa ena bouku kinn aret lekol ? Wi. Dan 14-15 an, apre marye? Wi...'<sup>59</sup>

(Eng. trans:...Why they stop schooling, what they do? They get married and they form a family, a married couple. So you told me there are many who stop schooling? Yes. So [they are] 14-15 years of age? Yes...)

Hence, in keeping with Bryne (1978), gender stereotypes that underpin gender discriminations and subsequently the cycle of gender discrimination against women are maintained and reinforced by parents in Cité La Mivoie that perpetuate identity of girls in domestic traditional terms and roles and in relation to men.

However, considering that slave women constituted the main source of unskilled and menial labour whereas slave men performed skilled work<sup>60</sup>, the shift in job patterns with women nowadays being rather blue-collar workers and skilled workers indicate that women have been able to make use of the opportunities of post-slavery for economic advancement. (See Economic Survey Chapter)

#### 4.6 SETTLEMENT

The villages in Black River region should not be considered as isolated entities but as being inter-related. They are linked by history and kinship as mentioned earlier and as revealed by the family histories. The family histories uncovered that people living in the camps came from the villages such as Le Morne Village, Chamarel and Petite Rivière Noire<sup>61</sup>.

For example, in 1963 Antonio Faron, the son of Emilienne, was born in *La Salin* Pilot/Koenig and grew up there. Now he lives in Morcellement Les Tamariniers. Jean Louis Malgache, the great grandfather of Humbert Thousand was born in Chamarel. One of our respondents, Evariste La Boudeuse, was born in 1939 in Macaque and grew up in Trou-Chenille.

...Mo mama ti dir mwa mo ti ne laba enn lendrwa apel makak. Makak li akote le morne? Makak li akote le morne. A ou ti ne makak apre kot oun grandi? Lerla monn grandi mo vinn grandi trousini ena enn landrwa dan le morne mem sa...Ki laz ou tiena kan oun vinn rest trousini? Ler monn ne sa ve dir mo tiena 6 an laz 45 laguer 45 mo ena 6 an. Donk kan ou tiena 6 an oun al trousini?...Ti ena enn legliz la sa legliz la inn fini sa lerla mo ti ne laem kot la fours mo ti ne makak lerla monn..Oun grandi trousini ou byen ounn grandi labrazier? Saem li kom dan sa simin laem koumadir trousini kote anba la enn kontour la enn la boutik la madam Ah Hee pou al andan pou trouv trousini...<sup>62</sup>

(Eng. trans:...My mum told me that I was born in a place named Macaque. Macaque is near Le Morne? Macaque is near Le Morne. Oh you were born near Macaque and then where you grew up? Then I grew up in Trou Chenille it is a region in Le Morne. What was your age when you settled in Trou Chenille? Then I was 6 years of age in 45 was the war in 45 was 6 years of age. So when you were 6 years of age you went to settle in Trou Chenille? There was a church there the church was destroyed I was born there near the Pied La Fourche I was born in Macaque then I...You grew up in Trou Chenille or in L'Embrassure? It is part of this road how to say Trou Chenille is down there [there is] a turning the shop [of] Mrs Ah Hee to go within you have Trou Chenille...)

These links result from voluntary or forced migration. As illustrated in the migratory map attached, it seems that local inhabitants migrated from the villages in the southern part of the district to the northern part. In other words, they climbed up the district. (See Appendix 2)

For example, in the past, employment opportunities and marriage motivated migratory movement of people as people settled in regions where there were job offers and as mentioned earlier people tend to marry within the region.

Oral history revealed that before the 1960s, the bulk of the population was living in the various *kan* (Eng. trans. Camps) on the surrounding estate land namely the estates of the Maurel Family that was divided and sold in the 1960s to the Lagesse Family, De Senneville Family, De Maroussem Family and Ramdenee Family.

However, it was not possible to consult the deeds of sales to have details of the land transactions such as chronology of the sales and acres of the concession sold because of lack of time. Hence, I relied on the oral testimonies to retrace the spatial configurations. Therefore, discrepancies might have arisen because of memory distortion.

Based on Olivier's testimony, one of the elders in the region, it seems that the region belonged to the Maurel Family who was the main estate owner in the region with their concession extending from *Bois Piant*<sup>63</sup> (Eng. trans. Stinking Wood) in Petite Rivière Noire to Tamarin.

The Maurel Family divided their concession that they sold to Philip Lagesse with his estate extending from *Bwa Pian* to La Mivoie; De Ravel Family that owns land from Petite Rivière Noire to Bois Piant and the *Salin* Carlos; and Maingard Family that possess the Mountain La Tourelle du Tamarin to Tamarin Village.

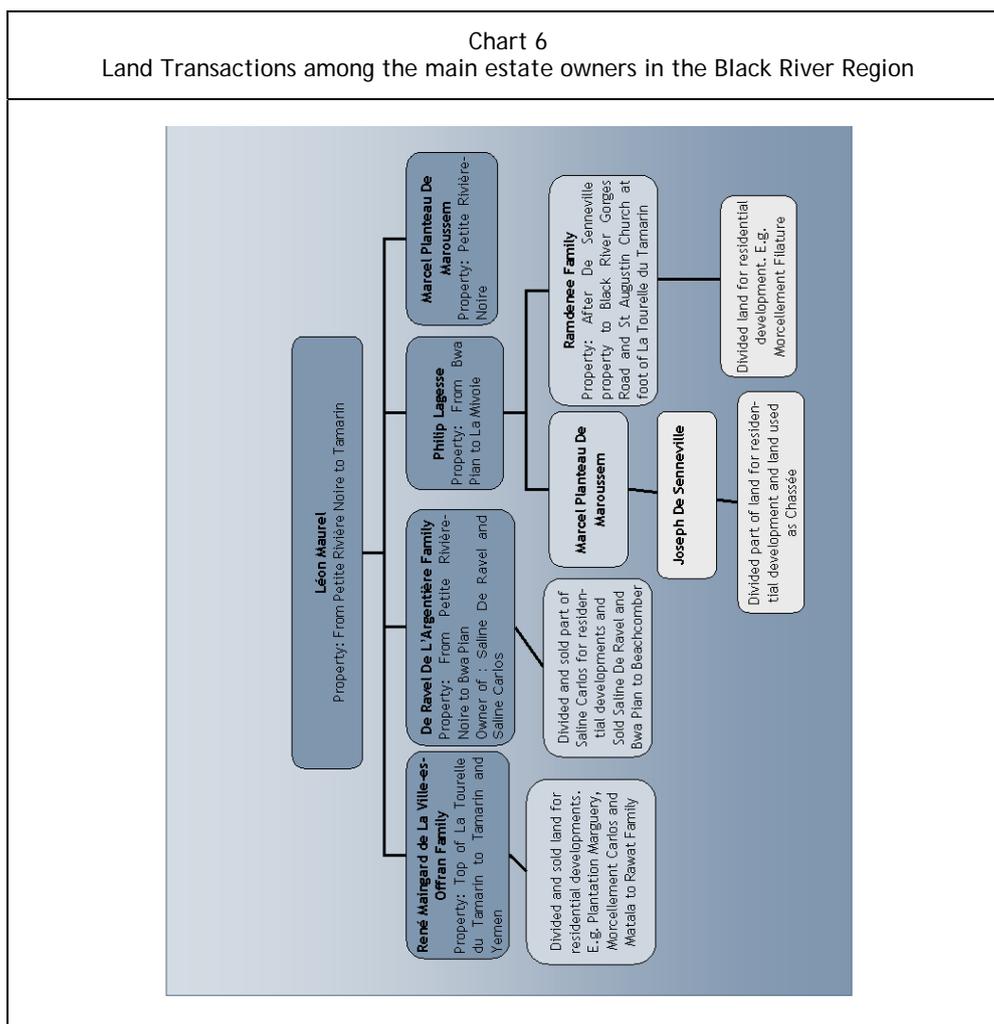

Later, Philippe Lagesse sold his concession to Marcel De Marousse and the Mr. Ramdenee whose property was located after that of Joseph De Senneville and along the Black River Gorges Road until *Pon Misel* and at the foot of the mountain until St Augustin Church.

Marcel De Marousse sold his property to Joseph De Senneville who converted his land into hunting grounds. Oliver was working for him as watchman from the age of 45 and now he is retired.

According to Moutou (2001, p. 35), Adolphe Maquet in the *Précis Terrier de l'isle de France* estimated that in the years 1744, in the Black River district, not less than 100 concessions were allotted for a territory of 35,937 arpents. These concessions were later on transmitted across generations. For example, Comtesse De La Marque possessed a concession of 1,045 arpents, François Fortier owned 156 ¼ arpents, Jean Lousteau Père had 156 ½ arpents and Chazal Chamarel was allotted 1721 ½ arpents.

Furthermore, in accordance with Teelock (1998), of all the concessions in Black River, 89 percent of them were large concessions of over 100 arpents and in 1830; there were 107 estates in the region. Hence, it might not be surprising that the De Ravel Family was one of the main landowners in the Black River region.

Chart 6  
Land Transactions among the main estate owners in the Black River Region

## 1. Maurel's Property

Oral history discloses that, apparently, Petite Rivière Noire to Tamarin somewhat belong to the Maurel Family before 1960 since they were the main landowners in the region with the exception of the Koenig brothers salt-pan owners.

According to Nicole, '*propriete Maurel komense apre mo le dir Bel Ombre!*'<sup>64</sup> (Eng. trans. Maurel property starts after Bel Ombre). Hence, the property extended after Bel Ombre property in Petite Rivière Noire to Tamarin.

## 2. De Ravel Property

When going towards the North, De Ravel's property is one the left side of the main road and starts with the Fatima Chapel<sup>65</sup> in Petite Rivière Noire where the *Salin* De Ravel is located.

...zis kouma nou gagn komansman legliz la, kote gos, ek terin De Ravel komanse...wi, chapel Fatima trouv lor terin De Ravel. Sa ve dir De Ravel, kot so terin koumanse? la. kot ena la chapel?...Wi...Parski kan nou get byen la, zis enn semin ki De Ravel...en bann, bann abitan ilofortie inn pran, parski sa kote la ou gagn difil pou De Ravel...Me selman, dan terin De Ravel...De Ravel so terin trouv bor semin, inpe bor chemin, pli andan, ena terin ki ti appartenir a la salinn Pilot...<sup>66</sup>

(Eng. trans:...It is just before the church on the left there De Ravel land start...yes, Chapel Fatima is located on De Ravel land. So De Ravel where his land starts? There where the is the Chapel?...Yes...because when we see carefully there is a road just [for] De Ravel...they inhabitants of ilot Fortiers use this road, because on this side you have a fence for De

Ravel...But De Ravel's land is on the roadside, a little on roadside, further inside there is land that belongs to the Pilot salt-pan...)

Recently the De Ravel Family<sup>67</sup> sold their property in Petite Rivière Noire to Beachcomber group but the salt-pan is still operational.

On his property, inside *Salin* De Ravel, there was a camp at the entrance of the salt-pan where the workers used to live. The camp was destroyed 20 years ago and presently Nicole's daughter and her family are the only one to live there.

As from the place named *Bois Piant*, when going towards the North, the property on the left side of the main road is divided into two parts. The land that is on the sea border is for the Pilot/Koenig family and the land on the road border is for the De Ravel Family.

### 3. Hardy's Property

It is located on the right side of the main road in Petite Rivière Noire. The Church of Petite Rivière Noir is located on Hardy's land. Part of the hunting land was converted into residential land such as *Morcellement* Multipliant that was built eight years ago.

### 4. Pilot/Koenig Salt-pan and Îlot Fortier

The Pilot and Koenig families were also identified as main landowners in the region. For generations they owned the salt-pan Pilot/Koenig that they recently sold to Beachcomber group for hostelry development.

According to Moutou (2001, p.222), in 1939, there were seven salt-pans of which six were located in the Black River district amongst which there were Les Salines for the Koenig brothers, La Mivoie for Léon Maurel and Petite Rivière Noire for Société E. Antelme.

Nicole testified that the great grandmother Mrs. Koenig had many children approximately twelve to nineteen descendants. When the great grandparents died, Îlot Fortier was divided between each child but later on, some of them sold the land they inherited. Presently there are three Koenig daughters still living on the island namely Mrs Colin, Mrs Leclezio and Mrs Adam.

### 5. De Senneville Property

When going towards North, the De Senneville property is on the right side of the main road and starts after the place named *Bois Piant*, after the reservoir.

...apre bwa pian la li pou komans pou De Senneville...Oparavan sete Maurel, epwi vande, vande, vande, De Senneville...<sup>68</sup>

(Eng. trans:...After Bwa Pian starts De Senneville [property]...Before it was for Maurel, then [he] sold, sold, sold [to] De Senneville...)

According to Nicole, the Maurel Family sold the land to the De Senneville who used his property as hunting ground. Part of the hunting ground was converted into residential land. A *Morcellement* was constructed in-front of Paolen Industry on the location of the Aloes Mill.

### 6. Ramdenée Property

Ramedenée Family estate started after the De Senneville property, after the Tamarind tree named *Tamarin Lapel*. According to Nicole, Mr. Ramedenée bought land from Mr. De Maroussem around 1970 and in around 2005, he divided and sold his land for residential development and built *Morcellement* Les Filature.

...donk en 1960, Ramdenée pa ti ankor proprieter alor? non, non. E Ramdenée inn vinn proprieter byen byen apre 60, byen apre. Byen apre ? Wi. Ou kone ver ki lane linn vinn proprieter? parski kan mo pe dir ou, en 1960 la, Maurel pe koumans deza vande la kot misie Maroussem inn pran, misie Maroussem inn pran tou sa, sa mem kot apre inn vinn Ramdenée. E, Ramdenée inn pren ver lane 70...<sup>69</sup>

(Eng. trans:...so in 1960, Ramdenée was not yet owner then? No no. Ramdenée became owner well after 1960, well after. Well after? Yes. You know when he became owner?)

Because when I tell you in 1960, then Maurel already started to sell, where Mr. De Maroussem took, Mr. De Maroussem took all that, then afterwards was sold to Ramdenee. And Ramdenee told in around 1970...)

## 7. Cité La Mivoie

The *Cité* was built in 1960 after the devastating impact of *Cyclone Carol*. It was built under the Cyclone Housing Schemes of the Central Housing Act of 1960. This scheme provided for the construction of houses to be let or sold to occupiers of residential buildings blown down or damaged by a cyclone. Consequently, the government constructed Cité La Mivoie for the local victims of *Cyclone Carol*.

Oral history uncovered that the settlement of the *Cité* can be divided into two waves. The first settlement dates back to around 1962-1963 when the victims of *Cyclone Carol* took possession of their houses.

Among the first settlers, many lost their houses because of non-payment of their rent and bail. As soon as a house was vacant, squatters, who often were relatives of the former house occupant and living in the surrounding localities, settled in and later on were registered.

This second wave of settlement was in around the 1980s, from 1975 until 1982. For example, the uncle of Nicole was evicted from his house for non-payment of lease and Nicole settled in.

...Mo tonton ti abit la. Roger L'hermitte...Lakaz tipe pay venntwa sinkant. Be lerla mwa mo tipe res kot enn lot madam. Lokater kom li ansam ar li. Lerla mo tonton li li pann pay lakaz. Madam-la so ser pann pay lakaz. Mo vinn res linn rama so ser...Tir ou bann kiksoz zet deor. Met kadna dan laport. Be lerla-be...monn vinn res ek li la monn dir li pay ou lakaz ou pou perdi lakaz. Abe zot pann paye zot inn perdi lakaz. Inn met kadna inn tir tou nou kiksoz met deor. Perdi lakaz. Kan rayot inn ale monn kas kadna-la monn rantre...<sup>70</sup>

(Eng. trans:...My uncle lived there. Roger L'Hermitte...the rent was twenty tree rupees fifty cents. I was living at another woman's place. I was tenant like her. Then my uncle did not pay his lease. The woman her sister did not pay her lease. I settled [with my uncle] and her sister settled with her...remove your things. Lock the door. Then...I stayed with him, I told him to pay his rent or he will lose the house. They did not pay they lost the house. They put a lock removed all our things. Lost the house. When the police force left I broke the lock and settled in...)

Cité La Mivoie developed and expanded with the descendants of these settlers who across generations married among themselves and constructed their houses in the *Cité* thus forming an extended clan with residents being linked by kinship and descent as illustrated by the family tree of the Louis Horace Albert (chart 7).

island. By definition, a camp is a temporary settlement but in Mauritius, they became almost permanent in sense that when some moved out of the huts others moved in their place.

The camps and villages were not static social units but on the contrary, they evolved with the economic and social life of the region. They were an open system in that there were social exchanges between them such as people moved from one camp to live in another because of job opportunities or after marriage. They formed an extended family in that they were kindred but developed fictive kinship as well in the sense that they considered themselves as forming 'a family' crossing religio-ethnic barriers.

The Labour Ordinance of 1922 provided that estate owners had to provide housing facilities to the labourers employed on estates. In keeping with the testimonies, this practice continued beyond the abolition of the indenture system in and were incentives for people from neighbouring regions such as a Cascavelle and Henrietta and sometimes as far as urban regions to come and work for the estates. The main incentives mentioned in the interviews were wood to construct houses, plot of land to farm and the possibility to have their own gardens for subsistence.

From the oral testimonies gathered and during the site visits the camps listed below were identified. The memories of these camps are still alive in individual and collective memories, as there has been transmission across generations. For example, the son of Olivier, one of the elders in the locality, stated that he learnt the name of these places and of places in the Black River Gorges from his father.

The respondents identified the following sites of settlement as constituting their local heritage. The heritage significance are specified in the testimonies:

1. *Kan Kadoc*<sup>71</sup>

It was located on private land at the south end of the *Salin Pilot/Koenig* near a pond. There were Creoles, Hindi speaking and Marathi-speaking people who used to live there.

Emilienne mentioned that a man named Papa Zen used to live in this camp near a kalimaya.<sup>72</sup> Unfortunately, we were unable to crosscheck her statement or to identify the location of the camp.

2. *Kan Dharma or Brize Dharma:*

It was located on the estate land of Mr. De Senneville. It was named after a man named Mr. Dharma who used to live there.

...Donk ti ena apre ti koz enn kan kan Dharma ? Saem Dharma sa dan kote sase mem sa Kot drwat letan ou ale kot larivier dan de kote sa wadir dan kote misie Senneville la. Kifer Dharma ein? Saem saem bann Bombaye ti reste saem zot ti fer zardin Saem apel sa Brize Dharma Dimounn la ti apel Dharma. Brize Darma? Wi Kote misie Senneville...<sup>73</sup>

(Eng. trans:...So after there was you talked of a camp Dharma camp? Dharma it is on hunting ground on the right side when you go to the river it is on Mr. De Senneville side. Why Dharma? It was the Marathis who lived there they were gardening it is named Brize Dharma the man was named Dharma. Brize Dharma? Yes on De Senneville side...)

3. *Kan Listo:*

It was also located on the estate land of Mr. Ramdenee near College Saint Esprit and the Village Bougainvilliers. According to Antonio, there was a public tap in front of the camp.

Unfortunately, because of lack of time we were unable to investigate whether there are any links between the name of this camp (Camp Lousteau) and Mr. Lousteau.

...kan Listo...Wi...sa ve dir li ti ekzakteman dan la...vilaz Bougenville...Wi me selman ti ena bann tipti lakaz, ti lakaz kaka vas...me kan sa kan la...ki period sa en? sa, en...avan 1960 sa...mai sakan la, li ti donk lor terin Ramdenee?..apre 60, boukou kan inn disparet, apre 63...tou bann kan inn ale?..Wi...me bann dimounn ki ti abit dan kan Listo, kot zonn ale?

ena dimunn inn bouze inn al anba, dan EDC...Rivière Noire. Apre ena dimounn inn al dan salinn lot kote la...<sup>74</sup>

(Eng. trans:...Listo camp...yes...that it is was located exactly in...Village Bougainvilliers...yes but there were small houses, houses made of cow dung...but when was this camp...which period? It was in...before 1960...but this camp it was on Ramdenée property?...after 1960, many camps disappeared, after 1963...all the camps disappeared? Yes...but the people living in Listo Camp where they moved? There are people who moved to Rivière Noire EDC. Then there are people who moved in the salt-pan on the other side there...)

...Apel sa kan Listo. Kan Listo ti ena 1 robine piblik. Wei ti ena 1 robine la. Kifer apel sa Kan Listo ein? Sa boug ki apel Listo la ki mo pa kone ki sanela sa. Sa ve dir kan Listo li kot kolez St Esprit? Wi...<sup>75</sup>

(Eng. trans:...It is named Listo Camps. Listo camp there was a public tap. Yes there was a public tap. Why it was named Listo Camp? The man named Listo I do not know who he was. So it means camp Listo was near St Esprit College? Yes...)

#### 4. *Kan Laserp* (Eng. trans. Billhook Camp):

According to Olivier, it was located near the office of Mr. Ramdenée and the salt-fish factory and there were many people living. For example, Emilienne mentioned that she was living in this camp.

However, Nicole mentioned that the forum, now Paolen industry (and previously the College Saint Esprit) was constructed on the site of *Kan Laserp*

...bann kan li pou koumens zis apre sa gro pie tamarin la...Donk kot ti ena pie tamarin, si mo kompren byen, ti ena enn kan?...Wi. E lot kote ti ena bann travayer pou misier De Senneville, apre ici la...kot en fas la, sa mem ti apel kan laserp...mai ena enn lakaz blan la, pou li sa?...b, bann la tinn mont sa ti ena de trwa...plisir zafer inn fer endan laba. Zonn fer mem la foil, zot fer...zot inn fer forum, wi zot inn fer forum...enn momen done lekol saint Espri ti bouz la, parceke lekol pa ti enkor pare. Apre maintainan zot fer potri...kan monn kumens travay dan bwa lera monn al kone sa terin la ti pou De Senneville, mai mo pa ti kone avan terin la, pou ki sanla ti ete. Ti ena enn bann pie, gro gro pie casi ladan, parceki mo kone kan monn fer sarbon la, la kan monn kumens fouy later, pou bann morso porcelain inn kase...<sup>76</sup>

(Eng. trans:...the camp started just after the big Tamarin Tree there...So if I understood where is the Tamarind Tree there was a camp?...yes. and on the other side there were Mr De Senneville workers, there here...in front there, it was named *Kan Laserp*...but there is a white house it's for him?...people built it there were two three...many things they did in that. They did a market, they did a forum, yes they did a forum...at a certain period the St Esprit College moved there, because the school was not ready. Now they do potteries...When I started to work in the wood then I learnt that this land is for De Senneville, but I did not before for who the land was. There were big Cassis trees inland, because I learnt that when I made charcoal there, when I started to dig the soil, [saw] broken pieces of porcelain...)

Photo 7 Location of *Kan Laserp*

Source: TJC/6/AC/SiteVisit/ PH 5/P/LaMivoie/15June2010

5. *Kan La Salin or La Salin* (Eng. trans. Salt-pan Camp):

It was located at the entrance of Pilot/Koenig salt-pan. Since the salt-pan was sold to Beachcomber, the families living in this camp will be delocalised next to Village Bougainvilliers where *Kan Listo* was located

...Nou ti ena o mwin enn 8-10 lakaz par la non? Anviron kot Parsad lot kote kot Parsad ti ena André kot Parsad anba isi apre ler la vini tiena bann Pierre ti ena Dev seki bann lakaz seki ti ena Pierre, Dev, Pablo ti ena nou mem ti ena Selvi Coco...ti ena bann lakaz bann Cocoy...Apre par isi to ti gagn lakaz Cynthiers be avan lakaz Cynthiers to ti gagn bann Rosida bann bonfam Rosida ti reste...Kot soz si ti reste par la ta? kouma apel la? Bonom Grappener...Ti ena plizir ti ena 1 kan ti la...<sup>77</sup>

(Eng. trans:...There were approximately 8-10 houses there no? approximately where Parsad [was] on the other side where Parsad [was] there was André where Parsad [was] down over there later there were the Pierre there was Dev the houses that existed there were the Pierre, Dev, Pablo ourselves there was Selvi Coco...there was the house of the Cocoy...Then on the other side here there was the house of Cythiers but before the house of Cynthiers there the house of Rosida old woman Rosida was staying...Where [what's his name] was staying there? What is his name? Old man Grappener...there were many there was a house there...)

6. *Kan Bombaye*:

It was on Ramdenee estate and named such because Marathi-speaking Indo-Mauritians were living in this camp and they used to organise *danse bombaye* also known as *gran danse* (a traditional Marathi dance). A man named *Bonhom* Ganse was living there with his family who used to organise this traditional Marathi dance.

...Saem sime gorz, apel Kan Bombaye, ti ena danse Bombaye laba...Dan sime gorz?...Danse Bombaye? Wi. Ki ve dir sa? Ban grann danse Ti ena enn bolom ti apel bolom Ganse saem ti organiz sa bann danse la Dimounn ti res pre dan sa sime gorz la. Kisanla ki ti pe res la ein? Saem mo pe dir ou ti ena enn bolom ti appel bolom Ganse ti fer sa danse la. So bann fami tou ti res laba...<sup>78</sup>

(Eng. trans:...It is Black River Gorges Road, named *Bombaye* Camp, there was *danse Bombaye* over there...In Black River Gorges Road?...*Danse Bombaye?* Yes. What it means? *Gran danse* there was an old man named Old man Ganse who organise these dances people stayed near in the Black River Gorges Road there. Who stayed there? That is what I am telling you there was an old man named Old man Ganse organised these dances there. His family stayed over-there...)

7. *Kan Maraz* (Eng.trans. Maraz Camp):

It was located in front of the shop named *Trwa Bra* in *Karo Maraz*. It was named after a man named *Bonhom Maraz*. (See Economic chapter)

8. *Kan legliz* (Eng.trans. Church Camp):

It was near *Sime bef* (Eng.trans. Cattle Road)

...Saem ti ena kan la...ti apel soz kan Legliz. kan legliz ? Wi. Zis apre legliz sa ? Wi sime la monte vinn ver kot Pon Michel la dan verze mang la Ti ena enn kan la ti ena dimounn ti reste Lerla zot apel sa sime bef vinn ver la...<sup>79</sup>

(Eng. trans:...there was a camp there...ti was named Church camp. Church camp? Yes. After the church? Yes the road goes up to Michel Bridge there in the mango orchard there was a camp there were people living there then they named it Cattle road comes here...)

Photo 8 Location of *Kan Legliz*

Source: TJC/6/AC/SiteVisit/ PH 6/P/LaMivoie/15June2010

9. *Kan Disabl* (Eng.trans. Sand Camp):

It was located behind the shop named Li Mo Yo and was on the estate land of the Maurel Family. Cité La Mivoie was constructed on the site of *Kan Disabl*. It was composed of approximately three to five families namely the Faron Family, Auguste Family, Louise Family and Joseph Family that were living there and were working for the estate.

...Me pa ti ena bann kan kouma kan kan lakol kan disab? kan disab kot simitier pa derier la boutik limoyo La ou gagn kan disab li par lor bor lamer laba...Donk li derier la boutik limoyo. Wi Li apel kan disab...<sup>80</sup>

(Eng. trans:...There were not camps like Glue Camp Sand Camp? Sand camp near the cemetery at the back of Li Mo Yo's shop there you have Sand Camp it is on the seaside over there. So it is at the back of Li Mo Yo's shop. Yes it is named Sand Camp)

Photo 9 Location of *Kan Disabl*

Source: TJC/6/AC/SiteVisit/ PH7/P/LaMivoie/11May2010

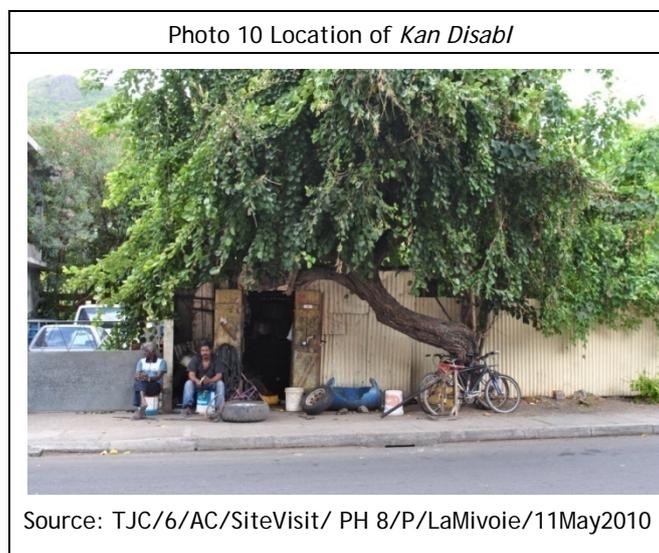

10. *Kan Robine* (Eng.trans. Tap Camp) or *Kan Lakol* (Eng.trans. Glue Camp):

It was first named *Kan Robine* because there was a public tap in front of the camp. Later on, when the tap was removed, it is now named *Kan Lakol* because there was a *pie lakol* (Eng.trans. Glue Tree) in front of the camp.

It is located opposite of Li Mo Yo's shop and adjacent to St Augustin Church. The Levailant family has been living there for generations.

....me an fas la boutik Li Mo Yo la, lor kote drwat sime, kan ou trouve ena bann, zafer inpe krem krem la, komen li apele la? be sa, sa mem ki ti apel. Ti apel sa kan Robine, nou. Parski zis, kot sa ti ena tol la-la, ti ena enn robine piblik. A kote Jean Luc Bar la? Wi. Ti ena enn robine piblik la. Preske tou dimounn ti vinn plin zot delo la. Be sa bann dimounn la, la mo krwar sa bann ki pe reste la se bann katriem zenerasion ki la...<sup>81</sup>

(Eng. trans:...in front of Li Mo Yo's shop there, on the right side of the road, when you see the cream-coloured things there, how is it named? This, this is what was named Kan Robine. Because just where there are the iron sheets there was a public tap. Near Jean Luc Bar there? Yes. There was a public tap. Almost everyone came to fetch water there. These people I think are the fourth generation living there...)

#### 11. *Kan Diosez*:

It was located at the north entrance of the village. Nicole knew people who have lived there for approximately 40 years and in the eighties then were displaced in longhouses near the cemetery and other in the *Cité* when the church, apparently, sold the land.

...kan Diosez, li ti koumans kot Manorama la, li monte tou sa la. Wi. Ver la montagn ? Wi. Ver la montagn. Enn parti ti ena bwa, enn parti ti ena bann dimounn ki ti rant la kouma bann squatter. Zonn fer bann lakaz, zonn reste, ena dimounn finn res la byen lontan mem. Ek apre finlaman sa inn bizin vande, kan linn vande, bann dimounn ki ti res la, zot ti nepli trouv zot ena plas. Finalman ti aranz enn lonzer...ti aranz sa laba, opre simitier, pou ki sa bann dimounn la kapav reste avan ki zot inn gagn lakaz dan Tamarinier. Mei kan Diosez ti lor terin kisanla? Kan Diosez! Be mwa monn konn sa terin la ti appartenir a la Diosez mem...Apre sa mo pa kone. Mo pa tro rapel ki bann dimounn kinn fer demars pou vann sa. Mei ki lane ti ena sa kan Diosez la en? Aahhh...Byen lontan sa parski mo konn ena dimounn inn res lor la o muin enn karant an. Mei kan ki lane nepli finn ena kan Diosez? Ver ki lane sa?...li kapav en 80-82...<sup>82</sup>

(Eng. trans:...Diocese started from Manorama<sup>83</sup> there and spreads up there. Yes. Towards the mountain? Yes. Towards the mountain. Part was woody, another part people were squatting. They built houses and stayed, there a people who stayed there for a long period. And later finally it was sold, when it was sold people who stayed there, they had no place. Finally a longhouse was built...was built over-there near the cemetery, for the people to stay before building the houses in Tamariniers. But Diocese Camp was on whose land? Diocese Camp! Me I know that the land was for the Diocese...Afterwards I do not know. I do know who sold it. But which year the Diocese Camp [existed]? Aah...long time that people I know people who stayed there for 40 years. But which year Diocese no-more existed?.It might be in 80-82)

Other camps identified in the region that have historical links with Cité La Mivoie:

12. *Kan Salin De Ravel* (Eng.trans. Camp De Ravel Salt-pan):

It was located inside the De Ravel salt-pan in Petite Rivière-Noire. When the camp was destroyed, families living there were delocalised to Petite Rivière-Noire Village and to Cité La Mivoie. The daughter of Nicole Papeche and her husband are the sole family presently living at the entrance of the salt-pan.

13. *Caredas*:

It is located on De Ravel estate at the north entrance of the village and at the road junction leading to Morcellement Carlos. It is before London Way Supermarket when going towards Tamarin Village.

There are approximately ten families living in *Caredas* that will be delocalised to a new residential area next to Village Bougainvilliers. They will be displaced because Mr. De Ravel has planned a new residential development at the actual location of *Caredas*.

The spaces identified are symbolic in that, for the respondents, they are symbolical representations of past life when land was conceived as an open public space. Before land was divided into *morcellement* (residential developments) the latter had not, yet, gained consciousness of the notions of private landownership and private propertyship.

It transpires from the interviews that, until the landowners erected walls and bared wires (visible signs of property delimitations), the villagers were not conscious of the fact that land (including land lying fallow) was already conceded (it was already divided in 18th century) and that they were

allowed to live there because either they were working for the estate or were squatters or had beneficial occupancy. It is only now that the owners are developing their land.

Today barbed wires and concrete walls have replaced open spaces and passageways are closed. The feeling of wide-open space that existed is missing and this affects the spirit and minds of those who knew what this meant: sense of freedom of movement and a sense of belonging and of collectivism.

...Avan, pa ti ena bann di fil, ki ti separ....koma dir bann plas avek bann montagn, bann dimunn ti kapav al en bwa. Apre ou kone o fur e a mezur, bann dimunn inn kumens vinn inteligen, b bizin met difil...<sup>84</sup>

(Eng. trans:...before there were no barbed wires, that divided...how to say places and the mountain, people could go in the woods. Afterwards, you know, gradually people were more intelligent, there was need to put barbed wires...)

The sites identified can also be reckoned as intermediary spaces between the local intangible and tangible heritage. They constitute the local tangible heritage as, firstly, they are tangible links with the past and their names, the story of these places and the myths and legends attached to them constitute their intangible heritage. Secondly, in contemporary Mauritius, they are perceived as vibrant bearers of past traditional spatial arrangements and organisations that date back to slavery and post-slavery.

For example, Antonio and Nicole narrated some myths and legends linked to *Basin Zigret* and *Rwiso Harrison* (Eng.trans. Harrison River) with some of them related to slavery. These myths and social realities, in keeping with Malinowski (Cited in Barnard and Spencer 2010), are functionally related and the former 'confirm, support and maintain the social state of affairs and provide an account of origins of people and their convictions.' They can be seen as a 'partial window' on the past.

### Some local legends: the legend of the Lougarou

According to Antonio, Nicole and Olivier, *Rwiso Harrison* was named after a man named Harrison who used to live near the river and drowned in the stream. They stated that there was a *Ti-Alber*<sup>85</sup> or a *lougarou* (Eng.trans. Werewolf) living near the stream given that the man named Harrison was a lycanthrope who had the ability to transform himself voluntarily in a wolf or a wolf-like creature.

Long ago when people used to organise sega nights near the river, he used to transform himself into a werewolf to threaten people.

...me appel sa rwiso Harrisson parski lontan bann la dir seki listwar mo inn tande sa boug ki apel Harrisson la li komdi koze bann la dir ti ena lougarou...li li fer so mesanste a sa lepok pou mwa ti arive enn zour li ti pran enn motosiklet linn roule linn bien roule me li pa inn konn arete pa kone kouma pou arete lerla letan linn tonbe li ti tom dan rwiso depi sa bann la inn konn sa pou mwa listwar kouma ti konn rwiso Harrisson me touletan.....bann la inn rakont nou sa...<sup>86</sup>

(Eng. trans:...I call it stream Harrison because long ago people said it is the story I have heard the man named Harrison as it is commonly said he was a werewolf...in the past he did this trick for me it happened that one day he took a motorcycle to ride he rode well but he did not know how to stop not knowing how to stop he fell he fell in the stream and since people knew that for me it is story how stream Harrison was known but every time...people told us that...)

Dédéré, a man who lived in the *Cité* was said to be a *lougarou* with the power to shape shift<sup>87</sup> into an object that could fly.

...Sa bann zistwar la kan mo gran mer rakonte ti extra li dir nou koumsa ti ena enn ti boug ti rest la dan site la mem non Dedere...li dir bann la ti kit Gabriel bann la ti al get sega Yemen Gabriel pe plere letan li vini Gabriel ti ena 2-3 so bann kamarad ler la li dir Gabriel koumsa ki to gagne to pe plere? Li dir bann la inn ale zot pa inn oule amenn mwa be rod enn bwat sardinn enn bwat sardinn alor zot tou pou rant dan bwat sardinn la me vre zot inn ale...Selman kan to rant la dan pa koze...Pa koze pa riye me zot aterir mo dir ou lontan vreman ti ena li enn zafer ki drol ki nou pa krwar pourtan bann dir ou ki ti ekziste...Zot sekre ki zot ena zot pou anvole zot pou ale enn avion si pa enn elikopter zot

anvole zot pou ale dan sa bwat sardinn la me si ou koze li eklate kot ou ete ou tonbe kot inn arive ou ou tom laba mem...<sup>88</sup>

(Eng. trans:...when my grandmother narrate those stories its extraordinary she told us there was a short man named Dedere living in the housing estate...she told they left Gabriel they went to see Segá [in] Yemen Gabriel was crying when coming Gabriel was with 2-3 of his friends he asked Gabriel why are you crying? He answered that they left and refused to take him that looking for a sardine box a sardine box for all to get in the sardine box and truly they went...but when you get in do not speak...do not speak do not laugh they landed I tell you long ago really it existed something weird that we do not believe but people say it existed...the secret they have they will fly they will go [in] a plane or an helicopter they will fly they will go in the sardine box if you speak it will explode where you are you fall where you reached you will fall there...)

Three other men were identified as being werewolves, *Bonhom* Gilbert and *Bonhom* Hanson and *Bonhom* Tataz Levaillant. The latter used to live in *Le Salin* and Antonio witnessed one of his transformations.

...Wei kan Senneville lot kote kot Ramdane labá pou nou al get televizyon...Sa lepok la enn zour nou pe ale nou trouv bonom la pe asize anba pie tamarinie be sa bonom la mo dir ou fransman si pie tamarinie la ti kot lantre La Salin ek pou al kot li to gagn letan fer 10 kou ale vini vinn Rivière Noire isi me li pa pou ankor rant kot li...Manier ki li ti marse mo gagn letan fer 10 fwa ale vini ek li pa kapav marse mem li ek sa zour la nou trouv li pe asize la sa temoin pa lezot dimounn ki inn rakonte se ki mwa mo inn trouve kan nou pe monte nou kit...Nou tand lisien pe zape nou trouv 2 far vini nou dir kapav loto nou tou avanse koste dan bor me letan 2 far la pase zis 2 far ki ena... Ki ler sa? Be ver 7h00 7h15 zis 2 far me li pena loto li pena okain transpor zis 2 far ki inn traverse ek lisien pe zape pe ale mem be sa temwayaz sa nou inn trouve...Non nou retourne derier letan nou retourne Tataz pa la dordinerman si Tataz ti marse letan nou retourne nou inn galoupe...<sup>89</sup>

(Eng. trans:...yes camp De Senneville on other side on Ramedenee over-there to watch TV...At that time one day we were going we saw the old man sitting under the Tamarind tree this old man I would tell you honestly if the Tamarind tree is there was at the entrance of the salt-pan and to go to his place you have time to come and go to Black River there ten times that we would not have reached his place...The way he walked I would have had time to come and go 10 times he could not walk and that day we saw him sitting there I witnessed not other people to narrated this is what I saw when we were walking we left...we heard dogs barking we saw two headlights passing there were only two headlights...what time was that? At around 7hrs - 7hrs15 only two headlights there was no car there were only two headlights that were passing and dogs were barking constantly this we witnessed...we came back on our steps and when we came back Tataz was not there usually if Tataz was walking when we came back we were running...)

In the local folklore, a *Ti Alber* is another term for a *lougarou*. The respondents used these two terms interchangeably but it seems that use the term *Ti Alber* to refer to people who had the power to shape shift into inanimate object such as a car where was the term *lougarou* is used to designate someone who had the power to transform himself into an animal.

As per the respondents' conception, a werewolf is an elderly man with an evil spirit who had the power of shape shifting. It seems that, these phenomena dates back to the period of pre-industrialisation and disappeared with regional development that brought changes in spatial organisation. These creatures nomore exist in contemporary Cité La Mivoie as they have disapperread with the previous generations and the conversion of the surrounding woods into concrete spaces.

### 3.Traditional Spiritual Practices

It is a commonly held belief that the slaves' cultures were eradicated by the slave system and by westernisation and Christianisation. However, it transpires from the testimonies that some practices and values survived under modified and syncretised forms.

Cultural exchanges and diffusion have led to a syncretism of African, Asian and European traditional beliefs and rituals. Different ethno-religious groups adhere to these beliefs and practices that cross cultural groups. They cut across religious background, ethnic groups and social classes. For example, some Catholics believe in the *gardyin lakour* (the protector of a place) and make offerings and prayers to the protector. Others wear *tabiz* (it is a talisman) to protect themselves from evil spirits.

Traditional spiritual practices and sorcery are still performed in the village but are threatened by official religious institutions, especially the Catholic Church and by modernity. Testimonies revealed that generational oral transmission has ensured the survival of some traditional practices

..kas koko devan lakaz sa inn trouve enn ta fwa sa...kouma la bouzi rouz boutey rum...Mwa mo inn ale la pa lwin servis de mor ver la bier byen glase lor tom sigaret matine pake biskwi di pain koko biskwi eski enn pake zafer enn pake zafer ena di vin rum ena dimounn aste zis enn boutey whisky pou al donn enn mor dan simitier ein...<sup>90</sup>

(Eng. trans:...I often saw broken coconuts in front of houses...like red candles and rum bottles...me I went recently the worship of the dead cold glass of beer on the grave cigarettes packets of biscuits bread coconuts biscuits soft drink many things there are many things wine rum there are people who buy a bottle of whisky only to offer to a dead in the cemetery...)

This heritage has been reduced to the status of an 'underground spiritual practice' with these rituals and practices not being prescribed by the official religious institutions because perceived as irrational and in the realm of superstition and considered as illegal according to the 1846 Law.

...Tataz Levaillant res La Salin be ti ena bokou bann gran dimoun ki zot ti konn bann zafer parey kouma la fwa dernie mo inn gagn enn zistwar li dir mwa ti ena enn boug ki ti la bann la ti apel mo inn bliye kouma li apel bann la ti li ti touletan guet dimounn pou travay kot li li be li ti inpe vang vang be enn zour mo krwar enn madam ti vinn travay li dir madam la mo krwar inn tous kit soz li dir li ou inn pran? Non li dir ou pa inn pran? Non landemin re vini kan madam la re rant travay ou sir ou pa inn pran? Pran sa di pin la manze don...boug la al travay li retourne madam la ankor manz so di pin mem... Kifer? Di pin la pa fini? Pa fini zamei setadir si madam la pa ti pran di pain la ti pou fini...resaman sa? Non a lepok...<sup>91</sup>

(Eng. trans:...Tataz Levaillant stayed *La Salin* there were many elderly people who knew things like that like last time I heard a story about a man that was there people called him I forgot his name he was looking for people to work for him he was wandering and one day I think a woman went to work and he said he thought the woman took something he asked her you took something? No he said you did not take? No the next day [she] came back when the woman arrived at work [he asked] you sure you did not take something? Take this bread and eat...the man went to work and came back the woman was still eating her bread...Why? The bread was not finished? Never finished because if the woman did not steal the bread would have finished...was recent? Not long ago...)

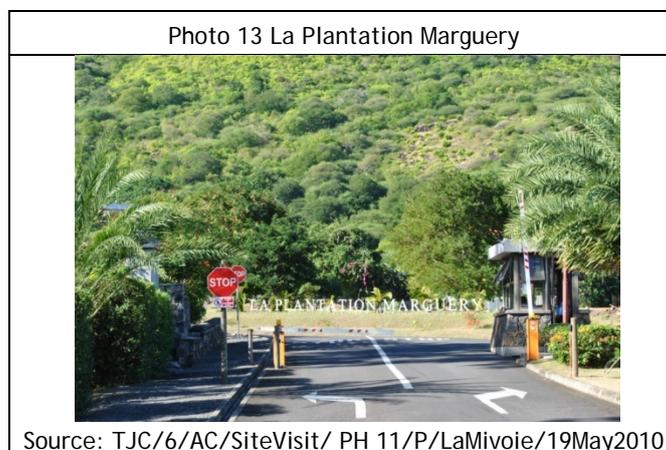

These spiritual beliefs affect the residents' conceptualisation and relation to the world and to space. Space is conceived as expanding beyond the visible and perceptible space to an 'invisible' space or supra-natural world inhabited by wandering spirits, ancestors' spirits and protectors that can be invoked when their assistance and protection are needed.

...Wi me plizir fwa mo inn trouv monn swiv Jesus...li desan ek so bisiklet li ale li mo inn trap so la main mo inn desann li so mama dir pa bizin trap li Pa bizin trap li zot kapav ale lesli parski so papa pe amenn li ek so papa ti fini mor...Non mor vivan ki pe rod dir...<sup>92</sup>

(Eng. trans:...Many time I saw and I followed Jesus...he got down of his bicycle he went I held his hand to help him get down his mother told me no need to hold him no need to hold him his father will help him you can go away leave him because his father is helping him and his father was dead...No wandering spirit meant...)

Modernisation and globalisation brought their loads of changes in spatial conceptualisation in line with modern value systems and mindsets. One of these spatial reconfigurations is the dividing and delimitation of space that led to changes in spatial arrangements and organisation and subsequently on the societal system and system of beliefs.

For example, all the respondents are against the gated residential areas that forbid them access to the mountain and the beach that they conceptualise as public spaces. For them, the mountain is a natural feature that cannot be conceived as a private property.

They feel that their freedom of movement is being violated. They do not understand how it is that *nou montagn* (Eng.trans. Our mountain) *nou la plaz* (Eng.trans. Our sea) have been privatised when this land belongs to all Mauritians.

In fact, in the past, they were open spaces and the mountain and the sea were their 'nurturing mother' that fed them. These concrete spaces are full of memories, as they were living spaces around which webs of association, significance and cultural practice were spun<sup>93</sup>.

...mo krwar ena bann landrwa ki bann dimounn mem inn donn bann non, par zot mem. Parski, ti ena bann dimounn vinn la...ena tel zafer la, zot dir sa, apel sa non la, sa apel sa non la, sa apel sa non la mei mo pa krwar si pa li enn non ki ena lor enn kan...<sup>94</sup>

(Eng. trans:...I think there are places that people named, they took incentives to give names. Because there were people coming there...there is something there, they say, this is named so, that named so, this is named so but I do not think the name is on a map...)

They were social and cultural spaces and are culturally and historically marked, as they are inherent to the local history. In addition, they were named after either an individual's name or a natural feature or a physical object.

Camp life is a symbolical entity as well as a physical entity. During slavery, it was the only space that was not invaded by the slave owning class and few ventured in it. Indeed, we have few descriptions of slave camps by any traveller in the 18<sup>th</sup> century. The same can be observed for the *Cité* as few outsiders enter it and even officials and private persons (often of a different cultural background with their own prejudices) go in there only to do their business and leave. The *Cité* is a regeneration of the slave camp, after decades of being moved from camp to camp in the mid 19<sup>th</sup> and 20<sup>th</sup> centuries. It is an autonomous space and a cultural space fashioned by the people themselves. This spatial organisation must be understood and integrated in future policies.

The ritual presence of the slaves in the camps confers to the spaces their symbolism and heritage significance. It was a space shared by the slaves and they forged camp life with its idiosyncratic arrangements and organisation and inner-structures. This way of life was surely transmitted to the successive generations. Through these spaces the memories of the people who have disappeared remains alive in the collective memory through place-names or anecdotes linked to these spaces.

## 4.8 HISTORY OF SETTLEMENT OF CITÉ LA MIVOIE

Before 1960 there was a camp known as *Kan Disabl* at the actual location of Cité La Mivoie. About three to five families namely the Faron Family, Auguste Family, Louise Family and Joseph Family made up this camp and can be considered as the founding families.

The *Cité* was built on the site of *Kan Disabl* in 1960 after Mr. Maurel either sold the land or gave the land to the government.<sup>95</sup> The descendants of Mr. Maurel have refused to be interviewed.

...Donk seki ou apel aster la Cité La Mivoie, Cité Rivière Noire, li ti lor terin Maurel alor? Gouvernma inn aste sa bout ek Maurel in aste sipa in done pa kone. Avek tou dimounn monn tann sa. Wa in aste sipa in done pa kone. Donk ki lane linn van sa ein? Apre siklon Carol 1960 dapre mwa...<sup>96</sup>

(Eng. trans:...So what you name now Cité La Mivoie, Cité Rivière Noire, it was on Maurel land then? The government bought this plot of land from Maurel or he gave I do not know. I heard that from everyone. Whether was bought or given I do not know. So which year he sold it? After *Cyclone Carol* in 1960 I think...)

It is not clear whether during the first settlement movement; Indo-Mauritians also lived there or not. The exact number of inhabitants is also not known.

### First settlement movement:

According to Marie Suzanne Auguste and Emilienne, one of the two doyennes of the *Cité* and Nicole, there were 10 families that first settled. They came from the surrounding regions, namely, the Décidée Family and Hyppolite (or Hippolyte) Family coming from Yemen; the Louise, Jean Pierre and Toulouse families coming from *Salin Pilot/Koenig* and the Indo-Mauritian families such as Babajee, Rowjee and Jany who came from the Black River Georges.

...Zot non fami? Décidée, Hyppolite...Fami Louise, fami Toulouse, Fami Jean-Pierre. Sa ti par isi mem sa salinn koenig...Fami Albert...Fami Colfir? Sa si bann sorti inpe parlaba sa...Dir mwa avan 1960 ti ena bann indien ti abit isi ? Wi. Mo konn Bolom Pandid linn fini mor Nani mem inn fini mor, granmer Baba inn fini mor...<sup>97</sup>

(Eng. trans:...Their family name? Décidée, Hyppolite...Louise Family, Toulouse Family, Jean-Pierre Family. This was there Koenig salt-pan...Albert Family...Colfir Family? They too come from over there...Tell me before 1960 there were Indo-Mauritians living here? I know old man Pandid he is dead Nani also is dead, grandmother of Baba is dead...)

Some inhabitants left the locality because they moved elsewhere or they were evicted for non-payment of rent and settled nearby. They could not afford to pay their lease because of financial problems such as they were unemployed, underpaid and spent their meagre income on buying alcoholic beverages.

For example, the Aimée and Maison Rouge families who, as per La Mivoie Housing Estate site map 1998, were among the first settlers were no longer living in the *Cité*. However, there is a Maison Rouge family living in Tamarin Village.

...Boukou pann peye. Donk bokou dimounn inn per inn...Boukou inn perdi...Inn perdi? Wi. Me kot sa bann dimounn la inn al abite? Be ena kinn kite. Zonn ale? Ena finn kite inn al lwin lwin...<sup>98</sup>

(Eng. trans:...Many did not pay. So many people were afraid...Many lost [their house]...Lost? Yes. But where these people moved to? Some left the housing estate. They left? Some left and went far far...)

### Second settlement movement:

As stipulated in Section 26 of the CHA Ordinance No. 32 of 1960, a person who is granted a lease of a portion of Crown Land for occupying a building erected thereon in pursuance of a Cyclone Housing Scheme, the lease shall be registered.

Furthermore, as per Sections 36C and 36D of the Act, if a tenant or purchaser of a house erected under the Cyclone Housing Scheme owes to the Authority any rent or instalment and if the latter receives any relief or allowance under the provisions of the Public Assistance or the Family Allowance Ordinances, the Public Assistance Commissioner may deduct there from an amount not exceeding 50% of the allowances. Where the rent or instalment is in arrears, a warrant may be issued. This does not follow from before: as pointed out by Nicole, once someone was ejected from the premises, a member of his family settled in and transferred the rent in his name.

Indeed, Section 39A of the Act lays down that any person who unlawfully occupies or takes possession of the premises is deemed to be a squatter and a Court Order shall be issued for the latter to vacate the premises. If the person fails to comply with the order, he shall be liable, on conviction, to a fine not exceeding 2,000 rupees and to imprisonment for a term not exceeding six months.

For example, Mr. Varnanaden Veerapen mentioned that long ago *Sime La Jetée* (Eng.trans. Jetty Road) was an orchard that belonged to Mr. Lenfena or Mr. Rey Lenfena. People who worked for the family lived on this plot of land like his father who worked as Family cook.

When Mr. Lenfena divided his land, to build villas for sales on the left side of the road (known as La Balise), the former residents who could not afford to buy land were delocalised in the *Cité*. Those who had financial means especially the Marathi-speaking residents bought land such as Varnanaden's father.

The descendants of some of these families are still living in the housing estate and have peopled the *Cité La Mivoie*, namely, the descendants of the Auguste, Jean Pierre, Lahache, Hippolyte, Albert and Thousand families that have intermarried and have settled there for generations. Four generations of these families have been retraced in the *Cité* as explained in the genealogical report. (See Appendix 1)

Two types of migratory movement were identified, an inward and outward movement. Inward migration occurred when people moved from the surrounding villages such as Le Morne Village and from town and urban regions. The first is due to marriage as in the case of Jasmine's husband and Devi.

Outward migration occurred when people either left the *Cité* to settle either in the neighbouring villages or as far as in town or even abroad or through marriage such as Marie Michele Jean Pierre who moved to Tamarin Village. One of the daughters of Nicole Papeche lives in Reunion Island and the daughter of Mrs Jany lives in Baie-du-Cap.

Thus *Cité La Mivoie* used to be composed of fifty families with each family having an individual housing unit and plot of land. The number of residents amounted to approximately 500 people. Today there are five families related to each other living on the same plot of land either in the same housing unit or in individual housing units. (See Appendix 4)

The actual *Cité* population has been estimated to 5,000 people for an area of approximately 15,000 m<sup>2</sup>. Each housing unit is composed of a mean of four members. Based on the present birth rate (mean number of children per family unit is estimated to two) in approximately twenty-five years the *Cité* population has been estimated to 10,000. (See Map 2)

## 4.9 HOUSING CONDITIONS AND SANITATION

### Housing conditions

Since, in common perception, asset accumulation are reliable indicators of a person's wealth, the house in which a man lives indicates how wealthy he is and is a visual symbol of social mobility and especially up-ward mobility. Housing conditions are indicators of social status with house structures and construction materials functioning as wealth markers.

Long ago, social and economic stratification were less complex and there were mainly three types of houses, straw or aloe houses for the working classes, wooden houses for the wealthier classes and corrugated iron-sheet houses for medium income families.

However, post-modernisation societies, on one hand, are more stratified with social inequalities being more accentuate. On the other hand, new modern construction material and technologies were developed and houses, although formerly less important, as well as property ownership, became indicators of socio-economic mobility and of social and economic status. In contemporary Mauritius, people tend to be categorised based on their house's state of repair, design and superstructure.

In line with the respondent's testimonies, the wealthier residents are property owners who live in one or two storey concrete houses and who spend money in maintenance of their property. The 'poor' are those who live in shattered corrugated iron sheets houses.

...Be apre si enn dimounn inn gagn enn terin, li fasil, li travay li mont enn la mezon lor la. Be si linn finn gagn terin, be sa mem enn gran zafer. Konpran be la aster li bizin amelior so la vi, li travay li ranz enn la mezon, li gagn enn la mezon an beton pou li...Me koma mo pe dir ou, ena bouku kapav pa interese pou zot fer lavansman. Zot atann koma dir tou letan ler...<sup>99</sup>

(Eng. Trans.:...But afterwards if someone got land, it is easy, he works he builds a house on it. But if he has land this is a great thing. [You] understand but now he needs to improve his life, he works and build a house, he has a concrete house for him...How would I tell you, maybe there are many who are not interested in progressing in life. All the time they wait...)

Photo 14 House of Jasmine Lalouette

Source: TJC/6/AC/SiteVisit/ PH 12/P/LaMivoie/12May2010

Housing conditions and life styles are visible symbols of this internal stratification and internal socio-economic inequalities in Cité La Mivoie. Those who are 'better off' and who are landowners have either pulled down the asbestos houses and constructed concrete houses or have kept the asbestos foundations and have extended or renovated their house.

...Ena enn bann dimounn sak sak lakaz ki zot inn, refer zot inn kase zot inn monte. Ziska zot inn monte me zot zot lakaz lamiyant li laem li li o milie...<sup>100</sup>

(Eng. trans:...there are people each house they renovated they destroyed and re-built. Then built but there asbestos houses are in the middle...)

Those who are financially disadvantaged still live in the CHA houses. According to Marie France, there are approximately 41 *lakaz lamiant* (Eng. trans asbestos houses) in the *Cité* that are a major concern for the residents.

Photo 15 House with asbestos panels

Source: TJC/6/AC/SiteVisit/ PH 13/P/LaMivoie/20May2010

From the time local inhabitants learnt that asbestos was a toxic material, the latter are more health conscious of the dangers of living in these houses. However, because of lack of financial means, they have no other choice than to continue to live in these residences and some of these constructions are falling in ruin.

Given that exposure to this fibre is risky for their health, they cannot renovate nor extend nor do any other construction works that are potentially hazardous. There is a shared perception that there is causality between asbestos and the following illnesses, asthma and cancer and high infant mortality in the locality.

Marie France testified that she learnt of the dangers of asbestos after the death of her ten-year-old son and she believes that this material caused his illness and death. But she finds these houses resistant to bad weather.

...Wi ek ena ankor dimounn pankor tire 41 lakaz ena pankor tire...Bien lontan ti bien lontan me pa ti le koz sa mei apre mo rapel lane misie Michel inn mor dokter inn dir koumsa linn gagn kanser poumon...nou tou dir be li ti bien sportif tou kouma linn kapav gagn kanser poumon me enn se sel rezon...<sup>101</sup>

(Eng. trans:...Yes there are still people who did not remove there are 41 people that have not yet been removed...it was long ago it was long ago but did not want to talk about it put afterwards I remember the year Mr. Michel died the doctor said he died of lung cancer...we all said he is sportive how come he had lung cancer but [there is] one reason...)

Furthermore, on the 28<sup>th</sup> April 2011, two days after the hearing organised by the TJC at Cité La Mivoie, two houses in the *Cité* took fire and presently four families are homeless. This tragedy was reported in the local newspaper and according to one of the residents; local authorities were to assist these families but in vain.

It seems that the fire started in the asbestos and corrugated iron sheets house of Amandine Jean Pierre, then spread in the condominium<sup>102</sup> of Steven Jean Pierre and in the adjacent house of Dorine and Michael Jean Pierre and the brother of Michael who was living with them.

Two weeks after the incidence, the authorities collected the asbestos wastes and the residents are worried of the risks of the long exposure to these wastes. The victims were supposed to be delocalised in a surrounding EDC residence but they are still homeless. Dorine and her husband are temporarily living in Island Sport and Amandine is living with her sister's place in the *Cité*.

According to the residents, so far, studies have not been carried out in the *Cité* to survey the impact of asbestos houses on the health of the *Cité* dwellers. The various pleas to the government, with the help of local media, have until now remained unanswered and they feel that local authorities are not concerned by the problem of asbestos in the housing estates all over the island.

...ou konpran, get parey kouma mo mem, mo ti kone delo pe ramase, apre lamiant enn move zafer pou la sante. Be lerla monn panse mo mem monn perdi de zanfan isi, dan sa lakaz lamiant la. Be lerla mo finn fer mo zefor, mo finn resi mont mo lakaz, monn kas lamiant la, mo pann get...gouvernman, ni CHA nanie, zis mo prop la sante, ek la sante mo bann zanfan, mo finn detwir li. Mo finn mont enn lakaz an beton...kan zonn desede? ...Enn la en 79, ek...enn en 81, 82. Donk ou ena de zanfan kinn desede, enn en 79, enn en 1981, ki laz zot ti ena? Wi. Ne, inn mor ne...<sup>103</sup>

(Eng. trans:...You understand, look at men, look at me i knew that water was stagnating, then asbestos is risky for the health. Then I thought that I lost two children here in this asbestos house. Then I made efforts I succeeded in building my house, I pulled down the asbestos [house], I did not see...government nor CHA no one, only my own health, and that of my children, I destroyed it. I built a concrete house...when they died?...one in 7...and...in 81, 82. So you have two children who died, one in 79, one in 1981, what was their age? Yes. Was stillborn...)

In fact, based on the CSO Vital Statistics for 2001, the Black River District had the highest infant mortality rate amounting to 17.3 but had the lowest crude death rate of 5.6. Mortality has always been high historically in this district.

### Housing constructions

The traditional CHA houses commonly known as *lakaz lamiant* were made of corrugated asbestos-cement sheets and the number of rooms varied from two for 'poor' families to four rooms for those who earned more money.

Today, next to these traditional houses we can see both concrete and corrugated iron sheets houses in the *Cité* as shown in Table 5.

Year of Completion	Concrete Wall and Roof	Concrete Wall and Iron or Tin Roof	Iron or Tin Wall and Roof	Wood Wall and Iron or Tin Roof	Wood Wall and Shingle Roof	Other	Total
Before 1970	51	57	11	0	1	10	130
1970-1984	103	23	10	2	0	1	139
1985-1989	82	20	21	1	0	5	129
1990-1994	63	3	24	1	0	1	92
1995-1999	90	13	29	0	0	2	134
2000	7	0	0	1	0	0	8
Not Known	10	4	0		0	0	14
Not completed but inhabited	2		0	0	0	0	2
TOTAL	408	120	95	5	1	19	648

Source: Central Statistics Office, 2000. Housing and Population Census, Vol. 1, Port Louis. Mauritius

According to Emilienne, the concrete houses were built around 1995 with present generations establishing their residence in the *Cité* and the past generations gradually improving their houses with their own savings and materials. Some are still gradually investing in improving their houses such as the son of S. Jottee Sookoo and Julien Albert.

Interviews revealed that respondents who mentioned that the CHA houses are vulnerable to cyclones and bad weather were not referring to the asbestos houses but to the ones made of corrugated iron sheets. The traditional CHA houses were said to be strong and resistant to cyclone.

Most of the families living in the *Cité* do not have sufficient income to build concrete structures. The gap between the *Cité* dwellers who are better off and those who still live in precarious conditions is obvious and this gap is widening with the construction of wealthier houses adjacent to the *Cité* - along the north border, *Sime Eucalyptus*, and south border - *Sime La Jetée* - and the development of new residential areas in the proximity such as La Balise Morcellement.

Given that housing conditions of the *Cité* dwellers is worsening, *Cité La Mivoie* can be compared to a slum and a 'ghettoisation' effect can be observed with accentuation of social and economic disparities.

### Spatial Organisation

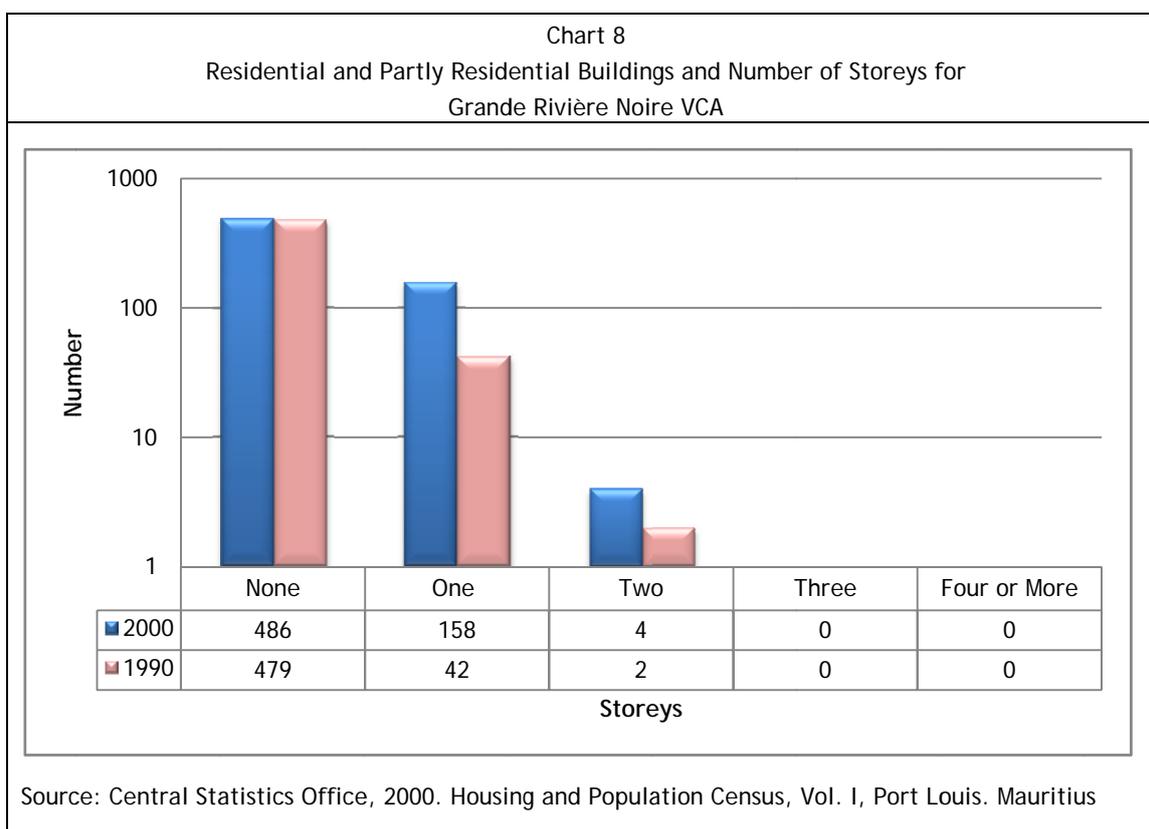

Even though there are fixed visible boundaries (the roads act as spatial delimitations) that delimit the housing estate, peoples' conceptualisation of the *Cité* extend beyond these delimitations. Taking the cardinal points as reference, the *Cité* extends from South to North with house number one located in *Sime 4 saison* (on the south periphery) and ends *Sime Eucalyptus* (on the North periphery) it stretches from east (from the main road) to west (ending *Sime Colonel Dean*). (See Appendix 6)

In the collective mind the spatial delimitation of the *Cité* extends to *Sime La Jetée* (which is after *Sime 4 saison*) because of its proximity with the housing estate. However, as we shall see later in the report, land along *Sime La Jetée* is private land and the living conditions of these landowners are different from that of the *Cité* dwellers.

The CHA houses varied from two to four rooms with separate kitchen but no bathroom. There is disagreement on whether the houses were delivered with toilets or not.<sup>104</sup> The spatial arrangement inside the houses differs and fieldwork uncovered the correlation between household spatial arrangement and types of construction. The housing patterns as illustrated in Chart 8 beneath vary

from detached single-unit dwellings to multi-dwellings ranging from one storey to two storey houses. But in the *Cité*, asbestos and concrete single-detached homes prevail with few two-storey dwellings.

In the renovated houses and recent constructions, the toilet and bathroom are integrated within the main house whereas in the typical CHA houses, they are independent units outside the main house and made up of corrugated iron sheets. For example, in Nicole Papeche house, the toilet is an independent unit in the courtyard. However, in her son's house that is a recent concrete construction, the toilet is found in the house. These are traditional arrangements compared to modern arrangements.

Spatial organisation of Cité La Mivoie and spatial arrangement inside houses changed overtime with the family generations settling in the *Cité* and family organisation following ambilocal residential pattern.

People who cannot afford concrete houses or to build multiple storey houses tend to either build condominiums or single units on the same plot of land which results in courtyards being almost non-existent or relatively small. For example, the children of Emilienne have built individual housing units on her plot of land.

But, wealthier people can afford to build one and two storey concrete houses with children usually building on the top floor such as the son of Mrs Sookoo who is building one storey on his parent's house where he lives with his wife and children.

In the past the spatial distribution and domestic organisation were different; people had individual houses and did not live so close to each other and had large courtyards. In addition, there were no visible separations. Domestic organisation as well changed with spatial arrangement inside the house changing with family expansion as indicated in the testimony of Mrs. Devi quoted earlier.

For example, the concrete houses are composed of multiple rooms ranging from two to four (excluding kitchen and bathroom). But in the asbestos and corrugated iron sheet houses, there is problem of space as the size of the houses is too small for the family. There are not enough rooms

for the families of minimum four members. Children and parents sometimes share the same bedroom thus encouraging 'promiscuity'.

In the *Cité*, spatial arrangement problems negatively affect children cognitive development and socialisation process in that they are detrimental to their physical, mental and social development and well-being.

The home remains children's first learning environment and the family one of the main socialising agents. However, it was observed that children do not have their own space and privacy; a space for them within their home where they can play, do their homework, organise activities and where they feel free and independent without the fear of disturbing other family members and adults.

## Sanitation

### Water and Electricity Supply

The houses were delivered without water, electricity and wastewater including sewerage systems. For example, when in 1967 Mrs Sookoo settled in their house they had to set up their water and electricity connections at their own cost.

The residents did not receive any financial aid from the government to install their own water and electricity system and sewerage system including toilet and bathing facilities. Not everyone could afford to pay the installation and connection fees for facilities.

In 2011, there are still houses with no water and electricity supply and no toilet and bathroom as indicated in the Tables 6 and 7 below. Most families do not have the financial means to install a water tank and thus rely on running water. In times of drought and water cuts, they face problems, as the water supply is irregular and rely on the government water facilities.

These people use various lighting methods such as oil lamps, gaslights, candlelight, petrol-lit and torches. For cooking, they use either gas cooking or wood cooking or charcoal. Gas, as per Chart 9, is the preferred cooking fuel. The kitchen as shown in Table 8 is sometimes separated from the main unit as a preventive measure in the event of a fire outbreak.

Source: Central Statistics Office, 2000. Housing and Population Census, Vol. I, Port Louis. Mauritius

There is a problem of water and waste disposal in the *Cité* that cause environmental population with the residents living in unhygienic conditions. It was observed that residents used their back yard as a dumping ground: domestic waste littering the yards.

Photo 16 Backyard Used as Dumping ground

Photo 17 Nappies on the roof

Source: TJC/6/AC/SiteVisit/ PH  
15/P/LaMivoie/20May2010

There is a problem of water disposal because the 'drains' do not drain as in *Sime Eucalyptus* there is a problem of stagnating water because the grading portion of the drain was not correctly measured. In addition, people urinate in the drains and use the canals as dumping that cause problems of air pollution and mosquitoes that are health hazards.

Mrs Devi quoted before testified that the CHA houses were low houses and in times of heavy rain the houses were flooded. She pulled down her asbestos house, elevated her foundation and renovated her house to remedy the threat of stagnating water.

#### Toilet and Bathroom Facilities

According to Marlana and Father Jean David, there are still people who go to the river to bathe and wash their clothes. Others collect water from their neighbour's house or from the river. In the past, they fetched water from public taps.

...Vous savez il y a toujours des gens à Rivière Noire qui n'ont pas de 'toilet', qui font leur besoin dans des sacs en plastique...ça existe à Rivière Noire dans la cité. Vous savez qu'il y a aussi des gens qui aillent faire leur besoin dans la cour, là bas...<sup>105</sup>

(Eng. trans:...You know there are still people in the housing estate that do not have toilets, that defecate in a plastic bag...it exists in Black River in the housing estate. You know that there are also people who defecate in the garden, over there...)

In the 1960s, toilet system consisted of pit latrines. It consisted of a hole in the ground and inside which, sometimes, there was a drum and above a square wooden sheet as toilet cover. When the drum was full, they covered it with soil and then dug another hole.

...Non pa tiena tiena enn pik...ou pa kapav asoir si ou sorti la tou sa loder la...Wi wi latrinn apre...met drom pa met drom krab la nek grain ladan...fini rampli...Abe bizin met...si ou fouy li lorla ou mete koumsa ou touse li lorla li fini bouse net ...<sup>106</sup>

(Eng. trans:...No there were no [toilets] there were pits [pit latrines]...you cannot go out at night it was smelling [bad]...yes yes latrines then...put a drum [if] do not put a drum crabs fell in it...would be full...you had to put [a drum]...if you dig it [the soil] you put it like that you touch it it would be full...)

Although, flushing systems are most common nowadays, there are still people using pit toilets as indicated in Table 11 below. Those who have no toilet either go to the public toilet in the churchyard or in the woods.

Poor sanitation is a health hazard. Open defecation and poor access to clean water are an affront to human dignity in modern Mauritius and should be eliminated. Changes in people's behaviour and elimination of bad sanitary practices can be achieved with the required education combined with political will and mobilisation of civil society and of resources.

#### 4.10 LAND

##### Property ownership

Under Section 28 of the CHA Ordinance, 1960, people whose houses were damaged or destroyed by a cyclone could either buy or rent a CHA house or benefit from financial facilities provided by the Authority as long as the applicant satisfied all the eligibility conditions for assistance such as that the person annual income did not exceed 10,000 rupees and did not have sufficient financial resources to build a house of the CHA type. He had however to provide evidence of ability to pay the monthly charges.

Even though the CHA provided the opportunity to low income earners to be house owners, in Cité La Mivoie many people could not seize this opportunity for various reasons and most of them were and are still tenants. The main reason put forward by the residents are lack of financial means.

Testimonies diverge as to the cost of the lease. Some residents like Marie Arline, Emilienne and Mrs Sookoo stated that they had to pay a rent and a lease that amounted to approximately 23 rupees in 1962.

Others like Mrs Sookoo mentioned that when they settled in the *Cité* in 1967, there were no Hindi-Speaking Indo Mauritians. They registered for a CHA house and paid a monthly lease of 24 rupees for the land and house, then 12 rupees per month and in 1982 under the governance of Paul Bérenger the rent was increased to 48 rupees per month.

Julien Albert stated that in 1963, the Government built the CHA houses and his father had to register to the CHA to get a house. There were approximately 23 houses and people signed a contract that initially stipulated that the rent was 12 rupees per month but afterwards the terms and conditions of the contract were often modified and the lease was reviewed upwards to 23

rupees per month. As long as they were tenants, they were not allowed to renovate nor extend their house.

While some of them are still tenants, others like Mrs Sookoo became house-owners in around 1989. She bought her house for approximately 5,000 rupees and, in 2008; she became landowner and purchased the land for approximately 4,000 rupees.

Renaud Louis also is a property owner. According to Emilienne, her *concubin* registered the house and land on his name only which implies that he is the sole owner of the property. In 1989, she bought the house for 500 rupees and they paid 4,000 rupees to become landowner in 2008. The land surveying cost 1,750 rupees and they paid 200 hundred rupees for two witnesses.

According to Devi in 2009, the Government gave facilities to people to purchase CHA houses and in the same year she purchased her house for 4,000 rupees, Julien Albert, and his mother as well are property owners since 2009.

...mwa Lane dernier. Gouvernman pann fek aplik enn lalwa la, ki tou bann site CHA, kouma dir nou kapav vinn proprieter ek 4000. be ena boukou kinn finn profit sa, inn gagn dezan de sela. Sa ve dir ounn pey 4000. pou vinn proprieter? Proprieter, wi, wi. E dapre ou tou bann dimunn dan cite inn vinn proprieter? non. Ena boukou pa ankor vini, me seki finn interese, finn fer zefor finn reusi. Me pa tou...<sup>107</sup>

(Eng. trans:...me last year. The government just passed a law that all the CHA housing estate, how to say that we can become owners with 4,000 rupees. May benefited from that, it was two years ago. It means you paid 4,000 to become owner? Owner, yes. According to you all residents in the housing estate are owners? No. there are many are not yet, but those who were interested, made efforts and succeed. But not all...)

Notwithstanding some residents are conscious of the importance of being a property owner, there are some people who have not yet gained this consciousness and others for whom access to land is utopia.

Albeit the purchasing value of the house and land were low cost and seemed rather symbolic, yet, there are still people who are property-less because either they do not have the financial means to buy a property or there are inheritance problems resulting from ambilocal residence patterns. For example, Nicole is not property owner.

...Me terin? Ou proprieter terin? Terin asterla mwa mo ena bann prosedir me Selman pe tarde akoz ban papie aster ki mo pe al aste terin. Donk tou sa letan la ou tipe pey terin crownland sa non? Wi. Ek komie ou pey gouvernman tou le mwa ? Mo tipe pey par lane sa...250. Komie gouvernman pe vann sa terin la? 10 mil roudi. 10 mil roudi? Non 2 mil...Ein ok 2 mil roudi. 2 mil selman ladan mo ena bann fre noter kouma mwa etan done si mo ena bann ser frer lafidavid tou sa. Ek ki superfisi sa ein rs 2000 la? Ki dimansion? 5 pers non 5 pers 4 pers sa...<sup>108</sup>

(Eng. trans:...But land? You owner? Land now I have to start proceedings but they are long because of paper now I'm going to buy land. So all that time you were paying bail it is Crown Land? Yes. How much you pay government monthly? Each year I pay...250 rupees. How much the government is selling land? 10,000 rupees. 10,000 rupees? No 2,000 rupees...Ah ok 2,000 rupee. 2,000 rupees but like me I have notary fees since I have brothers sisters [have] affidavit. What is the area for 2,000 rupees? Which dimension? 5 perches no not 5 perches it is 4 perches ...)

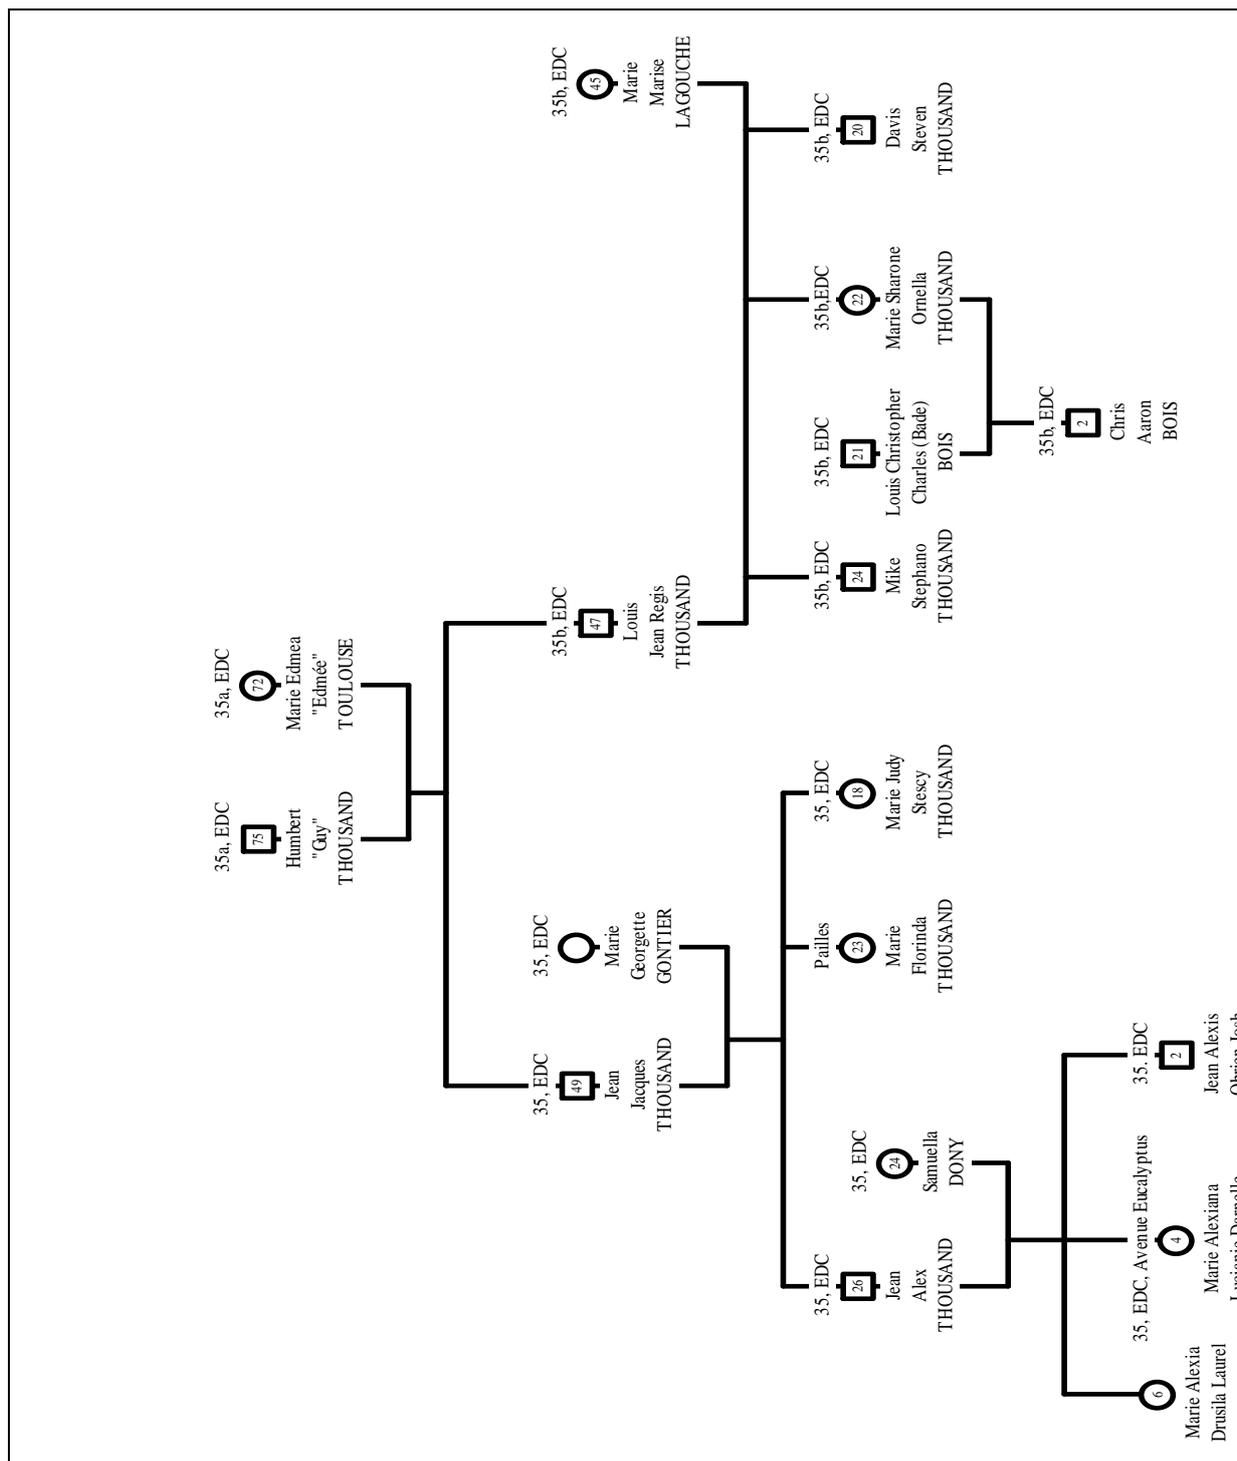

It is too easy to say that the *Cité* dwellers are lazy<sup>109</sup> and do not make efforts to improve their housing and living conditions. But, we should rather try to go beyond such stereotypical and prejudicial perceptions as maybe one of the reasons why some of them are still living in an insalubrious environment and in inhumane conditions might be that the tenants were not allowed to renovate their houses. Another reason might be that some people were not empowered to seize the socioeconomic opportunities compared to other residents because of, for example, lack of literacy and numeracy skills.

Besides, even though the families residing the in the *Cité* like the Jean Pierre, Thousand and Toulouse families stated being property owners, yet, given that they adopt ambilocal residence

patterns, they are house owners but not land owners as illustrated by the family trees of Jean Jacques and Louis Regis Thousand and of the family tree of Louis Horace Albert. (See Appendix 4)

In their conceptualisation of space, since for generations their family has lived on this plot of land and since they are not homeless, they consider themselves as being owners of the land on which they have constructed their house or on which they are living. In fact, this conceptualisation is derived from a collectivist approach, in other words, from their relation to the group and from the self-configuration and self-representation of their relation the space.

In fact, interdependency characterises Cité La Mivoie whereby the local residents are connected and interdependent. In this web of connections and interrelations, land is a shared and a common space that belongs to the *Cité*. However, given that the *Cité* does not exist in a vacuum and functions within a macro-system, the legal characterisation of land rooted in western individualistic terms is influencing the local conceptualisation and relation to land. In Contemporary Mauritius, the local residents are facing property ownership problems that are exacerbated by the present social and economic crisis.

Cité La Mivoie is a 'working class' low-cost housing estate with its residents living in relative poverty. They are low-income earners (they are either seasonal workers or unskilled workers or paid domestic workers such as fishermen, gardeners and masons), have poor living standards and face difficulties meeting basic social, health and nutritional needs.

For them, purchasing land is beyond their financial means. The low-income earners bear the burden of land speculation and increasing land value that deprive them of their entitlement to be property owners. They cannot afford to purchase either land or an apartment that they conceive as luxury assets. For them to be a property owner is a utopia.

Indeed, it seems that they conceive property ownership as an entitlement for 'others', the wealthy people and elite and not for 'us' the underprivileged. Consequently, they have no other choices than to adopt ambilocal residence patterns.

Equitable land distribution and access and enjoyment of full rights of property ownership are not being practised nor promoted with land being concentrated in the hands of wealthy people and the land market practices restricting access to property ownership to the low and middle income earners which implies that the latter's rights and opportunities to occupy and utilise land are being denied and infringed. They are considered as an insignificant market as they have limited or no spending power.

Such discriminatory practices are not contemporary practices and date back to colonial times when the *colons* were allocated large concessions that, were passed on to their descendants. It can be said that in post-colonial Mauritius and until now, discriminatory land practices are maintained and given the present local social, topographic and economic profile, such practices are deemed to be perpetuated.

Consequently, the latter are being further impoverished and maintained in the poverty trap. As Quan (2006, p.3) stated:

...Land is a capital asset offering opportunities for social and economic empowerment and thereby a springboard from which to escape from poverty. Secure rights to land are a basis for shelter, for access to services and for civic and political participation; they can also provide a source of financial security furnishing collateral to raise credit, as a transferable asset which can be sold, rented out... mortgaged, loaned or bequeathed. Moreover secure access to land creates incentives for the user to invest labour and other resources in it so as to maintain its value and sustain its productivity, and allow the user access to social and economic development opportunities.

In line with Carter (cited in Quan 2006, p.2003) 'equitable land access forms a sine qua non with up-ward social mobility, wealth creation, equitable wealth distribution and improvement of standard of living. There is a positive correlation between poverty reduction and land access as well as enjoyment of full rights of property ownership. They benefit household income gains, food security and serve as a safety net with investment effects whereby land assets provide a buffer against external shocks and frees up resources for investment e.g. in children's education; and the dynamic income distribution effects of more equitable land distribution across society.'

The low-income earners and middle-income earners living in Cité La Mivoie are enduring discriminatory land practices with land promoters targeting solely the wealthy classes - foreigners and high-income earners - materialised in the recent and upcoming luxurious residential developments such as Plantation Marguery, Les Salines Mont Calm in La Preneuse, Morcellement La Filature on Ramdane Estate.

With the exception of, Village Bougainvilliers and Morcellement Les Tamariniers that were built for the villagers that were displaced from De Ravel property and *Kan Diosez* respectively and a forthcoming *morcellement* for the inhabitants of *Caredas* who will be displaced, no other residential developments have been planned to solve the problem of lack of space in the *Cité* and for the 'poor' villagers that are facing housing problems in the surrounding localities.

Facing lack of access to tenured land of individual plots of land and prejudicial land practices to the detriment of the already vulnerable groups, the local inhabitants have no other choices than to squat others land.

### Illegal land occupation

As illustrated on the site map of La Mivoie Housing Estate, there is a private land belonging to the Li Mo Yo Family crossing the *Cité*. The respondents testified that for approximately 10 years about nine families namely the Jean Pierre, Joseph, Gentille and Mootoo (or Moutou) families have been squatting this land. (See Appendix 6)

...mo pa kone kouma linn aste terin la li sa bout...pe gagn kwinse la mo pa kone kouma linn aste terin la kouma linn fer sipa linn separe kouma pa kone kouma zot in fer sa lerla proprieter pe dir sa bout la tom so terin...pe gagn gro problem ar bann la fami la...enn bel

lepok zot reste. Banal...inn gagn a pe pre enn 20 inn gagn a pe pre enn 10 an pase li posibil. Enn 10 an parla...sinwa pe dir ki so terin li ariv par la. Mo pe anons twa enn 15 an a pe pre la...<sup>110</sup>

(Eng. trans:...I do not know how he bought this land this part...is stuck I do not know how he bought this land how he did whether he separated [it] how do not know how they did that then the landowner is saying that this part is on his land...having big problem with the families...since long then have been staying. They...its about 20 years it's about more than 10 years...about 10 years...the Chinese is saying that his land reaches there...I am saying about 15 years...)

The site number 3 of 286 m<sup>2</sup> and number 4 of 303 m<sup>2</sup> were allotted to the Joseph family and Jean Pierre family respectively and through generations they have been living on the same land. However, family expansion coupled with lack of space, they constructed on the Li Mo Yo land and have been illegally occupying this land for generations.

For the squatters since, on one hand, the land was left uninhabited and was used as dumping ground and, on the other hand, there was a problem of space in the *Cité*, it was 'normal' for them to occupy this land. They were facing space problems and for them squatting this readily available and unoccupied space was the practical solution to their problem.

Furthermore, it seems that there were no visible delimitations indicating it was private property such as the land was not fenced and there was no sign that trespassing was forbidden. In their spatial conceptualisation, this land was part of the *Cité* and belonged to the collectivity. They appropriated this land.

Even if they were conscious of the illegal nature of their actions (taking possession of a property), their right to housing and having a shelter overrode other legal concerns. But, the Li Mo Yo family has currently lodged a case in court to get back their land and the squatters will be expelled. Given their limited financial means to buy and even rent a housing unit, some of them have no other choices than to build a unit adjacent to their relatives' residence in the *Cité*.

These housing and land problems are one of the causal factors of tensions between families with some claiming the ownership of other's land. In addition, some residents have difficulties accessing their residence because others have built their house beside theirs and the latter do not grant passage to the former.

The high population density in the *Cité* exacerbates these tensions and hostilities are worsening since lack of space is becoming a major problem with future generations settling in the *Cité*.

### Land Dispossession

Field research uncovered cases of land dispossession by some of the local estate owners and some residents even mentioned that these dispossessions were made possible with the support of local authorities and politicians.

However, these testimonies should be considered with caution because the information were not cross-checked given that estate owners refused to be interviewed and thus it was not possible to verify and affirm these allegations.

The *Cité* dwellers identified two local families namely, the Colfir Family and Maison Rouge Family that were dispossessed of their land by the Maingard Family.

... ti ena enn fami Jany ki ti abit la...sa mem seki ou ti pe dir mwa la. Me sa terin la ti pou kisanla, kote drwat sime, kot ena Rwisso Creole tou sa la? zot dir pou Maingard. Pou Maingar ? pou Maingard, e mwa mo kone ti ena enn enn boug ladan ti enn bon partisan ki bann la ti pe dir, ki bann Maison Rouge. Me la fami Maison Rouge, mo krwar zot inn koumans fer bann demars, apre inn arete...<sup>111</sup>

(Eng. trans:...there was the Jany Family living there...that is what you were telling me. But this land was for whom, on the right side of the road, near Ruiseau Creole, it was for whom? They say for Maingard. For Maingard? For Maingard, but me I know that there was a man who

was a good agent and they said that it was for the Maison Rouge. But I think the Maison Rouge Family start their proceedings afterwards they stopped...)

According to Julien Albert, his grandfather on his mother's side, Joseph Plumedor Colfir, used to work for the Maurel family and as payment for service rendered, Mr. Maurel gave him a plot of land at the foot of La Tourelle du Tamarin Mountain. His great grandfather passed on the land to his mother Suzanne Colfir.

However, afterwards, Mr. Didier Maingard removed the four land markers and took possession of their land and Morcellement Les Tamariniers was built on the plot of land. Since they lost their papers during Cyclone Carol, they cannot claim back their land but Julien mentioned possessing a map showing the location of their plot of land.

...be terin la, kouma mo pou eksplik ou, pou inpe lor zistwar. Ounn tann dir terin pou Maingard, ounn tann dir terin, pou Colfir, ounn tann dir terin pou gouvernman. Me pa kone ekzakteman pou ki terin ete. Ok. Donk personn pa kone Cite Tamarinier pou kisanla? Non. Pou ki ti ete avan? Non. Seki mwa mo kone, tou recemen avan la konstruktion enn...la Cite Tamarinier ti ena bann la fami Colfir, ki ti pe marse osi, pou fer demars sa later la, lakaz la. Me petet la prosedir, ti ase lon, ki zonn Ki pann kapav kontign la prosedir inn les tonbe, zot ti mank inpe bann papye pou kontign la rout...<sup>112</sup>

(Eng. trans:...but the land how will I explain to you it is a little about history. You hear land is for Maingard, you hear that land is for Colfir, you hear that land is for government. But to know who exactly is landowner. Ok. So no-one knows to whom exactly Cité Tamarinier is? No. To whom it was before? No. What I know, recently before the construction...Cité Tamarinier there was the Colfir Family, that undertook proceedings to get this land. But maybe the proceedings were too long, that they could not continue and abandoned, there were papers missing to continue...)

The history of these 'dispossessed families', and especially of the Albert/Colfir Family who reside in the *Cité*, forms part of the collective memory of Cité La Mivoie. These family histories are still alive in the memories of the residents - all respondents mentioned having heard that these families were landowners and that they were dispossessed of their property even though some were more knowledgeable than others who did not know the detailed story.

Even if the Colfir Family did not undertake legal actions to claim their land, for these people, the individual memories of their lost land somewhat contribute to distinguish them from the others who are not landowners. This land is symbolic for the family members as it represents the life they could have lived such as better housing and living conditions and the status and facilities that people enjoy when being property owner.

In view of the fact that distribution of individual plots of land to slaves for farming activities was common practice in the later years of slavery<sup>113</sup> a question can be raised, were these families really landowners or was the land under usufruct and with time and attachment to the land, the descendants of these families appropriated it or conceived the land as being theirs?

Indeed, in line with Teelock (1998, p.171), such scenario was feared by the slave-owners who 'were apprehensive about giving slaves land to farm individually in the eventuality that they begin not only to develop a certain amount of economic independence but worse, in the planter's mind, begin to look upon the land as their own.'

Therefore, these alleged cases of land dispossession remain to be investigated to determine whether or not these families were actually disposed of their land and in instances that they were not the real owners, it is of utmost importance to understand the wherefore of their belief of having been disposed.

However, whether or not they were really dispossessed of their land, these stories of dispossession have a symbolical function for the local residents such as they represent the power struggle between the elite who have power, in this context, the Franco-Mauritians and the Creoles who have limited or no power. It reminds them of how the Creoles were and are still victims of prejudices and discriminated against. It can be said that the stories on land dispossession form part of the local legend.

These families were and are still victims of exclusion caused by structural social inequalities, inheritance constraints, historical nepotism and ineffective and expensive land administrations systems. It is the duty of the government to secure tenure of the vulnerable groups and provide reparation to the victims of discriminatory land practices.

#### 4.7 Social conditions

The local inhabitants are not protected from the influences of the capitalist and free market forces. Driven by the need to compensate for feelings of low self-esteem, they tend to overcompensate through material brazenness to prove their social worthiness by purchasing the best and most expensive brands.

Across generations, the Creoles have interiorised that they are second-class citizens, that their life is precarious and their future uncertain and that they should live their present life to the utmost. In contemporary Mauritius driven by capitalism, money is used as a defence mechanism to show off with the perception that material possessions are a means to claim, gain and define social status and social worthiness.

We should not forget that although the Creoles and the Indo-Mauritians have a shared history, yet, there are cultural and historical differences that impact on their present life such as differential opportunities and the Indo-Mauritians were allowed to maintain and perpetuate their traditional beliefs, values and practices.

Even though the Slaves Savings Bank existed and the apprentices bought land, the reasons put forward by Shirley why their ancestors lost their land are: lack of knowledge, training, and financial literacy, ignorance, illiteracy, they were not long sighted (they did not think of their future generations) and immediate gratification. For example, her ancestors were landowners in Piton and in Quatre-Bornes. The lands were transmitted across generations until they lost their land in Piton and her father sold their house in Quatre-Bornes.

...kan blan inn ale, inn, ena bokou blan landan kinn donn bann kreol, kinn donn bann esklav later. Inn dir zot, to pran li to travay li, to reste. Savedir li vinn pou twa. Se ki fe ki li pa konn lir, li pa konn narnye inn fou li ar enn kare later, ki li pou fer ar sa. Li pa kone ki pou met lor la, li pa kone kot pou al gagn lagrain pou met lor la, koma pou plante koma pou fer, lot kinn vini, bann lezot kominote kinn vini, li li kone li...li pa finn vinn enn bann esklav la, li finn vinn kokin li plito, parski li finn vinn kokin bann esklav. Esklav kan li ti nepli esklav, li ti posed kiksoz, me li pa ti kone ki pou fer ar sa, li pa ti kone kouma servi li, parski pandan tousa tan la, li pa ti al lekol. Li pann gagn formasion, kan linn sorti esklav, linn vinn lib, ant sa tranzision eklav lib la li pann gagn okenn aprantisaz, savedir letan linn lib, inn donn li enn kare later, ki pou fer ar sa? li pa pou kapav manz later, li pa pou kone kouma pou plante kouma pou met enn lakaz lorla. Se pou sa lezot kominote kinn vini, ki kone inn dir, to kone mo donn twa enn ti kas, to donn mwa ha. Ou kone, esklav viv li...sa pou mwa mo fer seki mo anvi- mo pa get mo zanfan ki pou arive ki pa pou arive demin...<sup>114</sup>

(Eng. trans:...when the whites left, there are many who gave [land] to the Creoles, who gave land to the Slaves. They told the latter to work the land and to live there. In other words, it is yours. But he [the slave] was illiterate, he did not know anything [and] gave him a plot of

land, what he would do with that. He did not know what to put on it, he did not know where to get seeds to grow, how to plant how to do, the others that came, the other communities that came, they knew...he [the other communities] did not come as slaves, he came to steal instead, because he came to steal the slaves. When the slaves were no more enslaved, he possessed things, but he did not know what to do with it, he did not know how to use it, because all that time [when slave] he did not go to school. He did not get training, when he was no more a slave, when he was freed, during this transition from slave to Freed he did not get any training, in other words when he was freed he was given a plot of land what he would do with that? He could not eat land; he did not know how to plant, how to build a house. That is why the other communities that came, that knew, said: I give you money you give me this [your land]. [With] money, he could buy food, drinks, but he did not know that when money is finished, it is finished, they [the whites] never explained that to him: that if he worked the land, he would sell [his harvest] that he would succeed, he did not understand that. At most he had 10 arpents of land, he sells 5 arpents, he uses the money he grew [cultivated the land] today he would have 5 arpents of land. But those who came abused him, did not tell him that, they just came just told him I give you some money you give me the land...my grandmother has 121 arpent of sugar cane [field] in Piton, at the last census it was still named Isor field. But, when my grandfather died, when we told her to start the proceedings, she did not want to hear about it. Because she does not know how to read, she said what she would do with that [the sugar cane field]? She will eat sugar cane all day, how she will plant and what she will grow? When the sugar cane has been harvested what will be done with it? She did not know. It means he [the slave] possessed, the slave owned. But she did not know what to do with it, she did not sell it, she did not do anything with it, she abandoned it...Like my father, you do not sell all your land, your whole house! We had a plot of land let say there was a big house on it, 6 rooms and 3 litchi trees...he sold the house...and he sold a big house like that in Quatre-Bornes town 185,000 rupees, until my death I will not forgive him 185,000 rupees. One month later a Chinese came and offered him 1 million, he had already sold [the house], which means, I think, I apologise for the saying but they [the descendants of slaves] kept this stupidity. It is like that they kept it. You know the slave likes it [this stupidity]...this is for me I do what I want I do not consider what will happen to my children what will happen tomorrow...)

There is an intergenerational transmission of need for immediate gratification that is a component of peoples' spending and saving habits. They are susceptible to marketing pleas to instant purchase as opposed to saving and investing for the future. Their preference for high status brands is a means for them to deconstruct the social perception that they are inferior. As mentioned in the previous chapter, even though they are low-income earners and are financially poor, in almost all houses including the iron-sheet houses that are falling in ruin, there are a high-tech stereo player and television set. For example, in the evening when walking in the *Cité* you can hear stereos playing loudly and almost all the residents including adolescents possess a mobile phone that they consider as being a necessity.

Besides, the elderly residents testified that when Cité La Mivoie was built, the environment was quiet and safe. Even though life was difficult and living conditions harsh, people were happy. Poverty is not a recent social problem, the region being renowned for being one of the poorest areas in Mauritius, it was part of their everyday life and was somewhat 'normalised' as they did not feel the weight of financial poverty as present days.

...Lontan site la li ti inpe, pli koul. Pli kalm. Pli respe. Be ester pena respe. Kouma dir... tou kalite figir dimounn ou trouve la, kalite loto aswar ou trouve. Ou...gagn per mem pou ou kapav sorti. Get mo bann zanfan mem kan zot tipe anba lontan nirport ki ler mo ti al get zot. Asterla kouma dir ou inpe tike ou trouv bann loto bann zom ladan. Pa kone ki zot ete. Ou pa kapav. E lester bann garson mem bannbbann zen zen fam ayo. Kouma mo pou dir sa. Zot pa respe zot mem. Zot pa pou respe ou...Zot bwar zot soule zot mars lor sime. Wi. Zot zoure. Zot pena rol...<sup>115</sup>

(Eng. trans:...Long ago the housing was a little more 'cool'. More respect. But now there is no respect. How to say...you see all sort of people, you see all sort of cars. You...are afraid to go out. Look when long ago my children were down over there at whatever the time I went to see them. But now you hesitate you see cars with men inside. You do not know how there are. You cannot. And now [not only] the young boys young women [too]. How I would say. They do not have self-respect. They will not respect you...they drink they are drunk they walk on the road. Yes they are vulgar. They have nothing to do...)

Although Black River is burgeoning, it appears that only part of the village and its population has benefited from the opportunities presented. Cité La Mivoie still facing many social, health and economic problems. (See Chapter on economic survey)

Other social and health problems identified during field research are:

#### **Alcoholism:**

Alcoholism is one of the main social problems in the *Cité* and is one of the causes of collateral socio-economic problems and disturbances such as noise pollution, insecurity, poverty and unemployment. Feminisation of alcoholism was also noted. For some people, daily excessive alcohol consumption is 'normal' and not a social problem. For them, alcoholism is a trivial issue. In the past shops were meeting places where men gathered in the evening after working hours. Shops are still socialising places but now both men and women as from a young age meet at the shop and drink with friends the whole daylong.

Photo 19 Children Drinking at Midday

Source: TJC/6/AC/SiteVisit/ PH 16/P/LaMivoie/12May2010

It seems that alcohol abuse is a problem across generations that can be explained by the fact that parents and the living environment are the primary socialising agents and children tend to reproduce the same attitudes and behaviour of their parents, neighbours, friends and other role models.

These children are socialised in dysfunctional families and social environments and learn that the behaviour and attitudes they observe such as consumption of drugs and alcohol and other violent behavioural patterns are normal. They grow up within a value system that somewhat normalises anti-social behaviour and mores. Normative social influences push them to adopt these behavioural patterns to be liked and accepted by their peers and immediate network. Non-conformity would imply exclusion and stigmatisation.

Normative social influences contribute to group cohesiveness and to a sense of group belonging and given that group identity primes over individual identity and pressure to conform is high in a closed system like Cité La Mivoie.

It appears that alcohol consumption plays an important role in the social life of the residents and is strongly associated with leisure time. All opportunities seem to be favourable for drinking and 'partying'. The problem of alcoholism is rampant.

Every day during fieldwork, we saw people on the roadside drinking and playing cards and dominos and in the evening's music playing loudly. One day during daytime, we even saw two women that were drunk and screaming on the road. The situation has worsened with children starting to drink from age of 13 and people being drunk early in the morning. With the exception of the nearby sea and the churchyard used as leisure grounds, lack of leisure and recreational activities and

infrastructures and of sport infrastructures are some of the reasons put forward for why children fall into alcohol abuse and drug abuse.

In line with Emilienne’s testimony, excessive alcohol consumption is encouraged by the local market as shops remain open and sell alcohol until late at night. *‘laboutik pena ler ferme. Pena ler ki zot pou vann zot labwason ki li 11 zer ki li minwi ki li kwa. Zot pe vann zot labwason. Be banla tante lorla. Pena disiplinn.*<sup>116</sup> (Eng. trans: the shops do not have closing hours. They do not have hours to sell alcohol beverages whether it is 11 hrs or midnight. They are selling alcohol. They are enticed. There is no discipline)

The Household Budget Survey (HBS) 2006/07 estimated alcoholic beverages and tobacco to 9.5% of total expenditure and estimated private household consumption of alcoholic beverages per annum 980 million rupees. But, from the observed drinking habits in the *Cité*, the percentage of household expenditure on consumption of alcoholic beverages in the housing estate is much more.

AS pointed out by the HBS 2006/07, only 35% of national consumption is captured at the HBS and therefore statistics do not reflect reality. It has been estimated from other sources that household consumption of alcoholic beverages and cigarettes represents about 80% of total sales in the country and thus an adjustment of 938 rupees has been worked out for the average monthly household consumption expenditure.

#### **Drug Consumption:**

When questioned on the problem of drug consumption and trafficking in the *Cité*, the respondents remained evasive. They neither denied nor admitted the magnitude of the problem. They acknowledged that there are young boys and girls that consume soft drugs especially marijuana but stated that there is no problem of hard drug consumption such as cocaine and ecstasy.

When asked where the youngsters buy drugs, they were equivocal stating, on one hand, that they find drugs in the *Cité* and on the other hand, that they buy them outside the housing estate. Only one respondent mentioned that she witnessed the traffic of Subutex<sup>117</sup>. A pill is sold for 800 rupees and half a pill is sold for 200 rupees.

...konsomasyon ek trafik tou le de...mo trouve ek mo lizie. Zot vinn lor la kroise la, zot fer kot sa monn trouve, dan mo la boutik mem, ti ena enn garson res anfin li res lao li montre nou, li dir gete madam get ki ena ladan...Be mo dir komien li koute pou sa? Li dir mwa, enn koumsa, ou kone komien koute sa enn konprime la, 800 li dir si mo vann kar ladan o fet vann par kar tou sa si ou vann enn kar ladan, ou gagn 800. Ena soz ou si enn sering. Wi ena sering osi, ena sa ganndia...<sup>118</sup>

(Eng. trans:...consumption and traffic both...I saw with my eyes. They stand at the crossroad there, they do [consume and traffic] where I saw, in my shop, there was a boy he resides uphere he showed use, he said madam look what is inside...And i asked how much it costs? He told me, one like that, you know how much it costs one pill, 800 rupees...he said if I sell one quarter of that in fact sell one quarter also if you sell one quarter you earn 800 rupees. There is a syringe also. Yes a syringe also, Gandia...)

During fieldwork, it was observed that it is the practice for youngsters to gather at road junctions in the evening, as from approximately seven o’clock, to buy and smoke their ‘joint’. During the day, adults were also observed to be heavily under drug influence. When questioned about their activities, they replied that they had been fishing early in the morning and that their working day was now over.

On several occasions, an outsider was observed coming into the neighbouring residential area to sell drugs. One of our respondents even hinted at this. A car was also observed regularly coming into the *Cité*, almost every day and sometimes more than once a day. Their car did not belong to a resident.

Two incidents were mentioned concerning scuffles in the *Cité* around 2000 between youngsters from another urban *Cité* of the suburbs of Rose Hill and those of Cité La Mivoie. It may have been related to drugs.

During our enquiry, various cases of burglary were reported in the *Cité* and surrounding residential areas. These cases could be drug related offences.

Albeit the residents are against drug trafficking in their locality, yet it seems that they minimise the problem of illicit substance abuse and even there is a 'normalisation' of drug consumption. This normalisation of smoking marijuana, as mentioned by Father Jean David, can be explained by the fact that marijuana is inherent to Rastafarianism and the youngsters in the *Cité* identify themselves with Rastafarian music.

However, they are not 'real' Rastafari in the *Cité* as they do not follow the Rastafarian spirituality or lifestyle apart from the more visible parts of it such as the dressing style and music; they listen to reggae, seggae and saggai music. A modified form of 'Rasta culture' with Bob Marley and Kaya still present in the collective memory of the population and especially the Creole community is inherent to *Cité* subculture.

### **Child abuse**

By the end of fieldwork, only two cases of child abuse were reported. They were mostly cases of fondling young girls by minors that occurred when children were playing. Sylviana mentioned that these cases were reported to the Child Protection Unit but the children did not receive any psychological assistance and there was no legal follow up. She also pointed out that maybe there maybe more cases of child abuse by adults and adolescents but these incidences remain hidden, as it was a sensitive issue and even a taboo subject.

However, given the extent of domestic violence in the locality, actually, more cases of child abuse remain underreported. In fact, the following cases were identified:

- Child neglect: Children are poorly cared for, they are undernourished, improperly clothed and are denied necessities and rights, proper medical care and access to education. They are emotionally neglected and are treated with indifference. Neglect is one of the reasons why children fall in alcoholism and drug abuse at such a young age
- Psychological abuse: Children living in abusive relationships are exposed to various forms of violence that are likely to negatively impact on their cognitive development and subsequently on the type of adult they will be in the future such as they might reproduce these violent behaviours. In addition, they do not receive the adequate attention from their parents.

### **Child Labour**

Despite the Labour Act of 1975 which prohibits child labour, it continues to be a problem with the *Cité* children starting to work at a young age. However, this problem is not peculiar to Black River as it is widespread in the island.<sup>119</sup>

Child Labour is also prohibited under the Child Protection Act of 1998 but since the children in the *Cité* often drop-out of school before the age of 16, they enter the labour market while at the same time acquiring their skills from their parents through informal education.

Based on the writings of Teelock (1998, p.182), Mauritian society and economy were developed on partly on the exploitation of children that was inherent to the slave system. The slave children were denied 'childhood' and 'although parents tried to limit their children's participation in hard physical labour, child labour was widely practised.'

Child labour was perpetuated under the indenture system and in post-slavery and post-indenture Mauritius. Children continued to constitute a ready pool of labourers working as poultry keeper, cattle herder, bird chaser, weeds picker and performing other menial jobs. A gender dimension was identified in the distribution of work; boys were working in the fields while girls were performing domestic works. Until now children remain vulnerable to child labour and exploitation.

### Child Prostitution

Some respondents had heard about problems of child prostitution in Cité La Mivoie but they had no proof. Poverty and lack of educational and employment opportunities seem to be the reason why women engage in prostitution.

...bon, mo trouve ena enn group tifi...de mo tabagi mem en, enn defoi zot fami vini, pe maltret zot pe koze; "Hier monn trouv twa ek intel, pe koz ar intel, tonn rant dan loto tonn ale....tonn al si pa kot sa, tonn retourne tel ler....to enn move zenfan, to fer betiz tou lor la...." ou konpran la, be la kinn donn mwa lide kouma dir ena sa. Me...lerla mo demann tifi la, mo dir li; "be ki fer to fer sa, kot to ti ale?" li dir mwa; "madam Ramesh, be ki mo pou fer, si mo bezoin larzan, ki mo pou fer." Ounn konpran mwa. Be lerla ki monn finn panse, mo dir petet, sa mem ki zot bezoin larzan...<sup>120</sup>

(Eng. trans:...i saw a group of girls...from my shop, once twice they family came, screaming at them telling; 'yesterday I saw you with someone, talking to someone, you got in the car and went...you went donot know where, you came back that time...you a bad child, you do bad things...' you understand, then I knew there was that. But...then I asked the girl, I asked her: 'why you do that, where you go?' she replied; 'Madam Ramesh, what I will do, I need money, what I will?' you understand. Then I thought maybe that is why, they need money...)

On several occasions, they saw a car collect a group of five young girls of 15 years old on the main road at eight o'clock in the evening and they came back in the early morning the next day or few days later. The 'pick up point' was never the same; sometimes it was in the churchyard and other times in front of the playground.

The problem of sexual exploitation of girls is not inherent to the *Cité* and is a social plague that touches other regions of the island

### Teenage pregnancy

Youngsters in the *Cité* have their first sexual intercourse at around 14 years old. According to Moore (1990), the younger the age of the first sexual intercourse, the more likely that the experience was coercive which might have long lasting negative effects and the greater the risk of unwanted pregnancy and sexually transmitted infections because they are less likely to use contraception.

They also tend to engage in high risk sexual behaviour. It was also noted that for the majority of females who had their initial sexual experiences at 14 years old or younger it was non-voluntary.

Teens' sexual behaviour is influenced by various social, psychological and cultural factors. In the *Cité*, it is a social problem that crosses generations in that women residents have their first child at a young age.

As pointed out by the director of one of the kindergarten, it seems that women do not make the distinction between love and sexual desire; for them if man wants to have sex with them it means that the man is in love with them.

Furthermore, they do not measure all the outcomes of teenage motherhood and early sexual intercourse such as on the psychosocial development of children, future sexual life and on their social and economic opportunities. (See Chapter on Economic Survey)

For example, Marie France's daughter had to stop schooling because she became pregnant. She had the opportunity to return to school but she chose to start working as a cook. During fieldwork, we were informed that three other adolescents were also pregnant.

One of the reasons' might be that open discussion of sexuality is still taboo in Mauritian society, parents rarely talk of sexuality with their children and sex education is not mandatory. In schools where there are sex education classes, they are limited to the biological and reproductive aspect of the subject.

**Lack of Leisure facilities and sports infrastructure**

Children and youths have limited choices in terms of leisure and sport activities such as they go either to the beach or play football or volleyball or play dominoes or cards. They get bored and to kill time they drink or smoke with cigarettes, cigarettes and drugs being easily accessible.

**Scabies infestation**

There is a problem of scabies infestation among the children in the *Cité*. Even though public doctors gave treatment, the illness is still persistent because the residents do not take the necessary precautions concerning hygiene and so risks of propagation are increased.

**4.10 RECOMMENDATIONS**

- **Social organisation**

The sites identified in the culture map should be listed as constituting the natural, tangible and intangible local heritage.

The stories of these sites, the origins of these place names and of the local traditional knowledge should be inventoried to be passed on to the future generations.

- **Family patterns and gender relations**

There is need to carry an in-depth study on the impact of slavery on the contemporary family and social problems especially, gender relations and family dysfunction.

Sexual education should be mandatory but should also promote the norm that sex should take place in intimate relationships of mutual respect and equal gender relations.

- **Settlement**

These sites listed below should be listed as local heritage sites as they are an integral part of the heritage of the local residents who live in this region for generations.

Democratising access to property ownership through the construction of low cost residential developments/Morcellement for the low and middle classes. It also implies implementing measures to protect and defend the land rights of the vulnerable groups such as women and working class families.

- **Social Organisation**

In line with Article 27 of the Convention of the Rights of the Child (CRC) the State should ensure that every child in the housing estate enjoys the right to a standard of living adequate for his/her physical, mental, spiritual, moral and social development. It is the State's obligation to take appropriate measures to assist parents in the *Cité* and others responsible parties to implement this right and in case of need provide material assistance and support programmes, particularly with regard to nutrition, clothing and housing in accordance with national conditions and within their means.

- **Housing conditions**

There is need to carry out a Health survey in the *Cité* La Mivoie and other housing estates to find out if the illnesses and deaths in the *Cités* are in fact asbestos related diseases and deaths.

As a solution to the problem of space in the *Cité*, the government should come up with a long-term affordable housing programme for middle and working classes. These houses should be within the financial means based on the household disposable income of individuals.

To facilitate access to long term affordable housing, grants and subsidised loans with monthly mortgage payments and low fixed interest rates can be proposed to middle and working class based on the household disposable income so as to avoid foreclosure.

The Ministry of Land and Infrastructure should modify the drainage system in line with the norms and regulations

There is need to develop financial and money management programmes, life skills and leadership programmes to change the residents' mindset and develop a culture of money management and saving and new set of attitudes.

Based on the approach 'Culture as Treatment', instead of designing self-empowerment programmes based on western methods, traditional self-empowerment programmes should be designed for the residents that are cultural sensitive and that take into consideration their social and historical background.

- **Toilet and Bathroom Facilities**

Provision and access to adequate clean water, basic sanitation and electricity are essential to meeting the Millennium Development Goals and ultimately the eradication of extreme poverty. They are vital to trigger sustainable social and economic developments and inclusion that will get people out of the poverty trap. For example, by improving the living conditions of people, ensuring health and educational opportunities and gender equality

Indeed, in line with Water Aid (2001), poverty reduction strategies must include effective water and sanitation interventions to achieve sustainable development. Water, electricity and sanitation access promote good hygiene and health and have other indirect positive effects on educational opportunities, gender equality and social, economic and cultural empowerment. Safe water and sanitation underpin economic growth and environmental sustainability.

- **Land Dispossession**

In line with the various United Nations treaties, government should promote 'effective and democratic land, property and natural resources governance, management and practices' including decisions on access to land, natural resources and property; land and property rights, land use, and land and property development. It is the duty of the government to support the increasing number of citizens who do not have access to land and adequate shelter and since market forces will not naturally alleviate the situation land reforms should be proposed to reduce the structural inequalities and longer term measures for housing and land and property rights need to be put in place to support social stability.<sup>121</sup>

For example, FIG-World Bank Declaration on Land Governance in Support of the Millennium Development Goals clearly spells out that sustainable land governance should provide transparent and easy access to land for all and thereby reduce poverty, avoid land grabbing and the attached social and economic consequences, safeguard the environment, cultural heritage and the use of natural resources; guarantee good, transparent, affordable and gender responsive governance of land for the benefit of all including the most vulnerable groups; apply a land policy that is integrated into social and economic development policy frameworks; address the challenges of climate change and related consequences of natural disasters, food shortage, etc.; and recognise the trend of rapid urbanisation as a major challenge to sustain future living and livelihoods.<sup>122</sup>

Furthermore, the Istanbul Declaration on Human Settlements (1996) lays out the engagement of governments to 'endorse the universal goals of ensuring adequate shelter for all and making human settlements safer, healthier and more liveable, equitable, sustainable and productive'. States recognised the urgency of addressing the problem of continuing deterioration of conditions of shelter and human settlements and reaffirmed their commitment to better standards of living in larger freedom for all humankind and to promote the conservation, rehabilitation and maintenance of buildings, monuments, open spaces, landscapes and settlement patterns of historical, cultural, architectural, natural, religious and spiritual value.

- **Child Prostitution**

During her visit to Mauritius in May 2011, Ms. Maalla M'jid, the UN Special Rapporteur on the sale of children, child prostitution and child pornography said that the number of reported cases of sexual abuse, maltreatment and neglect in Mauritius is increasing and that the Mauritian children are increasingly vulnerable to sexual exploitation because of a combination of poverty, family dysfunction, social taboos, alcohol and drugs.

She also identified increasing consumerism, the persistent demands of the market for commercial sex, access to new technologies, parental migration for economic reasons and lack of sex education programmes that inform children about the risks inherent in early sexual activity as other causal.

In line with UNHCR Trafficking in Persons Report (2010) and as per the Child Protection (Amendment) Act of 2008, the State should investigate into these cases of child trafficking and should implement mechanism to facilitate improved anti-trafficking communication and coordination among the relevant parties including law enforcement entities, working groups, NGOs and protective services available to child victims of commercial sexual exploitation. Also adequate support for the rehabilitation of these children.

In addition, the government has a formal protocol on the provision of assistance to all victims of sexual abuse including children victims/survivors of commercial sexual exploitation. In this respect, the government should investigate why the victims-survivors did not receive the adequate assistance and support such as why they did not receive the adequate medical treatment and psychological support.

#### Local Heritage

Preservation of the intangible and tangible heritage identified. The memories of the places that have been destroyed should be preserved such as their stories should be transmitted to future generations.

For example, a local history museum with pedagogical activities should be constructed and the publication of the local history.

The history of the main estates should be retraced given that they determined local social and economic evolution.

Anthropological and archaeological study of Black River Gorges to locate the place names and potential heritage sites mentioned in the interviews to list the gorges as natural heritage.

The research should be extended to Tamarin Village and Petite Rivière Noire and other regional villages.

## 5. CONTEMPORARY CITÉ LA MIVOIE - ECONOMIC SURVEY

This chapter focuses on the economic life in Cité La Mivoie in an attempt to gain a deeper understanding of, firstly, the infrastructural development of the village of Petite Rivière Noire and the *Cité*, secondly, the occupation patterns in the housing estate during the 20<sup>th</sup> century, thirdly, the educational patterns within the *Cité* and finally other economic problems that the local residents are facing.

It aims at assessing the local economic conditions and identifying the economic problems the residents are presently facing in order to make recommendations to address the problems identified and ultimately improve their economic conditions.

### 5.1 Infrastructure and Spatial Organisation

Based on the premise that, firstly, infrastructural landscape is not fixed but dynamic in that it evolves through time in line with changes in land use, secondly, socio-economic transitions are determined on land use that subsequently affect environment (social and ecological environments), the shift in the regional economic development strategy - with the main estate owners dividing out land for commercial and residential developments - transformed the local infrastructural pattern. (See Appendix 3)

The infrastructural landscape can be divided as such: (i) an upper part that corresponds to the apex of La Tourelle du Tamarin Mountain where luxurious residences were built (ii) an intermediary part which is at the foot of the mountain where the commercial infrastructures are located and (iii) a lower part where the low cost housing estates are situated (Cité La Mivoie and Morcellement Les Tamariniers).

Cité La Mivoie is an enclave between the commercial area of the village located upstream and the wealthy residences owned essentially by foreigners and fair-skinned Mauritians (either Mauritians categorised as Franco-Mauritians or Mauritians categorised as Mulattos) found downstream on the beach side.

Photo 20 *Sime Colonel Dean - Beach Side*

Source: TJC/6/AC/SiteVisit/ PH 18/P/LaMivoie/11May2010

On the right and left peripheries (*Sime LaJetée* and Market Lane) of the *Cité* there is private land owned by Hindi and Marathi speaking Indo-Mauritians who are said to be better off than the *Cité* residents. (See Chapter Social Survey)

Photo 21 La Balise: *Sime LaJetée*

Source: TJC/6/AC/SiteVisit/ PH 18/P/LaMivoie/11May2010

Photo 22 Market Lane

Source: TJC/6/AC/SiteVisit/ PH 20/P/LaMivoie/11May2010

The following public amenities were identified: Post Office, British American Insurance Office, Village Hall, Alliance Française office, Police Station, Citizen Advice Bureau, hardware store, restaurants, Ruiseau Créole a luxurious shopping complex, Nautica another recently-built shopping complex, a hairdresser and various retail shops.

Dr. Y. Cantin Hospital is the only health institution found at the north entrance of the village but there are several private physicians in the region in La Mivoie and Tamarin Village. The health services provided by the hospital are far from meeting international public health standards for a developing country although improvements were brought since the opening of the hospital in 1997. Various newspaper articles, for example published in *L'Express* dated 20<sup>th</sup> November 2009 and 5<sup>th</sup> February 2010 reported, the poor working conditions of the hospital personnel and the poor health services dispensed including basic primary health care such as lack of health equipments and medicine.

Photo 23 Dr. Yves Cantin Hospital

Source: TJC/6/AC/SiteVisit/ PH  
21/P/LaMivoie/11May2010

There is a football ground and a basketball court at the north entrance of the village as sporting infrastructure. It seems that these amenities are under-utilised, as during fieldwork, once we saw people (men) playing football and on another day students of the primary school were competing in sporting activities. It seems that the children do not use these sporting facilities, as they prefer to play football in the churchyard because of its proximity with the housing estate.

As a religious infrastructure, St. Augustin Church was established in 1857 following the donation of Comte Augustin Genève de St. Jean a large estate owner in Black River<sup>123</sup>. A *Mandir*<sup>124</sup> named Black River Ganesh Mandir is presently under construction at the north entrance of the village and a Christian cemetery, Black River cemetery, is located at the north entrance of the village adjacent to the post office.

As educational Infrastructures: (i) two kindergartens exist, Garderie Etoile located in the churchyard for low-income earners and working class families. La Case des Bambins Halte Crèche and Pre-primary School is a private kindergarten located in front of the church on the left side of *Sime La Jetée*, (ii) a specialised school for mentally handicapped children located in the church yard, (iii) a technical school: *Ecole des Techniciennes de Maison* (Eng.trans. School of House Technicians) located in the church yard, (iv) a pre-primary and primary school: Black River pre-primary and primary government school at the north entrance of the village adjacent to the Village Council Hall and (v) a secondary school: Collège du St Esprit Rivière Noire at the South end of the village.

There is no taxi service based in the village and few people own a private car or motorcycle. , the local residents rely on public transport whose efficiency has improved since the 18<sup>th</sup> and 19<sup>th</sup> centuries when the Black River region faced transport and communication problems that contributed to its marginalisation.

Nowadays, the public bus service is regular and there is a bus every hour going from Baie-du-Cap to Quatre-Bornes and every morning and afternoon there is a bus going to Port Louis. There are two bus stops, one located in front of Li Mo Yo's shop (when going to Port Louis) and the other in front of Saint Augustin Store (when going to Baie-du-Cap).

Regarding road infrastructure, as Devi testified, before there were railways and in the 1960s there were muddy roads but in the eighties, the roads were tarred. The transport service is still served by a private company with the exception of the National Transport Corporation that serves the trip Baie-du-Cap to Port Louis.

Even though pedestrian crossings, signs and safe pavements are available, when driving through the village, drivers including bus drivers rarely respect speed limits and the Highway Code. I observed

that road safety is a major concern because of speeding especially in regards to the children who tend to play on the pavements and roadside.

There are other amenities available in La Mivoie that is approximately 10 minutes' walking distance North of Cité La Mivoie. The Central Electricity Authority Office, the filling station, London Hypermarket, a chemist, the Mascareignes Bank and other commercial shops such as restaurants and decorations are located at La Mivoie.

In Tamarin village, we find FranPrix Hypermarket, a chemist and Barclays Bank as well as a commercial mall and River Land, a sports club for the wealthy people. Tamarin Village that is approximately 15 minutes driving distance north of the *Cité*.

According to the respondents, these infrastructural developments started around the mid 1980s and increased in the past 10 years with the mass influx of expatriates settling in the region. Market forces shape these developments, especially, the commercial amenities that target particularly the wealthy strata of the local population.

For example, the luxurious commercial complexes, house decoration shops, and the regional residential developments are intended for the wealthy foreigners and the higher classes. Even the goods in the local hypermarkets are higher-priced compared to urban regions.

Photo 24 Ruiseau Créole

Source: TJC/6/AC/SiteVisit/ PH 22/P/LaMivoie/12May2010

However, there are still basic amenities missing and there are high expectations among the residents in terms of infrastructure and services: (i) an agricultural market. The nearest market is in Bambous but they go to Quatre-Bornes. (ii) An equipped and modern hospital. For serious illnesses, they have to travel to Candos Hospital the nearest public health service located in Quatre-Bornes that is approximately 40 minutes' driving distance by car. (iii) Recreational infrastructures and a proper and safe playground for children. At the entrance of the *Cité* there is a playground but it is not safe and hygienic as it used as dumping and defecating ground. (iv) There are no streetlights in the *Cité* and proper and standardised drainage system. (v) A meeting place where the residents can gather and organise meetings and (vi) a public library.

## 5.2 Potential Heritage Sites

The *sime* (Eng.trans. Road or Path) identified in this report were multi-functional paths that passed through private and government land. They were muddy paths like horse tracks that 'cut across' sugar-cane plantations and used by lorries to load sugar-cane.

However, in view of the fact that, long ago, people used to walk and, often, long distances, some of these paths were used by the local residents as short cuts.

...be tou sa bann chemin la, bann, ti ena bann ti santie sa, zonn fer sa kouma dir bann....kamion kapav tir kann, kapav tir di bwa tou sa. Se pou sa ki zonn...bann ti santie...<sup>125</sup>

(Eng. trans:...but all these roads, there were small paths, they did that how to say that...lorries can load sugar-cane, can load wood all that. That is why they...small paths...)

These *sime* are of historical and symbolic importance for the local inhabitants as in the past they regularly used these paths and they still use some of them. They were secondary roads that can be conceptualised as intermediary or ritualised spaces that linked places such as the camps, the villages, the working places and gardens.

The following *sime* were identified as constituting the local intangible and tangible heritage. The names and stories of these paths are still present in the collective memory of the residents. (See Appendix 3)

1. *5 Sime* (Eng.trans. Five Road):

It is presently known as Old Black River Road and starts from *lacrwaze 5 Sime* and passes through the Black River Gorges.

It was named such, because the road splits into several branches (approximately 5 branches) that lead to various places in the Gorges such as Matala, Walhala and Yemen

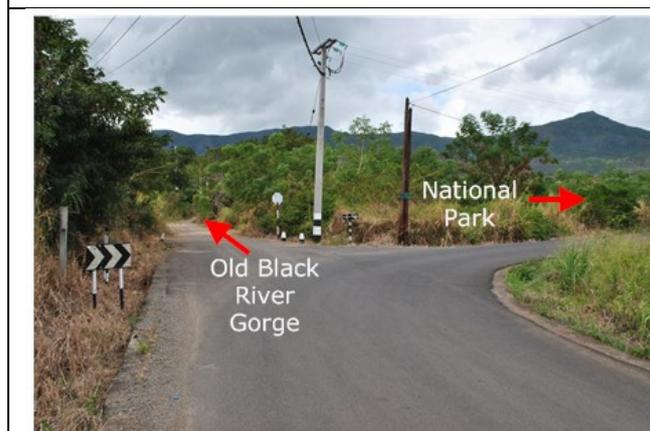

...me cink sime kot li ete sa? cink sime, li trouv dan sa sime la mem me, inpe pli devan...<sup>126</sup>

(Eng. trans:...but where is Five Road? Five Road is found in this road but a little further inside...)

...apel sa lakrawze cink chemin, parski kan nou pran sa chemin ki pa asfalte la, chemin blan la la, dan sime later la, la nou gagn sime pou nou al Walala, sime pou al Matala, dan sime Yemen. Apre sa kontour la la, se sa kot nou pou al dan Gorge...donk si mo konpran byen, apre dan...sa tournan la mo trouv ena enn chemin ki al tou drwat! Wi. Donk se sa sime la, li al ziska Matala ek Walala. Wi Matala, Walala...ek ziska Yemen...be ki fer apel sa lakrawze cink sime? mai zonn donn sa non la, lakrawze cink sime...kan ou rantt dan sa chemin blan la la, ena bann chemin ki kouma dir....de partaze...Donk se Old Black River Road ki al ziska Yemen alor...<sup>127</sup>

(Eng. trans:...It is known as five Road junction because when we use take that road that is not tarred, the white road there, the dirt road there, there we have the road to go to Walala, the road to go to Matala, in the Yemen Road. After this road curve there, it is where we go in the gorges...so if I understand after...this road curve I see a road going straight! Yes. So it is this road that goes to Matala and Walala...and to Yemen...Why is it called five Road junction? They gave this mane, five Road junction...when you go on that white road there, there are roads how to say that...split...So it is Old Black River Road that goes to Yemen...)

Photo 25 5 Sime and Lacrwaze 5 Sime

Source: TJC/6/AC/SiteVisit/ PH 23/P/LaMivoie/12May2010

2. *Sime Gorz*:

This is the Black River Road. It starts from the main road (from the junction in front of *Boutik Trwa Bra*) to places named Ti-Gorz and Gran Gorz in the Black River Gorges

..mesa chemin National Park la, komen...Li touzur ti apel koumsa sa? non. Ti apel li Gorge de la Rivière Noire. Sime Gorz...Ah sa ve dir...chemin National Park, li apel osi sime Gorge...<sup>128</sup>

(Eng. trans:...But this road [named] National Park...it was always named such? No. It was named Black River Gorges. Black River Gorges Road...Ok it means National Park Road, is also named Black River Gorges Road...)

Photo 26 *Sime Gorz*

Source: TJC/6/AC/SiteVisit/ PH 24/P/LaMivoie/20June2010

3. *Sime Ti Ladig* (Eng. Trans. Small Dam Road):

It is located before *Pon Blan* and was named such because there was a stream flowing in front.

...Donk dan kote drwat dan chemin National Park, ena enn segon chemin la dan kote drwat, komen li apele en? chemin ti la dig...ki fer ti la dig en? Ki ti ena la? ena enn la rivier ki pase devan...en ena enn la rivier ? Wi...Donk inn apel sa chemin ti la dig? Wi...<sup>129</sup>

(Eng. trans:...So on the right side of National Park Road, there is a second road on the right how is it named? Small Dam Road...Why Small Dam Road? What was there here? There was a river flowing in front...there is a river? Yes...So it was named Small Dam Road? Yes...)

4. *Sime Bolom Baboo* (Eng. trans. Old man Baboo Road):

It was located on Ramdenee estate and was named after a man named Baboo as the road led to his garden. Presently at the entrance of the road, there is a gate.

...wa. Tou sa ti ena kann pou Ramdenee sa. Sa chemin la la, kot nou ete la, ti apel sa chemin bolom Babou...Sa ve dir kot ena gat la, dan gos-la. Ti apel sa bolom Babou... ki fer? Err mwa mo sipose bolom Babou ti ena enn zardin, inpe pli devan laba...<sup>130</sup>

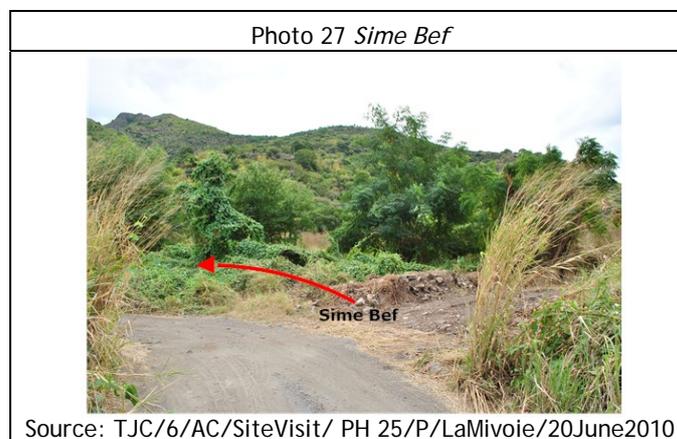

(Eng. trans:..Yes. All this was for Ramdenee. This road where we are there was named Old man Baboo Road...It means where there is the gate there on the left there. It was named Old man Baboo...why? Me I think the Old man Baboo had his garden there, a little in front over-there...)

#### 5. *Sime bef*:

It was located south of St. Augustin Church. It led to *Pon Misel* and ended *Kanal Raffia*. It passed near *Rwiso Harrison* and behind *Kan Bef*.

monte li vinn tom kot sa verze la la kot pon michel...Sime bef ? Wi. Avan al legliz ? Wi Pran kot legliz la ou monte mem ou vinn kot Pon Michel ti ena enn gran verze mang la ti ena dimounn ti reste tou laba. Ki ti pe res laba ein ? Ti ena enn bonom apel bonom Gesen ti pe gardien bef dan sa soz la dan sa verze mang la li res laem. Donk ti ena sime bef la ? Wi pran kot legliz li vini pers Pon Michel lerla ou gagn verze mang sa bonom la ti gardien ti res dan sa verze la...<sup>131</sup>

(Eng. trans:...Here there was an orchard...there was a road named Cattle Road it started near the church it went uphill to the orchard there near Michel Bridge...Cattle Road? Yes. Before the church? Yes start from the church go uphill you reach Michel Bridge there was a huge mango orchard there were people staying over-there. Who stayed over-there? There was a man named Old man Gesen who was cattleherder in this orchard he was living there. So there was Cattle Road there? Yes it started near the church passed by Michel Bridge then you have the mango orchard the man was watchman and was living in the orchard...)

The following infrastructures were also identified as forming part of the local tangible and intangible heritage. (See Appendix 3)

#### 1. *Bois Piant*:

It is a place located before the reservoir on the way to Petite Rivière Noire. *La Montan Bois Piant* (Eng.trans. Stinking Wood Slope) refers to a steep slope and curve on the road.

This place name serves as delimitation for De Senneville estate on the left side of the road and De Ravel estate located on the right side of the road when going towards Petite Rivière Noire

...la nou koumans par later bwa pian, nou monte parski ki fer, ou trouv sa gran la montan la, apel sa la montan bwa pian...ki fer bwa pian...ki san la kinn met sa non la? me

sa depi a ma konesans monn tann sa bwa pian, mo pa tro kone ki so sinifikasion...parski li enn la montan ki byen dur. Si ou fer sa a pie li byen dur...<sup>132</sup>

(Eng. trans:..There we start from Stinking Wood land, we go up why because, you see this steep slope there, it is named Stinking Wood Slope...Why Stinking Wood...why gave this name? Because I always heard this Stinking Wood, I do not really know its signification...because it is a steep slope. If you climb it on foot it is difficult...)

2. *Pon Misel*: (See Chapter Social Survey)

3. *Pon Raffia*:

It is located between *Pon Misel* and *Pon Blan* and near *Sime Ti Ladig*. It was named such because there were Raffia trees near the bridge.

...pon Raffia pli devan. Pli devan? Wi. Sa ve dir li...li dan chemin Gorge. Li dan chemin Gorge...Sa ve dir kan nou rant dan Gorge, li avan Kalimay. Wi. Ok dakor. Be ki fer apel sa pon Raffia en? ena bann pie Raffia...<sup>133</sup>

(Eng. trans:...Raffia Bridge is far ahead. Far ahead? Yes. It means it...it is in Black River Gorges Road...It is in Black River Gorges Road...It means when we are on Black River Gorges Road it is before the Kalimaya. Yes. Ok right. Why is it named Raffia Bridge? There are Raffia Trees...)

4. *Pon Blan*:

It is located at the entrance of *Sime Gorz* before *Lacrwaze 5 Sime*. It is '*dan chemin National Park, ena enn second pon*'<sup>134</sup> (Eng.trans. In National Park road, the second bridge)

Photo 30 *Pon Blan*

Source: TJC/6/AC/SiteVisit/ PH 28/P/LaMivoie/20June2010

5. *Boutik Trwa Bra*:

It is a *Boutik Sinwa* (Eng.trans. Chinese Retail Shop) located at the south end of the village and opposite the roundabout at the entrance *Sime Gorz*. It is still open and there is a Chinese restaurant named Pavillon de Jade above the shop.

Photo 31 *Boutik Trwa Bra*

Source: TJC/6/AC/SiteVisit/ PH 29/P/LaMivoie/20June2010

6. *Boutik Li Mo Yo*:

It is a *Boutik Sinwa* located in front of Cité La Mivoie and opposite *Kan Lakol*. Nowadays the shop is closed. When it closed, the shop was transformed into a market named Black Market.

Source: TJC/6/AC/SiteVisit/ PH 30/P/LaMivoie/11May2010

7. *Boutik Saint Augustin*:

Is a *Boutik Sinwa* located at the North entrance of the village is still open.

Photo 33 *Boutik Saint Augustin*

Source: TJC/6/AC/SiteVisit/ PH 31/P/LaMivoie/20June2010

There are infrastructures that existed in the past but that have disappeared now because of spatial reconfigurations resulting from residential and other infrastructural developments. Some of these infrastructures are inherent to the local economic history and are still present in the collective and individual memories of the respondents as they have an historical significance for the latter. Therefore, the vestige of these infrastructures should be listed as local heritage sites:

1. *Fouraso* (Eng.trans. Limekiln):

Two Limekilns were identified. One at the northern entrance of the village after Ruiseau Creole and another at the south end of the *Cité* near the Centre de Peche (a jetty and a fishing club. It was formerly a hotel.)

2. *Chambre des morts* (Eng.trans. The House of the Dead):

It was adjacent to the post office. It was a mortuary where in the past people used to leave the dead corpse until they get all their papers for the funeral.

...avan kouma dir kan enn dimounn, pa pe gagn bann papie pou anter li, ti pe gard so lekor ladan, ziska bann fami al fer bann demars landemin lerla, zot pran lekor la zot al antere. Se sa ki zot apel lasam de mor la? Wi. Me ziska ki lane inn fer sa an?..Ase lontan parski, mo mem mo ti ena enn fami, pa ti gagn papie, zanfan la ti res dan kapav li kapav 75-76...<sup>135</sup>

(Eng. trans:...long ago when people did not have their papers to be buried, the corpse was kept there, until the next day his family undertook the proceedings, they took the corpse to be buried. This is what they call the house of the dead? Yes. Until which year this practice

existed?...for a long time as myself I had a family [member] who did not have his papers, the child stayed in [the House of the Dead] maybe in 75-76...)

Photo 34 Location of Chambre des Morts

Source: TJC/6/AC/SiteVisit/ PH 32/P/LaMivoie/12May2010

3. *Moulin Lalwes* (Eng. trans. Aloes Mill):

It was located on De Senneville estate near the office of Mr. Ramdenee. Léon Maurel was the former owner of the factory who later transferred the ownership to Joseph De Senneville.

The *Cité* residents have worked in the mill and in the Aloes field until it closed in around 1970.

Today, there is a *Morcellement* on the site of the factory and it was not possible to accurately locate the mill. As stated by Antonio, Mr. Jean Claude D'Hotman built his house in the mill.

According to Moutou (2000,p. 217), in 1929, there were 25 Aloes Mills in the Black River district including that of Léon Maurel in Black River and the factory of A. Keisler in Petite Rivière Noire.

...Moulin lalwes...ou kone bann terin andan, li ti inpe divize parski Moulin lalwes se...misie Maurel ki ti okup sa...o komansman. Wi. Apre, kouma dir lerla misie De Senneville inn pran. MisierDe Senneville ziska asterla ou pase la, ou pou trouv kot so bann poto difil ena la. Ou pou trouv kot so bann poto difil ete la *lizin*...<sup>136</sup>

(Eng. trans:...Aloes Mill...You know the properties inland, it is divided because the Aloes Mill it...was Mr. Maurel who managed it...at the beginning. Yes. Afterwards Mr. De Senneville took over. Mr. De Senneville until now when you pass by you will see the electric posts there. You will see where the electric posts are [it was there] the factory...)

Antonio testified that there was a *Balans* (Eng.trans. Scale) to weight the Aloes fibres before sending them to Grande Rivière. The scale was near the shop named *Boutik Trwa Bra* where the Levasseur Family built their house.

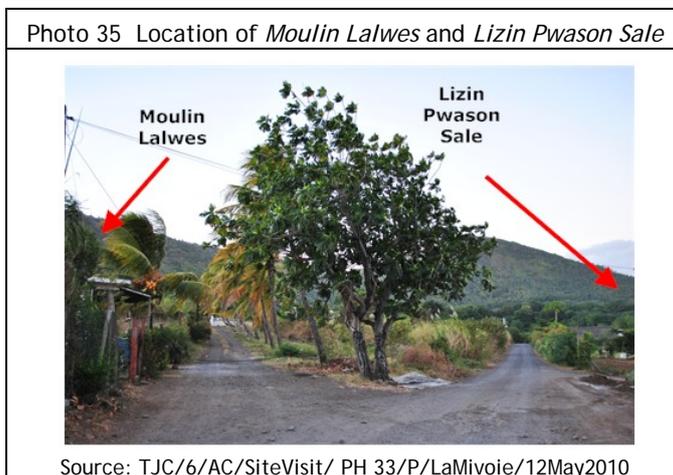

4. *Lizin Pwason Sale* (Eng.trans. Salt-Fish Factory):

It belonged to Mr. Ramdenee and was located near the Aloes Mill. *Morcellement* Filature was constructed on the site of the factory and it was not possible to accurately locate the salt-fish factory. However, none of the residents mentioned that they worked for this factory.

...wa. Parski dizon kan ou pran sa chemin la ou ale, par derier laba, ou gagn so lisinn pwason sale...donk Ramdenee, ti ena enn lisinn pwason sale ? Wi. Me depi kan so lisinn pwason sale en? Ase lontan sa lisinn pwason sale la. Parski sa lisinn pwason sale la, mo kone li ti pe devers so delo dan la rivier, kot gagn ase bann problem kom sa avek bann

abitan...Me sa lisinn pwason sale la, en 1960 li ti deza la? Non...Byen apre sa. Byen, byen apre. Err ou pa kone ver ki period? Kapav dan les ane 78-80 parla...<sup>137</sup>

(Eng. trans:...yes. Because when you take this road, at the back over-there, there is the salt-fish factory...So Ramdenee owned a salt-fish factory? Yes. But when dates this salt-fish factory? A long time [ago] this salt-fish factory. Because this salt-fish factory I know its water was pouring into the river that caused many problems with the inhabitants...but this salt-fish factory it existed in 1960? No...no it was well after. Well, well after. You do not know which period? Maybe approximately in the years 78-80...)

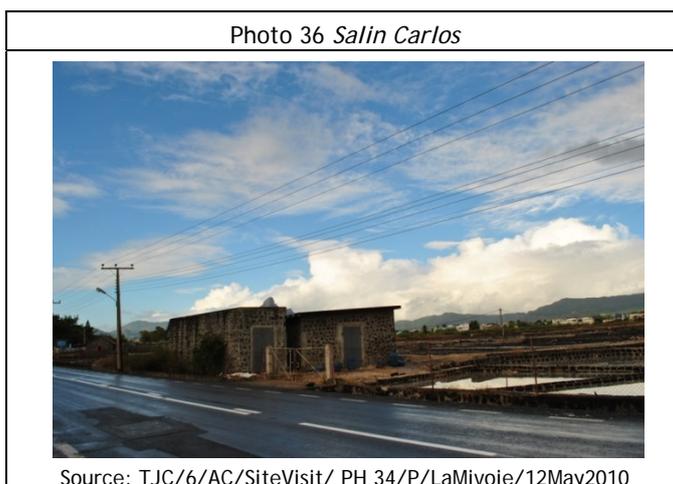

5. *Salin Carlos* (Eng. trans. Salt-pan Carlos):

It is located at the south end of Tamarin Village, in between Tamarin Village and Grande Rivière Noire Village. It belongs to the De Ravel Family. Recently the salt-pan was divided up and part of it was converted into a residential area.

Some of local residents such as Nicole and Marjorie<sup>138</sup> used to work as labourers in this salt-pan. Long ago, working conditions were harsh and even inhumane.

The *kolom* (Eng. trans. The supervisor) that often was a Creole dominated them and abused the labourers. This unequal power relationship and the constant abuse of power, led to a lack of solidarity amongst the salt-pan workers.

For example, Nicole testified that when she fought for their labour rights to be respected and for the improvement of their working conditions, as a reprisal, she was forced to work from nine in the morning until four in the evening. Nevertheless, following her claims, the trade union lobbied for more humane working conditions for the salt-pan labourers and now, they have to wear boots and gloves and the weight of the baskets are regulated.

According to Nicole, the salt-pan was named after a man called Carols who died while using dynamite for stone demolition.

...ti ena enn misie, ki ti pe travay, li ti apel Carlos. Kan a lepok pa ti ena bann masinn pou kass bann ros, ti bizin met dinamit dan ros koumadir, pou ros eklate, kasse. Ti ena bann gro gro ros la. Kan linn met sa dinamit la, kouma linn alime, dinamit la inn eklate, linn mor la, se pou sa kin ou apel sa salinn Carlos...<sup>139</sup>

(Eng. trans:...there was a man who was working [in the salt-pan], he was named Carlos. At that, time there was no crushing machine to break rock, dynamites were used, to crush rocks. There were huge rocks there. When he placed the dynamite and light up the [fuse] the dynamite exploded, he died there, that is why it is named salt-pan Carlos...)

6. *Salin Pilot/Koenig* (Eng. trans. The Pilot/Koenig Salt-pan):

It is located at the South end of Grand Rivière Noire Village and after *Boutik Trwa Bra* and is known as *Le Salin*. Some of the *Cité* residents moved from *Le Salin* to settle in the housing estate. (See Social Survey Chapter)

*Batterie de L'Harmonie* also known as L'Harmonie historical site is located at the south end of the salt-pan. It is the 'sister battery with an identical history to the Battery of La Preneuse.'<sup>140</sup>

The public does not have access to the Les Salines public beach nor to the heritage site as apparently it is on private land.<sup>141</sup>

The salt-pan was sold to Beachcomber group for a hotel development project and the battery is located on the development site. One question arises regarding the preservation and access to this historical site.

These places were carved by the ancestors of the *Cité* residents who configured these spaces and gave them new characteristics such as their functional and cultural dimensions. Their actions and utilisation of these spaces gave to these sites their symbolical significance.

According to Levy and Segaud (1983, p.30):

'...toutes les sociétés par définition même sont...en relation avec l'espace ; toutes, elles se signifient par leur organisation spatiale, mais cette relation, cette organisation, ne sont saisissables que dans leurs particularités. La relation à l'espace est ainsi pourrait-on dire, universellement garante de la particularité des identités...'

(Eng.trans:...All societies by definition are...related to space; they are all symbolised by their spatial organisation, but this relation and this organisation are distinguishable in their specificities. Thus, we can say that the relation to space universally guarantees identities specificities...)

In keeping with them, symbols embrace sense and consequently our understanding of the world. Symbols underpin collective and individual identities.

Besides, these sites were named and subsequently are related to either a person such as *Pon Misel* or an ethnic group such as *kan Bombaye* or a socio-economic activity such as *karo letchi* (Eng.trans. Lychee Garden).

The naming system of these places constitutes symbolical association and assimilation of these spaces to the person or to the group. Through these spatial configurations, we can learn much on the local history and on past life such as on past social systems.

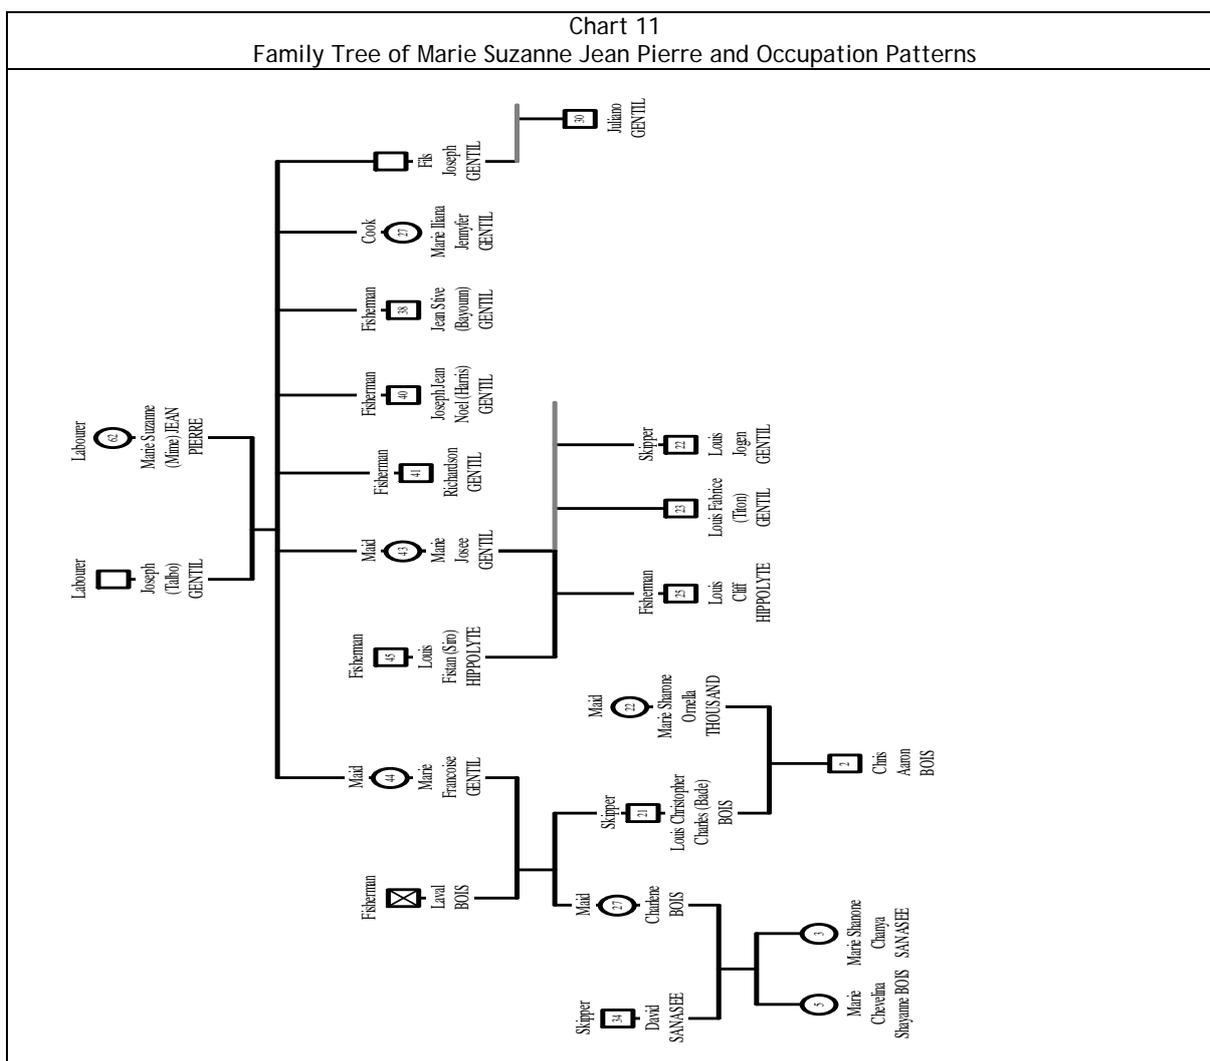

These sites and the stories of these places should be preserved and transmitted to the future generations for them to learn their history and that of their ancestors.

### 5.3 Occupation patterns in the 20<sup>th</sup> century

Family histories revealed that there is a transmission of menial jobs and blue-collar jobs to succeeding generations. They adopt a subservient and servile attitude towards the wealthier residents and new owners of the luxury residences.

Most residents work as paid domestic workers, boat skippers, builders, gardeners, labourers and fishermen. Few people work in the white-collar sector as salespersons, cashiers and office workers. Only three people were identified as being office workers, Jasmine used to work as secretary and now she works as manager of the *Ecole des Techniciennes de Maison*. The son of Devi works as accountant for a private company and another Indo-Mauritian respondent works as clerk.

Based on the genealogy trees, six qualified workers were recorded; two teachers, three cooks and one social worker as illustrated in Charts 11 and 12 .

Besides, the residents are either casual workers in that they only work during specific periods of the year such as the fishermen during the fishing season and builders who are likely to work on fixed term contract when there is a construction site.

There are also part-time workers doing multiple jobs such as the domestic workers and gardeners who work for various wealthy families living in the neighbourhood like for families residing in Morcellement Carlos and Plantation Marguery.

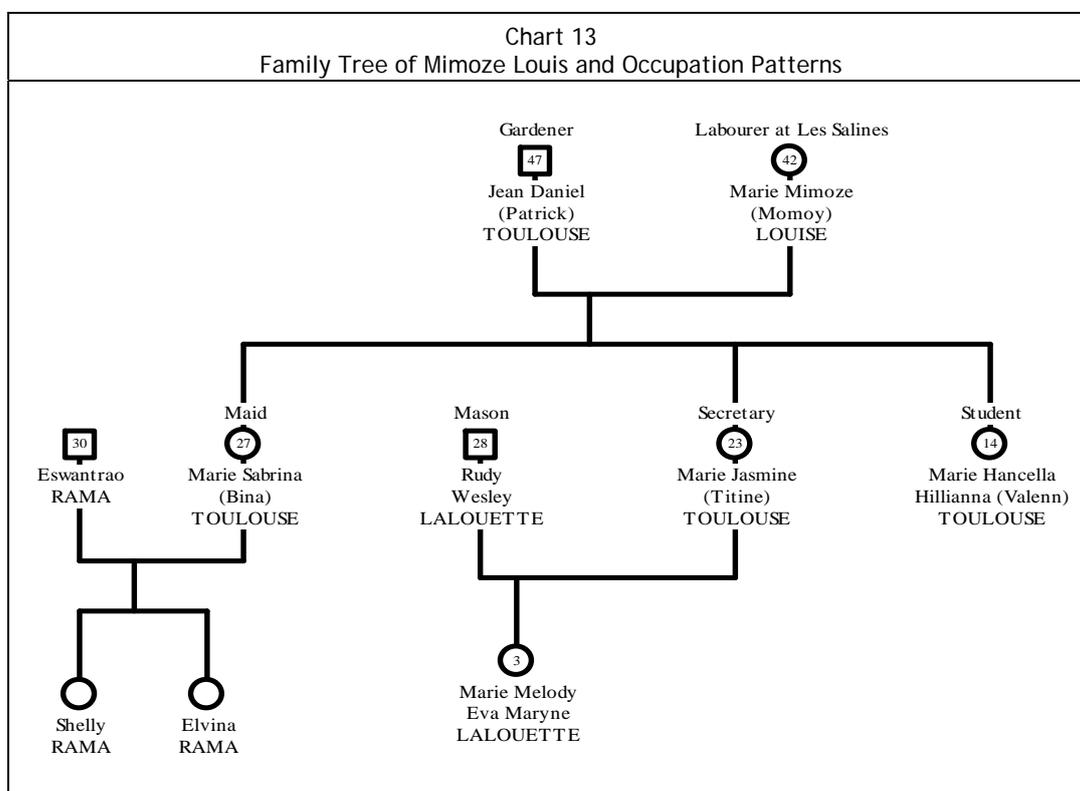

They are compelled to take multiple jobs to survive. Nevertheless, there are also some full-time workers, particularly, the office workers who enjoy job security compared to the casual and part-time workers.

Gender differences in occupational distributions can be observed with men being mostly fishermen and gardeners whereas women are paid domestic and blue-collar workers. The skilled and qualified workers are mainly women as well.

On one hand, the residents tend to choose occupations similar to their parents. Men tend to be fishermen across generations such as the descendants of Michel D Jean Pierre. His son, D. Jean Pierre and his grandsons such as Louis Colin Jean Pierre, Louis Daniel Jean Pierre and Emmanuel Jean Pierre are all fishermen.

Similarly, a matrilineal occupational transmission was observed with women working as domestic workers across generations. For example, Sylvia Malegasse was domestic worker and her two daughters, Marie Jenika Albert and Jenilo Albert also.

On the other hand, even though differences in occupational choices across generations can be observed, yet, they still perform blue-collar and menial jobs. For example, Mimoze Louise (daughter of Emilienne who worked as domestic worker) works as a salt-pan labourer and her husband, Jean Daniel Toulouse is gardener but none of their children performs similar jobs. Sabrina Toulouse is a domestic worker, Jasmine Lalouette works as manager of *L'Ecole des Techniciennes de Maison* and Hancella Toulouse studies.

Family histories revealed changes in occupational choices after slavery. For example, Albain Michel Jean Pierre, grandfather of Dorisse Jean Pierre was a carpenter. Joseph Albert, the great grandfather of Louis Horace Albert was a blacksmith and Téfine Hanine, his great grandmother was a seamstress. (See Appendices 8 and 9)

A downward shift can be observed in the occupational choice with the first generations (as retraced in the genealogy) being skilled artisans whereas the successive generations, as from the fourth generation, performing mostly menial jobs. Some causal factors for this downward shift in occupational choice might be the changes in the development strategies of the surrounding estates, the failure for the villagers to keep with the labour market demands since schools were located far away. Distance and isolation have played a huge role in absence of education among population here.

As from the 1960s, the labour demand of the estates changed in line with their development strategies and especially following the division of the estate land. They needed mostly labourers and domestic workers as illustrated by the genealogical trees.

For example, Maurel, De Ravel and Pilot/Koenig families were the main employers in the 18<sup>th</sup> and 19<sup>th</sup> centuries. These 'Franco-Mauritian' estate owners had the monopoly of the economic life in the region as they controlled farming activities, aloes production, sugar cane plantations and salt-pans.

Until early the 20<sup>th</sup> century, these families and the Maurel Family especially, controlled most of the economic activities. The Ramdenee Family and the Rama Family in Chamarel were the only non 'Franco-Mauritian' estate owner identified in the region in the late 20<sup>th</sup> century.

As from the 1960s, Mauritius faced economic strains of a mono-crop economy that relied essentially on importation. After independence in 1968, it had to diversify its economy. Subsequently, the main local estates reoriented their economic activities in line with the national economic strategies.

According to Nicole, Mr. Maurel started to divide and sell his land and semi-industrial activities developed. Sugar cane production, Aloe production, salt-pans and the development of the *chassée* were the main economic activities and the villagers worked essentially as paid domestic workers, labourers, fishermen and salt-pan workers.

...Lontan tiena ban dimounn ti pe travay tiena Moulin lalwes ban madam ti pe travay Moulin lalwes...Li ti peser wa li travay peser... Ena peser ena labourer koup kann mwa mo papa ti koup kann sa lepok la mo bolom peser...<sup>142</sup>

(Eng. trans:...Long ago people worked [in the] Aloes Mill women worked in the Aloes Mill...He was fisherman yes he worked [as] fisherman...there are fishermen, labourer cut sugarcane at that time my father cut cane my husband [was] fisherman...)

Consequently, in the 20<sup>th</sup> century, the estates were still the main employers. However, these social and economic changes not only had an effect on the residents' occupational choices but led also to a shift from a sustainable lifestyle to a consumption lifestyle following changes in land reconfiguration as explained in the previous chapter.

Even after moving from estate land to settle in Cité La Mivoie, the residents were still working for these estates. Yet, some respondents testified that, apart from the demolition of their houses after Cyclone Carol, the opportunity to engage in independent non-estate economic activities mainly fishing was one of the reasons why people moved from estate land to settle in the *Cité*.

This is substantiated by genealogical research that, revealed a downward shift from skilled artisan occupation to unskilled jobs as from the fourth generation, onwards, who were identified as Cité La Mivoie first settlers.

In fact, based on the oral testimonies, the development of the tourist industry did not bring a drastic change in the local economic landscape, as it seems that few *Cité* dwellers took employment in the surrounding hotels. Few interviewees mentioned having worked or are actually working for neighbouring hotels with the exception of Devi who mentioned that in around 1975 she

was working as salesgirl in an hotel located in La Mivoie and Sylviana Papeche who used to work for Le Pavillon Hotel in Le Morne as hostess in the club for children.

Furthermore, albeit, as per Chart 12 above, the local population of Black River district work mostly in the manufacturing sector, these figures do not reflect the reality of Cité La Mivoie. Actually, none of the residents testified working or having worked in Export Processing Zone (EPZ) such as in the export-manufacturing firm in Bamboo and Grand Rivière.

It can be said that, the population of the Northern part of the district benefited from the development of the EPZ sector in the 1970s and 1980s given their geographical proximity with the industrial zone to the detriment of south Black River that was marginalised because of its remoteness.

Consequently, the *Cité* residents relied on the plantation and fishing economies and on invisible labour that are legacies of slavery in that the local residents continued to work for the surrounding estates and as paid domestic workers and fishermen.

### Small Scale Farming:

Field research uncovered that the villagers and especially the Marathi-speaking inhabitants also practised small-scale agriculture and animal farming on estate land at the foot of La Tourelle du Tamarin Mountain and in *Sime Gorz*. They reared animals and cultivated land for subsistence and surplus was sold or bartered.

Although small agriculturists continued to cultivate land, by the mid 20<sup>th</sup> century, farming was no more being practised. The last garden was identified in around the 1980s. As Nicole testified, agriculture and farming gradually stopped with the expansion of hunting grounds and sugarcane fields.

There were plantations along *Sime Gorz* such as maize gardens, tobacco plantations, rice fields, and Eucalyptus plantations at the north entrance of the *Cité*.

...avan ti ena di ri, plantasion di ri! Ti ena plantasion di ri, apre zonn tir plantasion di ri, zonn met kann, me de kote, ti ena kann, chemin pa ti koumsa...<sup>143</sup>

(Eng. trans:...long ago there were rice, rice plantations! There were rice plantation, afterwards they removed the rice plantation, they cultivate sugar cane, but on both sides, there were sugarcane, the road was not like that...)

Two orchards were also identified, one on the mountain at a place named *Rwiso Harrison* on Maingard land and another one owned by a family named either Rey Lenferna or Lenferna which was also an aviary at the actual location of La Balise. The orchards disappeared when the landowners divided and sold their land for residential development.

The following sites were identified where people in the past used to practise small-scale farming. These places are still alive in the collective memory and they constitute the tangible and intangible heritage of the local inhabitants:

#### 1. *Karo Kasi* (Eng. trans. Cassis Plantation):

It was at the north entrance of the village on the land of the Baboo Family located at the foot of the mountain. The plantation existed in around 1972-1973

...avan zot vinn konstruir pou aranz tou sa la, li ti enn karo casi la. Ti ena pie casi ki ti al. mai apre monn kone ki li appartenir a la fami Baboo. Lot kote chemin; depi mw mo kone sa later la, appartenir a la fami Sokoo...Ziska ki lane sa? Kapav ziska 72-73...<sup>144</sup>

(Eng. trans:...Before all these buildings there was a cassis plantation there. There were Cassis trees there. Then I knew it belonged to the Baboo Family. On the other side of the road; I know this plot of land belongs to the Sokoo Family. Until which year? Maybe until around 72-73...)

2. *Rwiso Harrison:*

According to Olivier *Sime bef* lead to the orchard where there were mango trees and a man named Bonhom Genes or Zenn who used be cattle herder was living near this stream.

Based on other respondents' testimonies there is a myth linked to this place. Some mentioned that there used to be a Ti-Albert in *Rwiso Harrison*. (See Chapter Social Survey)

...rwiso Harrison la drwat...la lapli tonbe delo desann Saem delo desann al paraz kot legliz la li dan terin misie Maingard...Kifer sa bann non la ein ? Rwiso Harrison saem mo dir ou ti ena dimounn ti res la ti ena enn misie apel Harrison ler zot inn donn li sa non Harrisonn kan lapli tonbe bel bel delo desann ladan...<sup>145</sup>

(Eng. trans:...Harrison River there on the right...when its raining water flows downstream near the church it is on the land of Mr. Maingard...Why this name? Harrison River because as I told you there were people living over there there was a man named Harrison then people named [this place] Harrison when rains water flows in that...)

3. *Karo Taba:*

It was a tobacco plantation located on the estate of Mr. De Senneville near a place named *Laveret*. (See Chapter Social Survey)

4. *Karo Maraz:*

It was located opposite *Boutik Trwa Bra* near Kanal Maraz. According to Nicole, this plantation dates back to when the Maurel Family owned the land

...pou mwa mo sipose li ti touzur lor la propriete Maurel. Etan done ki bolom la ti fer zardin la, ti travay zis dan kann, li ti travay dan kann apre so letan lib dan lapre midi, li ti fer so zardin, se pour sa ki nou ti apel sa la, karo maraz...<sup>146</sup>

(Eng. trans:...for me I think it was on Maurel's property. Since the old man had his garden there, he worked in sugarcane [field], he worked in sugarcane [field] and during free time in the afternoon he was gardening, that is why we named it Maraz plantation...)

5. *Park bef* (Eng. trans. Cattle grazing land):

It was located on top of *Pon Misel* and on *Sime bef*. It was also known as *Kan Bef* (Eng.trans. Cattle Camp) or *Vie Kan* (Eng.trans. Old Camp).

It was a space used for cattle breeding and there were few people living there as well who were cattle herders.

...ti ena enn bolom lot kote, ti apel bolom maraz, li ti ena so zardin, me apre sa pli lwin ti ena park bef...kouma dir, ti ena park bef, ti ena enn chemin, pou bann bef pase, se pour cela ki nou ti apel sa simin bef...Donk, ti ena dimounn ti abit laho, ti ena enn...kan? Wi. Ti ena enn ti kan laba. Inpe par laba, ti ena kelke fami ki ti abit laba...<sup>147</sup>

(Eng. trans:...there was an old man on the other side, he was named Old man Maraz, he had a garden, but further there was a cattle grazing land...how to say there was a cattle grazing land, there was a road, for the cattle, that is why we called it Cattle Road...So there were people living up-there, there was a...camp? Yes. There was a camp over-there. A little over-there, there were some families living over-there...)

Photo 38 *Park Bef*

Source: TJC/6/AC/SiteVisit/ PH 36/P/LaMivoie/20June2010

Other gardens and plantations were located on estate land at the entrance of *Sime Gorz* such as *Karo letchi* (Eng.trans. Lychee Plantation) and *Karo zarico* (Eng.trans. Beans Plantation).

...Kot pon la se ki mwa mo kone bann la ti ena 2- 3 zardin tiena. Ti ena zardin kot bor la rivier la ti ena bonom kokom ti la bann la ti fer bann zardin...<sup>148</sup>

(Eng. trans:...I know that near the bridge there were 2-3 gardens. There were gardens on the riverbank the was Old man Kokom there they did gardens there...)

There were gardens named *Zardin Bombaye* (Eng.trans. Marathi garden) on marshy land, before the Grande Rivière Noire Bridge near *Boutik Trwa Bra*. The gardens were named such because Marathi-speaking people used to work in them, as the Marathis were the horticulturalist in the region.

As indicated by the 1851 and 1871 censuses, it seems that after abolition of slavery and the introduction of the indentured labourers, the agricultural workers were mostly the Indo-Mauritians who outnumbered the 'General population' in agricultural class.

Table 12 (a)

There were plantations at the north entrance of the Cité La Mivoie, as well, on the land of Baboo and Sokoo families such as a Eucalyptus plantation and a Cassis plantation. All these gardens disappeared with the expansion of the sugarcane fields and with the residential developments.

The introduction of sugarcane plantations led not only to a reconfiguration of spatial arrangements but also to a shift from a semi-subsistence living to one dependent solely on mass markets and consumption.

### Contemporary occupation patterns

Cité La Mivoie was a fishing village since traditional fishing activities historically such as since slavery constituted a means of subsistence as well as the livelihood for the local population. There is still a generational transmission of traditional fishing techniques and knowledge such as vernacular fishing terms and the names of the various *pas* (Eng.trans. Natural passages in the lagoon).

..Be Wi se enn zafer ki... zenerasyon a zenerasyon...mo gran per li ein dizon la mo so ti zanfan mo al la pes avek li selma mwa kan mo trouv li koste la letan li pe koze Trou zeguïy la ein si pa...<sup>149</sup>

(Eng. trans:...Yes it is from...generation to generation...my grandfather it is let say I am his grandchild I go fishing with him but when I see him approaching the coast when he is speaking needle hole or...)

However, bad fishing practices have led to the depletion of the fishing stock and the recent development projects have taken a heavy toll on the fishermen' plight. Traditional fishing is a dying activity and as is traditional fishing knowledge.

Presently, the traditional fishermen face difficulties to earn a living from the sea. They live a harsh life with no fixed revenue as their income depends on the whims of nature and on their catch. In times of bad weather and 'dead' seasons, the registered fishermen (there are approximately 40 professional fishermen registered) rely on the government allocations and they live on their savings made during the fishing seasons from their earnings from the sales of their catch.

Some of them do multiple jobs, when they are not at sea they work as labourers in the surrounding *chassée*, builders and gardeners. The majority of them either never went to school or left school before the end of the primary education cycle; it is difficult for them to find a job. They are either illiterate or have only some basic literacy knowledge.

Furthermore, they have acquired their fishing skills from their elders thus perpetuating the fishing tradition within the family. Because of lack of employable skills, these residents face difficulties to find a new stable and secure job and have no other choice than to try earning a living from the sea. But, the depletion of the fishing stock is threatening the transmission of this traditional knowledge with parents being conscious that traditional fishing is a dying activity and that the future generation will not earn a living from this activity.

Most fishermen in the *Cité* work for a *banyan* (Eng.trans. Wholesaler Middle man or Fish trader) which means that this system still prevails. In this first case, the fishermen are not self-employed as they work for the *banyan* that provides them with boats, fishing materials and a salary and in return, the catch is the property of the *banyan*.

In the second instance, there are fishermen who are self-employed, as they own their own boats and fishing materials. Although they do not work directly for the *banyan*, instead of selling their catch directly to the consumer, they sell it to the *banyan* because they find it easier to sell to the fish trader as it is hard for them to go fishing and at the same time sell their catch.

While, on one hand, it is easily earned money, on the other end, the *banyan* exploits them as they sell their catch for a meagre sum of money to the trader who in return sells the fish for twice or three times the price in town. There were attempts in the past to reunite the fishermen and the *banyan* in a cooperative system to regulate this practice but the initiative failed.

In line with Louis Daniel, the Co-operative Societies in the locality including the fishermen Co-operative did not work because the residents did not trust the administration that were perceived as thieves. This mistrust might result from a lack of communication from the administration and consequently lack of knowledge at grassroots level on the functioning of the co-operative formula and of the responsibilities (especially financial responsibilities) incurred when entering this society.

...me ki ete sa kooperatif la pes...kisanla ki dan kooperatif la pess? isi pena avan ti ena ...[name deleted] inn tro kokin dan kooperatif...[name deleted] mari kokin inn kokin dan kooperatif...ti ena de bato par isi enn le roi...ti apel Charles Fournier...apre lerla ti apel James Ornel enn bato fib sa fib de fer moter diesel se gras a [name deleted] ki bann la zot inn perdi zot bato. ki fer? li voler, li kokin dan kooperatif enn tigit linn kokin sa boug la...me ki fer ou dir linn kokin kouma linn kokin? kouma linn kokin? li mem kone kouma... (Eng. trans:...what is the fishing co-operative...who are the memebers in this fishing co-operative? Here there is no [fishing co-operative] before there was...because [he] stole too

much in the cooperative...[he] stole lots in the cooperative...there were two boats here one the king...he was named Charles Fournier...then the other was named James Onel...it was a fibreglass boat with a Diesel engine it is because of of [him] that they lost their boats. Why? He is a thief he stole in the cooperative he stole lots this man...but why you say he stole how he stole? How he stole? He is the one who knows how he stole...But he is the one who stole. See the other cooperative over there, this cooperative is not for fishing, it is a shop, in it also they stole they closed the cooperative...But how they lost their boat? Do not know if because of this [man] this man he is the cooperative president he is the one who knows what he did then they lost their boat. But who took the boat then? The bank because they borrowed money from the bank. Hence, it means there are fishermen who work here but they are not member of the fishing cooperative? Here we are all fishermen but we are not members of the cooperative...)

Intensive development of tourism in the region and intensive fishing, have negatively affected the marine environment that fishermen consider their natural heritage. Consequently, the new generations of fishermen need now to find new means to earn a living from the sea.

Indeed, following the depletion of the fishing reserves in the lagoon, the closing down of the salt-pans and the disappearance of the sugarcane fields, many young residents, have seized opportunities offered by the tourism sector and took employment in new sectors closely linked to the tourist industry.

Nonetheless, based on Michael Jean Pierre testimony, the boat skippers still earn a meagre salary of 500 rupees to 1,000 rupees per day's work. In view of the fact that traditional fishing is a dying industry and that aquatic life is threatened by bad human practice such as the depletion of the fishing stock in the lagoon, it leads us to wonder how long the residents will still be able to earn a living from the sea?

Fieldwork uncovered that most villagers are waged employees but also that there are few self-employed residents who have set up their own small and medium-sized enterprises. For example, Michael Jean Pierre is a skipper who has set up a boat company and Devi owns a *tabagie* (Small retail shop) and other residents have seized the opportunities offered by the expansion of the tourism industry in the region to develop their business.

These cases can be considered as success stories yet, given the negative 'backlash' on the local tourist industry resulting from the actual global economic and social crisis; we need to question the long-term sustainability of these businesses highly dependent on tourism.

People value the future Integrated Resort Scheme developments in the region from the vantage point that these developments will create wealth and uphold regional and overall economic growth with the creation of new and better-paid jobs and foreigners injecting money in the local economy.

***Lack of employment opportunities and vulnerable employment:***

Testimonies diverge regarding the employment status of the *Cité* residents. For Father Jean David, there is no problem of unemployment in Cité La Mivoie but, on the contrary, a situation of almost full employment since almost all the villagers works.

However, according to Marie France, Varnanaden and Nicole there is a problem of unemployment among the young generation that is sustained by the statistics illustrated in Chart 14 below.

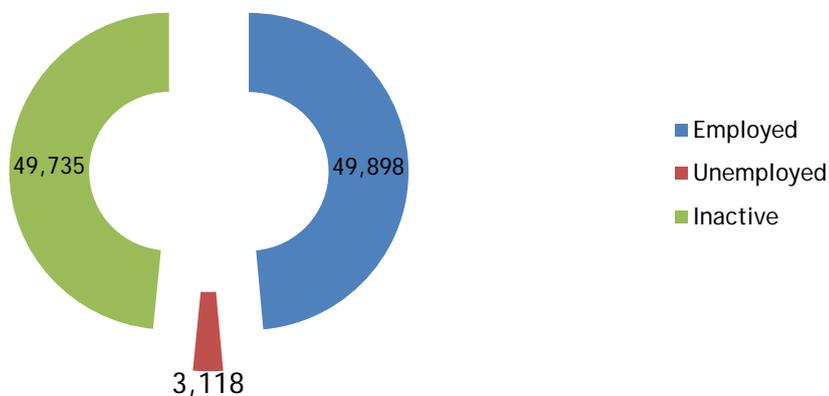

Photo 39 Fishermen Drinking at 11 o'clock

Source: TJC/6/AC/SiteVisit/ PH 37/P/LaMivoie/12May2010

There is a close correlation between unemployment and educational underachievement among the young people. They are not employable because of the lack qualifications and skills. The problem of academic underachievement will be addressed later.

Chart 14  
Resident Population 12 Years of Age and Over by Sex and Current Activity Status for Black River District

Source: Central Statistics Office, 1990. Housing and Population Census, Vol. VIII, Port Louis. Mauritius

While the majority of the residents are blue-collar workers as indicated in Chart 14, there are a minority of low tier white-collar employees. Although they perform white-collar jobs, yet, they have limited promotional prospects to high tier jobs because of lack of academic qualifications and appropriate skills. The risk of disbanding is a constant threat as the under-qualified employees are the prime targeted category.

Furthermore, even though almost all the residents work, most of them are forced into vulnerable employment. The *Cité* dwellers, are either casual workers or part time workers doing multiple jobs.

Because of lack of employment, opportunities they are forced to take-low paid vulnerable jobs and to accept sub-standard working conditions that lack social protection and safety nets and that undermine their fundamental labour rights. Consequently, they are unable to generate sufficient

savings to offset hard times of low economic demand. There are few residents in full, secure and productive employment.

The Millennium Development Goal Report (2010) reported that the labour market conditions will continue to deteriorate and will likely threaten much of the progress made over the last decade towards decent work. The economic deterioration resulted in a sharp drop in employment-to-population ratios and labour productivity.

Although the *Cité* does not face a problem of mass unemployment, the *Cité* dwellers have limited employment opportunities and have no other choice than to resort to underpaid and vulnerable employment that subsequently keep them in relative poverty. Given that, most of them live in households where individual members subsist on less than 10,000 rupees per month, they are the 'working poor'.

Since the majority of the residents do not possess a private motorvehicle and thus rely on the public transport, travelling long distances to town deter the latter to find a work outside Black River Village and the neighbouring localities. To work in the vicinity is more advantageous to them. For example, most interviews were conducted as from two in the evening when the residents were back from work. Most of them and especially the women respondents mentioned that they appreciate to get back home at 'decent' hours as they can do their household duties, take care of their children and do other social voluntary work. Few residents were identified working for companies located in town.

#### Working conditions

Like all capitalist systems, Mauritius is a stratified society that nurtures social class divisions based on gender, race, ethnicity, education and occupation. As in any class-divided society, Mauritius perpetuates economic and social inequalities for the majority of its citizens and Cité La Mivoie exemplifies the plight of capitalism.

As stated by Father Jean David, Mauritian society is based on unequal wealth distribution to the detriment of the working classes and on the exploitation of blue-collar and menial workers. Mauritius development was and is still founded on labour exploitation.

In line with the testimonies, those who are at the bottom of the pyramid perceive their situation as a perpetuation of slavery as they still constitute a pool of servile labour force and their working conditions are harsh.

'...dan la realite ena pe krwar ki li siperier...blan! Hindou...mo panse akoz zot ena later, zot ena kas, zot ena la rises. Mo panse sa ki fer zot krwar ki zot siperier...sinwa li viv enn viv kool li se ki mo aprann, zame mo trouv enn sinwa gagn problem pe diskite li mix...kreol pe vinn esklavaz, pe kraze anba lipie bann la mo trouve...'<sup>151</sup>

(Eng. trans: ...In reality there are people who think they are superior...white! Hindu...I think because they have land, they have money, they have wealth. I think it is why they think they are superior...the Chinese they live a quiet life that is what I have learnt, I never saw a Chinese having problems quarrelling. He mingles...Creoles are becoming slaves, are oppressed by the others...)

Indeed, all the respondents stated that their employers do not recognise their human and legal rights as laid down in the various Human Rights Conventions and in the labour law exploit them.

The Employment Rights Act of 2008 prohibits employers and prospective employers from treating workers and prospective workers in a discriminatory manner in his/her employment or occupation and in access to employment or occupation.

This is sustained by the International Labour Organisation (ILO) labour standards and Decent Work Agenda that aims to achieve decent work for all by promoting social dialogue, social protection and employment creation, as well as respect for international labour standards<sup>152</sup>.

For example, Claudia, Kathy and Nicole testified that, often, employers request their domestic workers to work every day even during weekends and public holidays without being paid overtime.

'...dizon, kom travayer ein, kom travayer nou tou nou ena nou drwa, eski zot respekte nou avek nou drwa ? ankor ena pe bizin travay dan dimans ein, mo kone lotel li enn lot zafer, me koumadir nou travay anplwaye de mezon la, eski dimans nou ankor pe bizin vinn esklav ar zot, fer zot lili, fer zot dite ek nou pa gagn drwa, si nunn pran sa kondisyon la, na pa gagn drwa dir nou pa pou vini parski nou oblize. Eski zot pe pey nou dimans kouma bann lotel ? dimans zot ena enn lapey ki plis lor la. Pou nou li mem afer. Nou pe bizin esklav avek zot... mwa mo pe panse si zot ti pey nou, nou pa ti pou santi nou esklav. Lor sa larzan ki zot pe donn nou la, nou oblize fer sa avek zot parski kondisyon la li koumsa...lapey la ena gagn 2500, 2000, bann seki gagn plis ki 3000 rounpi me travay la li ogmante li, li ogmante li ale vini travay la li ogmante me zame pou dir ou koumsa travay sirplis pu pey ou pu seki ounn fer apar. Me kouma ou pran ou, ou pa trouve ki li ankor ena sa mantalite esklavaz la ladan parski mwa mo panse si enn dimounn pe travay plis, li merit gagn so saler seki linn fer...dimans, konze piblik, si ena 2 dimounn, enn konze piblik travay, enn dimans travay, ena le premie zanvie si zot ena 2-3 dimounn la, ena la pou dir ou la sanala le premie zanvie vini, lot la le de pa vini, toultan enn roulman. Lesklavaz la pa pe fini, ankor pe, li lor touzur mem lapey, zame pou dir ou po u pey sirplis...'<sup>153</sup>

(Eng. trans:...let say, like work, we all have our rights, do they respect us and our rights? There are still who have to work on Sundays, I know in hotels it is something else, but we work (as) domestic workers, on Sundays, do we still have to be their slaves, do their bed, their tea and if we have agreed to these conditions we do not have the right to say no we won't come because we are forced to. Are they paying us our Sundays like in the hotels? Sundays they have a greater salary. For us it is same (salary) we have to be their slave...I think if they paid us we would not be feeling like slaves. Besides the salary we earn we need to manage with that and with them because it's the condition...The salary, there are people who earn 2500, 2000, there are who earn more than Rs 3000 but the work increases...but you never paid for the additional work or for the extra work. But how you take it you, you do not find that they still have this slave mentality because I think that a person who works more he deserves his salary for his work...Sundays, public holidays, if there are two people, one works on public holidays, one on Sundays, some on the 1<sup>st</sup> January if they have 2-3 people, they will tell this one to come on the 1<sup>st</sup> January, the other does not come on the 2<sup>nd</sup>, each time there is a shift. Slavery does not end, still (exists), still have same salary, never tell you that you will be paid more...)

This practice is a breach of Article 14 of The Employment Rights Act that states that a normal day's work for an employee, with the exception of part-time workers or a watch-person, is 8 hours and that the latter can work in excess of the stipulated hours without additional remuneration if the number of hours in a fortnight does not exceed 90 hours. If the daily paid worker has completed 90 hours in less than 12 days in a fortnight, the latter has to be paid 12 normal day's basic wage.

For the respondents, despite slavery was abolished in 1835, in fact, it is still perpetuated in Contemporary Mauritius but under modified forms. For them they are still slaves as their employers perpetuate illegal racist, discriminatory practices and subjugate them. They are denied their basic human rights.

For generations they did not and, until now, do not benefit equal opportunities and have limited prospects to build social and economic capital. They are kept in servitude. For them they have no other choices than to be submissive to their employers for their livelihood as illustrated in the testimony below.

'...Ena dimounn rakont ou zot rant travay tel ler a tel ler pa gagn narien pa gagn drwa tou sa pa gagn drwa tou sa ek sirtou sa bann etranze la zot fer koumadir letan deskav ankor la...me selman dimounn la li bizin travay li bizin travay non parski zordi tou dimounn bizin travay. Ek bann anploye morisien ? Wi me li preske parey ein preske parey. Me kifer zot ena sa mantalite la? Ou kone par kont mwa mo kapav dir petet la bann zenerasion kip e monte aster dizon dan le 30 an 40 an zot korek me ena mem ki ena 70-80 ena certain ki korek me ena depi depi zenes li enn pikan li marye si li pou pikan koumadir li pou panse sa nwar bizin bizin dominn li bizin dominn li koumadir bizin so esklav...'<sup>154</sup>

(Eng. trans:...There are people who tell you they start work from that time to that time, they get nothing they are not allowed to touch thing and especially the foreigners they behave as if it is still slavery...but the person needs to work, he needs to work no because now everyone needs to work. And the Mauritian employers? Yes it is almost the same almost

the same. But why do they have this mindset? You know however, I can say that the coming generation let say those between 30 years of age and 40 years of age they are nice but there are who are 70-80 who are nice but there are who since their young age who are nasty when he marries he is still nasty how to say he thinks that this person needs to be dominated he needs to dominate the latter how to say the latter needs to be his slave...)

Domestic workers are often 'de jure' or 'de facto' denied labour and social protection because of common held perception that, firstly, domestic work takes place in the home and thus is invisible and under-rated and, secondly, a feminisation of household works that traditionally were carried out without pay. For example, they are not registered at the National Pension Fund.

The Employment Rights Act 2008 stipulates that an employer every month should deduct one percent of the basic wage of this employee as contribution to the National Pension Fund. The National Saving Fund Act 1995 states that every employee is eligible to hold a National Savings Funds into which are credited 2.5 percent contributions payable by the employer, one percent payable by the employee and other contributions. The objects of this Fund are to provide for the payment of a lump sum to the employee on his/her retirement or at the time of his/her death and to set up and operate for the benefit the employee such schemes, including loan schemes, as may be prescribed. However, it seems that in reality, this Act is not systematically enforced.

Domestic labour is still under-reported and under-declared and hence remains in the invisible economy. For example, as per the Digest of Labour Statistics 2009, in March of the same year, 241 (175 males and 66 females) employments were recorded in community, social and personal services in the Black River district. These figures do not reflect the extent of domestic work and the gender dimension of this occupation.

In line with the ILO, one of reasons for the under-reporting of work performed by the domestic workers is that it is not considered a 'real work' and is 'generally thought of as the labour market' because it does not 'take place in a factory or an office, but in the home'. Hence, domestic workers suffer from lack of decent wages, bad working conditions, undefined working time, no weekly offs, loneliness, no career growth, no skill development, victimisation at the hands of traffickers/placement agencies and even violence, abuse and sexual harassment at workplace.<sup>155</sup>

Indeed, the public perception of domestic work is often that it is undignified work, and the workers in this sector should be pitied because they are unqualified and unskilled<sup>156</sup>. This social representation of domestic labour is rooted on the colonial mentality whence domestic slaves and particularly slave women fulfilled such occupations. After the abolition of slavery, based on the 1871 Census, the 'Indian Population' outnumbered the 'General Population' in the domestic class and men preponderated over women as indicated in Chart 10 below

Category	Male	Female	Total
Indian Population	11,374	1,209	12,583
General Population	3,042	3,005	6,047
Total	14,416	4,214	18,630

Source: Census of Mauritius and its dependencies taken on the 11<sup>th</sup> April 1871, Part I, E. Dupy and P. Dubois. Mauritius.

The *Ecole de Techniciennes de Maison* was set up in 2006 to offer free training to girls that have abandoned school to be qualified house workers to be not only employable, but also to teach them their rights to protect them from exploitation. For Jasmine, the manager, by providing training to the girls, they will be better equipped to negotiate their working conditions, as they will now be skilled workers.

In fact, this school falls under a programme of the National Empowerment Foundation to train the unemployed people, those above 16 years of age who have left school and unqualified people to develop employable skills to become blue-collar workers. This programme intends to uplift paid

domestic work to the category of skilled labour to upgrade and obliterate the stigma attached to domestic labour and ultimately for the workers to gain social status and feel more valuable.

Modernisation is a double-edged-sword in that the *Cité* residents are now dependent on their employers, the state and civil society for support and their livelihood. From generation to generation since slave times they have been conditioned to accept their vulnerable and underprivileged situation with hope of heavenly rewards in their afterlife and of a better hereafter.

They have learnt to somewhat surrender to the powerful ‘others’ such as religious institutions, government and non-governmental organisations to ‘save’ them. Therefore, there is no unworthy work and particularly in the present economic and social crisis whereby people have to work to earn a decent a living to sustain their family.

## 5.4 Education

### Mainstream Education

Family histories have uncovered an intergenerational transmission of academic underachievement in Cité La Mivoie in that few people have continued schooling until tertiary education and the children living in the *Cité* were identified as pupils at risk within the education system.

The family trees show an improvement in schooling across generations with more children now going to school until the secondary educational level and pre-vocational school that implies that the new generations are supposedly numerate and literate compared to their elders.

The first generation of settlers in the *Cité* either did not go to school or stopped schooling before the end of the primary educational cycle. The second generation went to school until CPE or Standard 4. Only one person was identified who reached the secondary education cycle, namely, Marie France who went to school until Form 2.

When reaching the third and fourth generations, it can be observed that they continuing schooling until secondary level and even until HSC. Others they go to pre-vocational schools.

These generational differences can be explained by the fact that the basic compulsory education law was proclaimed in 1993 and education up to 16 years old was made compulsory in 2005. Before, education was not seen as mandatory.

Furthermore, although since 1944 and 1976 primary and secondary education respectively is free; yet, academic education was not accessible to all as not all the segments of the population were empowered to send their children to school.

In fact, based on the Millennium Development Goal Report (2010), rural children are twice as likely to be out of school as urban children are. The biggest obstacle to education is poverty and the rural-urban gap is slightly wider for girls than for boys since girls and women are, often, the first victims of poverty.

However, access to academic education does not necessarily mean being numerate and literate. Access to academic educational opportunities is one thing and quality of the educational system and academic achievement are something else.

Actually, field research revealed, that across generations there is a problem of academic underachievement in that few children residing in the housing estate went until tertiary education and that a significant portion of the population drop-out of school before the end of the educational cycle.

...se matin mem, mo trouv de zanfán pe roul la rou pe ale. Lerla mo finn dir to pa finn al lekól, non. Mo dir koumsa be ki fer to pa finn al lekól, la polis pou vinn rod twa? Lerla zot dir koumsa, non, non, non, nou pe ale, la nou pe al kot nou la. Be zot al kashiet. Alors zot pa pou sorti lor chemin la, la polis pou may zot. Be tou sa la enn paran li bizin konsian li bizin get so zanfán. Parski ledikasion li tou...<sup>157</sup>

(Eng. trans:...This morning, I saw two children playing with a wheel. Then I told them you have not gone to school. I asked them why have you not gone to school, the police officers will come look for you? Then they replied no were are going, we are going home. In fact, they were going to hide. Then they will not be on the road, they police officers will not catch them. But all this, parents have to be conscious they have to look after their children. Because education is everything...)

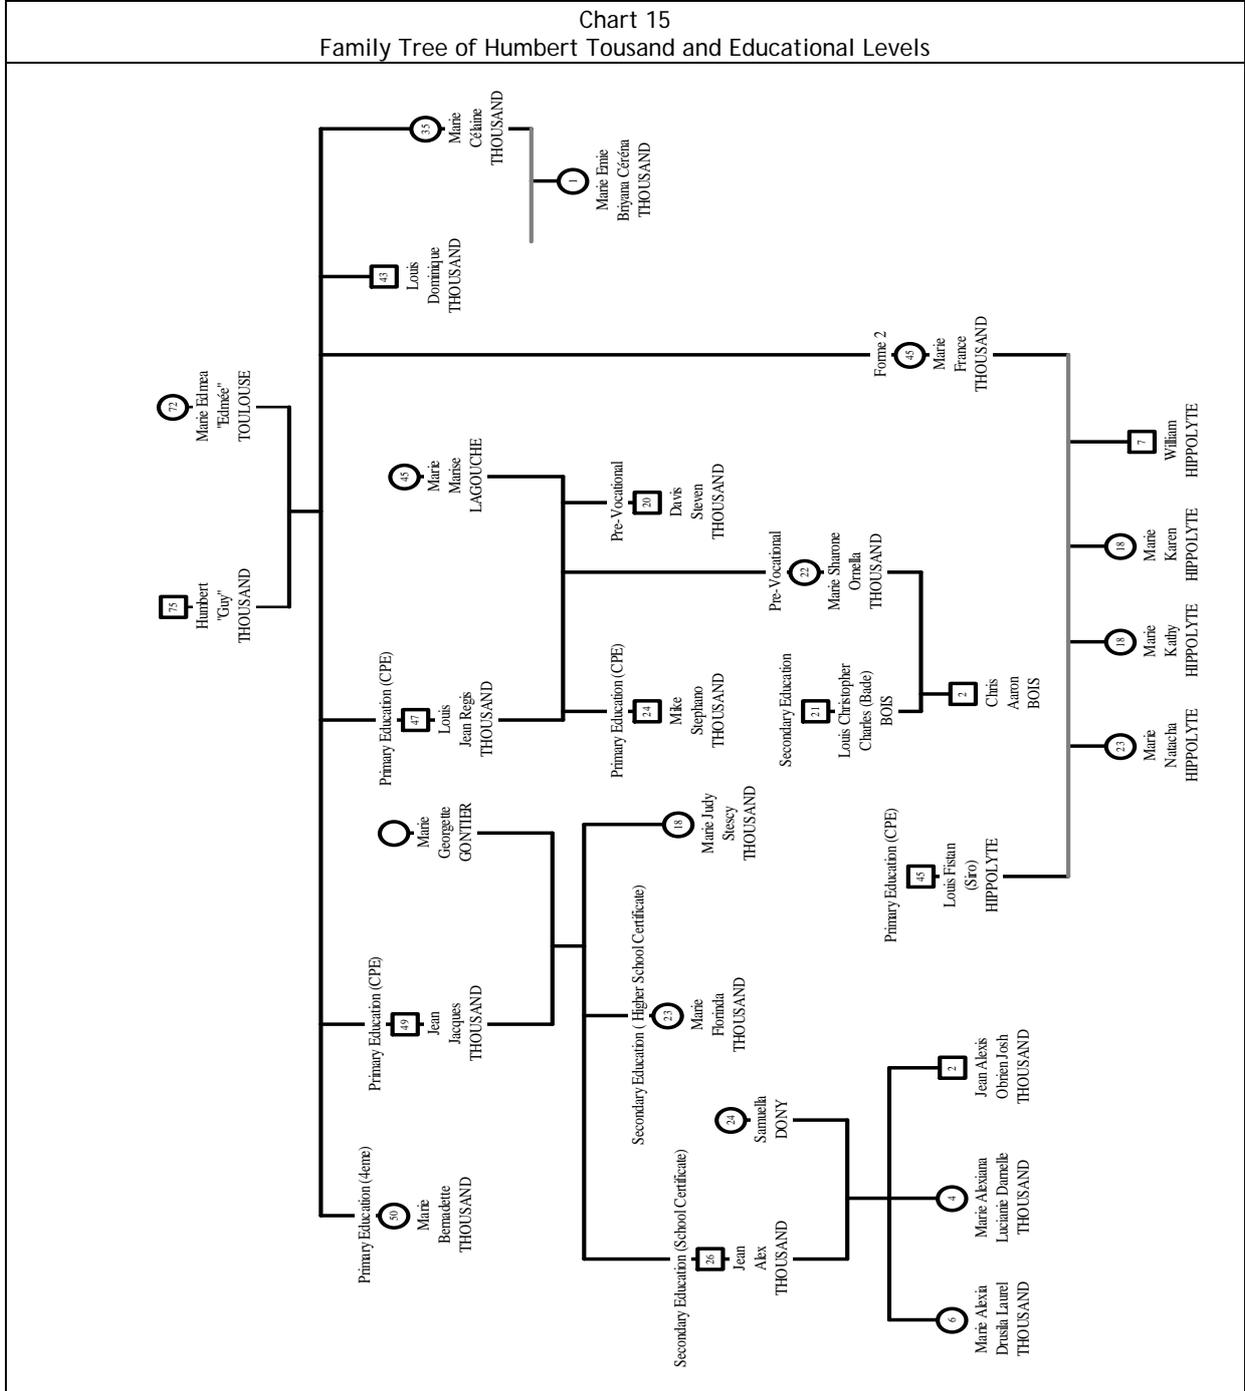

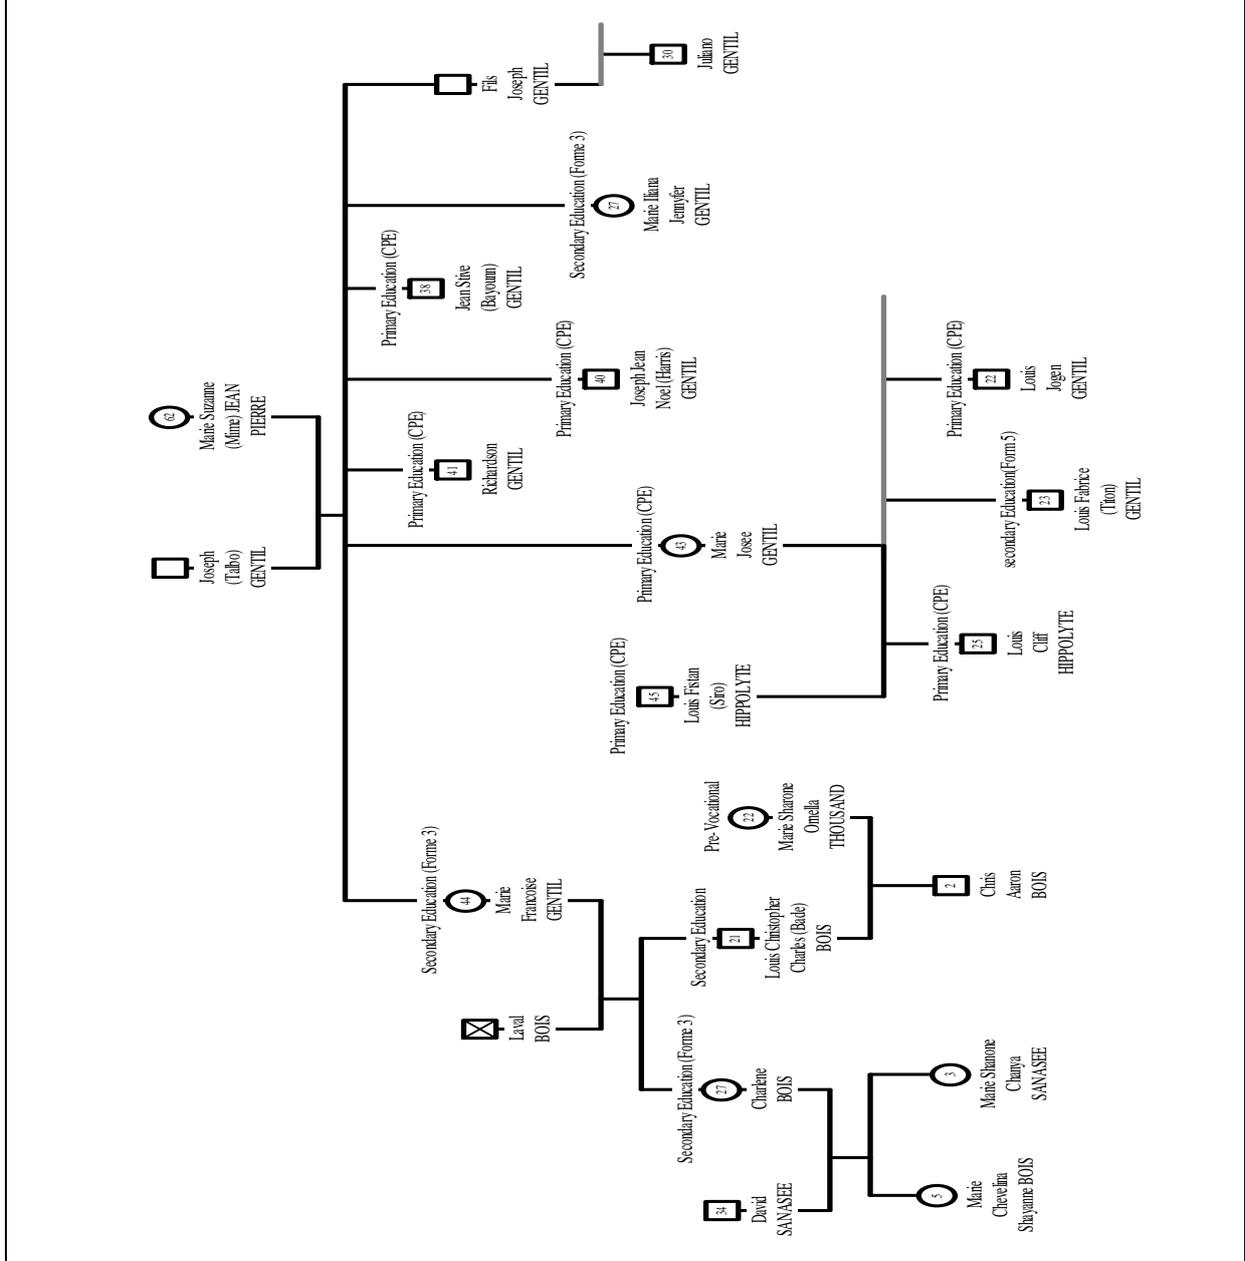

Chart 16  
Family Tree of Marie Suzanne Jean Pierre and Educational Levels

Only two respondents were identified that continued schooling until tertiary level namely Marie Michèle Hippolyte who is actually doing a Post Graduate Certificate in Education and the son of Devi who went to England to do his ACCA.

Even if nowadays access to academic education is democratised and education is supposedly free, why does academic underachievement still affect the residents of Cité La Mivoie and particularly the Creole segment of the local population?

Achievement gaps were identified between the Marathi-speaking residents and the Creole residents as based on the testimonies, the Marathi were said to be academic achievers compared to the Creoles since the former tend to continue schooling until Form 5 or even HSC.

..Bizin dir dan le pase boukou ti aret siziem me finn ena enn ti ameliorasion de kote sirtou bann indien ki kontign zot letid plis ki katolik...ena ki aret li siziem mem me ena ki kontign ziska form 5...De fwa zot dir ou problem finansie, avan zot ti pe dir ou sa me aster koma parski gagn ase ed ar gouvernman pou enn zanfan al lekòl...Ou bien si zot inn coumens al collez, tan dir en an de an apre ou trouv zot avek zot ti vent, zot in fini anseint. Enn ti pe zot aret lekòl de fwa lakoz sa...Tandi ki ou dir mwa ena enn diferans entr bann kreol ek bann indien? Bann indien zot kontinie ziska ki laz zot? Form 5, HSC, SC, Lower 6. Be kifer bann indien kontinie lekòl zot? Petet se lapui ban paran ek kot lanvironman osi zot viv...<sup>158</sup>

(Eng. trans:...We have to say that long ago many stopped schooling after Standard 6 but there has been an improvement especially among the Indians who continue school further [compared to the] Catholics...There are [some] who stop after Standard 6 but there are who continue until Form 5...Sometimes they tell you [because of] financial problems, before they said that but now how come because they receive governmental aid to send their children to school...Or if they started to go to college, you hear that after one year or two years they are pregnant. Sometimes they drop-out of school because of that...you told me there is a difference between the Indo-Mauritians and the Creoles? The Indo-Mauritians they continue until what age? Form 5, HSC, SC, Lower 6. Why the Indo-Mauritians continue schooling? Maybe because they have parental support and their living environment...)

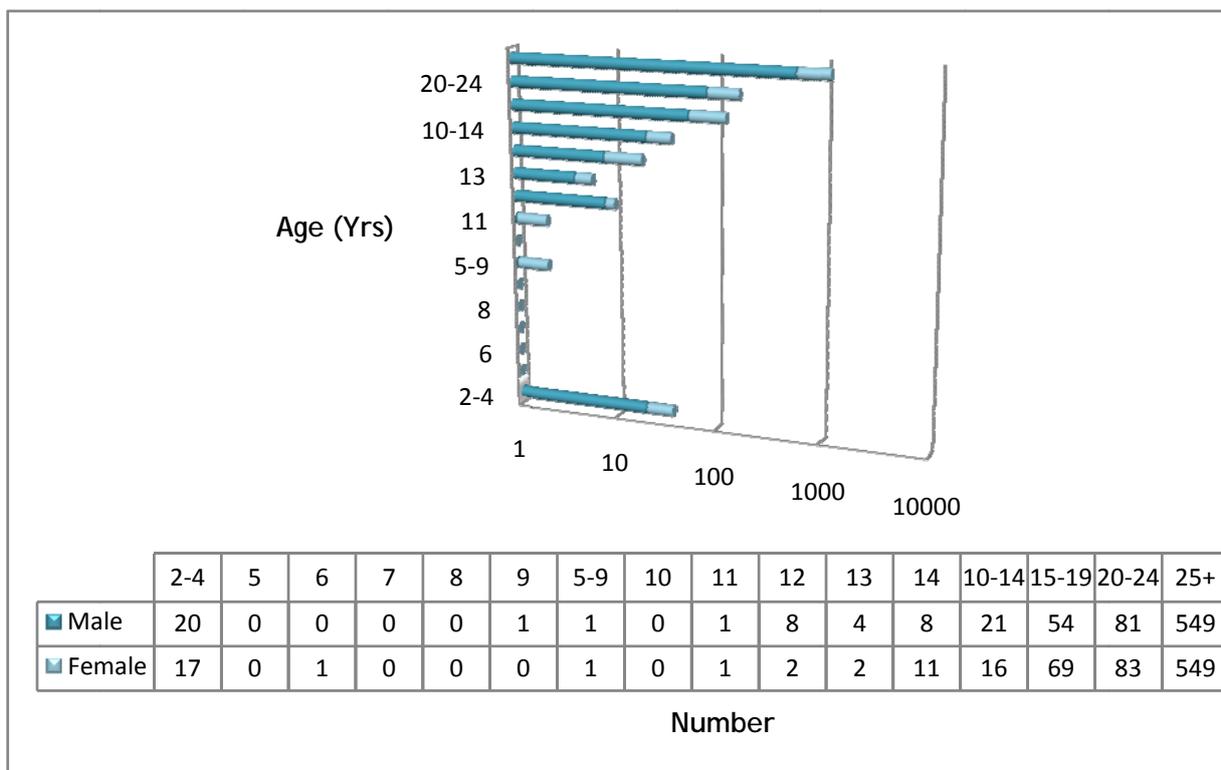

Given that the *Cité* dwellers share, to some degree, the same social and economic realities, poverty as justification for differential achievement and Creoles underachievement is of little solace.

In fact, fieldwork revealed that school ‘drop-out’ is still a major problem in the region (Chart 17).

In addition, the testimonies uncovered that society maintains and perpetuates negative stereotypical representations of Creoles rooted in racism and that even the Creoles hold racist beliefs on their fellows. Subsequently the reasons put forward by the respondents for academic underachievement of the Creole *Cité* dwellers were very much founded on racist underpinnings.

Most of the interviewees such as Devi and Claudia mentioned that because the Creoles have a fatalistic approach to life they are not motivated to go to school, to study and to achieve in life. In addition, they stated that there are Creole parents who do send their children to school because they have not gained consciousness of the importance of schooling as they lack ambition and are not far sighted.

(Eng. trans:...The working class means manual workers. It can be how to say that a mason, it can be how you say that a craftsman...something I have observed that the working class has two mindsets. There is one mindset of the working class that unfortunately the young people how say that...father is a fisherman, mason etc and finally let say that they are in a matrix in which they remain and they say that they are impregnated of a fatalist feeling, they say that their story is as such and that they won't be able to change it...but the second mindset that I observed and it is also subdivided in two parts, it is a first mind frame that states that here is I am in this working class...but how say that often there are working class parents that are conscious that education is the only means of get out. They inculcate it in their children. And the child succeeds in moving up socially, at educational levels. And when he succeeds...he does everything to valorise the working class and sensitise the working class

children that even though we come from the working class they can succeed in life...and second (mind frame) unfortunately...is that often working class parents again motivate their children to succeed in education. (They) give them all that they need and the children succeeds, he succeeds in reaching a good level but unfortunately what I observed is that he forgets where he comes from, he wants to forget the working class from which he comes...)

Others such as Emilienne, Sylviana and one of the headmasters testified that parents do not send their children to school pretending that they cannot afford to do so because of financial problems. Actually, they receive much aid from non-governmental organisations such as free schoolbooks, educational materials and food assistance.

These testimonies stem from the deficiency discourses which, according to Stinson (2006, p. 483), focuses on the perceived deficient cultural, schooling and life experiences in general of Black children.

School administrators and teachers who participate in these discourses often claim that the lower academic achievement of 'Black students' exists because 'Black children' experience higher rates of poverty living in high crimes communities, unstable single parenting and minimal parental involvement as well as suffering from the negative effects of slavery, segregation, racism and discrimination.

Stinson coined that the dynamics of socio-cultural contexts inside and outside schools affect the students' knowledge acquisition and understanding. Historical and socio-cultural structures in which teaching and learning are embedded significantly impact on students learning and performance and especially on those who have been marginalised historically. The student's ability to accommodate, reconfigure or resists the available social, cultural discourses including institutions and language, signs and practices that order and sustain socio-culturally constructed forms of social existence influence their performance.<sup>160</sup>

His argument is taken by The United Nations that sustain that the children remain out of school for a variety of reasons among which social and cultural barriers to education are common causal factors.<sup>161</sup>

Accordingly, we should not undermine differential history and cultural background of these children and the fact that the children residing in the *Cité*, since their birth, are disadvantaged in that they are born in an econo-ethno-stratified and unequal society.

#### ***Academic under-achievement and School 'Drop-outs'***

Academic underachievement and lack of employable skills result from three causal factors identified. Firstly, the young people have either failed the Certificate of Primary Education (CPE), the primary educational cycle.

Secondly, they have left out of school after failing the primary educational cycle or at the early stage of secondary educational cycle after Form 4 or Form 5 (because they have failed the School Certificate exams).

Thirdly, those who have continued schooling until the end of the secondary cycle have failed at the Higher School Certificate (HSC) exams.

When the ranking system was abolished in 2001, the grading system was introduced that perpetuates the elitist nature of mainstream education that focuses on academic achievement and does not cater for the holistic development of children. The children who do not adapt are, systematically excluded and withdrawn from the system.

In line with the testimony of one of the headmasters, the children living in the *Cité* who fail the CPE are not systematically canalised towards the pre-vocational schools, as there is no 'follow up' system in place.

Furthermore, the students who went to the pre-vocational school of Black River, once they leave school to attend polytechnic school such as the IVTB School in Ebène face adaptation problems because of the cultural shock.

Many local students do not adapt as, either they are stigmatised because they come from an underprivileged region, or following cultural clashes. Facing adaptation and integration problems, they are de-motivated and choose to abandon further schooling.

...Après trois mois, quatre mois, nos mêmes élèves qui étaient motivés, qui te disent que...ils ont laissé tomber. Ils ont laissé tomber, et ils te disent, "tro diferen laba, nou pa adapte, nou pas kapav, tro lwin". Voila. Par exemple, les élèves d'ici vont soit à Mont Roches. Mes élèves vont à Mont Roches, sont envoyés à Mont Roches, ou alors sont envoyés à Surinam, après quelque mois, qu'est ce qui se passe ? Tu vas me dire oui, le transport est payant. Oui je suis d'accord. C'est vrai, le transport est payant. Mais pour eux, c'est un peu les déracinés...Avec des sous cultures qu'ils ne connaissent pas du tout...<sup>162</sup>

(Eng. trans...After three months, four months, our students that were motivated, they tell you...that they abandoned. They have abandoned and they tell you, 'too different over-there, we do not adapt, we cannot, too far'. Here it is. For example, the local children go either to Mont Roches. My students go to Mont Roches, they are sent to Mont Roches, or are sent to Surinam, after a few months what happens? You will tell yes, transport is not free. Yes I agree. It is true, transport is not free. But for them they are uprooted...with the subcultures are not familiar with...)

The local children experience multiple victimisations as the educational system that seems to promote middle-class values to which they do not identify.

For example, when they attend a school that is not in their vicinity or where the majority of the students are from a different social milieu and religio-ethnic background they feel stigmatised because of their differences.

This is sustained by Marie Michèle who used to live in the *Cité* and who testifies how at school and even later in life she experienced racist prejudices because of her ancestral origins, phenotype and geographical origins; because she is of African phenotype and presumed to be of slave descent and native of Black River.

...Secondaire Swami Sivananda SSS, Bambous. Ça était très dur...sur 41 élèves il y avait 2 ou 3 créoles, j'étais la seule, non, on était deux comme si, d'être crépus...Rivière Noire était...considéré comme endroit défavorisé...et moi on m'a tout de suite, on m'a donné un joli nom africain, que j'ai détesté pendant 6 ans mais c'est après que j'ai réalisé et j'étais très fière de ça. Mais ça m'a miné...C'était Macumba. Macumba et puis Bongo, il y avait deux...j'étais en Forme 4 ou en Forme 5, on avait écrit sur le nom Macumba entre brackets Jean-Pierre is from Africa, entre brackets - Rivière Noire. Donc pour me dire de toute façon, ben tu sors de l'Afrique toi, Rivière Noire était considérée comme l'Afrique...<sup>163</sup>

(Eng. trans:...Secondary Swami Sivananda SSS, Bambous. It was very hard...Out of 41 students there were 2-3 Creoles, I was the only one, non, we were two like that, to have frizzy hair...Black River was seen as an underprivileged region...and me they straight away they gave me a nice African name, that I hated for six years but later on I realised and I was proud of that. But it upset [me]...it was Macumba, Macumba<sup>164</sup> and then Bongo. There were two [labels]...I was in Form 4 or in Form 5, it was written on [the blackboard] the name Macumba in brackets Jean Pierre is from Africa, in brackets - Black River. So to tell me that I come from Africa, Black River was seen as Africa...)

According to the head master of Black River pre-primary and primary school, in his school, the literacy rate is approximately 30%, the pass rate approximately 40% and absenteeism approximately 10% that he finds reasonable for a ZEP school. Nevertheless, the figures do not reflect the reality of the education system.

Even though the pass rate and the literacy rate are said to be satisfactory, the mainstream education system is deficient as it fails to fulfil its role, to educate all children and develop their skills and capital to integrate society. Our system is dysfunctional as it caters for a small category of children and marginalises others who are at a disadvantage.

The problem of school 'drop-outs' affects both boys and girls but according to one of the headmasters there are gender differences in academic achievement with girls being more motivated than boys to succeed academically. Then, how is it that in 2009 out of 14 girls 10 girls failed their S.C exams whereas out of 13 boys only three boys failed?

One of the reasons according to the latter is that when reaching Form 5 girls tend to develop new intimacy links with boys and consequently they tend to focus more on their romantic relationship that negatively affects their academic performance.

...ou kone ena de fwa. Get la mem la, ena enn tifi ti pe bien al lekol, apre linn kontan enn garson, li finn al rod enn anplwa, be li ti fer enn bon li ti pe al enn bon lekol. Be kouma li ena plisir...zanfan koumsa ki aret lekol? Wi. Ki laz parla, zot aret al lekol? katorzan kinzan...Ki fer zot aret lekol, ki zot al fer? Abe zot marye, zot fini al form enn foye, enn menaz...<sup>165</sup>

(Eng. trans:...you know sometimes. Look actually there was a girl that was going to school, then she fell in love with a boy, she went to work, she used to go to a good school. Why are there many...children that 'drop-out' of school? Yes. At what age they stop schooling? 14-15 [years of age]...why they 'drop-out' of school, what they do? They get married, they form a couple...)

This shift in their priorities is an outcome of patriarchy; of gender socialisation, that perpetuate gender differential roles among both the Creoles and the Marathi-speaking residents.

For example, Devi mentioned that while her son continued schooling until tertiary level, her daughter went to school until Form 5. She left school because she got married (at 17 years old) and her parent-in-laws did not want her to continue schooling.

...ek dir mwa, ounn ou garson inn fer ziska tertier alor ziska so ACCA, ek ou tifi inn fer ziska form sink. Err ki fer ou tifi inn aret lekol form sink? non, br ou kone dan la relizion Indou, kan enn tifi inn gagn demann kouma dir, be kote so bo paran zot pa finn lesli re kontinie, ou konpran la be lerla li finn gagn mariaz linn marye. A ki laz linn marye alor? E 17 an...<sup>166</sup>

(Eng. trans:...tell me your son went until tertiary level and did an ACCA and your daughter did until Form 5. Why your daughter stopped schooling after Form 5? None, you known in Hinduism religion, how to say that when a girl is asked for marriage, her parents-in-law did not let her continue [school], you understand then she married. At what age she got married? At 17 years of age...)

According to feminists such as Sharpe (1976) gender socialisation of children, underpin the construction of masculine and feminine cultural identities. Secondary agencies of socialisation such as media and peer groups reinforce these gender identities established during primary socialisation.

The former perpetuate traditional patriarchal values, norms and ideologies of marriage, domesticity and subordination. Subsequently, girls in the *Cité* are socialised in the traditional patriarchal dogma that they should get married at a young age because they need a man to take care of them and of their needs and wants.

For them to 'be with a man' or to 'be married' is the 'proper role of women' and if an adolescent girl does not have a boyfriend and if a woman is not yet married when she reaches her thirties, it is seen as a 'social problem' as it is considered 'socially and culturally unacceptable'. (See Chapter on Social Survey)

In line with Hammer (2003), both the home environment and the school environment affect children's achievement. For example, parental involvement in their children's education, peer group pressure, parental education and influences and the social and economic environment of the *Cité* have been identified as influential factors in children achievement gap.

According to him, both parents and teachers play a crucial role to make sure that every child becomes a high achiever and thus not only classroom environment should be considered in explaining achievement gap but also what happens to children before and after school.

We observed that the *Cité* is not a conducive learning environment. There is noise pollution with people speaking loudly, children screaming and music and television playing at full volume. The spatial organisation and arrangement of rooms do not provide for children to have a quiet place to learn and do their homework.

The *Collège du St. Esprit Rivière-Noire* has developed an afterschool assistance programme for students to stay after school hours to do their homework under the supervision of a teacher. Since they have developed this programme, the teachers observed that children prefer to stay after school than to go home as for them the school environment is like a cocoon where they feel protected from the influences of the external environment and safe.

...Parce que l'école reste un cocon hein. Beaucoup d'entre eux s'évadent de la maison, s'évadent de la réalité et préfèrent être à l'école...Pour eux de huit heures trente à deux heures trente ils sont au chaud bien encadrés. Ils sont bien traités par les enseignants. Donc c'est un peu un genre d'échappatoire. L'école est un peu un genre d'échappatoire...<sup>167</sup>

(Eng. trans:...Because school remains a cocoon. Many run away from home, escape [home] reality and prefer to be at school...for them from 8 hrs 30 to 14 hrs they are surround and warm. Their teachers treat them well. So it is like a means of evasion. School is like a means of evasion...)

The parish as well, with the help of volunteers, has developed an educational assistance programme for children who have dropped out of school after failing CPE. They deliver literacy and numeracy courses to these children so that they do not become vagrants and become employable.

In addition, la *Garderie Etoile*, subsidised by private funders was set up for the working class families. They have to pay a symbolic fee of 500 rupees per month. One of the respondents mentioned that even though some families cannot afford to pay the monthly charges they could send their children to the kindergarten. Various factors were identified that place children at risk and their compounding effect significantly increase the likelihood for academic failure and poor life achievement.

For example, the son of Emilienne had excellent results at CPE exams. His mother and teachers encouraged him to continue his studies but he was not motivated to do so. He preferred to start working as labourer and to stop schooling. He was offered a job as clerk but he refused on the grounds that he did not know how to speak neither French nor English and choose to work as gardener. Her daughters too stopped schooling after primary cycle and her granddaughters after SC.

One factor identified is earning fast and easy money. The children of the *Cité* are vulnerable not only because they are at risk to fail their academic cycle but because they are very much inclined to 'drop-out' of school to start working at an early age than to continue schooling.

According to one of the personnel of the college, there are intelligent students who have the potential to be academic and life achievers but they prefer to leave school to start work. Indeed, it is common practice for working class and low middle class children to work during holidays either to supplement their family budget or to earn pocket money.

Often, they find easy money tempting and prefer to leave school and start working. They have been socialised in a false consciousness that instant financial gratification will give them a sense of worthiness, higher status and respect. They are not conscious of the importance of continuing schooling until Form 6 or even going to university.

Although parental low education is not a causal factor for children academic failure, yet, parent education and encouragement are strongly related to improving student achievement. The lack of some parents' and educators' encouragement and involvement in the children's education is caused by an internalised feeling of inferiority and a somewhat 'normalisation' of academic underachievement.

Indeed, during an informal conversation with one of the schoolmasters, it was obvious that for him the children living in the *Cité* are hopeless as they are not skilled for academic studies. For him it is

the normal course of life that they 'drop-out' of school. It also implied that educators tend to expect less from these students.

His testimony demonstrates that the tenet of equal educational opportunity is far from becoming a reality for the underprivileged children who perform less well academically because their opportunities and experiences are not equal.

...Nu dir equal opportunity act, donk, li bizin egal partou o nivo ledikasion. La valer di zour kot nou ete la, kouma mo ti dir ou taler la, tou inn vini avek zot langaz, zot tou ena zot langaz dan lekol, indou ena pou li, hindi, marati, mandarin, franse, angle, be kreol, pena. Li pa egal ditou la. Be ki nou appel equal opportunity act? Nu pe lager pou ki sa lang kreol la li rant dan lekol li ousi. Se la li pou vinn equal opportunity act...<sup>168</sup>

(Eng. trans:...we say equal opportunity act at educational level. So where are we, as I said before, all came with their language, they all have their language at school, Hindus have theirs, Hindi, Marathi, Mandarin, French, English, but Kreol there is none. It's not at all equal. What do we call equal opportunity act? We are fighting for the Kreol language to also be introduced at school. It's then that there will be equal opportunity act...)

Field research revealed that, the children in the *Cité* lack support to move ahead and succeed in life as some parents and even some social partners are not conscious of the importance of providing to children all the necessary tools and skills to be achievers.

These children do not grow up with the belief that they can be anything they aspire to be in life but on the contrary, they internalise a sense of limitation and mediocrity in their psyche. Consequently, they are susceptible to set low goals and expectations.

Moreover, in keeping with Marie France and Emilienne, there are parents that instead of saving and investing money in their children's education or in their house spend their wages in an irresponsible way and especially in alcohol as they are trapped in the vicious cycle of alcoholism. Besides those who are, potential achievers are often ostracised in that they are labelled as *fer blan* (acting white).

For example, one of the schoolmasters mentioned that the brightest students were amongst the girls who fell pregnant in 2009 because the boys tend to target these girls as girl friends. It is a way for boys to affirm their domination over these girls by suppressing their aspirations and motivation for parity.

Teenage pregnancy is the main reason identified why many girls abandon schooling. One of the headmasters estimated half a dozen cases of teenage pregnancy between 2005 and 2010 and they were the most intelligent girls.

Even though the Catholic Church, the Ministry of Gender Equality Child Development and Family Welfare and the NGO MAM (Mouvement D'Aide à La Maternité) are present on the field with family planning programmes and organise sensitisation and information campaigns, yet, it seems there is a generational transmission of teenage pregnancy among the women in the *Cité* with mothers and daughters giving birth to their first child at a young age. Once pregnant the girls often do not resume schooling. (See Chapter on Social Survey)

Educational achievement significantly and differentially affects occupational choice with people with more education and qualified residents choosing higher-ranking jobs that require more skills and qualifications. It has long been recognised as the key to social and financial progress and stability.

Consequently, because of lack of qualifications and employable skills, the residents have limited job and socio-economic mobility opportunities. They are trapped in low-paid unsecure jobs and subsequently in the cycle of poverty. Poverty in turn affects life social circumstances and has been identified as a risk factor. The above-mentioned aspects are consequential factors of poverty that place children at risk.

...zot kapav dir zot fami en a le moyen, pou zot al lekol, ou kompren. Ena parfwa bann fami pov osi, zot arete, si zot inn fer depi form cink, zot arete, zot rod enn ti travay, zot p travay, pou aid zot fami...<sup>169</sup>

(Eng. trans:...They can say that their family has the means, they will go to school, you understand. Some there are some their family is poor, they stop, if they continue until Form 5, they stop, they search for a job, they work to help their family...)

Mauritius ratified the United Nations Convention on the Rights of Children in 1990 recognising the universal, indivisible and inalienable rights of children.

Consequently, the State engaged itself to respect and promote the rights set forth in the Convention without any discrimination so that each child can fully enjoy his/her human rights irrespective of his/her race, colour, sex, language, religion, political or other opinion, national, ethnic or social origin, property, disability, birth or other status. In this respect, the Mauritian State committed to take all appropriate measures to ensure that children are protected against all forms of discrimination or punishment.

Article 28 of the above-mentioned Convention recognised the right of all children to education and, in view to achieve this right, education was made free and Mauritius amended the Educational Act in 2004.

The Act stipulates that education is compulsory until the age of 16 and every child who has reached the age of admission to a primary school shall attend an educational institution.

Any responsible party of a child under the age of 16 whom, without reasonable cause, refuses or neglects to ensure that the child attends school regularly shall commit an offence and shall, upon conviction, be liable to a fine not exceeding 10,000 rupees and to a term of imprisonment not exceeding 2 years.

Other policy measures have been adopted to comply with Article 28 such as pre vocational education has been introduced for children who have failed the CPE to reduce the 'drop-out' rates. The Zone Priority Education strategy was developed as an attempt to address the problems of learning difficulties of children from underprivileged areas and of low achieving schools.

In addition, under the National Budget, provision is made for financial assistance like free transport for students and fiscal assistance for exams fees for low income earning families. These measures aim at making education available and accessible to every child.

However, fieldwork in Cité La Mivoie raised many questions as, albeit all these policy measures and even if primary education is compulsory and education is supposedly free, actually, this research revealed that the mainstream educational system in Mauritius is dysfunctional and is failing in integrating children of all socio-economic streams and in offering equal opportunities to all.

In fact, there is breach of Articles 28 and 29 of the Convention as; firstly, the children of the *Cité* are excluded from the education system that fails to cater for the development of their personality, skills and mental and physical abilities to their fullest potential and to cater for their special needs.

Secondly, undeniably, educational achievement in Mauritian society is measured in terms of academic achievement, as mainstream education focuses on academic subjects and not on the holistic development of children, such as, the development of their social, cultural, emotional and psychosocial capital.

Thirdly, since the system is academic oriented, it does not promote the children's cultural identity, language and values and they face negative educational experiences that lead to academic and behavioural problems such as social withdrawal, violence, irregular school attendance and substance abuse that are considered as indicators of failure.

Fourthly, the problems of illiteracy, numeracy and delay in language and reading development and lack of general knowledge still affect the younger generation (as well as the adults) in the *Cité* (and Creole children throughout the island) who continue to 'drop-out' of school early.

Fortunately, according to one of the headmasters, many parents are now conscious of the importance of formal education. She estimated that approximately 82.4% of parents (the student population in her school amounts to approximately 42 children) are committed and involved in their children's education compared to other regions such as Le Morne Village where the situation is worst. Nonetheless, absenteeism is high and children are at risk of dropping out of school at any time.

Indeed, some respondents believe that without a good educational background their children will not be life achievers and gain up-ward social mobility. They try their best to transmit to their children the values of success and of educational and life achievements.

These parents encourage their children to go to college and to university. They make many sacrifices to give the best education to their children. For them to be literate is a pride and inherent to building self-esteem, self-confidence and positive self-perception.

## Other economic problems

### Integrated Resort Scheme Development Projects

Residents' perceptions of the Integrated Resort Scheme (IRS) development projects diverge. These projects are like living 'with a sword of Damocles on the head'. Notwithstanding that they are expected to create job opportunities, they are seen as pseudo developments and the local population is not prepared for such type of development.

They might in the long run lead to the 'ghettoisation' and impoverishment of the villagers with on the other side wealthy people living in gated luxury residences which subsequently might cause many social problems such as prostitution and property crimes.

...Me developman osi bizin...enn sertin kontrol kouma mo pou eksplik ou....si demin ou ouver enn kasino....ki pou arive, ou pou gagn...tou kalite dimounn pou koumans vinn la. E demin ou fer enn bwatt de nuit, ou gagn tou sa kalite dimounn ki pou koumans vinn la...kouma mo pe eksplik ou lerla ki problem la pou koumans vini. Lerla pou koumans gagn prostitution...koumans gagn la drog...parski kot ena touristik bann developman touristik...parski nou pa le Rivière Noire vinn kouma Grand Baie...<sup>170</sup>

(Eng. trans:...But development too there is need...of a degree of control how I will explain you...if tomorrow you open a Casino...what will happen, there shall be...all sort of people will come here. And tomorrow you open an night club there will be all sort of people who will come here...like what I am explaining to you then problems will emerge. Then prostitution will start...drug will start...because where there are tourists where there are tourism development...Because we do not want Black River to turn like Grand Baie...)

Furthermore, in spite the development promoters are bound to employ local residents in priority, often, they do not respect their commitment because the local population is not qualified and do not possess the employable skills required.

Photo 40 La Balise Marina Development Project

Source: TJC/6/AC/SiteVisit/ PH 38/P/LaMivoie/12May2010

As stressed by Varnanaden, people follow the training courses such as training offered by the National Empowerment Foundation and *Fondation Espoir et Développement* thinking that because they have acquired the required technical skills and capacities they will, de facto, find a secure and well remunerated job. In reality, it is not the case because, either they find insecure jobs, or they are unemployed and are forced to do low paid menial jobs.

There is a shared feeling that Mauritius is being marketed to foreigners especially to South Africans and French who will soon own their region and Mauritius and for this reason, Mauritians will soon be ostracised. In addition, they feel that the Mauritian government is not environmentally friendly as they promote intensive development to the detriment of our environment.

The development strategy adopted by the local government demonstrates that capitalism is incompatible with sustainable development and ecological development. The development project of La Balise Marina is much contested because it is located on the estuary that, in line with Ramsar Convention for the protection of wetland resources that Mauritius also ratified in 2001, should be preserved. The Fisheries and Marine Resources Act 1998 as well declared wetland as protected marine zone.

A petition was signed by approximately 35 women to protest against this project that violates government commitment to protect and preserve local biodiversity such as the Convention on Biological Diversity for the Conservation of biological diversity ratified in 1992 and The Stockholm Declaration at the UN Conference on the Human Environment that stipulates that natural resources of the earth, including the air, water, land, flora, fauna and especially representative ecosystems should be preserved.

## Recommendations:

### Infrastructure

Dr. Y. Cantin Hospital should become a regional and better-equipped hospital where people from the surrounding villages can receive first-aid assistance and all the medical assistance they need. Doctors and nurses should be attached to the hospital on a 24 hours basis.

Streetlights in the *Cité* and speed restrictors on the main road should be installed for the safety of the *Cité* children.

A vegetable and fish market should be constructed where the local fishermen can sell their catch directly to the consumers without passing through a *banyan* and where the villagers can buy vegetables and fruit instead of going to Quatre-Bornes.

The construction of a multi-purpose centre where social and cultural activities will be organised and it will be also a refuge centre for people during cyclonic weather conditions. This place should be 'ethnically neutral' where people irrespective of their religio-ethnic background can meet.

It should be managed by salaried and trained local residents with the help of the local authorities and locally based institutions such as the hotels and IRS development projects who should be the main sponsors. The salaried managing personnel of the centre should include salaried social workers and counsellors. This centre should be a social centre, an educational centre and a leisure centre.

A social centre where people can socialise and gather to organise activities and meetings. Social workers as well should be employed to assist the villagers in their administrative and bureaucratic dealings and re-orient them when necessary to adequate social services.

This individual assistance should include counselling, psychological and social assistance to families and individuals having problems. Thus, the social workers should be able to identify people who need specialised assistance. Counselling should also be regularly organised on social and health issues such as aids, alcoholism, drugs, sexually transmitted diseases and gender based violence.

A sport and leisure centre where boys, girls and adults can meet instead of gathering on the road to drink and smoke drugs. Indoor and outdoor activities should be organised such as: keep fit activities, yoga courses, table tennis, badminton, billiards, basketball (there is a need for a proper basketball pitch with lights, athletics (there is need for an athletic track), swimming pool and aqua gym courses (either a swimming pool has to be built or the lagoon has to be rehabilitated).

Coaches should be employed for each activity. Activities that target both boys and girls should be proposed to avoid any gender discriminatory practices.

An educational centre including a public library, study room and computer room with internet access where children can read and study in peace. This centre should address and remedy to the problem of academic underachievement in the locality.

Specialised pedagogical assistance should be provided freely to children especially those having learning difficulties and disabilities such as dyslexia, attention deficiency disorder and hyperactivity. The problem of adult illiteracy should be addressed also and therefore literacy and numeracy courses should be provided to adults and to young people who have dropped out of school.

Assistance should be provided to unemployed and unqualified, professionals as well such as training should be given to develop professional skills, special courses should be organised that lead to a technical certificate which will ensure that they are employable. The courses should be in accordance with the employment skills that the employers seek, and the demands of the labour market.

### Occupation patterns

The Cim Stockbrokers Research 2009 Review (2010) reported that 'in 2009, international tourist arrivals fell by 4.3% to 880 thousand which is the largest decrease registered for more than 30 years. In Mauritius, tourist arrivals fell by 9.7% over the first nine months before registering a recovery in the final quarter (+2.4%) bringing the reduction in arrivals for 2009 down to 6.4%.

Tourism earnings on the other hand fell by 13.4% as the industry suffered from the reduction in spending power of tourists, heavy discounting by operators, a shift in demand towards cheaper accommodation, and the depreciation of the Euro and Pound against the Rupee. More than 65% of tourists arriving in Mauritius originate from Europe. Mauritius is not under sheltered from the global world recession that has already had economic downturn on the textile and tourism sectors and the risks of negative trade balance<sup>171</sup> and current account balance are impending.

Hence, the small and medium enterprrial projects developed that rely on tourism can be queried as poverty alleviation strategies and sustainable development projects given the slowdown in the local property market and the decline in spending power.

Based on the premise that the livelihoods of people without access, or with very limited access to natural resources are vulnerable because they face difficulties in obtaining food, accumulating other assets, and recuperating after natural or market shocks or misfortunes<sup>172</sup>, sustainable livelihood approaches should be considered that would give vulnerable group access to different natural resources.

It implies developing Livelihood Support Programmes (LSP) to promote integrated sustainable livelihood as sustainable poverty alleviation strategy. It involves allowing access by the poor to natural resources including land for pasture, farming and agriculture and water. In times of crisis, the dictum that 'work is a necessity linked to the survival of the human species' makes sense.

Even though, in such instances, people have limited choices, it does not imply that they should be denied their rights and comply with unhealthy and degrading working conditions. There is need to conduct an in-depth investigation in the working conditions of the paid domestic workers and lobby for an amendment of the Labour Act to clarify the loopholes in the law regarding this category of employees and for the employers to comply with the law.

An in-depth study should also be carried out to assess how far Mauritius abides by the various United Nations Conventions that the country ratified such as the International Labour Organisation Conventions and Human Rights Conventions and especially whether the International labour standard for paid domestic workers set by the ILO entitled 'Decent Work for Domestic Workers'<sup>173</sup> are respected.

Regional reporting and complaint units should be set up for people to report cases of breaches of their rights as employees and to lodge complaints in cases of employers' non-compliance to the labour laws in force. These units should also sensitise and inform the population of their legal rights and existing laws that protect them from potential abuse and exploitation.

*L'Ecole des Techniciennes de Maison* should broaden its scope of work to mobilise paid domestic workers to understand the concept of decent work, strengthen their capacity to represent and defend their rights as paid domestic workers whilst simultaneously train them to acquire expertise, skills and praxis

The socio-economic status of paid domestic and manual labour should be upgraded that would bring horizontal mobility of these workers. This mobility can be achieved by increasing the minimum salary threshold and improving the social and legal protections in this labour sector in line with the inflation rate.

The social and economic value of these occupations should not be under-estimated and mechanisms should be set up for employers to systematically register their employees. Only by bringing domestic and manual work out of the 'shadow' economy will it minimise the risks of domestic servitude, abuse, exploitation and other forms of discriminatory practices.

### **Working Conditions**

The residents' present conditions result from a continuation of historical trends that are likely to worsen with the latter being at risk of falling into absolute poverty. For this reason, there is urgent need to discover alternative sustainable development programmes to minimise the negative outcomes of this economic turmoil on the standard of living of the already vulnerable groups.

One alternative is the revalorisation of low tier jobs, particularly, paid domestic and manual labour that still bear negative stereotypes rooted in patriarchy and colonial times when slaves performed these types of jobs such as labourers, cattle-herder, fishermen, poultry-herders and many other skilled and unskilled work. The slaves were fieldworkers, domestic workers, and skilled traders and worked in the mills and at sea<sup>174</sup>.

Actually, the stigma does not lie in the people performing these jobs or in the nature of the job itself but in the social system that denigrates paid household work and ascribes low status to menial and blue-collar work and subsequently this labour category.

In fact, paid domestic labour is still commonly perceived as unskilled work and this perception is based on a dominant construction of paid domestic work as replacing unpaid family duties that were initially fulfilled by slave women and after by female family members. When paid domestic workers substituted these unpaid domestic jobs, the social and economic value of domestic employment was and is still undermined and under-estimated.

Domestic and manual labour remains somewhat an invisible economy and informal sector. In other words, society and people devalue domestic and manual work and workers resulting from an imperialist and colonial mentality that is maintained.

Given that paid domestic labour is the main source of income for the families living in Cité La Mivoie and is growing in Mauritius, and also that there are more people who are dependent on blue-collar jobs and manual jobs, there is need to de-stigmatise these jobs as these people deserve consideration.

The Millennium Development Goal Report (2010) targets to achieve full and productive employment and decent work for all, including women and young people by 2015. The poverty gap is widening as a backlash of the economic downturn. The already historically vulnerable groups as if the residents of Cité La Mivoie live below the poverty line are facing social and economic impoverishment resulting from the inflation and diminishing incomes of poor households because of higher unemployment.

According to above-mentioned report, after the initial food crisis of 2008, prices of staple foods remained high in 2009. Both crises led to the reduction in effective purchasing power of poor consumers who spend substantial income on the purchase of basic food.

The protection of the vulnerable workers is an imperative. In this endeavour, it is the duty of the State and of Civil Society to ensure that they at risks of further prejudices. There is need to develop legal and policy measures on domestic work and to improve the living and working conditions of this category of workers to ensure that they are not discriminated against.

### **Education**

Need to review the national educational policy to adopt a holistic educational approach to bridge the academic achievement gap, reduce academic underachievement and to cater for the special needs of children who have difficulties integrating and staying in the educational system.

Reform of the national educational system with the implementation of cultural education centre that is adapted to the cultural capital of the vulnerable groups.

An IVTB school should be built in the locality and the pre-vocational system should be promoted.

To combat child labour and reduce school drop-outs, the Educational and Labour Acts should be amended to make education compulsory until the age of 18 and raise the legal working age to 18 years old.

More funds and resources should be allocated to ZEP schools and to remedy the victimisation and vulnerability of the children living in the *Cité*,

The state has a legal obligation to develop all appropriate measures to promote physical and psychological recovery and social reintegration of these children in an environment that fosters their health, self-respect and dignity.

## 6. CONCLUSION AND RECOMMENDATIONS

Black River village is at a transitional stage facing a population expansion with the mass influx of human resources as well as economic resources. High population density will in the end cause, as mentioned in the report, more problems related to security, space and natural and environmental resources. Some local inhabitants have seen an improvement in their standard of living and there is a situation of quasi-full employment in Cité La Mivoie, yet, this pseudo development does not benefit everyone. The residents of Cité La Mivoie are facing the negative effects of these developmental projects.

Based on the United Development Programme (2010) analysis, the underprivileged people will continue to live in precarious conditions and the number of slum dwellers will grow with the worsening home crisis resulting from the worldwide financial and economic downturn that has been exacerbated by 'lack of land titles and other forms of secure tenure; cutbacks in funds for subsidised housing for the poor; lack of land reserves earmarked for low-income housing; and an inability to intervene in the market to control land and property speculation'.

As stated in the report, they are facing forced de-localisation; they are denied access to land, safe shelter and natural resources. In addition, they have to bear the plight of price inflation and socio-cultural changes. The rise in land prices rule out the possibility for the working poor and the low-income earners to own land and a house and it consequently exacerbates the precarious housing conditions in the *Cité*.

The cultural clashes are negatively affecting the *Cité* whose organisation was, until now, based on ancient structures with their own relation to time, assets, goods and wealth. Cité La Mivoie is at a transition between a traditional fishing village, with its specific social and spatial organisation and value systems, to a working housing estate. Their value system and social and cultural systems continue to be threatened by Eurocentric systems. These contemporary problems do not stand in isolation, history impacts on their present reality.

Oral history uncovered a continuity between the local economic and occupational evolution and the colonial history (slave and indenture system) in that the availability of cheap and docile skilled and unskilled labour underpins contemporary regional economic and social development and economic prosperity. There is precariousness in the *Cité* which stems from historic inter-dependence of the residents and their wealthy neighbours and especially economic dependence with the former being employees and needing to 'earn a living' and the latter, the employers, in need of cheap and docile labour. This inter-dependence is rooted in servitude and capitalist exploitation.

This labour profile inherent to the capitalist system is rooted in the slave system and is an extension of slavery but under a modified and 'institutionalised' form. The residents of Cité La Mivoie still bear the burden of slavery. It will be a long and hard endeavour to repair the destructive aftermath of slavery and of discriminatory practices.

Reparation starts with work on the memory of slavery and of the slaves' history of abuse for psychological healing purposes. This healing process starts with a de-construction of the deep internalised sense of limitations and powerlessness. Furthermore, other social, cultural and psychological dynamics should take into consideration such as differential socialisation and enculturation processes to understand the *Cité* inner-structure, subculture and value system.

It is only with time and sincere and genuine political will that we shall be able to break this deeply seated perception that their marginalisation and underprivileged situation are inherent to their being. The recommendations are all made to help address the plight of the residents of Cité La Mivoie and improve their social and economic situation. We should learn from past errors made during post-slavery whereby now there is no living memory of the slaves among the residents. Recommendations are also proposed for the preservation of the local tangible and intangible heritage to ensure that the history of the residents' ancestors do not go in oblivion and ensure that the memories of their ancestors remain alive.

## INTERVIEW GUIDE

### 1. Biographical information:

- Name?
- First name?
- Age and Date of Birth?
- POB? Where did you grow up?
- Where do you live? Where else did you live in the past? How long? Why they moved?
- Present and past occupations?
- Schooling? Which class? Why did you stop? Was it important for you and your family to go to school, to have a certificate? Why? Literacy?
- Married or not? Since when? How did you meet your wife/husband?
- Their look and feeling about their personal history - personal achievements and quality of life

### 2. Family history:

- Parents and grandparents?
- Occupation
- Date and Place of Birth and Place of living
- Any stories about them
- Family origins
- Was there an intergenerational transmission of wealth, family history, traditions and values, knowledge and skills, land? etc
- How parents and grandparents met? At what age they got married? Why?

### 3. 'Cité' History and Life:

- Identification of important places, *Lieu dit*, monuments, ceremonies etc
- Identification of heritage components,
- Lifestyle in the past and now: water, electricity, roads
- Houses
- Settlement
- Childhood memories

### 4. Experience living in the 'cité':

- Any constraining experiences?
- What is a 'cité' for you?
- Perception of slave descents living in cite/coastal? Image projected? Stereotypes?

### 5. Economic, social and cultural life of the 'cité':

#### Economic/Occupations:

- Occupations
- Employment structure:
- Fishing

- Plantations
- Salt pans
- Tourism
- Other economic activities such as house workers, gardeners etc?

Cultural and Social life:

- Traditions and customs including traditional religious and spiritual practices
  - Popular religion (prayers, rituals, ceremonies etc)
  - Traditional food practices and habits
  - Infrastructure developments
  - Road development
  - Education
  - Religious places and cemeteries
6. **Land-ownership issues**
- Are you land owner?
  - Where is your land? How did you get this plot of land?
  - Were your parents or grandparents landowners? Where? How did they get this plot?
  - Cases of landownership and causes for loss of land?
7. **Evolution of the 'cité' including impact of development and future developments**
- How the village/region changed over time and what brought about those changes?
  - How the economic, social and cultural life of the 'cité' evolved?
  - What Mauritian society can do to help slave descents to feel /be better economically, politically, socially, culturally, etc?

# THE HISTORY AND HERITAGE OF LE MORNE BRABANT

## INTRODUCTION

*By Vijayalakshmi Teelock, Vice-Chairperson*

Public attention on Le Morne Brabant began in 1999 when public protest arose over the proposed construction of a cable car project on Le Morne. A number of studies were undertaken on archaeology, ethnography and history by various scholars. An institution was created to manage the site over which there has been much contestation of an ethnic nature from socio-cultural groups and on the part of developers. Since then, the site has become a World Heritage site, yet remains inaccessible to the public.

The combined effects of pressure of developers on public institutions managing land and cultural issues have ensured that the management of the site leaves much to be desired as well as the interests of the inhabitants being neglected. One is at pains to understand why the village of Le Morne was not included in the Buffer Zone of the World Cultural Landscape as the inhabitants uphold the traditions bequeathed to them by their slave ancestors who lived in the area. The interests of the inhabitants of the original Le Morne village found on the land what is known as 'Trou Chenille' have not been taken into account at all and to date no full archaeological or historical survey carried out on this village which was composed of descendants of slaves having lived in the area for generations.

The conditions in which they were removed are considered unacceptable: from Trou Chenille to L'Embrasure in 1945 and again in 1960 to the present location of Le Morne, where they are unable to provide for themselves an independent livelihood due to constriction of space: whereas in the original village they could engage in fishing and agriculture the absence of agricultural land means the inhabitants are dependent on others and cannot practice subsistence agriculture as they used to.

Numerous studies have been undertaken on slavery and on Le Morne but no one had yet been able to state categorically who were the original inhabitants of Le Morne or who was buried in the abandoned cemetery found near the estuary at Le Morne. The answer is to be found in in-depth studies using a multi-disciplinary approach and combining contemporary sources of knowledge and data as well as historical and archaeological sources.

TJC commissioned a professional archaeological survey of the abandoned cemetery, DNA testing of local inhabitants and a family history from one descendant of a slave family having lived in Le Morne since the early 19<sup>th</sup> century. Circumstantial evidence points to a link between the cemetery and the former slave inhabitants of Le Morne although further studies are recommended to confirm this. Preliminary DNA testing did not prove conclusive as the bones were 'water logged' but further tests are required as well as C4 dating. DNA tests of inhabitants will also indicate their ethnic origin and whether they conform to the ethnic origin mentioned in slave registration returns. What we do know from the osteological analysis is that although they were not malnourished, the adults buried there lived 'short, hard and brutish' lives. Many children among the few adults indicate high infant mortality rate which is consistent with the historical demographic data on slaves in Mauritius.

The two studies one by Yola Argot Nayekoo, herself a descendant of a family of slaves having lived in Le Morne since early 19<sup>th</sup> century, if not before, and the archaeological study of Krish Seetah and his team in the abandoned cemetery point to a new facet of the history of Le Morne: aside from being associated with maroonage, Le Morne is also associated with a permanent slave community living and working in the area which need to be further researched. More studies such as that of Yola Nayekoo and Krish Seetah need to be undertaken, in collaboration with institutions and individuals interested in this region.

The massive commercial development that has occurred in this region has not yet reached the ordinary citizens of Le Morne or neighbouring villages: the jobs being offered to them consist largely of the same menial occupations that were undertaken by their forbears and few are in professional, technical or managerial positions. This is unacceptable in 21<sup>st</sup>-century Mauritius. The number of Mauritian Creole scholars and professionals overseas is testimony to the fact that expertise can be obtained and that if those living in Mauritius are given the opportunity, they will seize it. These opportunities seem sorely lacking for the Creole community living in the region.

To quote from Joyce Fortune-Pope:

*Restorative justice should include restoring people to their former situation before the violation occurred and compensation as a form of reparation for the loss of earnings and business should be given. They also need a formal and written apology from the government for the prejudice they suffered.*

We recommend reparations to be given in the form of:

1. As a form of *restorative justice*, the **inhabitants** of Le Morne and neighbouring areas to be given agricultural land jointly held by them to engage in agricultural practices to enable them to increase their daily revenue and be autonomous as they used to be.
2. Implementation of recommendations contained in numerous studies undertaken by the University of Mauritius and various consultants of Le Morne Heritage Fund by a pool of trained professionals, irrespective of gender, race, religion or political creed.
3. The intense communalization, politicization and undue influence of developers and local elite on public institutions to cease and not be tolerated at any cost in this region.
4. A full historical archaeological survey of Le Morne summit and slopes as well as neighbouring areas and its links with neighbouring villages to be undertaken by the LMHTF in collaboration with professionals and to make the results of this researches available to the Mauritian public through books, films, drama, songs dance and curriculum materials for schools. The principle must be adopted that any research and activity funded by public money should go back to the public and not remain in the drawers of officials of those institutions.
5. The inhabitants of Le Morne and neighbouring villages to be brought in to the activities of Le Morne Heritage Fund in managerial, technical and professional posts and appropriate training given to them to fulfill their duties professionally.
6. That the area known as Trou **Chenille** be officially recognised as site of former settlement by inhabitants many of whom are descendants of slaves having lived there for generations (and not as squatters) and that their removal be recognised as 'forced removal'. Commission recommends they be compensated accordingly for loss of home, revenue and inability to continue their occupations and traditions. The Commission further recommends that their history be written before it is forgotten and the oral testimonies of those who lived there be recorded and made available in a public oral archive.
7. The inhabitants be given full access to their former village and a space where they can remember their former lives be created there. The model of District Six museum to be used.
8. **LMHTF Board**: The composition of the LMHTF Board must be amended to reflect both professional and community representatives. They need to be chosen among persons of moral and professional integrity and not associated with communal or commercial operators operating in the area. There should be a reduction in the number of administrators in this Board.

Given the fact that in Mauritius the pool of professional experts is small, there needs to be better interaction between different institutions where these competencies exist to ensure public funds are not being used unnecessarily in activities that duplicate those of other institutions.

9. **Ministry of Arts and Culture:** Similarly at the Ministry of Arts and Culture under whom, specialists in slavery, indenture and in heritage management archaeology history and anthropology must be appointed to better monitor these institutions. Currently to our knowledge, there are none.

Connivance of civil servants, board members and staff with private developers must be expected and therefore controlled and closely monitored by the Ministry and transparent procedures adopted when decision making concerning development permits in the Buffer Zone.

10. The Ministry and Le Morne Heritage Fund to ensure that other heritage found in Le Morne is not neglected i.e. Marathi culture in Le Morne and there is a harmonious and sharing relationship between the two cultures found in Le Morne Village.
11. The links between the Le Morne Brabant, the forests of the Black River Gorges and Baie du Cap are fully surveyed (continued from the Maroon Archaeological Project initiated in 2002) and the maroon trails and sites fully protected from developers coming up with commercial projects and that access is provided to the public to access those sites. The Black River Gorges constitute not only a natural site but a cultural site as maroon activity was intense in this area.

TROU CHENILLE:  
L'HISTOIRE D'UNE FAMILLE DESCENDANT  
D'ESCLAVES -  
La famille Verloppe-Donice

YOLA ARGOT NAYEKOO

**MME TEELOCK:** Ki ou ti a kontan la Komision fer, Madame ?

**MME LARUSEE:** Mo ti a kontan gagne enn bout la ter nou reste. Le zour ou lor la ter, taler ou kapav mor osi. Mo ti a gagn enn la ter, mo ti a reste. Mai la tous les zour ou bizin vey la ter. *Le Morne, Destination de l'Amitié  
à ceux qui me condamneraient  
pour ce devoir de mémoire  
je leur rappellerai  
tous ceux qui ont dé pleurer  
juste parce qu'ils étaient Noirs !  
est-ce ma faute à moi  
si je suis né comme ça  
comme toi  
même si tu ne le vois pas?  
à ceux qui voudraient en rire  
qui ne voudront pas sécher les larmes  
de ces millions de martyrs  
je leur dirai de prendre  
le chemin du Morne  
la voie du pèlerinage  
le symbole suprême  
qui fait que l'on s'aime  
à ceux qui seraient tentés  
de déchirer les pages  
pour faire oublier  
pour effacer toute trace  
je te brandis le Morne !  
la preuve de pierre  
l'histoire buissonnière  
de ces humains marrons  
ces amoureux de la liberté  
à ceux qui ne me croient pas  
regardez, il est là  
sculpté par le temps  
ce n'est pas le tombeau des morts  
le Morne  
c'est la place des vivants !*

ASSONE S. R., 2002. *Le Morne, territoire marron !* Port-Louis, Éditions de la Tour.

C'est certainement le destin qui m'a ramené au village du Morne.

J'ai grandi en France et je suis peut être plus française que mauricienne mais un jour, mes pas m'ont porté vers ce petit village, très loin, à la pointe sud ouest de l'île Maurice.

Ma mère, originaire du Morne, me racontait des histoires sur son village, sur sa famille, sur cette montagne. Et puis, j'y ai rencontré mon mari, lui aussi y est né et y a grandi. Lui aussi, un *zanfabor la mer*.

J'ai personnellement toujours été intéressée par l'histoire, l'ethnologie et la généalogie. J'ai donc tout naturellement été attirée par l'histoire de mes ancêtres, de ma famille : qui étaient-ils? Où vivaient-ils, dans quelles conditions? Quelles étaient leurs activités, quels étaient leurs moyens de subsistance dans une région aussi reculée que le Morne ?

Tout généalogiste amateur admettra que retracer son arbre généalogique n'est pas une chose aisée. J'ai commencé mes recherches timidement en 2008. A ce jour, je n'ai toujours pas réussi à réunir tous les morceaux du puzzle mais les informations que j'ai recueillies m'ont permis de dresser au moins une vue générale et de découvrir au fur et à mesure de mes recherches des choses fascinantes sur ma famille.

## LE MORNE BRABANT, LÀ OÙ TOUT A COMMENCÉ

Fig. 1 Le Morne Brabant, vue sur Trou-Chenille

Je savais pertinemment que j'avais des ancêtres esclaves: mes parents, l'aspect physique des membres de ma famille, mon nom, ma religion, toutes ces informations laissaient à penser que mes ancêtres venaient d'Afrique ou bien de Madagascar.

Je sais que nous sommes «créoles» car c'est ce que mes parents m'ont toujours dit. Mais en me regardant dans un miroir, j'avais un peu de mal à croire que mes ancêtres venaient d'Afrique... ou plutôt ne voulais-je pas y croire: je n'arrivais pas à m'imaginer qu'on les avait un jour amené à Maurice par la force et qu'à cette époque, ils n'avaient pas été considérés comme des êtres humains.

J'ai commencé à remonter mon arbre généalogique comme tous ceux qui commencent. J'ai interrogé mes parents sur leurs propres parents ainsi que des oncles et des tantes. La seule chose dont j'étais certaine, c'était que la famille DONICE a toujours vécu au Morne Brabant.

Cela a été assez difficile au début. Je n'avais ni acte, ni dates qui m'auraient permis de demander des actes au service d'état civil à Maurice. Un peu découragée, et la distance n'aidant pas, j'ai donc entrepris des recherches sur l'esclavage en général à Maurice et par simple curiosité, je me suis mise à consulter les registres d'esclaves.

## LES REGISTRES D'ESCLAVES

### LA FAMILLE VARLOPE

L'habitation du Morne Brabant appartenait à M<sup>elle</sup> Lenormand et comptait 71 esclaves en 1826 selon les recensements.<sup>1</sup>

Bernardin de St. Pierre dans son récit «Voyage en Isle de France» qualifiait la région du Morne comme très reculée, dangereuse et le repère des esclaves marron, prêts à attaquer et dépouiller quiconque s'aventuraient sur leur territoire. Il faisait déjà mention de l'habitation de M. Lenormand en 1769 qui ne comptait alors que 8 noirs.

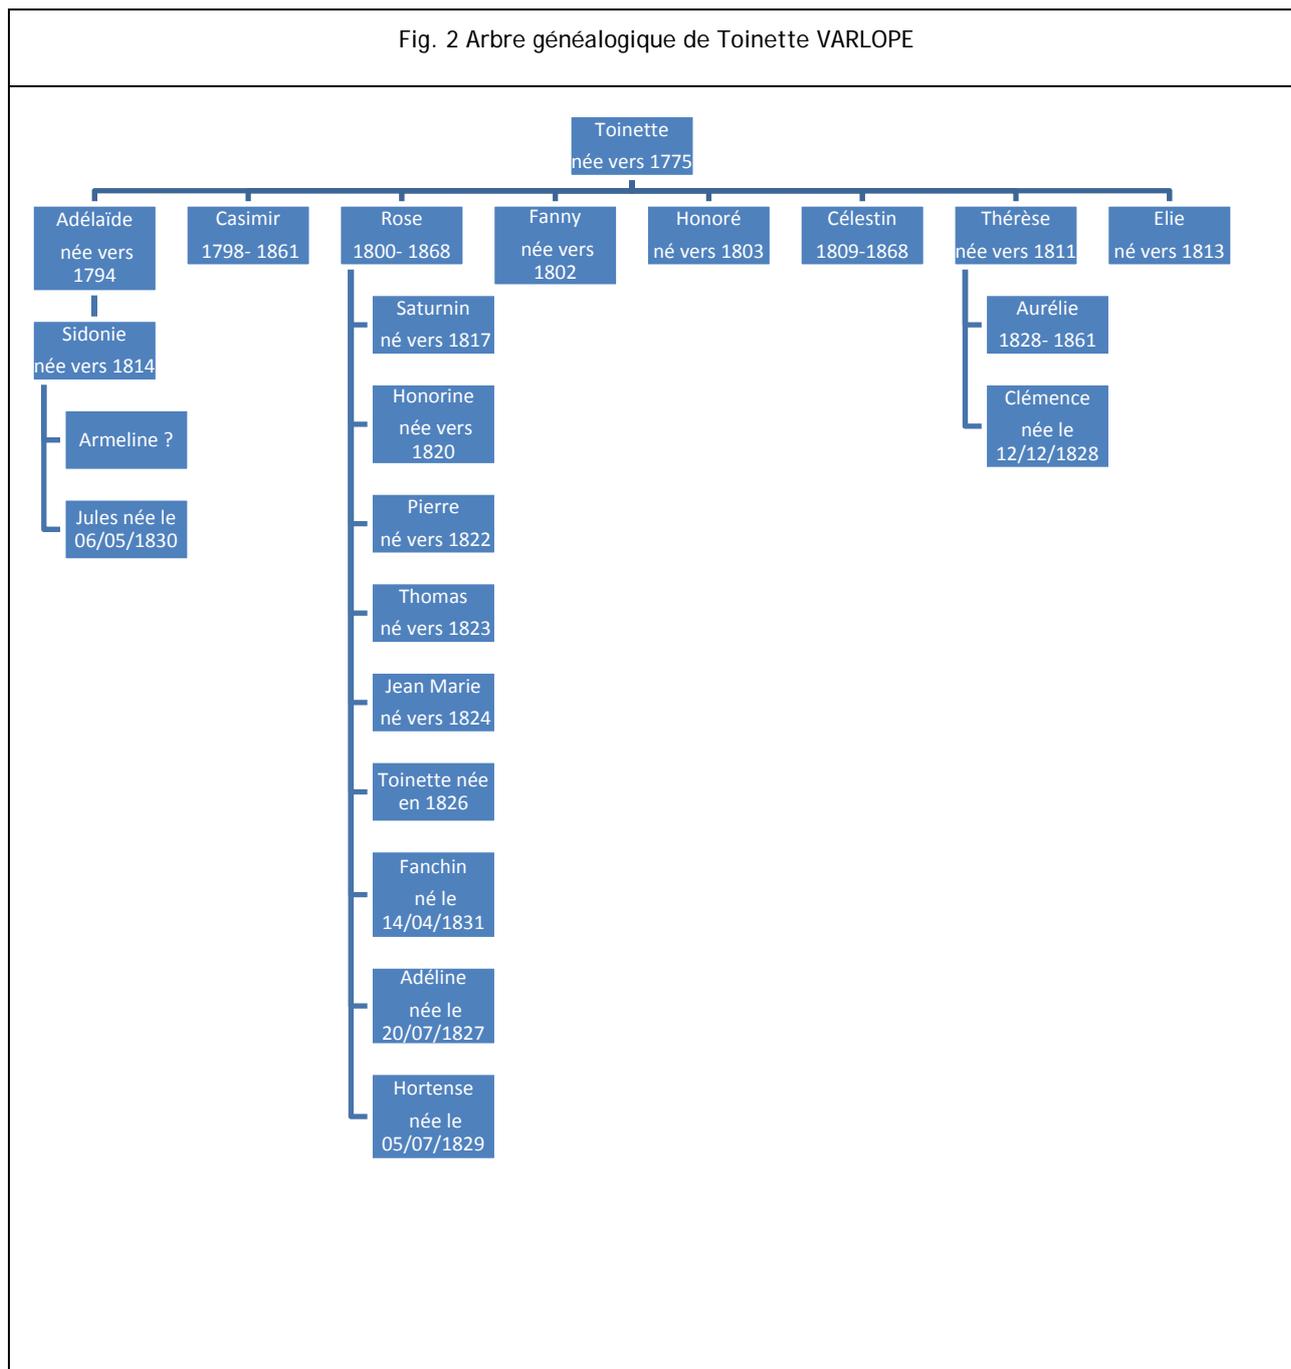

Parmi tous les noms d'esclaves présents sur les registres comme Rabot, La scie, La Galère, Gouge ou encore Savon, un seul a attiré mon attention: VARLOPE.

Je connaissais ce patronyme car il est encore très présent parmi les familles du Morne sous la forme de «Verloppe». Je savais que les noms avaient pu être modifiés avec le temps. Et il ne m'a pas fallu longtemps pour comprendre que les patronymes Varlope et Verloppe désignaient certainement la même famille. Les Varlope/Verloppe auraient donc été esclaves sur l'établissement du Morne Brabant et y seraient restés depuis lors. J'imagine qu'à la fin de l'esclavage, une fois libres, ils se sont installés avec d'autres familles à Trou- Chenille, sur le flanc sud de la montagne, face à l'ilot Fourneau.

La première ancêtre Varlope se prénomait Toinette. Elle était de caste Mozambique et était âgée de 51 ans lors du recensement de 1832.

Elle travaillait sur l'habitation du Morne Brabant en tant que blanchisseuse. Probablement à cause de son âge - avancé pour l'époque- on ne lui confiait plus les travaux des champs. De quelle tribu était-elle originaire? Était-elle Macoas, Mondjavoas, Senas, Moussénas, Yambanes, Mouquindos, Maravis, Macondès, Niamoëses<sup>2</sup>? Nous ne le saurons jamais. Les seules informations disponibles sur les registres étaient qu'elle n'était pas née à l'Isle de France, était de caste Mozambique et mesurait 5 pieds ¼. Elle avait une cicatrice sur le côté gauche du cou. Elle eût au moins 8 enfants, tous portaient le même patronyme Varlope. Toinette a certainement eu tous ses enfants avec un autre esclave du Morne. C'est avec certitude que l'on peut affirmer qu'elle est arrivée à l'Isle de France avant 1794; année de naissance estimée d'Adélaïde, sa première fille dite « créole ». Les enfants de Toinette eurent à leur tour des enfants, tous mentionnés dans les registres d'esclaves. C'est ainsi que j'ai pu retracer une partie de sa généalogie.

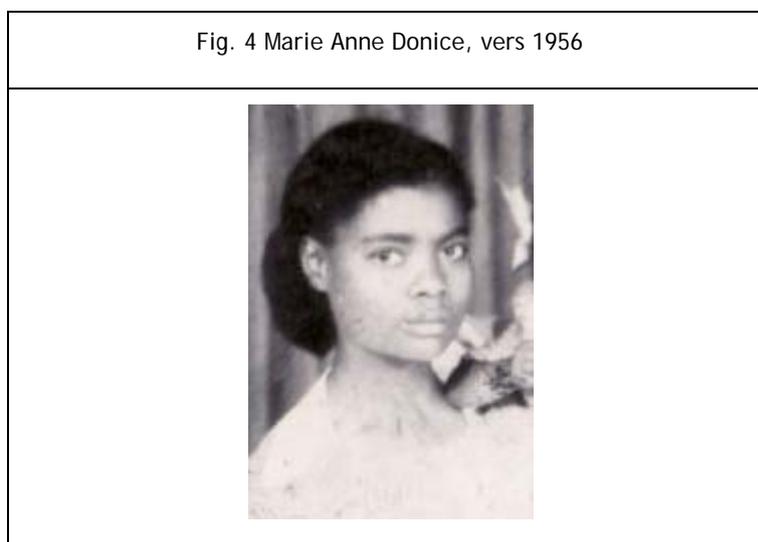

Fig. 2 Arbre généalogique de Toinette VARLOPE

## LA FAMILLE VERLOPPE-DONICE

Un de mes oncles avait heureusement gardé au fond d'un tiroir les actes de naissance de ses grands parents. Mon arrière grand père s'appelait Elis DONICE. Il était habitant de Trou-Chenille. Il a épousé Lucia LEGOY, elle aussi originaire de Trou Chenille. Ils ont eu ensemble 4 enfants dont ma grand-mère Marie Anne DONICE.

Il était pêcheur. Il avait appris la pêche de son père, et l'a appris par la suite à mes oncles qui eux-mêmes l'on enseigné à leurs fils.

Elis Donice était le fils d'Elisa VERLOPPE et de Jean DONICE. Il est né en 1902.

Fig. 5 Acte de naissance d'Elis DONICE

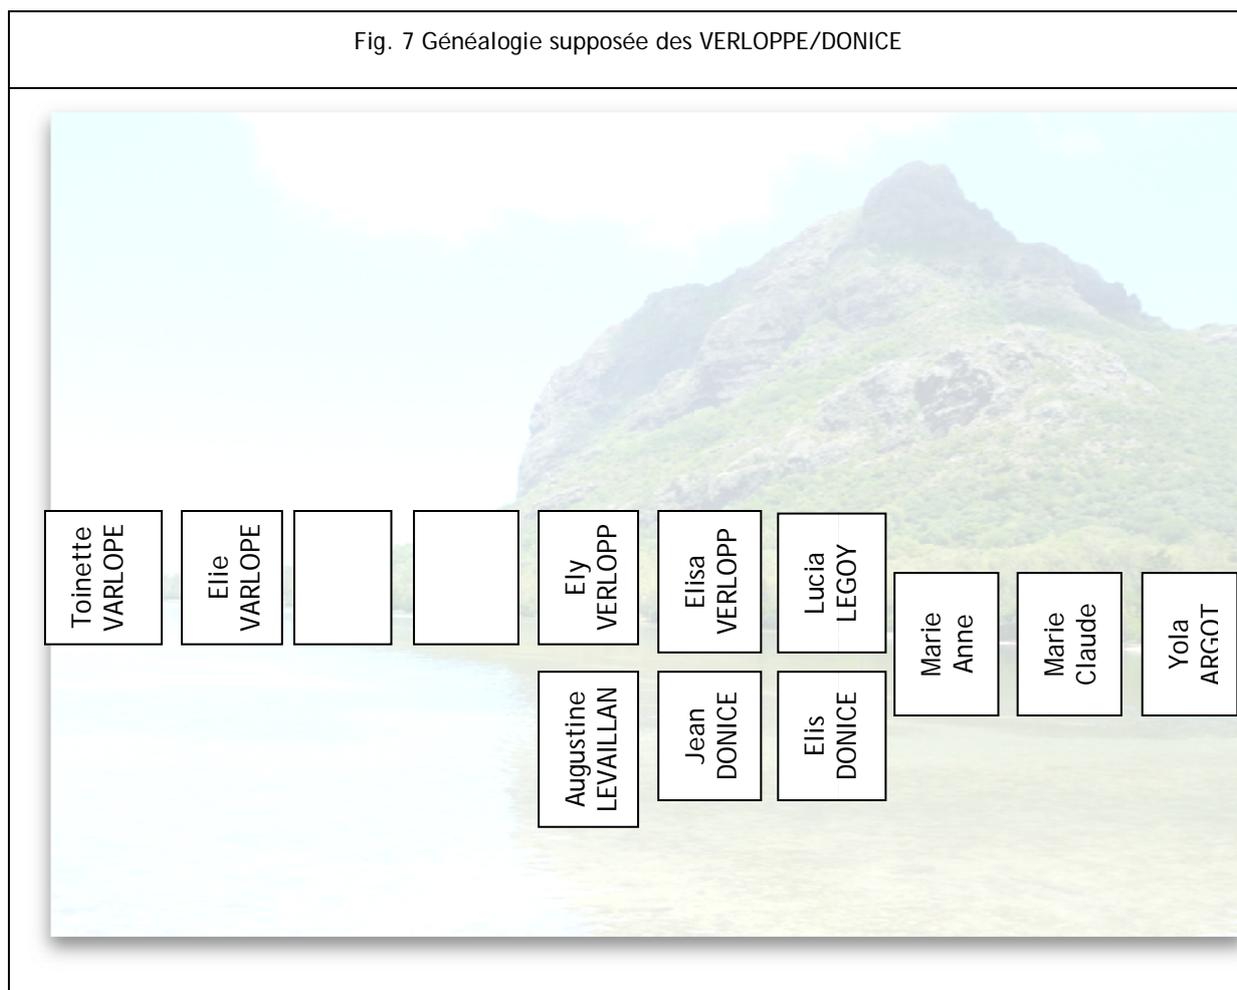

1902 BIRTH in the District of		Black River		in the Island of Mauritius		
No.	Name and Surname	Sex	Name and Surname of Father and Mother, Profession and Religion	Name and Surname of Informant, Profession and Religion	Married Name

Legoy Officer of the Civil Status of the District of Black River (Notary Civil Status Officer) 14-6-02

Source : Civil Status Office, Mauritius

J'ai découvert un peu plus tard que sa mère, Elisa VERLOPPE était née au Morne Brabant en 1880. J'ai la certitude qu'elle a grandi à Trou Chenille. Même si je n'ai pas de traces écrites pour le prouver, j'ai néanmoins recueillis les divers témoignages des anciens de ma famille qui m'ont assuré qu'ils avaient toujours vécu à cet endroit.

Fig. 7 Généalogie supposée des VERLOPPE/DONICE

Entre temps, j'ai également entrepris de faire l'arbre généalogique de la famille de mon mari, originaire pour son côté paternel de Bombay.

J'ai rapidement pu retrouver le premier ancêtre NAYEKOO venu d'Inde en tant que travailleur engagé grâce au Mahatma Gandhi Institute.

Pour le côté maternel de mon mari, il se trouve que nous avons des ancêtres en commun. On m'avait dit que toutes les familles du Morne étaient plus ou moins liées et cela s'est confirmé lorsque j'ai découvert le même patronyme dans l'arbre généalogique de mon mari : VERLOPPE.

Sa grand-mère s'appelait Léonide Célestin Verloppe. Elle était par ailleurs cousine avec la tante maternelle de ma mère, Alicia Verloppe. Cette dernière n'avait pas hérité du patronyme Donice car elle était le fruit d'une relation non légitimée par le mariage entre Elis Donice et Charlette Verloppe. Elle portait donc le nom de sa mère VERLOPPE.

Je ne sais pas dans quelle autre mesure cette branche Verloppe est liée à la mienne. Compte tenu de la grande descendance de Toinette, il existe d'innombrables possibilités. Il me reste encore à remonter cette branche et la chose n'est pas aisée.

D'après mes recherches généalogiques, il s'est avéré que les différentes familles du Morne pratiquaient l'endogamie ou l'inter mariage, c'est-à-dire qu'ils ne se mariaient que très peu avec des gens d'autres villages. Selon les actes d'état civil, ce sont toujours les mêmes noms qui

reviennent. C'est ainsi que l'on peut affirmer que finalement, toutes les familles du Morne n'en forment en réalité qu'une seule, qu'une seule grande communauté.

Pour en revenir à la branche DONICE Je n'ai malheureusement pas pu remonter très loin pour le moment. Le nom a certainement dû changer avec le temps. Peut être est-ce ADONIS, DONIS ? Pour le moment, ce nom s'arrête avec mon arrière grand père Jean Donice, probablement né vers 1880. Mais je ne désespère pas.

En ce qui concerne son fils Elis Donice et sa belle-fille Lucia Legoy, nous savons qu'ils sont nés à Trou-Chenille grâce aux actes de naissance.

Trou Chenille est un des premiers villages d'esclaves et d'anciens esclaves. Selon une légende à présent célèbre, des esclaves en fuite s'étaient réfugiés au sommet du Morne. A l'abolition de l'esclavage en 1834, certains sont venus leur apporter la bonne nouvelle: qu'ils étaient à présent libres ; mais en voyant ces gens depuis leur cachette, les esclaves prirent peur et pensèrent qu'on venait les chercher. Certains préférèrent donc se jeter du haut de la montagne et mourir libres plutôt que de retourner en esclavage. Pour certaines personnes il ne s'agit que d'une légende mais on ne peut nier que le Morne a été le refuge d'esclaves marrons.

Des fouilles récentes l'on prouvé et les témoignages des habitants de Trou Chenille le confirment; ils ont vu de leurs propres yeux des ossements, des traces d'habitation et des ustensiles dans des cavernes au pied de la montagne.

## LA VIE AU VILLAGE DE TROU CHENILLE DANS LES ANNÉES 1940

On m'a souvent raconté comment ils vivaient dans ce petit village au pied du Morne Brabant. On m'a raconté comment, un jour, ils ont tous été chassés de leur village par la force et contraints de s'installer plus loin. Cela a été très dur, ils auraient tant aimé rester dans leur petit village, entre eux. On peut dire que là bas, la vie était douce, bien que sans électricité ni eau courante, les gens menaient une vie simple mais heureuse.

Cet ancien village d'esclaves libres se situait entre mer et montagne. Pour la plupart pêcheurs, les habitants vivaient d'auto subsistance. Ils chassaient les singes, lièvres, sangliers, et tangués. Il y avait aussi des charbonniers, des laboureurs. Certains coupaient ou ramassaient l'arbre filao pour en faire de petits paquets qui étaient ensuite amenés sur des bateaux à voile pour être revendus en ville.

### Habitations et activités

Les pêcheurs à la sène ramenaient des poissons cornes à l'abondance. Les pêcheurs à casiers construisaient eux-mêmes leurs outils de travail tandis que les enfants cherchaient les crabes appelés loulou. Les pirogues à voile permettaient aux pêcheurs d'aller en dehors du lagon pour attraper de grosses prises. Les habitants nourrissaient leurs animaux de basse-cour : oies, poules, canards, cabri. Et cultivaient la terre pour leurs propres besoins: maïs, taro (songes), manioc, patates douces, pommes d'amour, piment et autres. Une partie des habitants travaillait néanmoins pour l'établissement du propriétaire terrien local, la famille Cambier.

Les habitations consistaient en de simples cases. Les murs étaient faits de feuilles d'aloi et tapissés d'un mélange de terre et bouse de vache. Les toits étaient faits de paille. Ces cases ne résistaient que très difficilement aux cyclones.

Hormis leurs pirogues, aucun autre moyen de transport n'était à leur disposition, tout se faisait à pieds. Ainsi les habitants marchaient jusqu'à Rivière Noire où ils pouvaient ensuite prendre le train qui les amènerait directement à Port-Louis. Mais les sorties en ville restaient extrêmement rares.

Les habitants disposaient également d'une boutique, située à Trou Chenille même qui leur fournissait tous les produits d'utilisation courante à portée de main.

## L'école et le catéchisme

Les familles du Morne étaient pour la plupart de religion romaine catholique. Les villageois marchaient jusqu'à la chapelle située à l'Embrasure pour assister à la messe. Des mariages y furent célébrés.

Une école, près de la chapelle dispensait des cours et le catéchisme aux plus jeunes jusqu'à leur première communion. On fait déjà état de ce petit village de pêcheurs dans le Mauritius Register datant de 1859: je cite «le long de la baie formée par la Péninsule sur laquelle le Morne se dresse, il y a un village de pêcheurs, dans lequel on trouve une école et une chapelle soutenues par le Mauritius Church Association<sup>3</sup>. En 1858, cette école publique et gratuite accueillait 55 enfants: 34 garçons et 21 filles<sup>4</sup>.

Les ruines de la chapelle sont encore visibles aujourd'hui à l'Embrasure. Mais malheureusement désormais interdites d'accès.

## Le cimetière de Trou Chenille

Lors des décès, on transportait le défunt sur le dos, à pieds ou en pirogue jusqu'au cimetière de la Rivière Noire. Selon les dires de tous les anciens, aucun enterrement n'a eu lieu dans le vieux cimetière situé près de l'actuel terrain de football. Selon eux, les tombes qui y reposent remontent au temps de l'esclavage.

Effectivement, les récentes fouilles et analyse de ce cimetière ont démontré qu'il s'agissait certainement de corps d'esclaves libérés. Les corps d'environ 70 personnes ont été enterrés ici entre 1810 et 1850. La datation la plus ancienne des artefacts retrouvés remonterait à 1815. Ce cimetière aurait donc été créé dans une période de transition, où des esclaves étaient parfois libérés, avant l'abolition de l'esclavage, avant aussi que les catholiques n'entreprennent leurs campagnes de conversion. Aucune trace de rites chrétiens n'existe sur le site, si ce n'est la grande croix qui a été érigée bien plus tard.

Ce petit cimetière "animiste" nous donne un témoignage archéologique très intéressant sur le mode de vie des esclaves libérés<sup>5</sup>.

Fig. 8 Cimetière de Trou Chenille

Peut-être reposent dans ce cimetière le corps de Toinette et d'une partie de sa famille. Nous ne le saurons probablement jamais.

### **Le respect dû au propriétaire terrien**

Bien que libres, les descendants d'esclaves de Trou Chenille devaient respect au «Missié», au propriétaire terrien local.

Ainsi, ils n'avaient pas le droit de lui répondre, et devaient dire oui à tout ce qu'il disait sous peine d'être battus ou licenciés sans aucune raison.

Les villageois n'avaient pas le droit d'allumer un feu de bois à la nuit tombée à cause des risques d'incendie. Ils utilisaient alors des petites lampes faites de boîtes en fer avec une mèche au milieu trempée de pétrole pour s'éclairer.

Une pierre présente dans les environs que l'on appelait «tone» était utilisée pour allumer la flamme : deux pierres frottées l'une contre l'autre provoquaient des étincelles qui permettaient ensuite d'allumer une petite flamme grâce aux brindilles sèches au cœur de l'arbre appelé l'aloï.

### **Les plantes curatives**

Pour les soins, les anciens avaient une grande connaissance des plantes médicinales et de leurs effets. Les habitants ne se déplaçaient que très rarement pour aller à l'hôpital ou consulter un médecin.

Ils allaient cueillir eux-mêmes au pied de la montagne et dans les environs les herbes dont ils avaient besoin et les préparaient de façon adéquate. Les techniques étaient transmises de parents à enfants. Aujourd'hui encore, si vous interrogez les villageois du Morne, ils vous diront comment soigner la fièvre, la gangrène, l'hypertension ou diverses douleurs sans avoir recours à aucun médicament mais seulement grâce aux herbes et tisanes. Cela, ils l'ont appris de leurs parents. Par ailleurs ils sont aussi persuadés que l'air de la mer possède un effet curatif.

Ces plantes, ils les trouvaient donc dans les environs, au pied de la montagne du Morne, dans les forêts avoisinantes. Les femmes préparaient les décoctions tandis que les hommes étaient chargés de ramasser les herbes nécessaires. La transmission des connaissances et techniques se faisait uniquement par voie orale, de parents à enfants. Les enfants reproduisaient ainsi le même schéma jusqu'à aujourd'hui.

Toinette Varlope utilisait certainement elle-même ces techniques pour soigner ses maux et ceux de ses enfants.

### **Les nuits de Séga**

Le principal loisir des villageois de Trou Chenille était l'organisation de nuits de séga: généralement le samedi soir. Il s'agit de ce qu'on appellerait aujourd'hui le séga typique : ils chantaient et dansaient toute la nuit au son du tambour et d'un autre instrument appelé bom («bobre»). Il s'agit d'un instrument à corde rudimentaire d'origine africaine, constitué d'un morceau de bambou tendu en arc par une corde et relié à une noix de coco séchée et vidée servant de caisse de résonance. Cet instrument est connu depuis 1769. Les gens composaient leurs propres textes. Il s'agissait le plus souvent d'improvisation sur ce qui se passait dans le village : ils racontaient en musique les histoires ou chamailleries ou déclaraient même leur amour en publique. Ces nuits de séga étaient renommées et les villageois des autres environs comme Petite Rivière Noire, de Case Noyale ou encore de Chamarel n'hésitaient pas à faire le déplacement à pieds pour y participer. Pendant ces nuits, on mangeait et buvait le tilambik, baka et le kalou qui sont des alcools que les villageois fabriquaient artisanalement. La technique de fabrication se transmettait également de parents à enfants. La vie à Trou Chenille était donc très simple mais assez douce.

### **Déplacements forcés**

En 1945, les familles de Trou Chenille qui avaient occupé ces terres depuis des générations et des générations ont été contraints de partir sous la pression et les menaces du propriétaire terrien local.

La question qui se pose ici est: à qui appartient Trou Chenille?

Alexandre Descubes, Land Surveyor, a compilé un cadastre en 1880 à partir de plans, d'actes de propriété et d'autres sources antérieures, sur lequel apparait le village de Trou Chenille et le vieux cimetière. Mais le nom du propriétaire de ce territoire n'est pas mentionné contrairement aux autres parcelles de terrain du Morne pour lesquelles les noms des propriétaires sont bien mentionnés. J'en ai déduis personnellement qu'à l'époque, Trou Chenille appartenait à ses habitants.

Ces habitants ont donc été contraints de quitter leurs habitations et de déménager vers l'Embrasure, plus à l'intérieur des terres pour la plupart. Un délai leur avait été donné, le temps de reconstruire une nouvelle petite maison avec les moyens qu'ils pouvaient trouver à ce moment là. Aucun dédommagement ne leur a été versé pour quitter la terre de leurs ancêtres. Si à l'époque aucune famille ne s'est rebellée contre ce déplacement forcé, c'est avant tout car ils craignaient la famille Cambier. Il faut rappeler que certains villageois travaillaient pour cette famille et en étaient par conséquent dépendants. Par ailleurs, depuis l'époque de l'esclavage, on leur a toujours dit qu'il fallait respecter et se courber devant les descendants de colons. C'est donc sans se battre et impuissants qu'ils ont abandonné leur village. Ce fut donc le premier déplacement forcé des villageois de Trou Chenille.

Le deuxième déplacement forcé à eu lieu 20 ans plus tard, après le cyclone Carol en 1960.

Les habitants de Trou chenille s'étaient donc installés à l'Embrasure, des deux côtés de la route royale. L'installation à l'Embrasure a posé problème notamment aux pêcheurs qui se retrouvaient à présent beaucoup plus loin de la mer.

Les maisons étaient construites dans les mêmes matériaux qu'auparavant et donc vulnérables face aux cyclones. C'est d'ailleurs après le passage du cyclone Carol dans les années 1960, qu'il a été demandé aux villageois de quitter une nouvelle fois leurs maisons dévastées pour aller s'installer plus loin, sur des terres libres du gouvernement ici même au Morne Village actuel. Dès le déplacement des villageois effectué, des barrières et des fils de fer ont été mis en place pour délimiter le terrain. Et l'accès fut complètement interdit à quiconque.

Comme pour le déménagement de Trou Chenille vers l'Embrasure, c'est tout d'abord la boutique qui a été déplacée: privés des commodités et des éléments de première nécessité que fournissaient la boutique, les familles ont été une nouvelle fois contraintes de se déplacer et de suivre la boutique.

A l'emplacement actuel du village, les habitants ont choisi un bout de terrain pour s'installer. Mais ils ont tout d'abord été parqués dans des baraquements.

Un contrat a ensuite été établi. Le contrat de mon arrière grand père Elis Donice a été établi en 1964, il s'agissait d'un contrat de 20 ans renouvelable. Il pouvait disposer de ce terrain sous certaines conditions et contre le paiement de 31 roupies chaque année.

Trou Chenille est un village historique. Aujourd'hui encore, nous pouvons y trouver les vestiges des maisons. Malheureusement, l'accès au village est interdit à ses anciens occupants. Les habitants de Trou Chenille ont perdu tout droit d'occupation sur ce qui avait été autrefois leur territoire. On leur refuse tout accès.

Pour ses habitants, descendant d'esclaves, il s'agit d'un site sacré, il ne s'agit pas ici seulement de folklore comme on peut l'entendre quelque fois, mais Trou Chenille est profondément lié à leurs origines et leur identité propre.

Les villageois ont un rapport très intime avec la montagne du Morne. C'est le lieu de leur enfance, là où leurs parents et grand parents ont pu leur conter des histoires sur leurs ancêtres. Ce village symbolise une façon de vivre de l'époque. La tradition orale, les coutumes de ses habitants que l'on ne trouve pas ailleurs à Maurice sont l'héritage que leur ont laissé leurs ancêtres esclaves.

Toinette Varlope a laissé à ses enfants un patrimoine culturel incroyable. Aujourd'hui encore, ses descendants lui rendent hommage en perpétuant ce qu'elle leur a appris.

Comme leurs ancêtres esclaves autrefois, les familles du Morne sont en quête aujourd'hui d'une certaine liberté et veulent lutter contre l'oppression. Ils veulent tout simplement la justice. C'est la raison pour laquelle un dossier a été déposé devant la Commission Justice et Vérité en 2010.

## LE MORNE BRABANT AUJOURD'HUI

Les habitants pensent sincèrement que Trou Chenille a appartenu à leurs ancêtres esclaves du Morne et estiment qu'ils ont par conséquent un droit sur ce terrain. Il faut par conséquent que la lumière y soit faite sur le droit de propriété depuis l'époque de l'esclavage jusqu'à aujourd'hui.

Si aujourd'hui les langues se délient c'est aussi grâce au développement actuel du Morne. Les Donice, les Verloppe et les autres familles ont souvent eu l'impression d'être des laissés pour compte. Ils ont vécu dans une certaine pauvreté et des conditions difficiles après leur éviction de Trou Chenille. Comme beaucoup de la population créole, ils se sentent en marge du développement de Maurice.

Mais aujourd'hui, alors que le site du Morne a été reconnu site patrimoine mondial de l'Unesco, ces familles se réjouissent que l'on s'intéresse enfin à elles et à leur histoire. Elles souhaitent avant tout que le développement du village continue à long terme, et que tout le monde puisse en profiter : pas seulement les gens aisés mais également les villageois de toutes conditions. N'oublions pas que ce qui fait un village, ce sont ses habitants, ces descendants d'anciens esclaves.

## CONCLUSION

A présent maman à mon tour, je serai fière un jour d'expliquer à mon fils que ses ancêtres étaient esclaves et comment ils ont vécu.

Je lui raconterai comment un jour, une certaine Toinette Varlope a été amenée à l'Isle de France pour y travailler la terre de force et comment, elle fût libérée et sa famille s'est agrandie.

Dix générations plus tard, je pense encore à son courage et à sa force, à sa probable envie de voir ses enfants libres un jour. Elle serait peut être fière aujourd'hui de voir que ses descendants résident toujours au Morne et que certains se sont même installés très loin, en Europe.

## REPORT SUMMARY

The report centres on the field survey undertaken between the 19<sup>th</sup> and 31<sup>st</sup> of July 2010 at the Le Morne Cemetery Site, Le Morne, Mauritius. The excavations were undertaken under the aegis and commission of the Truth and Justice Commission, Port Louis, with the express desire to gain a clear understanding of who was actually interred in the cemetery. Previous oral knowledge and conjecture about the site had suggested that the buried were of Malagasy origins; our principal objective was to clarify this issue given the significance of the site in relation to Le Morne Cultural Landscape WHS. In addition to this main objective, it was hoped that any remains recovered might be used within the framework of the 'Health Legacies of Slavery and Indenture' project directed by Mr Benjamin Moutou, with myself as team leader. The remit of this latter project was to better understand, through comparative study, the impacts (if any) of slavery and indenture on the health of the modern Mauritian population.

This site is remarkable. We have clear evidence relative to aspects of diet, health and working life. As significant, we have a unique and unparalleled insight into the life ways of an ancestral Mauritian community as it relates to death, burial and spiritualism. While it is unfortunate that in the absence of DNA evidence, we do not at this stage have conclusive evidence of the origins of those interred, we must not lose sight of the fact that this is a *first* for the Republic, and represents an invaluable step in linking the modern Mauritian population with its past.

Our main recommendations place emphasis on the need to carry out further excavation and analysis as this study has been most heavily hampered by a lack of samples. Given what this site and the interred remains represent, it is our sincere hope that further studies can be undertaken as these are essential for better understanding the site and the peoples buried.

## ACKNOWLEDGEMENTS

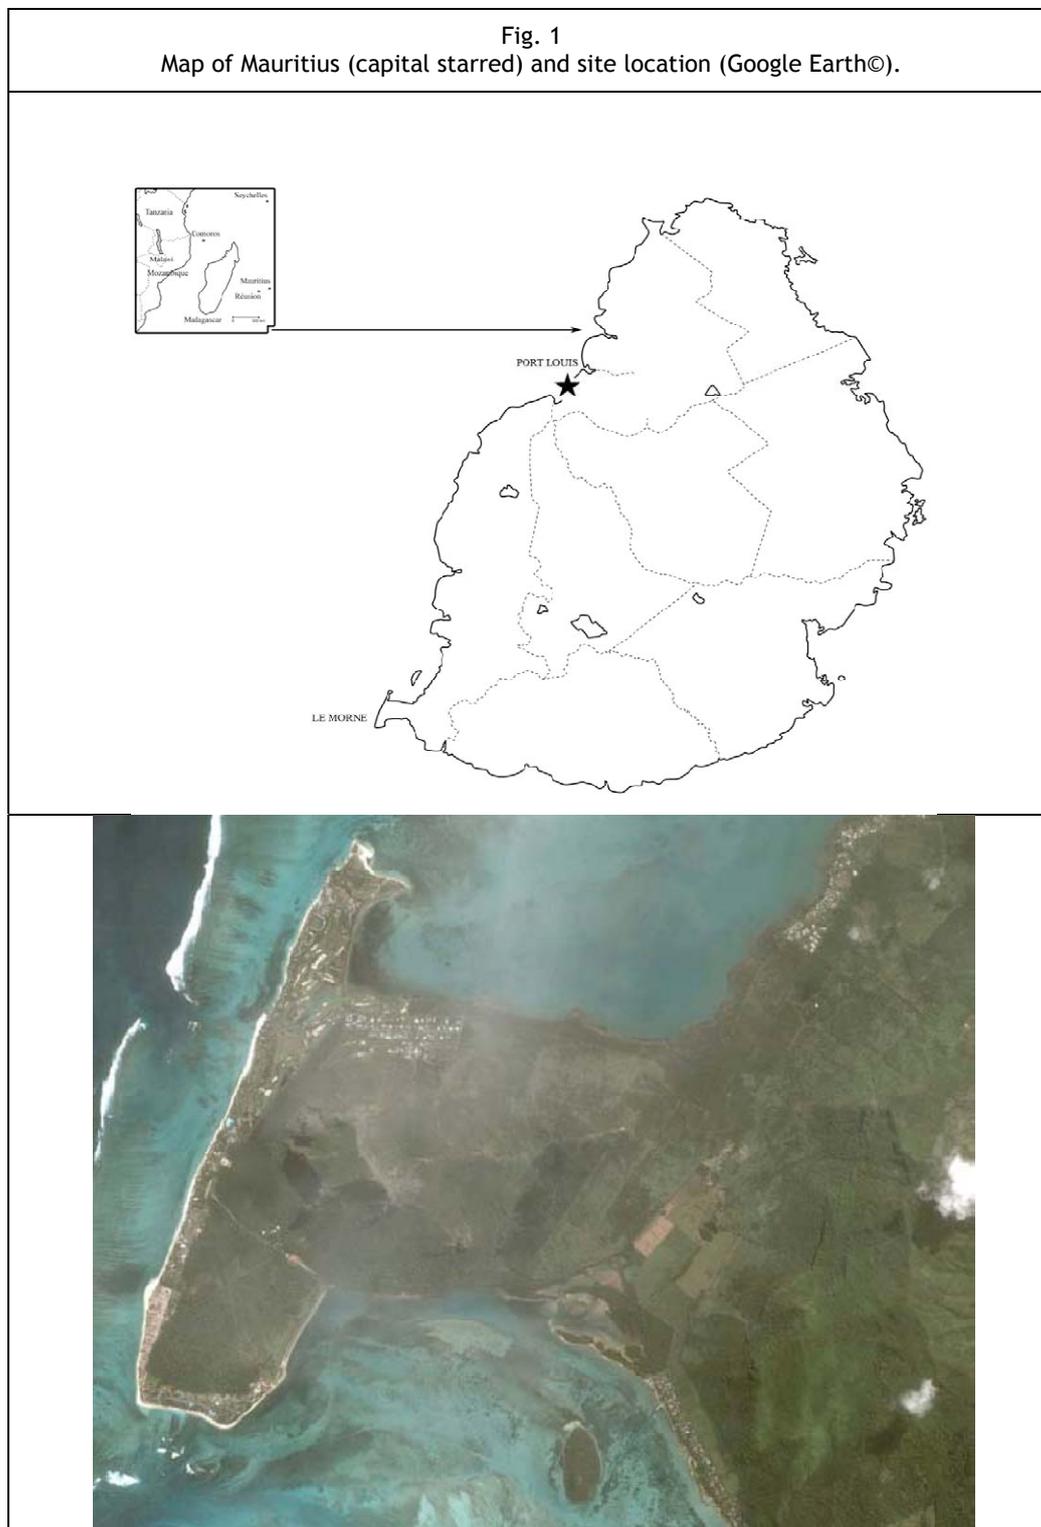

We must firstly acknowledge the support of the Truth and Justice Commission, particularly Prof. Alex Boraine, Dr. Vijaya Teelock, Mr. Benjamin Moutou, Mrs. Colette Le Chartier, Mr. Allan Charlot and Mr. Satyendra Peerthum, all of whom provided much needed support and assistance. From the Le Morne Heritage Trust Fund (LMHTF), our sincere thanks to the Acting Chairperson, Mr. Mathieu Laclé, whose support is gratefully acknowledged. Our work at Le Morne was facilitated by Mr. Jean-Francoise Lafleur and Mr. Stephan Dux of LMHTF, and many local participants, all of whose assistance we greatly appreciate. We are all thankful to Dr Anwar Janoo and the students of UoM, for assisting us so ably on many occasions, and Mrs. Nelly Ardill and Mr. Thierry Le Breton from SOS Patrimoine for both financial and logistical support. Our thanks to Mr. Beebeejaun of the Mauritius Museum Council for kindly providing space for interim storage of the skeletal materials prior to analysis. We also gratefully acknowledge the assistance of Ms. Sheila Thanoo of NHF for providing permissions and support throughout our venture, and Mr. Choonee, Minister for Arts and Culture for quickly recognising the value of this site and immediately providing 24hr security. Our grateful thanks to Prof. Konrad Morgan, VC of UoM, for providing logistical support in storing and transporting the skeletal remains as well as providing facilities to study the remains.

## FUNDING BODIES

Funding for this seasons' work has been generously provided by, and gratefully received from, the TJC, LMHTF, SOS Patrimoine, The University of Mauritius, The British Academy, the University of Central Lancashire and the US State Office, Mauritius.

## 1.0. INTRODUCTION

The following report details the 2010 campaign of archaeological investigations undertaken at Le Morne Cemetery, Le Morne, Mauritius (fig. 1), under the aegis of the Truth and Justice Commission, Port Louis, Mauritius.

The site of Le Morne Brabant represents perhaps one of the most significant global commemorations to the memory of slave resistance. Not only does this site evidence a rich associated cultural and oral history within a local context, but it has recently been inscribed as a UNESCO World Heritage Site in 2008 precisely for its remarkable role within the maroon movement.

Fieldwork was carried out between the 19<sup>th</sup> and 31<sup>st</sup> of July 2010 by a collaborating group of professional archaeologists from the University of Central Lancashire, University of Reading and University of Cambridge, UK; Università Ca' Foscari, Venezia, Italy and Inštitut za antropološke in prostorske študije, Ljubljana, Slovenia.

The excavation focused on the area that had previously been studied during the 2009 survey season, identified as the main cemetery site. Two further 'satellite' regions were also included, which ultimately proved to be highly beneficial thanks to the identification of further interred remains.

### 1.1. DESCRIPTION OF THE CEMETERY AND GRAVES

The site could best be described as an abandoned, but not unused, cemetery. Although there are no apparent connections between the present population and the interred, the cemetery shows clear and unequivocal evidence of *longanis* practices.

Fig. 2  
Site prior to clearance showing evidence of *longanis* (voodoo) practice.

The cemetery itself is located enigmatically in the shadow of Le Morne Brabant Mountain, on a small sandy islet, which is regularly cut-off from the mainland as a consequence of tidal oscillations. Based on current evidence, the site appears to be divided into three sections, a main central burial area that is approx. 20m x 25m aligned north-south along the longest axis (with the supposed entrance due north). This is orbited by two apparent satellite areas, each considerably smaller, and measuring approx. 5m x 6m to the east and 5m x 5m to the west of the main area.

Prior to excavation, and as one might expect in a tropical environment, the area was heavily overgrown with small trees, mostly acacia, shrubs and other low lying vegetation. Two larger, and

considerably older, trees seemed to form a natural focal point for the central grave region. Evidence of current ritual practices was observed from remains of sacrificed chickens (fig. 2), portions of young pig, an abundance of coconuts, and copious small earthenware oil lamps. Other examples, more enduring and arguably less contemporaneous, were small dolls and bottle tops nailed into one of the larger 'focal' trees. Under the bottle tops were small pieces of cloth with the names of individuals written in ink; the ritual significance of these finds are complex, but are unlikely to have any particular connection with the interred individuals. Despite our greatest fear, only one of the graves was particularly disturbed, and none were robbed.

The graves themselves were delineated by basalt rock. These delineations, of varying sizes, were proportional to the interred, i.e. smaller graves denoting infants, larger graves for adults. This was not immediately obvious as the arrangement of stones was often disassociated and apparently ad hoc. While the majority of the graves were marked by relatively small-to-medium sized stones that showed little evidence of being tailored or fashioned (cut) in any way, the more prominent adult graves were delineated with cut basalt blocks. These were most likely brought to the site as waste building material and re-used for constructing the grave markers.

## **2. Fieldwork Procedure**

The excavation procedure followed a basic hierarchical system. Individual stratigraphic units were defined as 'contexts'; a collection of associated contexts or artifacts were defined as 'features', and groups of features were defined as 'structures'. For the purposes of clarity and to facilitate recording and accession, each context was provided with a unique identifying index number (i.e. context number).

All grave fill contexts (sandy layers) were subject to 100% coarse dry-sieving, firstly through a 5mm mesh and then subsequently through a 3mm mesh. Due to logistical and time constraints it was not possible to carry out flotation for general biological analysis, although given the nature of the site this was not deemed particularly detrimental under the circumstances. All finds, including all osteological remains, were hand-collected.

### **2.1 EXCAVATION PROCEDURE**

The 2009 field season deemed the cemetery site particularly suitable for geophysical survey as the graves were constructed using basalt, a highly magnetic material, set in natural sand geology that is magnetically quiet. Grids of 10 x 10 metres were laid out using a Leica 700 series Total Station. The station and grid points were later recorded with GPS for subsequent geo-referencing. Since the common line of archaeological features (the graves themselves) were aligned roughly north west - south east, the base line was oriented east-west and the direction of traverse was north. The magnetometer survey of this site was successful in identifying surface and sub-surface archaeological features. The quiet magnetic signal of the sand in this area contrasts sharply with the dipolar anomalies created by the highly magnetic basalt stones used to construct the graves. In total, some 21 clearly defined sub-soil structures were identified following the 2009 geophysical survey.

Building on this in 2010, our first remit was to establish extent of the cemetery based on the preliminary results from the 2009 survey. This involved a concerted programme of site clearance, guided by the field archaeologists at all times, but heavily reliant on the efforts of local Le Morne and additional UoM volunteers. Due to the location, but more importantly the sensitive nature of the site, no mechanical equipment was used for site clearance; a more sympathetic approach based on hand clearance was preferred. Figures 3 and 4 demonstrate the extent and outcome of the work undertaken.

Fig. 3  
Site - prior to clearance

Fig. 4  
Site - post clearance

Following on from the site clearance a full archaeological reconnaissance of the site was undertaken, with very positive results. A further 24 'structures' were discovered, bringing the total count of burial type features to 45.

The area of the excavation was set out using a Total Station Theodolite, with reference to the previous seasons survey strategy. Once geo-referencing was complete, actual excavation was undertaken. The nature of the topsoil was comprised of a relatively loose amorphous substrate composed of loose-leaf litter and other vegetal matter. However, this rapidly gave way to a series of sandy layers that continued without a break through to the level in which we were able to recover osteological remains, some 90cm below topsoil level. A full soil, including microstructure geo-archaeological, assessment is provided in Appendix IV. Due to the nature of the sandy soil, all the graves were excavated in plan, where possible by context, but by spit were no clear contextual divisions were evident. Excavating by spit effectively means that soil is carefully removed by standard units (e.g. 20cm) down to the level of finds. Throughout the process a photographic log was maintained, with images taken of each skeleton whilst *in situ* before lifting.

### 3. FIELDWORK RESULTS

All 45 structures were cleared of vegetation, recorded and geo-referenced; a total of eight were actively excavated resulting in the recovery of 11 entire skeletons, the analysis of which form the bulk of the remainder of this report.

Very few additional finds were made with the skeletal remains, although notable exceptions include a series of buttons, a small collection of French coins and a glass bottle. A spade and hoe were also recovered just below the topsoil layer of grave 8. There was limited remaining evidence of the actual mode of interment, although ephemeral residues of ostensibly well-constructed coffins were revealed by careful excavation (see fig. 5 below).

Fig. 5  
Coffin outline evident in grave no: 29, as revealed through careful excavation

### 3.1 SUMMARY OF EXCAVATED GRAVES

Grave no. 01:

A rectangular 'frame' constructed of basalt and coral, and held together with a lime mortar, delineated this grave (fig. 6). A number of the basalt block, mainly those at the corners of the frame, were cut. Beneath these blocks was a dark brown layer of topsoil, which was heavily overgrown with a network of roots. The fill of the grave comprised three sandy layers, alternating from light grey to light beige in colour and with decreasing vegetal matter at lower depths. At the lowest context a coffin with the skeleton of an adult and a juvenile (neonate) were recovered (fig. 7). The remnants of a wooden coffin were visible as a darker outline, detectable in the lighter sand deposit; the remains of the metal elements of the coffin, ostensibly iron nails, were also recovered. The adult skeleton's head was positioned to the left. Some bones of the right foot were displaced from the original position otherwise the skeleton was complete. The placement of the arms of adult skeleton suggests that they were crossed at the abdomen at the time of burial. The remains of the juvenile were positioned between the legs (knees) of the adult, with the head towards the feet of the adult. The level of ossification of the juvenile bones was at an underdeveloped stage and the remains were thus very fragile and not preserved as a full complement.

The grave contained no finds other than human bones, metal remnants of the coffin and a set of round buttons made from mother of pearl, indicating that one or both of the interred individuals was clothed when buried.

Fig. 6  
Layout of grave no. 1, with scaling and positioning

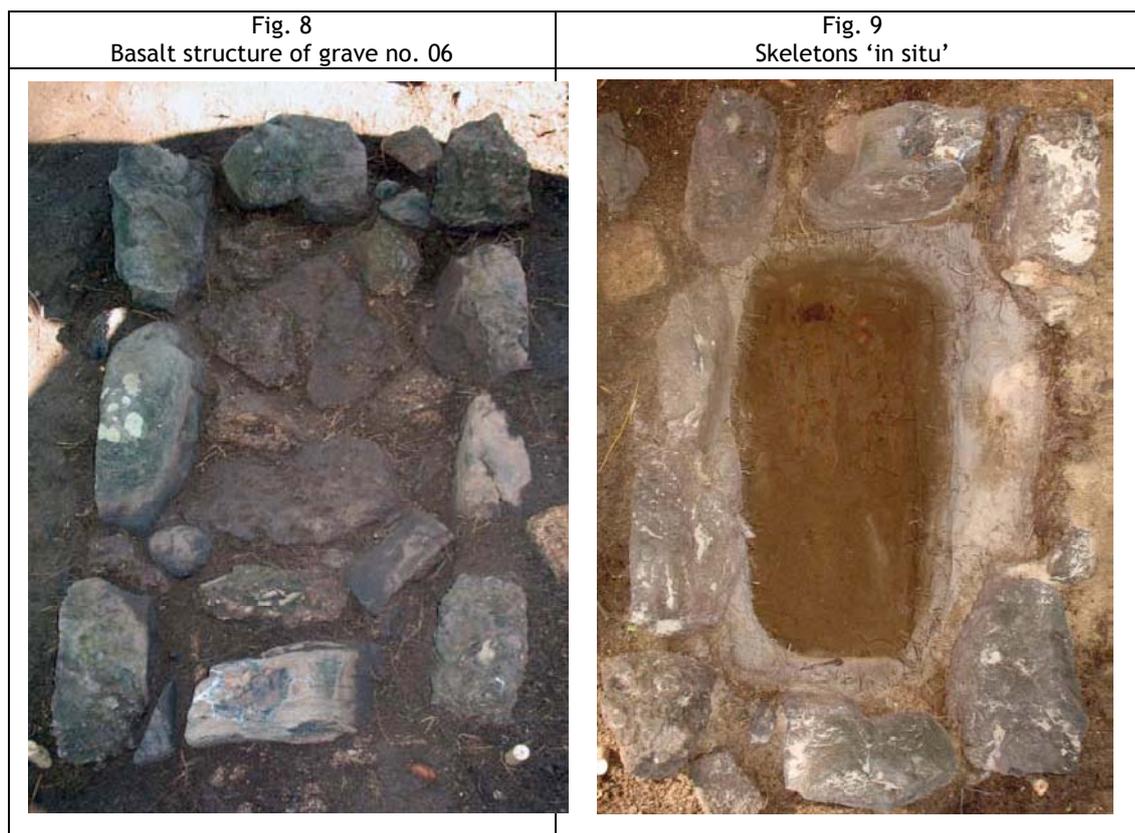

Fig. 7  
Position of both skeletons 'in situ'

Grave no. 06:

The size of the rectangular basalt stone covering the grave suggested this was a small inhumation (fig.8). Under the basalt, a dark brown layer of soil was present, overlaying three layers of sand, altering in colour (light beige to dark grey) and moisture content (dry to wet) with increasing depth. The lowest sandy layer contained two skeletons of newborn juveniles, with their head orientated to the east (fig.9). During excavation, traces of a rectangular coffin were detected as a residual variation in substrate colouration; metal finds (nails) were also recovered towards the distal (feet) end of the coffin. A stone plate was also recovered, covering the head of one of the skeletons, and possibly part of burial practice.

Grave no. 07:

This grave was delineated by a series of four rectangular structures, all comprised of basalt, and laying at different stratigraphic levels (fig.10). Those basalt stones on the surface (contemporary structure) were lime mortared; the blocks themselves had been cut, most likely indicating that the structure was comprised from reused building material. The position of the top row of stones did not align to the position of lowest row. After the top organic dark brown soil was removed, within the stone frame of the grave, some ritual objects were found, pertaining to the modern times. Five sandy layers filled the grave, with the lowest containing the remnants of a wooden coffin, visible as a series of darker outlines within the sand deposit delineating the wooden frame of the coffin. Portions of wood from the coffin were recovered, along with eight metal elements (iron nails). The adult skeleton faced Le Morne Mountain (fig.11). The skull was turned to the right and most of the long bones were displaced from their original place, but in correct anatomical position. Under the skull a fabric bag was recovered containing four silver coins.

Fig. 10  
Basalt structure of grave no. 07

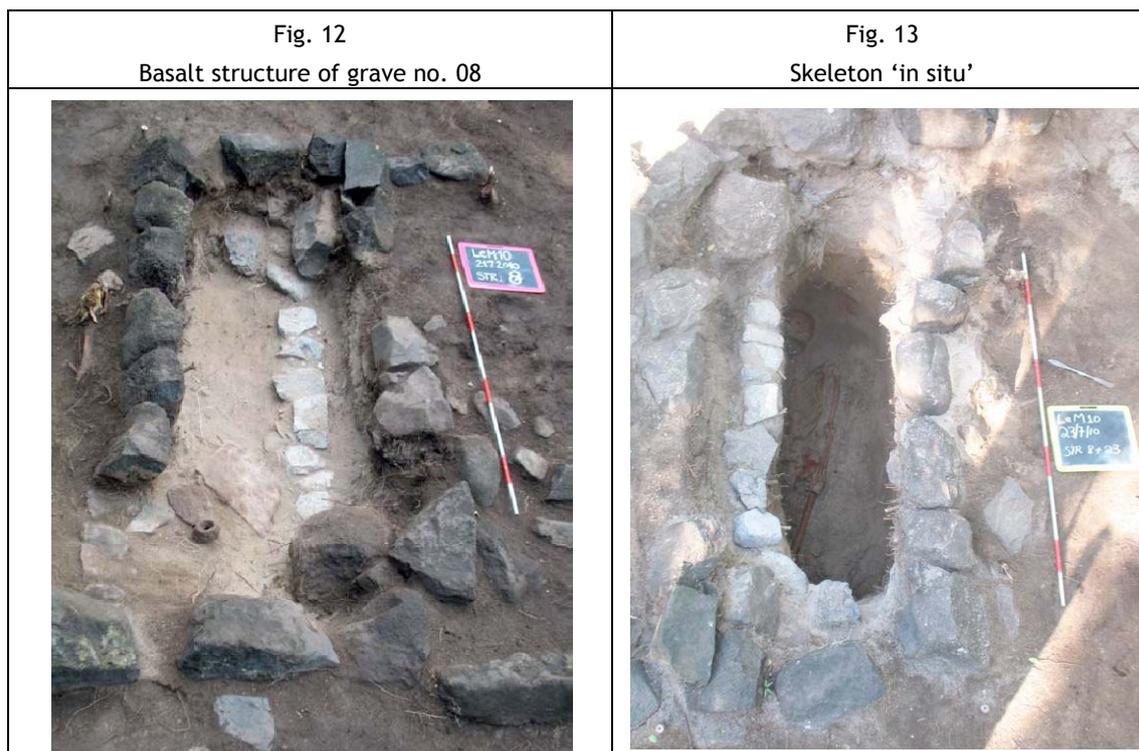

Fig. 11  
Skeleton 'in situ'

Grave no. 08:

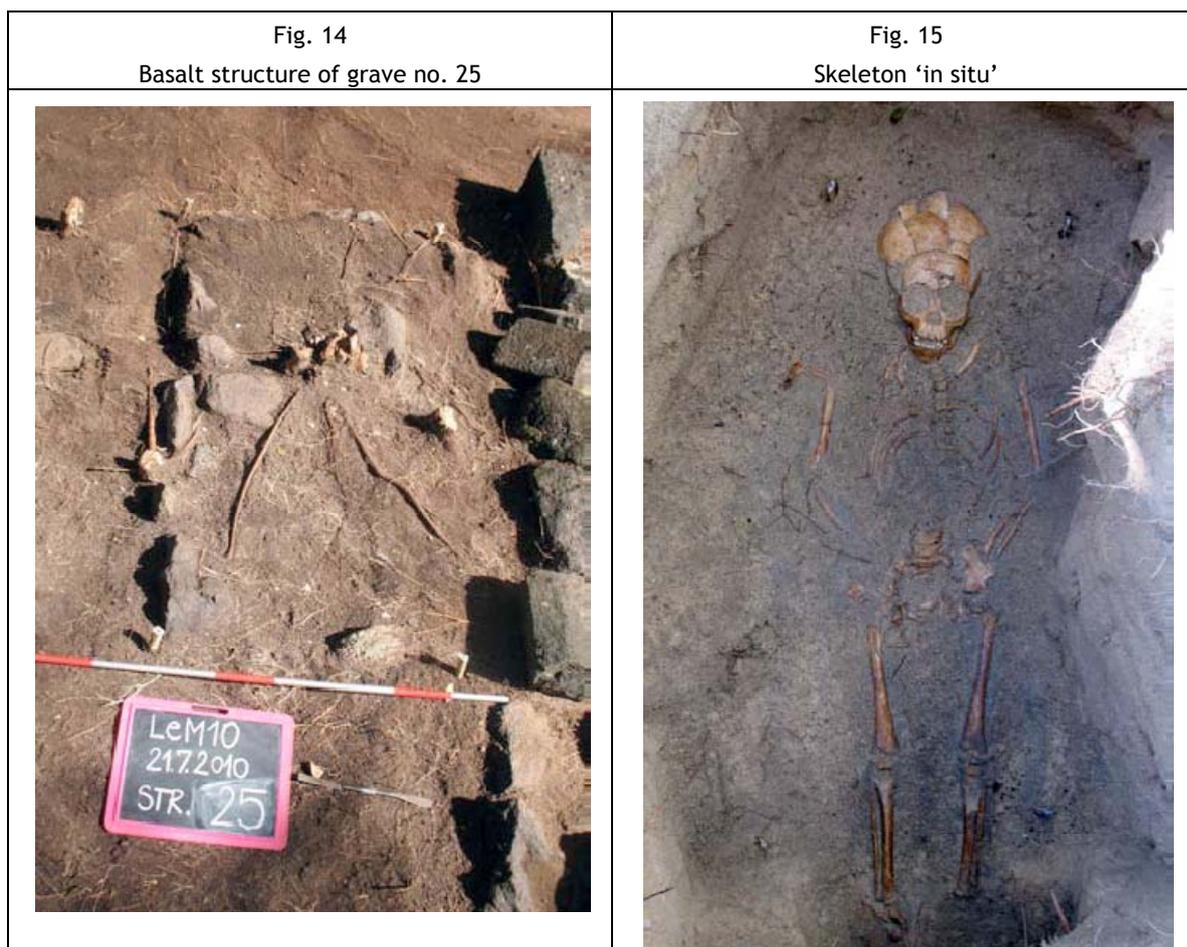

Based on the size of the basalt structure outlining this grave, it was assumed to be the grave of an adult. Basalt stones were positioned on the topsoil to form a rectangular outline (fig.12). The stones had no mortar linking them together, resulting in two gaps of missing stones. Under the topsoil, a sandy layer covered a second basalt grave outline. The position of this second tier of

basalt was not aligned with the upper layer or directly with the inhumation. The second layer of stones was smaller, more tightly positioned, and was most likely the original surface marker of the grave. The first sandy layer under the second stone structure contained two artefacts, a shovel and a hoe, which were not part of the original grave deposits, but were placed subsequently. A second sandy layer under the second stone structure contained remnants of a coffin (evident as a darker substrate layer), six iron nails, two of which retained remnants of the wood coffin. The bones of a well-preserved adult were recovered, with the head facing Le Morne Mountain (fig.13). In addition, a set of round buttons, made from mother of pearl, was recovered which indicate that the interred was clothed when buried. A sample of the soil deposit underneath the skeleton was taken for a geo-archaeological analysis (App. IV).

#### Grave no. 25:

A smaller rectangular basalt stone structure, next to grave no. 07, indicated that there was a child buried next to an adult (fig.14). The top organic soil covered the sandy fill of the grave, which was comprised of three sandy layers. The last sandy layer contained the remnants of a wooden coffin and a juvenile skeleton (fig.15). The bones were well preserved, although the skull was highly fragmented. Interestingly, and mimicking a number of the other graves the top stone structure lay in a completely different orientation to the interred individual. The surface structure was facing Le Morne Mountain, while the remains were orientated towards the south.

## Grave no. 29:

A crudely oval basalt structure with two stones placed in the middle, presumably cutting it into two halves, delineated this grave (fig.16). As with many of the graves, modern coins, earthenware oil lamps, thin red and white candles, parts of sacrificed animals, and plastic bags, were spread on and around the structure, leftovers of ritual practices performed on the cemetery. Under the first stone structure was an organic, dark brown soil, which contained a network of tree roots. A second stone structure, more rectangular in shape, was noted beneath the topsoil layer. The rectangular basalt structure seemed to be composed of 2 similar parts, with a gap of 20 cm separating them. At the time of excavation this suggested that two juvenile burials were in this grave. Both parts were mortared on the tops and between the stones. Under the second stone structure was a visible cut for the grave, filled with four sandy layers. The last contained traces of a coffin (noted as a darker outline in the deposit), two iron nails and a well-preserved juvenile skeleton (fig.17). Two round, mother of pearl, buttons were also recovered.

Fig. 16

Basalt structure of grave no. 29

Fig. 17 Skeleton 'in situ'

Grave no. 30:

A small rectangular basalt structure on the surface suggested that this was a child's grave (fig.18). Under the basalt structure, which was disturbed by a tree trunk, a dark brown layer of soil was present. This organic layer, full of roots, covered the grave cut, which was filled with two sandy layers. The second contained a juvenile skeleton, with the head turned to the right and the arms crossed at the abdomen (fig.19). This grave was originally dug deeper than others, reaching a depth of 1.20m. Due to this greater depth, the interred was submerged at high tide, which made of this grave very difficult.

The orientation of the surface stone structure and the alignment of the skeleton differed for approximately 45 degrees. The stone structure was oriented toward west while the skeletons alignment was more toward Le Morne Mountain. Two small round buttons made from the mother of pearl were recovered from this grave.

Fig. 18

Basalt structure of grave no. 30

Fig. 19  
Skeleton 'in situ'

Grave no. 33:

The basalt structure on the surface of this grave was damaged; although it was clear that it had a rectangular shape at its origin and that it was oriented toward Le Morne Mountain (fig.20). The grave occupied what was apparently the centre of the cemetery thus making it a focus for modern ritual practices. This resulted in copious quantities of modern objects being discarded on and around the grave. As the stone structure was damaged, with numerous stones missing, it was initially suspected the grave had been looted and any remains robbed.

The first substrate layer, which in the other graves had been composed of dark brown topsoil, here contained a mixed dark brown soil and light beige sand with a considerable quantity of admixed modern material from recent ritual practices. This disturbed deposit was thick, reaching a depth of 50cm. Establishing who / what was responsible for the disturbed state of this grave was difficult as there was evidence of both animal (crabs) and human intervention. Under this mixed layer the cut for the grave was visible, again differing considerably from the orientation of the surface structure. The cut for the grave was filled with a sandy layer; at a depth of 90 cm from the surface an adult human skeleton was recovered, facing Le Morne Mountain. All the bones were well preserved. Under the skull was a dark green, glass bottle of unknown origin. Upon lifting of this skeleton (grave 33 UPPER), another became visible directly beneath the first (grave 33 LOWER) (fig.21). The second adult skeleton was aligned and positioned in a near identical position to the first adult, with the exception that the arms crossed on the abdomen, while the arms of the upper skeleton were

positioned parallel to the body. Almost all the bones of the lower skeleton were preserved, except the long bones of the left arm, which were missing apparently as a consequence of crab activity.

Fig. 20

Basalt structure of grave no. 33

## 4. Post-excavational Analysis

Fig. 21  
Skeletons 'in situ'

The following details the post excavation analysis of the skeletal finds. One facet of these post excavation research, commissioned by the Truth and Justice Commission and undertaken by Dr Will Goodwin of the University of Central Lancashire, is not presented herein. The analysis of aDNA, regrettably, was unsuccessful. Tropical locations are notoriously poor at preserving ancient DNA; furthermore, the fact that the skeletons themselves would have been cyclically submerged in seawater is likely to have had a deleterious effect on any DNA.

The 11 skeletons recovered consisted of six juvenile and five adult individuals. Aside from the actual details of recovery, the most significant information regarding the skeletal finds has been derived from osteological analysis, detailing demography, indicators of health and evidence of lifestyle. Corroboratory evidence regarding diet and migration has been provided by bone collagen and enamel carbonate isotopic analysis.

## 4.1 POST-EXCAVATIONAL TECHNIQUES

### 4.1.1 ISOTOPIC METHODS

Carbon and nitrogen stable isotope analysis was carried out on the rib bones of ten individuals from La Morne cemetery and one deer mandible (a faunal component is key for providing corroboratory data). Five of the individuals were adults (2 females, 2 probable females and 1 probable male), 3 were children and 2 were peri-natal infants at the time of death. The collagen results from the peri-natal samples will reflect the diets of their mothers and are thus included in the analyses below. Collagen was extracted using the standard methodology of the Dorothy Garrod Laboratory, University of Cambridge, based on the method described in Privat *et al* (2002). All of the collagen was deemed to be of good quality as it fulfilled the following criteria: an atomic C:N ratio of 2.9 to 3.6 (De Niro 1985); a 'collagen' yield of >1% by mass; final carbon yields of >13%; and final nitrogen yields of >4.8% (Ambrose 1990). Each sample was analysed in triplicate and the mean results are presented below (4.2.1).

Seven of these individuals were also sampled for tooth enamel carbonate. The five adults and two of the children were sampled for tooth enamel carbonate. A variety of teeth were sampled and it should be noted that some of the samples are likely to show the fractionation effects of breastfeeding.

The sample size was too small for reliable statistical analyses.

### 4.1.2 OSTEOLOGY METHODS

Of the 11 recovered skeletons, two skeletons were initially carefully washed; however, as the matrix was largely sand, it was found that cleaning could be as effectively achieved by dry brushing, so the remainder of skeletons were cleaned using this technique by Dr Anwar Janoo, the author, and a team of students from the University of Mauritius. This had the advantage of reducing the potential for fungal growth on damp skeletal remains.

The skeletons were examined following the standard procedures recommended by Buikstra and Ubelaker (1994), although with some amendments. The presence and degree of completeness of all skeletal elements was systematically recorded. Age of sub-adult individuals was determined by development and fusion of the long bones and cranium, long bone length, and dental development after Ubelaker (1989). Infant age was calculated from long bone length using the linear regression equations of Scheuer *et al.* (1980) Adult age was determined following the recommendations of O'Connell (2004), with the auricular surface of the ilium recorded following the modified method of Buckberry and Chamberlain (2002). Dental wear was recorded using the Smith (1984) and Scott (1979) guidelines, but was not used to determine adult age as so little is known about wear rates in this skeletal population. Pubic symphyseal ageing followed the criteria of Brooks and Suchey (1990), although the pubic symphysis was preserved in only one individual from this assemblage. Although cranial suture closure was recorded by the method advocated by Buikstra and Ubelaker (1994), it was regarded only as a very general indicator of age. Measurement of adult remains follows the criteria of Martin (1957), whilst non-metric traits were recorded according to Buikstra and Ubelaker (1994). Juvenile measurements follow the criteria of Fazekas and Kosa (1978). Adult sex was determined by sexually dimorphic features of the pelvis and skull, measurement of the humeral and femoral heads and general assessment of robusticity, in declining order of reliability. The sex of sub-adults cannot be reliably determined from the skeleton.

All pathological conditions were noted, photographed and recorded in detail. All pathological bones were examined under x10 magnification and x-rays taken wherever this would aid in interpretation. Traumatic lesions were recorded according to the criteria of Lovell (1997), whilst diagnosis of possible infectious conditions followed Rogers and Waldron (1989). Recording of arthropathies followed the recommendations of Rogers and Waldron (1987; Waldron 1995). All long-bones of individuals older than neonatal were x-rayed and examined for traces of growth interruption (Harris) lines.

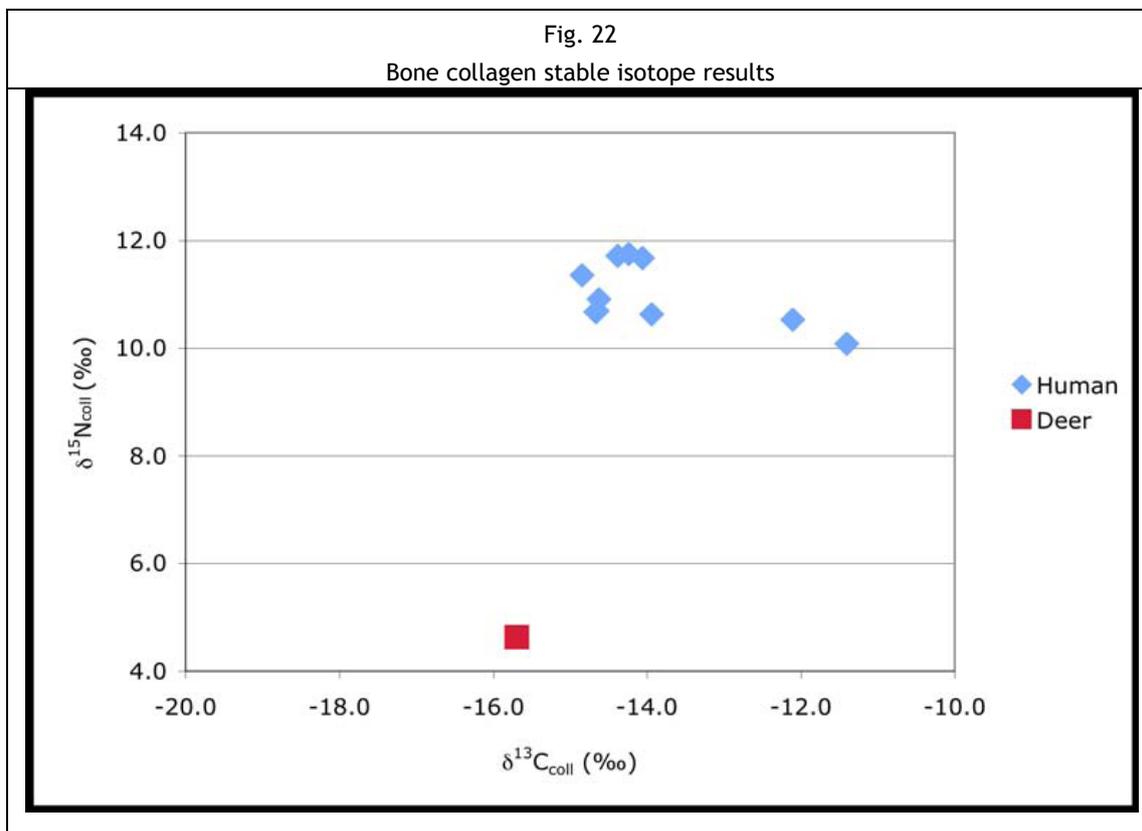

Stature estimation in adult females followed the recommendations of Trotter and Gleser (1977) for Black Males and Females. Where possible, the equations for the femur were used. Where the femur was not present, equations for other long bones were used. Stature estimation of infant and children is unreliable from skeletal remains (Lewis 2007: 77) and so was not attempted for this population.

## 4.2 POST-EXCAVATIONAL RESULTS

### 4.2.1 RESULTS OF ISOTOPIC ANALYSIS

The deer sample has collagen isotope values of  $\delta^{13}\text{C}_{\text{coll}} = -15.7\text{‰}$  and  $\delta^{15}\text{N}_{\text{coll}} = 4.6\text{‰}$ . This suggests that the deer consumed a mixed diet including both  $\text{C}_3$  and  $\text{C}_4$  plants.

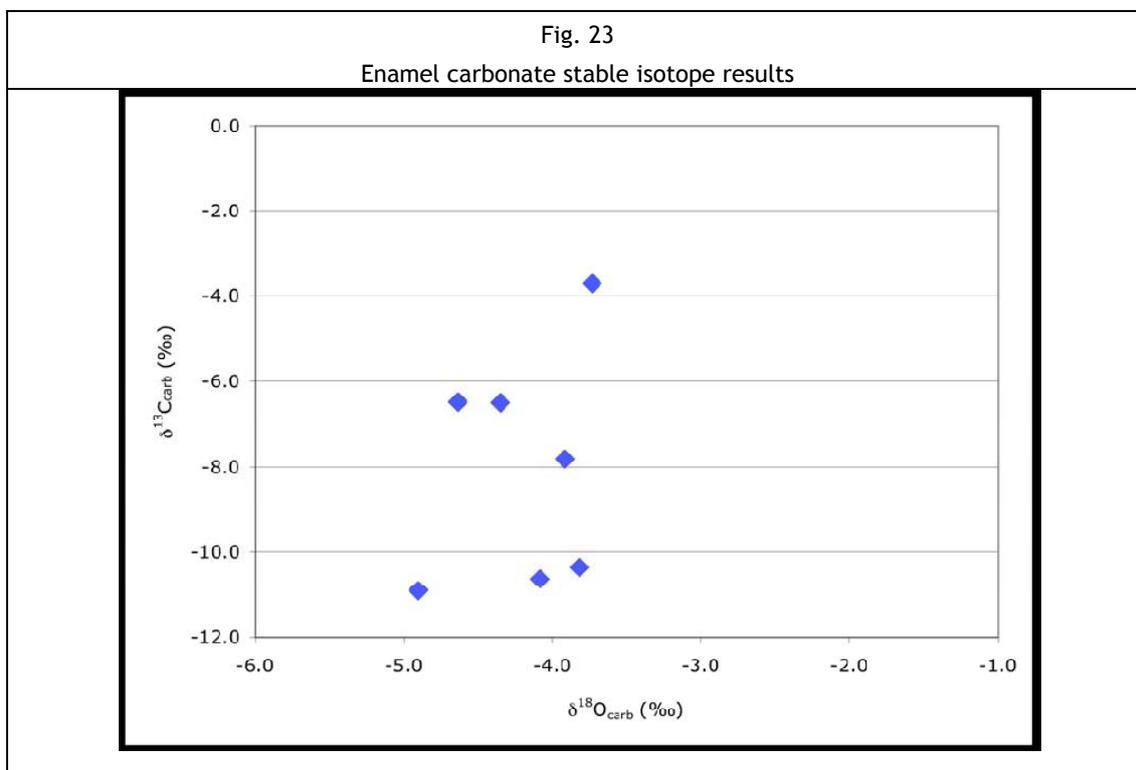

The human collagen carbon isotope results range from  $-14.9\text{‰}$  to  $-11.4\text{‰}$  (range =  $3.5\text{‰}$ ) and have a mean  $\delta^{13}\text{C}_{\text{coll}}$  value of  $-13.9\text{‰}$  (sd =  $1.2\text{‰}$ ) (fig. 22). Both the standard deviation and the range of the human  $\delta^{13}\text{C}_{\text{coll}}$  results are large. Two outliers can be identified: grave 25 which lies more than 1.5 times the inter-quartile range above quartile 3; and grave 33/U which lies more than 3 times the inter-quartile range above quartile 3. When these outliers are excluded the range ( $0.9\text{‰}$ ) and standard deviation ( $0.3\text{‰}$ ) of the carbon isotope results are relatively small.

The human collagen nitrogen results range from  $10.1\text{‰}$  to  $11.8\text{‰}$  (range =  $1.7\text{‰}$ ) and have a mean  $\delta^{15}\text{N}_{\text{coll}}$  value of  $11.0\text{‰}$  (sd =  $0.6\text{‰}$ ). The standard deviation and range of the  $\delta^{15}\text{N}$  results are not as large as those of the  $\delta^{13}\text{C}_{\text{coll}}$  values, and decrease less when the two outliers are excluded (sd =  $0.5\text{‰}$ ; range =  $1.1\text{‰}$ ).

The tooth enamel carbon isotope results range from  $-10.9\text{‰}$  to  $-3.7\text{‰}$  (range =  $7.2\text{‰}$ ) and have a mean value of  $\delta^{13}\text{C}_{\text{carb}} = -8.1\text{‰}$  (sd =  $2.7\text{‰}$ ) (fig. 23). This is a notably large range of variation for a sample of this size.

The tooth enamel oxygen results range from -4.9‰ to -3.7‰ (range = 1.2‰) and have a mean value of  $\delta^{18}\text{O}_{\text{carb}} = -4.2\text{‰}$  (sd = 0.4‰).

#### 4.2.2 OSTEOLOGICAL FINDINGS

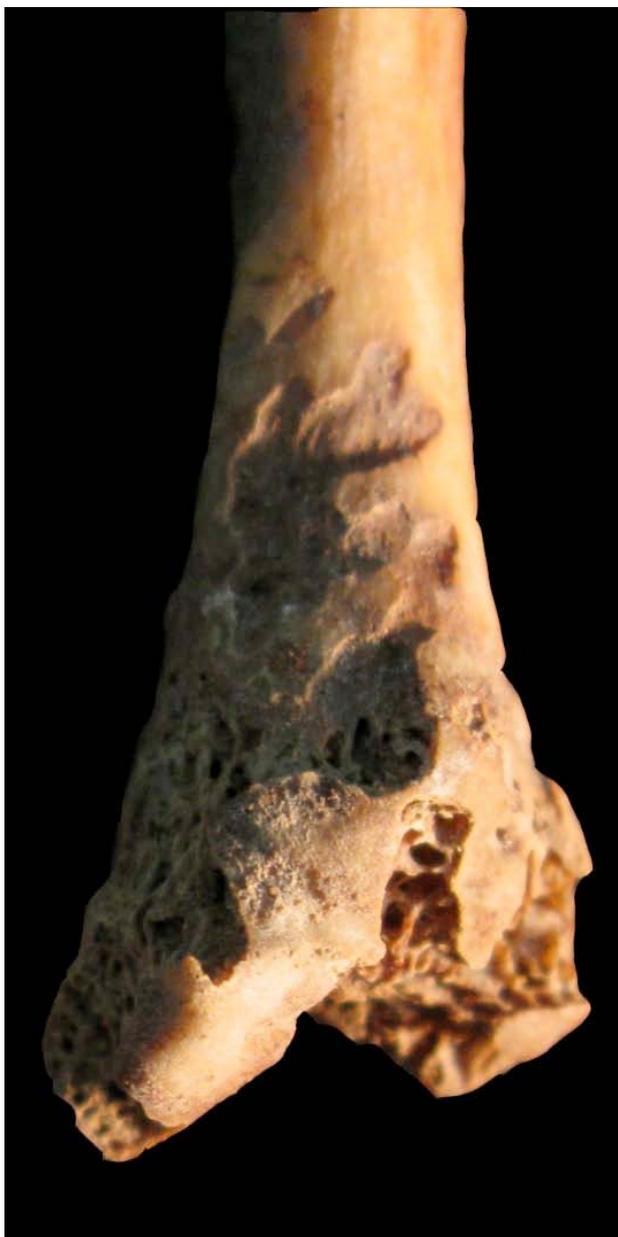

The skeletons were in a variable state of preservation. Most were moderately well preserved, but there was some loss of the bone surfaces in all individuals and most had some erosion of articular ends. Probably as a result of the thorough excavation technique and sieving, the percentage of the skeleton recovered was generally high. Where elements are missing it is probably as a result of preservational factors rather than bones being overlooked.

The burials are primary inhumations of intact individuals and there is no indication of any secondary practices such as disarticulation or deliberate movement of individuals after decay. Damage to bones can generally be attributed to in-ground soil conditions rather than human action. There are no peri-mortem or immediately post-mortem fractures.

One interesting taphonomic feature is the presence of globular-shaped destruction of the outer bone table on the surface of some bones from Structure 1/A (fig. 24). This feature initially looked like a pathological condition affecting the distal ulna and the proximal second metacarpal, but analysis under x10 magnification showed no sign of bony reaction. Similar features were observed on the shaft of the left femur from Structure 33/Lower. Structure 33 was very disturbed by the actions of burrowing land crabs (*Cardisoma carnifex*), and it is possible that the surface damage represents scavenging by these animals.

Fig. 24

Metacarpal from Structure 1 with pseudopathology.

#### 4.2.1.1 Demography

Ages and sexes of the skeletons from Le Morne are set out in table 1 (below). Although the sample size is small and it is therefore difficult to draw conclusions about population structure, there are nevertheless several features worth noting. Of the 11 individuals analysed, three were either late-term foetuses or still births<sup>1</sup>, whilst a further three were under five. No older children were identified. Of the adults, three were females in their child-bearing years. This gives an overall rate of childhood mortality of over 50%. The individual from structure 1 was buried with a foetus between her legs and may have died in childbirth (see discussion section for further comment on this individual).

Table 1 Age and sex determinations of the individuals from the cemetery at Le Morne		
Structure No.	Approx. Age	Sex
1A	17-19 years	F
1C	33-35 weeks gestation	-
6/7	36-40 weeks gestation	-
6/8	37-41 weeks gestation	-
7	25-30 years	F
8	40+	?M
25	3-5 years	-
29	2-4 years	-
30	3-4 years	-
33/Upper	25-30 years	?F
33/Lower	Middle-older adult	?F

Stature could be calculated for four of the five adult individuals. Female and possible female stature ranged from 155 to 161 cm, whilst the possible male had a reconstructed stature of 163cm.

#### 4.2.1.2 Nutritional deficiency and non-specific stress

Conditions that might indicate dietary insufficiency or non-specific stress include scurvy, rickets, *cribra orbitalia*, enamel hypoplasias and Harris lines on long bones. Scurvy and rickets both result from specific vitamin deficiencies, of vitamin C and D respectively. Neither of these conditions was observed in the skeletal remains from Le Morne. *Cribra orbitalia* was also absent. This condition is typically associated with iron deficiency anaemia, either due to dietary insufficiency, illness or parasitic infection. Although numbers are small, the lack of these conditions may indicate a relatively good diet for this population. Despite taking x-rays of all available long bones, Harris lines, which indicate periods of growth interruption, were also absent from the Le Morne skeletons. In the older adults it is possible that Harris lines would have been obscured by skeletal remodelling, but it is to be expected that they would be visible in the younger adult and juvenile remains. Enamel hypoplasias, which like Harris lines show periods of growth interruption, but which are not subject to remodelling, were observed on the teeth of two of the younger individuals: the females from Structure 1 and Structure 7. Although none were observed in the teeth of the older individuals, this does not prove that they were originally absent in all cases as many teeth had been lost and the majority of remaining teeth had at least some degree of calculus formation which could have obscured lesions.

#### 4.2.1.3 Dental disease and caries

Dental caries results from the action of bacteria on the tooth surface which ferment simple carbohydrates from food (Roberts and Manchester 2010: 65). This process produces acids which

eventually cause cavities. Caries rates are thus often used as a proxy for the levels of simple carbohydrates in the diet. At Le Morne, 7.14% of preserved adult teeth had carious lesions, distributed between three individuals (Table 2). The actual number of teeth affected by caries was probably in reality slightly higher as the two older adult individuals had both lost a considerable proportion of their teeth before death (8 in the case of Structure 33/Lower and 21 in the case of Structure 8). It is probable that a good proportion of the tooth crowns had been destroyed by caries. This process can be observed on the molars of the 25-30 year old woman from structure 7, who had three teeth where the crown had been almost entirely destroyed by caries (fig. 25). Interestingly, caries were not limited to the adult section of the population. The child from structure 29 had a carious lesion on the inter-proximal surfaces of both upper central incisors. These teeth had been in wear for a maximum of three years at the time of death, which suggests that the child must have had a significantly cariogenic diet.

In addition to caries, abscess cavities were observed on both of the older individuals. That on the lower individual from structure 33 showed evidence of active infection at the time of death. Calculus was also present on the teeth of all adults and on those of the 3-4 year old child from Structure 30, suggesting that dental hygiene was poor. The lower individual from structure 33, an older adult possible male, also showed evidence of periodontal disease that had caused up to 3.7mm of alveolar resorption (fig. 26).

Structure No.	Age	Teeth present	Teeth lost <i>ante mortem</i>	No. of teeth with caries	No. of abscesses	Calculus	Enamel hypoplasia
1	17-19	32	0	0	0	Y	Y
7	25-30	27	2	6	0	Y	Y
8	40+	10	21	0	1	Y	N
25	3-5	18	-	0	0	0	N
29	2-4	17	-	2	0	0	N
30	3-4	17	-	0	0	Y	N
33/Upper	25-30	27	0	0	0	Y	N
33/Lower	Middle-older adult	16	8	2	2	Y	N

Mandible from Structure 7 showing teeth mostly destroyed by caries

Fig. 26

Periodontal disease in the maxilla from Structure 33/Lower

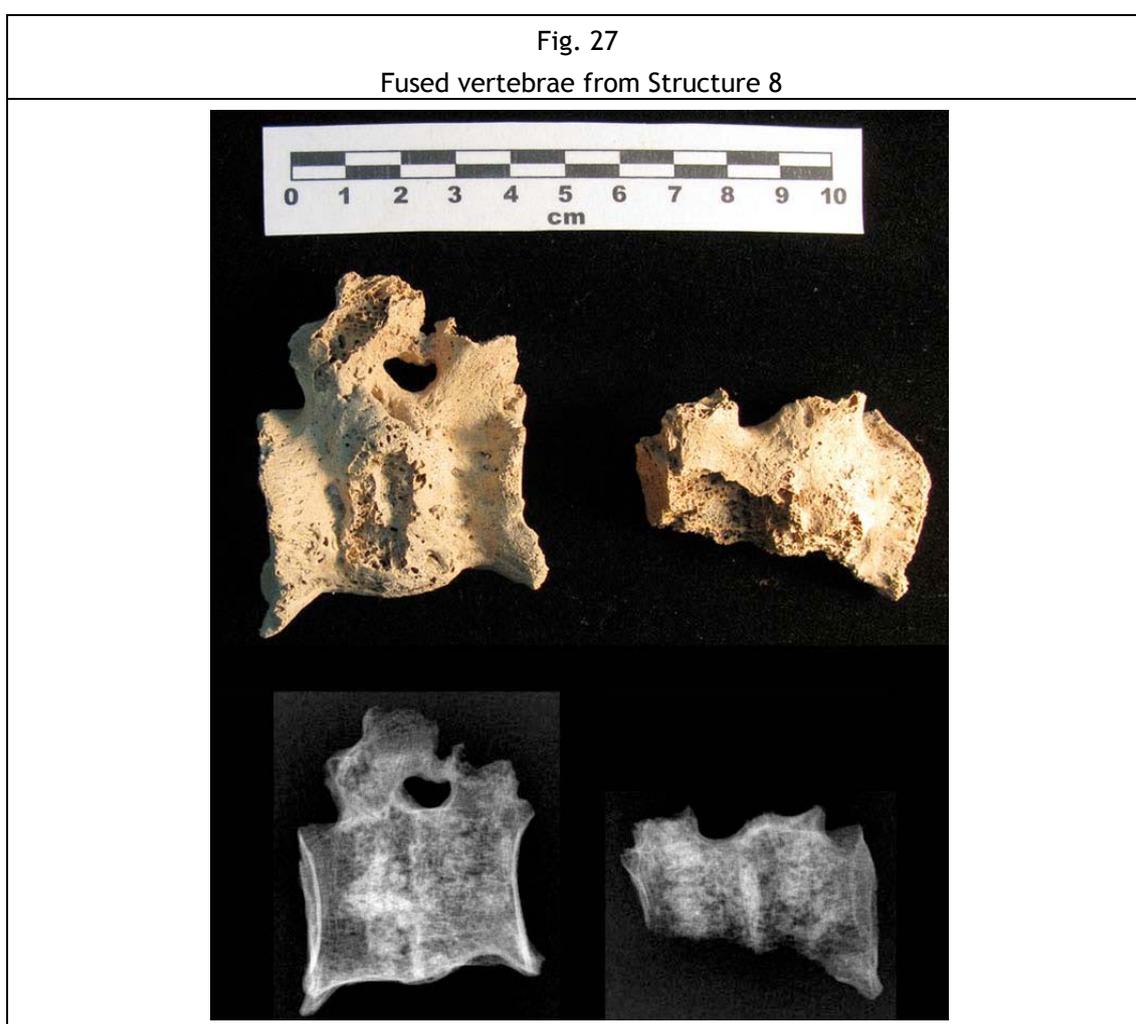

#### 4.2.1.4 Infection and trauma

Only one skeleton from the Le Morne cemetery showed traces of a bone infection: chronic osteomyelitis was identified in the lumbar spine (T12 and L1) of the individual from Structure 8. This had led to complete destruction of the disc-space and fusion of the two vertebrae. Large osteophytes had formed around the area of vertebral fusion. There was a possible cloaca in one pedicle of the first lumbar vertebrae. X-rays show slight sclerosis where the two vertebral end-plates have fused. The disc-space has been entirely destroyed.

Because the vertebrae have fractured longitudinally in the ground, it is possible to directly observe the trabecular structure of the vertebral bodies. This shows a dense trabecular pattern and demonstrates convincingly that there is no remnant of the inter-vertebral disc. The age of this individual, a middle to older adult, fits well with a diagnosis of vertebral osteomyelitis, which predominantly affects people over the age of 50.

Conditions that may be confused with osteomyelitis are tuberculosis, fungal infections, brucellosis and tumours. In this case, the lack of anterior bone destruction, the involvement of the pedicles and the presence of new bone formation suggests that this individual did not suffer from tuberculosis. The lack of dense sclerotic bone around the lesions makes brucellosis unlikely, whilst the specimen lacks the defined lytic lesions characteristic of metastatic cancer. Fungal infections would typically involve a 'space occupying lesion' character, which is lacking in this case. Another possible cause of conjoined vertebrae with no disk space is failure of segmentation during growth; however, in that case the vertebral end-plates fail to develop, whereas in the Structure 8 individual, residual traces of the end-plates can be observed in x-rays (fig. 27). Osteomyelitis thus seems the most plausible diagnosis.#

The right femur from the Structure 33 lower individual was bowed in an antero-posterior direction and thickened at midshaft. The bone surface appeared normal with no evidence of periostitis, sequestrum or involucrum. The shaft was broken post-mortem both proximally and distally, making it impossible to identify whether there was any shortening of the bone. The femoral head and neck were the only other portions to survive. These were of normal morphology. An x-ray showed thickening of the cortical bone and slight narrowing of the medullary cavity in comparison to the left femur. There is no indication of a fracture either of recent or longer standing. The left femur and lower leg bones appear normal.

Although the obvious explanation for femoral bowing is rickets or osteomalacia, several features suggest that this is not a likely explanation in this case. The condition is not bilateral and does not appear to have affected the tibiae. At the same time, the cortical bone is more dense and thicker on x-ray than that of other long bones. The lack of vitamin D in rickets/osteomalacia causes a loss of bone mineral and therefore the cortical bone should be relatively thin and radiolucent if this was the cause of the bowing. In fact, the right femur was noticeably heavier than the left when lifted, despite the fact that the left was more complete. Finally, the most frequent location of a bowing deformity in femora with rickets is in the proximal shaft (Brickley and Mays 2010: 400), whereas in this case the bowing was at midshaft. X-rays showed no evidence of infection.

Given the age of this individual, the most likely cause of the femoral bowing seems to be a greenstick fracture of the shaft suffered in childhood and since completely healed. This is, however, of necessity only a tentative diagnosis since it is one of elimination rather than of positive identification. No traces of any fracture callus remain visible on the outline of the shaft.

#### 4.2.1.5 Activity

When individuals are habitually involved in manual work, it can leave traces on the skeleton in the form of ossified muscle attachment points. The distribution of these can give some idea of which muscle groups were used most heavily. The skeletal material from Le Morne showed little indication of such activity. Only two enthesophytes were observed. One was present at the insertion of the triceps muscle at the olecranon process of the right ulna of the individual from Structure 8 (fig. 28). The second was on the radius of the lower individual from Structure 33, at the origin of the *Flexor digitorum superficialis*. The general lack of muscle development is interesting in light of the fact that the population may represent the remains of freed slaves. One possible reason for this lack of evidence for heavy muscle usage is that there was a gendered division of labour, with females engaged in less manual labour; however, this is not borne out by the existence of two other examples of pathological lesions. The young woman from Structure 7 had spondylolysis of the fifth lumbar vertebra (fig. 29). Spondylolysis is a form of stress fracture in which the neural arch of the vertebra separates from the body through the *pars inter-articularis*. The lesion was well remodelled and healed at the time of death.

Fig. 29

## Spondylolysis in the lumbar spine from Structure 7

Rather than a specific trauma, spondylolysis usually develops in response to repeated strain over long time periods (Merbs 1996). In modern contexts it is frequent in individuals who are involved in manual labour, and seems to be particularly associated with vigorous and repetitive movements involving the lower back (Roberts and Manchester 2010: 106). It is only observed in humans and is thought to relate to the adoption of an upright posture. Although involving a fracture and separation of the body and neural arch of the vertebra, spondylolysis is not usually associated with long-term pain, and Merbs (1996) has even suggested that it might be an adaptive response, giving a greater degree of flexibility.

Os acromiale was identified on the right scapula of the older possible female from Structure 33 (fig. 30). This occurs when there is a failure of fusion of the acromion process of the scapula due to stresses placed on the scapula during development. Very high frequencies of this condition were observed in the skeletal remains from the Mary Rose (Stirland 2005), and it has been suggested that this resulted from training with the medieval long-bow during adolescence. The Le Morne example was restricted to the right shoulder, with the left appearing normal.

Both of these conditions have been associated both with heavy labour and with congenital defects that make the bone more liable to fracture (Larsen 1997: 190-191; Roberts and Manchester 2007: 151-152). The small numbers in the present sample means that any assessment of prevalence would be insecure, but the very fact that both of these conditions occur in such a small sample is of interest.

One skeleton from Le Morne (Structure 1A) also had squatting facets on the distal tibia. These extensions of the joint surface typically develop when the ankle joint is habitually in a flexed position as is the case in squatting. This may indicate that this person commonly adopted a squatting posture when at rest, or alternatively that she regularly carried out activities that required a squatting position.

#### 4.2.1.6 Other conditions

A button osteoma was observed on the skull of the young woman from Structure 7. This benign lesion is observed in about 1% of autopsies (Ortner and Putschar 1981: 368). It has no clinical impact and the individual would probably have been unaware of its existence.

## 5. Discussion and Interpretation of Results

### 5.1 DISCUSSION OF ARCHAEOLOGICAL EVIDENCE

A number of points are worthy of further discussion from the archaeological evidence itself, relative to understanding issues of lifestyle and who may or may have been interred.

Principal amongst these issues is an attempt at defining the religious affiliation of those buried, and by analogy, those individuals who buried their dead. This ties in directly with our desire to understand the origins of those interred. In this instance, one might assume that the interred, of slaves or freed slaves, would have followed a Christian religious life. However, in the case of this cemetery, there is no evidence linking the burial traditions of the buried with Christianity. In fact, the opposite would appear to be the case. The bodies are, in the main, orientated to face (predominantly) West, which - whether by design or serendipity - also faces Le Morne Brabant, and Madagascar. This is the reverse of Christian doctrine. In addition to this, the presence of both the glass bottle (grave 33/U) and coins (grave 7) would be more in keeping with traditional African burial practices as opposed to Christian. Finally, there is no evidence of consecration of this area. Although difficult to determine, the fact that at least three very young juveniles, effectively neonatal or newborn, are buried within the cemetery - individuals that could not possibly have been baptised - indicates that the religious practice adhered to was not a Christian one.

Looking at the graves, their construction, the evidence for the types of coffin used and the mode of delineation of the grave, again, a number of points are worth further exploration.

It would appear that whether on an individual, or community level, those burying the dead were not without means. The coffins themselves, although certainly not exemplary are far from being rudimentary examples. While it must be remembered that a death and subsequent burial are social occasions that draw on community strength and resources, and that craftsmanship (for constructing coffins for example) could well be provided for a minimal cost basis, nonetheless, we should not ignore the fact the evidence points to products of reasonably good quality. Furthermore, the almost ubiquitous recovery of mother-of-pearl buttons, from infant and adult burials alike, suggests that bodies were not simply interred in a shroud, but in cloths of some finery.

At least for some of these graves there is clear indication that the specific (if not always the precise) location of the individual grave was noteworthy and part of social memory. This is indicated by the fact that the grave outlines were reconstructed, in one case on four separate occasions; invariably the reconstruction phase resulted in the use of larger, often cut, basalt blocks. The earlier levels more often than not use small, uncut basalt stones, serving as a relatively simple grave outline. These reconstructions are very important as they speak of a period, perhaps decades long, where the cemetery's purpose is sovereign, undergoing little change, and known as the final resting place of ancestral populations by those using it. This clearly points to an enduring memory within the context of landscape and land use.

While time and funding prohibited, at this stage, radiocarbon dating to determine the period of use and the temporal relationship between the interred, the coins found with grave 7 dated the grave to the first third of the 19th century. The fact that some of the graves show evidence of being buried at a time when the local substrate was considerably lower (as evidenced by re-construction of the surface outline) would seem to indicate that the site was in use for some considerable period of time.

### 5.2 DISCUSSION OF ISOTOPIC ANALYSIS

The human bone collagen isotope results suggest that the protein component of the analysed individuals' diets during the last years of life were based upon a mixture of C<sub>3</sub> (i.e. wheat) and C<sub>4</sub> (i.e. maize) resources. The two outlying individuals (grave 25, a 3 to 4 year old child; and grave 33/U, a 25 to 30 years old probable female) consumed a diet with a higher proportion of C<sub>4</sub>-derived

protein than the other nine analysed individuals. With the exception of these outliers, the individuals within the population consumed similar diets in terms of the amount, trophic level (i.e. plant, herbivorous animal or omnivorous animal) and the C<sub>3</sub>/C<sub>4</sub> status of their protein intake. As the deer isotope results indicate that it consumed a diet containing both C<sub>3</sub> and C<sub>4</sub> plants, it is not possible to determine whether the human collagen isotopes reflect the consumption of C<sub>4</sub> plants or the consumption of animals that consumed C<sub>4</sub> plants. However, the large difference in  $\delta^{15}\text{N}$  values between the deer and the mean human value indicates that this deer is not representative of the protein consumed by the analysed humans. A larger faunal sample is necessary for a more accurate baseline for comparison, particularly as the deer deposition may not be contemporary with the human burials.

The tooth enamel carbonate carbon isotope results show a wide range of variation, indicating that during childhood these individuals ate significantly different diets. Tooth enamel carbonate primarily reflects the carbohydrate component of the diet, indicating that, regardless of the C<sub>3</sub> or C<sub>4</sub> status of any animal protein consumed, during childhood some of the individuals did consume C<sub>4</sub> plants. The amount of C<sub>4</sub> plants consumed during childhood varies from little or none (grave 8, grave 30 and grave 33/U) to a large proportion of the carbohydrate portion of the diet (grave 33/L).

Two edible C<sub>4</sub> plants are known, historically, to have been available to the people of Mauritius - sugar cane and maize (Allen 1999). There is no historical evidence for the importation of the other African C<sub>4</sub> staple plants, sorghum, finger millet and pearl millet, to Mauritius. Given the low protein content of sugar cane, and that it was produced for export, it is likely that the C<sub>4</sub> signal seen in the bone collagen isotope values reflects either the consumption of maize or the indirect consumption of C<sub>4</sub> resources via animal protein. The tooth enamel carbon isotope results show a human diet that included varying amounts of maize and/or sugar cane at least during childhood. Given the abundant coastal / sea resources, as well as produce such as sweet potato, it is likely that these formed part of the diet also.

The difference in range of variation of bone collagen results (excluding the two outliers) and tooth enamel carbon isotope results is striking. While the carbohydrate component of childhood diet varied substantially, during adulthood (Hedges et al. 2007) the protein components of their diets were similar. It is possible that this pattern reflects the diets of a group of people who during childhood lived in multiple locations but later in life came to live, and eat, together. Further evidence is needed to support this hypothesis, particularly more information regarding the temporal spread of the burials.

The bone collagen results show that two outliers, grave 25 and grave 33/U, were consuming a diet that during life would have been noticeably different from that of the other analysed individuals. There are several potential explanations for this. Firstly, these individuals may have lived with the other buried individuals but eaten a distinct diet, perhaps in order to maintain a separate social status or identity. Secondly, the outlying individuals may have been newcomers to the community, such that their isotope results reflect a mixed signal of two distinct diets. Thirdly, the outlying burials may not be contemporary with the other analysed burials and reflect a temporal change in subsistence practice. Radiocarbon dating results would clarify this issue.

The oxygen isotope results show a range of variation consistent with a population that drank water from the same source during childhood. However, it is possible that some or all of these individuals migrated to Mauritius from a place where the drinking water was not isotopically distinguishable from that of Mauritius. i.e. Madagascar, which has a similar isotopic composition to that of Mauritius ( $\delta^{18}\text{O}_{\text{ppt}}$  estimations obtained from [www.waterisotopes.org](http://www.waterisotopes.org), March 2011). These individuals may well have derived from Madagascar as the isotopic signal for Mauritius falls within the range that one finds from Madagascar. However, precisely because of this, there is no isotopic reason to assume that any of these individuals were long-distance migrants.

### 5.3 DISCUSSION OF OSTEOLOGICAL FINDS

The excavation and analysis of the human remains has prompted three key questions that will be discussed in more detail here. Firstly, and perhaps most significantly in light of the World Heritage status of Le Morne Brabant is the question of whether the skeletons are of slaves or ex-slaves, or whether they represent other portions of the Mauritian population. Secondly, there is the question of the neonatal twins from Structure 6: is infanticide an option or were they natural deaths. Thirdly, what is the significance of the double burial in Structure 1? Is it simply a double burial or does it represent either death in childbirth or a 'coffin birth' where the baby is delivered after death due to the decomposition process?

#### *1. Could the skeletons represent the remains of slaves or ex-slaves?*

Dating evidence from coins and other material culture suggests that the cemetery at Le Morne was in use up to the mid 1830s, the period when slavery came to an end in the country. The area has since become famous for its association with Maroons - groups of escaped slaves who took advantage of Le Morne Mountain's inaccessibility. The question of whether the skeletons are of slaves is therefore of extreme cultural significance. To address this, it is necessary to examine evidence of lifestyle and to ask whether this evidence is compatible with a slave origin.

Osteological studies of slavery have so far been largely confined to slaves of considerably earlier periods such as the Roman Empire and to the Caribbean and North America. Of these, it is likely that the plantation-based slavery of the Caribbean and North America will have more relevance to the present case than examples from the ancient world. Studies of New World slavery have identified a number of characteristics that are commonly associated with slave populations, but it must be acknowledged that there is considerable variability, meaning that a 'shopping list' approach to the osteology of slavery is to be avoided. Given this caveat, some features that might be relevant in the present case are evidence of nutritional deficiency, the development of skeletal features related to heavy manual labour and evidence of high levels of non-specific infections and skeletal trauma. The last three of these are, of course, dependent on the form which slavery takes. Household slaves would have been involved in different kinds of activities to agricultural slaves and this would have been reflected in the kinds of risks to which they were exposed and hence the kinds of conditions that are visible in the skeleton. A further characteristic of slavery in Mauritius was the over-representation of males. Kuczynsky (1949, cited in Benedict 1976) has calculated that male slaves outnumbered women by two to one until 1826, when the proportion of females began to increase (Benedict 1976: 140). The 1826 registration data records five female slaves and 27 males belonging to the Le Morne Brabant estate (Teelock *et al* n.d.). Interestingly, these were all adults. The demographic characteristics of the Le Morne sample may therefore also cast some light on this question.

Nutritional deficiency is commonly associated with slave populations because slaves eat a relatively monotonous diet of low-value foods. Whilst it is necessary for slaves to have sufficient food to be able to work, owners are frequently reluctant to invest more than necessary in the provision of a varied diet. This is reflected in both evidence of specific dietary deficiencies and in evidence of childhood stress such as enamel hypoplasias.

Rates of enamel hypoplasia vary considerably between published skeletal slave samples from the US and Caribbean. At a slave cemetery in South Carolina 92% of males and 70% of females had enamel hypoplasias (Rathbun 1987) and in the Newton cemetery in Barbados the figure was 98% (Handler and Corruccini 1983), testifying to very severe stresses placed on the slaves through factors such as calorie or nutrient deficiency or disease. These figures are clearly very high compared with the Le Morne figure of 40% of adults. In contrast, levels were much lower in a series of pooled skeletal samples from Virginia and the Carolinas, at 56% in the eighteenth century and only 29% in the nineteenth century component (Kelley and Angel 1987).

The two most commonly observed specific nutritional deficiencies in human skeletal remains are rickets and scurvy. Both are absent from the Le Morne skeletons. Although one femur (from Structure 8) was bowed, the lack of bilateral involvement and the form of the bowing are not consistent with rickets and must represent some other process. The former is not altogether

surprising. Although rickets is typically associated with low-status populations, it is generally found amongst industrial populations where people did not have adequate exposure to sunlight. Given that Mauritian slaves are likely to have spent considerable periods of time working outdoors, evidence for rickets would have been surprising. The similar lack of scurvy suggests that the diet must have included sufficient vitamin C. There is some suggestion that slave diet in Mauritius was based around maize consumption (Grant 1801, cited in Benedict 1976: 139) and this is supported by the results of isotopic study of the Le Morne skeletons. Maize contains a relatively high proportion of vitamin C when harvested as a mature plant (around 1/3 the amount in orange juice, measured gram for gram (Esselen *et al* 1937: 507)) and this may explain the lack of evidence for scurvy in this population.

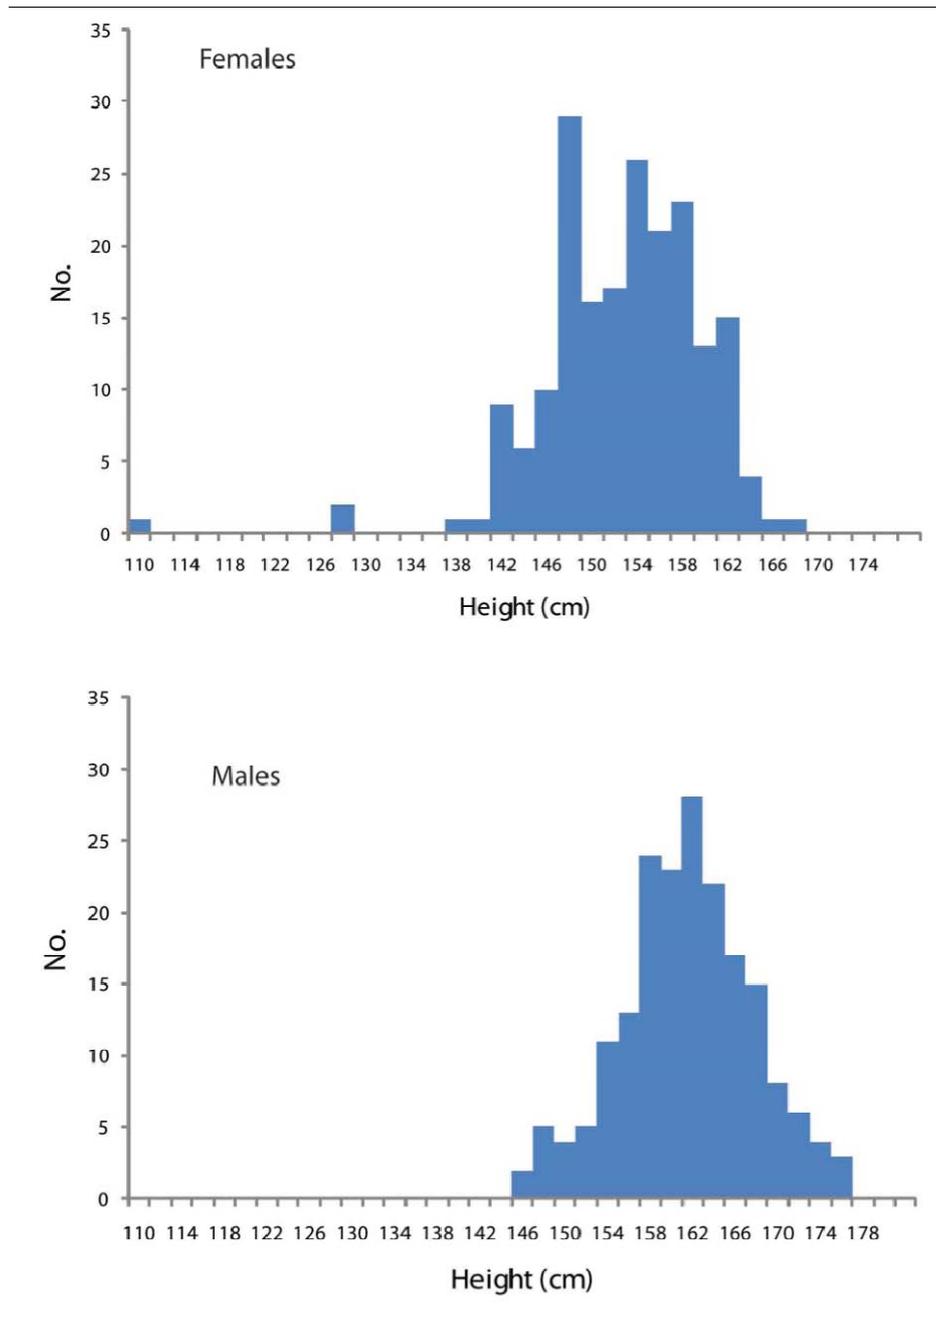

A further indication of poor health and nutrition is stature and it is noticeable that the reconstructed statures of the Le Morne individuals were low. Female heights were around 155-160 cm, whilst the reconstructed height of the possible male was 163cm. Although these figures would be seen as markedly low were they to appear in a modern population of European ancestry, they cannot necessarily be seen as abnormally low for those populations that have contributed to the Mauritian population. Modern figures from Malawi, which contributed to the slave population of Mauritius, give mean heights of 155 for females and 166 for males (Msamati and Igbibi 2000). These populations are themselves subject to problems of inadequate diet and poor healthcare and we must therefore acknowledge that such conditions are not limited to slave populations.

It has been possible to compare the reconstructed heights of the Le Morne skeletons to heights of slaves in the southern portion of the island recorded in the registration of 1826 (fig. 31; data kindly provided by Vijaya Teelock of the Truth and Justice Commission (Teelock *et al* n.d.)). From this it can be seen that the Le Morne skeletons fall right into the middle of the height distribution of the slave population.

Fig. 31

Height distribution of slaves from the area around Le Morne in 1826

(data from Teelock *et al*, n.d.).

In summary, the Le Morne skeletal population appears to have been reasonably well nourished and to fit with the expected statures of the populations that have contributed to the Mauritian population, but shows evidence of over-use of certain parts of the skeleton. Whilst the lack of evidence of stress and nutritional inadequacy differentiates the Le Morne skeletons from slave samples from the New World, this does not mean that the Le Morne cemetery does not contain slaves. Rather it seems to suggest that the conditions of slavery in the south of Mauritius would have been different to those on the large plantations of the New World. Plantation slavery was certainly common on Mauritius, but the area of Le Morne Brabant is not suitable for such cultivation methods due to its aridity. Instead, subsistence farming with some livestock appears to have been the main activity in this area, and the diet was probably supplemented by hunting and fishing (Teelock, pers. comm.). Such an interpretation is supported by the slave registration of 1826 (Teelock *et al* n.d.), in which occupations include fisherman, hunter and guardian of cattle as well as the more familiar categories of labourers and servants (although these latter categories dominate the sample).

### *2. What is the significance of the twin burial?*

The two babies buried in Structure 6 are of great interest. The arrangement of the bodies so close to one another and the lack of evidence of disturbance of the remains strongly implies that the two burials were contemporaneous. Calculating age from the length of preserved long bones gives figures of 36-40 weeks and 37-41 weeks gestation respectively, indicating that these infants died at around the point of birth. As they are almost exactly the same size and were buried at the same time in the same grave, it seems likely that these two babies were in fact twins.

In many African societies, including Madagascar, twins were frequently subject to infanticide and therefore this must be regarded as a possibility for these two individuals. Unfortunately, this is very difficult to prove from dry bones. Neonatal bones are relatively undeveloped so that methods that can be used to identify cause-of-death in adults may not be applicable. For example, strangulation may be identified in adults by fracture of the hyoid bone, but in neonates the hyoid has barely commenced ossification (Lewis 2007: 95). Even in modern forensic cases, it is usually possible to prove only the lesser offence of 'concealment of birth' when neonatal remains are skeletonised (*ibid.*).

Death around the point of birth can, of course, take place for a variety of reasons. Babies may be still-born or get into difficulties during the birth process. This is especially true where no doctors are present to assist the mother, as is likely to have been the case at Le Morne. It is likely that the surroundings in which women gave birth in the rural and relatively remote area of Le Morne were not particularly clean and so babies may also have died from infections within days of birth. Infanticide is thus only one possible explanation.

In the case of the 'twins' from Le Morne, the bones themselves show no traces of violent treatment. All fractures are consistent with in-ground, dry-bone breakage. As death seems to have occurred around the point of birth, there is also no evidence for healing injuries, as might be expected if they had been ill treated but survived for several weeks after birth. The question of infanticide must therefore remain unanswered, suggested only by the co-incidence of two identically aged neonates buried alongside one another.

### *3. How can the double burial in Structure 1 be understood?*

Structure 1 contains the bodies of a young woman and a late term foetus/neonate. Whilst the woman is placed in the normal supine position with her head to the east, the foetus is placed between her legs, with the head facing up and away from the woman (fig. 32).

It is the only body in the cemetery not to have its head to the east. Although the baby was found outside the body, calculations of its age from long bone lengths suggest that it was approximately one month premature, giving rise to a number of possibilities. The possible explanations for this unusual burial positioning are as follows:

Fig. 32 Structure 1 - Burial

- i. The two individuals were unrelated but died at the same time and were buried together
- ii. Both mother and baby died during childbirth and were buried together
- iii. The mother died in the latter stages of pregnancy and the foetus was found between the legs due to a 'coffin birth'

Sadly, due to the preservational characteristics of foetal bone, it has not been possible to establish whether the mother and foetus were directly related to one another through the use of DNA evidence. Distinction between the first two possible scenarios is therefore only circumstantial.

Double burials occur in three of the eight excavated structures at Le Morne. Structure 33 contained the remains of two adult females, whilst Structure 6 contained two neonatal babies. Structure 1 is the only grave to contain an adult and a child buried together, but given the small sample size, this does not prove that this was a unique treatment in the cemetery. The young female buried in Structure 1, at between 17 and 19 years old, is certainly in an age group that we might expect to be having children and it is therefore plausible that she was the mother of the baby.

The small size of the foetal remains found in the coffin and their positioning between the legs of the young woman means that it is necessary to examine the possibility that the mother died before giving birth and that the baby was only found outside the body due to the processes of decomposition. So-called 'coffin births' have occasionally been reported in the forensic literature since the early 20<sup>th</sup> century and written references to such occurrences go back at least as far as

the 18<sup>th</sup> century (Jungmichel and Musick 1940). They occur when the gases produced during decomposition force the body of the baby through the birth canal, simulating a process of birth that occurs after death. Documented cases of coffin birth from the German language literature show that the position of the baby is very variable in such cases. Some report only a partial 'birth' in which the head of the baby appears between the legs (Schultz *et al* 2005), whereas in others the baby appears to have been fully delivered (Panning 1941). Whilst the foetus from Structure 1 has the head quite far down the legs of the potential mother (between the proximal tibiae), it is not so different to a case from 1940s Poland where the head of the baby was at the level of the mother's knees (Panning 1941: 259). It is also possible that the foetus may have moved within the coffin if the coffin was partially waterlogged or contained decomposition fluids. Evidence of a waterline on the skull of the woman suggests that this may have been the case, but it is impossible to ascertain how soon after burial such water-logging may have begun. The woman's body shows evidence of having decayed within a void - the femurs have fallen outwards and the pelvis has flattened - but there is no evidence that her bones have been moved by water, so water-logging may have occurred after the coffin had decayed and the space been filled in with sand. This would prevent movement of the bones.

One reason for suggesting coffin birth as a possibility is the small size of the foetus/neonate, which suggests that it was pre-term at death and may not have been delivered; however, it is also worth considering what the implications of size are in this population. The adult skeletons excavated from Le Morne are all small, and this fits with the height distribution of slaves from the 1826 registration (Teelock *et al* n.d.; fig. 31). In a population with small adult height, low birth-weight babies may also have been common and this means that ages calculated from equations developed for babies from European contexts may be too low. If this is the case, the double burial in Structure 1 may merely represent the remains of a mother who died in childbirth and her baby.

Analysis of the bones themselves and their distribution within the grave cannot provide conclusive proof one way or another about the burials in Structure 1, but it is interesting to note that if it was a genuine double burial then it shows some interesting foetus. If the baby was placed between the legs of the mother then it would in some way appear to mimic the process of birth.

## 6. CONCLUSION AND FUTURE WORK

This excavation and subsequent analyses have proven to be highly informative in terms of unravelling some of the details of the Le Morne Cemetery during its period of use. From the archaeology itself, particularly in terms of grave 'construction' the most interesting facet is the re-laying of grave outlines - which clearly took place on a number of occasions over a period of many years, perhaps even decades. This is truly remarkable and speaks of the nature of the site, its prominence within the minds and cognition of those who used the site, and their reverence for both their dead and their burial site. From the extensive and detailed osteological evidence it is apparent that hard work and heavy toil were the norm; however, we must use this evidence cautiously given the nature of 'work' at the time in question. From both the isotopic and osteological evidence it is also apparent that the dietary needs of the buried individuals were met, with no clear indications of dietary deficiency.

In addition, and again turning to the recovered finds, it would appear that the dead were buried in relatively well constructed coffins, clothed, and with clearly delineated grave outlined constructed in their memory. These lines of evidence would seem to indicate that the interred were freed 'peoples', but whether initially slaves or not is hard to decipher. Thanks to the isotopic analysis we can be clear that they were all from the *same* region geographically; however, at this stage it is unclear whether the interred arrived, within their lifetime, from further afield or were born and raised in Mauritius.

What is clear, and what we cannot ignore, is the seemingly unequivocal importance of Le Morne Brabant itself. While we are still left with pressing questions of *who* and *when*, we can learn a great deal about they *why*. It would appear that, as in the modern day, the site and sheer

impressive magnitude of Le Morne Brabant has been a focal point for specific practices and indeed, the creation of a remarkable burial site.

In the absence of aDNA results, it is unfortunately the case that a definite answer to the question of racial affinity and origins is not possible at this time. This points to potential avenues for further study. At present, where osteological and scientific analysis are concerned we are most hampered by a lack of samples. In the absence of DNA for example, excavations on another portion of the site may uncover remains that have not been subjected to water-logging, and thus more likely to yield DNA. Also, with a larger sample it may be possible to assign racial affinity based on metrical and morphological criteria. This kind of evidence is at its most persuasive when large numbers of individuals are present and results can be subject to rigorous statistical analysis. The current sample size of five adults and six children can only hint at the community life of these people and it is greatly to be hoped that this sample can be increased in the future.

Report has been kept relatively brief, presenting limited archaeological details. This has been done with the express desire to emphasise the *results*. This is a remarkable site, primarily for the local and wider Mauritian population. The site and the recovered remains are the first such finds for the Republic of Mauritius and would seemingly provide some of the most tangible links to a collective ancestral population. The purpose of archaeology is to connect modern with ancient: the site of the Le Morne Cemetery allows us, for the first time ever, to *visualise* the use, reuse, and reverence that this cemetery held for an enigmatic ancestral Mauritian community. While so much of Mauritius' past is intertwined within paradigms of slavery and indenture, hardship and toil, at least this aspect appears free of that; we should do all we can to learn more about this facet of past lives.

<sup>1</sup> Ages of fetuses and neonates were calculated from the length of long bones according to techniques developed on modern Western populations. Given the small sizes of Le Morne adults, it is possible that babies in this population would have been smaller than their Western counterparts, with the corollary that the calculations are systematically under-estimating age.

## Glossary

**Affirmative Action:** Policies of governments and other institutions, private and public, intended to promote employment, contracting, educational, and other opportunities for members of historically disadvantaged groups. Because they may favour some groups over others, affirmative action policies must be narrowly tailored to meet the institution's legitimate goals, such as remedying the effects of past discrimination or promoting full diversity in a school setting.

**Caveat emptor:** Latin for "Let the buyer beware". The basic premise is that you are buying a product or property at your own risk and should personally examine and test for obvious defects and imperfections. Caveat emptor still applies even if the purchase is "as is" or when a defect is obvious upon reasonable inspection before purchase. Since implied warranties and consumer protections regarding product liability have come upon the legal landscape, the seller is held to a higher standard of disclosure than "buyer beware" and has responsibility for defects which a buyer cannot note by casual inspection.

**Certiorari:** Latin for "fully informed". In Cases in which there is no appeal as a matter of right, certiorari is a writ (order by the appeals court so send all the documents in a case so that the appeals court can review the decision. Certiorari is most commonly used by the United States Supreme Court, which grants certiorari when at least four justices believe that the case involves a sufficiently significant federal issue.

**Circuit Court:** (1) The name used for the principal trial court in many states.

(2) In the federal system, the term may refer to courts within the 13 circuits. Eleven of these circuits cover different geographic areas of the country- for example; the United States Court of Appeal for the Ninth Circuit covers Alaska, Arizona, California, Hawaii, Idaho, Montana, Nevada, Oregon, and Washington. The remaining circuits are the districts of Columbia, and the Federal Circuit, (which hears patent customs, and other specialized cases based on subject matter).

The term derives from an age before mechanized transit, when judges and lawyers rode the circuit of their territory to hold court in various places.

**Collateral Descendants:** A relative descended from a brother or sister of an ancestor- for example, a cousin, niece, nephew, aunt, or uncle.

**Consortium:** A group of separate individuals or companies that come together to undertake an enterprise or transaction that is beyond the means of any one member. For example, a group of local businesses might form a consortium to fund and construct a new office complex.

**Constitution:** The fundamental, underlying document which established the government of a nation or state. The United States Constitution, originally adopted in convention on September 17, 1787, ratified by the states in 1788, and thereafter amended 27 times, is the prime example of such a document; however, states also have constitutions.

**Constitutional Rights:** Rights given or reserved to the people of the U.S Constitution, and in particular, the Bill Of Rights.

**Standing:** The right to file a lawsuit or make a particular legal claim. Only a person or entity that has suffered actual injury has standing to seek redress in court. For example, an advocacy group may not file a lawsuit challenging the constitutionality of a statute on its own; there must be a plaintiff who has actually been harmed by the statute.

***In Forma Pauperis:*** Latin for "in the form of a pauper." A party to a lawsuit who cannot afford the court costs and fees can ask that they can be waived (forgiven) in order to proceed "*In Forma Pauperis.*"

**Statutory Damages:** Predetermined payments established by law to compensate for certain injuries. Statutory damages are sometimes made available because it is too difficult to calculate actual damages.

**Statute of Limitations:** The legally prescribed time limit in which a lawsuit must be filed. Statutes of limitation differ depending on the type of legal claim and on state law. For example, many states require that a personal injury lawsuit be filed within one year from the date of injury- or in some instances, from the date when it should reasonable have been discovered- but some allow two years. Similarly, claims based on a written contract must be filed in court within four years from the date the contract was broken in some states and five years in others. Statute of limitations rules apply to cases filed in all courts, including federal court.

**Sovereign Immunity:** A legal principal making governmental bodies and employees immune from being sued in their own courts without governmental consent. The legislature can, and often does, carve out areas where this immunity will be waived/cancelled (waiver of sovereign immunity).

## PREFACE

The topic of reparations for slavery can quickly draw a negative response especially when financial compensation gets into the mix. A few years ago while listening to Mauritian radio, I heard a reparations activist declare that those who are "*Fortunate should not get any compensation*"; this type of statement although entertaining to those who, at the time, were aware of the insider joke, reduces the question of reparations to a class issue that exists in the Creole community and that in the end, it was just about money. I have to say that I have not always been in favor of financial compensation for the simple reason that I think that the funds to be disbursed would simply be measly. At the time, I drew from the case of the displaced Chagossians who after decades of legal battles were awarded a small financial compensation and a small plot of land in underdeveloped and economically impoverished localities with little infrastructure such as Tombeau Bay.

The Chagossians went back to the drawing board and sued again. They received their checks and the choice to opt for British citizenship however they did not receive a single word of apology for their ordeal. An apology is important after all, it heals the ego and helps the victims move forward. It was in my opinion an incomplete and half-hearted apology.

One of the best examples of Reparations to date is the case of Japanese-American victims of United States internment camps of World War II, which recognized the internees' personhood, their social and racial visibility, civil rights and citizenship through a formal written apology from Congress, financial compensation and various reparations measures such as scholarships, educational funds.

My contribution and analysis of the legal literature on the litigations for reparations and slavery comes from the perspective of a historian. I approach the subject of reparations from a multidisciplinary perspective but do not regard myself as an expert in any discipline other than history. This is my contribution to the discourse.

"...America has given the Negro people a bad check, a check which has come back marked "insufficient funds."

Martin Luther King Jr., "I have a Dream"

## INTRODUCTION

### SLAVERY AND THE LAW

The study of Reparations for Slavery has much to benefit from a multi-disciplinary approach, which ought to (but not limited to) include philosophy, psychology, history, sociology and law. It makes sense to compare the study of reparations in Mauritius to reparations movement in the United States for the Mauritian case has no legal precedent moreover; the multi-cultural nature of the population in the U.S is also very similar to Mauritius. However the reparations movement in the United States is privately initiated and brought about by individuals or groups of people who filed legal suits for compensatory reparations for the harms of slavery. Conversely the Mauritian study for the reparation of the harms caused by slavery is a governmental endeavour enacted by the parliament. It is part of a Truth and Justice Commission and among its many objectives is the study of the effects of slavery on the descendants of slaves in a historical, sociological and economic context. The Mauritian reparations study is in fact very similar to the United States Congressman Conyers H.R. 40 bill, which is still infamously lingering in congressional sub-committee since its introduction in 1989. Congressman Conyers perennially re-introduces the bill and each time it garners yawns of boredom from the floor followed by a predictable defeat.

The H.R.40 is in fact far from being a radical bill; it does not ask for an apology from the institutions that profited from slavery or an immediate, outright financial compensation for descendants of slaves but for the establishment of a commission to study slavery and its subsequent racial and economic discrimination against freed slaves, and the impact of these forces on today's African Americans. Among the aims of H.R 40 bill is to make recommendations to Congress for appropriate remedies to redress the harm inflicted on living African Americans. The Mauritian reparations study is a far cry from the H.R 40 bill and would probably represent a dream come true for the reparations activists in the United States.

Slavery pervaded all aspects of the slaves' lives and the slave-owners', it involved kidnapping, forced migration, assault and battery, rape, denial of religious freedom, prohibition to converse in one's native tongue, destruction of the family unit, deprivation of 4 status and the list goes on. These forms of abuse did not only affect the body but also the psyche; in jurisprudence these are described collectively as "*Torts*". Any person nowadays who undergoes any of these forms of torture and who files suit would surely collect compensatory damages and the offender (if convicted) would most certainly be imprisoned. However these abuses happened more than a century ago, in Mauritius, slavery was abolished in 1835 and any claim for reparations whether in terms of compensatory damages or punitive damages would entail filing derivative claims by someone other than the victim. In this case, descendants of slaves would file the law suit on behalf of their ancestors (who are long deceased) against victimizers who are deceased. The problem is that in American jurisprudence, Tort doctrine is not receptive to derivative claims because only the victim can file a suit for damages and the damages should be noticeable in some ways or easily assessed, verified by psychiatric and or medical professionals. Moreover the claimant has a set period to file the lawsuit for damages called a statute of limitation.

So far the African American reparations suits were defeated on the procedural major roadblocks such as statute of limitation and legal standing. Prof Keith Hylton proposes that demanding an accounting of the ways the beneficiaries profited from slavery and the extent/amount of their profits be made public and this according to Hylton has the potential to clarify the social costs of slavery and the oppressive regime that appeared in it awake which is Jim Crow segregation laws in the United States. The institution of slavery existed in a moral vacuum by today's standards and legally speaking, the institution although sanctioned by law functioned on the margins of legality.

According to Keith Hylton Social Torts are "*most damaging to slave descendants because, like a constantly mutating virus, they have the capacity to injure successive generations*"<sup>1</sup>. Ute Schönplflug makes the same point that individuals transmit information to one another in the form of cultural transmission from one generation to the next. Schönplflug draws upon the writings of the biologist Cavalli-Sforza to illustrate that cultural transmission functions are very similar to genetic transmission from parents to offspring. Schönplflug points out that the parents, social (and racial)

groups transmit their sets of cultural values such as skills, accumulated knowledge, social values, behaviours, dialect, clothing fashion, consumer behaviour, stories, rhymes, use of legal or illegal drugs, self-esteem, religious beliefs, sex-role conceptions, patterns of socialization, morals, political beliefs and the list is not exhaustive.

Hylton goes further in his development of social torts, he contends that the cultural values transmitted from slave to slave from one generation to another, have the power to change and adapt to the social, political and cultural climate specific to each generation. James R. Hackney argues that “slavery has severely decimated African Americans race capital”; the concept that race is cultural capital is borrowed from Bourdieu’s theory which proposes that a group is an amalgam of cultural, social and economic capital, and wherever slavery existed, it had a heavy impact on the people, laws, norms and values in that particular society.

## SLAVERY AND ITS LEGACY ON THE BLACK SELF

The psychologist Adelbert Jenkins calls for a shift in our perspective from an external to an introspective look into how descendants of slaves conceptualize and shape their reality in a world where economic opportunities and social status are still ascribed on race. Jenkins does not reject that slavery brought unspeakable harm upon slaves and their African American descendants however contends that they are mere puppets or victims of their environments. He posits that Blacks have a say in their destinies as opposed to the Mechanist perspective which is a philosophical approach that considers people to be products of their environments. Jenkins explains that people are complex and sometimes the concepts used to account for their behaviours may often oversimplify rather than take into account the complexities that make the human person.

The definition of the term *self* refers to the aspects of experience that the individual considers to be “I” or “Me” and through experience with the world, what is self comes to be distinguished by the person from everything that is experienced as “not me”<sup>2</sup>. According to Jenkins, the idea of self is a unity that is patterned of many personal tendencies and one very important aspect of self is the concept of self-esteem. It refers to the judgments or evaluations that we make of our worth and consists of affective evaluations of the self either in terms of positive, negative or ambivalent tone. According to Jenkins the self is many sided and there are multiple bases for establishing self-esteem which depend on people’s personal history, the opportunity structure such as access to education, ethnic and social membership. According to Jenkins, the self-concept or view that we developed of ourselves as we turn our gaze towards ourselves- as an object, so to speak- we become aware of ourselves as agents, who take actions, initiative, and make decisions, choices from among possibilities.<sup>3</sup>

In his discussion of race in *Blackness Visible* Charles W. Mills proposes that European expansionism in its various forms such as expropriation, slavery, colonialism, settlement brought the concept of race into existence globally. According to Mills, those termed *Whites* are the bringers of civilization per se; they are the ones who built the legal system and the society from scratch in a land where according to their outlook was bare; which is a concept marvellously encapsulated in a book published in Mauritius entitled, “*Les Défricheurs de L’île Maurice*”, meaning those who weeded Mauritius although there are some serious speculations as to whether the colonists actually did the weeding themselves.

Mills makes his point by comparing the prolific misogynistic writing on women to the conspicuous absence of Blacks in classical philosophy. He points out that a collection of explicitly racist statements about Blacks quoted from major works in the Anglo-American canon would not be a particularly thick document.<sup>4</sup> The relationship of Blacks and Whites in American society is always set in terms of polarity, those termed *Whites* have the moral, religious and judicial standing that has lifted them above the other “races” and they have been the expropriators while others have been the expropriated. They have been the Slave-owners while others have been Slaves.<sup>5</sup> However, the problem of Mauritius is much more complex than that; the polarity between Whites and Blacks exists although not as prevalent as in the United States because Whites represent a very small minority in the population (albeit a very affluent one) and by virtue of their higher economic status, they can afford to forfeit the use of some services such as public bus system and

governmental public hospital. The Mauritian complication resides not only in the polarity between Whites and Blacks but between Blacks and other “communal groups” as well. The communal group termed “General Population” includes descendants of White slave-owners as well as descendants of slaves, who by the way refer to themselves as Creoles. It seems that the only commonality between Whites and Blacks in Mauritius is Christianity or at least the local perception is that both groups are said to be Catholics.<sup>6</sup> Economically speaking, these two groups are at opposite ends of the economic spectrum; descendants of slaves belong to the lowest social classes whereas the descendants of slave owners enjoy the highest social status in Mauritius.

A study sponsored by Cassam Uteem, former President of Mauritius shows that the “Black members” of the General Population suffer from “exclusion”, that they do not enjoy the same educational, economic opportunities as the other communities. So here is the hitch: by being included under the same denomination as the most affluent component of the General Population, the problems of the economically impoverished descendants of slaves are masked.

We can all agree that lumping groups of peoples together based on race, religion etc; label and pigeon-hole them, is in itself offensive. However assembling disparate groups of people who have little in common under a common appellation is even worse. The matter gets worse considering that the national census is no longer recorded along communal lines but the terminologies used in these census records to label people are still in use today (e.g. in the broadcast news, newspapers and even in law bills) and from a legal standpoint these terms are obsolete.

The government sponsored sociological study on “Exclusion” in the mid 1990s, hinted to some deeper issues within Mauritian society as a whole. Creoles however do not need a government sponsored study to tell them that they suffer from racial discrimination and before that study was ever undertaken; the first person to publicly declare that there is a problem with Mauritian society concerning the treatment of descendants of slaves is Father Roger Cerveaux, a Catholic priest who coined the term “*Malaise Creole*”. The ensuing public outcry felt more like a denial than applause or outrage at the situation. Cerveaux expounded his theory on *Malaise Creole* in the course of a Mass sermon; he declared that Creoles did not enjoy equal economic opportunities as the rest of the population based on their ancestry. In the sermon Cerveaux did not blame Creoles for their own problems per se; he saw them as victims of history who have trouble adjusting to the twenty first century due to ongoing racial discrimination. Ideas such as Cerveaux’s “*Malaise Creole*” belongs to the school of thought called Mechanism as opposed to Humanism proposed by Prof. Adelbert Jenkins.<sup>7</sup> Jenkins following the humanistic perspective focuses on people as being agents of their own destiny, capable to shape their lives through choices of their own. In so doing, Jenkins makes a clear distinction between the terms *humanistic* and *humanitarian*; the former refers to a philosophical stance that puts individuals and their choices as central, determining factors in their fate. While the latter refers to an attitude of compassion or benevolence towards humankind or a philosophical position which strives to attain the highest level of personal (sometimes spiritual) development for all humans. These factors are determinants in the individual’s freedom and responsibility; humanists may or may not be concerned with the welfare of the humankind in general as opposed to humanitarians. Jenkins’ humanistic position is drawn into sharp contrast to the Mechanists’ philosophical approach which sees human beings as constantly shaped by external circumstances with little input of their own.<sup>8</sup>

In Mauritius, the study on exclusion in the 1990s has shown that there is a higher rate of failure in inner-city public primary schools and one of its findings was that at the end of six years of primary school Creole children were still illiterate. Comparatively African American children from inner-city public schools in great urban areas such as Watts in Los Angeles or East Harlem in New York City, encounter the same problems. Jenkins’ theory of humanistic approach calls for a study of inclusion rather than exclusion, which focuses on how people view their cultural world, how they transmit knowledge and interpret them. A major problem, I have with Jenkins’ perspective is its diachronic in nature (although it is understandable that one cannot analyze a dead person’s psyche) Jenkins does not discuss the historical impact of slavery on African Americans’ as a major factor which can influence their choice making and subsequent interpretation of the world around them. Cross-cultural psychology on the other hand provides more straightforward answers; it suggests that cultural transmission is vital in people’s choice making. If cultural transmission of the torts of

slavery is a way to account for the present generation suffering the social torts of slavery then we can actually study these problems in a historical context and how articulate their choice making.

Seeing that our past is still with us, which is true in the United States and Mauritius; a Commission for Truth is an opportunity to heal the damages done to Mauritians through slavery and the indenture system as Randall Robinson says in his book, *The debt that America owes to Blacks that "no nation can enslave a race of people for hundreds of years, set them free bedraggled and penniless, pit them, without assistance in a hostile environment, against privileged victimizers, and then reasonably expect the gap between the heirs of the two groups to narrow. Lines, begun parallel and left alone, can never touch."*<sup>12</sup> Reparations through the Truth and Justice Commission are a means of democratizing history, it gives a voice to those who are seldom heard; silenced by a society founded on slavery.

The section entitled Reparations in the United States looks at class-action lawsuits filed on behalf of African Americans against the government, American and international corporations. This section gives the political and legal background to the different reparations suits and the social context in which they took place. Callie House and the National Ex-Slave Mutual Relief, Bounty and Pension Association reparations suit discusses the role of the church in grassroots movements and the ex-slaves' movement attempts to sue government agencies for monetary compensation for unpaid slave labour. The Dred Scott case analyzes the institution of slavery and the legal status of the slave in the ante-bellum jurisprudence. This section also investigates the question of citizenship of the African American slave in a pre-civil war context. It also explores the influence of Justice Tanney's opinion in the subsequent racial policies enacted such as Jim Crow in southern states post civil war. This section also uncovers similarities and differences between the early 20<sup>th</sup> century and the 21st century lawsuits and how the demands of the reparations activists changed over time.

Section two explores the Japanese Internment Victims Reparations suit and the introduction of the H.R 40 bill which it inspired and their influence on modern reparations suits. This section gives details of each reparations suit and discusses the judges' opinions in relation to Keith Hylton's argument on the Social Torts of slavery and how they apply to the American context. This section also discusses the reparations of slavery within the Rule of Law. According to Dr. Kaimipono D. Wenger, the Rule of Law is an important and widely accepted idea, integral to most understandings of how society interacts with the law. The Rule of law is the idea that laws are equally applied, knowable, and distinct from arbitrary power and it is an imprecisely defined concept. Dr. Wenger discusses in his essay how slavery was a breach of the Rule of Law therefore reparations are an important way to address that breach. This essay analyzes Hylton theory concerning the social torts of slavery as causation for the problems encountered by descendants of slaves in relationship with Wenger's theory of reparations within the Rule of Law.

Section three gives the political background and legal histories of compensatory reparations in Mauritius Island after the abolition of slavery. It examines the case of a Mauritian consortium, which was created after the abolition of slavery with compensatory monies from the British government compared to a lawsuit for compensatory damages for the loss of slaves' labour and property as a result of abolition in the State of Louisiana. This section also investigates the reparations suit for the refugees of the Chagos Islands in Mauritius and why the compensatory actions did not heal these people's wounds. It also explores the theory of race through history comparatively in the U.S and Mauritius using Adelbert Jenkins humanistic approach to psychology and cross-cultural psychology proposed by Ute Schönplflug.

Section four is devoted to the comparison of the latest reparations class action suit in the United States to the state sponsored study on reparations which is part of the Truth and Justice Commission. It looks at similarities between the Farmer-Paellmann class-action suits and the present state-sponsored study on reparations in Mauritius and makes recommendations based on Prof Hylton's theory on Social Torts and Dr. Wenger's discussion of reparations as a way to redress the breach in the Rule of Law caused by slavery. This section discusses the pertinence of using a multidisciplinary approach to the study of slavery and reparations for the Truth and Justice Commission.

**REPARATIONS MOVEMENT IN THE U.S- THE JAPANESE AMERICANS WORLD WAR II INTERNEES**

The internment of Japanese Americans in concentration camps during World War II, in East Central Southern California is was a well-documented case of racism and civil rights violation. As early as 1941, the Department of State investigated the Japanese American population living in Southern Californian coastal cities, the reports documented the loyalty of Japanese Americans and subsequently advised that they did not pose any threat against national security. The FBI and the U.S Navy conducted separate independent investigations and their findings were similar to the Department of State however their reports were not made public until after the war ended. Japanese Americans were rounded up, forced out of their homes and left their belongings behind and interned in concentration camps for the duration of the war. One of them was Manzanar located in East Central California made famous by the 1973 autobiography of Jeanne Toyo Wakatsuki Houston who gives a firsthand gripping account of life in the internment camp and the struggles Japanese Americans faced in mainstream society after their release.<sup>10</sup>

The case of the Japanese Americans was first addressed in the 1970s; there was a lot of grassroots activity through the Japanese American Citizen League (JACL) and other local groups and chapters. *Farewell to Manzanar* the autobiography of Jeanne Wakatsuki Houston also helped to stir the sentiments of the survivors and their dependents. The Japanese American Citizens League (JACL) pursued its efforts throughout the early 1980s which culminated in a Congressional fact-finding commission to study the possibility of reparations and make recommendations for compensatory damages. The commission welcomed survivors to depone in front of the congressional committee and a large number of older internees came forward to testify. In their testimonies, the survivors mentioned the despair and depraved living conditions they had to endure in the camps. Upon their release, they came back to their former homes to find them occupied by White Americans, some of the former internees managed to get their homes back but their furniture and precious belongings were stolen. Jeanne Wakatsuki Houston mentioned in her book that after her family's return from Manzanar, her father who was a deep-sea fisherman could not get his boat back and deprived of his means of livelihood and already very depressed from the harsh life in Manzanar became an alcoholic.

The testimonies in front of the Congressional committee were so appalling to public opinion that both parties endorsed measures of redress for the Japanese Americans in their 1984 presidential bid. The case of Japanese Americans was further aided by many internal changes within the congressional subcommittee dealing with the legislation concerning their claim; the Democrat Frank Barney from Massachusetts replaced Dan Glickman, the Republican Representative from Kansas as the chairman. Four senior Japanese American Democrat legislators from Hawaii, California, and Arkansas used all of their influence to push the bill forward. Moreover, the congressional legislators cleverly presented the claim as a violation of constitutional rights, denial of equal opportunity to private citizens thus avoiding any reference to race. The class action suit filed on behalf of Japanese Americans Korematsu, Hirabayashi and Yasui was favorably presented in the media. The Civil liberties Act of 1988 was enacted to authorize a national public apology, each surviving internee and dependents received \$20,000 in compensatory damages, an educational scholarship fund was put in place to benefit the survivors and their descendants in their educational needs.<sup>11</sup>

The compensation was not effective immediately; checks were disbursed over a period of time; for instance Japanese Americans internees living in Hawaii received their checks in 1992.<sup>12</sup> The most important part of the reparations for Japanese Americans was the formal written apology which the federal government sent to each family. It is reported that the note was not long, the government took full responsibility for what it did and apologized; it gave these people closure to a painful chapter in their lives.

Japanese Americans internment was in some respect similar to the Dred Scott case of 1854, the central issues in both suits were ultimately citizenship and race. In the case of the Japanese internees, the generation called Sensei born in Japan, resided a long time in the United States and subsequently took American citizenship, their children called the Nikkei generation were born in the country and were by birth Americans. The Sensei and their children the Nikkei, who were mostly underage at the time, were also interned in the camps because their citizenship and allegiance were in question because of their race. Similarly, the Dred Scott case, the question of

citizenship was addressed in the famous opinion of Justice Roger B. Tanney that slaves being of a race different from the Caucasian Americans and Native Americans could not be citizens of the United States. The Dred Scott case will be discussed in further details in the subsequent chapter.

### THE DRED SCOTT CASE 1854 TO 1857 - SLAVERY AND CITIZENSHIP

Dred Scott was born in Southampton County, Virginia, his exact birth date is not known and existing records indicate the year to be between 1795 and 1800 on the Blow family's plantation. The Blow family was part of a long established, preeminent group of Virginia Planters whose roots reached the first days of the colony in the 1600s. Dred Scott's owner Peter Blow was an unsuccessful planter; he moved his family several times from Virginia to Alabama in 1818 and again in 1822 to Florence, Alabama where he established himself as an innkeeper. Business was good in bustling town of Florence, records show that Dred was employed as a hustler; he took care of the clients' horses.<sup>13</sup>

His physical appearance was listed as being dark of skin, short and slightly built; unlike the many other male slaves belonging to the Blow family group, he was not a mulatto. His short stature was associated to a bout of disease he suffered in childhood, which decided his owner to set to work in the house rather than on the plantation with the other slave children. Short of cash and his wife sick of a lingering disease that would ultimately claim her life, Peter Blow sold many young male slaves among them was Dred Scott who legally became property of Dr Emerson in 1833.

In 1833, Dr John Emerson was assigned by the U.S. Army to Fort Armstrong, located in Rock Island, Illinois. The territory of Illinois was known as a free territory with the passage of the Northwest Ordinance of 1787 however it is not clear whether Dred Scott knew the implications that living in a free state where slavery was not upheld would have on his life.<sup>14</sup> Emerson on the other hand fully understood the situation but chose to bring his slave with him anyway. At the time, it was common for Southern Army officers to bring along their slaves to their Army postings whether it was; in a Free State or Slave state. In 1836, Dr. Emerson was reassigned to Fort Snelling on the Mississippi River, which was located in Michigan Territory now Saint Paul, Minnesota, then a vast area later subdivided into five states; Wisconsin, Minnesota, Iowa, North and South Dakota. Slavery was not recognized in the Michigan territory either furthermore, the Missouri Compromise strictly prohibited slavery in that region.<sup>15</sup> At Fort Snelling, Dred Scott met and married a black woman known as Harriet Robinson who was attached as servant to Major Taliaferro, a local Indian agent who also presided over their civil union as Justice of the Peace. Scott travelled to Louisiana and Texas with his family and often without his master and they did not escape. After the death of his master, Dred Scott, his wife and two daughters travelled to Missouri with the widow Emerson. There Scott brought suit against his owner to gain freedom for himself, his wife and their two children. The reasons may have been that the widow Emerson needed money and wanted to separate the Scott family by selling either the parents or the children to different owners. In his lawsuit, Scott claimed that the state of Missouri had the longstanding principle of "once free, always free" and that applied to him and his family because they had resided in the free territory for years, his daughter Eliza was born in the free territory and that once a slave took residence in the Free State he was immediately set free.

This case had a legal precedent in the England; the counsel to James Somerset made the same argument that a slave became free once he resided in a free state. The case of Rachel v. Walker in 1836 brought to the Circuit Court of St Louis, Missouri also used the James Somerset argument and the court ruled in favour of the slave woman named Rachel. Rachel's claim was that having lived in free territory where slavery did not exist, she was automatically freed. The verdict came a month after Dred Scott's move to Fort Snelling in May 1836. We do not know the reasons why Dred Scott did not bring that suit sooner but the fact that his family would be torn apart was a very strong incentive. The widow Emerson surrendered all of her property rights to Dred Scott to her brother John F. Sandford and this is how the case came to be known as Scott v. Sandford rather than Emerson.

It was recorded that the Emerson/Sandford family cut all means of livelihood to Dred Scott and his family, his former owner the Blow family took them in. Dred Scott hired himself out to nearby businesses and plantation owners to sustain himself and his family. He was sent free in 1854

by the Missouri Supreme Court but Sandford appealed and the case went to the United States Supreme Court, the case was decided in 1856 with Justice Roger B. Tanney reading his famous opinion on the case. The verdict took everyone aback; the abolitionists north and the pro-slavery south alike furthermore the verdict had many legal implications for the status of the person of African descent and for northern politics.

First, Justice Tanney redefined the status of people of African descent whether free or enslaved as inferior and by virtue of their African ancestry, they could never attain full citizenship in the Union. Justice Tanney's legal definition of the slave was very much in conformation with the French Code Noir which defined the slave as a "*bien meuble*", which would mean that the slave was just private property and the owner could do whatever he wished with him, the court could not intervene because the owner was in his rights. Second, Justice Tanney stated that the Framers of the Constitution did not intend to include the Black man in the article of the constitution and that the phrase "*All men are created equal; that they are endowed by their creator with certain unalienable rights...*" did not refer to the Black man and invoking the racist mindset of the framers, Justice Tanney asserted that if they did not intend to include the Black man as being part of the human family they were intending to define and in the case they did intend to include those of African descent they would have suffered "*universal rebuke and reprobation.*"<sup>16</sup>

Furthermore Justice Tanney proclaimed that Scott had no right to bring suit in federal court or any court of law because he was black and all blacks (not just slaves) could not be citizens of the country because their ancestry could be traced back to Africa. He pronounced the most memorable lines in the history of the Court that is the Black man: "*had no rights which the white man was bound to respect; and that the Negro might justly and lawfully be reduced to slavery for his benefit.*"<sup>17</sup>

Justice Tanney's opinion also nullified the 1820 Missouri Compromise thus angering Northern abolitionist sentiments. New states like Kansas were settled by both slave owning whites and abolitionists from the North, which led to violent riots and Justice Tanney's opinion, exacerbated the problem. On July 9, 1868, Congress ratified the Fourteenth Amendment to the Constitution declaring among other things, that all persons born or naturalized in the United States were United States citizens and citizens of the state in which they resided. Section 1 of this Amendment effectively overruled the Supreme Court's Dred Scott decision, ultimately making freed slaves citizens of the United States. Finally, on February 3, 1870, Congress ratified the Fifteenth Amendment with the intention of granting African-Americans the right of suffrage. The Fifteenth Amendment provides, in part: "The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, colour, or previous condition of servitude." U.S. Const. amend XV, § 1. Concerned with the possibility that individual states may attempt to circumvent the purpose behind the Civil War Amendments, Congress included an enabling clause in all three of the Civil War Amendments, giving it the exclusive power to enforce the Amendments with appropriate legislation. See U.S. Const. amend XIII, § 2; see also U.S. Const. amend XIV, § 5; U.S. Const. amend XV, § 2.

## EARLY REPARATIONS MOVEMENT

There were also early efforts attempts for a modicum of relief for ex-slaves. In 1865, Union Major General William T. Sherman declared that abandoned or confiscated land along the southeast coast, be set aside for freed slaves with families at a rental for three years. They were entitled up to 40 acres, hence the expression, "forty acres and a mule". However, this policy did not expand to the Deep South; after Lincoln's assassination, President Andrew Jackson halted this movement in an effort to pacify the defeated confederate states. In June 1865, President Andrew Jackson ordered 40,000 Freedmen from their homesteads allowing the rebel white southerners to reclaim the land. The federal Government established the Freedmen's Bureau to provide assistance to former slaves.

Major General Oliver Otis Howard was nominated Commissioner of the Freedmen's Bureau, which was headquartered in Washington D.C.<sup>18</sup> The bureau's assistants and agents carried out the daily operations in the former confederate and the Union states, of registering freed slaves for relief. The Bureau helped the ex-slaves with clothing, issued rations, operated hospitals and refugee camps. The Bureau also managed apprenticeship disputes (precisely the type that occurred during Callie House's childhood), assisted benevolent societies in establishing schools, helped freedmen legalized marriages contracted during slavery and provided transportation to reunite with their family or relocate to other parts of the country. Congress extended the life of the Bureau and added other duties, such as assisting Black soldiers and sailors in obtaining back pay, bounty payments, and pensions. When the Bureau was discontinued in 1872, its remaining functions were transferred to the Freedmen's Branch of the Adjutant General's Office.<sup>19</sup>

The Reparation movement is not new to the United States. As early as 1870, a white southerner, democrat and businessman named Walter R. Vaughan wrote to congress to appeal for a pension fund to help aging ex-slaves. Vaughan based his model on the pension fund already in use for Union veterans' soldiers, he was the first to suggest that being enslaved is tantamount to sustaining personal injury and that the government should compensate the ex-slaves for the repeated injuries they suffered during slavery. Vaughan worked closely with Congressman William J. Connell on the 1890 bill also known as the Mason bill which would provide ex-slaves a pension based on a scale.<sup>23</sup> Seeing that his efforts were fruitless with the Congress, Vaughan decided to appeal to public opinion Blacks and whites on the need to have an ex-slaves pension fund to support aging slaves who cannot support themselves through work. In 1891, he published his views in small book entitled, *Vaughan's Freedmen's Pension Bill: A plea for American Freedmen and a Rational Proposition to Grant Pensions to Persons of Colour Emancipated from Slavery*. Vaughan's book was an instant bestseller in the South, ex-slaves collected money to buy it, those who could read, read aloud to entire gatherings. According to Charles P. Henry, Vaughan's book was remarkable in its historical scope, it described great accomplishments of Blacks in Africa for instance in Ancient Egypt and included contemporary biographies of successful Black men who had been slaves. However Professor Frances Berry contends this portrayal of Vaughan, she postulates that he wanted to revitalize the southern economy which was severely weakened by the civil war.<sup>20</sup> Demanding a pension fund for ex-slaves would help the south recover from the ravages of the civil war, in Vaughan's opinion helping the freedmen recover would benefit the whole white society in the long run because enabling them with the means of consumption would boost the economy, creating more demand for consumer goods.

Regardless of Vaughan's true motives to proposing the Freedmen's pension; one has to admire his thoughtfulness, incisive intellect to see beyond the very immediate confines of race to imagine how the south would benefit from the implementation of such a radical bill. Vaughan and the leaders of the National Ex-Slaves Mutual Relief, Bounty Association worked together closely at first to push for congress to adopt the Mason bill. However internal problems arose, Vaughan decided to announce that only he and Congressman Connell were responsible for drafting the Freedmen's pension bill and that anyone not approved by him was deemed a fraud. He denounced the elected secretary Callie House and the general manager of the National Ex-Slaves, Isaiah H. Dickerson as frauds in southern papers and warning the public not to give them money for the passing of the bill as it would be fraudulent.

**CALLIE HOUSE AND THE NATIONAL EX-SLAVES MUTUAL RELIEF, BOUNTY ASSOCIATION**

Vaughan's ideas on the Freedmen's pension fund heavily influenced the first Black organization *The National Ex-Slave Mutual Relief, Bounty Association* that sought reparations for unpaid wages during slavery. The organization sought pensions for African-American ex-slaves based on the type of pensions offered to Union soldiers; the organization targeted \$68 million in taxes levied on seized cotton from the defeated southern states, a sum which would amount to \$1.2 billion in 2005 according to Prof. Frances Berry's estimates.<sup>21</sup> One of the pioneers for the Reparation Movement was Mrs. Callie House born Callie Guy into slavery in 1861 and was still a small child at the time of emancipation.<sup>22</sup>

After the abolition of slavery, many owners in Tennessee would refuse to let the ex-slaves' children go with their parents; keeping them as apprentices without parental authorization.<sup>23</sup> Callie House became a widow very young; it must have been difficult to care for her five children on a washerwoman's salary. Callie knew the daily struggles of the ex-slaves; it was definitely worse for those who were too old to work. There was a collective need for self help within the former slave community. The National Ex-Slaves Mutual Relief Bounty Association functioned as a mutual help society; there were monthly dues for those who could contribute, which went towards helping the destitute old or disabled ex-slaves for their medical and living expenses as well as burial aid. The rest of the contributions went towards stationery, stamps and the general administrative work surrounded writing and collecting petitions for congress to help Freedmen and to help pass the Mason Bill. Much of the information concerning the slaves were obtained through door to door interviews with former slaves which Callie conducted herself; she listened to their woes about the present, and their fears concerning the future. She exhorted anyone especially the older slaves to write to congress to petition for a pension and it clear to them that it was their right and privilege as American citizen to do. Callie and the other officials from the association collected and submitted these petitions to Congress.<sup>24</sup>

The activities of the Association were not solely confined to Nashville Tennessee but soon spread in the south and in North America where the ex-slaves settled after 1865. There were chapters in Atlanta, Georgia, Louisiana, Missouri, and Washington D.C. Callie House and the leader Isaiah Dickerson travelled a lot while organizing for the association when House and Dickerson were arrested for fraud, they were questioned at length on the origin of their travel funds. A lot of the Association's members had never met Callie House or Dickerson in person and there were rumours of people going around collecting money impersonating them. Prof Berry suggests that these people were either rumours spread around from the Post Office Administration in D.C or by people who did not like the idea of African Americans organizing themselves at a community level for self-help and personal betterment. Callie House's impersonator was described as a thin-faced, well-spoken, slender mulatto woman who had an elegant handwriting, which was very far from the truth. Callie was a full figured, dark skin woman with a primary school education but she was very intelligent and often gave public lectures on reparations.

Callie House worked closely with Cornelius Jones, a black attorney to bring suit against the Treasury Department on taxes levied on cotton seized as war bounty by the Union army when they invaded the south. The class action suit was filed in 1915 under the name *Johnson v. McAdoo*; the plaintiffs all freedmen from the Association claimed that the government owed them money in the form of unpaid wages over cotton seized during the war, which they claimed was picked and processed by slaves' hands. The plaintiffs stipulated that the government had already earned huge amounts of profit on the bounty cotton; price for crops like cotton was kept artificially high during the war moreover according to the three-fifth representation rule, cotton was already heavily taxed. This means that the government made an enormous amount of money on that crop, first on the inflated price and second on the heavy taxation that was levied upon it. The cotton had been already identified when it was taxed and was well publicized as war bounty in the newspapers of the time, the money was even be traced to the Treasury department thus the suit could avoid the issue of whether Congress would appropriate funds to pay for pensions as compensation for the ex-slaves.<sup>25</sup> The plaintiffs in this case claimed as unpaid revenue which amounted to \$68,078,388.99 collected in taxes from 1862 to 1868. Cornelius Jones was a very skilful attorney; he avoided any hints to the failures of Reconstruction policies in the south, that these policies did not include Blacks at all. And the fact that the Jacksonian proclamation of 1865 forced the freedmen off their homestead and returned the land to the ex-slaveholders. Instead Jones crafted his argument on

comparisons with Indian monies that were held in the Treasury and were payable under specific Indian Treaties. The freedmen lost the case based on a procedural objection that the government of United States could not be sued without its consent and Jones filed an appeal in Supreme Court and lost. Waivers of sovereign immunity allow such claims to avoid immediate rejection in the courts and today the government allows such waivers but during Callie House's, it was the government was causing the harassment and the discrimination and it would not allow it.

Jones made himself a target of persecution when he filed this class action suit against the treasury department. Moreover, Jones and Callie House greatly publicized the suit among ex-slaves and their families in the various chapters around the country and to do that they had to use the mail. This gave more fuel for the Post office department to persecute Callie House, the Association and Cornelius Jones. The Post Office department presented the invitation to contribute in the lawsuit as an evidence of the Association's criminality. Jones was indicted for money and mail fraud as he was filing the appeal in the Supreme Court.

The harassment from the postmaster general and by extension the federal government continued until Mrs. House was finally arrested on charges of mail fraud, prosecuted and sentenced to one year in a federal penitentiary. Mrs. House pleaded not guilty and asserted in court that her work with the Association was necessary. Mrs. House maintained her innocence until her death from uterine cancer in 1928.

Callie House must have come across as arrogant and impetuous when she wrote to Acting Assistant District Attorney Barrett, telling him that she was an American citizen and it was in her rights to petition Congress to redress the dreadful situation African Americans found themselves in after the Civil War. People like Barrett and those who actively sought to silence Callie and the Association could not fathom that Blacks were entitled to rights and citizenship; they were still in the same "world" as described in Justice Roger B. Tanney's opinion in the Dred Scott case in 1856. Justice Tanney made it plain when talking about Dred Scott that being a black man, he could not be a citizen of any state because he was a negro whose ancestors were of pure African blood and who were imported into the Union and sold as slaves. Furthermore a black man had no rights to sue a white man in a court of law because these were the rights and privileges of a citizen to which he could not aspire. Justice Tanney went on to describe African Americans as *"beings of an inferior order, and altogether unfit to associate with the white race, either in social or political relations; and so far inferior, that they had no rights which the white man was bound to respect; and that the negro might justly and lawfully be reduced to slavery for his benefit. He was brought and sold and treated as an ordinary article of merchandise and traffic, whenever a profit could be made by it. This opinion was at that time fixed and universal in the civilized portion of the white race."*<sup>26</sup>

Callie House's demise, the ultimately death of the mutual help association and the failure of the Mason bill in subcommittee shows that slavery ended only to replaced with Jim Crow which brought disenfranchisement and segregation. In the case of Dred Scott, few years before Callie House was born; Justice B. Tanney wrote his opinion on the case based on his own views but also it reflected the sentiments of the white society of the time. Similarly the true motive behind federal government's arrest and prosecution of Callie house was to silence her and any demands from the Black population to a better life. The treatment that she had to undergo because of her activities to obtain a better life for African Americans materialized the words of Judge Tanney that the *"negro was so far inferior that they had no rights which a white man was bound to respect; and that the negro might justly and lawfully be reduced to slavery for his benefit."* These words reflected the negative sentiments, attitudes and perceptions the white society harboured for African Americans who were considered in the words of the philosopher Charles W. Mills as subpersons. Although a generation separated slavery from Callie House's prosecution, the attitude of white society towards African Americans had not changed.

#### H.R. 40 BILL AND MODERN REPARATIONS CLASS ACTION LAWSUITS

The United States congressman John Conyers representing Michigan 14<sup>th</sup> district, introduced the bill H.R.40 in January of 1989 entitled "The Commission to study Reparation Proposals for African Americans Act"<sup>27</sup> and for the past twenty-one years Congressman Conyers has reintroduced the bill and each time H.R. 40 stayed in the subcommittee level. Congressman Conyers and his

constituents were inspired by the Reparations for the Japanese internment victims of World War II which was awarded in 1988. The H.R 40 bill is very different from the one authorized by the fact-finding congressional sub-committee on Japanese Americans Internment victims; it is rather timidly phrased as only a study to the possibility of Reparations for descendants of slaves. H.R 40 so eloquently titled after "the forty acres and a mule" phrase does not even ask for reparations, an apology or compensation in the form of scholarship fund or individualized monetary award like it was in the case of Japanese Americans. What is baffling with American society is that even such a modest attempt to study race relations is very rudely ignored and some predict that it might stay in the sub-committee level indefinitely unless a miraculous change of mind occurs both on the Republican and Democrat side.

The case was argued in October of 1995 in the city of San Francisco, CA and was dismissed by Judge Sandra B. Armstrong; district Judge in District Court for the Northern District of California. The plaintiffs appealed their complaints against the United States that as descendants of slaves they have suffered damages from the enslavement of Africans and have suffered racial discrimination based on their African ancestry, which was a cause in their inability to muster the same economic, educational opportunities as their white counterparts. The plaintiffs appealed in the United States Court of Appeals for the Ninth Circuit in December of 1995 In *Forma Pauperis* and demanded reparations for the damages they claimed they have suffered and a formal apology for slavery from the United States government.

The case was dismissed based on the inability of the plaintiffs to neither establish that there was concrete, personal injury nor assert the alleged guilt of the United States of America government to have committed these injuries under Tort Law. Moreover, if there was concrete evidence of personal injury from enslavement of African Americans, the statute of limitations to sue for punitive and compensatory damages have been exceeded by more than a conventional human lifetime. The waiver of sovereign immunity in Tort claims against the government of the United States is limited to claims accruing on and after January 1, 1945.<sup>28</sup> In the 1915 case of *Johnson v. McAdoo*, the government refused to allow a waiver of sovereign immunity which led to the plaintiffs losing the case. Had the government granted a waiver of sovereign immunity, the plaintiffs would have (most probably) won the case; as they could easily testify in court and the subject of their claims could be traced to the Treasury Department without any problem.

*Re- African American Slave Descendants Litigation* is a class action suit initially filed in federal court in March 26, 2002 New York by a group of lawyers such as Prof. Charles Ogletree Jr. a professor at Harvard Law School and co-chairman of the Reparations Coordinating Committee and the late Johnnie Cochran, a Los Angeles-based lawyer. The lawsuit entitled *Farmer-Paellmann v. FleetBoston* named Deadria Farmer-Paellmann, Executive Director of the Restitution Study Group, the Chicago chapter of the Reparation movement, was filed on behalf of all African-Americans seeks compensation from a number of defendants for profits earned through slave labor and slave trade. The suit named a few corporations such as FleetBoston Financial Corporation, Aetna Insurance Company and CSX (a railroad company) and was joined later by Meryll Lynch now owned by Bank of America and New York Life Insurance as the reparations committee progressed in their historical investigation. The Committee worked towards including quite a few educational institutions such as Brown, Yale and Harvard Universities which according to Prof Charles Ogletree have made headlines as beneficiaries of grants and endowments which could be traced back to slavery.<sup>29</sup> Like in the *Cato v. United States* and *Johnson v. McAdoo*, Professor Ogletree also named the United States government as a defendant, he claimed that the government through public officials guaranteed that slavery and Jim Crow segregation laws were feasible. The movement cited the example of South Africa where the Truth and Reconciliation Commission has made monetary compensation a central part of their mission, which seeks to compensate people with clear material needs who suffered under apartheid because of race. It was also in South Africa, in the 2001 conference on racism that the United Nations named slavery a crime against humanity which Prof Ogletree asserts is a legal definition that may enable the reparations movement to extend its reach to international forums but so far the movement is U.S based only.

*Farmer-Paellmann v. FleetBoston Financial Corporation, and Barber v. New York Life Insurance Co* both filed in 2002 claimed that above-named corporations and eighteen other companies profited from their historical roles in the enslavement of Africans. FleetBoston, JP. Morgan Chase through two of its merger companies Merchant's Bank of New York and the Leather

Manufacturers Bank of New York, and New York Life Insurance Co. Made huge profits from holding insurance contracts on slaves and used slaves as collateral prior to 1865.<sup>30</sup> The state of California as a plaintiff sued FleetBoston Financial Corp. in 2003 because it claimed that FleetBoston Financial Corp profited in slave trading even after the abolition of slave trade and that the corporation held insurance policies on slaves. The effect of writing slave life insurance policy was to provide the financial means to, and incentive to, purchase more slaves, the slave owners worked the slaves extra hard so as to extract the most profit from his labour. The insurance company on the other hand so as to maximize profit would ask a mandatory medical exam of the slave then write the insurance policy on only three quarter of the market value of the slave. Hence the scheme was profitable to both parties.

JP Morgan Chase Manhattan Bank recognize its role in the slavery era but did not specify its involvement, the bank issued an apology and established a \$5 million scholarship fund for students living in the state of Louisiana. The gesture was characterized as an insult and a lukewarm apology as the company's assets are valued in the hundredths of billions of American dollars and as such there were calls to boycott the college funds. The question is how modern companies can today be accountable for the unethical and immoral measures (such as ensuring slaves or using them as collateral for loans) that their predecessors have committed during the era of slavery? The answer lies in the Slave Era Disclosure Laws enacted in several states such as California, Iowa, and Massachusetts to name a few, have established that the "Predecessor Company" shall own all the rights, duties, benefits, liabilities in an uninterrupted chain of succession which are transferred in the merger for instance, JP Morgan Chase acquired all of the benefits and liabilities of Canal Bank and Citizens Bank, which are known to have accepted slaves as collateral for loans disbursed to slave owners. Let's examine a short bio of the said mergers:

In 1831 Canal Bank was formed in Louisiana followed by the birth of Citizens Bank in the same state. In 1924 the Canal Bank and Citizens Bank merged to form the Canal Commercial Trust and Savings Bank better known under the acronym CCTSB. In 1931 Chase Bank took over the CCTSB and in 1933 at the height of the Great Depression CCTSB went into liquidation. In 1933, CCTSB passed on some of its deposits and loans to the newly formed National Bank of Commerce and in 1971 the subsequent bank was renamed First National Bank of Commerce and in 1998 the latter merged with Bank One Louisiana. In 2004 Bank One merged with JP Morgan Chase & Co and is known as such today. Under the Slave Era Disclosure Law, JP Morgan Chase & Co is liable for issuing loans to slaveholders using slaves as collateral as well as responsible for every other action performed by the defunct companies it absorbed.

The Farmer-Paellmann v. United States class action suits have been appealed many times and in many courts of law, the last being October 1, 2007 when the case was finally dismissed in United States Supreme Court. The opinion interestingly enough consists of one single line denying an appeal to the Circuit court:

*Opinion- "Petition for writ of Certiorari to the United States Court of Appeals for the Seventh Circuit denied. Justice Breyer took no part in the consideration or decision of these petitions".*

The Farmer-Paellmann class action suits have hit the same roadblock over and over again that is the Statutes of limitations have long expired and that the plaintiffs cannot establish the alleged misconducts to the defendants. In plain English, there are no indications in this day and age that the plaintiffs can point to the person or persons employed at FleetBoston, Merryll Lynch or JP Morgan Chase who actually wrote the slaves insurance policies or disbursed loans to slave holders using slaves as collateral. And for that matter, the said slaves who were obviously the recipients of the tort are all long deceased and so are the people who processed the so-called loans and other financial transactions. To put it succinctly, one has to say that in the event of an "absence of plaintiffs as well as an absence of perpetrators" there can be no crime.

In the appeal to the United States Court of Appeals for the Seventh Circuit argued on September 27, 2006 and Decided on December 13, 2006, Judge Posner writes in his opinion that, *"we think that the district court was correct, with some exceptions to be noted, in ruling that the plaintiffs lack standing to sue It would be impossible by the methods of litigation to connect the defendants' alleged misconduct with the financial and emotional harm that the plaintiffs claim to have suffered as a result of that conduct."* The Judge goes on to say that there is a *"fatal*

*disconnect between the victims and the plaintiffs. When a person is wronged he can seek redress, and if he wins, his descendants may benefit, but the wrong to the ancestor is not a wrong to the descendants. For if it were, then (problems of proof to one side) statutes of limitations would be toothless. A person whose ancestors had been wronged a thousand years ago could sue on the ground that it was a continuing wrong and he is one of the victims”.*

First of all, the litigants' claims have to be derivative because they were clearly not born in 1865 when slavery was abolished following this line of thought; the claims could not be brought up by those who incurred those injuries. Secondly their alleged injuries have to be derivative also; they claim that they suffer from racial discrimination in its entire spectrum, which permeated (to the present) in every single aspects of their lives that they have comparatively (to the white population) lower economic, educational, social status and all because of their ancestry to African slaves.

In the case of the litigations, Re-descendants of African slaves/Farmer-Paellmann suits, the defendants are not clearly identifiable, they are said to be present day corporations which merged with defunct corporations, which conducted slave based business deals prior to or in 1865. The injuries themselves are rather nebulous according to the plaintiffs the defendants cause them harm by profiting from business deals with slaveholders and using slaves as collateral. However the plaintiffs fail to clearly identify how and when the injuries came about. Nor were they able to identify how many times they were hurt and how serious their injuries were.

To better understand this argument let's take a mundane example. If Jill hits Jack on the head with a club then the action of hitting and the instrument used in the deed are all causal for Jack's injury. In the class action suits, the litigants fail to establish the causality under Tort Law hence their dismissal. In simple English, the litigants have difficulty identifying their injuries in a precise manner and cannot show for that matter how, when and who hurt them with the accuracy dictated by Tort Law. These injuries are not covered by "traditional" Tort doctrine as Prof Keith Hylton puts it; tort law redresses injuries which are current the law establishes a timeline in which an identifiable victim can sue the alleged perpetrator (who should also be identifiable) usually within a year or two of the said injury (depending of the state in which the litigation takes place) beyond that prescribed timeline, the statute of limitations expires. In that respect, Tort Law is very specific.

Suzette Malveaux argues otherwise in her article entitled *Statutes of Limitations: a Policy Analysis in the Context of Reparations Litigation*. She contends that time-barring procedures in reparations claims are against public policy and that *"under existing rationales for statutes of limitations and their exemptions, such claims could survive."*<sup>31</sup> Malveaux also argues that the courts should exercise their equitable, impartial power and permit these reparations claims to be heard on the merits and they did not. Malveaux claims that the statutes of limitations upon, which the courts are relying, are outdated and cannot be justly applied in the context of reparations litigations. Malveaux uses the 1921 race riots in the Greenwood neighbourhood of Tulsa, as an illustration of the inapplicable nature of the statues of limitations; the district court in this case interpreted the plaintiffs' injuries and the causation of such injuries in an unhistorical manner and held the plaintiffs to a far greater standard than the defendants who used deception to avoid liability. There were more than 100 legal suits filed in 1923 for the case of Tulsa riots but only two of them went to trial.<sup>32</sup>

Keith Hylton proposes another course of action; that the litigants in the reparations suits should instead concentrate on the Social Torts, that slavery involves a category of Social Torts which are according to him more harmful and to which the tort law appears to be an inadequate means of seeking damages. Among these social torts is the denial to the slaves the right to marry, deprivation of status, denial of religious freedom, etc. Hylton suggests that Social Torts are most damaging to descendants of slaves because they are "like a constantly mutating virus, they have the capacity to injure successive generations". The comparatively lower economic, educational, social and legal standing in society based on African American ascendancy to African Slaves are actually derivative of the social torts of slavery. By consequence of the above-mentioned social torts, descendants of slaves have a difficult time overcoming the branding of inferiority that the institution of slavery has bestowed upon them by virtue of their phenotypic appearance which

recall their ascendancy to African slaves; they are *de facto* relegated to an inferior status in all of the institutions of society.

Hylton also proposes another resolution that in order to have some potential in social gain, reparations claims have to demand an accounting on slavery's beneficiaries and precisely how they profited from this institution and the findings should be made public. In his article, Hackney deplores that it might be a simple task to identify individual slave owners but "*there is no continually existing entity (such as a corporation) to answer for these claims*". It might be hard to find a corporation that could answer these claims in the United States but in Mauritius, the case is very different. The Mauritius Commercial Bank, a consortium was founded in 1838 from compensatory funds obtained from the British Government as reparations for the loss of slaves after the abolition of slavery.<sup>37</sup> The compensation money was invested in the new Mauritius Commercial Bank but also in the plantations in Mauritius.

### COMPENSATION IN COLONIAL MAURITIUS - THE MAURITIUS COMMERCIAL BANK

Hylton recommends in order to potentially garner social gain for descendants of slaves, reparationists in the United States ought to demand an accounting of the businesses that benefited from slavery and that the findings should be public knowledge. The political entity of Mauritius like the United States of America was founded on slave labour; the book "*Les Défricheurs de L'île Maurice*" gives a list of the French families and individuals who came to Mauritius then Isle De France as colonists. The above-mentioned book however, concentrates only on the French period and does not give us much information on the Dutch or British periods of colonization.

Slavery in Mauritius was abolished on February, 1, 1835 which was thirty years before the abolition of slavery in the United States; furthermore there was no formal reconstruction period as in the United States where special funds were disbursed by the legislative to relieve and help White Americans from the disastrous effects of the Civil War had on the economy. Mauritian historiography points out that the first British governor Robert Farquhar was particularly friendly to the French slave-owners and that he used all his influence to accommodate their needs such as French legal code was retained as well as the colonists' right to keep slaves; they were not forced to convert from Catholicism to the Church of England.<sup>38</sup> There was the Treaty of friendship of 1817 signed with King Radama the 1st from the Imerina kingdom from central highlands of Madagascar to whom tactical and military means were given to in him in the hope of establishing himself as sole King of the Island of Madagascar.<sup>39</sup>

Farquhar did not enforce the Slave Trade Abolition Act, which took effect in all British colonies in 1810 and nor was the Slave Trade Felony Act of 1813 ever enforced in Mauritius. It was rather hard to enforce the slave trade felony act since the high officials in the colony were all slave-owners themselves or sons of slave-owners. In a way, Farquhar conciliatory attitude towards the French colonists precluded him from enforcing British policies in the island. Farquhar's strategy in stopping slave trade was to be non-confrontational and instead of focusing on the slave-owners in the island, he shifted his attention to the sources of the slave supply, which was Madagascar and East Africa.

The slaveholders in Mauritius protested against most British generated policies especially those which dealt with slavery such as registration of slaves ordered on September 24, 1814 and enacted in Mauritius in 1815. Teelock writes that slave-owners in Mauritius *vociferously protested and boycotted registration*, the French population feared slave rebellions more than anything and any amelioration laws were met with resistance.

The hostility and resistance to British rule displayed by French colonists was translated through the steadfast hold of French cultural values which had slavery being at its very core. The attitude that slaves were inferior therefore were to be "*bien meuble*" that is, mere pieces of property, as it is worded in the Code Noir; was the nucleus of the so-called French cultural values. British Colonizers were not opposed to slavery either for instance; Charles Telfair was one of the largest and wealthiest slave-owner in the island. Private property was at the very centre of the slave-owning mentality and when slavery was abolished in 1835, slave-owners most certainly saw themselves as being robbed of their property. The threat of losing their personal property

prompted the planters to send Adrien d'Epinau, an attorney and a very wealthy slaveholder and plantation proprietor to England to "defend the property" of the colonists.

When one analyses from the perspective of causation that is how the torts which the slaves suffered from were easily transferred to their children and each generation passed these onto the present day generation. In other words there is a direct correlation between the poor economic status of African Americans nowadays and the economic and social depravity of the slaves. James R. Hackney Jr. seems to cite conservative writer John McWhorter who attributes the inequalities suffered by African Americans to their differing cultural values and on the negative incentive effects of the welfare system.<sup>36</sup> McWhorter means differing in the sense that African Americans hold values which differ from the normative White Americans cultural values. McWhorter's assertion imputes the responsibility of causation on African Americans; he sees them both as victims and as perpetrators of their own demise through over-reliance on welfare and their inability to adjust or change their cultural values to par with mainstream White America.

Despite Hylton's argumentative brilliance on the toxicity of social torts on future generations, he does not however, explain how these (social torts) "mutate" and negatively affect African Americans. James R. Hackney Jr. in his essay *Ideological Conflict* cited above gives a glimpse of an elucidation, which I will subsequently further expound.

Hackney cites Pierre Bourdieu's theory of social, economic, cultural and symbolic capital, and how race capital of any ethnic group represents an amalgam of all forms of capital proposed by Bourdieu. Hackney argues that "slavery has severely decimated African Americans' race capital". Setting aside the use of the verb "decimated" (from the verb to decimate, which actually means to kill a tenth of) Hackney is close to making a point here, that slavery has a lot to do with African American status in this day and age (and based on the same model, descendants of African slaves in Mauritius too).

In Bourdieu's theory of social and cultural reproduction, the stress is placed more on the capacity of social actors to actively impose and engage their own cultural productions and symbolic systems in the reproduction of social structures of domination rather than putting emphasis on economic factors as in Marxist analysis.<sup>4137</sup> Bearing in mind that Bourdieu was actually talking of upper class French society, one can extrapolate from Bourdieu's theory to understand that economic, social cultural and symbolic capital of an individual or a group can actually transmit to the next generation. We can consider how the social and psychological aspects of how people feel, think and act and how these translate into specific choices within a sociological context and how these choices and/or behaviours are passed on to the next generation.

Ute Schönplflug explores this theory further in her article entitled "*Cultural Transmission- A Multidisciplinary Research Field*".<sup>38</sup> First, Schönplflug defines the cultural reproduction in terms of cultural persistence as being essentially transmission or the passing on of information from individual to individual or from groups to other groups. Schönplflug draws on the writings of the biologist Cavalli-Sforza that "*genetic transmission may not be the only source for parent-offspring biological similarity and that social orientations, skills, and accumulated knowledge are also similar in parent-offspring dyad*". Schönplflug distinguishes three channels of cultural transmission such as vertical, horizontal and on the dual model which means, transmission can go both vertical and horizontal. Here is a selection of the often most discussed issues in studies involving people of African descent and which are transmitted using Vertical modes of transport; cognitive development, attitudes, educational and occupational status, upward and downward mobility, patterns of socialization, sex-role conceptions, political beliefs, religious beliefs, self-esteem, use of legal or illegal drugs, language and linguistic usage etc. Horizontally transmitted traits include aggressive behaviour, altruistic behaviour, morals, social values, conformity, dialect, technological innovations (or lack thereof), clothing fashions, consumer behaviour, stories and rhymes, songs, children's games. The dual mode of transmission is known as dual inheritance model; that is, genetic and cultural transmission; right or left handedness, intelligence, and cerebral dominance. Schönplflug proposes that the transmission mechanisms might occur in two stages; the first stage is awareness of the information to be transmitted and second is acceptance of the information. The two stages can only be separate if the individuals make the discriminate choice to accept or not to accept the information. The complication in this model according to Schönplflug is that there might be a strong spontaneous motivation to "teach" on the part of the transmitter as well as a strong

motivation on the part of the receiver to “learn” the information. Modes of transmission can be age-specific that is these have to do with biology and cognitive development, which are areas of study that this essay will not tackle.

Schönpflug’s take on Cultural Transmissions can explain how the noxious nature of the Social Torts change and adapt to affect successive generations of African Americans. However, Schönpflug talks about a strong willingness to learn as well as a strong willingness to teach those cultural components. So the problem is this why is the onus solely on the descendants of slaves in this rhetoric? One can understand that children, young as well as older people in all ethnic groups will transmit and accept values within their community and even outside the community. But what about the people who are not descendants of slaves, in the United States the majority being whites or Caucasian Americans, are they an amorphous mass that do not transmit their ancestors’ values i.e. “slaveholders’ values”. Slaveholders are human beings too, no punch lines intended here; they will transmit values to the subsequent generations of their own offspring and anyone coming into contact with them and accepting what they transmit. In a strange way, slaves did a strange and twisted way accepted their subordinate inferior status that is one of the reasons why the system flourished for so long. The abusers impose their values on the abused and by not denouncing or outwardly rebelling against the abusers they become tacit accomplices to their own ill treatment. There were rebellions in all slave-based societies (even in Mauritius, the historiography is very quiet on it though) with the exception of Haiti, none of them managed to overthrow the slaveholding regime. The abuser v. abused model is very similar to the abusive parent and abused child relationship, which is a toxic but mutually dependent bond. Abusive behaviour like any type of behaviour according to Schönpflug follows a horizontal transmission mode, based on this model slaveholders’ transmit their abusiveness through their children and their victims who subsequently can become abusers themselves and transmit this type of behaviour to their children and so forth. In the light of Hylton’s argument on Social Torts; transmission of abusive behaviour would indeed be a very toxic, contagious and rapidly mutating virus that can affect whole generations of people.

## RACE IN PHILOSOPHY AND PSYCHOLOGY

Philosophy of Race developed by Prof Charles W. Mills who in his collection of essays entitled “Blackness Visible” discusses the invisibility of blacks in American society. The issue of reparations is ultimately a question of how to guarantee that the civil rights of a few despite the opposition of a majority. The irony in American ‘exceptionalism’ is that it supports reparation bills for crimes perpetrated outside the United States and on foreign victims such as the Holocaust while it rejects a reparation bill for slavery, which was a crime perpetuated over centuries on American soil.<sup>39</sup>

Slavery has an ambiguous status in the constitution of the United States to say the least; slavery as a term is not even mentioned in the constitution<sup>40</sup> regardless of the fact that slaves was used as the yardstick for wealth and power.<sup>41</sup> The word Slave itself was completely omitted from the Constitution, the only time that the word appears is in the Thirteenth Amendment to the Constitution which actually abolishes the institution of Slavery. Liberal Individualism prohibits for instance the reference to group characteristics like race and that is why any positive discrimination such as Affirmative Action based on race, gender, caste of a said group to have access to the similar standards as the majority is in theory unconstitutional and has been repealed in some states such as California. The Slave is carefully avoided in the articles of the Constitution and instead slaves are referred to as “other persons”, “such persons” and “persons held to service or labor”.<sup>42</sup> With Justice Tanney’s opinion in mind; make no mistake, white society knew who “such persons” referred to.

The notion of private property as well as the liberal individualism enunciated by John Locke has deeply influenced the Founding Fathers and the drafting of the constitution. John Locke like his predecessor Thomas Hobbes agree that the state has to defend the rights of property of its citizen; Locke says for instance, that when a person uses his own labour to make something out of what was originally communal property, he lays claim to it.<sup>43</sup> Lockean thought like the other ‘contractarian’ philosophers does not include the black man as a citizen actually in John Locke’s reasoning the black slaves were not people at all, they were commodities similar to the Code Noir from Colbert in which the slaves were referred to as “*bien meuble*”.<sup>44</sup>

Taxation and representation in the legislature was tied to the presence of slaves which states that three fifth of the number of slaves in any state would count towards the number of congressmen, and three-fifth of them would count toward how much in taxes the state would have to pay when the congress passed a direct tax. Raising revenue or taxes in the wording of the constitution was restricted to the House of Representatives rather than the Senate, it is in effect a democratic measure because the power to levy taxes rests on the elected members of the lower house of the legislative rather than on the Senate. However the three-fifth law also meant that the slave owners could decide when to levy taxes, by how much and on whom and also the power to eliminate any more taxes on themselves. The power of taxation and slavery was in effect intertwined. The Congress had also the power to levy taxes on import, export and to regulate trade between the states and with other nations. The southern states grew mostly, tobacco, indigo, cotton, sugarcane and rice which were cash crops marketed abroad; this meant that the slave owners would have the power to make sure that their particular products would not be overridden by senators with abolitionists tendencies and/or from states where the economy did not depend exclusively on slave labour. Furthermore slave owning congressional representatives could prevent a rise in taxation on slave traffic by taxing the staple goods produced with slave labour such as tobacco, indigo and later cotton. The three-fifth rule ensured the hegemony of southern slave owners in the Congress and their influence on the election of the president.

Reparations for the damages incurred by slaves and their descendants comes after a formal apology but words are cheap and will not cure the evil caused by hundreds of years of institutionalized racism, lack of education which result in difficulty to compete with the rest of the nation in an increasingly technologically focused society.

Jenkins discusses the model proposed in 1972 by the Black psychologist Roderick Pugh in his book *Psychology and the Black experience* as a bit lacking in describing the complexity of the Black experience as Pugh mirrors the existing mechanistic oriented literature of the time. Pugh proposed that the attitude of Blacks before the revolution of the 1960s was an “adaptative inferiority” towards Whites. That African Americans have adopted this stance to minimize the anxiety provoked by the punishing and controlling behaviour of whites towards them. And to reduce punishment and abuse associated by being treated badly because of the colour of their skin, Blacks (according to Pugh) assumed a deferential demeanour in interracial situations. Sometimes they are overly deferential in a passive aggressive way that is best exemplified by a passage in the *Invisible Man* by Ralph Ellison (1952) in which an old black man on his deathbed says to his son. “I want you to overcome ‘em with yeses, undermine ‘em with grins, agree ‘em to death and destruction.”<sup>45</sup>

## ORAL HISTORY AND PSYCHOLOGY <sup>1</sup>

Ex-slaves had their own system of beliefs which is most of the time was shoved under the rugs because of an outdated law enacted in 1843, put in place to thwart popular religion which was labelled ‘witchcraft’. It is currently still active in Mauritius as evidenced by the people who were arrested and jailed on simple accusations of witchcraft.<sup>46</sup> Paraphernalia such as regular gaming cards (worse if it is Tarot cards), incense even those commonly used in Hindu temples (and sold everywhere), limes, coconut fruits, which are said to be used as offering in worship are deemed evidence for the prosecution and can lead to conviction.

The practice of traditional religions in Mauritius is a legacy of slavery; it is a prime example of human resilience, and pervasiveness of self-expression despite the prohibition of 1843.<sup>47</sup> The antiquated piece of legislation dating from Queen Victoria expressly prohibits any form of popular religion not recognized by an organized religion and such practice is deemed to be witchcraft and therefore considered evil.<sup>48</sup> The banning of Afro-Malagasy influenced cults has produced this atmosphere of secrecy surrounding the people who actively practice healing and spirits’ worship. A healer can be arrested and jailed because of her or his profession. The Afro-Malagasy cults practiced in Mauritius have been strongly influenced by South Indian deities; it can be argued that syncretism is, in fact, a response to the prohibition upon Afro-Malagasy forms of worship. The people disguise the prohibited object of worship for a more socially acceptable one; an example of

---

<sup>1</sup> Due to Mrs. Joyce Fortuné-Pope’s illness, she was not able to finalise this section. The Commission has incorporated Mrs. Fortuné’s paper from the Slave Trade Conference, as it contains important elements to be considered.

syncretism is the adoption of Saint Peter and other catholic saints in the Voodoo religion in Louisiana, United States. In Candomble practiced in Brazil, Yemanjá the goddess mother of the sea is identified to the Virgin Mother because she is also considered as a mother and is said to embody balance and temperance. Syncretism in Candomble, voodoo and also Santería in Cuba is a result of the prohibition put in place by Christian churches as is the case in Mauritius; Afro-Malagasy cults are still referred to as "*Fer Diab*", which means "Do Evil". However, the situation is very different in the neighboring island of Réunion, Afro-Malagasy cults are perfectly legal activities. There is also a rich literature and growing scholarship.

In modern democracies, freedom of worship or freedom of conscience is guaranteed under the constitution. It is regarded as a form of persecution to prohibit someone to practice the religion of her or his choice. Under the constitution of Mauritius freedom of conscience is clearly protected or at least it the religions endorsed by the state which are mostly the religion of the book. The discrepancy is, if the government protects freedom of conscience as an inalienable right of the individual, how can it be possible that the police, an agent of the same government, arrests citizens for exercising their constitutional right? Does the government have the right to impose on or choose the "type" of confession for the individual? In the wording of the 1843 law, divination, or any use of subtle craft is a form of superstition and not an expression of freedom of conscience. In the same light of that I would say that a practice such as Reiki or the horoscope are subtle crafts that can be used to ensnare people, how is it that there is a daily page on horoscopes in the newspapers and that Reiki is openly documented on National television. How are these practices from a sociological (and perhaps legal) point of view differ from traditional healing? Can a modern democracy choose to outlaw one subtle art and favor another based on its origin? On what basis can we define an "acceptable form of worship? And, most importantly, "acceptable" to whom? Some of the issues concerning religious beliefs, traditional healing, spirit cults and identity need to be discussed as part of cultural and race capital in the context of the reparations movement in Mauritius.

The possibility of reparative and restorative justice for people who have been arrested, prosecuted and their reputation sullied for practicing Afro-Malagasy cults must be considered. Restricting freedom of conscience for a group of people is not only a violation of their constitutional rights but also a form of institutionalized racial prejudice. The paradigm for restorative and reparative justice which may come after a truth and justice commission restores the victims to their initial situation before their suffering or loss. In the case of arrest for practicing Afro-Malagasy cults, the reparative and restorative efforts establish victims' identification and accounting of the loss and pain. In the case of Mauritius most of the data would either come from the police archives, the legal system as the victims were legally prosecuted and therefore produced legal records.

There is a trove of literature on the Candomblé, Voodoo, Santería and other expressions of African religion whether on the African continent or in African Diasporas around the world. Perfectly serious American and European professors would stare you in the eyes and discuss with you spirit possessions, ancestors' cults and spiritual healing. There is not a single case (that does not mean it does not exist) that I have come across which the accused were arrested as part of an assembly as worshipers or officiate; comparatively in Réunion Island, people worship together in "*Kabare*", there is always someone who preside over the meeting and there are followers in attendance. The Mauritian case is very different in the sense that recourse to the "witch doctor" would happen in times of desperate need when conventional western medicine or alternative mainstream medicine such as *Aryu Vedic* and Chinese medicine have failed to produce the desired result. As such the Mauritian traditional healer using African religion does not follow a set of tenets; there is no codified dogma either written or oral that she or he abides to. Mauritian popular religion is more diverse than the people who practice it; there are influences from Hinduism, Catholicism, Islam and even Buddhism from the Chinese lineage.

Although it is true that some people are duped by healers who reveal themselves to be crooks, I believe that a system of registration as a small business and taxation as it is the case in Réunion Island and the United States should be put in place to regulate the trade. I think that if this practice still exists even after slavery was abolished and the formal prohibition of 1843 could not get rid of it, it means that some people believe in it and that for them it really works.

## CONCLUSION

There is so much more to the Reparations discourse than “the money issue”, in Mauritius, the words “compensation” and “reparation” is interchangeable and it always refers to monetary compensation alone. The case of the Chagossians is one glaring example of a failed reparation effort; people received money as a palliative means, they did not receive any psychological, social or special attention to alleviate the problems they might suffer from being forcefully uprooted from their native island(s). As a consequence the Chagossians have not been integrated in Mauritian society and many chose emigration to England as opposed to accepting Mauritius as their motherland. Restorative justice should include restoring people to their former situation before the violation occurred and compensation as a form of reparation for the loss of earnings and business should be given. They also need a formal and written apology from the government for the prejudice they suffered.

The point is to help heal the descendants of victimizers as well as the victims; it should not be a state-sponsored vendetta or a lottery type system where people expect to reap “big bucks”. The approach should be humanitarian towards those who have suffered the most because of our historical legacy. The government should ensure that most basic of needs for instance clean water is available to all areas to every household especially those deemed underprivileged. There should be a type of Affirmative action sponsorship that provided mandatory and state sponsored education through Form Five as well as equal opportunity to compete for governmental and private employment. The Affirmative Action should ensure the employment of an equal amount of people of different backgrounds.

## NOTES

## INTRODUCTION

- <sup>1</sup> Hylton Keith N.; *The Jurisprudence of Slavery Reparations: Slavery and Tort law. Boston University Law Review*, Boston University, December 2004. Note that using Tort Law alone as a means of redressing the injuries incurred during slavery in the reparations suits is insufficient for converting the abuses suffered into claims for damages. Tort doctrine involves “concrete” injuries verifiable by means of forensics, psychiatric and or medical examination, which are to be carried out during the time before the expiration of the statute of limitation to file a claim for compensatory damages. The crimes of false imprisonment, kidnapping, battery, rape etc carry penalty under the law and using Tort doctrine; today any victim of these crimes might surely obtain compensatory damages for her/his injuries. However, in the case of slavery the perpetrators as well as the victims are long deceased and with them are buried all traces of malfeasance and under Federal Tort Law, there can be no crime because the defendants and the plaintiffs are no longer with us.
- <sup>2</sup> Jenkins, Adelbert H. *Psychology and African Americans, A Humanistic Approach*. New York University, 2nd edition, Allyn & Bacon, MA c 1995 Professor Jenkins points to the concerns and criticisms on the available research as being centred on two main points. First the accumulating literature on the individual Black person, the family and the community reflects the common practice of looking within the Black community and in Black people themselves for the sources of social advantages affecting their personal and collective destinies. As a result, the victims of individual and institutional racism in the white society are made responsible for their own plight. Where the role of the white society in creating problems for the Black minority is analyzed, the onus is eventually placed on Blacks for responding inadequately to the situations they face. The second distortion that Jenkins cites and attempts to correct in his book -is the tendency to describe the psychological functioning of the Black American in negative terms. This stems in part from the almost complete lack of interest in studying the effective and constructive aspects of the psychological functioning of Black Americans. The psychological literature has neglected almost totally a serious consideration of the competent and positive aspects of their personalities, almost as if these components of their make-ups did not exist. Instead, the emphasis is almost always on their personal deficiencies- their seemingly endless failings and inability to cope with life. Even where the data suggests strengths and capabilities, these traits are often interpreted as defences to cover up the deficits and insecurities that are “really there underneath.” Blacks seem to be in a no-win position. Whatever their assessment of it is in the literature usually turn out to be negative. Page xvii Jenkins talks about some Black psychologists who advocate “scrapping away the entire body of theory and research on Blacks and developing entirely new approaches and new sources on Blacks to replace it.” He talks of more promising approaches which might lead to broadening our understanding of the psychological functioning of Black Americans. These more promising approaches look at the human individual from a “humanistic” perspective. They posit a distinctly different image of the human being from that being defined by “mechanistic” conceptions. In the mechanistic image-still the reigning one in American psychology- the human individual is portrayed as a passive being whose responses are primarily determined either by environmental factors or by internal psychological and constitutional states. Historically the behaviourist position can be most clearly identified with the mechanistic tradition. In this approach, behaviour is seen as a function of innate or learned drives or as a function of controlling environmental “contingencies” which are circumstances in the environment that reward or punish an event thereby determines its likelihood of occurrence.

## REPARATIONS MOVEMENT IN THE U.S- THE JAPANESE AMERICANS WORLD WAR II INTERNEES

- <sup>10</sup> Wakatsuki Houston, Jeanne and Houston, James D. *Farewell to Manzanar*. New York: Harper Perennial, 1973. The Autobiography of Jeanne Toyo Wakatsuki Houston recounts her life in the internment camp

Manzanar situated in the Owens Valley in eastern California. Jeanne T. Wakatsuki Houston is a second generation also known as the Nikkei, she was born in 1934 in Inglewood, Los Angeles. Jeanne recounts the story of her parents who tried as hard as they could to keep their dignity and the family intact in the internment camp. During their long incarceration, Jeanne's mother showed remarkable strength and hope while her father was more vulnerable; he became listless, irritable and abusive. And after their release the family resettled in Long Beach, California because Jeanne's father, an off-shore fisherman, could not recover his fishing boat and their house in Santa Monica. He sank into a deep depression fuelled by alcoholism and he became physically and mentally abusive. Jeanne gives us a candid but touching account of her family and her personal suffering in a post-war society.

- 22 Ibid, Callie House born Callie Guy was born in 1861 in Rutherford county near Nashville, Tennessee, Callie was only a child when slavery was abolished in 1865 and many owners in Tennessee refused to let slave children go with their parents; keeping them as apprentices without parental authorization. 8 Berlin, Ira, Rowland, Leslie (eds). *Families and Freedom. A Documentary History of African American Kinship in the Civil War Era*. New York; New Press, 1997.
- 23 Berry, Mary Frances. *My face is Black Is True. Callie House and the Struggle for Ex-Slave Reparations*. Vintage Books, 2006. Harrison J. Barrett, the assistant to the Assistant District Attorney General James Tyner for the Post Office Department, Washington D.C but called himself Acting Assistant District Attorney General because Tyner was only two years to retirement and the latter was also his uncle by marriage. Barrett sent a notice of fraud order in September 1899 to Callie House on the basis that she and Isaiah Dickerson have used the Association's money for themselves and to hire their own family members. This would have been so far from the truth for Callie House as her children were very young and still in school. The oldest son worked was fifteen at the time worked in a store and that was a well-documented fact by the District Attorney's office which had all of the prominent members followed and their families

investigated. Callie House was particularly stung by the allegation of fraud and misappropriation of funds; she wrote a very stern letter to Barrett explaining her rights as an American and she made apologies for her work. She provided a detailed explanation of the movement's mission and actions. *"We tell them we don't know whether they will ever get anything or not but there is something due them and if they are willing to risk their money in defraying the expenses of getting up the petition to Congress they are at liberty to do so."* She explained to Barrett: *"First, we are organizing ourselves together as a race of people who feels that they have been wronged. They had a perfect right as ex-slaves to gather and organize our race together to petition the government for a compensation to alleviate our old decrepit men and women who are bent up with rheumatism from the exposure they undergone (underwent) in the dark days of slavery. I am an American born woman and was born in the proud old state of Tennessee and I am considered a law abiding citizen of that state anyone that work honestly and earnestly for the up building of their own race would like for it to be recognize that way let it be a white man or whit woman are a black man or a black woman."* She went on to denounce the accusation of money fraud : *"My face is black is true but it's not my fault but I love my name and my honesty in dealing with my fellow man....My whole soul and body are for this slave movement and are (am) willing to sacrifices (sacrifice) for it."* Page 128.

<sup>25</sup> *Ibid.*

<sup>26</sup> Dred Scott, Plaintiff in Error, v. John F. A. Sanford. Supreme Court of the United States 60 U.S 393; 15 L. Ed. 691; 1856 U.S.Lexis 472; 19 How 393, March 5 1857, Decided December 1856 Term page 13 of printed document. This case started in 1854 after Dred Scott a slave belonging to Mr. John Sandford sued the latter for striking his wife Harriet, daughter Eliza and Lizzie. His defence was that he Dred Scott was a free man since he was brought to live in the free state of Illinois for many years with his former owner Dr. John Emerson (who was Sandford's brother-in-Law) where he met and married his wife Harriet and their eldest daughter Lizzie was born on the river Mississippi between state line in the free territory. He claimed that since he lived in the free territory then brought back to Missouri where slavery was legal; he was no longer a slave because of his extended stay as a free person.

<sup>27</sup> Congressman John Conyers from Michigan introduced the H.R 40 Bill in January of 1989 and has reintroduced it every year without fail. The number 40 from the bill is a symbol of „the forty acres and a mule’ that the United States government promised to the freed slaves, [http://conyers.house.gov/index.cfm?fuseaction=issues.home&issues\\_id=06007167-19b9-b4b1-125c-df3de5ec97f8](http://conyers.house.gov/index.cfm?fuseaction=issues.home&issues_id=06007167-19b9-b4b1-125c-df3de5ec97f8) The H.R 40 bill was very much influenced by the Reparation movement for Japanese internment victims of World War II, in fact many of the supporters and participants in the Reparations movement for slavery came from the Japanese reparations team.

<sup>30</sup> Excerpt from the Slave Era Disclosure Ordinance- San Francisco Administrative Code Chapter 12Y. Sec. 12y.2 Definitions As used in this chapter, the following capitalized terms shall have the following meanings:

(e) "Participated in the Slave Trade" shall mean: (1) issued Slavery insurance policies, including but not limited to policies issued to slaveholders for damage to or death of persons subjected to slavery, and policies issued to insure business transactions and operations related to the traffic in persons subjected to slavery; (2) purchased, sold or held Persons subjected to slavery; (3) provided loans to facilitate the purchase, sale, transport, or enslavement of persons subjected to slavery; (4) used Persons subjected to slavery as collateral for insurance policies, loans or other transactions; (5) facilitates the traffic in Persons Subjected to Slavery by transporting such persons by boat or rail; or (vi) provided any other services to aid and abet the traffic in persons subjected to slavery.

Subsection entitled:

(f) Goes on to describe the meaning of "Person Subjected to Slavery" under the Slavery Disclosure Law.

(g) "Predecessor Company" shall mean an entity whose ownership, title and interest, including all rights, benefits, duties and liabilities, were acquired in an uninterrupted chain of succession by the Contractor.

(h) "Profits from the Slave Trade" shall mean any company advantage or financial benefit derived from the labour of Persons Subjected to Slavery or from Participation in the Slave Trade.

<sup>32</sup> Henry, Charles P. *Long Overdue- the Politics of Racial Reparations*. New York University Press, New York, 2007. Page 83. By June 1923, more than one hundred legal suits had been filed, but only two went to trial. One case did not reach the jury. But the case of William Redfearn, A Native American who lost a theatre and a hotel in Greenwood, did go all the way to the Oklahoma Supreme Court. Redfearn had sued both the

city and his insurance company, which had refused to pay his claim based on a riot exclusion clause in his policy. The suit against the city was dropped largely on ground of the city's immunity from liability, but the insurance case hinged on whether the loss was caused by police or the special deputies. Although the court's decision acknowledged the role of the deputies in the destruction, it questioned whether the men wearing "police badges or sheriff's badges were in fact such officers or acting in an official capacity". Thus, Redfearn's claim was denied.

- <sup>33</sup> Teelock, Vijaya. *Mauritian History-From Its Beginning To Modern Times*. Mahatma Gandhi Institute, 2001. Adrien D'Epinay was successful in "obtaining £2,112,632 in compensation for planters in the loss of slaves, several thousand of whom had been illegally introduced. Compensation payments went largely to the big planters among the slave-owners. Though forming less than 5% to the slave-owning population, they received over 20% of the payments. Much of this was re-invested in the sugar estates and the number of sugar mills rose from 167 to 203 between 1833 and 1838. The Mauritius Commercial Bank was also founded partly with the sums received from compensation."
- <sup>34</sup> *Ibid.* Page 170. Farquhar was concerned about upsetting the French inhabitants: *My opinion is, that maintenance of the British authority in the colony will materially depend on the conciliation of the established inhabitants of the island, on the degree in which the terms of the capitulation may consult their personal interests, as connected with the security of their property, with the advantageous dispersal of the produce of the island and with their safety against the insurrection of their slaves.*
- According to Teelock, Farquhar forged a policy of conciliation with the French colonists; he employed the "sons of principal landholders" to hold public office, maintained the traditional French administrative institutions such as the division of districts into the French division known as "quartiers". Farquhar reintroduced the posts of *Commandant de la Milice*, *Commissaire Civil* as well as the institution known as the *Commune*.

- <sup>39</sup> Henry, Charles P. *Long Overdue-The Politics of Racial Reparations*. New York University Press, New York, 2007. Page 16 "The Liberal individualism that America's founding fathers inherited from John Locke prohibits direct legislative references to group characteristics like race. The U.S. Constitution does not contain the words Black and White, and the infamous three-fifths compromise, created during the Constitutional Convention to count five slaves as three whites has more to do with Whites and White regional representation than it does with the character of slaves. Between 1836 and 1844, Congress formally adopted gag rules restricting the receipt of petitions opposing slavery and institutes a ban against mailing abolitionist literature to the South and about 90 percent of legislative acts dealing with race fail to include the term race". Charles P. Henry postulates that the three-fifth compromise meant that five Black slaves were considered to be the equivalent to three white adult males but that is not what the Third clause of Article 1, section 2 enunciates; according to David Waldstreicher's analysis of this particular clause, the three-fifth rule was actually measure by which White society used to quantitatively gauge the wealth and legislative representation in the state. It does not mean that a Black slave was equated to three-fifth of a white person. At the time the philosophical discussion on the humanity, personhood and the idea of slaves possessing a soul was in its infancy and to think that a slave could be equated to three-fifth of a white adult male would be close to attributing a soul, personhood and humanity (even if it is three-fifth of it) to a creature that convention does not even acknowledge its very existence.
- <sup>40</sup> Waldstreicher, David. *Slavery's Constitution - From Revolution to Ratification*. Hill and Wang, New York, 2009, page 3. *The Constitution never mentions slavery. The word does not appear. And yet slavery is all over the document. Of its eighty four clauses, six are directly concerned with slaves and their owners. Five others had implication for slavery that were considered and debated by the delegates to the 1787 Constitutional Convention and the citizens of the states during ratification. This is many more words, with greater implications for slavery, than contained in the Articles of confederation, the previous, notoriously weak national charter drafted in 1776 and passed eventually by the Continental Congress. All but one of these clauses protects slavery; only one points towards a possible future power by which the institution might be ended. In growing their government, the farmers and their constituents creates fundamental laws that sustained human bondage.*
- <sup>41</sup> *Ibid.*, page 4 "Representatives elected by the people every two years and a senate elected by the legislatures of the states. Before congressional powers are enumerated, or the composition of the Senate even described, however, readers of the new Constitution learned that the number of representatives in

*the House would be tied exactly to the amount of direct taxes that the national government could requisition from the states- an especially controversial issue of the Confederation era, which stretched from 1776 to 1787. Both taxation and representation would be tied to population, but in a very particular way. "Representatives and direct taxes", begins the third clause of Article 1, section 2, "Shall be apportioned among the several states which may be included within this Union, according to their Numbers, which shall be determined by adding to the whole number of free persons, including those bound to Service for a Term of Years, and excluding Indians not taxed, three fifths of all other Persons."*

- <sup>42</sup> Finkelman, Paul (ed.). *Slavery and the Law*. Madison House, Madison WI c1997, page 17 *The awful word does not appear in the constitution until the Thirteenth Amendment, which abolished the institution. Nevertheless the main body of the document is littered with references to slaves as "other persons", "such persons, and "persons held to service or labour". See in the appended section at the end of the document; the Third Clause, Article 1, section 2 of the United States Constitution.*
- <sup>43</sup> Kelly, Eugene. "The basics of Western Philosophy". Greenwood Press, Westport, CT, c 2004, page 194. *Property Rights: Both Hobbes and Locke agree that one of the functions of government is to defend the rights of property of its citizens. The notion of property rights naturally requires some analysis and defense. What if a person did not acquire his property legitimately? What if a person uses his property to harm other persons, for example, by using his ownership of a factory to employ workers at a very low salary? What theoretically entitles a person the use of his property?*
- <sup>44</sup> *Bien meuble* literally means immovable property, a piece of property that one can in theory dispose of however he pleases. The property is ambulatory very much like a beast of burden, it can be used to till the earth, or produce goods. It can also breed thus increasing the owner's initial investment.

**Audiovisual material**

**Title:** Slave Ship: Discovery Education, United States, c2007.

**Description:** Full screen edition, 52 min DVD, close-captioned.

**Summary:** Sail back into the history of the Trans-Atlantic slave-trade to uncover surprising and shocking facts about this tumultuous era.

**Browne, Katrina C.:** Traces of the Trade: A story from the Deep North. Katrina C. Browne: Writer/Director/Producer. MS, PBS films, 2008.

**Summary:** Katrina Browne whose family the De Wolf family held the biggest slave trading business in United States' history. Ms. Browne takes us on an astounding, roller coaster ride through time yet one feels that there is a great desire for healing and mending of the broken lives that her ancestors' business created.

**William St Clair's** book: "The door of No return" is really helpful in understanding the intricacies of the trade, the various slave trading ports and the economics of the trade itself. Browne's relative Tom De Wolf's book: Inheriting the Trade, also brings an interesting (albeit scholarly and a little sterile) aspect to the experience of confronting such a heavy and very embarrassing legacy.

**Gates, Henry Louis J.R, Grant, William R., Kunhardt Peter W.** (Executive Producers): African American Lives (4 in the series). A Film by Kunhardt Productions and The Thirteen and PBS Television. New York, c2006.

1 Sweet, Jesse (Director and Producer): Listening to our Past.

2 Farrell, Leslie D (Director and Producer): Searching Our Names

3 Asako Gladsjo, Leslie (Director and Producer): The Promise of Freedom.

4 Judd, Graham (Director and Producer): Beyond The Middle Passage

**Summary:** Eminent Harvard professor Henry Louis Gates J.R uses revolutionary breakthroughs in genealogical research and DNA analysis to take eight prominent African Americans on once-unimaginable journeys into their past tracing their family sagas down through U.S history and even back to Africa. On this epic adventure, Gates is joined by pioneering neurosurgeon Dr. Ben Carson, Actress Whoopi Goldberg, Bishop T.D Jakes. Astronaut Mae Jemison, Musician/producer Quincy Jones, Sociologist Dr. Sara Lawrence-Lightfoot, Comedian/actor Chris Tucker and TV pioneer/philanthropist Oprah Winfrey.

# PROPOSAL FOR AN INTERCONTINENTAL MUSEUM OF SLAVERY

BENIGNA ZIMBA

VIJAYA TEELock

## I. HISTORY, GEOGRAPHY, CONTEXTUALIZATION AND JUSTIFICATION

The idea for a Slavery Museum originated as early as 2000 during discussions for the Origins Project in Mauritius and during the Conference of Slave Routes and Oral Tradition in Southeastern Africa in 2004.

In both Mozambique and Mauritius, despite all efforts, for various reasons, no museum ever saw the light of day.

In 2009 the Truth and Justice Commission began its activities. One of the key components was research towards the memorialisation of the slave trade, slavery and indentured immigration. The idea was thus re-launched and discussions to finalise this project resumed in 2010.

In April 2011, the Truth and Justice Commission organized an International Conference on the Slave Trade. This presented the ideal opportunity and appropriate forum to collect the views of many persons from all walks of life on the subject of slavery, the slave trade and representations and allowed those who conceived this project to update the project and infuse it with a new dynamism.

A few countries in South Eastern Africa already house slavery museums: the Rabai Museum in Mombasa, Kenya and the Museu da Escravatura in Luanda, Angola are some examples.

Our research through the various projects undertaken since 2000 (Origins Project, Slave Routes Project, Truth and Justice Commission, etc) has concluded that there is a need for an intercontinental museum linking the countries such as Mozambique, Mauritius and Madagascar, as they all formed part of the slave trade network in the 18<sup>th</sup> and 19<sup>th</sup> centuries.

They are also the countries that have played a key role in the Indian Ocean Slave trade. Conservative estimates are that Madagascar exported over 125,325 slaves and Eastern Africa, over 180,000 slaves. France traded the bulk of these slaves (over 335,000) followed by the other European countries, Portugal, Holland and England approximately between 10,000 and 60,000 each.

Mozambique and Mauritius are, therefore, the two most appropriate places to host the Intercontinental Slavery Museum, and ideal places to give more visibility to the phenomenon of slavery and slave traffic in the Indian Ocean under colonial rule (Portuguese, French, British, Dutch).

Furthermore, Mauritius is the first country in Africa and the world to have a Truth and Justice Commission investigating the history of slavery and its consequences and to accept the principle that reparations are required.

Mauritius has currently also all the required conditions (moral, rationale, logistics, infrastructural and official government support) to be the first to house the first intercontinental museum in Africa.

The Intercontinental Slavery Museum endeavors to be primarily, an institution directed towards cultural preservation and studying the phenomenon of slavery and slave trade in the Indian Ocean.

In addition, various factors explain the main function, usefulness and historical value of this institution:

- (i) the *Slavery Museum* aims to be an institution to promote cultural exchange, the culture of peace and union among peoples of several continents involved in this process;
- (ii) this institution will strive to develop its enormous educational potential to promote curricular development, scientific research, as well as the production of educational and pedagogical materials;
- (iii) the *Slavery Museum* will constitute a driving factor for developing cultural tourism and the construction of economic and social infrastructures;
- (iv) from the scientific point of view, the Project seeks to stimulate curricula development and the production of pedagogical material related to this topic, a process which is currently in course in most of the African continent.

## II. RELEVANCE AND BENEFICIARIES OF THE INTERCONTINENTAL SLAVERY MUSEUM

The Intercontinental Slavery Museum will highlight the deep transformations that this tragedy caused at economic, social, political, cultural, and ideological levels in all continents, with particular emphasis to Africa and Africans. It will also create opportunities to conduct in-depth and extensive studies of the phenomenon of “slavery and slave trade” on a regional scale and global level. It will also promote investigations and studies en route for the thematic “slavery and slave trade” in Mauritius, Mozambique and Madagascar, in the region, and in the context of the former colonial empires.

Beneficiaries of the Slavery Museum will be:

- (i) students of all educational levels;
- (ii) educational institutions;
- (iii) communities that are part of the slave routes itinerary;
- (iv) researchers, teachers and academicians;
- (v) governmental institutions such as the ministry of tourism;
- (vi) civil society
- (vii) Countries in the region directly and indirectly affected by the Slave trade and slavery will be able to gain from increased understanding and knowledge of this process and how it continues to affect our societies today.
- (viii) International visitors and tourists

## III. COMPONENTS, STRATEGY, AND METHODS OF IMPLEMENTING THE PROJECT

The Project will cover six components including the Scientific, Educational, and Cultural constituents, and endeavors among other aspects:

- (i) to give logical continuity to the first phase of the Slave Routes Project in Mozambique and Origins Project in Mauritius. Both projects included book publications (*'History, Memory, Identity'* and *'Slave Routes and Oral Tradition in Southeastern Africa'*, audiovisuals and other materials; and
- (ii) to be an inclusive institution in time and space, hence the reason and justification for the use of the term “intercontinental museum.”

## IV. OBJECTIVES OF THE SLAVERY MUSEUM

Considering the role of future generations in social and cultural development of the continent, the main goal of this Project, is to rescue the history of slavery and the slave traffic in southeastern Africa. In this context, the gathering, collection and preservation of oral traditions; as well as the promotion of cultural diversity and cultural tourism, and of a whole range of activities interconnected to this phenomenon, are crucial to this Project.

## V. IMPLEMENTATION

Concerning implementation, we recommend that the Project be initiated and supervised by the Prime Minister’s Office in collaboration with related institutions.

## VI. SITE OF MUSEUM

The proposers of this Project recommend that the Museum be located in the capital city Port Louis. Apart from giving the history of slavery its due importance it is also appropriate that it should be placed in a location that is reminiscent of slavery and related to slavery. Furthermore as the historic parts of the city are frequently visited by tourists and Mauritians alike, this will ensure financial sustainability for the Museum once it is opened.

The site par excellence is the complex on the eastern side of Port Louis comprised of historical buildings all found on State land and currently neglected and found in the Buffer Zone of the Aapravasi Ghat World Heritage Site. The Military Hospital complex will provide sufficient space for this and especially as one wing will house the National Art Gallery, a project also to be initiated by the Prime Minister's Office. This Hospital was built by slaves and indeed housed sick slaves on one floor. It is surrounded by other buildings of direct relation to slavery: the Post Office on which site existed the *Bagne* for Maroon slaves, the Granary where port workers (descendants of slaves) loaded and unloaded rice, the Customs House where slaves and Liberated Africans passed through when they first arrived in Mauritius in the 18<sup>th</sup> and 19<sup>th</sup> centuries, amongst others. Ratsitanina, the Malagasy Prince, exiled to and executed in Mauritius was imprisoned in the *Bagne*.

## INTERCONTINENTAL SLAVERY MUSEUM

## 7. BUDGET (US \$) ESTIMATE BY OBJECTIVE

(Time-frame: 18 months from start date)

Dated 26 May 2011

CATEGORY	US\$
<i>Objective 1: To carry out preparatory activities for the establishment of the Intercontinental Slavery Museum</i>	
Consultancy fees: (60,000=2,500x12mtsx2)	101,700
Airfare: every quarter=1000x4x1 for Mozambican consultant;1000x2x1 for Mauritian) trips and accomodation/per diem: Mozambican consultant each visit: 15 days 350x15x4=21,000; for Mauritian consultant 350x2x21=14,700; for Preparatory Phase	
Field research in Madagascar, Mozambique, Mauritius and language courses	25,000
Visits to the following countries: Madagascar, Mozambique, Mauritius	15,000
Training workshop in Museology, conservation and others	10,000
Equipment to supply the Slavery Museum's preliminary offices in Maputo and Mauritius	20,000
<b><i>SUB-TOTAL OBJECTIVE 1</i></b>	<b>161,700</b>
<i>Objective 2: To establish and institutionalize the Intercontinental Slavery Museum</i>	
Survey studies that include topographic analyses	2,000
Architectural and engineering design, including air conditioning and water system	70,000
Preparing tender process	8,000
Restoration works	600,000
Supervision of works	30,000
Training of museum staff	50,000
Equipment of the museum with office and museum supplies	250,000
<b><i>SUB-TOTAL OBJECTIVE 2</i></b>	<b>1,010,000</b>
<i>Objective 3: To stimulate research on the slave routes in South-West Indian Ocean and to contribute to the gradual revision of school manuals and curricula at all educational levels of schools in regions concerned</i>	
Revision of manuals and programs, at primary, secondary and university levels;	75,000
Scientific trips	60,000

Production of maps	50,000
Development of partnerships with countries and institutions related to slavery	30,000
<i>SUB-TOTAL OBJECTIVE 3</i>	215,000
<i>Objective 4: To preserve written documentation on the slave routes in South-West Indian Ocean, and to catalogue tangible heritage</i>	
Creation of a Website, and compilation of physical and digital archive-files	60,000
Inventory of Tangible Heritage	20,000
Lectures and international conferences	40,000
Production of informative material	110,000
<i>SUB-TOTAL OBJECTIVE 4</i>	230,000
<i>Objective 5: To organize joint activities with institutions to promote cultural programs related to slavery and slave trade</i>	
Cultural festival	100,000
Permanent Exhibition	100,000
Itinerant Exhibition	200,000
<i>SUB-TOTAL OBJECTIVE 5</i>	400,000
GRAND TOTAL	2,016,700.00
	Two million sixteen thousand seven hundred US\$

# SEARCHING FOR OUR ORIGINS

## INTRODUCTION

*Vijayalakshmi Teelock, Vice Chairperson*

The aim of this section devoted to descendants of Indian immigrants aims to highlight, as for slave populations the necessity of every family knowing and understanding his or her family origins. In the very delicate fabric that Mauritian society is made up of and being a newly emerging society, it has become abundantly clear that this type of knowledge makes Mauritians feel more 'Mauritian' and at the same time distinguished Mauritians from other nationalities. There are inherent difficulties however in tracing one's history: documents since the French and British period have not been well kept and even today numerous problems face the family historian.

These family histories and life histories are compiled by a group of young Mauritians trained in history who were the given the task of finding and confronting their own family's past. It has not only proved to be a rich personal experience for them but has also provided the Commission with the justification for proposing a more vigorous campaign to collect all available documentary sources about Mauritians and make it accessible to the public. In the course of the research, the conservative approach adopted by some institutions towards releasing immigrant data must be unequivocally condemned. Judging by the numerous correspondence and discussions after the controversy concerning access of public Immigration archives currently housed at the Mahatma Gandhi Institute, it is clear that not all Mauritians feel the need to hide their truth about their family or caste origins and indeed they welcome openness and progressive attitudes. It is recommended that the MGI and all those other institutions and individuals rethink this policy of blocking public access to this section of the National Archives. A public campaign to explain the nature of the sources and why discrepancies and errors exist in the sources needs to accompany this open policy, as is the practice in other National Archives found overseas.

The *metisage* in terms of not only ethnic groups and but among Indian immigrants of various linguistic, regional and caste backgrounds leads one also to recommend that all copies of genealogical and family data be regrouped in one institution to make the task of reconstructing genealogies and family histories easier for the Mauritian population. Many Mauritians are descended from Indian, African and European origins and this currently means that a 'multi-racial' Mauritian has to visit no less than 5 different institutions over many years to compile his/her family history. In the digital age this is an unnecessary burden to place on Mauritians.

# THE STORY OF THE MUNISAMI FAMILY

PAMELA SOOBEN  
*Research Assistant, TJC*

**“THEY ARE NEVER REALLY GONE IF THEY ARE REMEMBERED.” Russian Proverb**

The very purpose of this research was to allow this researcher to take a personal look into her family history. She traced her family history because for her, this process brings her ancestors back to life. They were once real people, alive with all the joys and pains of daily life. What she gained from researching her family history is a greater knowledge of the lives of the ones who came before her. Indeed, this research process was a challenge that made her dig through birth, death and marriage certificates, photographs and oral histories. She found that a whole nuclear family had come to Mauritius: The PANDIAN Family.

Like most Indian Immigrants who left India in the nineteenth century in search for a better life, PANDIAN was no exception. PANDIAN, son of SHANMUKHUM and KALLIAMMA, was born in Trichinopoly<sup>1</sup>, India in 1848. His family ran a restaurant. According to oral sources, they were well off and they were descendants of King Pandian.<sup>2</sup> As one can imagine, this to date is quite difficult for me to verify.

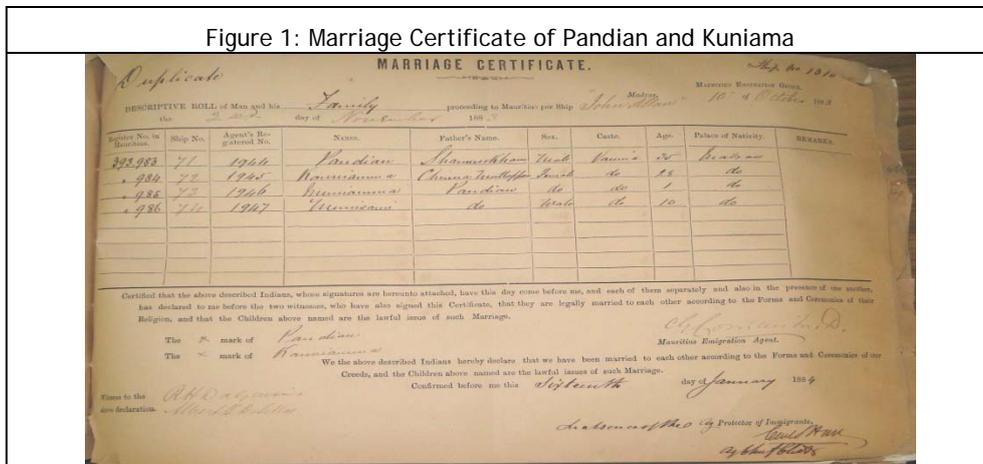

PANDIAN did not want to work in the restaurant. Being adventurous by nature, he always wanted to know how life was outside India. PANDIAN was married to KUNNIAMMA and they had two children MUNISAMI and MUNIAMMA.

PANDIAN’s wife, KUNNIAMMA was born in 1855. She was the daughter of CHINNAMUTTAPPAN and PALIATHA of Tamil Nadu. She gave birth to MUNISAMI in 1873 and to MUNIAMMA in 1882. Along with her husband, 10 year-old Munisami and 1-year-old Muniamma, she left their village and came to Madras Depot. They were given each an immigrant number (Table 1).

Table 1 : Pandian family’s names and immigrant numbers	
Name of Immigrant	Immigrant Number
PANDIAN	393983
KANNIAMMA	393984
MUNIAMMA	393985
MUNISAMI	393986

PANDIAN and KUNNIAMMA were legally married at the depot on 16<sup>th</sup> October 1883, as seen in the marriage certificate (fig. 1).

Figure 1: Marriage Certificate of Pandian and Kuniamma

After a voyage of approximately two months, the PANDIAN in Port Louis Family arrived in Mauritius on board *John Allan* on 29<sup>th</sup> November 1883. They landed at the depot on 12<sup>th</sup> January 1883. On 16<sup>th</sup> January 1884, the whole family was presented before the Protector of Immigrants to confirm the marital status of PANDIAN and KUNNIAMMA. After three days, they were distributed on Gros Bois Sugar Estate where the employer was Mr. J Currie. It seems from the records of the Protector of Immigrants that both PANDIAN and KANNIAMMA were from the Vannia Caste. This caste was mostly *ouvriers et petits propriétaires agricoles*<sup>3</sup> PANDIAN was 1m52cm and had a scar on his right elbow. KANNIAMMA was 1m54cm tall and had a scar on her forehead. Funnily, KANNIAMMA was taller than her husband; so physical appearance was not important for her.

#### PANDIAN (Tree 1) (See Appendix on CD)

Pandian worked as an indentured labourer for five years. He passed away on 21<sup>st</sup> July 1889 at seven o'clock in the morning on Gros Bois Sugar Estate. His death certificate was issued in Mare D'Albert Civil Office. (See Death Certificate in Appendix 1). However there are errors on this certificate as he did not have his ticket. It may have been lost or was in the possession of the employer. According to the information available on the death certificate, Pandian was a 45 year-old single Hindu immigrant. However, if we take a closer look at the information available in the Registers at the Archives, one would see that at the time of his death, PANDIAN was a 40-year old married Tamil immigrant.

#### KANNIAMMA

KANNIAMMA stayed twenty years in Mauritius. Fifteen years after the death of PANDIAN, KANNIAMMA left Gros Bois Sugar Estate and went back to India on the 4<sup>th</sup> of June 1904 on board the *Itria* (Appendix 2). Both MUNISAMI and MUNIAMMA were left behind in Mauritius.

#### MUNIAMMA

MUNIAMMA has not left us today with much information about herself. She was only one-year old when she landed in Mauritius. But at the age of 8, she was already registered as an Old Immigrant (Appendix 3) perhaps, because her mother had re-indentured. She died at the age of 38 on Gros Bois Sugar Estate. From her death certificate issued in the District of Grand Port (Death Certificate in Appendix 4), it seems she was still single, without any profession and living on Gros Bois Estate. Family oral sources are also silent about her and no one in the family today knew that PANDIAN had a daughter. Further research is therefore required to trace the family of MUNIAMMA in the region of Gros Bois.

#### MUNISAMI (Tree 2) (See Appendix on CD)

MUNISAMI is the protagonist in this family History. According to oral sources, MUNISAMI lived with his parents on Gros Bois Sugar Estate. But some members of the family stated that he had beaten a man called Gunga, while others stated that he murdered the man and therefore ran away from the District of Grand Port to hide and start a new life in the District of Savanne. How far is this information reliable? Further searches, here too, are required in perhaps in Police Records. We know for a fact, however, that MUNISAMI came to settle in Bel Air St. Felix Sugar Estate. He married religiously, RUNGAMAH KARUPPAUNEN. They had 3 children: a son, SINSAMY MUNISAMI (the researcher's grand-father), born in 1913 (Appendix 5) and 2 daughters: MOONEEAMAH MUNISAMI, born in 1917 (Appendix 6) and GOINDAMAH PANDIAN born around the 1920.

RUNGAMAH was the daughter of Karuppaunen No.396893 of St. Felix Sugar Estate and Goindamah of Moka village. She was born on 22 December 1895 (Appendix 7) in the District of Moka because her mother's delivery took place there. No one, however, knew how the parents of RUNGAMAH met and got married as the two estates are quite far away: Karuppaunen was a labourer on Bel Air Saint-Felix Sugar Estate in the South of Mauritius while Goindamah resided in Moka in the centre of Mauritius. MUNISAMI died in 1932 (Appendix 8) and RUNGAMAH in 1942 (Appendix 9).

A question was left pending is why did one of MUNISAMI'S daughter named after her grandfather, PANDIAN? GOINDAMAH PANDIAN and MOONEEAMAH MUNISAMI

GOINDAMAH PANDIAN was married to VEERAYEN SOOBHOO NAIDOO. She had 3 children SIVEN, DESSA and NILA. She unfortunately passed away, and her husband married her elder sister, MOONEEAMAH. Nila passed away in 2010 and Siven and Desa are still alive and live in the small village of Batimarais in the Southern part of Mauritius.

#### SINSAMY MUNISAMI (Tree 3) (See Appendix on CD)

The researcher's grandfather was born on 24 August 1913 on St. Felix Sugar Estate (Appendix 10). He never went to school. He worked as labourer and *sirdar* in Bel Air Saint-Felix Sugar Estate. He was only 19 years old when he lost his father. He lived in Saint-Felix Camp with his mother and two unmarried sisters. He had to work very hard to get his sisters married. He was also a priest in the *kovil* found in the camp. His son (this researcher's father) would often help him every Friday and during special prayers like the Cavadee<sup>4</sup>, Govinden<sup>5</sup> or Thimeedee.<sup>6</sup>

In 1938, he married PETCHAYE MANIKUM, the daughter of MARDAYMOOTOO MANIKUM and THUNGE born on 28 July 1920 (Appendix 11). It was an arranged marriage. It was only in the 1973 that they legally got married and their children were legitimized (Certificate 2). She gave birth to their first child, a daughter, and after a few years, they had 3 more daughters. According to the researcher's aunts, their parents were very religious. On one occasion, they were advised by elder relatives to fast for 24 hours on *Ekadasi* if they wanted a son in the family. Coincidentally, Petchaye did bear a son, MARDAY and another, ARNASALON (the researcher's father) in 1950. This was followed by a daughter in 1957.

When the first son, Marday, was married to DEVAGEE, they had four daughters. They followed the advice of grandfather and Devagee gave birth to a son the following year. The researcher's grandfather was a priest and was very superstitious. He tried to inculcate his beliefs in his children. SINSAMY died at the age of 78 in Surinam (Appendix 12).

Figure 2: Certificate

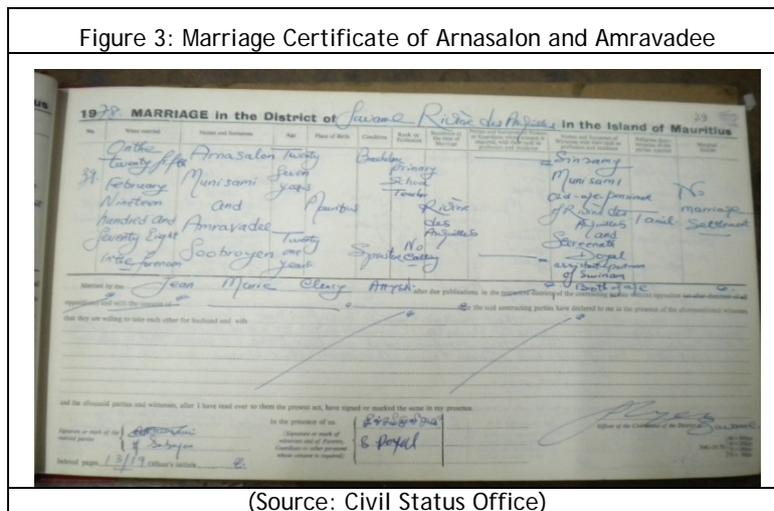

(Source: Civil Status Office)

As most indentured descendants, they faced many miseries. PETCHAYE, her son Marday and her daughters had to work as labourers in the sugarcane fields. ARNASALON, on the other hand, went to school and was the first student to pass his School Certificate Examinations in the whole St. Felix Camp. According to oral sources, the rations were insufficient and due to financial constraints, they had to cook *Ponga Banane*<sup>7</sup> with salted fish and sometimes, they would even make *chayote* skin or goat skin curry. PETCHAYE struggled a lot as a wife, mother and a labourer. She died at the age of 68 in Rivière des Anguilles (Appendix 13).

#### ARNASALON MUNISAMI (Tree 4) (See Appendix on CD)

The researcher's father was born on 4 September 1950 in Bénarès (Appendix 14). He completed his primary education at Rivière des Anguilles Government School. He studied till School Certificate and became a primary school teacher and is a headmaster today.

ARNASALON was married to AMRAVADEE, daughter of RAMSAMY SOOBROYEN and ANJEELAY RAGAVEN and TWIN of PARVADEE SOOBROYEN of Chamouny (Appendix 15). They married legally on 25 February 1978 (fig. 3). They had a son JAGADISSEN and a daughter PAMELA.

### JAGADISSEN MUNISAMI (Tree 5) (See Appendix on CD)

Since PANDIAN took the decision to come to Mauritius, we believe that JAGADISSEN is the 5<sup>th</sup> generation of this researcher's family. JAGADISSEN was born on 13 September 1978. He left Mauritius 11 years ago to study in the UK. He is a Lecturer in a University in UK and he is not yet married. Hopefully, JAGADISSEN will contribute to the compilation of this family history in the years to come.

## CONCLUSION

This family history was only a small trip back into time. PANDIAN came as an indentured labourer with his family and what he has left as legacy is: 2 children, 3 grandchildren, 9 great grandchildren, 24 great great-grandchildren, 34 great great-great-grandchildren and 1 great great-great-great grandchild. There is still more research waiting to be carried out in Mauritius and in India. Until that time comes, the Researcher feels enriched with the stories of the past and having started on this journey and met some wonderful people that she would have never known other than through this research, precious stories and shared memories, passed from generation to generation.

<sup>1</sup> A village in India and nowadays it is has been changed to Tiruchappalli.

<sup>2</sup> A King who ruled in South India.

<sup>3</sup> Manual workers and small plantation owners. According to *Le Grand Livre de l'Histoire de la Réunion, Volume 2 'De 1848 à nos jours (2003)'*, Daniel Vaxelaire. Collection Le Grand Livre, Orphie.

**“IN SEARCH OF MY ANCESTORS” :  
A HISTORY OF THE PEERTHUM FAMILY**

**SATYENDRA PEERTHUM**  
*Researcher, TJC*

*[...] all human ancestry goes back to some place, and some time, where there was no writing. Then, the memories and the mouths of ancient elders was the only way that early histories of mankind got passed along [...] for all of us today know who we are."*  
*Extract from the Acknowledgement Section of Alex Haley's 'Roots' (1976)*

Research into one's family history is a difficult and complicated task, but a rewarding experience, since it allows a person to discover his/her roots or where we come from and who we are. The story of my family starts during the mid-19<sup>th</sup> century, with the arrival of Peerthum, my great great-grandfather, an Indian non-indentured immigrant and day labourer, bearing the passenger list number 5750 (*bis*). He arrived in Mauritius from Calcutta, India, some time between the late 1860s and early 1870s.

The Elusive Search of the Date of Arrival of Peerthum in Port Louis, a Free Indian Passenger to Mauritius

Figure 1: Birth Certificate of Seesurrun Peerthum<sup>1</sup>

Register No. in Mauritius	Ship No.	Agent's Registered No.	NAME	Father's Name	Sex	Caste	Age	Place of Nativity	REMARKS
283,283	71	1866	Sundar	Sundar	Male	Hindu	25	India	
284	72	1866	Sundar	Sundar	Male	Hindu	25	India	
285	73	1866	Sundar	Sundar	Male	Hindu	25	India	
286	74	1867	Sundar	Sundar	Male	Hindu	25	India	

Oral history provided me with the first inroad into my family history. It was my grandfather; Chandraduth Peerthum, who told my father, Sateeanund Peerthum, many years ago, that his mother, Sookbassea Peerthum, recounted to him the story of Peerthum, her father-in-law, who had come to Mauritius at the age of 14. This claim has not been supported so far by any type of archival document.

Between 2004 and 2009, my parents and I checked dozens of volumes in the Z2D series which contain passenger list arrivals for the period between 1858 and 1870. We never found any trace of Peerthum's arrival in Mauritius. In September 2010 and February 2011, I consulted the same volumes at the Mauritius National Archives or MNA/Z2D Volume 38 for 1858 to Volume 81 for 1870. However, by then, the volumes for the years between 1866 and 1870 were badly damaged and difficult to read. Until 2004, the Peerthum family had always lived with the thought that their ancestor came as an indentured immigrant. But a check at the Mahatma Gandhi Institute's Indian Immigration Archives confirmed that he was not listed there and that he had arrived as a free immigrant or a "deck passenger". Today, this is clearly seen through his four digit passenger list number.

Who exactly were these non-indentured Indians in Mauritius? The most detailed description of the non-indentured Indian workers during the 19<sup>th</sup> century is provided by Saloni Deerpalsing, former Curator of the MGI Indian Folk Museum:

*"In fact, they were not indentured as they did not form part of the influx of controlled immigration and unlike the indentured labourers, they did not benefit from a free passage from Mauritius to India and back. Moreover, the non-indentured Indians came to Mauritius without*

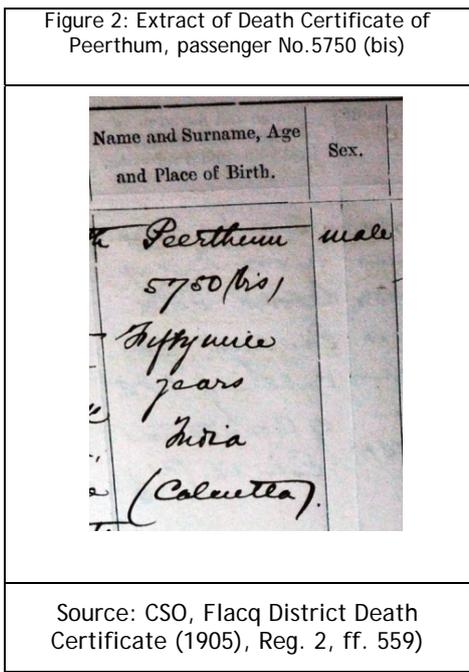

signing any contract. They paid their passage themselves and were known as passengers to differentiate them from the indentured Indians. These passengers were rarely employed as labourers for most of them mainly engaged in free trade." "After their arrival in Mauritius, a passenger number was attached to their name for identification purpose. Divided in two parts by a slash, the first part of the number appears to be a serial number while the second one corresponds to the year in which they were remitted an identification certificate."<sup>2</sup>

Unlike indentured labourers, Peerthum paid his own passage from Calcutta to Port Louis which amounted to around five pounds sterling in the 1860s. In addition, there is no indication in his passenger number of which year he arrived in Port Louis, which makes the search for the exact date of his arrival elusive.

Therefore, it is presumed that he arrived as an adult at some stage between the late 1860s and early 1870s. Peerthum was born in 1846 and is believed to be from the South Western District of the Bengal Presidency to the East of Calcutta and to the South of city of Raniguni. (This region was not a traditional region for the recruitment of indentured labourers for British and European overseas plantation colonies like Mauritius). Furthermore, according to his passenger ticket, his father was Cartick and his mother was Danno.

When he reached his late teens, he migrated to Calcutta, India, before embarking for Mauritius. It is believed that during the one-month voyage between India and Mauritius, he became a close friend with another free immigrant labourer called Digum or Diggun. They formed a type of "jahaji bhai" relationship and that they kept in touch with one another for many years after their arrival in Mauritius.

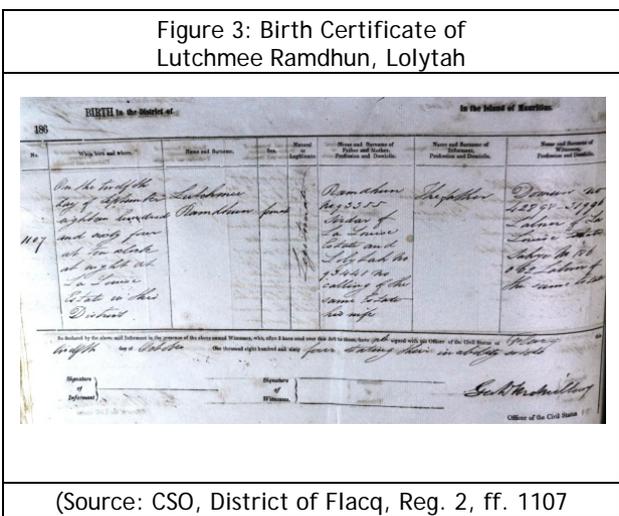

Furthermore, it is believed that Digaum never held a steady job on a sugar estate as a day labourer. He was arrested on several occasions for petty theft and even spent some time in prison. However, eventually Digaum stabilized his life, got married and had children. He passed away on 29<sup>th</sup> July 1909 in the District of Pamplemousses and his passenger list number was not mentioned in the records. Today, some of his descendants are living in Bon Accueil near Mission Cross Road.

### 1. The Life of Peerthum and Lutchmee Ramdhun and her parents during the 19<sup>th</sup> century

Between the late 1860s/early 1870s and 1890, Peerthum worked as a "day labourer" on Grand Bois Sugar Estate and lived in its estate camp. Grand Bois Sugar Estate was a small sugar plantation which was located between Bois Chéri and Rivière du Poste in the District of Savanne.

Sometime in 1879 or 1880, Peerthum was married to Lutchmee Ramdhun. He was 33 or 34 years old and she was 15 or 16 years old. Lutchmee Ramdhun was born on La Louise Sugar Estate in September 1864 in the District of Flacq near Sebastopol village. She was the daughter of Ramdhun, the *sirdar* of La Louise Sugar Estate, and of Lolytah, his wife and a resident in the camp of the same sugar estate.

Ramdhun, Immigrant No.93355 was 21 years old (born in 1830) and Lolytah Immigrant No.93441 was 18 years old (born in 1833) when they arrived, on the *Aeneas*, to Mauritius on 22<sup>nd</sup> May 1851. They landed at the Immigration Depot where they spent three days, before being sent to work on an unspecified sugar estate in the District of Flacq. It may have been La Louise Sugar Estate, but there is no record to confirm this until the mid-1860s.

According to records of the Immigration Department, Ramdhun's father was Sookloll and Lolytah's father was Goonooa and they both belonged to the Ghausee caste which is actually a sub-caste within the Vaish caste which specialized in the rearing of farm animals.

They were both from the village of Golah, the pergunnah or "sub-division" of Echaug, the Zillah or Province of Hazareebaug in South Bihar (now in Jharkhand). They were both married before leaving Calcutta, India, and it is believed that they were married in Golah itself before migrating. Furthermore, it is even probable that they performed a child marriage several years earlier in their native village during the late 1830s or early 1840s. During the 1860s, as it was mentioned earlier in this report, Ramdhun served as a *sirdar* on La Louise Sugar Estate when he was in his early thirties and Lolytah was a housewife and they resided in a house in the estate camp. The best description of a *sirdar* on a rural sugar estate during the 1860s is provided by Huguette Ly-Tio Fane Pineo:

*"He exerted his authority both in the establishment quarters and in the labourers' camp. His dual status gave him a position of great power among the labourers from whom he usually commanded both obedience and respect. The caste to which he belonged had certainly been a factor in his promotion, but the permanency of his position depended on the quality of his leadership. Good leadership required on his part exceptional "savoir faire" and good judgement, qualities which he acquired from long practice in fieldwork and familiarity in all the different social quarters of the estate."*<sup>3</sup>

Source: MGIIA/PG Vol. 28, ff. 102

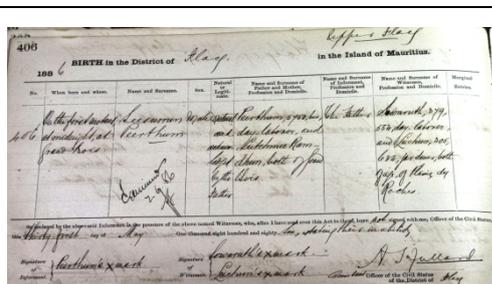

In addition, during the 1860s, before a labourer became a *sirdar*, he had to be able to muster before the sugar harvest more than 24 labourers and keep them under his control. On the large sugar estates, the *sirdar* was answerable to the chief *sirdar* who had to answer to the estate manager.<sup>4</sup>

My father explains that ever since the 19<sup>th</sup> century, usually one week before the harvest season, the *sirdar* would take his workers to the local grog shop or tavern usually located on the perimeters of the estate or a nearby settlement. There, he would offer them drinks such as rum, food and some tobacco and promises that they would be paid on time for their work throughout the sugar cane harvest season. This ensured the loyalty of the workers and the *sirdar's* authority on the highly-stratified hierarchy which existed on the sugar estates.

In October 1866, Ramdhun, the father-in-law of Peerthum, passed away at the age of 36, when Lutchmee Ramdhun was only two years old. Some time, during the late 19<sup>th</sup> century, Lolytah went to live at Rivière Sèche in the District of Flacq. In 1883, the picture of Lolytah was taken at the Immigration Depot in Port Louis when she was 51 years old. Many years later in March 1908, she passed away at Rivière Sèche at the age of 76 and lived for 42 years as a widow. It is interesting to note that she outlived Lutchmee Ramdhun, her daughter, and Peerthum, her son-in-law.

## 2. The Life of Peerthum between the 1880s and the early 1900s

Figure 6: Birth Certificate of Seesurrun Peerthum, son of Peerthum born at Grand Bois

Source: CSO District of Flacq Birth Certificates (1886), Reg.1, ff 406)

After her marriage, Lutchmee Ramdhun lived at Grand Bois with Peerthum. Between 1881 and 1886, they had three children, Ramsurrun, Poonbasseea and Seesurrun. All three of them were born at Grand Bois and registered at the Civil Status Office of Flacq. This fact is not surprising because it is an old tradition for Mauritian women to go and stay for several days and weeks at their parents' place after having given birth to their child. Ramsurrun Peerthum was born in May 1881, Poonbasseea Peerthum in March 1883 and the youngest one and my great grandfather, Seesurrun Peerthum, on 1<sup>st</sup> May 1886. Lutchmee Ramdhun passed away in 1890 at the age of 26 and it is believed that she died while trying to give birth to her fourth child, which was common in those days.

In the aftermath of this tragic event, Peerthum, who was 44 years old, found himself a widow, struggling to bring up three young children. A short time later, perhaps a year after the death of his wife, he decided to leave Grand Bois and settle in the estate camp of Grande Retraite in Northern part of the District of Flacq. He became an "engaged labourer" and was no longer a "day labourer" in order to provide for this children. Peerthum left his youngest child, Seesurrun Peerthum, in the care of the Mahesh family who resided in a small settlement just on the perimeter of Grande Retraite, Sugar Estate.

This settlement, which was established during the 1880s and 1890s, would eventually become the village of Grande Retraite. Between 1891 and 1905, Peerthum worked and lived as an engaged labourer on Grande Retraite Sugar Estate where, apart from his wage, he was provided with accommodation, rations and medical care.

He became good friends with Sabally Kaudeer and Ramnath Seebaran, who were both Indo-Mauritians and engaged labourers on the same estate. Peerthum passed away on 30<sup>th</sup> April 1905 at Grande Retraite Sugar Estate and it was Kaudeer and Seebaran who reported his death and signed his death certificate as witnesses. Peerthum No. 5751 (bis) never purchased any property and went from being a day labourer to an engaged labourer during the last years of his life.

Figure 7: Accommodation for Monthly or Contract Labourers on a Sugar Estate in Flacq during the 1940s

## 3. The Story of Seesurrun and Sookbasseea Peerthum: The Early Years

Seesurrun Peerthum thus spent the first four years of his life in Grand Bois and barely knew his mother, Lutchmee Ramdhun, since he was only four years old when she died. Between 1891 and 1911, he grew up and lived in a small settlement on the outskirts of Grande Retraite Sugar Estate. He was brought up by the "Mahesh" family and received regular visits and financial support from his father until the latter's death in 1905. The house and property of the "Mahesh" family was located where the Grande Retraite Village Hall is located today. During the early 1900s, shortly before the death of Peerthum, a child marriage was performed between Seesurrun Peerthum and Sookbasseea Nundlall, the daughter of Ramdhuny Nundlall, who was a *sirdar* on Labourdonnais Sugar Estate in Rivière du Rempart district.

Sookbasseea Nundlall, my great grandmother, was born on Labourdonnais Sugar Estate in March 1896. She played a crucial role in social and economic progress of the Peerthum family and had a major impact on the life of Dr. Satteeanund Peerthum, my father. Sookbasseea's grandfather and the father of Nundlall the *sirdar* came to Mauritius from Bihar, India, during the 1850s. He passed through the Immigration Depot where he was registered as an indentured labourer and went to

work on a Sugar Estate in Rivière du Rempart. His son, Ramdhuny Nundlall, was born in December 1867 and by the early 1890s, when only in his early 20s, he became a *sirdar* on Labourdonnais Estate.

#### 4. The Story of Seesurrun and Sookbasseea Peerthum: Life on Labourdonnais Sugar Estate

During the 1890s and until his death in the early 1930s, "Nundlall the *sirdar*", as he was often called, lived in a well built and well furnished house close to the estate camp of Labourdonnais. A few years after their child marriage, a religious marriage between Seesurrun and Sookbasseea was performed in 1910/1911 when the former was 24/25 years old and the latter was 14/15 years old. Between 1912 and 1919, they had seven children, Doorpatee, Seelochnee, Soobagwatee, Luckpatheea, Deosia, Chandraduth and Sookdeo.

Their sixth child was "Chandraduth" Peerthum, my grandfather who was born on Labourdonnais Sugar Estate in April 1917. He was registered at the Civil Status Office of Poudre d'Or village early the following month, and his name was written "Chanarduth", instead of Chandraduth by the Civil Status Officer. His real name will be used here.

In 1910/1911 and 1926, Seesurrun Peerthum lived and worked on Labourdonnais Sugar Estate as a cart driver and owned his own ox and cart. Seesurrun and Sookbasseea lived in a house close to that of Ramdhuny Nundlall and near to the estate camp of Labourdonnais. Between 1914 and 1915, Swami Swatantranand, an important pandit of the Arya Samaj movement in India, came to Mauritius to spend one year at the behest of Manilall Doctor. Swami Swatantranand was invited by Ramdhuny Nundlall to reside in his house during his Mauritian sojourn and he spent several months there.

Sookbasseea and her siblings served the swami whom they considered as their guru. They were able to learn, to a certain extent, to read and write in Hindi and had some very basic knowledge about Hinduism and Hindu scripture.

Figure 10: Satyadeo Peerthum

Source: Courtesy of Satyadeo Peerthum and Arya Sabha Mauritius

The Nundlall family were already followers of the early Arya Samaj movement or the Arya Sabha in Mauritius and Swami Swatantranand played an important role in its establishment prior to the return of Pandit Cashinath Kistoe in 1916. This event cannot be underestimated in the history of my family because Seesurrun and Sookbasseea Peerthum became staunch Arya Samajis all their lives. Their children, grandchildren and great grandchildren also became followers of the Arya Samaj movement. They helped in the establishment and consolidation of the Arya Sabha in the island.

Satyadeo Peerthum, the grandson of Seesurrun and Sookbassea Peerthum and my father's elder brother, became the President of the Arya Sabha of Mauritius during the late 1990s and first decade of the 21<sup>st</sup> century, which manages more than 300 branches throughout the island. He has been an active member of this Hindu reformist organization since 1984, an office bearer in the Managing Committee of the Arya Sabha and Chairman of the DAV College Committee. For more than a decade, he has been the Editor-in-Chief of *Aryodaye*; the press organ of the Arya Sabha. For the

Figure 8: The house of a *sirdar* on a Mauritian Sugar Estate during the 1940s

Source: Photo Collection of the Mauritius Chamber of Agriculture

Figure 9: Indo-Mauritian residents on Estate Camp of Antoinette Sugar Estate

past 27 years, he has been an active social worker in organizations which are affiliated with the Arya Sabha. Thus, four generations of the Peerthum family, over a period of almost a century, have been active supporters of the Arya Samaj in Mauritius.

Apart from Sookbasseea, Ramdhuny Nundlall or "Nundlall the *sirdar*" had several children and one among them became known later on as Pandit Nundlall. Between the 1930s and 1950s, he became an active and important pandit of the Arya Samaj movement in Mauritius.

Equally interesting is the fact that during the 1950s, he visited his distant relatives in Bihar who were related to his grandfather, Nundlall the Immigrant. During that period, Pandit Nundlall is one of few Mauritian descendants of an indentured labourer to have done this during the mid-20<sup>th</sup> century. It is interesting to note that he was visiting his son, Iswarduth Nundlall, in Lucknow in Northern India, who during the 1950s, had earned his B.A Honours and Master's degree in music. During the 1960s, he obtained his doctoral degree in Music and many years later, he wrote a book on music in Mauritius.<sup>5</sup>

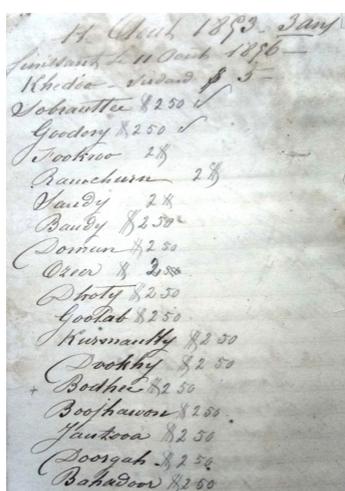

On 11<sup>th</sup> June 1916, Seesurrin and Sookbasseea Peerthum were legally married and their Act of Marriage was registered at the Civil Status Office of Poudre d'Or village. In addition, Chandraduth Peerthum, my grandfather, was their first child to be born after Seesurrin and Sookbasseea Peerthum were legally married. The objective of their legal marriage was to purchase jointly an *arpent* plot of fertile land at Bois Mangué which is located in Rivière du Rempart district and a few kilometers from Labourdonnais Estate.

Figure 11: Sookbasseea Peerthum in her 50s standing next to her brother, Pandit Nundlall

Figure 12: Payroll of labourers on contract on Labourdonnais Sugar Estate 1893-1896

Source: Château Labourdonnais

It was purchased through several instalments over a period of several years so that by the early 1920s, they were able to secure this plot of land through their savings. Furthermore, Ramdhuny Nundlall acted as the financial guarantor of their land acquisition which was registered at the office of a notary in Rivière du Rempart district. The essential question which arises is how did they pay for this land? As mentioned earlier, Seesurrin had been working for several years on Labourdonnais Sugar Estate as a cart driver, and even Sookbasseea was on the payroll of the above-mentioned estate. However, it is unclear what specific work she performed there. During the late 1910s, Seesurrin and Sookbasseea grew sugarcane on their newly-acquired land and, in between the rows, tomatoes were grown which they sold at a rate of 1 lb. for 1 cent.

Their wages and the money they obtained from their small sugarcane harvest and tomato cultivation, helped to make installment payments. It goes without saying that Seesurrin and Sookbasseea, as small planters, took advantage of the sugar boom which lasted until 1921. At the same time, they were among the last Indo-Mauritians who, by purchasing a plot of land, actively took part in the *Grand Morcellement* Movement which came to a close by 1921 or the early 1920s.

## 5. The Beginning of Life for the Peerthum Family in Cottage during the 1920s and 1930s

In 1925, Ramdhuny Nundlall the *sirdar* gave his daughter a plot of land of around half an *arpent* in size in the small village of Cottage and located next to Forbach Sugar Estate. He had purchased this land from a Franco-Mauritian planter and owner of Mon Tracas, a small Sugar Estate, from which part of the village of Cottage gradually emerged during the 1910s and 1920s. Between 1925 and 1926, Seesurrun and Sookbasseea, with the help of their relatives, started building their house in Cottage, barely two kilometres from where they were living on Labourdonnais Sugar Estate. In 1926, they left Labourdonnais Estate and settled permanently in Cottage. During the following year, in February 1927, Gianduth Peerthum, the eighth child of Seesurrun and Sookbasseea, was born and he was the first of many Peerthum children to be born in Cottage.

During the late 1920s and after, Seesurrun and Sookbasseea planted sugarcane and vegetables and were also involved in cattle-rearing on their land in Cottage. Furthermore, Seesurrun continued to work as a cart driver on Labourdonnais Estate until his death in 1933 and Sookbasseea was still on the payroll of the above-mentioned estate as long as her father remained a *sirdar*. In November 1931, Soorajdut Peerthum, the ninth and last child of Seesurrun and Sookbasseea, was born. He was barely two years old when his father passed away and never got to know him, unlike the other Peerthum children.

What type of person was Seesurrun Peerthum? This question was answered by a well-known and long-time resident of Cottage, Mr. Balam Nursimooloo, who is now 90 years. He is the grandson of an indentured labourer who arrived in Mauritius during the late 1800s from one of the Telugu-speaking districts. Balam was born around 1921 and was a *sirdar* on Labourdonnais Sugar Estate between the late 1940s and the 1960s. As a young child, he met Seesurrun Peerthum and was a good friend with Chandraduth.

Figure 13: Balam Nursimooloo

Source: Photo by Satyendra Peerthum from the AGTF Collection

Balam Nursimooloo provided a detailed description from what he remembered of Seesurrun during the late 1920s and early 1930s. He described my great grandfather as being a short person with a very dark complexion and who had a moustache. He always wore a *dhotee* and tied a handkerchief around his head, just like almost all rural Hindu Indo-Mauritian men in those days. He was a quiet and sometimes a reserved person who did not interact much with the residents of Cottage, but rather spent a lot of his time with his friends and in-law on Labourdonnais Sugar Estate, when not at home.

The father of Nursimooloo was also a cart driver; he knew Seesurrun Peerthum and they were friends. Between the 1910s and the early 1930s, during the inter-crop season (between November and June), when sugarcane was not being harvested, it was a common practice among cart drivers such as Seesurrun Peerthum and Nursimooloo, to engage in other activities. Their time was taken up with the transportation of vegetables on behalf of vegetable growers and to deliver “goods procurement list” for shop keepers

from the villages, such as Cottage, to Port Louis and to transport these supplies back to the villages for them.

They would leave Cottage at 11 p.m. or midnight and arrive at Port Louis by 5 a.m. or 6 a.m. and they would leave their carts at the Immigration Square. During the early morning, they delivered their vegetables at the Port Louis Central Market. Later on during the same morning, when the shops on Farquhar and Corderie Streets, as well as on the adjoining streets, opened, they would deliver their goods procurement list. By the early afternoon, they waited for the shopkeepers from Cottage and its surroundings to arrive by train and purchase their goods which were loaded onto the carts and start their return trip back to the North of the island.

The cart drivers were paid a fee by the vegetable growers and shopkeepers for their service. Between the 1910s and the 1930s, this was done once or twice a week and provided the cart drivers, such as Seesurrun Peerthum and Nursimooloo, with an additional source of income.

It is evident that, Seesurrun spent little time at home, since he left for work before 5 a.m. and returned in the evening. His wife and his young children managed their property in Cottage. Apart from his work as a cart driver, Seesurrun also personally looked after his property at Bois Mangué which he visited almost on a daily basis. By the early 1930s, in order to supplement his earnings from his properties in Cottage and Bois Mangué, Seesurrun tried to acquire some land near the village of Goodlands.

Why did Seesurrun try to obtain a third plot of land? It may well be that he remembered that Peerthum, his father, never managed to purchase any property due to difficult circumstances in life and always remained dependent on the pay he earned as a day labourer and later on, as an 'engaged labourer'. In addition, he had to depend on other people to raise his children and his father did not leave him with any inheritance in terms of property or money. At the same time, Seesurrun had relied for many years on the generosity of Nundlall the *sirdar* in order to earn his living and to purchase his first property. He wanted to achieve some type of financial independence, become a secure property owner, earn enough money to feed his wife and children and leave an inheritance for them, so that they would not have struggle a lot after his death. However, fate had something else in reserve for his family.

Seesurrun tried to acquire a small plot of land near the village of Goodlands by making a verbal agreement with a Franco-Mauritian estate-owner there and provided him with a deposit. He also promised to make several installment payments over several years. The objective of Seesurrun was to obtain a half-*arpent* of marginal land which was located on the perimeter of the estate owner's property. Seesurrun invested a lot of his savings into clearing his plot of land which was rocky, uneven and not very fertile.

At the same time, he tried to clean a deep well in order to obtain water to irrigate his land. Unfortunately, Seesurrun spent most of his money in trying to convert his newly-acquired property from marginal land into good arable land. As a result, he failed in making his installment payments and the Franco-Mauritian planter seized Seesurrun's land as well as the deposit that he had provided. Since it was a verbal agreement, it was difficult to resort to the law to get his money back.

This specific event had a huge impact on the lives of Seesurrun and Sookbassea Peerthum. After all, it traumatized both of them since they lost most of their savings. It may have also ruined the already fragile health of Seesurrun who had suffered from the Spanish Influenza in 1919. On 11th November 1933, Seesurrun Peerthum passed away at the age of 46 in Cottage and was cremated on a spot close to the village and Forbach Sugar Estate.

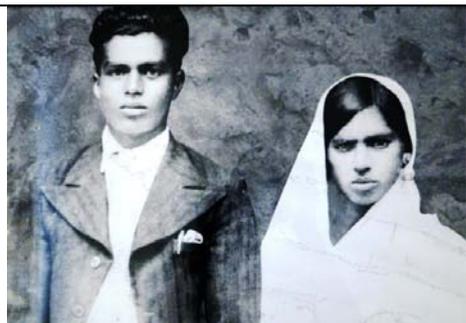

Sookbassea became a widow at the age of 37 and was left with the arduous task of bringing up several children, the management of two properties including an ox, a cart and several cows by herself. The year 1933 was truly a difficult year for Sookbassea because in February 1933, her father passed away and nine months later, her husband died. Ramdhuny Nundlall was cremated in the same place as his son-in-law.

## **6. The Story of Chandraduth and Hurbunsea Peerthum: The Early Years**

In the middle of this family crisis, Chandraduth Peerthum, my grandfather, who was only 16 years old, had no choice but to leave school after barely completing Standard VI. He took over his father's work as a cart driver on Labourdonnais Sugar Estate and assisted his mother and his brothers and sisters in the management of their properties in Cottage and at Bois Mangué. This sudden transition in the life of Chandraduth was a long and painful process which required him to be mentally, emotionally and physically strong and mature. Fortunately, he was able to rise to the occasion and shouldered his new responsibilities and help his mother Sookbassea bring up her children and the management of their properties. During most of the 1930s and the first half of the 1940s, he continued his work on Labourdonnais Estate.

In 1938, a religious wedding was performed for Chandraduth and Hurbunsea Rashpassing in the small village Grand Gaube in the North East corner of Mauritius. Chandraduth went to his wedding from Cottage to Grand Gaube in a hired car. My grandfather was 21 years old and Hurbunsea was 17 years old, and they were never legally married unlike his parents! Several weeks later, during the course of the same year, a group picture was taken at a photo studio in Port Louis. In that historic picture, Chandraduth was dressed in a suit with a fountain pen in his pocket and Hurbunsea was dressed in a beautiful *saree* which had been bought for her marriage. They took this group picture with members of the Naga family from Brisée Verdière because Chandraduth's elder sister had married in that family. Today, copies of this important 72-year-old picture hangs in the homes of almost all of their children and some of their grand children.

Figure 14: Photo of Chandraduth and Hurbunsea Peerthum which was taken in 1938

Source: Courtesy of Satyadeo Peerthum and the Naga family of Brisée Verdière

Hurbunsea Peerthum, my grandmother, was born on 1<sup>st</sup> May 1921 at Grand Gaube. She was the daughter of Rashpassing, a cart driver who transported goods from Grand Gaube to Port Louis, and back again. It was Thakoor Rajparsing, her great grandfather who came to Mauritius from Bihar, India, through the port city of Calcutta during the mid-19<sup>th</sup> century. When Thakoor Rashparsing arrived at the Immigration Depot, his name was not recorded as "Rajparsing" by the clerk of the Immigration Department but as "Rashpassing". The name has remained unchanged for more than one hundred and fifty years.

Hurbunsea gave birth to her first son, Satyadeo Peerthum, on 11<sup>th</sup> July 1939, barely a year after her marriage at Grand Gaube. His birth was registered in August 1939 at the Civil Status Office of Poudre d'Or. On 15<sup>th</sup> March 1941, she gave birth to her second child, Sattéeanund Peerthum, my father, once again in Grand Gaube. Between 1939 and 1953, Chandraduth and Hurbunsea had eight children, and two died at childbirth. The other children who were born during this period were: Saramate (Sita) in 1943, Satyabharat in 1945, Mitradeo in 1947, Suttyparkass in 1949, Bissoondeo in 1951 and Sunitee in 1953.

## 7. The Story of Chandraduth and Hurbunsea Peerthum during the 1940s and the 1950s

During the 1930s and 1940s, Chandraduth Peerthum developed a very close and lifelong friendship with Hurrparsing Ramnarain, the Trade Union leader and member of the Mauritius Labour Party. My father and his elder brother always called him "chacha". During the Second World War and the 1950s, Chandraduth Peerthum was a member of the village panchayat or a type of council of village elders and became a well-known figure in the locality, just like Ramnarain and Narsimooloo. In September 1943, in the aftermath of the tragic Belle Vue Harel massacre, he was one of the individuals who transported the body of Anjalay Coopen on his shoulders from the estate camp of Belle Vue to be cremated on a plot of land which had been donated for that specific purpose and located immediately to the North of Cottage. During the same period, Chandraduth, along with his two younger brothers, Gianduth and Soorajdutt, became active members of the Syam Sevaks of the Jan Andolan or People's Movement which was being led by Pandit Basdeo Bissoondoyal and Sookdeo Bissoondoyal.

During the 1930s and 1940s, he helped Sookbasseea to manage their properties in Cottage and Bois Mangué. He played a crucial role in bringing up his younger brothers and getting his elder sisters married between the mid-1930s and mid-1940s. At the same time, Sookbasseea, Hurbunsea, Chandraduth, with the help of his younger brothers Gianduth and Soorajdutt and relatives, were able to build a large wooden house, with windows and corrugated iron roof.

This was the first house of its kind to be erected in Cottage. In the aftermath of her father's death, Sookbasseea was able to obtain some furniture made of ebony wood and decorative China ware

which were put on display in her new home. Unfortunately, the passage of the famous cyclone of 1945 destroyed their house, and they lost part of their belongings. Between 1945 and 1946, they built another wooden house, with windows and corrugated iron roof which was much smaller than the previous one.

During the 1940s, the personal doctor of Sookbasseea was Dr. Seewoosagur Ramgoolam on whose lap my father sat during one of his house calls in Cottage in 1945. Three years later, since she was able to sign her own name in Bhojpuri and Hindi, my great grandmother was one of the few Indo-Mauritian women in Rivière du Rempart district to vote in the historic General Elections of August 1948. It is not surprising that she voted for Dr. Ramgoolam who was elected as the candidate for the first time as representative of the Pamplemousses/Rivière du Rempart district.

Chandraduth continued to work as a cart driver on Labourdonnais Sugar Estate until the late 1940s. In 1947, with his wife and children, he temporarily went to live at Mission Cross Road, Lallmatie. For one year, he resided in the house of Roopchand Manna and his wife Mrs. Manna who was the sister of Chandraduth.

My grandfather worked as a cart driver with Mr. Naga, his brother-in-law and a *métayer* who had obtained several acres of cane land near Lallmatie and Grande Retraite which belonged to Union-Flacq Sugar Estate. Chandraduth transported sugarcane from the Lallmatie and Grande Retraite area to the sugar mill of Union-Flacq, around 5 kilometres away. However, after more than a year, he decided to return to Cottage with his family, where he continued to work as a cart driver for Labourdonnais Sugar Estate until 1950. After two to three years, he obtained enough money with the financial help of Sookbasseea, to buy a new cart and ox. Between the mid-1950s until the early 1960s, he delivered sugarcane for St. Antoine Sugar Estate as well as for Labourdonnais Sugar Estate. During the 1940s and the 1950s, in his spare time, Chandraduth was involved in planting, cultivating and selling of vegetables on the land which his family owned at Cottage. At the same time, he was also involved in the harvesting and transportation of sugarcane from the land which the Peerthum family owned at Bois Mangue.

While the 1950s was a period of prosperity for my grandfather, it was also a time of great trials and tribulations which forever altered his life. After all, during this period, his wife died, his mother passed away and his house at Cottage was swept away during a flood. In November 1956, Hurbunsea Peerthum passed away at the Civil Hospital of Port Louis at the age of 36, while trying to give birth to her tenth child.

She was cremated in the village of Cottage by her husband on the same spot where the Seesurrin Peerthum and Ramduny Nundlall were cremated in 1933. Chandraduth Peerthum found himself in a situation almost like Peerthum, his grandfather, more than half a century earlier in Grand Bois. Chandraduth's wife died at a young age, and he was left with feeding and taking care of eight children with four of them less than ten years old.

During that difficult and dark period in his life, my grandfather could still rely on his mother's moral support and financial help. By the mid-1950s, Sookbasseea transferred her property of Cottage to Chandraduth who managed the land with the help of his children. A few years earlier, in 1949, she purchased a half *arpent* of land in the village of Lallmatie next to Mission Cross Road and close to Bon Accueil. During the course of the same year, she built a small house with the help of her children and moved there. After having resided in Cottage for 23 years, Sookbasseea moved to Lallmatie in order to live with Soorajdut, her youngest son and last child, who was only 18 years old and had opened a tailor's shop at Brisée Verdrière.

By the mid-1950s, Sookbasseea bought a plot of land around one third an *arpent* in size in the centre of Lallmatie village, close to the main road and the old cinema. She moved from Mission Cross Road to live there with Soorajdut, until she passed away in 1958. At the same time, she gave an ox, cart, her house and land next to Mission Cross Road to her son Gianduth.

In 1956, Sookbasseea sold her property at Bois Mangue for Rs. 9,000. She kept Rs. 6,500 and the rest of the money or Rs. 2,500, she distributed among her five daughters who got Rs. 500 each. Sookbasseea used the money to build a new house on her newly-acquired property in the centre of Lallmatie village. She also intended to leave this house and land for Soorajdut. Barely two years after the death of Hurbunsea, Chandraduth's wife, his mother passed away in December 1958 at

the age of 62 in Lallmatie. She was cremated at the Old Cremation Ground of Cottage where her husband, father and daughter-in-law were also cremated. Today, this place has been mostly neglected since the 1980s.

The death of Sookbasseea was a huge blow to Chandraduth, his children and his siblings, since she was the only person who provided them with emotional and financial support for more than a quarter century. I grew up hearing stories about the personality and achievements of Sookbasseea Peerthum. She was a unique woman who led an extraordinary life and could serve as an epitome to all modern Mauritian women. She had her own savings in the local Colonial Bank and she was financially independent and did not always rely on her children. Within her lifetime, Sookbasseea was able to generate enough money to purchase three different small properties, and she ensured that her children received their inheritance. She was an independent and progressive woman who had a strong character and tried to forge a destiny for herself and her children.

Unfortunately, in 1959, hardly a few months after this family tragedy, a flash flood, which originated from La Nicolière, swept through Cottage and destroyed my grandfather's house. He and his children lost all their possessions and had to start from scratch. It goes without saying that the period between 1956 and 1959, was the darkest period in Chandraduth's life, as well for his children, as they were struck with three major tragedies in a row. Fortunately, within a few weeks, my grandfather and his children, with the help of his nephews and some of the village youths, were able to rebuild their house. A few months later, he was able to plant and cultivate vegetables on his land and was able to purchase a new ox and cart.

During the early 1960s, Chandraduth continued to work as a cart driver on Labourdonnais Sugar Estate which he eventually gave up. Between the early and late 1960s, he worked as a general worker for the Pamplemousses/Rivière du Rempart District and continued to grow his vegetables which he sold at the market of Goodlands. During the late 1960s, he left his work as general worker and kept himself busy by growing and selling vegetables. One day during the mid-1970s, Mr. Ramsewak, the President of the General Workers' Federation (GWF) and his followers came to Cottage to lay a wreath on the spot where Anjalay Coopen and her comrades were cremated. It was Chandraduth Peerthum who showed them the place, and this moment is captured in a black and white photo. By 1977, he became eligible for an old age pension which helped to supplement his income. Chandraduth Peerthum passed away during the first week of August 1980. He was cremated on the funeral ground of Cottage where his father, mother, grandfather and wife had also been.

As I complete this report for the Indentured Immigration Committee of the Truth and Justice Commission, I am doing my *devoir de mémoire* as a descendant and fulfilling my tryst with destiny as a young historian. In addition, I pay tribute to the sacrifices, struggle and achievements of my ancestors whom I have been researching for more than 7 years at the Civil Status Office, the Mauritius National Archives, the MGI Indian Immigration Archives and through interviews with my father and Mr. Narsimooloo. However, the search for them goes on.

# MY FAMILY HISTORY

SEETUL RAMCHURN  
*Research Assistant, TJC*

*"History turning a blind eye bore him not witness  
History standing mute told not his full story  
He who first had watered this land with his sweat  
And turned stone into green field of gold  
The first immigrant He, son of this land  
He was mine, he was yours, he was our own"  
Abhimanyu Unnuth*

I have chosen to write my Family History because while working in the MGI Archives, I observed every day people coming to conduct research on their origins with great enthusiasm. This inspired me and I decided to do the same. I also wanted to know why, although we live on the same island, our way of living is so different from others? After questioning my relatives, I obtained my answer.

Whatever we are today is all due to our ancestors. Whatever the culture, rituals and traditions that we follow today exists because our ancestors brought them from their country. Their perseverance has proved to be a guide of our life. It has shown us the path to follow and how to become examples for the next generation.

All the information obtained has come from interviews with family members and documents found at the MGI Archives and the Civil Status Office. It was not difficult for the researcher to trace my family history but it is a lengthy exercise.

The immediate problem I encountered at the IIA was when I discovered that there were two people with the same immigration number. My ancestor bore the immigration number, 140704. Using this immigration number, I conducted research on my ancestor but surprisingly found another immigrant with the same Immigration number. In addition to Ramchurn 140704, there was also Beehary. Beehary arrived on the *Julia* in 1854. On the same ship and in the same year, I found Ramchurn with immigration number, 140734. Which one was related to me? Was it possible that my ancestor was Beehary and not Ramchurn? Or did they make a mistake on the immigration number of Beehary? I have not yet answered these questions and further research is needed regarding immigration numbers 140704 and 140734 to confirm his origins. For the present time, for my family tree, I researched Ramchurn 140 734, as this is the more likely ancestor, but this has still to be confirmed.

## MY ANCESTORS

### Ramchurn and Mareetcha Beehook (1<sup>st</sup> Generation)

My ancestor set foot on the island on 13<sup>th</sup> August 1854. His name was Ramchurn, immigration number 140734. He was 17 years old and he came to Mauritius as a single indentured labourer. He was 'shipped' from Calcutta. The ship in which he travelled was called the *Julia* and its number was 562. The name of the Captain was "E. Warehouse". Ramchurn had a scar on his left thigh. He married Mareetcha Beehook in Mauritius.

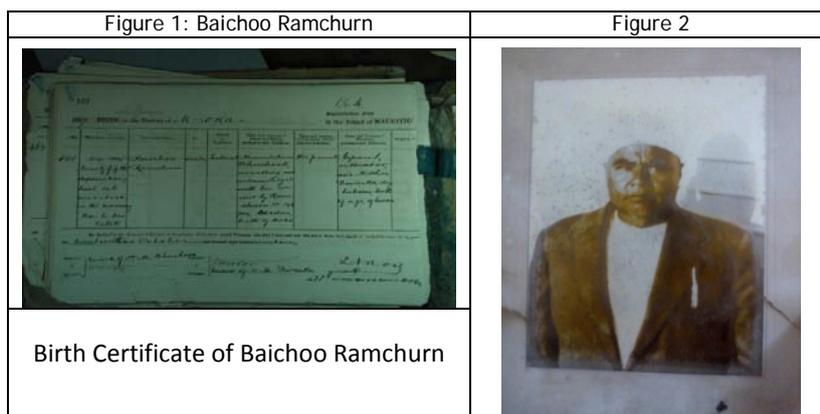

**Information on his family background consists of what is in the archives.** Ramchurn's family came from the village of "Seekooree" in what is today Bihar, Province of "Moner" and District of "Patna". Ramchurn came here in search of employment and settled in Mauritius. He was indentured to Samouilhan in the District of Moka.

According to information obtained orally from my grandfather, Sookdeo Ramchurn, Ramchurn 140734 worked as "labourer" at Bar le Duc Sugar Estate. Later, he became a *sirdar*. He also stated that Ramchurn 140734 was the owner of a large plot of land but after his death, a South Indian entrepreneur misappropriated the land. As Maratcheea Beehook was illiterate, she was tricked into putting her thumb print on a legal paper. Subsequently, she lost all her property and led a life of poverty.

### Baichoo Ramchurn (2<sup>nd</sup> Second Generation)

Ramchurn and Mareetcha Beehook were married probably in the 1890's and they settled down in the village of "Dagotière" in the District of Moka. On 25<sup>th</sup> September 1897, they gave birth to a son who was named Baichoo Ramchurn. I have not obtained any more information regarding the deaths of Ramchurn 140734 and Mareetcha Beehook.

According to oral history interviews, Baichoo Ramchurn was a "Saudi" also known as "Halway". During his free time, he used to sell "bhaja", "Kajha" and "gulab Jamun" [<sup>1</sup> Indian savouries]. Baichoo Ramchurn used to wear "Dhoti" and a "Paltot" (Eng trans. Coat). He also tied a handkerchief on his head. He always carried a clock with him (fig. 1).

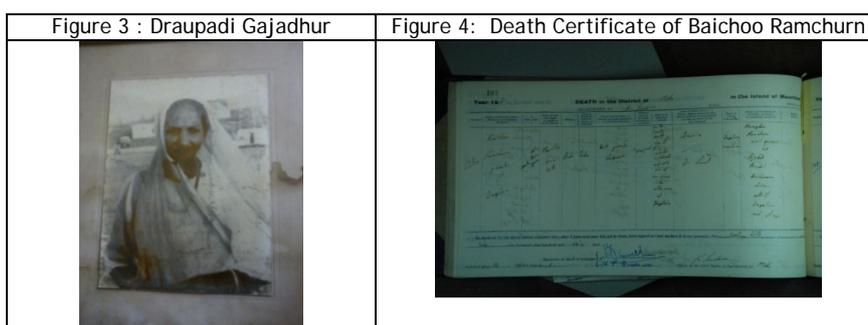

According to my uncle, Gyanduth Ramchurn, Baichoo Ramchurn started working at a very young age. He worked as a labourer on Bar le Duc Sugar Estate. He was a hard worker as well as being a very strict person. He lived in a house built of straw. He married Sohodry in the 1920's who was from Rivière du Poste. No one in the family could give details on the background of Sohodry. Gyanduth Ramchurn mentioned that Baichoo Ramchurn's marriage did not last long as his wife passed away after two years, leaving behind two sons, Kapeeldeo Ramchurn (my grandfather) and Baldeo Ramchurn.

Baichoo Ramchurn remarried Draupadi Gajadhur. Draupadi Gajadhur came from Melrose and settled in Dagotièrè after marriage. Draupadi used to wear a *sari* and *horni*. She wore traditional jewelry such as 'chan' bracelets, 'chumka' earrings, as well as 'champal, (Indian slippers) on special occasions. At all other times, she remained barefoot.

Draupadi Gajadhur was a housewife. She reared two cows and goats and used to wake up early morning to prepare 'farata' for my great-grandfather. She also used to prepare maize rice also known as 'macaille rice', sweet potato, taro 'violet'. Then she went to cut grass in the nearby field and feed and milk the cows. On special occasions, she prepared 'canned fish' and meat for the whole family. Draupadi Gajadhur cooked food on 'firewood' using a 'pukni'. The utensils she was using at that time were as follows: 'marmite', 'caraille', 'deksi'.

Baichoo Ramchurn and Draupadi Gajadhur had four sons and two daughters. Their names are as follows: Hurrydeo Ramchurn, Sookdeo Ramchurn, Ramdeo Ramchurn, Sahadeo Ramchurn, Radhika Ramchurn and Permawtee Ramchurn. Baichoo Ramchurn passed away at the age of 64 on 25 July 1961 in the village of Dagotièrè. The cause of death was Uremia.

### Sons and Daughters of Baichoo Ramchurn (3<sup>rd</sup> Generation)

Baldeo Ramchurn was a religious person. He wore his shirt 'kamiz', 'dhoti' and 'phenta' (head dress). Every morning he went to the temple for prayer. Once back home, he spent his day reading spiritual books like the *Bhagavad Gita* and *Vedas*. Baldeo Ramchurn was a vegetarian. He married Phoolmutt Soomarchund and had eight children.

Kapildeo Ramchurn, my grandfather was the second son of Baichoo Ramchurn. He started working at the age of 14 for Ramdin Sugar Estate situated at Cluny. Then in 1954, he worked as labourer at Mon Desert Alma sugar-estate. At the age of 55, he left his job because of a mild heart attack.

He married Jasso Gunness, my grandmother (fig. 5) and they had 11 children.

Hurrydeo Ramchurn was the third son of Baichoo Ramchurn. He worked as 'chief finance officer' for the Ministry of Education. He worked there for fifteen years. In 1966, he joined politics and he was elected in 1976. He became Minister of Youth and Sports. Hurrydeo Ramdeo married Hanumanjee in 1958. They had one daughter, Amrita Ramchurn.

Figure 5: Jasso Gunness

Sookdeo Ramchurn worked as a school teacher for ten years. In 1965, he left the job and joined the Ministry of Youth and Sports. He retired as 'Principal Youth Officer'. Sookdeo Ramchurn married Ansuya Putty and they had one daughter, Ambika Ramchurn. Sookdeo Ramchurn lives in Quatre-Bornes. He is a spiritual person. The inhabitants of Dagotièrre and Quatre-Bornes have a great respect for him. He is the disciple of 'Sai Baba'. Today, Sookdeo Ramdeo is in-charge of a 'Sai Ram temple' in Quatre-Bornes. He spent his time in the 'Sai Ram temple', attending spiritual ceremonies and singing devotional songs.

Ramdeo Ramchurn went to the Royal College. He won scholarship and left for England for further studies. After completing his studies, he came to Mauritius and work as a 'Veterinary'.

Sahadeo Ramchurn married Uma Ramleka. He used to work as accountant for Desbro Industries. In 1977, he left Mauritius and went to settle down in England. He has two sons.

#### Sons of Kapeeldeo Ramchurn (4<sup>th</sup> Generation)

My father, Prem Ramchurn is the eldest son of Kapeeldeo and Jasso Ramchurn. My father started voluntary social work at the age of twelve. He also worked as 'Clerical Officer' in the Ministry of Agriculture. My father is very famous in the village of Dagotièrre. Everyone knows him by the name of Bhai (brother) Prem. He is now retired but still spends most of his time doing social work. He is the Secretary of old age pensioners and Gemini Senior Citizens. He organizes outings for elderly persons.

His second brother, Deoraj Ramchurn, is self-employed. He married Pavitree Ramborrnun and they have four children. His third brother, Mehess Ramchurn, worked as a gardener. He married Premila Ramdahin and they have three children. His younger brother, Satiadeo Ramchurn, worked as messenger. He married Parbawtee Poonith and they have one son.

Ramchurn 140734 came to Mauritius as a contract labourer and a single man. Since the 1854, the family has lived in the region and the family has become part of its landscape. The Ramchurn family is quite famous in Dagotièrre, the village where they live. On every major occasion such as prayers, weddings, birthdays, they are always seen together. Most of the members of the recent generation are well-educated and hold high-profile jobs.

ORISSA ORIGINS:  
THE CAHOOLESSUR FAMILY

DREESHA TEELWAH  
*Research Assistant, TJC*

Although the family of Coowaloosur is today considered a 'Bihari' family, during the course of its family history search, it found it had origins in Orissa. Orissa is located West of the State of Bengal. The family history was reconstructed with the help of the family, especially Mr. Tarkaswar Coowaloosur. Today the family lives in Mare D'Albert. Mr. Tarkaswar Coowaludur is fifty five years old and was born at Mare D'Albert. His father's name was Rampersad Cowaloosur, but his Orissa origins come from his mother's side, Daiwontee Cowaloosur, born Dausoo.

His father, Rampersad Cowaloosur, was born in 1912 in the District of Pamplémousses. He was a priest and also lived in Mare D'Albert.

Tarkaswar's grandfather, Seedheal Cowaloosur, was born on 20<sup>th</sup> August 1873 in the District of Pamplémousses.

Seedheal's father had come as a free passenger, and not as an indentured labourer, from the District of 'Arrah' or from the village of 'Darbang' or 'Darwan'. According to his Birth Certificate, he worked as gardener. When he arrived, he brought with him a Ramayana which has survived in the family (fig. 39).

Jeetny 216284, the mother of Seedheal, came to Mauritius at the age of nine in 1858.

Her father's name was Boodhoo and they came from Cheettupore village in Hazaribagh District and from Ramghur *pergunnah*. She came aboard the ship *Venilia* No. 816, from the port of Calcutta.

Mr. Coowaloosur's mother's name was Daiwontee Cowaloosur, born Dausoo. She was born in October 1924. Her father (his grandfather) was Ballram Dausoo, born on 2<sup>nd</sup> January 1890 in the District of Grand Port and became a priest. His grandfather was always well dressed; he wore 'dhoti' and 'pagri' (turban). His 'dhoti' was up to the ankles. Ballram Dausoo was not like the traditional 'pandit', but was a 'purrohit'. Very little is known about him. The written material he brought, however, has survived and that gave an indication of his origins, as they are in Oriya.

His great-grandfather's name was Soodasie Dausoo, a *sirdar* at Ferney Estate.

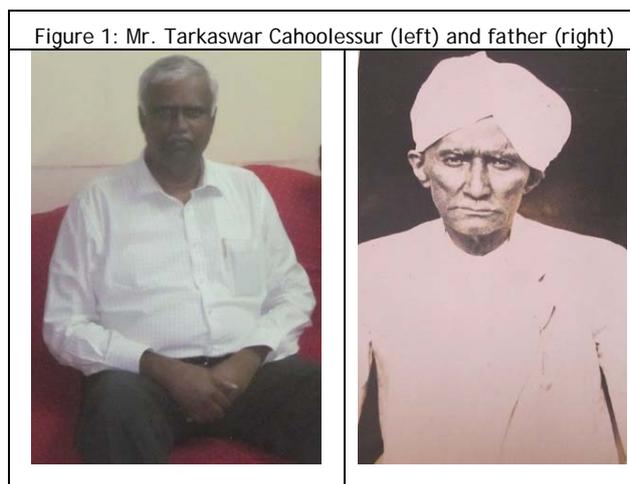

Figure 2: Birth Certificate of Seedheal Cowaloosur

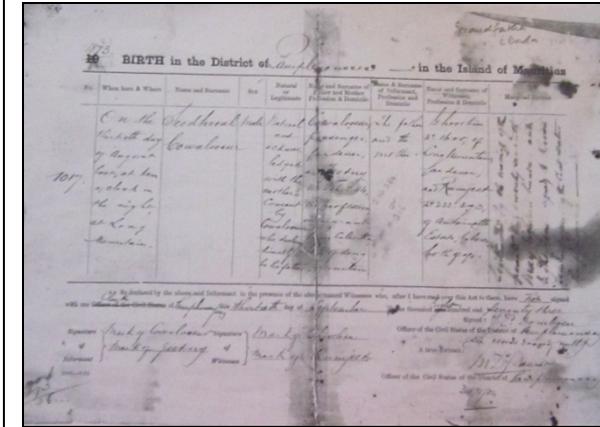

Figure 3: Birth Certificate of Daiwontee Dausoo

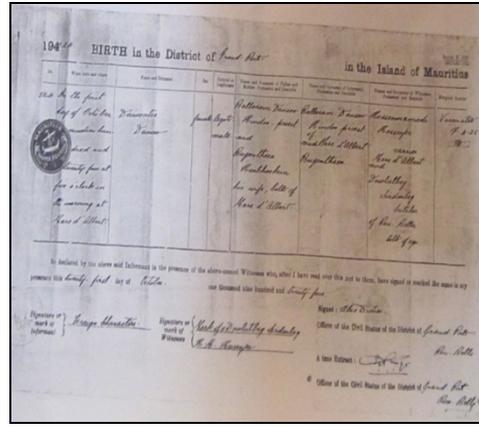

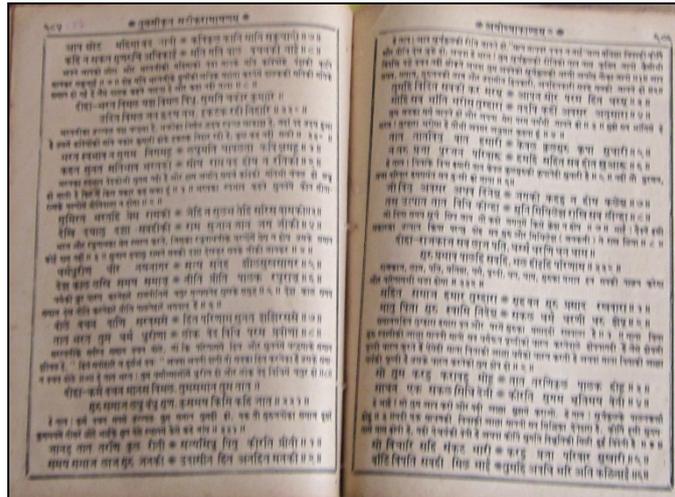

Figure 4: Birth Certificate of Ballram Dausoo

Figure 5: Marriage Certificate of Ballram Dausoo and Bugottea Hurhhookun

Figure 6: Ramayana brought by Cowaloosur

Soodasie Dausoo brought written material from India in Oriya which has survived to this day. This is a pamphlet which states that Soodasie Dausoo owned a shop specializing in the repair of musical instruments in India. The pamphlet is in two languages: English and Oriya, according to the interviewee. It is based on this pamphlet that the family has been able to trace its Oriya origins.

## DESCENDANTS TODAY

*Vijayalakshmi Teelock, Vice-Chairperson*

The aims of the analysis of interviews of presumed descendants of indentured labourers are to uncover the world views, life styles, thoughts and perceptions of persons representing a sample of descendants of indentured labourers still living, working on sugar estates or in sugar industry. This is to facilitate further analysis and understanding of the situation of descendants of indentured labourers in accordance with the Act of the Truth and Justice Commission whose main objective is to “make an assessment of the consequences of slavery and indenture labour during the colonial period up to the present”.

A chapter on what the descendants themselves think and feel was thought absolutely necessary by the Commission given that any analysis of consequences must study the immediate descendants. These persons for the most part aged over the age of 70, are those to have first felt, seen and heard the impact of indenture through the lived experience of their grandparents or parents, transmitted to them through mainly an oral medium.

The term ‘presumed descendants’ has to be used because many Mauritians have no idea of their own family history and indeed of Mauritian history. One can fairly assume that being of Indian origin their roots are in the indenture system, it has also been established that many Indians came before and after indenture period.

Sugar-related work by a person of Indian origin however does not distinguish between an indentured or a non-indentured person and many examples exist of the similarity of experiences.

It is therefore not a problem for the Commission that people interviewed did not know where they came from or assumed they were of ‘indentured’ origin.

These analyses of interviews with persons who had previously lived and worked on sugar estates was conducted in the 2007-2009 period, when the Voluntary Retirement Scheme was in progress. They were conducted by research staff of the Aapravasi Ghat Trust Fund and donated to the TJC who wished to know how Mauritians lived on those estates and what people felt about their lives there and what memories they had. Three themes suggested themselves: first, the life experiences of the people, and if and how have their lives changed over the years; secondly, for those with ‘memories’ of their parents’ and grandparents’ lives, to follow their evolution up to today and third, whether there were any variations regionally; fourth, how were Inter-ethnic and intra-ethnic interactions on estates, and lastly, what do they think of their history?

The interviewees were between 65 and 70 years of age and their work-related memories were good: they provided factual information about their working lives. They talked little, however, about emotions, thoughts and more subjective issues. About 70% of interviewees were males and the ethnic /religious proportions reflected very roughly the religious/ethnic population of Mauritius still living on sugar estates in the regions studied today.

The semi-structured interviews have been conducted by research assistants with interview sheets. All interviews were recorded on either audio or videotapes and an archival form created containing basic information about the informants. These 400 interviews were copied on CDs and donated to the Truth and Justice Commission. The Commission undertook to transcribe these interviews as a gesture of its appreciation for the donation.

The methodology used in analyzing oral interviews continues to be discussed and debated in academic circles and interpretations of the same interview often vary among scholars. For this reason, the Commission requested scholars from varying disciplinary traditions and training to assess the consequences on indenture on descendants. This as the reports show, proved a very fruitful exercise. As much as there is variation in the views of informants, so is the situation in the interpretations of this experience by scholars possible.

The objectives of the Commission are also to ensure the memory of Mauritians particularly of indentured and slave descent are not forgotten and thus the creation of Oral History database is considered absolutely essential for the preservation of the nation’s memory.

## REPORT

By AMIT MISHRA  
*Consultant, TJC*

### 1. WORK CONDITIONS

In terms of the nature of work, there was continuity with the indentured period in terms of gender and age division in plantation work. Men were doing the *Gran Bann* or harder work, such as cutting the cane, loading it into carts, working in mills etc. while women were supposed to do the *Ti Bann* or lighter work like weeding, separating leaves from the cane, planting, rearing animals, working in the gardens or as domestic help in the estate owner's household. Women were paid less and sometimes, half the wages of male workers. In addition, however they also did the household chores before, and after, this 'light' work: preparing meals, looking after the cattle, preparing children for school or work etc.

Ethnic profiling also continued from indenture days where most of the artisans/non-field workers were Creole Christians.<sup>1</sup> Out of the 18 Creoles interviewed, 9 respondents did not work as field labourers.<sup>2</sup>

Mobility was restricted on a sugar estate even after indenture. The majority remained in occupations related to the sugar industry: in the fields or the mill or in associated sectors such as work as mechanics of machines, drivers of lorries etc. Sugar was the only major crop grown at that time. Additional income was derived from cow rearing and selling milk by women, poultry and goat farming, providing domestic help, growing vegetables etc.

Mobility occurred within the sugar industry and many respondents had gone up in the hierarchy e.g. from labourer to *sirdar* or changed jobs from being a labourer to a cart driver, a miller or a truck/lorry driver, a machine operator, a watchman or a mechanic. Some even secured jobs as messengers. However, this applied to male workers only as female workers could only aspire to being a *sirdarine*<sup>3</sup> or providing domestic help

During the process of centralisation, at the end of the 19<sup>th</sup> century and at the beginning of 20<sup>th</sup> century, sugar mills closed down. Many labourers who lost their jobs, had to move to another mill. Some relocated and started tobacco and tea cultivation. However, some of the alternative vocations did not provide a regular income, and they had to return to work on the sugar estates.<sup>4</sup>

The life-style of some improved because their parents had moved up or were liked by the plantation management. Life for many did not change much even if their parents had moved up in the hierarchy of the plantation. They had to start from scratch like everyone else. R/348 's mother was a *sirdarine*, implying that the income levels were high; yet he started working at the age of 8 years looking after the poultry, then as a labourer in cane fields and finally in the mill working on machines.<sup>5</sup> Sometimes, accidents led to such situations. Young girls had to start work: R/234's father was a *Sirdar* who lent money to other labourers but she had to start working at the age of 7 because her father could not work<sup>6</sup> and her mother, also a labourer, was the only earner in the family.<sup>7</sup>

The first half of the 20<sup>th</sup> century, thus was quite difficult for most of those interviewed. For women, particularly, working life actually became harder for them. In their grandparents' and parents' time (i.e. indentured period and one generation after), women did not work as labourers. They reared cattle, cut grass and undertook gardening jobs. However, gradually with the pressures of large families, which increased requirements and expenses, a desire to earn more to move upwards forced more and more women to take up regular jobs as labourers. What made things much more strenuous for them was that they continued to do cattle-rearing and cutting grass etc.,

along with new job as labourers, and they also had to look after the families and do the household chores. There were not many opportunities of mobility available for these women. In some rare cases, women remained as labourers throughout their working lives, primarily because in the sugar production, most of the occupations, except labour on the fields, were male activities.

Since the 1940s, most felt that there had been considerable improvements in the working conditions, compared to the times of their grandparents and parents. The late 1960s were considered as turning point when they started getting equipment, uniform, basic attire like shoes and gloves, sick leave, higher rates of wages and regular payments, less exploitation etc. There was a difference of opinion as to the input of leaders who secured these benefits. Based upon their personal political opinions, they cited the role of trade union leaders such as Jugdambi Sharma, Ramnarain, where others mentioned the role of 'SSR' and others still, Paul Berenger.

The employment card introduced after Independence was considered a very useful step taken by the post-colonial Government to ensure fair treatment for sugar estate workers and to entitle them to facilities such as equipment, uniform, leave, medical, although some of these facilities had existed for other categories of workers and their implementation always remained questionable.

Most interviewees did not like the hierarchy: the *sirdar* was described as exploitative, rude, dishonest and dominating. They would have to perform personal work for him such as bringing wood or grass etc. Some also mentioned physical violence. Several mentioned that the *Sirdar* could fire any labourer who displeased him. One respondent mentioned that as late as 1982, he lost his job because of a fight with the *Sirdar*.<sup>8</sup> The *Sirdars* interviewed, however, insisted that they were always very protective and good to their gang of labourers.<sup>9</sup>

## 2. WAGES

Wage levels always remained low, resulting in economic pressure on the families. Poverty forced women to work as labourers and even forced children to work at an early age, pushing them to leave school as they could not afford to pay for their education. In this context, large families in labouring classes thus faced a critical situation. Many respondents have stated that their parents had 8-10 children, several about 12, and some respondents even had 18 siblings.<sup>10</sup> In the labouring classes, human beings were considered as capital - more members in the family meant more income; but then, it severely restricted the growth of the younger generations - more children meant more expenditure on their education and general well being. Since the parents did not earn enough, larger families forced, not only the women, but also most of the children into work at a very early age, depriving them of a natural childhood and overall growth.

Wage rates differed across regions and across estates. Children called *chokras* (Hindi for children) were not allowed to work officially<sup>11</sup> but received anything from 20 cents to 50 cents per day in the 1930s and 1940s. This increased with their age and type of job.

Workers in the mill were paid more and artisans received higher salaries but put in long hours, especially during harvest time, when the mill was running to full capacity. A shift system was in operation as it had existed since the 19<sup>th</sup> century, and they had to work during the night. Wages were calculated initially on a daily basis then week and eventually on a monthly basis, according to the work. There were certain jobs like grass-cutting, cane-cutting and loading, tree-cutting where the wages were determined on piece meal basis.

Women were always paid less for their labour, and the standard rationale was that as women performed lighter jobs, they were paid less. In several cases it was found that the wages paid to women were actually half (or almost half) of the men's wages.<sup>12</sup> This stereotyping has its roots in the patriarchal discourse which does not find women capable of doing several things because of their relative physical 'weakness' compared to men. This was supported by the Colonial Administrators because it ensured relatively cheaper labour. We have several responses to support that women were doing almost the same work as male labourers, and yet they were being paid considerably lower.

Since the period of indentured labour, there were several deductions from the wages for one pretext or another: this system continued in the 1930s and 1940s. The actual wage obtained was

always less than that agreed upon. This practice was still continuing in the 1950s and 1960s when *sirdars* had the power to mark any one absent and deduct that day's wages, if the work was not done to the expected standard, making the actual wage payments less than the stipulated rates.

### 3. LIVING CONDITIONS

Living conditions have changed considerably during the 20th century. Many have bought their own property and built their own houses made of concrete although a few stated they lived in rented accommodation.<sup>13</sup> There were some unfortunate cases where they had lost their house through its sale and had to move to the camp.<sup>14</sup>

Most had lived on estate camps and gradually moved out to the villages. Living on a camp was a sign of poverty - those who were poor and could not afford lived on camps and there was a sense of accomplishment in building one's own house.<sup>15</sup> However, there was also some nostalgia for camp life. It had several advantages: wood was obtained for cooking, grass for animals etc.<sup>16</sup> Most importantly, living near one's place of work saved much time, effort and resources and made life easier and more pleasant. However, the camp houses were not available for all the labourers and those who owned houses were not given one, even if they wanted to stay on camps.<sup>17</sup>

For women particularly, marriage had an important influence on changing their places of residence - from village to estate camp or vice versa.

Living conditions were not very good; houses were made of straw; there was no electricity and sanitation was poor. The most critical aspect was that these conditions had a significant impact on the hygiene and health conditions of the population. There was a lack of clean water supply and toilets and in this, there was not much difference between camps and villages. Several camps and villages had no water supply and the residents had to take water from natural sources like wells, lakes or the river, and even the sea. Even for those which had water supply, this was very inadequate - one tap for the entire camp - people were filling water even at midnight or very early in the morning.<sup>18</sup> In those camps and villages which did not have the tap water, the residents often had to travel far away to fetch water from some natural resource.<sup>19</sup> This limited the availability of water for cleaning etc.<sup>20</sup> The quality of the water was also a matter of concern because several reports and documents mention the fact that people were using the same source of water for washing clothes, utensils, and then collecting it for cooking and drinking. Another matter of concern was the availability of toilets. Toilets were common, constructed away from the residences and were basically make-shift arrangements without proper arrangements for disposal. Some camps and villages did not even have that and residents were going in the open to defecate. These factors had serious repercussions on the health of the residents.

The 1960s were of the turning point for critical changes in living conditions - houses were now being built with concrete and electricity was being provided. A major cyclone, Carol, hit the island on 28<sup>th</sup> February 1960, causing massive devastation on the island. Most of the respondents referred to this cyclone as the reason for which houses started being built of concrete.

As occupational/ethnic policy existed, this was reflected in housing provision on estates. Labourers were housed in barracks or straw huts. Artisans had individual houses away from barracks. These were bigger, more spacious, built of concrete (while labourers' houses were made of straw or iron sheets).

### 4. EDUCATION

Education appears as a critical domain where a huge gap is observed in levels of education between male and female populations, as well as the existence of several dominating patriarchal stereotypes.

Getting an education was difficult because it was not free, and people had limited means for sustenance. Most of them worked and had no spare money to pay for school fees, buy books, stationery and dress. For some more unfortunate ones, even if they were admitted to good schools,

they were forced to leave in the middle<sup>21</sup> of their studies or even if attended the school they could not pay to sit the examinations and therefore could not have the certificate.<sup>22</sup> Another difficulty was distance – schools were often far away and the child had to walk several kilometres to attend school. This was a waste of their time and energy, as most of them were also working. They could not cope and simply abandoned their studies.

Despite these difficulties, many of the male respondents did manage to go to school and studied from standard III to standard VI (most of the respondents who went to school fall in this range) and a few even passed the CPE.<sup>23</sup> However, most of them were doing both: working and going to school. When they left school, they started working as labourers or at some other menial occupation in the sugar industry, which seemed to cause some kind of disappointment among those who had obtained higher qualifications, despite all the odds.<sup>24</sup> Very few could really make the transition.<sup>25</sup> Apart from low levels of education and a lack of opportunities, the critical factor for them not being able to make the shift in their work was the fact that the education was not linked with the requirements of the job market, and students were not given the vocational training which would have enabled them to make the crucial shift. Only one respondent has stated that he learnt carpentry at the RCA and then went on to work as a sampler in the laboratory on the sugar mill.<sup>26</sup>

For women, the level of education was very low. Only one respondent went up to standard VI, one up to standard IV and a few up to standard III and it had no links with the educational levels of the parents as R/272 points out.<sup>27</sup> Even in the informal institutions of instruction (like *Madarsa* or *Maktab*) and *Baithka* (or temples) their presence was very low, depriving them of almost all the advantages of education. Some of them could not go because there were no schools nearby, or had no proper dress; or had to drop out because of a lack of resources or some casualty like the death of the father or mother. But for many of them, it was the parental/ societal perception that 'it was not required for the girls to go to school because their place was at home' and general apathy that deprived them of education. In some cases, it was also opposed to maintaining control over girls' activities: 'if the girls are educated, they will write letters to boys' and therefore it was not good for them to go to school.<sup>28</sup> In several cases, male siblings went to school but girls were not allowed to go to school. It is interesting to note that these patriarchal/moralistic stereotypes were not limited to one ethnic community or only to Indic religions – respondents from Hindu, Tamil, Muslim and Christian all thought alike on the matter of depriving the girls of education.<sup>29</sup>

A closer look at the responses suggests that there was an interest among the women in education and it is significant to note that some of the female respondents regretted the fact that they did not go to school, and had they been educated, life would have been different for them.<sup>30</sup>

For education among the Indian diasporic community, community-cultural organisations, and *Baithkas* and *Maktabas* had a distinctive role particularly for those children who could not attend the formal system of education. These taught primarily Indian languages, religious teachings, general morality which was imbibed with religious-cultural value systems of those ethnic communities and basic literacy skills. However, some of these were running parallel courses and even awarding degrees like *Vidyavachaspati*, *Madhyama*, *Prathama* etc. following the education system in Sanskrit from India.<sup>31</sup> These institutions played an instrumental role in reinventing/ reasserting the diasporic identities along ethnic/linguistic and religious lines.

## 5. INTER ETHNIC AND INTRA ETHNIC RELATIONS; RACISM

During the indenture period, labourers from different religions/ ethnic communities were housed together, without much consideration given to their religious/ethnic affiliation, on the estates. The plantation system did not differentiate much between the groups. It is interesting to note that almost all the respondents echoed the same appreciation of the peaceful coexistence of different communities in camps and villages. Most of the respondents underline the fact that different communities lived together in harmony, had mutual cooperation, helped each other, shared each others' values and customs and most importantly celebrated cultural religious festivals like Holi, Cavadee, Maha Shivratri together. The place of interaction and common celebration was usually the *Baithka*. Almost all the respondents underline the critical role played by *Baithkas*, as the critical space of shared belonging for everyone, in bringing the communities together. It was, however, near perfect living in harmony. Incidents did occur though, such as when some people put

other people's houses on fire, which sometimes was fatal as well. Respondents did not elaborate upon the communities involved or the responsible factors behind such violent acts of hatred.<sup>32</sup>

Cohesion was evident primarily within the Indian community, among the Hindu, Tamil, Telugu and Marathi communities. There were a few Muslims living on camps; so interaction was limited with Muslims. Those Muslims, who were on camps or villages, lived in harmony with others and even participated in each others' religious/cultural celebrations.<sup>33</sup> Christians lived separately on the camps<sup>34</sup> primarily because of different kinds of jobs in which they were involved (as artisans mostly) which put them in another set of housing, away from labourers' barracks. This must have reduced the opportunities and occasions for their interaction with other religious/ ethnic groups. Perhaps because of their job profile<sup>35</sup> or for some other reason, these Christians considered themselves as superior and did not interact much with other communities. It was also stated that because these artisans were Christians, they were protected by the British masters and given better houses.<sup>36</sup>

Despite the harmony that appeared to reign, the extent to which this interaction and harmonious cohabitations led to more inter-ethnic and inter-religious relationships (i.e. through marriage) is not very clear, and we only have a few indications of this. If we look at the history of indentured period, we have many instances of inter-ethnic and inter-caste marriage taking place. These appear to be reduced as a result of consolidation of identities along caste, ethnicity and religious lines. But the sample under analysis in this report does not give explicit information on this. We have only two explicit cases of inter-communal marriages<sup>37</sup>, though some informants have mentioned that their grandmother spoke a foreign language and some informants mentioned the fact that a caste system existed and was practised in marriages.<sup>38</sup>

There are indications that the structures of dominance and exploitation were based on racism but these remains very subtle, except one case where respondent (R/197) clearly states that white plantation owners did not like black people, and *sirdars* were pressurised by the white field managers to mistreat labourers.<sup>39</sup>

## 6. REFLECTIONS/ PERCEPTIONS OF LIFE

The most striking reflection from the respondents concerns the younger generation - for most of the respondents, the younger generation does not respect elders, they lack values, do not want to work hard, while the youth were well mannered earlier. It indicates a serious generation gap in Mauritian society. With rapidly changing times, different generations have different priorities, value systems and norms of public behaviour. But in Mauritian society, these transitions appear very abrupt. There is an agonizing gap between the generations which needs serious consideration and investigation. It reflects a cultural gap as well as a 'cultural-identity' crisis that the younger generations are facing in terms of finding a fine balance between the traditional 'values' and contemporary compulsions.

Overall, there is a general sense of progress and accomplishment: 'have everything, no regrets'<sup>40</sup>; 'living conditions in Mauritius in better than past'<sup>41</sup>; 'proud to be a Mauritian'.<sup>42</sup> The most striking reflection of this sense of accomplishment comes from a 70-year-old woman - 'from childhood wanted to have own house and perform prayers, finally now have own house and celebrated Durgapuja.'<sup>43</sup> Some also reflect upon the way out - 'there should be more interaction between parents and children'<sup>44</sup>; 'younger generation should be more patient and work hard to get good education and secure good job. Give the best at work...so that country could progress.'<sup>45</sup>

However there are reflections which also indicate people's disillusionment. Some are more precise - 'life was better earlier'<sup>46</sup>; 'things were cheaper earlier, could save' etc. Some regret lost opportunities - 'not happy with life, would have been different if had been to school'<sup>47</sup>; and some are reflections of a general discontent with philosophical stroke of material v/s the moral - 'in the past there was poverty but people were honest....Nowadays even if they are educated yet they are dishonest. Nowadays people are more interested in material gains, in the past people were more religious'.<sup>48</sup>

## RECOMMENDATIONS

1. Opportunities need to be created but there should also be training for people in skills. Basic reform in the education of children is required to make them more receptive to the changing requirements of the global economy and able to compete at par in the age of global competitiveness. Otherwise even if the economy gets diversified and new opportunities are created through global business networks and capital, opportunities will be captured by outside talent.
2. Distance and cost of education seem to be the two crucial constraining factors for the children not going for Higher Education. Distance remains unresolved at least in the Tertiary Sector. Some students spend 4-5 hours a day travelling to the University and the level of tiredness is high. There could be two possible solutions for this - either taking the institution closer to the students by opening campuses in different parts of the island or bringing the students closer to the University by providing residences near the University. This will contribute to developing a community consciousness and a sense of togetherness among the younger generations by providing opportunities to interact more closely which is sorely missing. The example of Singapore can be cited. It is an island nation like Mauritius and the National University of Singapore had 10 student residential halls for their students and for foreign students.
3. It appears from the responses that there were very limited avenues available for the redress of work place grievances. Labour Tribunals need to be strengthened and legal advice provided free.
4. The generation gap is widening. Initiatives to bridge this gap must be initiated. More opportunities for inter-generational exchanges must be created and one must make the youth sensitive and accommodating towards the specific needs and outlook of older generations.

# WORKING AND LIVING CONDITIONS OF MAURITIAN SUGAR ESTATE WORKERS AFTER INDENTURE

## INTRODUCTION

It is ironic that we seem to know so much about the fate of indentured labourers in Mauritius and know so little about the experiences of workers in the sugar industry after the end of indenture. A cursory review of the literature on the history of employer and employee relations in the Mauritian sugar industry reveals that a majority of studies have focused overwhelmingly on the indentured labour period (e.g. Bissoondoyal 1984, 1986; Carter 1995; Allen 1999). That is not to say that no studies have focused on the working and living conditions of sugar estate workers after the end of indenture. For instance, the historian Daniel North-Coombes (1987) has provided us with a compelling account of the 1937 and 1943 strikes in the Mauritian sugar industry and what working conditions were generally like in the first half of the twentieth century. And the anthropologist Burton Benedict (1961), who conducted fieldwork in Mauritius in the 1950s, has provided us with a detailed study of the living conditions of Indo-Mauritians in villages and to a lesser extent in estate camps, a majority of whom were still reliant upon work in the sugar industry during this period. Nevertheless, one struggles to find any studies that address both the working *and* living conditions of sugar estate workers in Mauritius since the end of the indentured labour period. The following study represents a modest attempt at redressing this gap in the literature.

To rectify this imbalance in the literature, I will be relying to a significant extent upon the oral testimonies of elderly sugar estate workers, most of whom are between the ages of 60-80, and were interviewed by research assistants working for the Aapravasi Ghat Trust Fund (AGTF). In 2009, three research assistants, Stephan Karghoo, Christelle Miao Foh, and Dreesha Teelwah, along with the assistance of a number of community facilitators, interviewed over four hundred respondents from different parts of the island who had either worked on a sugar estate or had some form of association with the Mauritian sugar industry. The informants were asked to reflect upon not only what working conditions were like in the Mauritian sugar industry when they were younger, but also aspects of their private lives and cultural customs. For the purposes of this study, however, I will not be focusing on such things as wedding ceremonies, religious celebrations, rites of passage, inter-ethnic relations, or any other feature falling under the more general rubric of the cultural customs and practices of sugar estate workers in the earlier part of the twentieth century. To do so would take the study well beyond the scope of the mandate of the Truth and Justice Commission (TJC), one of the aims of which is to address the “consequences of slavery and indenture labour during the colonial period up to the present”.<sup>49</sup>

Some might argue that to ignore the cultural customs and practices of elderly sugar estate workers is to ignore a vital dimension of the “consequences” of the indentured labour period in Mauritius. However, I would beg to differ from this view. As many scholars would agree, culture is an autonomous product of the mind, and cannot so easily be reduced to either physical or material constraints, or the direct effects of working in the Mauritian sugar industry. By this, I do not mean to suggest that working and living conditions in Mauritius during the indentured labour period did not have any effect in shaping the cultural customs of Indian immigrants and their descendents. To do so would be very short sighted. But it is another thing entirely to argue that Indian immigrants came to Mauritius, empty-headed as it were, and let their lives be completely dictated to them by sugar planters. Culture, no doubt, was one of the few areas in which sugar planters found it more difficult to interfere in the lives of their employees. The example of African slaves who were brought to Mauritius before indentured labourers came from India and other parts of the world is an apt illustration. Many of their rights may have been denied to them as human chattel by slave owners, but that did not prevent African slaves and their descendents from finding ways to express themselves through music and dance or to cease practicing their spiritual beliefs.

The main benefit that stems from using oral interviews as a source of information to reconstruct the past is that it allows informants to express in their own words what life was like in Mauritius in the earlier part of the twentieth century. That the views of ordinary Mauritians was not adequately reflected in the decisions that were made by the social, political and economic elites that ran the colony prior to it becoming an independent nation should not surprise us. However, an inevitable ramification of this power imbalance is that we know very little about how ordinary Mauritians felt about the various kind of issues that were the order of the day in the fledgling colony’s history at

the onset of the twentieth century. As a method of research, then, oral history can help us to redress some of these imbalances in the historical record and it can shed new light on old debates as I hope shall become evident in the course of this study. The type of people interviewed by the AGTF's research assistants and their community facilitators includes the views of field labourers, skilled artisans, *sirdars*, job-contractors, markers and other estate personnel. This study does not pretend to be able to encompass the views of all of these informants. Given that field labourers are the most numerous employees in the Mauritian sugar industry, it is inevitable that their views will receive more consideration than others. But this should not be taken to mean that the views presented in this report have been accepted uncritically, or without being exposed to some form of critical scrutiny.

There are instances for example where the informants tend to confuse certain details or fail to adequately specify at what point in time the events being alluded to in the interviews occurred. To a certain extent, this is to be expected, as we are dealing with events that occurred some time ago and peoples' memories are limited by personal interests and biases. Yet in spite of these limitations, one can still discern recurring themes in the interviews pointing to similar experiences that Mauritian sugar estate workers experienced in the earlier part of the twentieth century. As I was not involved in collecting the interviews myself, and cannot read Creole and Bhojpuri or speak either competently, the two main languages the informants used to express themselves, I have had to rely on the assistance of a number of research assistants employed by the TJC. I designed a template that required the research assistants to listen to the interviews and write down details pertaining to a list of criteria I tried to ensure remained as open-ended as possible whilst focusing specifically on working and living conditions. Thus, I do not think it can be objected that the informants have been asked leading questions or that a narrow body of data has been chosen that seeks to only elicit critical views of the Mauritian sugar industry. This much can be discerned by referring to the questionnaire used by the AGTF's research assistants and the template I had the TJC's research assistants use which are included at the end of this report. (Audio records and transcripts of the interview are available too.) What I should also add is that I have chosen to interpret their views in accordance with one of the main criteria of the TJC Act, which is to address the "consequences" of the indentured labour period, and which I primarily interpret to mean how *Labour Laws* have affected the lives of sugar estate workers.

In addition to the oral testimonies of field labourers and other personnel involved in the Mauritian sugar industry, this study refers to a number of official enquiries commissioned by the British colonial authorities to investigate the working and living conditions of sugar estate workers both during and after the end of the indentured labour period. Towards the end of the indentured labour period, the British colonial authorities finally became more serious about tackling some of the injustices and abuses that had become a pervasive feature of the system at the end of the nineteenth century. In 1875, a Royal Commission was convened by the colonial government after being petitioned by a group of Indian immigrants who presented a list of grievances. When immigrants from India originally signed a contract agreeing to come and work in Mauritius they were promised they would be paid a basic wage and provided with free housing, medical assistance, and rations. However, many of the planters subsequently reneged on this agreement and either failed to pay indentured labourers the money they were owed for work they had completed or in many cases withheld their wages in order to try and re-indenture them. In addition to this, the medical attention they received was often less than satisfactory or their rations were arbitrarily reduced and they were forced to carry a ticket in order to allow them to travel beyond the radius of the sugar estate where they were housed and worked. Yet despite the fact that the 1875 Royal Commission highlighted these irregularities and made a number of recommendations to rectify this situation, many sugar estates in Mauritius were still failing to meet their legal responsibilities even after the end of the indentured labour period.

Nor should one assume that the official enquiries commissioned by the British colonial authorities were completely impartial or conducted as thoroughly as they might have been. One notices not only obvious discrepancies between the 1938 Hooper Commission and a similar enquiry by the Moody Commission in 1943 for example, both of which were commissioned to investigate the machinations of the Mauritian sugar industry after strikes by small planters and monthly-paid workers. But even in the Annual Reports of the Labour Department, established in 1938 to ensure that employers and employees met their legal obligations and to appoint field inspectors to conduct regular inspections of sugar estates, one also notices discrepancies in the reports written by the

alternating Directors of Labour and Labour Commissioners. Where the 1938 Hooper Commission confidently declared for example that housing conditions in sugar estate camps were satisfactory and that planters were doing all they could to comply with the necessary Labour Ordinances and the Department's regulations. The 1943 Moody Commission unhesitatingly affirmed that sugar estate housing conditions in the north of the island left much to be desired, and that hospitals and medical dispensaries on sugar estates were often poorly equipped. Nor was the Labour Department above making the same kind of mistakes and displaying a pronounced sense of inconsistency in the official reports it released from one year to the next based on its inspections of sugar estates. Even so, these reports still provide us with an invaluable source of information about how working and living conditions in Mauritius have evolved over the course of the twentieth century and provide a welcome point of comparison to the oral testimonies of the informants interviewed by the AGTF's research assistants.

The crucial question put before us by the TJC is whether or not employers in the Mauritian sugar industry have been meeting their legal responsibilities since the end of indenture and how one should evaluate their actions in the broader context of what they have done or failed to do in the past. The answer to this question depends upon how one is to interpret the wording of the TJC Act, and one of its main criteria, which as I have already indicated, is to assess the "consequences of slavery and indenture labour during the colonial period up to the present". The meaning of this terminology is not as straight forward as it might seem. In the English language, the word "consequences" conjures up such commonplace meanings as "it is a result of" or it is "an implication of" the following. But can one go so far as to argue that sugar estates in Mauritius are culpable for the consequences of their actions if we are taking into account a time frame extending well beyond the twentieth century? "Truth Commissions", as they have come to be collectively referred to internationally, are relatively recent innovations intended for the most part to address crimes or wrongs committed against humanity in the twentieth century. Yet in spite of the wide yawn separating the indenture and post-indenture periods in Mauritian history, I intend to argue that the Mauritian sugar industry does appear to be culpable for the reckless and at times callous manner in which it has treated its workforce. And, in particular, of flouting its legal responsibilities under existing *Labour Laws*. However, I should also add that this judgement is not necessarily applicable to all sugar estates in Mauritius, some of which have a record of treating their workers well beyond what was required of them by law.

## FINDINGS OF THE 1875 ROYAL COMMISSION

In order to make the case that the Mauritian sugar industry is culpable for its past actions, it is essential that we demonstrate that the industry has a poor track record when it comes to the way it has treated its workforce. One way of establishing this is to refer to the judgements that were handed down by the 1875 Royal Commission and to compare these findings to the industry's track record in the post-indenture period. The 1875 Royal Commission was convened by the British colonial authorities after being presented with a list of grievances by a group of Old Immigrants who principally complained about abuses relating to the ticket-pass system enshrined in the 1867 Labour Ordinance. Not being sufficiently conversant in English, their complaints were presented to the colonial government by Adolphe de Plevitz, a planter of German descent who offered a more comprehensive list of complaints of the injustices being committed by other planters under the indenture labour system in Mauritius. In their report, the Royal Commissioners sought to address both the petition of the Old Immigrants (or time-expired indentured labourers) and the various accusations outlined in Adolphe de Plevitz's pamphlet. The complaints outlined in de Plevitz's pamphlet were broader in scope and not only included criticisms of the behaviour of planters but also the failure of the colonial authorities to protect their British subjects. As part of their enquires conducted between 1872-1874, the Royal Commissioners interviewed various witnesses and visited 51 sugar estates and consulted the record books of estates to determine the validity of the accusations made by the petitioners and de Plevitz.

It is not the intention here to address all of the complaints pursued by the Royal Commissioners. Some of them, such as those pertaining to recruitment methods of immigrants from India, legality of contracts entered into in Mauritius as opposed to India, conduct of stipendiary magistrates empowered to pronounce verdicts on disputes between planters and labourers, ill-treatment of labourers by planters, or the abuse of the ticket-pass system, no longer seem to be relevant as they pertain more strictly to the indentured labour period. However, when it comes to complaints concerning the non-payment of wages and planters and *sirdars* or job-contractors making illegal deductions from the wages of labourers, or planters failing to provide adequate lodgings and sanitary conditions in estate camps, not only is it possible to demonstrate that these abuses continued after the end of the indentured labour period, but they are complaints that often appear in the oral testimonies of elderly sugar estate workers themselves. According to the 1875 Royal Commission, the non-payment of wages constituted one of the worst abuses of the indenture labour system as reflected in the large number of complaints brought before the courts by both Old and New Immigrants alike (Frere and Williamson 1875:582). Apart from keeping wages in arrears often for two to three months or more, the Royal Commissioners drew attention in particular to the "double-cut", a cunning method by which planters reduced the wages of labourers two days for every day they were recorded as being illegally absent. As the Royal Commissioners point out in their report, the double-cut was not in itself illegal, as what was originally viewed by the British colonial authorities with some degree of apprehension when it was first proposed by the planter-dominated Legislative Council, eventually passed into law with the passing of Ordinance No. 16 of 1862 (cf. Frere and Williamson 1875:303-311). It was the actual manner in which the double-cut was used by planters, not to mention *sirdars* and job-contractors, to make deductions from wages by recording labourers as absent when they did not complete a set task that the Royal Commissioners deemed to be illegal.<sup>50</sup>

Not only did the double-cut enable planters to save enormous sums of money on wages,<sup>51</sup> but even more remarkably, immigrants who sought to lodge a complaint with the authorities or were imprisoned for an offence were fined a further two days of wages everyday they were absent, and in many cases it was used as justification to prolong their contracts or to force them to re-indenture. As the Royal Commissioners point out in their report, this illegal use of the double-cut had become customary amongst planters and encompassed a wide range of deductions ranging from fining labourers for the theft of thatch or the loss of tools and even collecting grass or *brèdes* from rivers and streams without permission (Frere and Williamson 1875:310-311). But it was with respect to marking labourers as absent when they did not complete set tasks and making deductions from their wages without recourse to the decision of a magistrate which the Royal Commissioners found particularly objectionable. This "fiction", as it was described by one prominent colonial official

who was interviewed by the Royal Commissioners, consisted of marking a labourer as “sick” for not completing a set task even despite the fact that the labourer had in fact worked on that day.

Regarding deductions for unfinished tasks, we have been generally informed that men are required to complete their tasks next day; and that, failing to do so, they are marked sick, or have some other marks put against their names, signifying “malade travail, ” and are cut as if sick. The grounds on which this fiction, as the Surveyor-General calls it, is defended, are, that if the man has been put to task work and cannot finish his task, he is supposed to be sick in proportion to the work left unfinished; thus a day’s work upon the roads being to break 25 baskets of stones, or 150 baskets in the week, he is supposed to have been sick for two days, and fined accordingly (Frere and Williamson 1875:310).

What confirmed how widespread this illegal practice was for the Royal Commissioners was when they consulted the pay books of sugar estates. Upon inspecting these books, such as those of a member of the Chamber of Agriculture, whose conduct the Commissioners presumed should have been more exemplary than others, they found clear evidence that the proprietor of the estate had been fudging his records (Frere and Williamson 1875:312). Apparently it was common practice for planters to mark labourers as absent for unfinished tasks in the columns of their books, but when asked by the Royal Commissioners to inspect their books and pay-sheets, it was evident that pencil notations had been deliberately rubbed out to mislead the Commissioners.

However, we should not be deluded into thinking that the illegal use of the double-cut to make deductions from wages of labourers was only restricted to the planters. Although mention is often made in the literature on indentured labour in Mauritius to the usurious rates of interest charged on loans to labourers by *sirdars* and job-contractors, rarely do we find any reference to the fact that *sirdars* and job-contractors also took advantage of labourers and “robbed” them of their wages (Frere and Williamson 1875:403). The 1875 Royal Commission seems to be less clear about the evidence against *sirdars*, who, like job-contractors, were resented by planters because they could not control them and also because they were highly dependent upon them. With respect to job-contractors however, which the Royal Commissioners point out in their report is “closely connected with the *Sirdar* system-the *Sirdar* being, in fact, a job-contractor under another name”, the evidence is much clearer. The Commissioners cite a report by a Stipendiary Magistrate named Mr. Daly, who, based on his half-yearly inspection of estates in the district of Savanne, claimed that

[J]ob contractors are, of all employers, the most unscrupulous in endeavouring to profit by the curtailing of their servants’ wages, as he had, within the first six months, detected a system of illegal and unjust marking as absent, men whose amount of work or task did not satisfy the employing job contractor. He also, on the next page, mentions two cases, one at “Beauchamp,” and another at “La Flora,” where job contractors had marked for the forfeiture of wages, as if the labourer had been really absent, men who had not performed their allotted task (Frere and Williamson 1875:414)[.]

In fact, there is also evidence of job-contractors resorting to the double-cut in order to prolong the contracts of labourers in their gangs and of making false records in their pay-books. Just like planters, job-contractors were able to take advantage of the 1862 Labour Ordinance to mark as absent labourers who had to walk five miles to work and thus spent half their time walking rather than working, or of being able to gain one month of work at no expense if a labourer was absent 14 days in a month (Frere and Williamson 1875:416, 418). One of the reasons planters resented job-contractors was because they were able to gain these benefits without having to provide the same kind of facilities that planters were required to by law. Yet there is evidence that some job-contractors owned or ran their own estate camps and of even providing rudimentary medical care in some cases.

The 1875 Royal Commission is more equivocal when it comes to its pronouncements on the state of lodgings in estate camps. According to the Royal Commissioners, it was not until a new ordinance was introduced in 1867 that planters were required by law to provide lodgings for their labourers, as the provision of lodgings had until then depended upon the contractual agreement signed between the parties prior to the immigrant leaving India. However, as the Commissioners go on to point out in their report, it had in fact become customary for indentured immigrant labourers from India to be housed by planters, and initially it would appear that many were housed in the former

lodgings of slave labourers. The Royal Commissioners state that most dwellings in estate camps were made of thatch and straw, but they also visited several estates that had stone range barracks, among them “Mont Choisy”, “Bois Rouge”, “Trianon”, “Antoinette”, “Espérance”, “Bel Air”, “Benares”, and “Labourdonnais”, which struck the Commissioners as being superior to the more common thatch and straw huts (Frere and Williamson 1875:353). It turns out however that some of the labourers preferred thatch and straw huts to stone range barracks, the reason presumably being, according to one medical expert, that thatch and straw huts were healthier because “you cannot get contagion out of stone walls”. It apparently never struck this medical expert or the Royal Commissioners that labourers preferred thatch and straw huts because they would not have been nearly as hot as the stone range barracks which were made no doubt of local volcanic stone and were less well ventilated than thatch and straw huts. Some labourers were also forced by planters to build their own dwellings. Yet nor does this mean that labourers were not willing to avail themselves to lodgings provided for them at the expense of planters after being required by law. After Ordinance No. 31 of 1867 was introduced, servants had brought 75 complaints against masters, but only 11 were proved because of the ambiguous wording of the law.<sup>52</sup>

Concerning its pronouncements on sanitary conditions in estate camps, however, the 1875 Royal Commission is much less equivocal. Perhaps in view of the recent malaria epidemic that claimed thousands of lives several years before the proceedings of the Royal Commission in 1867, the Commissioners were emphatic about the need to maintain sanitary conditions in estate camps and to ensure that planters did their bit to reduce the risk from pestilence. They complained about the numerous untidy camps that they saw on their estate visits, of pigs and other livestock running amok amongst piles of refuse that had not been properly disposed of, and of inadequate latrine provision.

On 206 estates from which we have received returns, there are only 13 on which there are any arrangements whatever for conservancy in the camps. At “Providence,” as mentioned before, we found one camp swarming with pigs and filth, but the other as clean and neat as could be wished. So also at “Beauchamp,” where the people were certainly well-treated, the camp was in bad repair, dirty, untidy, and swarming with pigs. The very excellent camp at “Labourdonnais” was dirty, notwithstanding that there was a most suitable “*parc à cochons*” for the pigs; and while the planters object to Government appointing the medical men, because it will sever the connection between the labourers and their employers and put an end to the interest the planters take in their labourers, they will not hear of being made answerable for state of the camps, in which they lodge their labourers and foster the causes of sickness, because if they should trouble themselves upon those subjects, the labourers will leave them, and go to other estates where they are allowed to do more as they please (Frere and Williamson 1875:351).

The general view at the time, both amongst planters and British colonial officials, was that Indian immigrants cared little about hygiene and would have refused to re-engage if planters interfered and forced them to maintain cleaner dwellings. The Royal Commissioners seem to have seen through this ruse, however, and suggested it was more likely that planters used this reasoning as a convenient excuse to avoid having to pay the cost of improving sanitary conditions in estate camps. As the Commissioners point out in their report, they had evidence before them that Indian immigrants were willing to use latrines when planters made these available in estate camps (Frere and Williamson 1875:351). And upon asking a stipendiary magistrate who conducted half-yearly inspections of estates if he thought that sanitary conditions were worse in camps or the villages of Indian immigrants, they were told that conditions seemed more preferable in villages than estate camps (Frere and Williamson 1875:350).

The Royal Commissioners did not reject out of hand the planters’ argument that Indian immigrants were less conscientious about hygiene than Europeans seemed to be, pointing in particular to their propensity to use cane fields when latrines were not available. Nonetheless, they were adamant that planters should be held to account and “made answerable, not only for the health of their labourers, but that their habits do not tend to injure, not only their own health, but that of others.” In their report, the Commissioners make a number of recommendations regarding how planters might improve sanitary conditions in estate camps, the introduction of a system of latrines being one of the most important conditions they identified (Frere and Williamson 1875:591). In addition to this, they also recommended that inspectors should be empowered to enforce

compliance with sanitary regulations and to penalise offending parties without the need to resort to police intervention.<sup>53</sup> The Commissioners were no doubt unaware of how prescient their recommendations would later turn out to be. In the early 1920s, J.F. Kendrick, a medical expert working for the International Health Board, a philanthropic organisation funded by the Rockefeller Foundation, came to Mauritius and wrote a report in which he urged the colonial government to tackle the hookworm epidemic gripping the colony. Until Kendrick's report, which was released in 1920, it was not generally known how many people suffered from hookworm disease; but according to Kendrick, as many as two-thirds of the population were suffering from this parasitic form of disease (cited in Balfour 1921:15). Kendrick's report left no doubt that failing to address the island's sanitation problem, in particular the shortage of latrines in rural areas, would have disastrous long-term consequences for the health of the wider population. Yet in spite of these recommendations, sugar estates continually failed to tend to this problem well into the twentieth century.

## WORKING CONDITIONS OF MAURITIAN SUGAR ESTATE WORKERS AFTER INDENTURE

The working conditions of sugar estate workers in Mauritius have changed quite considerably since the end of the indentured labour period. The construction of large factories and in particular the mechanization of tasks that used to be done by hand has radically transformed the industry, leading to massive reductions in the size of the workforce. But upon comparing the description of cultivation and planting techniques summarised in the 1875 Royal Commission (Frere and Williamson 1875:289-292) with that of the Hooper Commission, which was written in 1937 (Hooper 1937:113-118), it is remarkable how little things had changed within the first half of the twentieth century. Not only were the cultivation and planting techniques very similar, but even the tools that labourers used do not appear to have changed very much. Tools such as the *pioche* (hoe), *pince* (crowbar), and *gratte* (scraper), were still being used in the first half of the twentieth century to carry out tasks such as removing rocks and weeds that were being performed in the nineteenth century. And although neither the 1875 Royal Commission, nor the Hooper Commission, deign to mention it, it is more than likely that most labourers were also working in the cane fields bare-footed and without any form of protective clothing. The consequences this had for the likelihood that labourers sustained work-related injuries will be discussed at a later point. To begin with, however, I would like to reproduce the Hooper Commission's description of what working conditions were like in the first half of the twentieth century in Mauritius. In spite of the fact that the Commissioners acknowledged there was no uniform method of cultivation in the Mauritian sugar industry, as conditions varied not only from one region to the next, but also from estate to estate, nonetheless, their summary provides us with a very good overview.

The tasks may be divided into two categories: that of planting and reaping virgin canes in the first place, and that of growing and reaping ratoon canes in the second. The majority of the operations prior to cutting and loading the canes are performed in the inter-crop season.

### (a) Virgin canes.

Dealing with virgin canes first, we find that the first task is that of 'désavannage' and 'parement'. The operation of 'désavannage', 'parement' and 'déchicotage' in the case of land not free from stones, taken together, consists of clearing the land generally, uprooting all ratoons which may be growing in the soil, and arranging the stones in lines. This operation is followed by 'fossoyage' or holing. 'Désavannage' 'parement' and 'fossoyage' are tasks making a very heavy demand upon the physical capacity of the worker, 'fossoyage' or holing being perhaps the heaviest of the three. All three are sometimes performed as one operation.

### 'Épierrage'.

The next task is 'épierrage' or clearing the land of stones and rocks. This is occasional work and does not always form part of the normal work of a labourer on a sugar estate. This is followed by 'pinçage', which consists of removing the stones from the holes with a 'pince' or crowbar.

### Planting cane tops

The land having been prepared for planting, the next operation is that of putting the cane tops into the soil. As soon as the labourer is in possession of the tops he makes them ready for planting, that is to say, he pulls off all superfluous leaves from the top and puts it in the hole, arranging it in such a manner that it sprouts easily; at the same time, he puts in manure and then covers the tops with earth.

### **Weeding**

The next operation to be performed is that of weeding. Weeding is the task of removing all necessary grass which has grown up round the cane and is known as 'nettoyage'. It is divided into several operations. The first weeding takes place about one month after planting is followed by the operation known as 'repiquage' which consists of placing fresh tops in the holes where the top previously planted has not taken root. This work is paid for at rates by the day, according to the amount of work to be done: there is a special rate for each of the operations.

### ***Spreading manure and subsequent weeding***

Then comes the operation of *spreading manure*. This consists of spreading pen or artificial manure over the soil according to the needs of the cane. It is considered to be a light task. The task of *spreading manure* is then followed by the second weeding, which takes place about two months after the first weeding, though the exact time would depend on seasonal variations of rain and heat, to be followed in turn by as much as five or six weedings and this is followed by a last weeding known as 'dépaillage' which consists of removing the straw from the cane. 'Dépaillage', which is sometimes required on two occasions, is generally done some fifteen or twenty days before cutting. The above constitute the number of tasks which are performed during the inter-crop season with reference to virgin canes.

### **Cutting the cane**

The next task is the first task of the crop season, which consists of cutting the cane, which is the principal task of all. It is generally admitted that the cutting of virgin canes is a harder task than the cutting of ratoon canes and higher rates are correspondingly paid for cutting virgin than for ratoon canes. It is estimated that a strong labourer can cut three tons per day, though this would not apply to B.H.10/12, the limit being two or two and a half tons per day, owing to the fact that the cane is of crooked growth and is tougher than the ordinary cane. This task includes that of carrying the cut canes to the railway line where the truck is standing; or to the path where the cut canes will be loaded onto carts to be taken to the factory, in the absence of a railway line. In the case of most small planters there is no railway line in existence and the cut canes have to be carried to the pathway in order to be loaded there on to a cart. It should be borne in mind, however, that if the place where the canes are being cut is situated a long way from the place to which the canes have to be carried in order to be loaded on the cart, the task becomes increasingly difficult of performance and, in all probability, a man who could cut a maximum of three tons per day when the task is situated near to the point to which he has to carry the canes to have them loaded on the railway trucks or cart, could not cut more than a maximum of two and a half tons a day. The task of cutting is frequently paid for at so much per *gaulette*, or measure of ten French feet.

### **Loading and transport**

The next task is that of loading and transport. This is one single task. The canes are picked up and loaded on to railway trucks standing nearby and then taken by stream traction to the factory.

### **(b) Ratoon canes**

The first task to be performed in connection with ratoon canes is that of 'revelage', which consists of arranging the straw in the inter-lines separating two lines of canes after the crop has been cut. This is a task usually performed by women. It is not regarded as a task making very severe demands upon the physical powers of the workers. This task is followed by that of *spreading manure*, which consists of spreading pen or chemical manure, or both, according to the estimated needs of the soil. The spreading of chemical fertilizers is frequently performed by small boys, and is an operation that can be finished at any time.

**'Buttage' or earthing up; 'nettoyage'**

*Spreading manure* is followed by an operation known as 'butage' or earthing up which consists of covering the manure placed on the ground with soil. This is also considered to be an easy task. The next task in connection with ratoons is that of 'nettoyage' which may consist of as many as six operations as in the case of virgin canes.

**'Dépaillage'**

The operation of 'nettoyage' is usually followed by 'dépaillage', which is carried out just before cutting begins. 'Dépaillage' consists of removing all superfluous leaves adhering to the cane. 'Dépaillage' completes the number of operations performed during the inter-crop and is followed by the work of cutting and transporting the cane, the conditions of work being the same in respect of ratoons as in the case of virgin canes, subject to the proviso that rates for cutting ratoons are slightly lower than in the case of virgin canes, as the work is considered to be of a slightly lighter nature. These are the principal operations performed on a large estate, from the clearing of land preparatory to planting, up to the operation of crushing the cane in the factory.

The Hooper Commission's description of cultivation and planting techniques in the Mauritian sugar industry in the first half of the twentieth century is admittedly limited in some respects, as there is no reference for example to how estate land was ploughed prior to planting, be it either by oxen or mechanized tractors. But it should suffice for our present purposes, as the type of tasks that it describes are the same as those described by the elderly sugar estate workers who were interviewed by the AGTF's research assistants, most of whom were field labourers.

As the Hooper Commission's description of cultivation and planting techniques in the Mauritian sugar industry in the first half of the twentieth century implies, the main criterion used to distinguish men and women's work is the physical strength required to do arduous tasks. Lighter tasks such as *spreading manure*, weeding and removing straw from cane was usually performed by women or a third group of workers consisting of women, children and invalids and also appears to have been used as justification for paying them less than men (cf. Hooper 1937:166). However, it would also appear that women were required to perform more physically demanding tasks than men normally performed and were perhaps better suited to doing such as cutting cane, loading it, and the removal of stones. In an undergraduate dissertation by a student of the University of Mauritius who interviewed four elderly female sugar estate workers, some of whom were still working at the time, several of the informants complained about having to perform physically demanding tasks in the past like loading cane. "We had to walk on the 'mardier' [wooden plank] to put the cane in the 'corbeil' [cane barrow]. It was ... very exhausting work for ladies like us. We had to put the cane on our head and walk along the 'mardier', which was very high. We used to fall down too (Sooben 2009:17)." The elderly female sugar estate workers interviewed by the AGTF's research assistants echoed this sentiment, but several of the informants<sup>54</sup> also claimed they were paid less for doing tasks men normally performed. It is difficult to determine the veracity of this claim. For instance, if we refer to the Annual Report of the Labour Department (ARLD) of 1945, which provides a detailed breakdown of the tasks men and women were supposed to perform and their rates of pay as outlined in an amendment to the Minimum Wage Ordinance of 1934, it states that women who work in the *Grande Bande* were not exempt from doing any tasks "except holing, uprooting, forking, and crowbar work".

In Mauritius, the "Grande Bande" and the "Petite Bande" is a way of organising workers into teams who are responsible for performing specific tasks going right back to the early days of indenture. These groups are still used in the Mauritian sugar industry today, and as I alluded to above, the main criterion used to distinguish the tasks that each group should perform is based on the physical strength required to perform certain tasks. This criterion has been used as further justification to determine the wage levels of workers in the two groups, with the obvious ramification that labourers who work in the *Grande Bande* are paid more than those working in the *Petite Bande* (or "granban" and "tiban", as Mauritian sugar estate workers more commonly refer to them in Creole). Yet while it does not appear that women were exempt from doing physically demanding tasks such as cutting and loading cane for instance, tasks often described by both male and female informants as being the province of men who worked in the *Grande Bande* and which they accordingly rationalized was the reason men were paid more than women. The ALDR of 1945

indicates that women who worked in the *Grande Bande* were being paid less for doing tasks that appear to be little different to that which men who worked in the *Petite Bande* performed (ARLD 1945:24-26). According to the ARLD of 1945 men who work in the *Grande Bande* are “required to perform any sort of unskilled or semi-skilled labour on a sugar estate”, while men who work in the *Petite Bande* are “required to perform the same sort of labour ... but with a reduced task and not bound to do holing”. This sounds like the same type of tasks that women who worked in the *Grande Bande* were expected to perform, and indeed if we compare the ARLD of 1956, which reproduces a copy of a collective agreement reached between the Mauritius Amalgamated Labourers’ Association and the Mauritius Sugar Producer’s Association, it states that women working in this group were not expected to cut or load cane.

Women, Class, I, Grande Bande-Labourers capable of performing and required to perform any task appertaining to unskilled labour, but not bound to do holing, uprooting, forking, crowbar work, loading, cutting, heaving cleaning, heavy *buttage*, [and] *spreading manure* involving the carrying of a load of more than 18 kilos of manure per basket” (ARLD 1956:21-22).

Thus it entirely conceivable those female sugar estate workers who were not covered by this agreement would have been paid less than men were. And by the same token, we should not rule out the possibility that those female sugar estate workers who were covered by this agreement were also paid less than men for doing similar types of tasks if their employers failed to abide by the collective agreement.

Further light can be shed on these claims by referring to *Labour Laws* that have been enacted over the course of the twentieth century and how they have affected female sugar estate workers. It is of interest to note that until 1973, no law had been introduced delineating what types of tasks female labourers were expected to perform.<sup>55</sup> Although the Minimum Wage Ordinance of 1934 stipulated the rates of pay and types of tasks to be done by both male and female labourers, the amendment the colonial government made to the ordinance in 1944 was principally aimed at ensuring that sugar estates complied with the law and paid labourers the wages they were entitled to, as one of the main conclusions to stem from the 1943 Moody Commission report was that the failure of the industry to implement minimum wage rates was one of the chief causes of the 1943 strike. This apparent neglect of the rights of female labourers, which probably goes some way towards explaining why they were paid less for doing some of the same types of tasks as men, may also reflect their marginal position in the Mauritian sugar industry since the days of indenture. As Marina Carter (1992:115-116) has pointed out, Mauritius was exceptional insofar as after 1842, it was the

only [British] colony which failed to engage Indian women as indentured labourers. The numbers of women formally employed on estates was consequently never very high, even in the principal sugar-growing districts ... In 1846 9% of the total Indian female population was registered as part of the plantation labour force. At the time of the malaria epidemic in 1867, less than 100 women were reported as working on the sugar estates. By 1871, when the next census was taken, this figure had risen, even so, only 7% of women [or 1,808 Indian females out of a total estate population of 24,425] were officially employed as plantation workers.<sup>56</sup>

With the end of indenture, however, the rate of women’s participation rates in the Mauritian sugar industry’s workforce gradually increased. According to Vijaya Teelock (2009:360), the Great Depression to a significant extent accounted for this increase. “Another effect of the Depression was to bring more women into wage labour: in 1921, there were for example, 9,373 Indian women working, by 1931 this had jumped to 14,674.” These participation rates continued to increase after the Great Depression as more female labourers joined the ranks of the Mauritian sugar industry.

Probably no singular explanation can account for this dramatic rise in female participation rates in the Mauritian sugar industry as the twentieth century unfolded. The elderly female sugar estate workers who were interviewed by the AGTF’s research assistants provide a number of different reasons as to why they decided to become labourers. Some women for example were forced to work after their husbands were incapacitated by a life-crippling injury, while others stated that after their husbands died, they had little choice but to become labourers in order to look after their children. Many of the informants also indicated that they opted to become labourers after

getting married, though without always providing a succinct explanation for their actions. One is tempted to ascribe this decision to the need for women to play their part in contributing financially to the upkeep of poorer families, in view of the fact that there would be more mouths to feed after getting married and having children. But as tempting as it might be to point to rising levels of poverty as a way of accounting for these increases in female workforce participation rates, one has to temper this possibility against the knowledge that many women did not feel compelled to enter the workforce but instead preferred to stay at home in order to raise children or to work on their own land and to rear livestock (cf. ARLD 1950:30). One also has to ask why it is that sugar estates in Mauritius, which previously had shown an aversion to employing female labourers during the indentured labour period, increasingly opted to employ more female labourers over the course of the twentieth century. These numbers continued to increase such that by the end of the Second World War, female labourers accounted for almost half of the Mauritian sugar industry's workforce, or a maximum of 18,126 female labourers at the height of the crop season in 1945 (ARLD 1945:46). It is important to note, however, that more female labourers tended to be employed during the inter-crop period whereas men made up the bulk of field labourers during both the inter-crop and crop periods. The same logic used to determine how much men and women should be paid for the types of tasks they performed, also seems to account for the industry's preference to employ more women to do lighter tasks between crops and for men to do heavier tasks such as harvesting cane when the crop has to be harvested.

As indicated earlier, after independence, a law was finally introduced restricting the types of tasks female sugar estate workers were allowed to perform. It was part of a wider political movement in the 1970s led by Paul Bérenger and the Movement Militant Mauricien that sought to improve the working conditions of Mauritian workers. Although it may not have appeared so at the time, the introduction of a series of laws requiring sugar estates to provide workers with protective clothing represents perhaps one of the most important advances made on behalf of labourers in the Mauritian sugar industry by the trade union movement.<sup>57</sup> The failure or lack of willingness on the part of most sugar estates to furnish their employees with basic protective clothing is one of the most frequent complaints that appear in the interviews of elderly sugar estate workers. Perhaps more any other complaint, this issue demonstrates the callous attitude of the Mauritian sugar industry towards its workforce, for it appears that most sugar estates would not have felt compelled to do anything until forced to do so by the intervention of trade unions and the subsequent ratification of these demands by the national government. Although both male and female labourers often complain in their interviews of not being provided with protective clothing and of having to provide their own tools, the most poignant testimonies are usually furnished by elderly female sugar estate workers. For instance, one informant<sup>58</sup> complained she would hurt herself when she had to remove straw from the sugarcane just prior to it being cut by male labourers (the process described as *dépaillage* in the Hooper Commission's summary above). She also says that she used to wear "*linz lakaz*", that is, her everyday clothes to work, and that workers were not provided with uniforms, boots, gloves and masks until after independence. Similarly, in Pamela Sooben's (2009: 16-17) undergraduate dissertation referred to earlier, the elderly female sugar estate workers she interviewed complained of having to remove straw from sugarcane. In order to protect themselves, they wore long socks over their hands, but that still did not prevent the straw from piercing their old socks and drawing blood from their hands. "When the *sirdar* asked us to remove 'divet' from sugarcane, especially 'canne coulou', we would run away because these 'divet' pierced our old socks, hands and fingers. We also used to get rashes". These women also complained of finding it difficult to cook for themselves after a day's work because of the injuries they sustained to their hands while working in the cane fields without gloves (Sooben 2009:8).

It is instructive to compare photos taken of sugar estate workers in Mauritius in the first half of the twentieth century with ones taken more recently (see opposite page). In the older photos, the male and female labourers working in the cane fields are all working bare-footed and are attired in their everyday clothes. Whereas in the more recent photos, they are wearing boots and gloves to protect their feet and hands, a hat or scarf to cover their heads, and their uniforms are made of much thicker and sturdier material.<sup>59</sup> If we are to go by the interviews collected by the AGTF's research assistants, it would appear that for much of the twentieth century, most Mauritians got around without any form of footwear whatsoever. For example, one informant<sup>60</sup> states he had little choice because tennis shoes were too expensive in those days. While a number of other informants describe the type of footwear they wore when footwear became more affordable, such as the "tanga", "mariposa", and "kalpa", which from what I have been able to gather were canvas

slippers of some sort and sandals made of wood. Apparently, these types of footwear were not suitable for working in the cane fields and the informants usually opted to work bare-footed instead. Yet in spite of their lack of financial means, poverty did not prevent labourers from finding ways to protect themselves while working in the cane fields. Once again, the oral testimonies of female labourers are highly instructive in this respect. Some women wore long-sleeved shirts that they borrowed from either their husbands or a male relative in order to protect their arms from the sun and insects in the field, and many female labourers wore an apron made of “goni”<sup>61</sup> which they wrapped around their skirts to protect the outer layer of their clothing from wear and tear. Also, as Pamela Sooben (2009:8) points out in her undergraduate dissertation, female labourers used old socks to protect their hands when they had to remove straw from sugarcane, and as time passed more female labourers wore “chapeau la paille” or straw hats to protect their heads from the sun.

One could argue the Mauritian sugar industry may not have seen why they had to provide their workforce with protective clothing when for a greater part of the twentieth century they went without footwear and worked in their everyday clothes. To do so though would be to invoke the same type of reasoning that planters resorted to in the days of indenture to avoid incurring expenses on the grounds Indian immigrants faced worse conditions in their country of origin and there was no need to make any improvements. As the Royal Commissioners pointed out in their 1875 report, however, Mauritius was not India, and the planters bore a moral responsibility to ensure that they provided working and living conditions of benefit to the wider society (Frere and Williamson 1875:352). In any event, it is still odd that the colonial authorities themselves never seem to have recognized the importance of legislating for the provision of protective clothing for field labourers on sugar estates even though measures had been put in place to compensate workers for work-related injuries. The enactment of the 1931 Workmen’s Compensation Ordinance covered workers who were incapacitated as a result of a work-related injury for a period of more than seven consecutive days. In addition to this, the Factories (Safety of Workers) Ordinance was enacted in 1939, but it principally applied to factory workers. Prior to 1960, the Annual Reports of the Labour Department do not provide details about the type of injuries that field labourers sustained on the job as they only focused on factory workers. In 1960, however, for the first time, the Labour Department provides a detailed breakdown of the type of injuries field labourers complained about to labour inspectors. Where the previous focus had been on factory workers, now the inspectors broadened their enquiry to include statistics of different industries, “cause of injury”, “nature of injury”, “location of injury”, and “duration of incapacity”. Of particular interest are their statistics for the sugar industry. As the statistics illustrate, out of a total of 3,152 work-related injuries recorded for the sugar industry in 1960, a majority of these injuries were of short duration, affected the upper and lower extremities, resulted in contusions, abrasions, and punctured wounds, and were caused by stepping on or striking against objects and the use of hand tools. In other words, the kind of injuries that field-labourers who are not provided with protective clothing are likely to sustain (ARLD 1960:53-57).<sup>62</sup>

But perhaps the most serious complaint that comes out of the interviews with elderly sugar estate workers are those pertaining to non-payment or under-payment of wages. It most clearly demonstrates a long-term pattern of exploitation by personnel in the Mauritian sugar industry going back to the early days of indenture. As I pointed out earlier, the 1875 Royal Commissioners concluded one of the worst abuses committed by planters were the illegal deductions they made from the wages of indentured labourers. It is highly disconcerting to learn, therefore, that these abuses appear to have continued well after the end of the indentured labour period. These abuses have not only been documented in the various enquiries convened by the colonial authorities into the machinations of the Mauritian sugar industry after the end of indenture, but are also underlined in more recent commissions of enquiry convened after Mauritius became a republic. More often than not, complaints pertaining to illegal deductions made from wages primarily apply to job-contractors, but in the interviews collected by the AGTF’s research assistants, there is also evidence that estate personnel and managers have been complicit in these abuses. A point not lost on the commissioners involved in both the Hooper and Balogh Commission enquiries (Hooper 1937:166-167; Balogh 1963:149-151), who noted that these abuses could not have continued without the tacit knowledge or cooperation of the managerial staff of the Mauritian sugar industry. The crucial question that remains, however, is how it is possible that these abuses were allowed to continue despite the fact that they have been extensively documented in the various commissions of inquiry into the Mauritian sugar industry convened since the end of the indenture labour period.

The passing of the 1922 Labour Ordinance marks an important turning point in the history of Mauritius as it finally did away with the use of penal sanctions in civil contracts between planters and labourers and coincided with the end of the indenture labour system. However, it only covered immigrants and did not theoretically apply to Mauritian-born labourers and the forfeit of wages for breaches of contract was still allowed under this ordinance. It was only with the passing of the 1938 Labour Ordinance, which sought to implement the recommendations of the Hooper Commission of enquiry into the 1937 strikes, that fining labourers for bad or negligent work was finally disallowed. This ordinance was applicable not only to monthly but also casual workers and was responsible for introducing a raft of changes such as a six day working week and eight hour day, legislating for over-time work, the registration of trade unions, maternity allowances for women, the regulation of sanitary conditions on estate camps, and paved the way for a transferral of power from the Protector of Immigrants to the newly created Labour Department. Yet in spite of these legislative changes, there is evidence that job-contractors, *sirdars* and estate managerial staff were still marking labourers as absent when they failed to complete a set task or forced them to redo tasks they designated as unfinished. The use of the double-cut, or fining labourers two days wages for everyday they were absent, seems to have been discontinued with the end of the indenture labour system, although Daniel North-Coombes (1987:30) claims it was still being enforced in 1938. But that does not mean that the practice of marking labourers as absent when they had done a day's work, or "maron", in the words of the elderly sugar estate workers themselves,<sup>63</sup> and making illegal deductions from the wages of labourers was itself discontinued.

The oral testimonies of elderly sugar estate workers are quite emphatic on this point and suggest the practice was widespread in the Mauritian sugar industry. It affected both male and female labourers and the informants describe being forced to redo tasks or marked as absent and having their wages deducted by not only *sirdars* and job-contractors, but also field supervisors, markers and estate managers. For instance, one female informant<sup>64</sup> says that at the sugar estate where she worked, *sirdars* were harassing labourers all the time and would tell them that their work was not satisfactory, and of being forced to start all over again. She said that at times the situation got so frustrating that she just wanted to sit down and cry. Another informant<sup>65</sup> describes the *sirdars*<sup>66</sup> where he worked as being very strict with workers and forcing labourers to collect wood for them, and alleges that when "markeurs" (i.e. pay-roll clerks) paid workers, they would rob them of their wages. An informant<sup>67</sup> who rose from being a field labourer to work as a marker himself, also describes *sirdars* engaging in these illegal practices, referring to it in French as "trucages". Describing his responsibilities as a *sirdar*, another informant<sup>68</sup> said that at the sugar estate where he worked, the "kolom" (or field supervisor) would check on the work of *sirdars* and labourers and that if he was not satisfied with the quality of the work, he would mark labourers as "ena sans al maron"<sup>69</sup> and that they "pa gagn zot kas".<sup>70</sup> Similarly, another informant<sup>71</sup> states that the manager of the estate where he worked would order *sirdars* to tell the labourers to redo their work if he was not satisfied with the quality of their work, even if they had done it properly. As the informant points out, "misie-la" (the estate manager) would come and check on the labourer's work after two days, hence by this time some of the weeds could have grown back, making it easier for him to find an excuse to tell the labourers to redo their work and deduct their wages. The informant added that he and his workmates could not contest the orders of the estate manager and they had no choice but to complete the "latas" (or load of work), even if they found it too difficult. Of course, this would have also made it easier to deduct the wages of labourers on the pretext that they had failed to complete the task required of them.

It should be pointed out that a number of informants confirm that there were instances of labourers not doing their work properly and describe *sirdars* and other estate personnel who they worked under as being very reasonable and pleasant to work with. But that should not detract from the fact that abuses have taken place, and that practices that one would expect to be more characteristic of the indentured labour period, continued after the end of indenture.<sup>72</sup> Complaints pertaining to the non-payment of wages, and in particular job-contractors, appear in the reports of various commissions of enquiry convened to investigate working conditions in the Mauritian sugar industry since the end of indenture but the problem never appears to have been stamped out. The Labour Department, later renamed the Ministry of Labour in 1962, and the Ministry of Labour and Industrial Relations in 1974, started documenting the complaints of labourers in their annual reports as early as 1938, and complaints pertaining to the non-payment or under-payment of wages are one of the most common complaints that appear in their reports.<sup>73</sup> As can be seen from their reports between the years of 1951-1980/81, which actually document the sums involved, the sums

of money are quite significant, but it is also important to bear in mind that not all of these complaints would have applied to the sugar industry, and that a large number of the complaints were eventually resolved and in most cases labourers were reimbursed for lost wages.<sup>74</sup> But in view of the fact that these abuses were so extensively documented, year-in, year-out, in the annual reports of the Labour Department and Ministry of Labour, why were they not stamped out? To arrive at a better understanding of this complex issue, it is necessary to review what the various commissions of enquiry into the Mauritian sugar industry have had to say on the matter.

Most of the commissions of enquiry that have been convened to investigate the machinations of the Mauritian sugar industry since the end of indenture have principally focused on complaints pertaining to insufficient wages and the failure of millers to pay small planters a fair price for their cane. Since these complaints do not appear in the oral testimonies of the elderly sugar estate workers who were interviewed by the AGTF's research assistants, I do not intend to pursue those issues here. The first commission convened after the end of indenture was the Hooper Commission. The Hooper Commission was convened to investigate the 1937 strikes led by casual workers and small planters. Amongst other issues, it states that

One of the principal complaints of the casual labourer is that before paying him his wages, the contractor, or *entrepreneur*, caused more work to be done by him than he was paid for, by using a false *gaulette*, retaining the difference for himself; the labourers claim that very often they are at the mercy of the contractors, as they do not know, or are not told, the amount of work they have done and have to take what the contractor gives them. They allege that the estates openly connive at the breach of the law by contractors, whose names occasionally are fictitiously borne on the estate books as estate employees, in order to save the contractor the necessity of paying the licence fee; and that estates frankly expected the contractors to take a small percentage of the pay of workers per *gaulette* in part payment for their services (Hooper 1937:166-167).

Noting the frank admission by some estate managers as to their lack of knowledge of precisely how much contractors were paying casual labourers since they paid contractors a lump sum for performing an agreed upon amount of work and left the payment of labourers in their hands. The commissioners recommended that one way of countering this problem was to have the estates pay labourers directly and to introduce a more thorough system of record-keeping of hours worked by labourers and wages paid, and that "the amount and remuneration for all tasks should be made public by being posted up on a board and that the measurement of all fields should be posted up". The commissioners also appear to have accepted the labourer's claim that contractors were cheating labourers by under-recording the amount of work they were actually doing by employing misleading methods of measurement (i.e. the French *gaulette*).<sup>75</sup> As it turns out, both recommendations were subsequently passed into law with the passing of the 1938 Labour Ordinance.

The Moody Commission was convened to investigate strikes led mostly by monthly workers in 1943 and does not discuss any complaints pertaining to the non-payment or under-payment of wages. However, these complaints resurfaced when the Balogh Commission was convened in 1962 to investigate further turmoil in the Mauritian sugar industry. Once again, the complaints primarily related to job-contractors contriving to pay labourers less money than what they were owed through the manipulation of the piece-rate system of payment.

Complaints have in fact been raised against this system for a long time. Allegations have been made to us and previous commissions about fraudulent practices. The main charge has been that in the conditions of unemployment or threatened unemployment, especially in the period between the crops when the labour market is slack, some job-contractors manipulate the piece rates by altering the task in such a way as to absorb for themselves the part of the remuneration due to the workers (Balogh 1963:149).

The commissioners go on to point out that it is "impossible to ascertain the truth of these allegations", even despite the fact they were aware that "A number of successful prosecutions indicate that there is some substance to these complaints".<sup>76</sup> At the public hearings convened to hear these allegations, the Mauritian Sugar Planter's Association, the main organisation representing millers and large planters, strenuously denied the allegations and assured the

commissioners that it was inconceivable these abuses were taking place, as measures had specifically been put in place to “exclude such malpractices” along the lines first recommended by the Hooper Commission. Yet it is interesting to note that at least with respect to ensuring estates and job-contractors kept accurate records of hours and wages earned by labourers after the 1938 Labour Ordinance passed into law, the Labour Department was continually turning up evidence of poor recording keeping practices and for which labour inspectors often fined them. These protestations of innocence may sound somewhat hard to believe coming from an industry that does not have a very good track record when it comes to honouring their legal agreements and who, with the benefit of hindsight, and the oral testimonies of elderly sugar estate workers, appear to be directly implicated in perpetuating these abuses. But of course the sugar estates have always had a vested interest in making sure the job-contracting system was not abolished as it would have put an end to one of their main means of recruiting workers, particularly since the industry has consistently been moving towards the employment of casual workers and the retrenchment of monthly or full-time workers for the greater part of the twentieth century.

In line with the findings of the Hooper Commission, the Balogh Commission proposed that the best way to eliminate these abuses was for the estates to pay labourers directly. But in contrast to the 1961 Meade Economic Report, it stopped short of calling for the abolition of the job-contracting system, even though the commissioners stated that they hoped “eventually the job-contracting will be replaced by more conventional methods of labour recruitment” (Balogh 1963:151). They, too, it seems, recognized the job-contracting system played a vital role as a method of recruiting workers for the sugar estates and desisted from making any recommendations that would hamper the ability of the industry to hire workers. The next time that complaints about job-contractors resurfaced was in the 1983 Manrakhan Commission of enquiry into the Mauritian sugar industry. The commission’s allusion to this complaint is very brief, and for the most part relates to the fear labourers had of being employed on less favourable terms under job-contractors as a result of further pushes to mechanize the industry and retrench full-time workers during the 1980s (Manrakhan 1983:118-119). The key words here are “less favourable terms”. In a conversation I had recently with the secretary of the Sugar Industry Labourer’s Union, Mr. Revanand Ramjuttun told me that as more sugar estate workers accept Voluntary Retirement Schemes (VRS), many are re-employing with job-contractors under less favourable terms. Not only are they forced to sacrifice many of the benefits that they used to enjoy as full-time workers, but they are also being paid less than they were before and their bargaining power has been completely diminished. Thus, one is tempted to question just how beneficial VRS redundancy packages actually are for the average sugar estate worker in Mauritius.

## LIVING CONDITIONS OF MAURITIAN SUGAR ESTATE WORKERS AFTER INDENTURE

One of the main purposes of the AGTF's oral history project was to find out more about estate camp life as it is recognized that this way of life is fast disappearing.<sup>77</sup> But underlying this recognition was the problematic assumption that residents of estate camps are purported to be the direct descendants of the first waves of indentured labourers from India who were housed on the estates. This uncritical assumption is reflected for instance in the Hooper Commission's report which in comparing the complaints of casual and monthly workers during the 1937 strikes, states that monthly workers "are the descendants for the most part of the original indentured immigrants (Hooper 1937:161; cf. Hooper 1937:176). This assumption appears to be informed by the belief that estate camp populations are stable communities that have been insulated from demographic fluctuations and change. Thus, according to this line of reasoning, estate camp residents should be viewed as being the most direct descendants of the "original indentured immigrants", as the Hooper Commission report describes them, because their living conditions most closely approximates what life was like for indentured labourers during the nineteenth century and their communities have remained largely undisturbed. But as the Annual Reports of the Labour Department show, after the end of indenture, estate camp populations were not in fact stable communities consisting of people who it can be claimed were the direct offspring of former estate camp residents, as these communities were subject to back and forth movements and the injection of new arrivals. For instance, in 1945, the Labour Department undertook a census of estate camps and not only determined that just under 50% of the population were born outside the estate camps but that "workers easily move from camp to village and back again as it suits their convenience, [while] others are firmly attached either to their village or to their estate camp".

There is another reason why this assumption is problematic. As I pointed out in a subsequent review of the various memoranda that were written detailing how to initiate the AGTF's oral history project, it is problematic to refer to estate camp residents as the "descendants of indentured labourers" without mentioning the thousands of time-expired *and* non-expired indentured labourers<sup>78</sup> who moved off the estates and established independent villages. The movement "A form of liberation: from the camp to the village", as Raj Virahsawmy (1984) has famously described this process, was already under way before the end of the nineteenth century, and it would appear that a majority of Indian immigrants were living in independent villages well before the turn of the twentieth century. As Benedict (1961:27) points out, "In 1861 there were 84,727 (44% of the Indian population) Indians living on estates. Ten years after the number had dropped to 61,893 (28% of the Indian population). By 1904 there were only 40,426, (approximately 15%) Indians left on estates". The reason it is problematic to refer to estate camp residents as the "descendants of indentured labourers" is because this implies that they are the only, or the most representative, descendants of indentured labourers living in Mauritius today. In this usage, the term is too finite and not flexible enough and seems to imply that it possible to accurately determine who can be regarded as a more genuine or "original" descendent of an indentured labourer. Rather than try to determine who is a true descendent of an indentured labourer, in this report I will be primarily focusing on Mauritian sugar estate workers, or in other words people working in the sugar industry after the end of indenture who are at the very least second or third generation born Mauritians.

A further consequence of this problematic assumption is that the AGTF's research assistants did not adequately query elderly sugar estate workers about Mauritian villages because of the ostensive focus on estate camp life. But that does not mean that the informants do not describe what their own living conditions were like if they did not live in an estate camp. In the process of describing what living conditions were like in estate camps, informants who have lived in villages most of their lives invariably reflect upon their own living conditions, and as such it is possible to get some sense of what life was like in Mauritius's villages in the earlier part of the twentieth century. In addition to the oral testimonies of elderly sugar estate workers, we also have the benefit of being able to draw upon the anthropologist Burton Benedict's ethnography of Mauritian villages in the 1950s. Benedict briefly describes living conditions in estate camps, but for the most part his ethnography is principally taken up with exploring village life and the ramifications of it for Indo-Mauritians

living in an agrarian society dependent on the export of a single cash crop. Benedict's ethnographic descriptions of village life in Mauritius is an indispensable aid for understanding what the living conditions of sugar estate workers were like in the earlier part of the twentieth century, and I will be frequently returning to his work in order to buttress my descriptions of living conditions in estate camps. Then there are also the Annual Reports of the Labour Department and the various commissions of enquiry into the Mauritian sugar industry that provide us with further observations that Benedict overlooks in his ethnography.

For the average sugar estate worker living in an estate camp in the earlier part of the twentieth century, the day began like most other days, rising at 5-6am in the morning to go to work after being awoken by the "Lappel", a man charged with waking up all the workers, or even as early as 1-2am if it was the harvest season. How early they rose depended on not only how far the estate camp was from the field where they had to work, but also if the estate provided a lorry to transport them, or if they had to walk there by foot or were lucky enough to hitch a ride on a passing bullock cart. Most workers took some breakfast before they set off for work usually consisting of tea and bread, and sometimes a little left over curry, and if they had sufficient time they would offer a prayer for the hard day of work ahead. Women normally woke up somewhat earlier than men did, as they also had to prepare breakfast for their husbands and the other members of the family. After brushing their teeth with charcoal and using either their fingers or a piece of guava stick for this purpose, they would set off for work and came back after midday sometime and ate something prior to commencing their daily chores. Women and children were the ones who were primarily responsible for carrying out these household chores, which normally consisted of fetching water and washing clothes, and collecting wood for cooking and grass for any cows or livestock that they kept. Going by the oral testimonies of the informants, these chores took up most of their afternoons, as the estate camps often lacked potable water and bathing facilities, thus forcing them to walk several miles in order to collect it from a river or to bath in. This can be seen in the photographs on the opposite page depicting scenes from estate camps showing children about to set off or returning from collecting water in metal cans. And then there are also images of women washing their clothes by the side of rivers and streams on volcanic stone outcrops, an indelible image which is perhaps one of the most iconic images of Mauritian life.

The camps themselves, or "langar", as the informants describe them, which is a Creole term for barracks, were usually made of *ravenal* and had thatch roofs and earthen floors.<sup>79</sup> They might also be made of a combination of materials, consisting, for example, of wood, stonewalls and corrugated iron. Over the course of the twentieth century though, concrete housing and semi-detached dwellings became more common in estate camps. Camp inhabitants describe "polishing" earthen floors with cow dung every week or once a fortnight, and red clay was particularly sought after with women being prepared to walk several miles in order to collect it. It is conceivable that some of the camp inhabitants would have built these structures themselves, and there is also evidence that they kept livestock in close proximity to their dwellings, much like their forefathers had done during the days of indenture. Of course, back in those days, there was no electricity to begin with, so most camp inhabitants relied on candles and kerosene lamps for lighting, and if the camp inhabitants were fortunate enough, a regular supply of water could be accessed through a public tap or well in the camp. Cooking facilities varied, with some camp inhabitants opting to cook on their verandas, or even inside their own dwellings over a pile of stones referred to as a "foyer" by the informants, sometimes resulting in fires that destroyed dwellings. While others preferred to cook in a makeshift kitchen located outside their dwellings and used either wood or sugarcane for these purposes. The informants also state that toilets and bathing facilities were usually not attached to their dwellings and were at some distance from where they lived and were used by all of the camp's inhabitants. Some estates had schools, medical dispensaries, crèches, and transported workers to the nearest district hospital if required, or that failing camp inhabitants were forced to walk to school and the nearest hospital by foot, or gave birth with the help of a midwife in their own dwellings.<sup>80</sup>

Informants also complained about crowded living conditions and the filthy state of some estate camps.<sup>81</sup> It appears that most estate camps offered very poor toilet provisions as many informants state that they were forced to go in the cane fields while others indicated that they had no choice but to build their own toilets when estates failed to provide them.<sup>82</sup> Informants also pointed out roads in estate camps were not tarred and therefore muddy and that camp inhabitants fought over having to wait in line in order to collect water from public taps.<sup>83</sup> The cramped living conditions

that characterised estate camp life also fostered disputes between neighbours, and the best that they could do to create a sense of privacy in their barracks was to erect makeshift barriers with either a sheet of corrugated iron or a partition made out of jute bags or *ravenal* as the case may have been. Furnishings were usually quite sparse and consisted of little more than wooden beds to sleep on and mattresses made of grass, or people slept on jute bags and used them to cover their bodies to keep warm at night. The only other possessions that estate camp inhabitants seemed to own was the utensils that they used for cooking, and according to one official report (ARLD 1945:3), most estate camp inhabitants kept very few possessions because of the frequency of fires. Others tried to make do with the little that they had and decorated their homes with pages from newspapers that they plastered on their walls.<sup>84</sup> Some estate camps also had footballs fields and shops run by “Chinese” shopkeepers that offered credit to their clientele; as well as *Baithkas*, temples, chapels and *Madrassas* to serve the religious needs of their workers. According to one informant,<sup>85</sup> estate camp life was very pleasant, as all the facilities were free, but she also stated that others looked down upon people who lived in estate camps. She pointed out she could not find brides for her sons as they were living in a camp and did not own their own homes.

According to Benedict the standard of living in estate camps during the 1950s was generally lower than that of most villages and appealed most strongly to the poor. This is because living in estate camps offered the advantages of steady employment, free housing, and possible concessions from estates for planting vegetables and gathering fodder for livestock. He points out that most camps consisted of “rows of small barrack-like cubicles of wattle and daub” and that some camps had “recently constructed semi-detached dwellings of cement”. Benedict draws attention in particular to the poor state of housing and lack of amenities, a finding that was still being echoed by ad hoc committees that were commissioned to enquire into estate camp housing conditions 30 years later.<sup>86</sup>

Except on a very few estates the housing offered is very poor. The buildings are of poor quality insufficiently ventilated and illuminated. The cubicles are small. Latrines are often very unsatisfactory, built in a row some distance away. Paths are often muddy and drainage is usually poor. Some camps have small shops, but for most of his needs the camp dweller must walk to the nearest village which may be some distance away. Unlike villages, camps are rarely located on bus routes. Cinema and other forms of recreation, as well as schools, are not to be found in camps, but in villages and towns (Benedict 1961:54).

In addition to a number of other drawbacks such as lack of privacy, property and tenure, and obligation to work, Benedict states that living in estate camps had come to be associated with low status because it was believed that crowded living conditions promoted promiscuity. Yet despite noting that these living conditions appealed primarily to the poor, who according to Benedict were drawn to estate camps because of free housing and steady employment, he also seems to have been under the general impression that “the pattern of moving from the estate camp to the village persists” and that only monthly workers were allowed to live in estate camps (1961:27, 54). As I alluded to above, the Annual Reports of the Labour Department indicate there was back and forth movement between villages and estate camps, and hence there is every reason to believe that sizeable numbers of impoverished villagers resettled in estate camps a generation after the first waves of indentured labourers moved off the estates. This is confirmed by the oral testimony of one elderly sugar estate worker,<sup>87</sup> who stated it was only poor people who did not own property that went to live in estate camps. Nor was it unheard of for some estates to allow daily or casual workers to live in their camps (cf. ARLD 1961:19-20, 50).<sup>88</sup>

Although the elderly sugar estate workers who were interviewed by the AGTF’s research assistants confirmed that life was very difficult in the past, or wracked by “*boukou mizer*” as many informants described it in Creole, that does not mean estate camp life was viewed only negatively. Actually, many of the informants looked back on estate camp life with a certain degree of fondness and described inter-ethnic relations as being harmonious and everyone living like a “family”. Holidays were often opportunities for families to get together, and depending on the occasion, a goat would be sacrificed and consumed, or a special meal of canned fish curried with tomatoes was cooked to celebrate the occasion if finances permitted. During the harvest season, rituals were also performed and offerings made to the goddess *Kalimaya* to ensure a good harvest, and more often than not, it was conducted with the active support and participation of estate managers and was usually led by *sirdars*. Masses and prayers were also organised for Christian and Muslim workers.

The informants also describe estate managers distributing presents to children at Christmas time and receiving bonuses during harvest season. And parents telling their children stories at night in the absence of modern day forms of entertainment such as radio and television. Nonetheless, these reminiscences were tempered by the view that “Christians”, or in other words, skilled Creole artisans and their families,<sup>89</sup> lived in superior housing and sometimes looked down upon the inhabitants of estate camps. While the paucity of reflections on the family life of white managerial staff points to a certain amount of social and possibly racial distance between employers and estate camp inhabitants.

One of the reasons why Benedict suggests that living conditions in villages were superior to those in estate camps is because the quality of housing was generally better. Housing varied, but according to Benedict (1961:55), there were three basic types.

The houses are of three basic types, the wattle and daub hut with a thatched roof and clay floor, the galvanized sheet iron house built upon a wooden frame and usually with a wooden or cement floor, and the more ambitious wooden, stone or cement house built on a concrete foundation with wooden or concrete floors.

One informant<sup>90</sup> who was interviewed by an AGTF research assistant described the more lavish type of housing that could be found in some villages as “lakaz tol vitrinn”<sup>91</sup> and the people who owned it as living like “tourists”. Yet it would also appear there were not all that many differences between most village dwellings and the type of housing found on estate camps prior to the 1960s. As Benedict (1961:55) points out, huts made of wattle and daub were quite common, as were earthen floors laid over stone foundations, and while poor families did their cooking on verandahs, others did it in a “separate hut of sheet iron located in the yard”, and apparently housing in villages was also crowded (cf. Benedict 1961:12).<sup>92</sup> Similarly, although most village dwellings had their own yards, something that estate camp inhabitants could not claim to have, pit latrines and the bucket system were the most common methods of conservancy, and it is likely that in the absence of these, villagers would have used nearby cane fields. Benedict also states that household chores were primarily the responsibility of women and children,<sup>93</sup> and that these included doing such things as re-plastering earthen floors with red clay and cow dung, collecting water from the village fountain or nearby rivers and streams if fountains were lacking (cf. ARLD 1945:3), and walking long distances to collect wood for cooking and fodder for livestock. Rearing cows and selling milk in order to generate additional sources of income also seems to have been quite common in villages and primarily the responsibility of women, a view I frequently encountered in the oral testimonies of the elderly sugar estate workers interviewed by the AGTF’s research assistants.

The other reason why Benedict suggests living conditions in villages were superior to those in estate camps is because they were less isolated and enjoyed access to social services and recreational facilities funded and maintained by government and village councils. Some of these amenities included public fountains, medical dispensaries, government schools, agricultural services, public transport, electricity, police and fire protection, shops, cooperative credit societies for small planters, post offices, social welfare centres, football fields, cinemas, and religious organisations and edifices. But as Benedict (1961:56) points out, even in spite of these advantages, the economic fortunes of most villagers in Mauritius still principally derived from labouring in the cane fields. (In fact, most of the elderly sugar estate workers interviewed by the AGTF’s research assistants began working as “chokra” or child labourers, and like their forefathers before them, they worked as sugar estate workers until they retired.) This had two important ramifications. Firstly, it meant that during the inter-crop season when work was scarcer and wages were lower, labourers had to find other ways to make ends meet. One way of doing this was to find ways of turning agricultural and natural products into cash. Mention has been made of rearing livestock and selling cow’s milk, but arranging concessions from estates to plant vegetables in between lines of sugar cane or collecting *bredes* from the banks of rivers and streams and ravenal fronds from forests was one way of doing this, as was renting land from other villagers to grow cane and cash crops or planting market gardens in one’s own yard.<sup>94</sup> According to Benedict (1961:74-76), however, the proceeds from these efforts were always converted into cash, because the average Mauritian required cash to purchase almost all of his basic needs, thus suggesting to him that there was little evidence of subsistence farming in Mauritius.<sup>95</sup>

The susceptibility of labourers to the seasonal cycles of the sugar estates had another important ramification. It made them reliant on credit to tide them over during the inter-crop season (Benedict 1958; cf. Balogh 1963:60). Some of the most pertinent examples of these credit relations include Sino-Mauritian shopkeepers extending credit to their clientele and the loans that *sirdars* and job-contractors made to labourers to bind them more effectively to them. Benedict states he found no evidence of job-contractors charging high interest rates on these loans. But he (Benedict 1958:217) also points out that “A man who accepts a loan from a job contractor would feel obliged to work for him.” He adds that job-contractors recovered their money by making deductions from the wages of labourers during the crop season, and if the oral testimony of the elderly sugar estate workers quoted earlier is anything to go by, this may have offered another opportunity to make further deductions from the wages of labourers at usurious rates. According to Benedict (1958:217), *sirdars* employed on estates had “much the same relations of borrowing and lending” with monthly workers, and that this arrangement ensured *sirdars* had an interest in employing labourers who they loaned money to. Thus notwithstanding the fact that some villagers had better housing and enjoyed access to government-funded social services and recreational facilities, what the foregoing discussion underlines is that the life of a sugar estate worker living in a village prior to the 1960s would not have been drastically different to that of an estate camp inhabitant. They may have had a wider range of economic options, but the casual worker was just as susceptible to the seasonal fluctuations of the sugar estates as the monthly worker was, and recourse to alternative economic avenues to make ends meet, such as *métayage* and share-cropping for instance, or relying on credit from shopkeepers and job-contractors and *sirdars*, seemed to have been the lot of most Mauritian sugar estate workers in those days.

Evidence of similarities in the living standards of casual and monthly workers can also be gleaned by reflecting on the diet and health of sugar estate workers in the earlier part of the twentieth century. Benedict (1961:11) states that after the Second World War, there had been an improvement in “living standards, including a better standard of nutrition and health”. The principal measures Benedict relied on to make this assertion were increased fertility and a sharp reduction in mortality rates, in addition to the gradual eradication of malaria and development and welfare programmes financed by gains from the post-war boom in sugar production. However, there may be grounds for disagreeing with some of Benedict’s prognoses. To begin with, it is not entirely clear that sugar estate workers benefited themselves from the post-war boom in sugar production, because as the Balogh Commission (1963:30-31, 53) stressed, real wages rose very little between 1939-1957 and was one of the main complaints aired by sugar estate workers who testified before the commissioners. What is more, the Balogh Commission (1963:61, 128-130) raises doubts as to whether funds allocated to help sugar estate workers build homes with interest free loans by the Sugar Industry Labour Welfare Fund reached its designated target.<sup>96</sup> In addition to this, the Annual Reports of the Labour Department, and the various commissions of enquiry convened to investigate the Mauritian sugar industry since the end of indenture, provide reflections on the living standards of sugar estate workers in the earlier part of the twentieth century, and cast doubts on some of Benedict’s prognoses. Drawing upon Major Orde Browne’s earlier enquiry into labour conditions in Mauritius, the Moody Commission (1943:32) concluded that: “The picture is ... that of a poorly-paid, undernourished, sickly population, capable of only such limited output of work that an increase of wages offers little promise of improved performance.” Only two years later, the Director of Labour was issuing further warnings about the sickly state of Mauritian sugar estate workers in the 1945 Annual Report of the Labour Department.

When a group of labourers in the sugar industry is seen, when their appearance is noted, their bare feet, their ragged clothes, their eye-balls yellow with fever, their small stature, their emaciated limbs with outstanding bony joints, their shins often scaly as a result of malnutrition ... it is possible to ask whether the higher cost is paid by the purchaser of the sugar or by the producer of it (ARLD 1945:8-9).

It is in Major Orde Browne’s 1943 report on labour conditions in Mauritius that the subject of the malnutrition of the sugar industry’s workforce begins to receive more sustained attention. According to Major Orde Browne, the diet of Mauritian sugar estate workers was noticeably deficient in protein and showed a marked dependence on rice and carbohydrates. Major Orde Browne’s observations are not only corroborated by the Annual Reports of the Labour Department, but are also reflected in the oral testimonies of the elderly sugar estate workers interviewed by the AGTF’s research assistants, and in Benedict’s own description of the diet of casual workers living in

villages. As part of their attempt to determine the cost of living for labourers working in the sugar industry, which the Minimum Wage Advisory Board used to assess claims put before them for wage increases in industrial arbitration disputes, the Labour Department had begun to gather detailed estimates of the budget of labourers. A notable feature that comes out of their estimates of the budget of the average labourer working in the sugar industry is the small proportion of their wages they spent on protein. Apart from fish, goat's meat was the principal form of animal protein consumed by the average sugar estate worker. The elderly sugar estate workers interviewed by the AGTF's research assistants also testify to the lack of protein in their diet. In their oral testimonies, the informants state they mostly ate rice and various types of vegetables, and could only afford to eat meat on special occasions. As I pointed before, this normally consisted of purchasing canned fish which they curried with tomato when relatives visited, or sacrificing a goat for New Year's Eve. Benedict's description of the diet of sugar estate workers living in villages lends further support to this finding. He reiterates that goat's meat was only consumed on special occasions and for lunch the average sugar estate worker or a person of less means usually ate rice with potato curry and some leafy green vegetables (1961:15, 78, 81).

The poor health of the average sugar estate worker in Mauritius led Major Orde Browne to speculate on the presumed inefficiency of the industry's workforce. Major Orde Browne (1943:61-64) drew attention to the limited hours of work that sugar estate workers completed in comparison to the descendants of Indian immigrants working in the plantation sectors of other British colonies. Yet although Major Orde Browne had some intimation as to how prevalent *ankylostomiasis* was amongst the Mauritian sugar industry's workforce, he not only seems to have underestimated how debilitating the disease was in assessing the inefficiency of Mauritian sugar estate workers, but he also appears to have been ignorant of the efforts already made to combat this parasitic form of disease as a result of previous enquiries, and suggested the most effective solution lay in educating the population about improved sanitary habits. I myself only became aware of the true extent of this epidemic after reading Andrew Balfour's 1921 report on medical and sanitation matters in Mauritius. Balfour was commissioned by the British colonial authorities to conduct an enquiry into Port Louis's deteriorating sanitary conditions and to find a way to combat the malaria epidemic crippling the health of the colony's population. In the course of his enquiries, Balfour read a report written only one year earlier by a medical expert working for the International Health Board, a philanthropic organisation funded by the Rockefeller Foundation, named J. F. Kendrick. Kendrick discovered that more than two-thirds of the colony's population was suffering from *ankylostomiasis*, or hookworm disease as it is more commonly known as, and that the highest rates of infections were recorded amongst the labouring classes in the colony's rural areas (cited in Balfour 1921:18). Kendrick urged the colonial authorities in Mauritius to cooperate with the International Health Board in trying to eradicate the disease, and it appears the British did not hesitate in taking up the generous offer of financial support from the Rockefeller Foundation after being actively encouraged to do so by Balfour.

While there was little doubt amongst the colonial authorities in Mauritius as to how debilitating malaria was, as it led to a noticeable increase in mortality rates, one of the reasons that hookworm disease seems to have escaped their attention is because its symptoms were not as readily discernible as malaria's. The number of deaths attributed to *ankylostomiasis* in Mauritius in the year 1920 was only 16, but Balfour (1921:15) questions the accuracy of these figures in his report, and suggests it was probably responsible for raising the island's death rate, due in part to the fact that it weakens "resistance to disease".<sup>97</sup> Yet although hookworm disease may not lead to as many observable deaths as malaria, its affects have been shown to be just as lethal, as it not only leads to a higher incidence of foetal mortality rates, but has also been implicated in stunting growth and impairing cognitive development, as well as increasing susceptibility to other diseases. According to Kendrick's report, one of the primary causes of the spread of hookworm disease was poor sanitary conditions, and in particular the inadequate provision of latrine systems, indeed the very type of conditions that were noticeably deficient in estate camps and rural areas (cited in Balfour 1921:18).<sup>98</sup> But in his report, Balfour also drew attention to the affect that the use of human manure as a fertilizer in the sugar industry, or the *Engrais system* as it was referred to in French, had in broadcasting the disease amongst the Mauritian population.<sup>99</sup> Balfour made it quite clear in his report that the Mauritian sugar industry could no longer continue to use human manure in the cultivation of its cane fields. He even went so far as to say that those who continued to ignore the health of the population out of pecuniary considerations would not only be morally culpable, but should also be held legally accountable (Balfour 1921:81-89). It seems the sugar industry took

Balfour's recommendations seriously, because according to Alfred North-Coombes who wrote a comprehensive account of the Mauritian sugar industry in 1937, the *Engrais* system had been discontinued at the time of his writing his account of the industry.<sup>100</sup>

But when it came to improving sanitary conditions and introducing a more effective latrine system, which was one of the principal recommendations to come out of Kendrick's report on hookworm disease in Mauritius, there is evidence many sugar estates were negligent in complying with their legal obligations as first stipulated in the 1878 Labour Ordinance and reiterated in subsequent labour ordinances promulgated after the end of indenture. Although the 1937 Hooper Commission insisted that housing and sanitary conditions in estate camps were satisfactory, the 1943 Moody Commission was much more condemnatory. Based on their inspections of estate camps in the north of the island, which is where the 1943 strikes led by monthly workers first flared up, the commissioners stated that "much remains to be done to improve housing, health and sanitation, and the general amenities of living" (Moody 1943:58). The commissioners were particularly critical of the state of latrines in estate camps, and suggested that it encouraged labourers and their families to "adjourn to the neighbouring bush or field, apparently quite unconscious of the fact that their action constitutes a grave danger to the general health in the spread of *ankylostomiasis* and other diseases". Labourers who testified before the commissioners also complained of lack of access to potable water in estate camps and having to walk long distances to obtain water for drinking and domestic uses. One can detect a similar degree of inconsistency in the Annual Reports of the Labour Department, which in 1938 for instance concluded "that the conditions of camps where labourers reside, was on the whole satisfactory" (ARLD 1938:14). Then in its 1943 and 1944 annual reports was proclaiming that "housing conditions on estate camps are still poor" and of the need to improve sanitary conditions (ARLD 1943:5; ARLD 1944:4). The newly appointed Director of Labour, Mr. R.C. Wilkinson, who assumed his duties in 1944, claimed that even if provided with suitable sanitary conveniences, labourers would prefer to use "neighbouring cane fields" (ARLD 1944:4). But as Mr. James Stirling, who replaced Wilkinson as Labour Commissioner in 1951, pointed out in the ARLD of 1954, after estates built more detached concrete dwellings for families with kitchens, bathrooms and toilets, labourers took a keen interest in their proper maintenance and were making effective use of the bathrooms and camp latrines (ARLD 1954:11). And as I alluded to earlier, Benedict also drew attention to the poor condition of latrines in estate camps in his ethnography, the fieldwork for which it is important to bear in mind was conducted at the end of the 1950s, showing that not much had improved in that time.<sup>101</sup>

The key point to underline here is that so long as sugar estates continued to neglect their responsibilities and failed to provide sanitary conditions in estate camps it is inevitable this would have encouraged labourers to use cane fields and contributed to the spread of hookworm disease amongst the Mauritian population. Hookworms are dependent on human hosts to reproduce which they do by passing from the intestine as eggs before being deposited in faecal matter where they grow into larvae and wait for their next hosts to mature into adults. Failing to provide hygienic or suitable latrines and in effect ensuring that labourers had little choice but to use cane field provides ideal conditions for hookworm parasites to thrive, as it is through soil contamination that the disease is spread. Of course, one cannot lay the blame squarely on the shoulders of the sugar estates, as there is every reason to believe that villagers who lived within the vicinity of an estate would have used the cane fields if they did not have a system of conservancy in place in their own homes (cf. ARLD 1945:3). And things would not have been helped by the fact that most Mauritians went around barefooted for a greater part of the twentieth century, as hookworms find their way into the intestinal tracts of human hosts by penetrating either feet or hands before moving up through the body. In addition to this, the fact that many Mauritians had earthen floors in their homes would have provided ideal conditions for the larvae of the hookworm parasite to reproduce, as studies have shown that the disease is more prevalent in rural areas because housing in urban areas is more likely to have wooden or concrete floors (Desowitz et al. 1961; Hotez 2008).<sup>102</sup> Yet the fact remains that most sugar estates would have been aware of the relationship between poor sanitation and the spread of hookworm disease as the colonial government made every effort to implement the recommendations of the International Health Board and launched a comprehensive education campaign to combat the disease. Therefore to flout these responsibilities, and which the Annual Reports of the Labour Department indicates was continuing up until at least 1953-1954, which is the last time the department's labour inspectors made a concerted effort of registering breaches of health regulations in estate camps,<sup>103</sup> constitutes a reckless act that exemplifies a lack of respect for the health and well-being of others.

The irony is that those sugar estates who neglected to abide by their legal responsibilities and to improve sanitary conditions in estate camps not only endangered the health of their workforce but also handicapped their own economic prosperity. As Major Orde Browne alludes to in his report, the combined effects of hookworm disease and malnutrition, and anaemia, the primary symptom of *ankylostomiasis* infection, which leads to depletion of iron levels as a result of internal bleeding, all conspired to lower the efficiency of the Mauritian sugar industry's workforce. A similar point has been made in a study investigating the debilitating effects of hookworm disease on Indian immigrants working on colonial plantations in Sri Lanka (Hewa 1994). The author suggests that the ineptitude of the colonial government and the derogation of responsibilities on the part of planters impeded attempts by the International Health Board to combat the disease. Hewa is particularly critical of the role of the colonial planters who she argues wantonly disregarded their legal obligation to introduce a more effective latrine system and to improve sanitary conditions in estate camps. As Hewa (1994:86-87) points out, the principal reason why planters sought to avoid their obligations, even though it would have led to a vast improvement in the health and well-being of their workforce, and presumably their long-term profits, is because of the short-term financial outlay it would have required. She also suggests that the colonial government was complicit in these abuses because of the *laissez-faire* policy that they pursued in Ceylon. One cannot say the same thing, however, about the colonial government in Mauritius.

It is not possible to ascertain from the documents available, with certainty, that the colonial authorities in Mauritius fully cooperated with the International Health Board and implemented all of its recommendations. But it appears so. This not only included an initial three year campaign of medically treating patients in an attempt to reduce the disease over the short term but also a far-reaching education campaign that targeted the broader Mauritian population. Lectures were organised and pamphlets distributed and notices pinned up to educate the public about the consequences of poor hygiene; and the colonial authorities even managed to procure a film from the International Health Board, named "Unhooking the Hookworm", which it showed in cinemas around the island. The Annual Reports of the Medical and Health Department also indicate that the colonial government made concerted efforts to eradicate the disease by constructing pit latrines in towns, villages and schools, and by replacing wooden buckets with metal buckets where the bucket system of conservancy was in use. In combination with on-going medical treatment, these measures continued for a number of years after the International Health Board had completed their work in Mauritius, but after the Second World War, it seems that the Medical and Health Department no longer considered it necessary to report on the incidence of hookworm disease.<sup>104</sup> One would assume that the only possible explanation for this about face is because *ankylostomiasis* rates of infection must have begun to decrease in the advent of the successful measures that had been introduced by the colonial government to combat the disease. However, the Annual Reports of the Medical and Health Department indicate that cases of hookworm disease were still being reported in hospitals and medical dispensaries after the Second World War. In any case, it is more than likely that as the island developed over the course of the twentieth century the attendant conditions that are associated with urbanisation eventually heralded the demise of hookworm disease in Mauritius.

The important question that remains is what set of factors and at roughly what point in time did these changes conspire to diminish the severity of hookworm disease in Mauritius. I have already alluded to what some of those factors may be. They include not only general improvements in healthcare but also the increasing use of footwear by the wider Mauritian population and of course the construction of more wooden and concrete homes. Looking around Mauritius today, one struggles to find any evidence of thatch and straw huts with earthen floors, and the elderly sugar estate workers who were interviewed by the AGTF's research assistants, all point to Cyclone Carol in 1960 as being a key turning point in terms of the shift from non-concrete to concrete housing. What we can be certain of, however, is that these changes and the marked improvement in the living standards of the Mauritian population over the course of the twentieth century have not been brought about as a result of working in the sugar industry alone. Much remains to be done in order to properly understand patterns of urban settlement and development in Mauritius, but perhaps one of the most outstanding achievements its citizens can claim is their ability to persevere and lift themselves up by their own bootstraps. This is ably documented in Benedict's ethnography, which describes how resourceful villagers and estate camp inhabitants were in terms of their ability to transform agricultural and natural products into sources of income. And of course, one must not forget the high rates of home ownership in Mauritius and in particular how widespread concrete housing is for a developing island nation. Even though many of the elderly sugar estate workers

interviewed by the AGTF's research assistants emphasised how difficult life was in the past, they also told them they were proud of what they had achieved in their lives and pointed out they were eventually able to purchase a plot of land and to build a house for themselves and their families.

## CONCLUDING REMARKS

As stated from the outset of this study, the most comprehensive accounts that we have of the lives of Mauritian sugar estate workers in the post-indenture period comes to us from Daniel North-Coombes and Burton Benedict. It is instructive to compare their respective accounts of the lives of sugar estate workers after the termination of the indenture labour system in Mauritius, as each of them had different objectives and foci due in part to their methodological biases. For instance, where North-Coombes was more concerned with class-conflict and the various forms of exploitation that existed in the Mauritian sugar industry, Benedict evinced an approach that sought to pay greater attention to the living conditions of ordinary Mauritians, even if this meant that he tended to overlook signs of class-conflict and tension in Mauritian society. In the final analysis, both approaches are of equal value in any attempt to reconstruct the history of Mauritian society, but what this study has shown is that it is just as important to consult the opinions of those affected by these events. The voices of elderly sugar estate workers has shown to us there were important matters that have been overlooked by both North-Coombes and Benedict, and which places the recent past into sharper relief. I am thinking in particular of the fact that estate managerial staff and *sirdars* and job-contractors conspired to abuse the rights of labourers by continuing to mark them as absent, or "marron", and deducting their wages for failing to complete unreasonable estimations of set tasks. One would have thought that these abuses would have discontinued after the end of indenture, but quite clearly, that was not the case.

Upon further inspection, however, Benedict's observations turn out to be extremely prescient insofar as he seems to have anticipated that tensions between sugar estate workers and planters would eventually come to a head. As early as 1961, Benedict was warning that if "Indians" and "Franco-Mauritians" failed to come to terms with the legacy of the indentured labour period, that this would have negative repercussions for social relations between the two groups in the future. Yet as instructive as these observations may have turned out to be, Benedict failed to make an extremely important distinction. It is one thing to narrow the source of the conflict down to ethnicity, but what Benedict ignored was the class relationship underpinning this tension. Benedict was writing at a time when studies of "plural societies" were very much in vogue and came out of an older anthropological tradition that stressed order and stasis, rather than conflict and change. This is reflected in the fact that Benedict (1961:23) reduced the source of these societal tensions to the indentured labour period, and ignored more recent commissions of enquiry convened to investigate the Mauritian sugar industry. As the Moody Commission (1943:162-168) pointed out in its recommendations, a climate of suspicion and distrust tended to characterise relations between the industry and its workforce, and the Commissioners were insistent that the most pressing problem facing the industry was the "human factor". A point both the 1963 Balogh and 1983 Manrakhan Commissions<sup>105</sup> would return to in their later reports.

## RECOMMENDATIONS

It is thus essential to cease to conflate the conduct of the managerial staff and personnel who have played a key role in running sugar estates in Mauritius with the presumed ethnicity of the stakeholders in that industry. This not only risks exacerbating racial and ethnic tensions, but it also does a disservice to those people who it is presumed share the same ethnicity and hence interests, as those who manage the affairs of the Mauritian sugar industry. By the same token, it would be equally advisable to cease conflating the identity of sugar estate workers with their presumed ethnicity or ancestry, as this not only ends up downplaying the uniqueness of their experiences and the heterogeneity of this workforce, but it also risks inciting the ire of other Mauritians who believe they share a similar cultural background. In the final analysis, it is personnel in the sugar industry, and not “Franco-Mauritians” *per se*, who are responsible for having perpetrated the abuses that sugar estate workers have had to endure since the end of indenture. Perhaps during the period of slavery, one could more easily have described the society existing at the time in Mauritius as consisting of two relatively homogenous groups, that is, slaves and planters. But since then, Mauritian society has become highly diversified, no more so than in the last one hundred years, and consequently it is important to distinguish who is responsible for committing acts that might be considered unjust or morally reprehensible.

From the claims that have been presented in this report, at the very least, one would think that certain aspects of the Mauritian sugar industry need more effective regulation and to ensure these abuses are not still being committed. In particular, the job contracting system, which according to all reports is alive and well in Mauritius, is seemingly responsible for continuing abuses with the apparent complicity of the sugar industry. This was pointed out by Mr. Revanand Ramjuttun, the secretary of the Sugar Industry Labourer’s Union and it was disconcerting to learn from an elderly female sugar estate worker who I personally interviewed in 2010, that after taking up a VRS offer, she re-employed as a casual worker and complained of being denied most of the basic rights she formally enjoyed as a full-time worker. Another issue to consider is whether those sugar estates that failed to comply with sanitary regulations should be held accountable for the spread of hookworm disease in retrospect, as an amendment to the 1931 Workmen’s Compensation Ordinance made it possible to claim compensation from industries responsible for the spread of diseases amongst their workforce. There are also the allegations of the Balogh Commission which raised concerns about the manner in which funds were handled by the Sugar Industry Labour Welfare Fund. This issue never seemed to have been adequately resolved.

## ACKNOWLEDGMENTS

There are many people I have to thank for helping me to research this report. Firstly, I would like to thank my research assistants at the Truth and Justice Commission who helped to summarize the many interviews of elderly sugar estate workers. They include Riteshwaree Chacoory, Alvina Gopaulen, Smita Gya, Ramchurn Seetul, Karimullah Yasiin, Sooben Pamela, and Trivita Devi Mathoora. Without their assistance, it would have been extremely difficult to make sense of the vast amount of data contained in these interviews. The discussions I had with the research assistants who originally collected the interviews, Stephan Karghoo and Christelle Miao Foh, as well as Vickram Mugon, were also extremely helpful and helped me to see another side to the interviews and some of the complexities of Mauritian society. Vijaya Teelock's assistance was also indispensable, as throughout she has provided me with helpful guidance and ensured that all the resources I required to carry out my work were available to me. And indeed without Vijaya's foresight, the oral testimonies of the elderly sugar estate workers discussed here would never have been collected in the first place. Similarly, I would like to thank Satyendra Peerthum for helping me to track down the information I needed for writing this report, and the extent of his knowledge of Mauritian history, which proved very helpful in terms of putting things into perspective. Corinne Forest has also been extremely helpful, and has always shown a keen interest and preparedness to offer a listening ear and to discuss the issues I was researching. I would also like to thank Mr. Revanand Ramjuttun, the secretary of the Sugar Industry Labourer's Union, and the Permanent Assistant Secretary of the Ministry of Labour, Industrials Relations and Employment, Mr. Seebaluck, who allowed me to make copies of the department's annual reports. Lastly, I must thank the staff at the National Library and National Archives in Mauritius who helped me to track down many of the documents I required for my research.

## INTRODUCTION

Mauritius was a sugar plantation colony whose development relied essentially on the availability of plantation land, cheap labour and inflow of capital from metropolitan country.

During the 18<sup>th</sup> and 19<sup>th</sup> centuries, slaves from Madagascar, the African and neighbouring Continents constituted the main source of free labour capital until the abolition of slavery in 1835.

Following the emancipation of the slaves in 1834/1835, the Royal Commissioners (1909), reported that the freed slaves were unwilling to work for their former masters who, thus, had recourse to Indian indentured immigrants as source of labour. Allen (1999, p.16) affirms that facing scarcity of agricultural labour estate owners with the support of the colonial governments of Mauritius had Indian opted for Indian immigrations as alternative source of cheap labour.

He published that approximately 9,000 apprentices purchased their liberty before the collapse of the apprenticeship system in Mauritius in March 1989. While the Aapravasi Ghat Trust Fund (AGTF) estimated to over 60,000 the freed apprentices in March 1989.

In keeping with Allen (1999, p. 15), the following historical events encouraged the institutionalisation of the indenture system as 'new labour regime'.<sup>106</sup> Firstly, labour scarcity resulting from high mortality rates amongst the slave population before the abolition of slavery. Secondly, the labour crisis following the withdrawal of the ex-apprentices from the estates after the abolition of slavery and, thirdly, the expansion of sugar production as the economic mainstay of the colonial economy.

Mass unemployment in the labourers' country of origin furthered this labour movement to the host developing countries facing labour shortages. The 'exodus' of the Indian Diaspora is part of the dynamics of the capitalist system of production and should be situated within the social, economic and political situation prevailing in India and Mauritius.

The successive failures of the importation of African, Malagasy and Chinese indentured labourers gave impetus to the importation of Indian indentured immigrants, commonly referred to as *Coolies*. The *Coolies* came as agricultural labourers to meet the increasing demand of labour intensive sugar plantations for a cheap and docile labour force that was the nucleus of the Capitalism production system.

According to Aapravasi Ghat Trust Fund, the importation of Indian labourers between 1829 and the first half of 1834 was a failure and it is only as from the second half of 1834 and following the official abolition of slavery in 1835 that large-scale immigration of Indian indentured labourers spurred. Except for temporary suspensions, during the indenture-ship period, between 1834 and 1924 (the system was officially abolished in 1939), the AGTF recorded that approximately 450,000 Indian labourers migrated to Mauritius with some 290,000 remained permanently on the island and approximately 160,000 returning in their home country and others migrating to other countries.

The importation of Indian indentured labourers slowed down as from 1906. In 1909, the Royal Commissioners (1909, pp. 15-16) reckoned that one third of the estate labourers were Indian immigrants that were introduced under the indentured system and the remaining two thirds were Indo-Mauritians referring to natives of Hindu faith.

The forced and voluntary diasporic movements of Europeans, Africans, and Indians and of other Diasporas, and successively their permanent settlement on the island, transformed and forged Mauritian contemporary social, economic, cultural, religious and political landscapes.

This report describes the living and working conditions of the sugar estate labourers in 21<sup>st</sup> century Mauritius. It is part of a research project entitled 'Oral History of Descendants of Indentured Labourers', whose objective is: to uncover the life experiences of the descendants of indentured labourers that were, or are still, living and working on sugar estates.

This project aims at addressing one of the Truth and Justice Commission's (TJC) missions to assess 'the consequences of slavery and indentured labour during the colonial period up to the present'.

In accordance with the objectives of this research, this report is divided into two parts:

The first part is on the working conditions of the estate workers and the following themes are developed: (i) occupation patterns; (ii) gender discriminations amongst the work force; (iii) work duties and promotional prospects (iv) Child Labour; (v) wages and other work benefits, and (vi) wage cuts and discriminatory practices.

The second part is on the living conditions of the estate workers, and especially the estate camp residents. The following themes are examined: (i) subsistence; (ii) housing conditions and constructions; (iii) academic education and mobility; (iv) Community life and inter-ethnic relationships; (v) family life, roles and duties including child development; (vi) Dressing and (vii) Displacement.

### **Methodology**

This report is based essentially on the interpretation and analysis of oral interviews conducted by the Research Assistants of the Aapravasi Ghat Trust Fund in the period 2008-2009. The life of the former estate workers is retraced through the analysis of 18 transcripts of the interviews.

Unfortunately, the transcripts provided limited data on the working and living conditions of the estate workers because the interviewers focused on the cultural and religious practices, and they did not probe important issues that came out of the interviews, such as infant mortality, gender-based violence against women, alcoholism and the father abandonment of matrimonial roof.

In some instances, interviewers asked leading questions and short-ended questions that directed the respondents' responses and did not yield rich information as they restricted the respondents' answers.

### **Treatment of Data**

The transcripts were analysed in line with the objectives of this research. Relevant extracts of informants' testimonies are included to sustain analysis. These extracts are in the language used in the interview followed by a translation into English.

Regional and individual variations were identified in the living and working conditions of the former estate workers and in the sugar estate practices. Besides, because of chronological discrepancies and memory flaws, the respondents got confused about certain political and economic events which they associated the Trade Unionist Movement to Sir Seewoosagur Ramgoolam.

Much caution was taken to ensure the accuracy of the information. Consequently, I engaged in triangulation to ensure reliability and validity of evidences gathered. The various life-experiences were documented as far as possible and by crosschecking with the information presented in the reports of Mr. Coucaud and Dr. Mishra.

However, since all versions of memory recollections and of life-experiences have to be taken into consideration because of their significance for the respondents, the various versions compiled are included in this report.

Unfortunately, because of time constraint, I was not able to conduct proper archival research. For this reason, I relied on the two reports of the above-mentioned TJC researchers as secondary sources to corroborate the information compiled from the transcripts.

### **Limitations of the report**

As stated earlier, the above-mentioned oral history project aims at investigating the consequences of indentureship on the descendants of the Indian indentured labourers. It should be highlighted that this analysis is not representative of the life-experiences of the descendants of the Indian immigrants that migrated to Mauritius under the indenture system, in that the sample of respondents was limited to former sugar estate workers who are assumed to be of Indian indentured descent. The white-collar and other blue-collar employees were not interviewed.

Furthermore, Mauritians of Islamic faith, descendants of indentured Labourers, also were not interviewed. In fact, although the majority of Muslims who migrated to Mauritius were free Gujarati traders, yet, a minority came as indentured labourers.

The people interviewed are assumed to be of Indian indentured descent based on their names that are of Indian origin, their religious background and their occupational categories (they are agricultural and estate workers). However, even if the majority of Mauritians categorised as Indo-Mauritians might be of indentured descent, some of them might be descendants of Indian immigrants who arrived on Mauritian shores as free passengers and as free traders.

In addition, during post-Independence Mauritius, many Mauritians of Hindu faith converted to Roman Catholicism and changed their names to 'Christian/European' names. Hence, some Mauritians presently categorised under the group 'General Population' are of indentured descent.

All respondents and their parents are natives of Mauritius. The grandparents of some of the interviewees are of Indian origin such as the grandparents of Mardemootoo, and his father's elder brother as well, came from India to work as builder. The father of Pentiah's wife told her that her grandfather was from India. Goinsamy's grandmother on his father's side came from Chennai as agricultural worker.

Their knowledge of family history remained restricted to one or two generations because of limited genealogical memory. In addition, some did not know their grandparents who died before their birth or when they were underage. They did not know if their ancestors came as indentured labourers or free passengers, and when and why they migrated to Mauritius.

For example, Bhudyea's mother and grandparents died when she was young. She does not know their origins and thinks that her elders might have come from abroad.

Moreover, most interviewees have never heard of the terms *coolie*, *travayer engaze* (Eng. trans. Indentured labourers) and other related terms. In fact, only Goinsamy stated that he had heard the term *coolie*. His father, grandmother and people living the neighbourhood told him that his grandfather was a *coolie* who worked as watchman on the estate.

For most of them, they thought that their ancestors came from India and guessed their Indian origins based on their patronymic name, religious background (they are of Hindu faith) and population categorisation (they are classified as Indo-Mauritian).

This report is based on a limited sample of interviews; out of 400 interviews conducted, only 18 transcriptions of the interviews conducted in Mauritian Kreol were analysed. Interviews conducted in Bhojpuri and other Indo-Mauritian languages were not analysed because of my lack of competence in these languages. This sample represents 4.25% of the voices of the former estate workers.

Taking the respondents' names as indicator, it seems that amongst the 18 interviewees, one male belongs to the 'General Population' group (his name sounds European) and one female is of mixed Sino-Mauritian and Indo-Mauritian origins (her father was Sino-Mauritian and her Mother Indo-Mauritian).

Consequently, this document is not an in-depth analysis of the working and living conditions of the former estate workers, and the data presented should be considered as indicative of the life-experiences of the respondents.

Gender	Age (years old)	Region Born	Region Living	Occupation
Female	75	Bonne Mère	Bonne Mère	Labourer
Female	72	Belle Vue Harel	Plaine des Papayes	Labourer
Female	65	Camp de Masque Pave	Camp de Masque Pave	Labourer
Male	58	Bonne Mère	Bonne Mère	Plumber
Female	Unknown	Surinam	Trois Boutiques	Labourer
Female	63	Ti-Verger	Camp de Masque	Business owner
Male	83	Belle Vue Pilot	Pamplemousses	Labourer
Male	Unknown	Ferney	Plaine Magnien	Labourer
Female	Unknown	Henrietta	Plaine Magnien	Labourer
Male	Unknown	Reunion - Vacoas	Rose Belle	Labourer
Female	Unknown	Unknown	Plaine Magnien	Labourer
Male	82	Plaisance - Rose Hill	Plaine des Papayes	<i>Sirdar</i>
Male	Unknown	Petite Rivière-Noire	Grande Rivière Sud Est	<i>Sirdar</i>
Male	72	Camp de Masque	Unknown	<i>Sirdar</i>
Female	66	Camps Cheveau - Mapou	Plaine des Papayes	Seamstress
Male	82	St. Antoine	Camp de Masque	Tailor
Female	68	Montagne Blanche	Unknown	Labourer
Male	66	Bénarès	Unknown	Labourer
Female	60	Trou d'Eau Douce	Fuel	Labourer

The workers' profile shows that the most of them were born during the pre-Independence period (in the 1920s, 1930s and 1940s). The interviewees, age groups indicate that the latter's working life correspond to the Great Depression period when the Sugar Industry faced serious backlash because of declining sugar prices.

In the sample, the labourer strata is over-represented, which implies that the other occupation stratum such as *Sirdar* (Labourer supervisor) and the *métayer* (Sharecropper) are under-represented and not represented.

## 2. WORKING CONDITIONS

### Occupational Patterns

Family histories revealed a generational transmission of occupations with the respondents and their elders (parents and grandparents) performing almost similar jobs. For generations, they were estate agricultural workers employed as labourer and/or *Sirdar* (Eng. trans. Overseer).

Furthermore, across generations some respondents have been working for the same estate, since estate workers were recruited amongst families already working for them.

For example, Goinsamy and his sisters worked as field labourer, on St. Pierre estate as his father and his grandmother on his father's side. Tyaciitee was working as plumber on Fuel Estate and now his daughter does as well.

*...Eh ou bane paren ki travay zot ti pe fer? samem labourer mem...Be eski ou ti pe travay dan karo kann? wi karo kann...St Pierre...ou bann frer ou bann ser eski zot ti pe travay dan karo kann? wi ti pe travay dan karo meme...<sup>107</sup>*

*(Eng. trans: And your parents which job did they do? Same labourer...But you worked in sugar cane field? Yes in sugar cane field...St Pierre...Your brothers and sisters were working in sugar cane field? Yes they also worked in sugar cane field...)*

Based on the testimonies, even if the respondents faced limited employment opportunities, their children and the present generations were able to seize opportunities offered and are not working as agricultural labourers.

*...Lerla monn gagn enn garson li travay la doine apret enn an enn an parla monn gagn mo tifi li travay miss Beau Bassin linn marye Beau Bassin apret mo ena troiziem tifi savedir dan tifi mo deuziem tifi liapel Madhumati inn parti linn all Australie...<sup>108</sup>*

*(Eng. trans. Then I got a boy he when works as customs officer then after approximately one year I got a daughter she works as teacher in Beau-Bassin she is married in Beau-Bassin later I got a third daughter, which means amongst the daughters my second daughter is named Madhumati she went to Australia...)*

Differences in occupational patterns were identified with the respondents' children and grandchildren working as office workers or public servants and doing white-collar and blue-collar jobs. Most interviewees stated that their children were not agricultural labourers and do not work on estates.

For example, the children of Mardemootoo work as public servant and in the private sector. They are proud of their children who have contributed to the upward social mobility of their family.

Differential occupational patterns across generations are indicative of horizontal and vertical socioeconomic mobility. There is a direct correlation between vertical and horizontal mobility and academic educational achievement.

#### Gender discriminations amongst the work force

Despite the Annual Reports of the Labour Department and Ministry of Labour prior to 1973, analysed by Couacaud, indicating that women should be paid equal wages for doing equal work, differential wages between men and women persisted. This discriminatory practice was corroborated by testimonies which revealed that women and children were paid less than men and even half less.

*...si ou pe koup kann enn misier pe koup kann zot la payy ti parey? Non misier la pu gagn so zurne pliss. Kifer? Pa kone sa bann blan la zot la lua sa beti...Ti travayy bann madam fer bann gro travay bann misier fer...<sup>109</sup>*

*(Eng. trans: if you were cutting cane and they were cutting cane, did you earn same salary? No, the men earned more money for the day's work. Why? I do not know it was the White's law women did light work men did arduous work)*

The nature of the work performed by women and children and the differences in their physical predisposition justified unequal wages. Women and children were supposed to do lighter tasks such as *spreading manure*, weeding and *depaiaz* (Eng. trans. removing straw from sugar cane) that demanded less physical strength, whilst men did arduous work, such as loading and unloading sugar cane and stone-breaking because they were physically stronger than the former. In other words, women were paid less because their work output were supposedly less compared to that of men.

## Child Labour

Under colonial rules and in the post-Independence period, child labour was sanctioned and institutionalised. *Chokras* (Eng. trans. Child labourers) and women were a source of cheap labour for the estates.

Furthermore, child labour was a means for families to secure additional income. Children had a financial obligation towards their families, and hence all the respondents started working at an early age, as young as 7 years of age.

Dananan started working at 7 years of age; he earned 20 cents per working day and at 15 years of age, he worked as sugar cane cutter when he earned approximately 1.50 rupees per working day.

When Bawol was a child, he worked as poultry keeper and earned 15 rupees per week.

Hence, most respondents were deprived of their childhood because from a young age, they took on adult responsibilities. In his analysis, Mishra reveals how because of minimal wage practices, large families forced not only children, but also juveniles to work thus depriving them from 'natural childhood and overall growth'.

## Work duties and Promotional Prospects

The respondents who were *Sirdars*, initially were labourers and later were promoted to the post of *Sirdar*, such as Mardemootoo who was employed as labourer and then was promoted to *Sirdar* and Goinsamy.

Often, their promotion was accompanied with a wage upgrade and for some, like Satianand, it was an opportunity to become a landowner. He started working as a field labourer in 1949 and in 1962, he was promoted to *Sirdar* and the same year, he bought a plot of land where is currently living.

In the hierarchy of Management, the *Sirdar* and the field labourers were at the bottom the pyramid. The *kolom* (Eng. trans. Field supervisor) also named, by some informants, as the *Ti-Sef* (Eng. trans. Small Chief) was the middle manager. The estate manager, referred to as the *Gran-Sef* (Eng. trans. Great Chief) was at the top of the pyramid.

## *Sirdar*

Both men and women could be a labourer supervisor. Yet, *Sirdars* outnumbered *Sirdarine* (Female labourer supervisor). Some respondents mentioned that the *Sirdar* was a literate<sup>110</sup> person, but it seems that literacy was not a core promotional criterion, given that some *Sirdars* were illiterate.

For example, Dananan started work as field labourer and when the *Kolom* saw that he was a hard worker and was meticulous in his work, he was promoted to *Sirdar*. He stated that he is illiterate because he abandoned schooling at an early age to start work.

The main duty of the *Sirdars* was to supervise the field labourers and to take attendance. Other work obligations varied from one estate to the other; for example as on some estates, they did supervision work and on others, they did manual work as well.

For instance, when Bawol arrived at the field, he recorded the names of the labourers who were present and absent, the time they arrived and the number of labourers present. He gave the records to the *Kolom*. There were approximately 4 to 5 groups of labourers, both men and women.

Each *Sirdar* supervised a group of approximately 25 labourers.

When Mardemootoo worked as *Sirdar* on Rose-Belle Estate, he had to control the pay-slips of the labourers every Thursday and on Fridays; the management (he might refer to the *Kolom* and *Marker* (Eng. trans. Payroll office)) came to his office. When the labourers received their payment, they signed to attest that their pay was accurate and he sent them to the Accounting Department.

Some interviewees stated that the *Sirdar* decided when lunch-time was and at what time work finished, distributed work tasks and gave instructions (that the *Kolom* gave him the day before) to the labourers. Others like Mardemootoo declared that the Section Manager (that is the Field Supervisor) distributed the work tasks and informed the labourers in which sections (the fields were divided into sections) they worked.

The *Sirdar* was answerable to the *Kolom* who controlled the labourers work at the end of each working day. When the *Kolom* was not satisfied with the quality of the work, he scolded the *Sirdar* who, subsequently, scolded the labourers and, sometimes, even hit the workers.

Bhudyea testified how when the *Gran-Sef* blamed the *Ti-Sef*, the latter reprimanded the *Sirdar* who, subsequently, scolded the labourers and at times took his revenge on the labourers for having been blamed. The *Gran-Sef* and the *Ti-Sef* were 'White' men and Dananan affirmed that the Estate Manager was in contact neither with the *Sirdar*, nor with the labourers.

The sugar estate was structured. As per the estate power structure and line of command (top-down line of command), the Estate Manager gave instructions to *Kolom* who passed on the orders to the *Sirdar*.

Even if the Labour Ordinance Act 1938 regulated the working hours to 8 hour, yet it seems that the piece-rate system of payment was maintained and apparently, the *Sirdar* took advantage of the system. Satianand testified that the more work the labourers completed, the more money the *Sirdar* earned.

#### Field Labourers

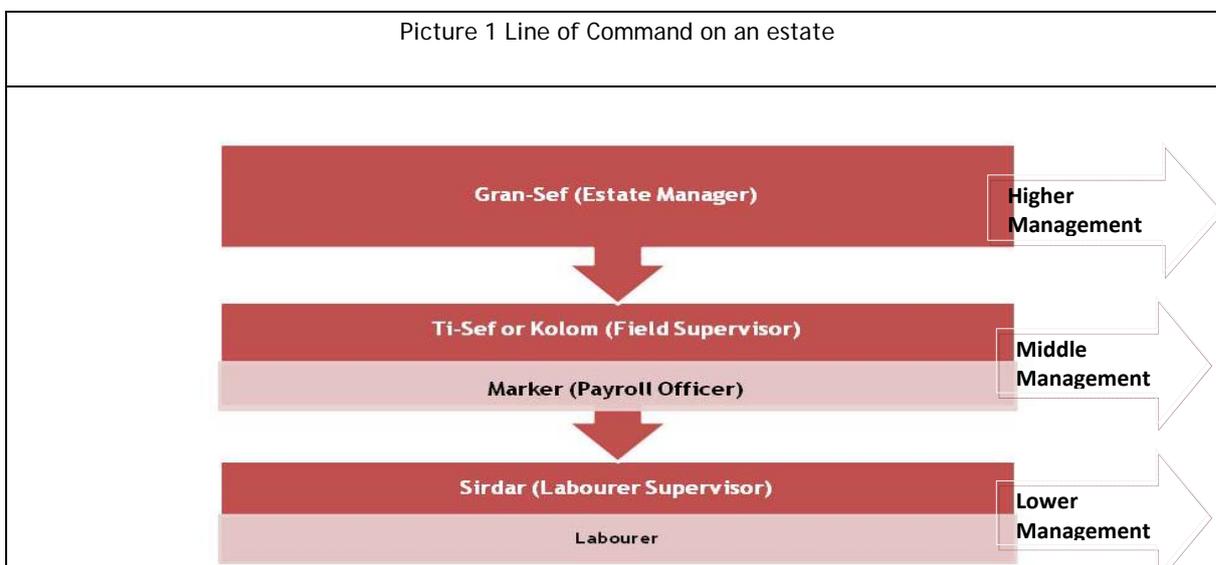

The conditions of the labourers working for job contractors, and of others who worked for the estate, differed. It seems that those working for the job contracts experienced more discrimination (see Couacaud report).

The labourers' working day started at three or four in the morning and finished at approximately four in the afternoon. They had one-hour lunch at noon and brought their lunch. They were obliged to reach the field on time at six in the mornings if not they were *marron* (Eng. trans. they were caught and done). During cane-cutting season, they worked from three in the morning.

*...kiler ou ti bizin ale dan caro pu coupe canne? sa 3hr du matin...3hr du matin nu ale.nou coupe canne parfois 2hr nu p vini parfois 2hr30 nu p vin lakaz...<sup>111</sup>*

*(Eng. trans: At what time you went to the field to cut sugarcane? 3 hrs in the morning...we went at 3 in the morning sometimes at 2 we are back, sometime 2 hrs 30, we back home)*

*In the past there was no alarm clock, some respondents like Mardemootoo attested that*

*there was someone who fer lapel (Eng. trans. muster) to wake up to cook food.*

*...Lapel ! wi dan le matin pa lapel tusel ena enn dimunn ki kriye pu kui manze pa ti ena reveyy naryein pa ti ena enn dimunn li kriye be kan la ti tipti li pu kriye leve be pu kui manze ou kompren la. Letan li fini kriye lapel pu kui manze apret ena enn lerr li kriye pu lapel alor la tu travayerr bizin la tu seff seksion bizin la...<sup>112</sup>*

*(Eng. trans:...Muster! Yes in the morning not only the muster there was someone who screamed to cook there was no alarm clock there was nothing someone called the camp was small he called to wake up to cook food you understand. When he finished calling to cook food there was a time he called and all the worker had to be there and the sections managers)*

However, it seems that the working hours varied from one estate to the other, and from one period to the other. For in the 1920s, Goinsamy's started work at seven in the morning and finished work at one in the afternoon. In the 1940s, Narrayanee worked from seven in the morning until three in the afternoon.

While some respondents walked to their place of work, for others, a lorry drove them to and from their place of work. For example, a lorry picked up Goinsamy who was living in Flacq and drove him to and from Belle Vue. But, sometimes, he did not wait for the lorry that picked them at 2 in the afternoon and walked back home.

Indumatee was working in Sans Souci and was living in Bonne Mère. A lorry fetched her in the morning and drove her back in the evening. She was back home at five in the evening.

The provision of transport facilities became mandatory with the proclamation of the Labour Acts 1975 that lays down that when an employee's place of work is more than 3 miles from his/her place of residence and the worker is required to work between 9.00 p.m. and 5.00 a.m., the employer should provide him/her with transport. Where facilities of transport by bus are available at the time the worker is required to start or to cease work, a sum equivalent to the bus fare for the return journey between his usual place of residence and the place of work.

The field labourers' work was physically strenuous, and they were forced to work whatever the weather conditions because, in the past, they did not benefit from sick leave and of local leave. Even if, in keeping with the Royal Commission Report (1909), after the outbreak of Suma in 1902, mechanical transport and traction engines were used for the transportation of sugar cane, yet, the respondents affirmed that sugar production relied essentially on manpower, there were no machines and no animals. Indeed, mechanisation of labour-intensive field operations, such as removal of old cane stubbles, planting and sowing, was a late 20<sup>th</sup> -century incentive as a solution to labour shortage.

### Wages and other work benefits

The Industrial Relations Act 1973 stipulates that the Trade Unions should take all reasonable steps to ensure that employees understand and observe all health and safety precautions, whether established by Law or by agreement and, in particular, make use of protective equipment.

Before the amendments to the Act and to the Sugar Industry Relations Act 1983, it seems estates did not provide protective clothing (gloves, boots, mask and coats) to the field labourers who went to work with their *linz lakaz* (Eng. trans. House clothes) and bare-foot. Some, like Indrawatee, sewed their own protections such as long sleeved blouses to protect their arms and trousers to protect their legs. Because it was slippery, they did not wear slippers, as they could hurt themselves and lose their slippers.

Based on Bawol's testimony, following the Trade Unionist's lobby, they were provided with protective clothing, but the estate deducted the purchase of these equipments from the labourers' salary, and hence they were paid less.

*...En oui, tabismen ti pe donn nou iniform. Envan na pa ti pe donn sa, ale ale ler sindika ine fer, bann sindika ine diskite. Apre kan finn fini, lera ine pass lalwa, sindika ine pass lalwa ki bizin ena travayer, bizin donn linz, soulye ek bot ek legan. Lera inn redir nou lapey, dan sa lapey la inn redir inn donn nou. Pa kalkile linn koup nou larzen, ek samem li finn donn nou bot ek linz ein...<sup>113</sup>*

*(Eng. Trans: Yes the estate provided uniforms. Before they did not provide, when the trade union was set, the union discussed. After discussion they passed a law, the union passed a regulation that they should provide clothing, shoes and boots and gloves. Then they reduced our salary, they deduct from our salary. We did not think they reduced our salary, with this [Money] they gave us books and clothings)*

Hence, they often injured themselves; for example, they got rashes in their hands and legs, were bitten by insects like *mouss zaun* (Eng. trans. Yellow fly) and got other skin irritations and bruises. They had no health insurance, and when injured or ill, they relied on herbal medicine or went to the estate hospital/medical dispensary that delivered free basic health services.

None of the respondents complained about the estate medical dispensary was poorly equipped. This can be explained by the fact that the estate workers attended the estate medical dispensary for small injuries and for serious injuries and illnesses they went to the nearest civil hospital.

Regarding tools, while some estate provided the labourers with tools such as billhook, hoe, and scrape, others like Dananan used their personal equipments that they purchased.

During the 'bad old days'<sup>114</sup>, the rights of the estate workers were not recognized, neither respected nor protected, until the Labour Movement in the 1930s such as the Society for the Welfare of Mauritian Workers and later the Trade Unionist Movement, fought for better wages and work conditions. Their fight, subsequently became the main thrust of the Labour Party and the Mouvement Militant Mauricien's political campaigns.

The 'bad old days' and the harsh and oppressive working conditions on the sugar estates led to the small planters' riots of 1937 and 1945 and to the strike of 1938. The labourers claimed better wages and better working conditions. Although she was young, when these events happened, Neelvadee testified how her mother used to narrate her stories about the strike on Belle Vue Harel.

The latter told her that people were killed during the riots and that members of a whole family were shot dead in St. André.

Later, various international declarations and law-abiding agreements obliged the Local Government to regulate the working conditions of the employees, including agricultural and non-agricultural workers. However, it should be noted that the sugar estate casual workers are presently still facing the same discriminatory practices, as a backlash of the current social and economic crisis.

The Lalit Movement in 2009 published that Rose-Belle Sugar Estate, a State-run sugar estate, was employing labourers on a casual basis and the latter, unlike the other employees, received gloves and nets only and were not given raincoats, boots and tools. Moreover, the estate sent an overseer to supervise gangs of casual labourers. These casual labourers were formerly employed labourers who for the last 10-15 years took their Voluntary Retirement Scheme lump sum and a plot of land. Now, the estate labourers received a daily wage of 171 rupees only and did not receive either a sick leave or a local leave nor pension, nor any other job security<sup>115</sup>

Regarding wages, some respondents were paid a fixed rate according to the task accomplished, such as the number of *gaulettes* (Eng. trans. measuring unit approx. 12 feet) of sugarcane harvested and the *arpent* (0.43 hectare) of land worked. Others were paid a fixed rate per working a day. Based on Mardemootoo testimony, labourers received salary increments and at the end of year, a bonus as well.

While the labourers were paid at the end of the week, usually on Fridays or on Saturdays, it seems that the *Sirdars* received monthly remuneration, such as Mardemootoo's salary which, each month, was paid directly in his bank account.

Apparently, modes/ways of payment varied from one estate to the other. On some estates, the *Kolom* gave the salaries to the *Sirdar* who paid the labourers. On other estates, the labourers collected their salaries in the *Kolom* office.

Bhudyea declared that the *Sirdar* came to her place weekly to pay her. Later, she went to the office to pick up her salary and was paid every 15 days. The *marker* listed the names of the labourers for payment.

The testimonies on wages paid varied, but these discrepancies arose from different working periods. Furthermore, when comparing the estate remunerations practices, slight differences were identified in the remuneration of labourers. Nevertheless, overall, wages remained low as illustrated in the examples below. Minimal wages kept the estate workers in poverty and had various collateral consequences. Low wages fostered child labour, forced women to work and promoted small-scale farming.

The Royal Commission Report (1909) confirmed that agricultural estate labour was on the whole cheap labour, with wages ranging from one to three rupees a month for boys and eight to nine rupees for men.

In 1962, when Satianand worked for FUEL Estate, he earned 15 rupees per full working-day and was paid 39.90 rupees per full working week as *Sirdar*. He stated that a labourer earned approximately 4.10 rupees per full working day. During his trial period, he was paid in kind with 13 pieces of bananas. When he started working in 1949, women were paid 2.75 rupees per full working day and later they were paid 3.15 to 3.30 rupees per full working day.

When Goinsamy started working at 7 years of age as tobacco labourer for Vergé Estate, he earned 20 cents per working day. When his grandfather was promoted to *Sirdar*, he increased his salary to 25 cents per working day. When his work duties changed, he was paid 50 to 75 cents. On Beau Vallon Estate, he earned 1.50 cents per day's work for weeding. In 1965/1966, he started working for Constance Estate as labourer and earned 5.25 rupees per working day. When he worked as sugarcane cutter, he was paid 3.68 cents for 1 ton of sugarcane and 5.25 rupees for 1 to 6 tons of sugarcane. If he completed 55% and 80% of his work task in one day, he was paid 4 days' work and 6 days' work respectively.

Mardemootoo worked in the sugar mill for 50 cents per day's work and later for 60 cents per working day. Afterwards, he worked as field labourer for 1.50 rupees per week. Each year, his salary increased with the rise in the cost of living and his workload also increased. His last salary amounted to two rupees per week. In 1951, he enrolled in the Army and came back in 1954 and took employment on Rose Belle Estate.

It seems that on some estates, for the cane-cutting season the labourers were paid more, which encouraged them to work harder. For example, Pentiah's wife earned three rupees and her husband five rupees per days work. Later, she earned five rupees and her husband 10 rupees per working day. During the cutting season, if they cut two tons, or 2½ tons, or three tons of sugarcane they earned additional money.

### Wage Cuts and other discriminatory practices

All respondents denounced the practice of wage cut as penalties, when work did not meet the *Kolom's* quality standards. In their respective reports, Couacaud and Mishra show how this practice was a customary means to fine and penalise the labourers.

When the *Kolom* was not satisfied with the quality of the work of a labourer, either he did not pay the latter his working day, or, he marked the latter as absent, and hence the labourer was not paid his/her day's work or the *Kolom* ordered the labourer to redo the work the next day, which implies that the latter lost a working day.

*...Si travay pa ti bon ki arive lerla? Si travay pa bon li koup ou larzan...linn fini met ou maron...komie li koupe? Zoune net...<sup>116</sup>*

*(Eng. Trans: If the work was not good, what happened? If the work is not good, he reduced the salary...he already penalised you...how much did he cut off? One day)*

Pentiah's wife testified that one day, her father came back home disappointed and without his salary. He told her mum that the 'White' (referring to the field supervisor) came and he was not satisfied with the quality of the work. He told the labourers to redo the work on Monday and then they will be paid. When the Labour Party came to power, they ordered the Estate Managers that every day, they should check the labourers' work and ask them to redo the work the same day because the latter were 'poor' and needed the money to feed their family. As from then her mother started making savings to buy food and clothing that did not have before.

Another customary practice of ordering the labourers to return home, because they were few minutes late in the morning, was an overt way of cutting the labourer's wage who, in the log book, was recorded as absent.

*...Siss zerr bizin rent dan karo. Siss zerr ou travay ti pe komanse? Wi maa enn tigit si tar la ou retourn lakaz si ou vinn tard. Kisanla ti pe retourn ou? Sirdar la...<sup>117</sup>*

*(Eng. trans: At 6 o'clock had to reach the field. Your work started at 6 o'clock? Yes if you were a little late he returned you home if you late. Who returned you home? The Sirdar)*

Employers took advantage of the 1862 Labour Ordinance to mark as absent, labourers who had to walk five miles to work and thus spent half their time walking.

The labourers were not paid for when they were marked as days absent. Hence, when they were ill or after giving birth, they did not perceive a salary. However, in instances of maternity, Bawol declared that the estate provided them milk for approximately three months.

Because of these harsh discriminatory practices, the labourers perceived the *Sirdar* and the *Kolom* as being harsh and unjust. They used their power and authority in an abusive and oppressive way. Yet, the perception of *Sirdars* is not unanimous, *ena ou gagn move ena ou gagn inpe bon<sup>118</sup>* (Eng. trans. There were good and bad *Sirdars*).

Although corporal punishment was not sanctioned, it was a common practice. However, as stated by Dananan, the *Kolom* did not hit nor ill-treat the *Sirdar*, but the former gave instructions to the

latter to hit and even dismiss the labourers who did not do their work properly. When dismissed, they did not receive any compensation.

The degree of the punishment was not as harsh as during the slave period. Such practices exemplify the gap that existed between the Law and the application of the Law.

### 3. LIVING CONDITIONS

#### Subsistence

Motivated by the willingness to improve their living conditions and to offer to future generations opportunities of a better life, the respondents worked hard and tried, as much as possible, to make savings. Subsequently, several interviewees testified that they were horticulturalists<sup>119</sup> and that their parents were *métayers*. These activities, small-scale farming and sharecropping, were alternative economic avenues.

For example, Satianand's family was poor and to make ends meet, they practised small-scale farming; they cultivated land and reared cattle for sales. His father worked as labourer and was a *métayer* as well. His father and uncles rented a field in Clemencia (located on the West Coast Southeast of Camp de Masque Pave) of approximately 1 *arpent* or 1½ *arpent*. It seems that it was marshy land and between 1944 and 1945, they cultivated rice. Gradually with the savings they made, his father and uncles bought two or three plots of land.

Many of the estate workers interviewed lived a semi self-sufficient lifestyle. They practised small-scale farming as a means of subsistence and as a source of additional income as well. They cultivated vegetables and fruit, mostly, cassava, potatoes, sweet potatoes, *pommes d'amour* (Eng. trans. tomatoes), banana and *chou chou* (Eng. trans. chayote or christophene). They reared livestock, mostly cows for milk and chickens, for their personal consumption, and they sold the surplus.

*...Li ti plante avec li ti pe vende osi ti ena 1 bout la ter? Wi so mama ti don li. E Kombyen la livr ti pe vende? Pa kone 5 sou si pa 10 sou...Dimounn ti pe achete? Wi mo mama ti pe, ti pe vende...<sup>120</sup>*

*(Eng. trans: he was cultivating [land] and selling as well there was he had a plot of land? Yes his mum gave him [a plot of land]. How much the pound was sold? Do not know 5 cents or 10 cents...People bought? Yes my mum sold...)*

Bawol confirmed that they earned more money with rearing livestock. He had a cow and with the sales of the milk, he earned approximately 70 rupees per month. He sold the milk to a merchant who sold the milk in town.

Compared to nowadays, they were less dependent on the consumption market to feed themselves. Hence, they could afford to make savings to invest in land. Consequently, most of the respondents who were initially tenants or whose parents were tenants are now property owners.

For example, Dananan is now a small planter and the owner of three or four fields. It seems that he gave one field to his son. He employs people and sells his crop at the market. His field are means to secure revenue.

They bought essentially canned food, bread, fish and sardine. Those who were not provided with free ration purchased rice and oil as well. All the respondents stated that, long ago compared to nowadays, food was relatively cheap. However, life was expensive, given the prevailing socio-economic context. They were financially poor but they did not starve because they were, to some degree, self-sufficient and *Manze li labondanss kass ti mizerr aster nu ena kass manze mizer<sup>121</sup>* (Eng. trans. food was abundant money was poor now we have money food is poor).

For example, Dananan estimated the cost of rice was 5 cents a pound; bread, 1 cent, and sardine, 3 cents. Bhudyea bought fish for 40 to 60 cents that she found relatively cheap.

According to the Royal Commission Report (1909, p. 11), small planters consisted of Indians cultivating from half an acre to 100 acres of land. The *morcellement* movement had been going for a considerable number of years (since the 1840s). Most Indian immigrants and Indo-Mauritians bought their land under a system of payment in five annual instalments and often, they agreed to pay high prices of the land. It was considerable financial burden until the purchase money was paid off, which might take more than five years. The closing of small sugar mills allowed the estate owners to divide portions of their land among Indian small planters who constituted an important section of the community.

The report went further, expounding that the colony's prosperity and progress relied on these small planters.

This semi self-sufficient lifestyle allowed people to survive harsh living conditions in estate camps, and especially during the Second World War, when food was further rationed and especially rice. As stable food, potato and cassava were substitute to rice and people shared and/or bartered their harvest.

The residents lived a rather natural lifestyle. They practised recycling; they used the sugarcane by-products such as the sugarcane fibres to feed the cattle; they used natural material to construct toys and used the cans as glasses. For example, Satianand fetched a cart of sugarcane fibres to feed the two cows they reared. A cart of food lasted 2 to 3 days. After the cutting season, the fibres were scarce and they fed the animals with grass. They sold the milk to a wholesaler who came to Clemencia on a motorcycle to buy the milk that he sold in Port Louis. The milk was stored in *bidon de lait* (Eng. trans. Tin).

They were aware of their environmental and natural resources and the importance to preserve resources for future generations. Hence, they were cautious not to waste food and other resources, and of the dangers of overconsumption.

However, it should be stressed that even though it is a popular belief that all the descendants of Indian immigrants were/are small planters, which implies that they lived a semi self-sufficient lifestyle, in fact, some of the respondents did not practise small-scale farming. Since they lived in estate camps, they were provided with free ration and they were dependent on the consumer market. The credit facilities that the shopkeepers offered to their clients ensured that the latter could feed themselves.

*...Zot aste manze? Wi laboutik. Ouswar zot plante? Non laboutik...kot nou ti pe pran rasyon zot donn nou credi...Ler ou gagn lapey ou paye...<sup>122</sup>*

*(Eng. trans. You bought food? Yes [at the] shop or you grew? No [at the shop]...where we bought food they provided credit...when you get your salary you pay back)*

The workers were provided with a ration card on which the Estate Management wrote the number of children. The Royal Commissioners reported that most estate owners issued rations and the value of the labourer's rations ranged from four to six rupees a month. However, many township day labourers who were Coloured Creoles received from 50 cents to 1 rupee a day without rations<sup>123</sup>.

When they went for food shopping, they presented the card to the shopkeeper who gave them their ration as per the details on the card. But, along the lines of the testimonies, it seems that rations to which they were entitled, varied from one estate to the other.

Goinsamy had 5 pounds of cassava and of potato that lasted approximately two days and bought cornflour and taro. For Bhudyea, they had ¼ oil, ¼ soap and ½ pound of rice per week.

### Housing conditions and constructions

The estate econo-ethnic hierarchical organisation was reproduced in the residential segregation of the camps that was based on occupation. Residential segregation was common practice on the sugar estates. There was a camp for the agricultural labourers, including the *Sirdars*; and another where the artisans who worked in the sugar mill lived. *L'Etat-Major* (Eng. trans. The middle

managers) lived separately. Accordingly, the estate employees occupied different spaces according to their job status, which implies that they enjoyed different facilities.

*...Tu labourerr mem. Tu travayy dan le champ mem. Wi so madam so zom tu. Be bann artizan kot ti pe reste? Bann artizan ti ena dan kamp apart. Parski artizan tipe travayy dan Moulin. Leta mazor li travayy dan seksion li seff seksion sa, sa zot lakaz separe...<sup>124</sup>*

*(Eng. trans: All labourers. All worked in the Champ. Yes wives and husbands. But where the artisans stayed? The artisans were separate. Because the artisans worked in the mill. The managers worked in the section (office) he is the manager of the section, his house was separated)*

The house construction materials were overt indicators of differential treatment. The labourers lived in thatched houses, whilst the artisans' houses were made of corrugated iron-sheet and it seems the latter enjoyed better living conditions. The living conditions in the camps, where the agricultural labourers lived, were rudimentary compared to the camps where the artisans lived. Even if the artisan and the labourers were manual workers, the latter had a lower status compared to the former.
